E. The Contractor shall furnish all nuts, bolts, washers, gaskets, foundation bolts, and all other items necessary to install the equipment specified herein. Foundation bolts shall be of a size recommended by the manufacturer of the equipment. All nuts, bolts, foundation bolts, and washers shall be hot-dip galvanized steel or stainless steel, as specified herein, or shown on the Plans.

F. Equipment shall be installed in a neat workmanlike manner in accordance with accepted practices. Alignment of pumping equipment shall be by a qualified millwright. Foundations and supports for equipment shall be poured to within one inch from finished elevation. The floor shall be thoroughly roughened by chipping where supports, foundations or bases are to be poured. Foundation bolts shall be located by templates which shall be left in place during the pouring of the concrete. The equipment shall be set and shimmed with steel wedges to the required finished elevation. The foundations shall be encircled by forms and the equipment grouted in, using epoxy grout, as specified herein. Rodding or other suitable means shall be used to assure that all voids have been filled. After the grout has set, the shims shall be removed and the resulting spaces filled with grout. After setting, this grout shall be trimmed to match the adjoining grouted surfaces. The matching surfaces of the grout and foundation on all pumps shall be rubbed with a carborundum brick to produce a smooth, even finish, satisfactory to the MD-WASD. Exposed corners shall be chamfered 1 inch.

G. The pumps and motors shall be placed in position and shall be perfectly aligned in accordance with the recommendations of the pump manufacturer, and to the satisfaction of the MD-WASD. Bolts shall then be tightened, and the alignment shall be rechecked. Alignment and checking shall be done in the presence of a MD-WASD representative.

3.05 STRUCTURAL WORK

A. All concrete work shall be constructed in accordance with all applicable provisions of Section 03300.

B. If, in performing the concrete work hereunder, the forms holding the concrete should fail, sag or get out of line in any way whatsoever, repair such damage to the

complete satisfaction of the Engineer. All completed members shall be straight and true, and present a uniform appearance. The use of excavation walls as forms will not be approved.

C. Concrete surfaces shall be inspected immediately after the forms are removed. Defective areas shall be chipped away to the depth of the imperfections but not less than one inch deep. These areas shall be kept wet for at least two hours before patching. Immediately thereafter, all the holes shall be brushed neat with cement grout. While the grout is still wet, the holes shall be filled with a barely moist grout consisting of one part Portland cement and three parts sand, which shall be driven tight with wooden caulking tools and finished off flush and smooth. The mortar patches shall be cured as specified.

D. The dry well floor and valve pit floor shall slope one inch from the farthest point to the sump.

E. Construct the foundations for the pumps and motors with non-shrink epoxy grout. The foundation shall include anchor bolts, nuts, washers, and sleeves as required for the equipment. Anchor bolts shall be in accordance with the equipment manufacturer's recommendations and as approved by the MD-WASD. The foundations shall be poured to heights of not less than one inch below the elevation required to bring the equipment to the correct elevation, leaving room for placing grout to maintain the equipment at the proper elevation. After the forms have been removed, the foundations above the floor line shall be rubbed smooth with a carborundum brick. Exposed corners shall be chamfered 1-inch. Anchor bolts, nuts, washers, and sleeves shall be hot dip galvanized.

F. The Contractor shall construct concrete foundations for the check valves, including felt paper lining. Foundation and supports shall be allowed to cure for at least 7 days before setting any equipment. The floor shall be thoroughly roughened by chipping where supports are to be poured. After the forms have been removed, the foundations above the floor line shall be rubbed smooth with a carborundum brick. Exposed corners shall be chamfered 1 inch.

3.06 ACCEPTANCE TESTING

A. The Contractor shall inform the City in writing that the station is ready for operation, and shall, in the presence of the City's representative, demonstrate the operability and correct adjustment of every device included in the Project. The Contractor shall furnish all gauges, testing devices, water to fill (and refill as required) the wet well, electric power, labor, and other necessities to demonstrate that the station is ready to be put into operation. All tests and/or demonstrations shall be conducted to the complete satisfaction of the City.

B. Testing of the different items of equipment shall be conducted as many times, and for as long as is necessary, to determine whether the various items meet Specifications. Discharge piping shall be tested for leaks under pump shut-off head condition. No leakage is allowed. All interior ductile iron piping except the pump-

suction piping shall be tested and made "drop-tight" under a hydrostatic test pressure of at least 100 psi. Sections of discharge piping which cannot be isolated by valving for full pressure tests shall be tested at system pressure with no leakage allowed. Pump suction piping and valves shall be made "drop-tight" when the wet well is flooded to the invert level of the gravity line entering the wet well.

C. The Pump Station shall be tested per pump manufacturer's recommendations, WASD Standards for Submersible/Centrifugal Pumps and in the manner described below:

1. Fill wet well with water.
2. For pump number one:
   - Check winding resistance and record readings.
   - Place the operating mode selector switch in the manual position.
   - Record voltage and amperages.
   - Take pump down time and document it.
3. For all subsequent pumps follow steps 1 and 2.
4. With water level below lead pump starting point place all pumps selector switch to automatic position and continue adding water to wet well as necessary.
5. Observe lead pump run.
6. Increase water flow into wet well for lag pumps to run.
7. Continue this process for all pumps.
8. Stop pouring water into wet well and observe as all pumps shut off at the pre-selected levels.
9. Return selector switch to the off position.
10. Allow well to fill up to verify that High level alarm is functioning.
11. Again, pump down well in manual operation until low alarm level is triggered but
12. before pump looses prime.
13. Disconnect Digital Level Controller and check that lead pump is turned "on" and "off" at the proper levels by Back-up controller operating with float switches.
14. If the above parts of the test show that any component is not operating as intended, make necessary adjustments and/or repairs and repeat steps one through thirteen, until the entire system operates trouble free.
15. Fill the wet well with water to the invert of the influent pipe. Leave it full of water for at least two hours. If the water level goes down, locate and repair the leak to the satisfaction of the Engineer. Repeat test to ensure absence of leaks.

END OF SECTION

SECTION 02615

CONCRETE PROTECTIVE LINER SYSTEM FOR PRECAST STRUCTURES

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. Furnish and install all labor, materials, equipment, and incidentals required to supply polypropylene, random copolymer (PP-R) concrete protective liner in the precast wet wells and manholes as required and as shown on the plans. The liner system shall be AGRU "Sure-Grip" PP-R Concrete Protective Liner, or approved equal polypropylene lining, as installed by U.S. Precast Corporation, Miami, Florida and Joelson-Taylor Concrete Products at Venice, FL, Deland, FL and other locations in this state.

B. PP-R concrete protective liner shall be designed and installed by the manufacturer of the precast structure to protect the structure's interior surfaces from chemical attack and microbial corrosion, and to facilitate the prevention of ground water infiltration. A watertight seal between the ring and cover, or access hatch, and the liner, must be incorporated into the design. Additionally, the liner must be sealed at the bottom of the concrete structure's wall with a waterstop assembly thermo-welded to the wall liner, or with continuous liner coverage over the top of the base slab. All construction joints must be sealed by extrusion welding the liner seams together to form a continuous and flexible seal between structure sections.

1.02 SUBMITALS

A. The contractor shall submit for review a detailed CAD shopdrawings for each type of structure to be used on the project. These drawings shall detail the precast structure, per the design specified for the project, and shall show the concrete protective liner's placement on the structure's interior wall surfaces, at the construction joints, at pipe and other conduit connections, and at the adjustment area between the precast structure and the ring and cover. A manhole frame sealing system, in accordance with Section 02620, may be used in lieu of liner at the adjustment area.

B. The contractor shall provide, upon request, detailed thermo-welding and weld testing procedures, and supply to the engineer, upon request, a copy of the liner manufacturer's certification of training for those personnel performing the welding.

PART 2 - PRODUCTS

2.01 PHYSICAL PROPERTIES

A. The PP-R liner shall be free of pores, pinholes, voids and foreign bodies. All anchoring studs shall be manufactured during the extrusion process in one piece with the sheet. No welding to attach the studs to the sheet or mechanical finishing work is permitted. All welding rod, profile strips, cap strips and polyester backed transition wrapping shall be manufactured from

the same resins by the same manufacturer. The liner manufacturer shall be ISO 9001 certified.

B. The characteristic values of the raw materials shall be as follows:

PROPERTY	TEST METHOD	UNIT	STD. VALUE
Density	ASTM D 792-86	G/cm^3	.898
Melt Flow Index	ASTM D 1238-88	G/10min	(190/5)
Heat Reversion	ASTM D 1637-83	%	< 2
Yield Stress	ASTM D 638-89	PSI	$\geq$ 2,900
Elongation of Yield	ASTM D 638-89	%	$\geq$ 10
Elongation at Break	ASTM D 638-89	%	$\geq$ 50
Fire Classification	UL 94		V2
Electric Conductivity			10^{13}
Resistance to Pull-Out	SKZ Test Directives	T/m^2 T/ft^2	30 3
Maximum Working Temperature		C. F.	90 degrees C. 194 degrees F.

2.02 CONFIGURATION

A. Studded PP-R liner sheets shall have a minimum design thickness of 2 mm (.079 inches) and have a minimum of 39 wedge shaped anchoring studs per square foot of liner. Minimum stud height shall be no less than 9 mm (.39 inches) with a minimum length of 14 mm (.55 inches). Anchoring studs must be capable of resisting continuous hydraulic backpressure, to a minimum of 40 feet of hydraulic backpressure, exerted between the interior wall of the concrete structure and the anchoring stud side of the protective liner.

B. Non-studded PP-R cap strips, used to bridge construction joints, shall have a minimum design thickness of 2 mm (.079 inches). Polyester backed non-studded PP-R transition sheets, used for the purpose of bonding PP-R to dissimilar materials, shall be attached to the PP-R sheet during the extrusion process.

C. The lining system shall be designed to be repaired, or modified, at any time during the design life of the system.

PART 3 - EXECUTION

3.01 INSTALLATION

A. The installation of the PP-R concrete protective liner into precast wet wells and manholes shall be accomplished only by a precast concrete manufacturer certified by the liner manufacture, with a minimum of five years of manufacturing experience, and a minimum of five years experience in the installation of corrosion resistant thermoplastic sheet liners in concrete structures. Upon request, the liner installer shall provide written certification that the installation is in accordance with the liner manufacturer's installation specifications.

B. Placement of the liner on forms shall conform to the liner manufacturer's written instructions. All shop and field welding shall be performed only by thermoplastic extrusion welders certified by the liner manufacturer. All field thermo-welding shall additionally be performed only by confined space trained, and certified personnel.

- END OF SECTION -

SECTION 02625

SANITARY SEWER MANHOLE INFILTRATION INSERT

PART 1 - GENERAL

1.01 SCOPE

. This section specifies sanitary sewer manhole infiltration inserts. Manhole inserts shall be furnished and installed in all new sanitary sewer manholes and all manholes to be rehabilitated as part of the Project.

PART 2 - PRODUCTS

2.01 GENERAL

The manhole infiltration inserts furnished shall be the product of firms which have been regularly engaged in the manufacture of such items for a period of at least five (5) years.

2.02 MATERIAL

A. All materials used in the manufacture of the infiltration inserts shall be highly resistant to corrosion from sanitary sewer atmospheres containing hydrogen sulfide and dilute sulfuric acid.

B. Infiltration insert body shall be manufactured of High Density Polyethylene meeting the requirements of American Society for Testing and Materials Standard D1248-84 (Reapproved 1989), APolyethylene Plastics Molding and Extrusion Materials@, Type III, Class A, Category 5 or stainless steel, when required by the Department.

C. Insert body thickness shall be a minimum of .125 inches. Inflow dish shall be one piece molded with structural ribbing members in the bowl area for extra structural integrity. Inflow dish is to have smooth radius molded edges for additional strength and prevention of cracking. The insert shall have a straight-side design to allow penetration of the manhole lid dropping through the clear opening of the manhole frame. The depth of the infiltration insert shall be a minimum of 5 inches from the smooth radius molded edge to the center of the bowl area. The insert shall be designed to provide a sufficiently loose fit into the manhole frame to allow easy removal. Manufacturers name and the date manufactured shall be molded into the inflow dish.

D. The infiltration inserts shall be dimensioned to fit sanitary sewer manholes as shown on the Miami Dade Water and Sewer Departments Standard Detail #SS4.0, “Type “A” Manhole cover and Frame” pages 1 and 2 of 2.

E. The gasket shall be a minimum of .5 inches wide and shall be a minimum thickness of .125 inches installed by the manufacturer and shall be envelope type, providing a seal on the lower side of that portion of the insert, which sits in the manhole frame. The gasket shall be closed cell Neoprene rubber and shall provide a watertight seal when installed. The gasket

shall be permanently attached to the insert by means of chemical bonding, (or waterproof adhesive). The maximum amount of leakage through the infiltration insert shall be five (5) gallons in twenty-four (24) hours.

F. Ventilation is provided by a vent hole on the side of the bowl.

G. A handle made of nylon webbing no less than one (1) inch wide, shall be located so that it does not interfere with the installation of the manhole lid, yet still provide for easy removal of the infiltration insert. Corrosion resistant fasteners shall be used to fasten the nylon webbing to the inflow dish. The handle shall be able to withstand a pull of at least 500 pounds before failure or separation from the insert body.

H. Bidders may be required to submit a sample inflow dish along with a complete detailed specification and certifications referenced in this document for evaluation.

I. The County reserves the right to perform its own testing procedures or to send any and all samples to any laboratory for analysis. On the basis of this testing and analysis, the County shall be the sole judge of the acceptability of the sample in conformance with the specifications and its decision will be final. Any sample submitted shall create an express warranty that the whole of the goods to be provided by the contractor shall conform to the sample submitted.

J. Five (5) year warranty against defects.

K. Insert shall be an “Inflow Defender” by USSI, LLC; Venice, FL; (941) 926-2646 or approved equal.

PART 3 - EXECUTION

3.01 INSTALLATION

A. Inserts shall be installed in accordance with the manufacturer recommendations.

B. The Department reserves the right to require installation of stainless steel inserts, as required.

C. Manhole frame shall be set so that the tops of the covers are flush with the adjoining pavement or ground surface.

- END OF SECTION -

SECTION 02822

CHAIN LINK FENCES AND GATES

PART 1 - GENERAL

1.01 WORK INCLUDED

A. The work included in this Section consists of furnishing and installing a galvanized steel chain link fence, complete with gates and "V" arms with barbed wire, where permitted, to be constructed as shown on the Plans.

B. Minimum fence height shall be six (6) feet, with a double leaf entry gate having a minimum ten foot clear opening; except that if building and zoning codes permit, the fence and gate height shall be eight (8) feet.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Fabric:

The chain-link fence fabric shall meet the requirements of ASTM Standard A392, "Zinc-Coated Steel Chain-Link Fence Fabric", latest edition. Zinc coating of the fabric shall be not less than 2 ounces per square foot of wire surface (Class 2 coating). Fabric shall be one-piece fabric height as shown on the Plans, with 2-inch by 2-inch mesh of No. 9 gauge wire, unless otherwise specified. Top and bottom selvages shall be twisted. The fence shall have a single strand of 7 gage galvanized coil spring wire at the bottom, fastened at each post, and at 2 foot centers, with hog rings, extending to within 1-inch of the ground.

B. Posts and Other Appurtenances:

All tubular members including gate members shall comply with ASTM Standard A 53-90b, "Pipe, Steel, Black and Hot-Dipped Zinc-Coated (Galvanized) Welded and Seamless, for Ordinary Uses", Type S Grade A or B, and shall be plain-end steel pipe, with zinc coating applied inside and out by the hot-dip process. Zinc coating shall be not less than 1.8 ounces per square foot of pipe area. Gate frames shall be hot-dip galvanized after fabrication. All fence posts shall have weather proof caps which shall conform with the specifications detailed elsewhere in this section. Fence components shall be as follows:

Components	Nominal Pipe Size	Outside Diameter	Weight Per Foot
Top rail and braces	1 1/4 inches	1.660 inches	2.27 pounds
Gate frames	1 ½ inches	1.900 inches	2.72 pounds
Line posts	2 inches	2.375 inches	3.65 pounds
Corner posts	2 ½ inches	2.875 inches	5.79 pounds
Gate posts (less Than 10 ft. leaf)	3 inches	3.500 inches	7.56 pounds
Gate posts (greater than 12 ft. leaf)	6 inches	6.625 inches	18.97 pounds

C. Top Rail: The top rail shall be provided with couplings approximately every 20 feet. Couplings are to be the outside sleeve type, at least 6 inches long.

D. Concrete: Concrete shall have a minimum compressive strength of 3,000 psi at 28 days.

E. Barbed Wire: Where permitted by building and zoning codes, the fence shall have six strands of barbed wire mounted on "V" arm post top extensions, as shown on the Plans. Barbed wire shall meet the requirements of ASTM Standard A121, "Zinc-Coated (Galvanized) Steel Barbed Wire", latest edition, for wire gage No. 12-1/2 (2 strands) with a minimum zinc coating of 0.5 ounce per square foot of wire surface (Class 2 coating), applied before fabrication. The individual barb shall be four points, twisted around both wires, with the barbs spaced no more than 5 inches apart.

F. Gates:

1. The gate frames shall be assembled by welding and shall be hot-dip galvanized after fabrication. The gate shall be installed complete with all hardware, including hinges, locking devices, drop bars, center stops, holdbacks and other items, as required. Padlock will be furnished by the Department.

2. The gate frame shall be made of 1-1/2 inch diameter Schedule 40 pipe and shall be welded at all corners so as to form a rigid one piece unit for each leaf. Fabric shall be securely stretched and held in the center of the tubing by use of hooks, bolts and tension rods on all four sides of the gate opening frame.

3. If permitted, the gate shall have three strands of barbed wire mounted on frame top extensions and barbed wire shall be as specified above.

4. Gates shall have a center stop and drop rod with padlock hardware and padlock. Gate stops and latches shall all be hot-dip galvanized.

5. Gate post shall be equipped with caps designed to exclude moisture from the post.

6. Gate posts shall be equipped with caps designed to exclude moisture from the post.

G. Accessories: Miscellaneous hardware shall be of steel, malleable iron or ductile iron of standard design and conform to the requirements of the Chain Line Fence Manufacturer's Institute. All parts shall be galvanized except ties and clips may be of aluminum. The Contractor shall install all of the hardware necessary for a complete and working installation, and shall include the following:

1. "V" Arms or Single Arm Post Extensions for Barbed Wire:

Barbed wire supporting arms shall form an angle of approximately 45 degrees with the vertical fence and be fitted for attaching three strands of barbed wire. The top wire shall project approximately 12-inches horizontally from the fence line. The other wires shall be spaced uniformly between the top of the fence

fabric and the outside strand. The barbed wire supporting arm shall be manufactured from pressed steel or malleable iron capable of withstanding 200 pounds applied at outer strand of barbed wire. It shall be designed as a combination weather-tight closure cap and a barbed wire supporting arm, where barbed wire is required.

2. Padlocking Device shall be a fulcrum type latch assembly for double gates.

3. Post Caps shall be of cast steel or cast iron and shall be designed to provide a drive fit over the top of the post to exclude moisture.

4. Tension Bars shall be one piece for the fence height of the fabric with a minimum cross-section of 3/16" x 3/4". Provide one tension bar for each end post, and 2 for each corner and pull post. The gate shall have tension bars as shown on the Plans.

H. Tension bars, the tension bar bands, post caps, V-arms, brace rods, top rail clamps, turnbuckles, nuts and bolts, all gate hardware and remaining accessories shall be zinc coated in accordance with the ASTM Standard A153 "Zinc Coating (Hot Dip) On Iron and Steel Hardware", latest edition.

I. Hardware: Miscellaneous hardware shall be of steel, malleable iron or ductile iron of standard design and conform to the requirements of the Chain Link Fence Manufacturer's Institute. All parts shall be galvanized except ties and clips, which may be aluminum.

PART 3 - EXECUTION

3.01 ARRANGEMENT

A. Posts: Post shall be uniformly spaced, not to exceed 10-feet on centers. Intermediate post shall have waterproof tops which have integrally cast openings through which the top rails shall pass.. Terminal posts shall consist of one end, corner and pull posts.

B. Braces: Braces shall be provided at each gate, corner, pull and end post.

C. Ties and Clips: Fabric shall be fastened to all intermediate posts with 9 gauge tie wires, spacing not to exceed 14-inches apart. Fabric shall be tied to top rail with 9 gauge tie wires, spacing not to exceed 24-inches on centers.

3.02 INSTALLATION

A. All posts shall be installed in accordance with ASTM F567, "Practice for Installation of Chain Link Fence", latest edition. Where conflict between said standard and these specifications exists, the more stringent shall apply.

B. Post Setting: Line posts shall be set in holes 12 inches in diameter, 38 inches deep with 36-inch post embedment. Terminal posts shall be set in holes 15 inches in diameter, 38 inches deep with 36-inch post embedment. Gate posts for double swing gates shall be set in holes 18 inches in diameter, 38 inches deep with 36-inch post

embedment. Gate posts for single swing gates shall be set in holes 15 inches in diameter, 38 inches deep with 36-inch post embedment. After the post has been set and plumbed, the hole shall be filled with concrete. The exposed surface of the concrete shall be crowned to shed water.

C. Terminal and Gate Posts: Terminal and gate posts shall be set as specified above and shall be braced to the nearest post with a galvanized horizontal brace used as a compression member and a galvanized 3/8-inch steel truss rod and truss tightener used as a tension member.

D. Fabric: Fabric shall not be stretched until concrete footings have cured a minimum of three days. Chain link fabric shall be placed on the side designated by the Engineer of Record and shall be stretched taut approximately 1-inches above finish grade and securely fastened to all posts. Rolls of wire fabric shall be joined by weaving a single strand into the ends of the rolls to form a continuous mesh.

END OF SECTION

SECTION 05540

ACCESS HATCHES

PART 1 - GENERAL

1.01 SCOPE OF WORK

The Contractor shall furnish and install access hatches, frames and accessories, where shown on the Drawings, and as specified herein.

1.02 QUALITY ASSURANCE

A. Codes: Access hatches shall conform with South Florida Building Code and OSHA requirements.

B. Manufacturer: Company specializing in manufacturing products specified in this section with minimum five years documented experience.

PART 2 - PRODUCTS

2.01 HATCHES

A. General:

1. Hatches for valve vault shall be aluminum when outside of the right-of-way and shall be steel when in public right-of-way. In all cases hatches shall be double door type designed for AASHTO H-20 wheel loads.

2. The access hatches shall have spring loaded covers for easy opening, recessed padlock and automatic 90-degree hold-open arms. Hatches shall be equipped with a flush drop handle which does not protrude above the cover. Hinges shall be all stainless steel with tamper proof stainless steel bolts and nuts, and shall be removable for maintenance after the access hatch is cast in place. Access hatches shall be furnished with a safety chain (double door leaf design). Access hatch shall have a stainless steel slamlock with removable outside handle and fixed inside release handle and shall be equipped with stainless steel compression springs.

3. When mounted, door leaf shall be flush with the top surface of the frame, with the exception of the projecting lugs. Hatches shall be of skid proof design.

4. Hardware shall be AISI Type 316 stainless steel. Aluminum used in the construction of the access hatches shall conform to Section 05140.

B. Valve Vault:

Valve vault hatch shall be Type AHD as manufactured by U.S.F. Fabrication, Inc., Hialeah, Florida, modified as specified herein, or approved equal.

C. For Submersible Pump Type Pump Stations:

1. Access hatches shall be U.S.F.F. Inc. Type AHD aluminum double door designed for AASHTO H-20 wheel loads, modified as specified herein, or approved equal.

2. Frame shall be furnished with upper guide holder, level sensors cable holder and stainless steel compression springs. Frame shall be securely placed and mounted above the pumps.

3. The access hatches shall have spring loaded covers for easy opening, keyed lock and automatic 90-degree hold-open arms. It shall be equipped with recessed lock and a flush drop handle which does not protrude above the cover. Hinges shall be all stainless steel with tamper proof stainless steel bolts and nuts, and shall be removable for maintenance after the access hatch is cast in place.

D. For Wet Well/Dry Well Type Pump Stations:

1. Access hatches shall be U.S.F.F. Inc. Type THD double door for the dry well and Type AHD single door for the wet well designed for AASHTO H-20 wheel loads, modified as specified herein, or approved equal.

2. Frame shall be furnished with stainless steel compression springs.

3. The access hatches shall have spring loaded covers for easy opening, keyed lock and automatic 90-degree hold-open arms. It shall be equipped with recessed lock and a flush drop handle which does not protrude above the cover. Hinges shall be all stainless steel with tamper proof stainless steel bolts and nuts, and shall be removable for maintenance after the access hatch is cast in place.

4. Frames shall be 1/4-inch thick minimum extruded aluminum with mitered and welded corners, and with strap anchors bolted or welded to the frame for embedment into the concrete slab. Frame depth shall be at least 2-1/2 inches below the horizontal top surface of the hatch doors. The exterior portion of the frames which will be in contact with the concrete, and the strap anchors, shall be painted with a factory applied bituminous coating. Run PVC pipe drain from frame to sump in dry-well.

PART 3 - EXECUTION

(Not Used)

END OF SECTION

SECTION 11205

SUBMERSIBLE (WASTEWATER) PUMPS

PART 1 GENERAL

1.01 SCOPE OF WORK

A. The Contractor shall furnish and install submersible non-clog wastewater pumps and appurtenances and place in satisfactory operation, in a workmanlike manner, all machinery, equipment, apparatus and accessories required for a complete installation in accordance with these specifications.

B. It is the intent of these Specifications to obtain complete and operable equipment. All items and accessories appearing in the Drawings, in the manufacturer's literature as standard, and all items specified herein, shall be included. Items not included herein or on the Drawings or manufacturer's literature, but which can be reasonably inferred as necessary for the equipment to be properly and legally operable, shall be included.

1.02 REFERENCES

A. This section contains references to the following documents. They are a part of this section as specified and modified. In case of conflict between the requirements of this section and those of the listed documents, the requirements of this section shall prevail.

1.	ABMA 9-90	Load Ratings and Fatigue Life for Ball Bearings
2.	ABMA 11-90	Load Ratings and Fatigue Life for Roller Bearings
3.	ASTM A48-00	Gray Iron Castings
4.	ASTM A108-99	Steel Bars, Carbon, Cold Finished, Standard Quality
5.	ASTM A276-00a	Stainless and Heat-Resistant Steel Bars and Shapes
6.	ASTM A278-93	Gray Iron Castings for Pressure Containing Parts for Temperature up to 650 Degrees F
7.	ASTM A322-91	Steel Bars, Alloy, Standard Grades (1996)
8.	ASTM A576-90b	Steel Bars, Carbon, Hot Wrought, Special Quality (2000)
9.	ASTM A743/A743M-98a	Castings, Iron-Chromium, Iron-Chromium-

		Nickel, Corrosion-Resistances for General Application
	10. Hydraulic Institute	Standards of the Hydraulic Institute, (Current Edition)

1.03 SUBMITTALS

A. The Contractor shall submit the following after approval of drawings, but prior to construction of pump station:

1. Pump Drawings.
2. Pump performance curves, including other impeller sizes.
3. Predicted pump performance curves for each condition point specified in Part 2 showing head, power, efficiency and NPSH required on the ordinate plotted against capacity on the abscissa (x-axis).
4. Materials of construction.
5. Motor drawings
6. Complete electric motor data.

B. Submit in accordance with Section 01340, "Shop Drawings."

1.04 QUALITY ASSURANCE

A. Pumping units and accessories shall be the standard product of manufacturers which have produced and sold such pumps and appurtenances for a period of at least 5 years for similar service.

B. Spare parts shall be available from the manufacturer, not the vendor. All mounting, guides, and spare parts shall be supplied by the manufacturer.

C. The Department has identified area with ragging and clogging problems which require the use of submersible pumps that have been field tested in the Department’s system. The Department Approved Pumps in areas with rags and wipes issues shall have cutters or other features to successfully operate at the location with the severe clogging problems. Coordinate with the Department Engineer if the proposed pump is located at a severe clogging location.

D. Pump Materials of Construction: Any pumps submitted as an alternate shall meet the design curve and material construction of the specified pump to the satisfaction of the Engineer. Any submitted alternate shall be reviewed to verify that the Department will receive the same quality of grade of steel, epoxy coating, mating to the discharge elbow and resistance to corrosion.

1.05 PUMP WARRANTY

A. The pump manufacturer shall warrant the units supplied to the owner against defects in workmanship and materials for a period of 5 years or 10,000 hours of operation, in normal use, operation and service. The warranty shall be in printed form and shall apply to all similar units. A copy of the warranty shall be supplied

with each pump. The warranty shall consist of the following:

1. From 0 18 months or 0 - 3,000 hours, 100% warranty.
2. From 19 39 months or 3,001 6,500 hours, 50% warranty.
3. From 40 60 months or 6,501 10,000 hours, 25% warranty.

PART 2 PRODUCTS

2.01 PUMPS

A. Pump shall be totally submersible, non-clogging, electrically operated, designed specifically for use in municipal wastewater applications and capable of handling raw unscreened sewage. Pumping units shall be suitable for the allotted space shown on the Drawings and shall be satisfactorily suitable for the design conditions as determined by the City. Pump stations will be located in an area where clogging of pumps by debris in the sewer is expected. The proposed pumps shall be capable of passing debris without clogging (to the satisfaction of the Engineer).

B. Source: Provide pumping units by one of the following submersible pumps approved for use in the Water and Sewer Department system:

1. Xylem/Flygt;
2. ABS, with contra-block impeller;
3. Grundfos.

C. Design: The design shall be such that the pump unit shall be automatically and firmly connected to the discharge piping when lowered into place on its mating discharge connection. The pump shall be so designed that it may be lowered to or raised from its place in the wet-well by Type 316 stainless steel chain or cable and accurately guided by pipe guide bars extending from the top of the station to the discharge connection. The pump shall be guided by no less than two (2) separate Type 316 stainless steel guide rails of 2-inch minimum diameter for pumps of 29 or less horsepower; 3-inch minimum diameter for pumps between 30 and 100 horsepower and of 4-inch minimum diameter for pumps over 100 horsepower or other guide system as approved by the MD-WASD. There shall be no need for personnel to enter the wet-well.

D. Discharge Connection: Mating discharge connection of pump unit (aka Base Elbow) shall be permanently affixed to the concrete in the wet well with Type 316 stainless steel epoxy set anchor bolts furnished by and of the size recommended by the pump manufacturer. However, anchor bolts shall be 3/4-inch stainless steel, minimum. Sealing of the pumping unit to the discharge connection shall be accomplished by a machined metal to metal watertight contact. Sealing of the discharge interface with a diaphragm, O-ring or profile gasket shall not be acceptable. Provide a six-inch discharge for 20 HP and above.

E. Each pump with its appurtenances and cable shall be capable of continuous submersion under water without loss of water-tight integrity. Major parts such a

stator casing, oil casing, sliding bracket, volute and impeller shall be of cast iron ASTM A-48, Class 35B. All surfaces coming into contact with sewage other than stainless steel shall be protected by a coating resistant to sewage. All exposed bolts and nuts shall be Type 316 stainless steel.

F. The discharge connection (aka Base Elbow) shall be design and manufactured such that it will accept a Flygt CP or NP pump model. The base elbow shall be a product of the pump manufacturer and not a third party fabricator.

G. The pumps shall have a maximum weight of 1,500 pounds, as required to meet conditions described in these Specifications and design operating characteristics. The previously stated weight requirement supersedes any other weight listed elsewhere in these specifications. Pumps shall have a minimum efficiency of 50% at Best Efficiency Point (BEP).

2.02 COOLING SYSTEM

A. Motors shall be sufficiently cooled by the surrounding environment or pumped media. Cooling system shall provide for continuous operation in ambient temperatures up to 104^{o}F.

2.03 PUMP CONSTRUCTION

A. Material and Coating: The major pump components shall be ASTM A48, "Gray Iron Castings", Class 35B cast iron, with smooth surfaces devoid of blow holes and other irregularities; of sufficient strength, weight and metal thickness to insure long life, accurate alignment and reliable operation. All exposed nuts and bolts shall be Type 316 stainless steel. All surfaces coming into contact with sewage other than stainless steel shall be protected by an approved sewage resistant coating. The pump exterior shall be sprayed first with PVC epoxy primer. All remaining surfaces where watertight seal is required shall be machined and fitted with nitrile rubber "O" rings. Fittings shall be such that the sealing is accomplished by metal-to-metal contact between the machined surfaces.

B. Cable Entry Seal:

1. The cable entry water seal shall be designed to preclude specific torque requirements to insure a watertight and submersible seal. The cable entry shall be comprised of a cylindrical elastomer grommet flanked by stainless steel washers, all having a close tolerance fit against the cable outside diameter and the entry inside diameter and compressed by the entry body containing a strain relief function separate from the function of sealing the cable.

2. The cable entry junction chamber and motor shall be separated by a stator lead sealing gland or terminal board, which shall isolate the motor interior from foreign material gaining access through the pump top.

3. Cable entry assemblies utilizing an epoxy for sealing may be considered, on a case-by-case basis. Epoxy shall be locally and commercially available, and shall have maximum published cure time of six (6) hours at room temperature and shall be suitable for use in a municipal sewerage environment.

C. Impeller: The impeller(s) shall be of gray cast iron, Class 35B, dynamically balanced, single or double shrouded, non-clogging design having a long throughlet without acute turns. The impellers shall be capable of handling solids, fibrous materials, heavy sludge and other matter found in normal sewage applications. The impeller shall be of a single vane, 2 or 3 vane non-clogging design. Recessed impellers are not acceptable by the City. Impeller(s) shall be keyed to the shaft, retained with an Allen head bolt and shall be capable of passing a minimum 3-inch diameter solid sphere. One impeller tool shall be provided with each pump.

D. Wear Rings: A wear ring or wear plate system shall be used to provide efficient sealing between the volute and suction inlet of the impeller. Each pump shall be equipped with a brass, or nitrile rubber coated steel ring insert that is drive fitted to the volute inlet.

E. Volute: Pump volute(s) shall be single-piece gray cast iron, Class 35B, non-concentric design with smooth fluid passages large enough at all points to pass any solids that may enter the impeller.

F. Shaft and Mechanical Seal:

1. The pump and rotor shaft shall be the same unit. The shaft shall be ANSI Type 420 series stainless steel, or approved equal.

2. Each pump shall be provided with a tandem mechanical rotating shaft seal system. Seals shall run in an oil reservoir. Lapped seal faces must be hydro-dynamically lubricated at a constant rate. The lower seal unit, between the pump and the oil chamber shall contain one stationary and one positively driven rotating tungsten or silicon carbide ring. The upper seal unit, between the oil sump and motor housing, shall contain one stationary tungsten carbide or ceramic ring and one positively driven rotating carbon ring. The use of a positively driven rotating tungsten or silicon carbide ring is acceptable in lieu of the positively driven rotating carbon ring. Each seal interface shall be held in contact by its own spring system. The seals shall require neither maintenance nor adjustment, but shall be easily inspected and replaceable. Each pump shall be provided with an oil chamber for the shaft sealing system. The oil chamber shall be designed to prevent over-filling and to provide oil expansion capacity. The drain and inspection plug with positive anti-leak seal shall be easily accessible from the outside. The pump shaft shall rotate on 2 permanently lubricated bearings with a minimum L10 rating of 50,000 hours.

2.04 PUMP MOTOR

A. The pump motor shall be squirrel cage induction, shell type design, housed in an air filled, watertight chamber, no more than 60 HP and 1,800 RPM, 240/480 volts, 3 phase, 60 Hertz, 1.15 S.F., NEMA Type B. The stator winding and stator leads shall be insulated with moisture resistant Class F insulation which will resist a temperature of 155 degree centigrade. The stator shall be dipped and baked 3 times in Class F varnish. The motor shall be designed for continuous duty capable of sustaining a minimum of 12 starts per hour. Motors shall be approved for Class 1, Division II, Group D atmospheres in accordance with NEC classification for hazardous areas. Motors shall be able to start within the 1300% factor allowed by NEC 430-52 or documentation shall be provided as to why it cannot.

B. Each unit shall be provided with an adequately designed cooling system to permit continuous operation in totally, partially, or non-submerged condition. Cooling media channels and ports shall be sized to be non-clogging.

C. Motor bearings shall be permanently grease lubricated. Oil filled motors are not acceptable.

D. Thermal switches shall be embedded in the stator lead coils. All stators shall incorporate thermal switches in series to monitor the temperature of each phase winding. At 125 degrees C (260 degrees F) the thermal switches shall open, stop the motor and activate an alarm. These thermal switches shall be used in conjunction with and supplemental to external motor overload protection and shall be connected to the control panel. Wire nuts or crimping devices are not acceptable. The motor and pump shall be designed and assembled by the same manufacturer

E. The pump motor cable shall be suited for submersible pump applications with Underwriters Laboratory approval permanently embossed on the cable. Cable sizing shall conform to the National Electric Code Specifications for pump motors. Each pump shall be furnished with ample cable such that one continuous length of cable, supplied by pump manufacturer, will be all that is required to run from pump, when lowered in the wet-well, to the controls, without need of splices.

F. The motor horsepower shall be adequate such that the pump is non-overloading throughout the entire pump performance curve from shut-off through run-out.

PART 3 EXECUTION

3.01 INSTALLATION

A. All equipment shall be installed as shown on the Plans and in accordance with these specifications.

B. All motors shall be factory mounted by the driven equipment manufacturer in accordance with the motor manufacturers drawings and instructions. Field installation of the unit, including final alignment shall be the responsibility of the

Contractor.

C. Installation shall include furnishing all necessary appurtenances for initial operation and making final adjustments to place the equipment in operable condition.

D. All control and alarm wires, as required, shall be provided even if not shown on plan drawings.

3.02 PREPARATION FOR STORAGE

A. All flanges shall be covered to prevent damage. Pump motors, and shafts will be stored inside warehouses. Pumps may be stored outside, on wood members away from the ground, at sufficient elevation to prevent flooding, and protected from the weather by secured canvas or plastic coverings.

3.03 PUMP TESTS

A. The manufacturer shall perform the following inspections and tests on each pump before shipment from the factory:

1. Impeller, motor rating and electrical connections shall be checked for compliance with customer's purchase order.

2. Motor and cable insulation tests for moisture content or insulation defects shall be made.

3. Prior to submergence, the pump shall be run dry, to establish correct rotation and mechanical integrity.

4. Pump shall be run for 30 minutes submerged a minimum of 6 feet underwater.

5. After the operation tests, the insulation test is to be performed again. A written report, signed by a professional engineer, registered in the state where the tests were performed, stating that "A" through "D" (above) were performed and that the tests were satisfactorily accomplished, shall be supplied with each pump at the time of shipment.

3.04 FIELD QUALITY CONTROL

A. The supplier shall provide start-up service to place the pumps and controls in proper operation.

B. During this service, the Manufacturer’s Representative shall review the operation of the equipment and the pump and station will be inspected for proper installation and shall coordinate with Contractor and make recommendations.

C. The pumps shall be tested at start-up and the voltage, current and other significant parameters recorded. The manufacturer shall provide a formal test

procedure and forms for recording the data.

D. The supplier shall submit a written report to the Contractor, stating results of the start-up inspection. A copy of the report shall be furnished to the City. The Contractor shall inform the City 24-hours prior to commencement of such start-up services and tests. These services shall be at no cost to the City.

END OF SECTION

Revision #7, 5-2-2023
1.04 Quality Assurance added Paragraphs C and D
2.01 Pumps Paragraph B removed KSB Pumps from Products List

SECTION 11215

SUMP PUMP

PART 1 - GENERAL

1.01 SCOPE

The Contractor shall furnish and install sump pump and all appurtenances, as specified below, where shown on the plans or as required for a complete installation.

1.02 SUBMITTALS

The Contractor shall furnish full detailed manufacturer specifications, characteristic curves and shop drawings showing the make, model and descriptive data to the Department for the pump unit he proposes to supply. Submittals shall be approved prior to installation of pumping unit.

PART 2 - PRODUCTS

2.01 SUMP PUMPING UNIT

A. Sump pump in the dry-well shall be a submersible type with a cast iron or bronze housing, by Barnes, Covert Pump Division, or approved equal. Pump shall be rated for duty in conditions it shall be subjected to, including being totally submerged. Unit shall contain mechanical seal with rotating carbon face and stationary ceramic face. The motor shall be single phased, oil-filled unit, with overload protection and maximum ½-horsepower. However, sump pumps installed in dry wells ranging from 20 feet to 24 feet depths are excluded from this requirement and shall meet Department approval.

B. Sump in shall be sized per sump pump manufacturer's recommendation, but unless approved, not less than dimensions shown on the Department's Standard Pump Station Drawings. Dry-well sump shall include space for external float switch. Float switch shall be furnished with 10 feet cord and piggyback plug.

C. Where installed in valve-pit, sump pump shall be 1/3-horsepower, single phase, oil filled unit, with overload protection. Unit shall be Series BP27, by Barnes, or approved equal.

PART 3 - EXECUTION

3.01 INSTALLATION

A. All equipment shall be installed as shown on the approved plans.

B. Installation shall include furnishing all necessary wiring, piping and other necessary appurtenances for satisfactory operation and making final adjustments to place the equipment in operable condition.

C. All power, control and alarm wires as required shall be provided even if not shown on plans.

D. Installation, testing and start-up shall be as recommended by the manufacturer provided specifications.

E. Dry-well Installation: Provide a sump and sump pump in the floor of the dry-well in a corner opposite the wet-well. Slop the floor from all directions toward the sump. The PVC pump discharge line shall contain two swing-disk type check valves and a gate valve, and shall be piped to the top of the dry-well before passing through the wall into the wet-well.

F. Valve Vault Installation: Sump pump and local motor starting switch shall be installed in the valve pit and hard-wired to the control cabinet. Manual motor starting switch shall be NEMA 3, 4X and 12, corrosion-resistant, dust-tight and watertight. It shall be Crouse-Hinds NSSC-D22, or approved equal. Discharge from pump shall be conveyed to the wet-well using 1-1/2 inch diameter PVC pipe. (The Department may consider approval of 1-1/4 inch diameter discharge piping as shown in the Standard Pump Station Drawings.)

END OF SECTION

SECTION 11500

FUEL STORAGE TANKS

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. The work under this Section includes furnishing and installing above ground fuel storage tanks, with concrete bases, gauges, valves and piping, as required and as shown on Drawings; and other related items necessary for a complete installation, as indicated on the Contract Drawings.

1.02 RELATED SECTIONS

A. Section 02314 - Excavation, Backfill and Fill For Structures

B. Section 03300 - Cast-in-place Concrete, Reinforcing and Formwork.

C. Section 09900 – Painting

D. Section 16420 - Stationary Engine-Generator Set

E. Section 16425 - Portable Engine-Generator Set

1.03 REFERENCE, CODES AND STANDARDS

A. FDEP - Florida Department of Environmental Protection, Ch. 62-761 & 62-762, FAC

B. NFPA 30 - Flammable and Combustible Liquids Code.

C. NFPA 31 - Installation of Oil-Burning Equipment.

D. NFPA 70 – National Electrical Code (NEC)

E. NFPA 78 - Protection of Life and Property against Lightning.

F. FBC - Florida Building Code.

G. RER – Regulatory & Economic Resources Department, Miami-Dade County, Ch. 24-Miami-Dade County Environmental Code

H. U.L. Subject #2085 and #142.

I. UFC - ICBO Uniform Fire Code, Section 79 Appendix A-II-F

J. OSHA – Occupational Safety and Health Administration Standard 1910.23-1910.24

1.04 QUALITY ASSURANCE

A. Comply with the appropriate codes, regulations and standards referenced in paragraph 1.03.

1.05 SUBMITTALS

A. The fuel storage tank and accessories shall be FDEP approved and installation plans must have been reviewed and approved by RER/DERM.

B. Prepare and submit a site plan, drawn to scale, containing the following:

1. Show property lines and indicate occupancy or use of adjacent property.
2. Show streets, intersections and railroads.
3. Show buildings on the site and indicate type of construction. Show building openings on walls adjacent to tanks.
4. Show important utility lines, sewer, water, gas and electric including fire hydrants and catch basins.
5. Show any nearby waterways, streams, rivers, lakes or bodies of water.
6. Show any existing underground or aboveground tanks.
7. Show location of proposed tank and indicate shortest distance to buildings and property lines.

C. Prepare and submit detail drawings of tank, to include the following:

1. Tank type double-walled aboveground or underground storage tank (AST or UST), size, dimensions and spacing between adjacent tanks. Note: Miami Dade Water and Sewer Department requires aboveground tanks whenever possible.
2. Base slab dimensions and bollard location and size.
3. Vent size, height, location and type of cap.
4. Fill details including spill containment and overfill protection.
5. Piping details including shut-off/isolation valves and anti-siphon valve.
6. Pumps and other equipment, where applicable, including location, size and type.
7. Electrical details including shut-off switch location and grounding wire.
8. Level gauges and leak detection equipment. (i.e. Morrison Clock gauge for fuel level, Krueger Pop-up gauge for interstitial monitoring)
9. Signs and decals.

1.06 WARRANTY

The tank must carry a thirty year (30) warranty.

1.07 DELIVERY AND STORAGE

A. Deliver, store, protect and handle products under provisions of Section 01600.

B. Protect while transporting, storing, installing until work is completed.

C. Do not handle or move tank unless it is empty.

D. Do not drop or drag the tank.

E. Do not handle or install tank without having knowledge and experience in procedures involved with proper and safe installation of tank used for storage of stable, flammable and combustible liquids.

F. Equipment required for the shipping and off-loading of aboveground and underground storage tanks include lifting straps, forklift and crane up to 150 ton capacity and nylon tie down straps.

1.08 GENERAL FIRE PROTECTION

A. A sign which prohibits smoking shall be conspicuously posted.

B. Portable fire extinguisher shall be provided for the suppression of fires in accordance with NFPA 10 and UFC for high hazard area.

C. Exterior warning signs and labels shall be at proper location and configuration to meet applicable code requirements.

PART 2 - PRODUCTS

2.01 ABOVEGROUND TANKS

A. General:

The Contractor shall furnish an FDEP approved secondarily contained shop fabricated aboveground storage tank (AST) for flammable and combustible liquids. Storage tank system shall be UL listed for both vehicle impact protection and projectile resistant and shall be tested to and listed for the following:

1. UL - 142, aboveground steel tanks for flammable and combustible liquids.
2. UL – 2085, protected aboveground tanks for flammable and combustible liquids.

B. The tank shall be cylindrical in shape and have continuous welds on all sides conforming to the American Welding Standard for continuous weld. The primary and secondary tank shall be minimum 0.125 inch thick carbon steel and manufactured in accordance with U.L. 142. However, thickness shall be based on a thirty year (30) warranty.

C. The tank shall be designed and tested to provide 2-hour fire protection. The fire resistance of the tank shall be tested in accordance with the procedure established in U.L. 2085.

D. The primary steel tanks shall have "emergency vent" system as per NFPA 30 Code requirements.

E. The AST shall have a tank leak detector tube to allow for physical monitoring capability of the interstitial space between the primary and the secondary tank. A mechanical interstitial monitoring gauge (i.e., Kreuger Pop-Up) shall be installed.

F. The AST shall have a mechanical level gauge (i.e., Morrison Bros. Clock Gauge Model 818/818F).

G. The primary steel tank shall be pressure tested at 5 psig for 24 hours.

H. All openings shall be from the top only.

I. The AST shall have a coated exterior to resist weather and reflect sunlight.

J. The AST shall have a warranty of 30 years regardless of capacity.

K. The AST shall be constructed to allow for grounding in accordance with NFPA 78.

L. Tank shall be Fireguard Aboveground Tank or approved equal.

2.02 TANK CAPACITY

The tank capacity shall be as shown on Drawings. Minimum tank size shall be based on the fuel capacity required to run one pump continuously for five days, at maximum horsepower.

2.03 VENTING

A. Atmospheric Vent: The tank system shall be furnished with a 2-inch vent and an appropriate emergency vent. An open atmospheric utility vent cap shall be installed on the 2-inch vent line to protect against intrusion and blockage from water, debris or insects. Venting systems shall meet all 2-inch standard vent and emergency vent requirements of U.L. 142. Height of the vent line shall be per code. Vent line shall be capable of sufficient venting into the atmosphere in case of pressure build-up inside the tank. Vent cap shall be installed with no overhead obstructions to allow free flow of vapors from the vent.

B. Primary Tank Emergency Vent: The tank system shall be furnished with pressure relief nipples and emergency pressure relief devices to automatically relieve the pressure of the primary tank before it reaches 2.5 psig. It shall include a fire screen to prevent ignition from an external source.

C. Secondary Containment Venting Device: The tank system's secondary containment shall be furnished with an emergency venting device. The venting device shall consist of a pressure relief nipple and a relief device. The emergency device will open before the secondary containment internal pressure reaches 2.5 psig.

2.04 OVER SPILL CONTAINMENT

A. The AST systems shall include an FDEP approved over spill containment device.

B. Over spill containment device shall be mounted on top of the tank and shall surround the tank fill pipe to catch occasional spills.

C. A hand-activated spring-loaded normally closed valve shall be provided inside the containment to drain the spill back into the tank.

D. Lid to over spill containment device shall meet proper color–coding requirements for diesel fuel.

2.05 FILL PIPE

The tank system shall be furnished with a MNPT fitting for filling. The fill pipe shall be equipped with an adapter and lockable cap. Fill pipe diameter shall be 4-inches.

2.06 COLLISION PROTECTION

Collision protection approved by the tank manufacturer shall be located around tank perimeter for vehicular protection. Pipe bollards shall be installed for collision protection, as follows: concrete filled steel posts, 4-inches diameter (minimum) by 6 feet long, shall be set 3 feet into the ground within a 15-inch diameter concrete filled hole. Post shall be spaced 4 feet center to center and shall be spaced from tank in accordance local codes.

2.07 CONCRETE PAD

The tank system shall be installed on a reinforced concrete pad to protect against stresses from uneven settlement and to assure that the tank supports allow for inspection and maintenance beneath the tank. Concrete foundation (i.e, pad) shall have a minimum compressive strength in 28 days equal to 3000 psi. Pad length, width, thickness and placement specifications shall be as recommended by the manufacturer or engineer of record.

2.08 PIPING AND ACCESSORIES

A. All accessories (vents, product fill, etc.) shall be installed to meet the site specific requirements and governing codes.

B. Adherence to all operational safety precautions shall be taken under consideration and piping shall include safety valves as follows:

1. Angle check valve with pressure relief or foot valve and strainer. Foot valve and strainer shall be located 1-inch from the inside bottom of the tank.

2. Shut-off/isolation valve with fusible link on supply and return piping.

3. Anti-siphon valve (i.e., OPW Model # 199ASV) on the highest point of the supply line closest to the tank, if suction/supply line falls below the high fuel level.

4. Check valve in the return line.

C. Exterior warning signs and labels shall be properly located and meet applicable code requirements. Tanks shall be marked as required with warning signs: "FLAMMABLE" or "COMBUSTIBLE", "NO SMOKING", product identification, etc.

D. Exposed piping exterior surface shall be primed and coated with protective finish (i.e., Keeler and Long Tri-Polar Ferrite Primer and Rust-Oleum Industrial Acrylic Enamal 5225 (Royal “Safety” Blue) in a WASD approved safety blue color for diesel product.

2.09 ELECTRICAL

A. Electrical service and fuel piping to the pumps unit shall be installed in accordance with the requirements of NEC and NFPA and local code requirements.

B. All electrical devices used with or located twenty (20) feet of the tank shall conform to NFPA 70 Hazardous Locations. All electrical conduits and wiring connected to the tank shall be explosion proof and in strict accordance with NEC Class 1, Division 1.

C. Electrical grounding shall be installed on tank.

2.10 STAIRS AND CATWALKS

A. Install stairs/catwalks to facilitate access, inspections and maintenance services to the tanks as required.

B. Stairs shall comply with OSHA Standard 1910.24.

C. Railings shall be provided as required by OSHA Standard 1910.23

D. Stairs shall be 36” wide, straight-tread with top platform.

a. Top platform shall be 30” in direction of travel by 36” wide.

b. Top platform shall be 24”-30” below top of tank (excluding appurtenances).

E. Stair assembly shall be galvanized carbon-steel, free-standing with a 1”-3” clear gap between stairs and tank. (It shall not be in contact with tank or be supported by tank.)

PART 3 - EXECUTION

3.01 TANK SITE

A. The tank location and foundation shall comply with the all applicable local codes and ordinances.

B. Tanks shall not be located over underground utilities or directly beneath overhead power and telephone lines.

C. The tank shall be protected from vandalism and accidental damage in accordance with all applicable codes.

D. Fire department vehicle access should be provided within 150 feet of the tank.

E. The venting of the tank to a remote location must include the use of a steel pipe equal to or greater in size than the vent outlet. The methods of supporting such piping against displacement must comply with local codes.

3.02 FOUNDATION REQUIREMENT

A. The foundation for the tank shall be designed to support the tank plus 100% of the weight of the maximum amount of the product the tank will be storing. The foundation design shall also include provision for draining surface water away from the tank to minimize the risk of fuel accumulation from the over fill or spills at the tank footings.

B. The tank foundation (concrete pad) shall sit on compacted fill, free of organic material. The tank shall be installed on a continuous solid slab which will uniformly distribute the weight of the tank and its contents to the soil.

3.03 INSTALLATION OF ABOVEGROUND FUEL TANKS

A. General: The aboveground tanks shall be set on a concrete foundation (pad) in accordance with current installation instructions, foundation engineering drawings and shall comply with all governing code requirements.

1. Concrete Foundation (Pad): Reference and follow the appropriate manufacturer's or engineer of record’s drawings for the respective foundation size and load bearing requirements for pad lengths, widths, thickness, and placement specifications.

2. Unloading and Handling: A thorough inspection of the entire assembly shall be conducted prior off loading. Check for any damage, chipping or other impairments incurred during transportation. Do not remove the shrink wrapped plastic cover until after final installation of vents and piping. However, shrink wrap should be left on if installation is not to concur with delivery, as vault finish will be affected if shrinkwrapped and left exposed to sunlight for several days.

3. Equipment used to off-load: The equipment shall be adequate size and capability to lift the vault without dragging and dropping to ensure that no damage is done to the vault or its coating. The vault shall be lifted lowered, and secured only by use of nylon straps (chain and cables are not allowed) placed at designated lifting areas to avoid damage to the assembly.

4. The vault shall be anchored in accordance with applicable code requirements.

5. Air Pressure Test of Internal Steel Tank: Contractor shall verify the internal steel tank tightness during the process of placing the unit into service. Use the basic procedure and desired result as an unvaulted steel tank, and in accordance the industry standard procedures as published by the Steel Tank Institute or other professional organizations and manufacturer recommended procedures. Pressure test the tank at 5 psig. No leakage shall be permitted. Vaults under pressure shall not be left unattended.

END OF SECTION

SECTION 33 05 31.13 (15068)

PVC C900 SEWER FORCE MAINS

PART 1 GENERAL

1.01 SCOPE

A. This Section includes materials, installation and testing requirements of the Department for PVC C900 sewer force mains installed in its service area. Size range is 4 through 48 inches.

B. PVC C900 force mains are acceptable for use in areas with limited heavy vehicle traffic only. Not for use near gas stations or other sites which may have hydrocarbon contamination.

C. All PVC pipe used shall be of new or recent manufacturer. Pipe with surface discoloration will not be allowed.

D. Pipe Fittings shall be ductile iron.

E. Force mains 16 inch or larger shall be fully restrained the entire run of the pipe.

F. This Section does not purport to cover all material or installation procedures which may be required, whether by the nature of the proposed work, by the Department or by other regulatory agencies.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. The work shall proceed in accordance with the following specifications sections, bound herein:

1. Section 01 33 00 (UC-005) – “Project Approval”
2. Section 01 33 23 (01340) – “Shop Drawings”
3. Section 01 35 13 (01100) – “Special Project Procedures”
4. Section 01 35 26 (01016) – “Safety Requirements and Protection of Property”
5. Section 01 42 16 (01005) – “Defined Terms"
6. Section 01 55 26 (01750) – “Maintenance of Traffic and Use of Public Streets”
7. Section 01 71 23 (01031) – “Grades, Lines and Levels”
8. Section 02 00 00 (01011) – “Site Conditions”
9. Section 31 23 33 (02315) – “Trenching and Backfilling for Piping Systems”
10. Section 33 01 10.54 (02505) (UC-170) – "Cleaning and Testing of Mains"
11. Section 33 14 00 (15060) – “Piping and Fittings”
12. Section 33 31 23 (UC-750) – ”Sewer Force Mains”

1.03 QUALITY ASSURANCE

A. All material and installation shall be in accordance with the Department's Design and Construction Standard Specifications and Details and in shall be in full compliance with all applicable standards listed in Section 01 42 19 (01090) "Reference Standards" and this Section.

B. No deflection of joints is allowed for PVC pressure mains.

C. PVC pipe shall not be over-homed. Pipe installed below the water table where the homing mark is not visible shall utilize an over-insertion prevention device; EBAA Iron Mega-Stop Series 500; S&B Technical Product, RIG, Resistance Insertion Grip; or approved equal.

D. Pipe Embedment Material shall be class 1 backfill material with a maximum rock size of 3/4-inches.

1.04 SUBMITTALS

A. See Sections 33 31 23 (UC-750) ”Sewer Force Mains”, 33 14 00 (15060) “Piping and Fittings.”, 01 33 23 (01340) “Shop Drawings.”

B. Submit shop drawings in accordance with the Departments specifications or submit the Pre-Approved Product List Manufacturer.

C. PVC Pipe not on the Pre-Approved Products list shall supply the following:

1. Provide affidavit of compliance with AWWA C900.
2. Submit fully dimensioned cross-section of the bell and barrel of the pipe. Show the bell maximum outside diameter in the pressurized area and its minimum wall thickness at the same location.
3. Submit copies of the following manufacturer-required tests conducted on project pipe:
    a. Quick-burst strength of pipe and couplings.
    b. Flattening resistance of pipe.
    c. Record of additional tests after test sample failure.
4. Submit manufacturer's literature of gray iron and ductile-iron fittings including dimensions, thickness, weight, coating, lining, and a statement of inspection and compliance with the acceptance tests of AWWA C110 or C153. Submit copy of report of pressure tests for qualifying the designs of all sizes and types of AWWA C153 fittings that are being used in the project. The pressure test shall demonstrate that the minimum safety factor described in AWWA C153 is met.
5. Submit outline drawings and materials description of service connection saddles, corporation stops, and pipe plugs.
6. Submit test results for the restrained joint system to be used certified by an independent test laboratory demonstrating compliance with these

specifications for each size and pressure rating.

7. Submit restrained joint system installation instructions. Include bolt torque limitations and assembly tolerances.

1.05 MANUFACTURER'S SERVICE

A. Provide pipe manufacturer's services at the jobsite for the following minimum labor days, travel time excluded: One labor-day to instruct the Contractor's personnel in the preparation and execution of rubber-gasket and solvent-welded joints for the sizes of pipes to be installed in the project.

1.06 SAFETY REQUIREMENTS

A. See Section 01 35 26 (01016) “Safety Requirements and Protection of Property.”

1.07 DESIGN REQUIREMENTS

A. See Section 33 31 23 (UC-750) “Sewer Force Mains.” and Section 01 33 00 (UC-005) “Project Approval”

PART 2 PRODUCTS

2.01 GENERAL

A. See Section 33 14 00 (15060) “Piping and Fittings.”

2.02 CASTINGS

A. Castings shall be in accordance with Section 33 05 81 (05550) “Castings.”

2.03 EMBEDMENT MATERIAL

A. Embedment material, for bedding, haunching and initial backfill, shall conform with the requirements of Section 31 23 33 (02315) “Trenching and Backfilling for Piping Systems.”

2.04 PIPE

A. See Section 33 14 00 (15060) “Piping and Fittings.”

B. Pipe shall conform to AWWA C900, rubber-ring gasket bell end or plain end with elastomeric gasket coupling, cast iron equivalent outside diameter, material cell classification 12454 per ASTM D1784.

1. Pipe 4-inches through 30 inches DR 18
2. Pipe 36-inches through 42-inches DR 21
3. Pipe 48-inches DR 25

2.05 FITTINGS

A. See Section 33 14 00 (15060) “Piping and Fittings.”

B. Fittings shall be Zinc coated Ductile Iron and shall conform to AWWA C153 or AWWA C110.

C. Fittings shall be Lined and coated with fusion-bonded epoxy.

2.06 FLANGES

A. See Section 33 14 00 (15060) “Piping and Fittings.”

B. Flanges on outlets of fittings shall be Class 250 per ASME B16.1.

C. PVC flanges shall be of the one-piece solid socket design and shall be made of the same material as the pipe. Manufacturer’s pressure rating shall be at least 250 psi at a temperature of 73°F. Minimum burst pressure shall be 500 psi. Flanges shall match the dimensions of ASME B16.5, Class 250, steel flanges for outside diameter, bolt circle, and bolt holes. Do not use Van Stone flanges.

2.07 FLANGED COUPLING ADAPTERS

A. See Section 33 05 98 (15065) “Miscellaneous Materials.”

2.08 OUTLETS AND NOZZLES

A. See Section 33 14 00 (15060) “Piping and Fittings.”

B. All connections to PVC require a saddle.

C. For outlets larger than 2 inches, use a Ductile Iron tee with a flanged or MJ outlet.

2.09 RESTRAINED JOINTS

A. See Section 33 14 00 (15060) “Piping and Fittings.”

B. PVC Pipe 16 inch or larger shall be restrained at all joints for the entire run of the pipe.

C. Provide restrained joints where indicated in the drawings. Restrained joints shall be provided by restraining systems that incorporate a wedge restraint on the restraint ring to provide positive restraint.

D. Restraint devices for bell-and-spigot joints shall consist of a split restraint ring installed on the spigot, connected to a solid backup ring seated behind the bell.

E. Restraining Glands shall be EBAA Iron Series 2000 and 1600 or approved equal.

F. The ASTM A536 ductile iron casting of the restrained gland shall be bonded powder coated. The wedge and wedge assembly shall have a bonded liquid polymer coating

applied for corrosion protection. The gland shall utilize torque limiting twist off wedge actuation screws.

G. T-bolts, studs, and connecting hardware shall be high-strength, low alloy material in accordance with AWWA C111.

H. Design restraining devices to have a 2:1 safety factor based on the design strength of the pipe.

2.10 WYE STRAINERS

A. PVC wye strainers shall be manufactured of the same material as the pipe, with 30-mesh screens and Viton seals. Connecting ends shall be the socket type, solvent welded. Provide one spare screen for each strainer.

2.11 DETECTABLE TAPE/TRACER

A. Detectable tape/tracer approved for use by the Department are shown on Sheet number 10.2 of the Pre-Approved Product List.

2.12 MISCELLANEOUS MATERIALS

A. The Contractor shall furnish and install all miscellaneous material and appurtenances required for a complete installation. Section 33 05 98 (15065) “Miscellaneous Materials” specifies material necessary for a complete installation, not specified herein. These materials, including but not limited to the following, shall be installed when required, whether shown on the Plans or not.

1. Anchor Bolts, Bolts, Nuts and Washers
2. Blind Flanges
3. Corporation Stops
4. Gasket Lubricant
5. Joint Material for Flanged Pipe, Valves and Fittings
6. Stainless steel repair clamps, with stainless steel bolts
7. 90^{o} Street Elbows
8. Tie-Rods

2.13 SADDLES FOR CONNECTIONS TO SEWER FORCE MAINS

A. See Section 33 31 23 (UC-750) “Sewer Force Main.”

PART 3 EXECUTION

3.01 GENERAL

A. See Section 33 14 00 (15060) “Piping and Fittings.”

3.02 PRODUCT MARKING AND UNDERGROUND LOCATION

A. Legibly mark pipe at 5-foot intervals and each coupling to identify the nominal diameter, the outside diameter base, that is, cast-iron or steel pipe (IPS), the material code for pipe and couplings, the dimension ratio number, AWWA C900, and the seal of the testing agency that verified the suitability of the material for potable water service (NSF/ANSI 61).

B. Install 10 gauge tracer wire taped every four feet to the buried PVC pipe, a magnetic detection tape one foot above the buried PVC pipe and 3M compatible magnetic location ball markers two feet below grade every 100 feet or at any vertical and horizontal deflection point. See Pre-Approved product list Sheet 10.2.

3.03 DELIVERY AND TEMPORARY STORAGE OF PIPE

A. PVC shall be protected from UV degradation caused by extended exposure to direct sun. Pipe with surface discoloration shall not be installed and immediately removed from the project site. Tarps used to protect the pipe from sunlight shall be placed to allow for adequate ventilation to prevent heat build-up.

B. Ship, store, and place pipe at the installation site, supporting the pipe uniformly. Avoid scratching the pipe surface. Do not stack higher than 4 feet or with weight on bells. Cover to protect from sunlight.

C. Do not drag PVC pipe over the ground, drop it onto the ground, or drop objects on it.

D. Store loose pipes on racks with a maximum support spacing of 3 feet. Provide shades for pipe stored outdoors or installed outdoors until the pipe is filled with water. Store fittings indoors in their original cartons.

E. Store solvent cement indoors or, if outdoors, shade from direct sunlight exposure. Do not use solvent cements that have exceeded the shelf life marked on the storage container.

3.04 HANDLING PIPE

A. Hoist pipe with mechanical equipment using a cloth belt sling or a continuous fiber rope that avoids scratching the pipe. Do not use a chain. Pipes up to 16 inches in diameter may be lowered by rolling on two ropes controlled by snubbing. Pipes up to 6 inches in diameter may be lifted by hand.

3.05 INSTALLING BURIED PIPING

A. See Sections 31 23 33 (02315) “Trenching and Backfilling for Piping Systems” and Section 33 14 00 (15060) “Piping and Fittings.”

B. Bedding material and backfill to 1 foot above the pipe for PVC shall be well graded Class 1 backfill with a max rock size of ¾-inch compacted in 6-inch lifts. The minimum trench width shall be the pipe width plus 24-inches (12-inches on each side).

C. Before installation, check pipe and fittings for cuts, scratches, gouges, buckling, kinking, or splitting on pipe ends. Remove any pipe section containing defects by cutting out the damaged section of pipe.

D. Do not install PVC pipe when the temperature is below 40°F or above 90°F.

E. Do not install pipe that is gouged or scratched forming a clear depression.

F. Pipe shall be installed utilizing an over-insertion prevention device.

G. Install in accordance with AWWA C605, and as follows.

1. When installing pipe in trenches, do not deviate more than 1 inch from line or 1/4 inch from grade. Measure for grade at the pipe invert.

2. Backfill materials in the pipe zone shall be imported sand per Section 31 23 33 (02315) “Trenching and Backfilling of Piping Systems”. Do not add successive layers unless the previous layer is compacted to 90% relative compaction per ASTM D1557.

3. Compact material placed within 12 inches of the outer surface of the pipe by hand tamping only.

4. Compact trench backfill to the specified relative compaction. Do not float pipe. Do not use high-impact hammer-type equipment except where the pipe manufacturer warrants in writing that such use will not damage the pipe.

5. Install detector balls 2 feet below grade every 100 feet on straight lines, at any point changing direction, vertical or horizontal; in addition, install 10 gauge tracer wire taped every 4 feet to the buried PVC C900 pipe and a magnetic detection tape 1 foot above the PVC C900 pipe.

3.06 PIPE LAYOUT FOR CURVED ALIGNMENT

A. Pipe lengths shall not be bent for curved alignment.

3.07 ASSEMBLY OF RUBBER-GASKET PIPE JOINT

A. See Section 33 14 00 (15060) “Piping and Fittings.”

B. The spigot and bell or bell coupling shall be dirt free and slide together without displacing the rubber ring. Lay the pipe section with the bell coupling facing the direction of laying.

C. Insert the rubber ring into the groove in the bell in the trench just before joining the pipes. First clean the groove. Observe the correct direction of the shaped ring. Feel that the ring is completely seated.

D. Lubricate the spigot over the taper and up to the full insertion mark with the lubricant supplied by the pipe manufacturer. If the lubricated pipe end touches dirt, clean the pipe end and reapply lubricant.

E. Insert the spigot into the bell and force it slowly into position.

F. Check that the rubber ring has not left the groove during assembly by passing a feeler gauge around the completed joint.

3.08 CLEANING AND TESTING OF SEWER FORCE MAINS

A. See Section 33 01 10.54 (02505) (UC-170) "Cleaning and Testing of Mains."

END OF SECTION

SECTION 15115

CHECK VALVES

PART 1 - GENERAL

1.01 SCOPE OF WORK

The Contractor shall furnish and install check valves complete and operable, including all appurtenances and accessories.

1.02 RELATED WORK SPECIFIED ELSEWHERE

Section 15100 - Valves, General

PART 2 - PRODUCTS

2.01 CHECK VALVE

A. General

1. The swing-check valves shall be standard (plain), outside lever-and-weight or outside lever-and-spring types, for normal horizontal installations, conforming to all of the applicable requirements of the most current ANSI/AWWA Standard C508, "Swing-Check Valves for Waterworks Service, 2-in. Through 24 In. NPS", except as otherwise specified herein. The valves shall be iron body, bronze mounted and suitable for buried service.

2. Valve bonnet opening shall be large enough to allow ample clearance for direct removal of disc by hand.

B. External Ferrous Items

All external ferrous items, except cast iron, shall be hot-dipped galvanized in accordance with the most current ANSI/ASTM Standard A123, "Zinc (Hot-Galvanized) Coatings on Iron and Steel Products", or ANSI/ASTM Standard A153, "Zinc Coating (Hot-Dip) on Iron and Steel Hardware", or stainless steel.

C. Flanged Valves

Flanged valves shall have ends plain-faced and drilled conforming to ANSI Standard B16.1, "Cast Iron Pipe Flanges and Flanged Fittings", Class 125. Bolt holes in the flanges shall be equally spaced and shall straddle the vertical and horizontal centerline. All joint materials for flanged valves will be furnished with the valves; neoprene for sewer and SBR for water applications.

D. Clapper

1. The clapper shall swing clear of the waterway when the valve opens, permitting a full flow through the valve equal to the nominal diameter of the pipe.

2. The body and clapper seating surface shall be metal to metal, and shall be bronze.

3. The clapper disc and the clapper hinge arm, including the clapper disc cap screw, shall be bronze or cast iron. Clapper to hinge arm connection shall be such that the unit cannot be unscrewed by fluid flow.

D. Clapper Hinge Pin

1. The clapper hinge pin (shaft) shall be stainless steel conforming to AISI Type 316. For check valves with outside levers, the clapper hinge pin shall rest in bronze bushings and shall extend through the casing on the right hand side when facing the valve inlet.

2. The clapper hinge pins shall rest in bronze bushings provided with a compression packing or double nitrile o-ring seal and shall extend through the casing on the right hand side when facing the valve inlet. An opening shall be provided in each of two bosses on the body for easy access to either end of the hinge pin. The openings shall be tapped and provided with plugs.

E. See Part 2 of Section 15100, "Valves, General", for other components.

2.02 TESTING

All check valves shall be tested at the factory in accordance with Section 5.2 of the most current ANSI/AWWA Standard C508 and a Certified Test Report shall be furnished with each valve.

PART 3 - EXECUTION

3.01 GENERAL

All valves shall be installed in accordance with provisions of Section 15100, "Valves, General." Care shall be taken that all valves are well supported.

END OF SECTION

SECTION 15120

GATE VALVES

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. The Contractor shall furnish and install gate valves complete and operable, including all appurtenances and accessories.

B. The City will permit the use of resilient seated type gate valves in potable water systems, as described herein. Such use shall be restricted to potable water systems of nominal sizes 4-inch through 48-inch. All other size or system applications shall be allowed only if reviewed and approved by the City. Resilient seat gate valves shall only be used in sewer applications where cover depth is sufficient to mount the valve in the vertical position and only with review and approval of the City. Sewer lines may not dipped or lowered in close proximity to a gate valve for the purpose of providing said cover. Resilient seat gate valves used as tapping valves in sanitary sewer systems and laid upon their side shall be left open when the line is placed in operation and backed up with a plug valve to provide flow control.

1.02 RELATED WORK SPECIFIED ELSEWHERE

Section 15100 - Valves, General

PART 2 - PRODUCTS

2.01 GATE VALVES, GENERAL

A. As used herein, "ANSI" denotes the American National Standards Institute; "AWWA" denotes the American Water Works Association; and "ASTM" denotes the American Society for Testing and Materials.

B. All valves specified herein, whether manufactured under the provisions of AWWA C515, latest revision "Reduced-Wall, Resilient-Seated Gate Valves for Water Supply Service" shall be furnished with an Affidavit of Compliance from the manufacturer as required by Section 6.3 of AWWA C515 latest revision.

C. The MD-WASD requires that suppliers shall submit with their proposals, if bidding on valve sales to the City; or shop drawings, if supplying valves to the City for contract or donations work; all data as listed in the "Data to Be Supplied by the Manufacturer" Sections of the referenced standards. This material is Section 4.1 in C515, latest revision and is identical. Data to be furnished is as follows:
"*Catalogue Data.* The manufacturer shall supply catalogue data, including illustrations and a parts list that identifies the materials used for various parts. The information shall be in sufficient detail to serve as a guide in the assembly and disassembly of the valve and for ordering repair parts.
Weight information. The manufacturer shall provide a statement of the net assembled weight for each size of valve exclusive of joint accessories.

Assembly Drawings. The manufacturer or supplier shall submit to the purchaser one set of drawings showing the principal dimensions, construction details, and materials used for all parts of the valve. All work shall be done and all valves shall be provided in accordance with these drawings after the drawings have been reviewed and accepted by the purchaser."

In the quotation above, the word "purchaser" shall be construed to mean the Miami-Dade Water and Sewer Department in either direct purchase or contract/donations situations.

D. All work performed according to the standards cited above, except prototype testing, shall be subject to inspection and acceptance by the City or its representatives who shall have access to all places of manufacture where these valves are being produced and tested. Suppliers shall, with their shop drawing submittals, submit the company name and location of the actual manufacturer of the valve which shall include Country, City, and street address of the manufacturer. Where valves are not domestically produced and tested, the City reserves the right to require that the Affidavit of Compliance be signed and sealed by a Professional Engineer, licensed to practice in the state of where the importing firm is located or the State of Florida. When this is required, the City's decision as to its necessity shall be final and no extra compensation will be allowed.

E. All valves shall conform with ANSI/NSF Standard 61, "Drinking Water System Components-Health Effects".

F. Grades B and C bronze as listed in Table 1 of AWWA C500, latest revision shall not be used in the fabrication of any of the various valve types listed in this specification. Aluminum bronzes, if used, shall not dealuminize and the method of preventing this shall be fully described in the submittal.

G. AWWA Standard C515, latest revision lists a number of copper alloys for valve stems and gates. Of these the City will accept alloys with the following Unified Numbering Series (UNS) numbers; C66100, C87600, C99400 and C99500. This same standard lists other copper alloys for Stem Nuts and Gates. Of these the MD-WASD will accept alloys with the following UNS numbers; C83600, C83450, C95200, C95500, C95800 C99400 and C99500.

H. Other copper alloys not listed in the standard may be used but must meet the performance requirements of the Standard, including but not limited to, minimum yield strength, chemical requirements and corrosion. The City requires that alloys containing more than sixteen (16) percent zinc shall not be used.

2.01 RESILIENT SEATED GATE VALVES

A. Resilient-seated gate valves shall be manufactured in accordance with the applicable provisions of the most recent ANSI/AWWA Standard C515, latest revision “Reduced-Wall Resilient-Seated Gate Valves for Water Supply Service” as modified herein.

B. Valves shall have non-rising stems (NRS) and are to be installed under buried and/or submerged conditions. The design working water pressure shall be 250 psig for 3 48-inch sizes. For valves manufactured in conformance with the provisions of AWWA C515, latest revision as modified herein, the design working water pressure shall be a minimum of 200 psi for all sizes. In addition to the pressure requirements, the valve assembly and mechanism shall be capable of withstanding an input torque of 200 ft.lbs. for valves 4-inch and smaller, and 300 ft. lbs. for valves

6-inch and larger. With the valve open the unobstructed waterway shall have a diameter not less than the full nominal diameter of the valve.

C. Valve body: Valves manufactured in conformance with AWWA C515, latest revision shall be iron-bodied and shall conform to ASTM Standard A395-99, "Ferritic Ductile Iron Pressure-Retaining Castings for Use at Elevated Temperatures" or ASTM Standard A536-84 "Ductile Iron Castings". Body and bonnet thickness shall conform with the requirements of AWWA Standard C515 latest revision.

All ferrous metal items in contact with the line fluids, except gray or ductile cast iron, shall be AISI Type 316 stainless steel. Valve body and bonnet gaskets shall be rubber or rubber composition, inorganic mineral fiber and paper are not acceptable. Rubber and rubber composition materials shall be suitable for use in water containing chlorine or chloramines and in sanitary sewage.

D.. Stems, stem nuts, glands and bushings shall be made of bronze as specified in ANSI/AWWA Standard C515 latest revision with no Grades B or C bronze being utilized. The same items for valves made in conformance with C515 latest revision shall be made of the alloys specified above in the last paragraph of the "Gate Valves, General" section of this specification. The stem diameter shall conform to Table 4 of C515 latest revision. All valves shall be equipped with an ANSI/AWWA standard 2-inch square operating nut with skirt, or handwheel when required for above-ground service. Valve stems shall rotate counterclockwise to open. All valves 20-inch and larger shall be equipped with gearing conforming to AWWA standard. Bevel or spur gearing shall be supplied as ordered with no cost differential.

E. "O"-ring stem seals shall be neoprene, Buna-N, or approved equal. No natural rubber compounds will be acceptable. The stem seals shall be of design that permits the replacement of the "O"-ring seals while the valve is in service, without undue leakage.

F. All external ferrous items, except gray or ductile cast iron, shall be hot dipped galvanized in accordance with ASTM Standard A123, "Zinc (Hot-galvanized) Coatings on Iron and Steel Products", or ASTM Standard A153, "Specification for Zinc Coating (Hot Dip) on Iron and Steel Hardware", or Type 304 stainless steel.

G. Resilient seats shall be applied to the disc only and shall seat against a corrosion-resistant surface. The surface may be either metallic or nonmetallic, applied in a manner to withstand the action of line fluids and the operation of the sealing gate under long-term service. A metallic surface shall have a corrosion resistance equal to or better than bronze. A nonmetallic surface shall be in compliance with ANSI/AWWA Standard C550, "Protective Epoxy Interior Coatings for Valves and Hydrants". Resilient seats shall be bonded to the gate. No natural rubber products will be acceptable. If the resilient seat is a rubber material, the method used for bonding or vulcanizing shall be proven by ASTM Standard D429, "Test Methods for Rubber Property-Adhesion to Rigid Substrates", Method A or B. For method A, the minimum strength shall not be less than 250 psi. When Method B is applicable, the peel strength shall not be less than 75 lb/in. All exposed mechanical attaching devices and hardware used to retain the resilient seat shall be of AISI Type 316 stainless steel.

H. Flanged valves shall have ends faced and drilled conforming to ANSI Standard B16.1, Class 125. Bolt holes in the flanges shall be equally spaced and shall straddle the vertical and horizontal centerlines. Joint materials for flanged valves will be furnished with the valves.

I. Mechanical joint valves shall have ends complying with ANSI/AWWA Standard C111/A21.11, "Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings". Mechanical joint gaskets, glands, tee-head bolts and hex nuts shall be included with the valve. Segmented glands or follower glands held in place with set screws will not be acceptable. Bolt holes in the flanges of the mechanical joint shall be equally spaced and shall straddle the vertical centerline. Gaskets shall be shipped separately in suitable protective containers. Valves for use in sewage shall have neoprene gaskets.

J. Painting and coatings shall conform to the requirements of Fed. Spec. TT-C-494a on exterior ferrous surfaces, and ANSI/AWWA Standard C550 for the interior of the valve. A coating shall be applied to all ferrous parts of the valves except for finished or seating surfaces. Surfaces shall be clean and dry before painting.

K. Testing: All production tests shall be performed on all valves supplied without exception. Operation, shell and seat tests shall be performed as specified in Section 6.2 of AWWA C509 latest revision and Section 5.1.2 of AWWA C515, latest revision as appropriate to the standard which covers the valve in question. An Affidavit of Compliance as specified in paragraph two of the "GATE VALVES, GENERAL", section above, shall be furnished to the MD-WASD with the invoice for the valves. Final payment (prior to installation in donations situations) by the MD-WASD will not be made until after receipt of these Affidavits of Compliance.

The gate valves shall conform to AWWA C515, latest revision standard as modified herein and as manufactured by American Flow Control, Mueller or approved equal.

L. Resilient Seated Gate Valves installed in the horizontal position with bevel gearing shall require a flushing port on the side of the valve to clean the tracks. See the Standard Detail WS 4.70 for piping and ball valve installation requirements.

2.03 TAPPING VALVES

A. Tapping valves shall conform to the applicable requirements for the gate valves specified above herein, and also with the requirements listed below.

B. With the valve open, an unobstructed waterway shall be provided, the diameter of which shall be at least the full nominal diameter of the valve, to permit taps to be made through the valve.

C. Tapping valves shall have a mechanical joint outlet end conforming to ANSI/AWWA Standard C111/A21.11-90, "Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings" or a flanged outlet conforming to ANSI Standard B16.1 Class 125 (as called for in the particular valve order), for connection to new piping and a flanged inlet with centering ring (for all valves of 12-inch diameter and smaller and for all larger valves where the manufacturer produces a centering ring flange in that size), for connecting to the tapping sleeve. For tapping valves 12-inch and smaller, the sleeve shall be in compliance with all applicable provisions of MSS Standard Practice SP 60, latest revision, as developed and approved by the Manufacturers Standardization Society of the Valve and Fittings Industry, 127 Park Street N.E., Vienna, Virginia 22180. For tapping valves larger than 12-inch, the connecting flanged joint between the tapping sleeve and the tapping valve shall be industry standard; however, the tapping valve must provide a matching fit with tapping sleeves by other manufacturers.

D. The tapping valves shall be furnished complete with all joint materials. Joint materials for the flanged inlets shall be ANSI-sized and approved and shall include 1/8-inch thick full faced gaskets and hot-dip galvanized carbon steel bolts and nuts with internal threads tapped or retapped after galvanizing or stainless steel bolts and nuts. The flanged inlet gaskets shall conform to the gasket material and property requirements set forth in ANSI/AWWA Standard C111/A21.11-90. All pipe connection gaskets for use in sewer applications shall be neoprene and natural rubber shall not be used in any application. Seal shall be neoprene, Buna-N, Nitrile, EPDM or approved equal, but not natural rubber. The mechanical joint outlets shall include the necessary joint materials conforming to the requirements of joint materials for mechanical joint ended gate valves of the appropriate type specified above herein (neoprene for use with sewer). Bolt holes in the flanges of the mechanical joint shall be equally spaced and shall straddle the vertical centerline. Gaskets shall be shipped separately in suitable protective containers.

E. Valve operators for tapping valves 20-inch and larger shall be located to the right or left (when looking into the mechanical joint outlet end) as ordered by the City.

F. The valves shall be suitable for use with ductile-iron pipe conforming to ANSI/AWWA Standard C151/A21.51-96, "Ductile-Iron Pipe, Centrifugally Cast, for Water", with wall thickness and outside diameter as specified in Tables 3 and 4, (Special Thickness Classes) for the following sizes:

Size	Thickness Class
4-inch	54
6-inch	53
8-inch	52
10-inch and larger	50

and with wall thicknesses and outside diameter as specified in Tables 1 and 2 (Standard dimensions and weights) of the same standard.

Pressure Class Pipe (Potable, Reuse and Raw Water Only)

Size	Pressure Class
4-inch through 12-inch	350
14-inch through 20-inch	250
24-inch	200
30-inch through 48-inch	150

G. All production tests shall be performed on all valves supplied without exception. Operation and hydrostatic tests shall be performed as specified in AWWA C515, latest revision. An Affidavit of Compliance as specified in paragraph two of the "GATE VALVES, GENERAL", section above, shall be furnished if requested to the City prior to installation of the valves. Final payment (installation in donations situations) by the City will not be made until after receipt of these Affidavits of Compliance.

The tapping valves shall conform with the appropriate AWWA valve standard as modified herein and as manufactured by American Flow Control, Mueller or approved equal.

PART 3 - EXECUTION

3.01 GENERAL

All valves shall be installed in accordance with provisions of Section 15100, "Valves, General." Care shall be taken that all valves are well supported.

END OF SECTION

SECTION 16051

PUMP STATION ELECTRICAL MATERIALS

1 GENERAL

1.01 SCOPE OF WORK

A. The Contractor shall furnish and install all electrical material specified herein and required for a complete installation.

1.02 RELATED SECTIONS

A. Section 16940 - Pump Station Control Panel

1.03 QUALITY ASSURANCE

A. All electrical materials and equipment shall be new, of recent domestic manufacture, and approved by the Underwriters' Laboratories, Inc. Material or equipment damaged in the course of installation or test shall be replaced or repaired in a manner meeting with the approval of the Engineer.

B. All electrical material and installation shall comply with the following codes and standards:

1. National Electrical Code (NEC)
2. South Florida Building Code (SFBC)
3. National Fire Protection Association (NFPA)
4. Insulated Power Cable Engineers Association (IPCEA)
5. National Electrical Manufacturers Association (NEMA)
6. Institute of Electrical and Electronic Engineers (IEEE)
7. American Society for Testing and Materials (ASTM)
8. American National Standards Institute (ANSI)
9. Underwriters Laboratories (UL)

1.04 SUBMITTALS

A. Before any material or equipment is purchased, the Contractor shall submit complete shop drawings to the Engineer for approval, including a complete list in quintuplicate of electrical materials, fixtures and equipment to be incorporated in the work. The list shall include catalog number, diagrams, drawings, and such other descriptive data as may be required by the Engineer. Approval of material will be based on the manufacturer's compliance with the Specifications, published ratings, or on test results, where specified.

B. In addition, the Contractor shall furnish four copies, in booklet form, of complete installation drawings, instruction books, operating and maintenance manuals, parts lists for each major item of electrical equipment, and similar data on minor items of equipment, if requested by the Engineer, dimensional drawings, wiring diagrams and schematics for each major piece of electrical equipment.

2 PRODUCTS

2.01 GENERAL

A. All equipment shall be new, complete and in operating condition unless otherwise specified.

B. All components shall, whenever possible, be standard stock articles of well known domestic manufacturers, who have been regularly engaged in the manufacture of such material and equipment for at least five years.

C. Fusible equipment shall be equipped with fuses, and 100 percent of spare fuses of each type shall be supplied.

2.02 SURGE PROTECTION

A. Line-to-line and line-to-ground protection shall exceed the requirements of ANSI/IEEE Standard C62.1-1984 Sections 8.6.1 and 8.7.3 by a factor of at least 300%. Voltage clamping time shall be less than five nanoseconds with a maximum surge current of 30,000 RMS at a clamping voltage under 600 VAC. One arrestor, complete with circuit breaker disconnect is to be supplied on the incoming line to the control system. Arrestors shall be Ingram Products, Joslyn or approved equal.

2.03 PHASE MONITOR

A. Phase Monitor shall be a three-phase monitor and supplied on the incoming line. The phase monitor shall prevent motors starting on the following conditions: overvoltage, undervoltage, phase reversal, phase imbalance and loss of phase. The phase monitor shall have integral fault light and dry contact for alarm indication. The unit shall be ATC Diversified Electronics or approved equal.

2.04 GROUNDING, BONDING AND GROUND RODS

A. Ground Rod shall be a copper-clad steel rod, 3/4-inch diameter by 15 feet long, approved for that use.

B. Make inaccessible or underground connections with the exothermic welding process using equipment manufactured by Burndy or Erico Products.

C. Make accessible connections with multiple bolt silicon bronze connectors specifically designed and approved for the purpose. Connectors to be as manufactured by Burndy or O.Z. Gedney Electric.

D. Install grounding system as shown on Drawings and never use a neutral conductor as grounding or bonding means.

E. Drive ground rods full length into the earth. Main ground electrode system resistance to ground to be no greater than 3 ohms. Use as many rods as needed to attain this level.

F. Ground and bond panelboard frame, fittings, fixtures and devices, cable sheaths and screens, neutral of transformers, boxes and raceways, motor frames, non-current carrying parts of appliances and devices, control equipment and panels, and all other parts and equipment as required by the NEC.

G. Provide every branch circuit for power and lighting and each 120-volt receptacle circuits, with a green grounding conductor of the same size and type as the power conductors installed in the same raceway.

2.05 CABLE AND WIRE

A. Cable and Wire shall be plainly marked with the manufacturer's name, year of manufacture, and type of cable. All conductors shall be copper unless otherwise specified.

B. All cable shall be manufactured in strict accordance with the specifications and the applicable IPCEA, NEMA, IEEE, UL, and ANSI standards, by a manufacturer with at least 5 years of experience in cables of this type.

C. All cable and wire shall be suitable for wet locations.

D. All 600 volt class cable shall be Class B, heat and moisture resistant thermoplastic type THW rated 75° C, maximum conductor temperature in wet or dry locations, with copper conductors. No. 10 and smaller shall be single strand, No. 8 through No. 2 shall be 7 strand and No. 1 through 4/0 shall be 19 strand and 250 MCM through 500 MCM shall be 37 Strand. Insulation shall meet UL Standard 83.

E. All conductors shall be plainly marked on outer braid at least every two feet with name of manufacturer, size and grade of insulation.

F. Conductors shall be as manufactured by General Cable, Phelps Dodge, Okonite or approved equal.

2.06 CONTROL WIRING

A. Wiring for monitoring system and control shall be single conductor #14 AWG minimum, solid or stranded with THW or THWN insulation.

B. Wiring for analog or pulse systems shall be 3-conductor shielded cable with #14 AWG stranded copper conductors with individual thermoplastic color-coded insulation. Overall shield shall be either copper or aluminum tape providing 100% shielding coverage and provided with a stranded copper ground drain wire and an overall vinyl jacket. Cable shall be Belden, Dekoron or approved equal.

C. Fireproofing tape shall be Irvington No. 7700, or approved equal, applied in accordance to the manufacturer’s instructions.

D. Multiconductor cable shall be copper conductors, flame retarded ethylene-propylene insulated for 600 V with a 90ºC rating. The single conductors of the multiple conductor cable shall be color coded with integral color for proper

identification. Color coding shall be equal to ICEA S-68-514, Table K-2. Cable shall meet the requirements of IEEE-383. A heat, moisture flame and chemical resistant, mechanically rugged ethylene-propylene insulating compound, 30 mils thick, shall be provided for #14 AWG. Conductors shall be tin or alloy coated stranded copper as per ASTM B-8 and B-33 or B-189. Overall cable jacket shall be chlorosulfonated polyethylene compound over cable tape and fillers and shall exceed the requirements of ICEA S-68-516.

E. Connectors, Terminals and Splices:

1. Provide connectors, terminals and splices for all power and lighting circuits using 600-volt wire and cable as follows:

a. Provide connectors, terminals, and splices, for all wire, cable, and equipment and bus connections that are designed and approved for the specific type and size of conductors being connected.
b. Connectors and terminals shall be designed and UL approved for use with the associated conductor material, and shall provide a uniform compression over the entire contact surface. Solderless terminal lugs shall be used on all stranded conductors.
c. Pressure-crimp type connectors, terminals and splices shall be applied with a mechanical or hydraulic tool with proper size crimpling dies for making each connection. The tool shall be of the type that will not release until the correct pressure has been applied.
d. Splices and taps in wire No. 10 AWG, and smaller, shall be made with approved, wire-nut-type, patent spring connectors. Use 3M Scotch-locks or equal.
e. Provide Burndy, type YAV box, or equal, pressure-crimp ring-tongue terminals for termination of No. 8 stranded cable.
f. Provide Burndy type YSV box butt splices, or equal, for splicing No. 8 AWG stranded cable.
g. For termination and splicing of cable of AWG No. 6 or larger, provide long-barrel, type YA pressure-crimp lugs and type YS tubular pressure-crimp splices by Burndy or equal. Use long-barrel pressure-crimp lugs wherever space conditions permit. Use long-barrel pressure crimp splices exclusively for splicing. Where space is inadequate for use of long-barrel lugs, provide Burndy Type YA-L, pressure-crimp, short barrel lugs, or equal. Use two-hole lugs on cable of 250 MCM and larger.
h. For tap off AWG No. 8 cable and larger, provide Burndy type KS split-bolt copper connectors (bugs), with Burndy type SC one-piece plastic split bolt covers, or equal. Other types of connectors for tapping may be used subject to prior approval by the Engineer.
i. Use proper size bronze bolts, nuts, washers, and lock washers of Burndy Durium alloy, or equal, for bolting cable terminations to equipment terminals and bus bars.
j. Termination of solid wires of AWG No. 10 and smaller at

terminal blocks shall be made by forming the wires in a ring to fit under a screw head, thus requiring no terminal lug.

2. Provide terminals and splices and make connections in control, alarm and instrumentation system as follows:

   a. For solid wiring provide type TP, vinyl-insulated, ring-tongue terminals by Burndy, or equal, for all terminations.
   b. In locations where splicing of solid wire is indicated or permitted by specifications, use type SP vinyl-insulated, butt splices by Burndy, or equal.
   c. Wire terminals shall be installed with pressure tools equal to those manufactured by American Pamcor, one of which is No. 59072, which obliges the Electrician to apply the correct pressure required to produce a tight connection before the tool is released. Use a pressure tool designed for the specific size of connector and wire being terminated.
   d. Taps in solid wire may be made with 3M, Scotchlock wire nut, or equal, except that the conductor being tapped shall not be cut, and shall be twisted together with the tap conductor before wire nut application.

2.07 LUGS

A. All power cables of any voltage class shall be terminated with tinned copper indentation-type lugs. The lugs shall be Bundy type YA, T & B, or equal, long barreled, with double indentations in the larger sizes. Two-hole lugs shall be used where possible. The Contractor shall be responsible for compatibility between hole size and spacing on the lugs and on the equipment furnished.

B. Terminate stranded conductors on mechanical connectors furnished on equipment. Where no connectors are included, provide suitable mechanical connectors.

C. Termination of stranded conductors on screw terminals will not be permitted. Provide suitable size compression or mechanical type connector with spade tongue.

2.08 PULLING COMPOUND

A. Pulling Compound, if used, shall conform to the recommendations of the wire and cable manufacturer.

2.09 CONDUIT, FITTINGS AND WIREWAY

A. Conduit shall be heavy wall, threaded, rigid, metallic conduit. PVC schedule 40 conduit shall be used where it is embedded in concrete and/underground runs, and aluminum conduit shall be used for exposed runs. Use PVC coated rigid steel conduit for risers and transitions from underground PVC conduit to above-ground conduit seals. Use galvanized rigid steel conduit above conduit seals. Conduit, fittings and wireway shall be sized in accordance with the National Electrical Code, where sizes are not shown on the Plans. Conduit smaller than 3/4-inch shall not be used.

1. Galvanized Steel Conduit shall be hot-dip galvanized, inside and outside, after threading, and shall conform to Federal Specification WW-C581, ANSI C80.1 and UL 6.
2. PVC Coated Steel Conduit shall be externally coated with a 40 mil of grey PVC per UL 6.
3. Aluminum Conduit shall contain less than 0.1 percent copper, and shall conform to Federal Specification WW-C-540C. It shall be as manufactured by Kaiser Aluminum and Chemical Corporation, Triangle, or approved equal. Alcoa thread lubricant shall be used on all aluminum threads.
4. Flexible Conduit shall be "Sealtite" flexible, liquid tight conduit, as manufactured by the American Brass Company, Bridgeport, Connecticut, the equivalent by 0-Z/Gedney, or equal.
5. PVC Conduit shall be Schedule 40, heavy-walled rigid, rated for 90 degree C cables conforming to UL 651, Fed Spec W-C-1094 and NEMA TC-2 as manufactured by Carlon or approved equal.
6. Conduit Fittings and Device Boxes embedded in concrete shall be PVC conforming to UL 514 and NEMA TC-3.
7. Wall Sleeves for Conduit shall be O.Z., positive, watertight through wall entrance fittings, FSK Series, Crouse-Hinds, or equal.
8. Entrance Seals shall be O.Z. type CSBG, Crouse-Hinds, or equal.
9. Rigid Conduit Straps and Clamp Backs of cast aluminum such as EFCOR 233 AL, Appleton, or equal, shall be used in attaching conduit to concrete surfaces where channels and clamps are not used.
10. Conduit Bushings shall be insulated metallic bushings by T & B, O.Z., or approved equal, except where grounding bushings are required.
11. Conduit Sealing Fittings shall be Crouse-Hinds, type GUAB, with sealing covers, or approved equal.
12. Wireways shall be of the size required plus no less than 50% of spare capacity, made of 12 gauge aluminum with hinged spring-latched covers conforming to UL 870, and painted to protect against corrosion. The Contractor shall furnish all necessary bends, couplings and connectors. Interior parts shall be smooth, free of sharp edges and burrs. Use grounding type locknut and copper bond wire to make wireway and attached conduits electrically continuous. Slip-fasteners are not acceptable for this purpose. Wireways shall be type HW as manufactured by General Metals, Inc., Square D, or approved equal.

2.10 SWITCHES AND COVERS

A. Light Switches shall conform with Fed Spec WS-896E and shall be rated 20 amp, 120/277 volt AC, for tungsten or inductive load, Hubbell 1221 and 1223, Leviton, or approved equal.

B. Weather proof Switch Covers shall be Crouse-Hinds DS185-SA, Appleton, or approved equal, copper-free aluminum.

C. Explosion-Proof Switches shall be rated 20 amp, 125 volts AC with front operating handle, Appleton Cat. No. EFS175-FL, Crouse-Hinds, or approved equal.

D. Safe-Run Switches shall be 2 position, double pole, single throw, maintained contact, selector switch in NEMA-4 enclosure, General Electric AJ201C or approved equal.

E. Safety Disconnect Switches shall be heavy duty Type A, quick-make, quick-break, horsepower rated, with external operating handle interlocked to prevent opening of the cover unless it is in the "off" and "open door" position. Switch shall be manufactured by Square D, Westinghouse, or approved equal.

F. Mercury Float Switch shall have molybdenum contacts sealed in a doublewalled float of plastic material resistant to inorganic salt solutions, alkalis, and mineral acids. The electrical cable shall be two conductors with neoprene jacket and shall run unspliced to the Control Cabinet. Switch shall be Enpo-Cornell Pump Co. or equal.

G. Limit Switch shall be heavy duty Square D Class 9007 or approved equal with 2 N.O. and 2 N.C. contacts.

2.11 RECEPTACLES AND COVERS

A. Outlets shall be 125 volt, 20 amp, grounding type, duplex receptacle specification grade, Hubbell 5362, Leviton, or approved equal.

B. Weatherproof Switch Covers shall be Crouse-Hinds DS185-SA, equivalent by Appleton, or approved equal, copper-free aluminum, gasketed cover.

C. Receptacle for Emergency Power shall be 4 wire, 4 pole with angle adapter and screw cover, Russell Stoll, Catalog numbers as indicated below for the different services, or approved equal:

1. JRSA 2034 DR45 for 240 volts
2. JRSA 2034 HR45 for 480 volts

D. Ground Fault Protected Receptacles shall be Class A, 120 Volt, duplex 20/20A NEMA 5-20R, Square D Catalog GDFR-120BC or approved equal.

2.12 PANELBOARD

A. Panelboards shall be dead front, safety type construction and shall conform to Federal Specification WP-115, NEMA PB1, ANSI C33.38 and UL67.

B. All circuit breakers shall be thermal magnetic, temperature compensated, bolt-on type with quick-make quick-break mechanism, of the frame and size indicated.

C. Circuit breakers minimum interrupting ratings shall be 22,000 A for 277 volts systems and 14,000 A for 120 volt systems. Circuit breaker minimum rating shall be 20A single pole unless otherwise noted.

D. The panel board shall be provided with the voltage, phases and amperage required per project drawings, with main and branch breakers ambient-

compensated. It shall provide for a minimum of 20% spare space. Panels shall have neutral and equipment grounding bus and shall be Square D, General Electric, Westinghouse or approved equal.

E. Install panelboards in accordance with manufacturer's instructions.

2.13 PUMP MOTOR CONNECTION BOX

A. Pump motor connection box shall only be used in submersible pump wet well applications. The Contractor shall furnish and install 24" x 18" x 8" NEMA 4X stainless steel enclosure with hinged bolt-on cover and all necessary appurtenances for a complete installation. Connection box assembly shall include 3' x 3' x 6" concrete slab and 1-5/8 x 1-5/8 unistrut support. The following shall also be included:

1. 6-Pole power insulated terminal block panel mount shall be Allen Bradley Bulletin 1492, sized as required.
2. 6-Circuit control insulated terminal block panel mount shall be Allen Bradley Bulletin 1492
3. Gland nut and neoprene bushing shall be Crouse-Hinds CGK, or approved equal, sized as required for cable outer diameter.
4. Conduit Seal.

2.14 TRANSFORMER

A. Transformer shall be 480 volt to 120/240 volt, single phase, 60 hertz, 3KVA for submersible stations. It shall be high efficiency Sqaure "D" Model 9070E01D1, or approved equal, with two 5% taps below normal, weatherproof for indoor or outdoor service.

2.15 PULL BOX

A. Pull box shall be welded aluminum, 12 gauge, with hinged cover, minimum dimensions of 12 inch x 12 inch x 6 inch, without knockouts, anodized and painted, as manufactured by General Metals, Inc., Hoffman, or approved equal.

2.16 LIGHTNING ARRESTOR

A. Lightning arrestor shall be 3-pole, 650 volt, thyrite secondary arrester, General Electric type 9L15BCC008, Westinghouse 634A217AO1, or approved equal.

2.17 SURGE CAPACITOR

A. Surge capacitor shall be a 3-pole, 650 volt, 1.0 mfd. capacitor. It shall be a General Electric Type 9L18ABB301, equivalent by Westinghouse, or equal.

2.18 EMERGENCY LIGHT

A. Furnish and install wall mounted emergency light package unit with battery backup wired to an existing lighting fixture, Hubbel Lighting IMF 12-50-2-

P8 or approved equal.

2.19 LEVEL CONTROLLER

A. Level controller shall be microprocessor based SCADA ready, station controller with float switches backup. It shall measure the depth of water in the wet well and operate the pumps based on selected setup values. The controller shall be a microprocessor-based device and not require a battery to maintain the operating program. All set-up values shall be stored in non-volatile memory.

B. The controller shall be standard “off the shelf” equipment with published literature and fully tested hardware and operating program. The controller shall be field configurable from the front of the unit, and require no special tools or software to set-up or operate.

C. MPE Station Controller, microprocessor based controller with pressure transducer, Model SC2000, as manufactured by Motor Protection Electronics, Inc. or approved equal.

D. Provide intrinsically safe duplexer backup controller with float switches, as manufactured by Motor Protection Electronics Inc. or approved equal.

2.20 PUMP STATION LEVEL TRANSDUCER

A. A submersible level transmitter shall be capable of sensing and measuring the level of wastewater in the wet well based on the hydrostatic pressure above the submerged sensor’s diaphragm.

B. The level transmitter shall be factory calibrated to a nominal 4-20 mADC output.

C. The transducer housing shall be fabricated of PVC with a 2.5-inch diameter Teflon diaphragm and shall be filled with silicone oil.

D. The sensor shall be mounted using its signal cable and have ¾” NPT pipe threading for pipe mounting.

E. The internal air pressure of the sensor assembly shall be relieved to atmospheric pressure through a sealed breather system.

F. The unit shall measure 9 inches high by 3.8 inches diameter. The cable diameter shall be 0.26 inches.

G. The level transducer shall be Model SLX 130-M, as manufactured by Contegra, Inc., or approved equal.

H. The mounting option used shall be a 316 SS pipe for cable suspension (SLX-SP1 Contegra Option 3).

PART 3 EXECUTION

3.01 GENERAL

A. All electrical work shall comply with the applicable rules of the National Electrical Code, the National Fire Protection Association, and the South Florida Building Code, and shall be in accordance with the requirements of OSHA, and the best commercial and industrial practice. Conduit and cable shall be sized as specified in the National Electrical Code, where sizes are not shown on the Plans.

B. All electrical wiring, regardless of voltage classes, shall be installed in rigid conduit, except where shown otherwise on the Plans. No conduit installed shall be smaller than 3/4 inch IPS and no wire smaller than 12 gauge, except as otherwise shown on the Plans, specified herein, or authorized by the Engineer.

C. In some cases, the exact requirements must be determined from the shop drawings of the equipment furnished by the Contractor. Changes required by the Contractor - furnished equipment shall be the Contractor's responsibility. Materials or equipment damaged in the course of installation or test shall be replaced or repaired to the satisfaction of the Engineer.

3.02 EXAMINATION

A. Verify items provided by other sections of Work are properly sized and located.

B. Verify that built-in items are in proper location, and ready for roughing into Work.

C. Electrical service shall be built per Florida Power & Light Standards.

3.03 INSTALLATION OF 600-VOLT WIRE AND CABLE

A. Install wire and cable in conduits, ducts, wireways, cable trays and other enclosures as indicated.

B. Except as otherwise indicated or specified, all wire and cable shall be installed in continuous runs between terminal points without splicing.

C. Make splices and taps only in junction boxes, from terminals in terminal boxes, in manholes, in handholes and other accessible enclosures.

D. Do not splice wire and cable in ducts or conduits.

E. Except as otherwise indicated, or specified, do not splice or tap control, alarm or instrumentation wiring in underground manholes and handholes.

F. When pulling wire or cable, do not subject the wire or cable to a tension greater than 50% of the yield strength of the conductor. Pulling lugs shall be attached to the conductor with a sleeve or grip over the cable sheath to prevent slipping the insulation.

G. Use a UL approved lubricant to decrease friction when pulling cable in

ducts and conduits

H. Do not subject cable to a bending radius less than 8 times the cable O.D. during or after installation.

I. In wet locations, make splices first as for dry locations, then encapsulate them in an epoxy resin sealing and potting compound. Encapsulation of compression sleeve splices shall be with preformed molds.

J. Pulling of wires and cable into conduits shall be done in a manner which will in no way injure the insulation.

K. All wires in conduit shall be continuous between pull points without splices. No joints or splices in the conductors shall be permitted except at outlet or accessible junction boxes.

L. Sufficient lengths of wire shall be left at pull boxes for connecting to equipment and apparatus without straining.

M. All wires passing through pull boxes shall have enough slack in each box so they may be pulled out of the box a distance of no less than 6" across the entire length of the box.

N. Pull together all cables or conductors to be installed in a single conduit.

O. Wire Sizes: Drawings indicate wire and conduit sizes for typical equipment. If sizes shown on the drawings are not appropriate for the equipment chosen by the Contractor, wires and conduit shall be sized for the proper current-carrying capacity (including voltage drop and motor inrush allowances) in accordance with the NEC, at no extra cost to the Department. On 120/240 volts systems, "Homeruns" of over 50 feet in total length from panel to first outlet shall be #10 AWG minimum size and on 277/480 volts, the distance shall be 100 feet total length for #12 AWG minimum size.

3.04 CONDUIT INSTALLATION

A. The Plans are generally indicative of the work to be installed, but do not show all bends, fittings, boxes, and specialties which may be required or the exact location of all conduits. The Contractor shall carefully investigate the site and conditions affecting all of his work and arrange his work accordingly. Any changes from locations shown on the Plans must be approved by the Engineer.

B. Conduits shall be installed in such a manner that wires may be removed and replaced at a later date and to ensure against collection of condensation or rainwater. Where bends are made, they shall be made with an approved conduit bending machine. Crushed or deformed conduit shall not be used.

C. All conduit ends shall be square cut and reamed to remove burrs. Running threads will NOT be permitted. Approved couplings shall be used. All conduit joints shall be made up wrench tight, using strap wrenches, and shall be made waterproof in such a manner as not to interrupt the electrical bonds.

D. As soon as installed, all open conduit ends, including those terminating in boxes, shall be plugged or capped and so maintained during construction to prevent the entrance of moisture and dirt. All conduit shall be carefully cleaned and dried inside before the installation of wire.

3.05 GROUNDING

A. All grounding shall comply with the requirements of the National Electric Code and all local Codes having jurisdiction.

B. Unless otherwise shown on the Plans, the ground system shall be composed of at least two 5/8" in diameter by 10 feet long copper clad ground rod, spaced a minimum of 6 feet apart. Ground rods shall also be connected to rebar in slab. Make all connections with #6 bare copper wire.

C. Maximum ground resistance shall not exceed 25 ohms under normal dry conditions. Additional ground rods shall be driven if required to maintain this level.

D. All electrical equipment, structural steel, guard rails, and other metallic objects shall be connected to the above-mentioned ground system.

E. Provide a warning ribbon installed at 12" depth in the ground above the ground loop conductor.

3.06 NEUTRALS

A. Each circuit which requires a neutral conductor shall have its own individual neutral conductor, contained in the same enclosure.

3.07 TESTING

A. All circuits and motors shall be megger tested, and the voltage and current load on each circuit shall be checked. Five copies of the results shall be furnished to the Engineer and the Department before acceptance of the work.

END OF SECTION

SECTION 16780

S.C.A.D.A. SYSTEM R.T.U. INSTALLATION

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. All conditions of the existing contract shall apply.

B. The Contractor shall coordinate all work with the local Electrical Supervisor for the area. The Contractor shall review the installation with the area Electrical Supervisor before starting the work. The installation shall be completed and inspected by the local supervisor or his representative.

C. The Contractor shall be responsible for location of all utilities.

1.02 REFERENCE STANDARDS

A. All work shall be in accordance with the Florida Building Code and the National Electrical Code.

PART 2 - PRODUCTS

2.01 MIAMI-DADE WATER AND SEWER DEPARTMENT SUPPLIED MATERIALS

A. R.T.U. in a NEMA 4X enclosure. Note that batteries are to be furnished and installed inside the 4X enclosure by the contractor.

B. Radio

C. Antenna with mounting cap and cable

D. Force main pressure transmitter assembly consisting of a 1-inch diameter threaded nipple, manifold with test port and pressure gage with isolation diaphragm and the pressure transmitter unit.

E. Low level pressure switch

F. Wet well level transformer (for the RTU)

G. Current transformer

H. Amp transmitter

I. “Station Flooding”(drywell) and “High Level”(wetwell) float switches; Mini Float,

model SM N.O.

J. “Low Level”(wetwell) float switch; Mini Float, model SM N.C.

K. “Intrusion Alarm” , Square D 9007 Series A, Type C54D, Type C54RC, Type C54A2, Microswitch #MC7711-BZ-2R-A2 or equal as required for that type of installation.

2.02 CONTRACTOR SUPPLIED MATERIALS

A. Unless otherwise specifically called out elsewhere herein, all other labor, materials and equipment required for SCADA System R. T. U. Installation will be provided by the Contractor whether or not said items are specifically called out in the Contract Documents.

B. Individual wires shall be 600 volt, 75° C insulation, 14 guage stranded copper. Ends shall be terminated with compressiron lugs. Wires shall be color coded according to Miami-Dade Water and Sewer Department supplied drawings and identified by wire marking labels. Any circuits designated as “spare” shall each have individual ends securely taped and marked “spare”.

C. Shielded multi-conductor transducer wire shall be Belden twisted #16 stranded copper with shield, 600 volt rated. The shield shall be terminated at the R. T. U. end only. Shield shall be cut back to insulation and taped at other end. Shielded wire shall be run in a raceway with no other power circuits.

D. The antenna ground rod shall be copper weld 3/4", 10 feet long and driven by the Contractor.

E. Tapping saddle assembly for pressure transmitter consisting of: solid brass, single strap (silicon bronze), tapping saddle with Buna-N-gasket, Ford Style 101B with 1-inch tap; brass corporation stop with 1-inch inlet, outlet and valve AWWA/CC taper thread inlet by flare copper outlet, Ford FB600-4; brass adapter for flare copper connection (replaces flare nut) 1-inch female copper thread x 1-inch female iron pipe thread, Ford part no. C01-44. All items specified as brass shall be ASTM B-62, UNS C83600 allow and shall conform with NSF 61.

PART 3 - EXECUTION

3.01 ANALOG INPUTS

A. Three transducers are involved at each site with standard or microprocessor control (current, wetwell pressure level, and force main pressure). The pressure transmitters will be installed by MD-WASD forces in coordination with, and as a part of, the Contractor’s permitted work. The Contractor shall mount the current transformer on the leg of the power cable from which the control power is derived and connect shielded wiring to all three transducers. The current

transformer shall be installed to indicate power used whether on normal or generator power where applicable. The current transducer shall be installed in existing cabinets as close as possible to the current transformer.

B. At sites identified by the City only two types of transducers, (force main pressure and current), will be used. Shielded wire from the level logic control device to the R. T. U. shall be installed for level indication. Termination of the shielded cable to the control unit shall be performed by the City forces.

C. Other analog inputs may include flow recorders, suction pressure, discharge pressure, vibration or R. P. M. input. The MD-WASD shall supply devices and the Contractor will supply and install circuits. These circuits will be installed by the Contractor, but terminated by MD-WASD forces.

3.02 ANALOG OUTPUTS

A. At sites determined by MD-WASD shielded wire and conduit shall be installed for analog outputs such as VFD speed control, valve control, or other positioning devices. Circuits shall be installed by the Contractor, but terminated by MD-WASD.

3.03 DISCRETE INPUTS

A. Feedback signal circuits are “Pump On”, “Station Flooding” (drywell), “High Level” (wetwell), “Low Level” (wetwell), “Generator Run”, “Intrusion Alarm” and “Common Alarm”. Except where noted, the Contractor shall provide all materials and devices to complete these two wire circuits. The power will be from the R. T. U. and all devices shall be normally open in the safe or off condition.

1. “Pump On” shall be provided by a Contractor furnished and installed auxiliary contact on each pump motor starter. (Note: two speed pumps require two per pump.) No other devices shall be used to indicate “Pump On”.
2. “Station Flooding” (drywell), “High Level” (wetwell), and “Low Level”(wetwell), shall be supplied by MD-WASD and installed by the Contractor. In pump stations with pneumatic controls (bubbler system) MD-WASD will provide a pneumatic pressure switch for “Low Level”(wetwell) to be installed by the Contractor.

3. “Intrusion Alarm” will be supplied by MD-WASD and installed by the Contractor.

3.04 DISCRETE OUTPUTS

A. Active control circuits to start each pump, (or each speed), stop pump, and reset alarms shall be installed and connected.

1. The normally closed stop relay in the R. T. U. shall be connected in series to the existing stop control circuit.
2. The normally open start relay shall be connected in parallel to the existing auto start control circuit. **No existing safety or process orderly shutdown circuits shall be bypassed or defeated for either the start or stop control circuit.**
3. The “Common Alarm” circuit shall be from a normally open R.T.U. relay in parallel with the existing reset switch.

3.05 R. T. U.

B. There shall be no holes or entrance of any type into the top of the R.T.U. enclosure.

C. The R. T. U. shall not be mounted below grade or inside the drywell. If existing structure does not provide mounting for the R.T.U. a separate MD-WASD approved stanchion shall be constructed and installed by the Contractor. The R.T.U. stanchions shall be installed in accordance with current MD-WASD approved S. C. A. D. A., R. T. U. installation drawings. Equivalent parts shall require approval by the S.C.A.D.A. Section representative.

D. All abraded galvanized hardware shall be cleaned and then recoated with two coats of cold galvanized compound.

3.06 CONDUITS

A. Rigid galvanized conduit shall be used in all exterior below grade installations. It shall be coated with two coats of Bitumastic No. 50 or equal. Rigid galvanized conduit shall extend completely through all concrete penetrations at which point it may be converted to PVC conduit in the interior of the drywell. Rigid aluminum conduit may be used in installations above grade where exposed.

B. All concrete penetrations shall be sealed with epoxy grout compound. All conduits shall have minimum 1/4" spacing where installed on concrete surfaces.

C. All conduits below grade and/or extending from the wetwell shall have seal off fittings installed before entry into the R. T. U. enclosure. All conduits shall be sealed with duct seal compound during the construction phase to limit the exposure of electronic circuitry to corrosive atmosphere.

3.07 MISCELLANEOUS

A. A separate circuit shall be provided for and installed by the Contractor from the existing lighting/control panel, to provide 120 VAC power to the R. T. U. This circuit shall be routed through an available phase monitor relay normally open contact. This circuit will be switched on by the SCADA Section at start-up.

B. For wetwell/drywell pump stations with the pump controller in the drywell a MD-WASD supplied enclosure and terminal strips shall be installed for circuits entering and exiting the drywell.

C. Additional work such as sidewalk or street cutting may be required. This work must be authorized by the Project Manager and validated by a detailed, itemized invoice showing exact labor and material used.

D. An as-built drawing, (schematic and point-to-point) of the final installation and approved by the SCADA representative shall be provided by the Contractor for the installation before final payment is made.

E. A Certificate of Completion and original approved permits shall be supplied to the Department before final payment is made.

F. Install SCADA tapping saddle at location shown on Plans, pressure test, perform 1-inch tap, in coordination with MD-WASD forces, connect remainder of pressure transmitting system, and test.

END OF SECTION

SECTION 16940

PUMP STATION CONTROL PANEL

PART 1. GENERAL

1.01 SCOPE OF WORK

A. The Contractor shall furnish and install a pump station control panel, which shall include the level controller, relays, switches, lamps, and all electrical material specified herein or required for a complete installation.

B. The contractor is responsible for the erection, installation and start-up of the equipment covered under these specifications.

1.02 RELATED SECTION

A. Section 16051 - Pump Station Electrical Materials.

1.03 QUALITY ASSURANCE

A. All electrical materials and equipment shall be new, of recent domestic manufacture, and approved by the Underwriters' Laboratories, Inc. Material or equipment damaged in the course of installation or test shall be replaced or repaired in a manner meeting with the approval of the Department. Further, said repairs or replacement shall be performed by personnel qualified such that the UL approval will not be lost. The Contractor shall provide satisfactory evidence of these qualifications to the MD-WASD prior to the work being performed.

B. All electrical material and installation shall comply with the following codes and standards listed in Section 16051, Subsection 1.03.

C. Furnish equipment designed, built and tested by a firm with at least ten years of experience manufacturing this type of equipment.

D. Comply with NFPA 70, “National Electrical Code,” for components and installation.

E. Furnish equipment that bear the UL label.

1.04 SUBMITTALS

A. The Contractor shall provide all submittals in accordance with Section 16051, Subsection 1.04

B. Submit for review, properly identified manufacturers’ literature and shop drawings including but not limited to the following:

1. Dimensioned outlined drawings (Plan and Elevations).
2. Itemized bill of materials.
3. Manufacturers’ literature and shop drawings for every piece of equipment mounted on the panel.

4. Enclosure construction details.
5. Operating and maintenance manuals.
6. Detailed external wiring diagram and sequence of operation.

PART 2. PRODUCTS

2.01 GENERAL

A. The Control Panel shall be designed and built as integrated, pre-wired equipment. It shall control the operation of number of pumps in the station, based on the level in the wet well.

1. Level controller (specified in Section 16051, Subsection 2.19) shall monitor the wet well level and actuate the sewage pumps in sequence with rising water level. Once a pumping cycle has started, it shall continue until the stop level is reached. All start/stop levels shall be adjustable, based on design levels shown on the Plans. Controller shall maintain level to within ± 1% of full scale (i.e. maximum depth).
2. The level controller shall have a 3-position selector switch for manual selection of pumps sequence. An alarm shall be annunciated whenever the lag pump is called on, indicating failure of lead pump.
3. The Panel shall include the level indicator and pumps alternators, motor controllers, relays, switches, lamps, pressure switches and any other device shown on the Plans, or required to function as specified. Shop drawings of every device shall be submitted and approved before the panel is assembled.
4. Phase monitor relay shall be Timemark Model 258, Potter-Brunfield CPS-38, or approved equal, fused on line side and disconnect only for 3-phase equipment.
5. Selector switch to manually select or automatically alternate position of "lead" and "lag", sewage pumps after each pumping cycle shall be furnished and installed.
6. The manufacturer of the control system shall be certified by the Underwriters Laboratories (UL) as a UL 698A listed system panel manufacturer certified to install serialized label for quality control and insurance liability considerations.

B. Each major component shall be identified by an engraved phenolic nameplate.

C. All wiring shall be a flexible, stranded type and each conductor shall be tagged and numbered according to wiring diagrams and neatly tied.

D. The Control Panel shall be dimensioned to facilitate maintenance.

2.02 ALARMS

A. Control panels shall be capable of reporting, a minimum, of the following alarm points:

1. Dry Well High Level (Float switch).
2. Wet Well High Level.
3. Wet Well Low Level (With auxiliary contact to stop sewage pumps.)

4. Level Controller Failure.
5. Sewage Pump High Temperature or Failure (with pump shut down, lock out relay and reset push button.)
6. Loss of Phase Voltage.
7. Sump Flood (Dry well only).

B. Provide three spare alarm points and one set of N.O./N.C. contacts from common alarm relay for remote signaling. Every alarm shall be indicated by a labeled red pilot light mounted in the control panel. A red light with guard protector, as Series VDA manufactured by Crouse-Hinds, or approved equal and a bell with silencing buttons shall be mounted in the service enclosure. The alarm lights shall remain "on" until alarm signal is reset at control panel.

2.03 MOTOR STARTERS

A. Motor starters shall be sized as indicated on the drawings, with overloads to match the supplied motors. One set of N.O/N.C. spare contacts shall be provided in the sewage pump starter. Motor starters to be Siemens, Square D, Cutler Hammer, or approved equal.

B. Starters for sewage pumps shall be three-phase, sized in accordance with the following table:

NEMA SIZE STARTER			
Motor Size (Horsepower)	Single Phase 240 Volt	Three Phase 208 Volt	Three Phase 480 Volt
Up to 5	2	1	1
7½	2	2	1
10	-	2	2
15	-	3	2
20	-	-	2
25	-	-	3
30	-	-	3
40	-	-	3
50 to 75	-	-	4
100 to 150	-	-	5

2.04 CONTROL PANEL ACCESSORIES

A. All wiring shall be a flexible, stranded type and each conductor shall be tagged and numbered according to wiring diagrams and neatly tied.

B. All external wiring shall terminate in a terminal block, Square D Type G class 9080, or equal.

C. Relays shall be socket-mounted for ease of replacement, Square D Type K Class 8501, or equal.

D. Lamps, push bottoms, and switches shall be heavy duty oil-tight/watertight, Square D, Type K Class 9001, or equal.

E. Elapsed time meters shall be provided to indicate total running time of each sewage pump in "hours" and "tenths of hours". Meters shall be Eagle Signal Series HK or approved equal. An extra elapse time meter shall be furnished and installed to indicate the total time for all pumps simultaneous run.

2.05 LEVEL CONTROLLER

A. As specified in Specification Section 16051.

2.06 TELEMETRY

A. Telemetry (RTU) provided by the City shall be installed by the Contractor in its own weather-proof and corrosion-resistant enclosure separate from the control panel enclosure. The manufacturer of the control system shall provide the hardware required to interface the controller with the City SCADA System to remotely start-stop the pumps and monitor the operation of pumps and alarms.

2.07 CONSTRUCTION

A. Outside panels shall be gasketed, NEMA 3R, free standing, stainless steel, 12 gauge minimum construction, with same material continuous hinges and dead front anodized aluminum inner door. Finishing of the enclosure to be No. 2B. Padlocking of motor circuit breakers shall not obstruct the closing of the inner doors.

B. Inside panels shall be NEMA 12, constructed of .080 inches thick anodized aluminum or 14 gauge 316 stainless steel. Control wiring shall be color coded (minimum of 16 different colors), 16 gauge, 600 volts, 90 degree C. standard tinned copper, PVC insulated with crimped terminal connections.

C. Enclosure shall be approximately 48" W x 48" H x 12" D. The top of the panel shall stand no higher than 72-inches from the top of the support concrete pad. In any case, it shall be sized to facilitate maintenance of enclosed equipment with a double door. Total length of the enclosure will depend on the size of the pumps but shall be sized to provide enough space so that every piece of equipment can be easily reached for service and maintenance. The outer doors shall be furnished with a locking latch and staple for padlock, to be furnished by the City. All hardware shall be stainless steel. Provide every outer door with a limit switch to trip a remote alarm in case of unauthorized opening. Panel seams shall be continuously welded and ground smooth. All exterior joints shall be ground level and polished smooth. Stiffeners shall be added to panel sides and doors as necessary to ensure rigidity. Lifting eyes and a rolled lip around

three sides of the outside doors shall be provided. Provide also a rain shield over the generator outlet or access opening. Enclosure shall be 12-inches deep minimum.

D. The double doors shall be made of the same material as the enclosure. All edges of the doors shall be folded inward, similar to the cabinet to form a rigid non-flexing door. The door shall be hung on a continuous stainless steel hinge with stainless steel bolts and nuts. The door shall be equipped with a three-point locking latch, a handle and a heavy-duty stainless steel staple for a padlock. Provide a friction type latch on hinge side to keep the door in position desired and to keep it from being closed by the wind.

E. Cabinet anchorage shall consist of chemical adhesive anchor cartridge system 5/8" φ, minimum, stainless steel anchor threaded rod with 5-1/2", minimum, depth of embedment. The cabinet shall be secured to the concrete base at a minimum of four locations.

F. An external red LED strobe light, vapor tight with aluminum lens protector shall be mounted on a side of the enclosure. The voltage of the strobe light shall be 120 Volts AC and will flash on an alarm condition. The strobe light will continue to flash after the alarm silence button is pressed until the alarm condition has cleared.

G. The alarm bell shall be 120 volt A.C., 6 inches diameter, 90 db, weatherproof with protecting guard. Bell shall be Simplex Series 4090 or approved equal.

H. A cast or stamped plate, with the legend "Miami-Dade Water and Sewer Department, Tel. (305) 274-9272" in characters a minimum of 2-inches high, shall be firmly attached to the upper portion of the door by welding or tamper-proof bolting.

I. Provide stainless steel weather and sun shield welded to top of panel enclosure as shown on drawings if Variable Frequency Drives (VFD) or Soft-Start equipment are included and located within the enclosure. Shield shall be factory installed.

J. All hardware including hinges, 3- point latches and handles shall be corrosion-resistant metal.

K. Make all punching, reaming, cutting and other fabricating work before any finish is applied. Prior to painting, clean, degrease and phosphate-clean all panels. Final finishing, not less than three coats of semi-gloss polyurethane paint applied over a rust inhibitor primer. Panel interior to be white, with exterior surfaces of light gray ANSI-61.

L. Provide print pocket inside the panels to hold detailed wiring and interconnecting diagrams. One copy of the relevant drawings shall be provided and placed in these pockets.

M. Wiring to be stranded copper with 600 volt rated thermoplastic insulation. Power wiring shall be No. 14 AWG and control wiring No. 16 AWG minimum. Electronic signal wiring shall be No. 18 AWG twisted and shielded pairs.

Wiring shall not be spliced. Wiring shall be tagged for identification with printed wire sleeves or self-stick labels.

1. Color Coding to be as follows:
   a. Black: AC hot (line feed and load circuits).
   b. White: AC neutral.
   c. Green: Bonding ground.
   d. Red: AC control circuits.
   e. Yellow: Wiring with foreign voltage.

N. All wiring to and from field mounted devices shall be terminated at terminal strips, not directly connected to devices. Use plastic wireway Panduit or equal to route wire within the panel. Wireway shall be run in continuous length with snap-on covers, with AC and DC power wiring in separate wireways.

O. Protect all devices against damage from electrical transients induced in interconnecting lines by lightning discharges and nearby electrical equipment. Surge suppressors shall be provided at least at any interconnection of AC power and electronic equipment and at every analog signal input with circuits extending outside the building.

2.08 PANEL MOUNTED AIR CONDITIONING UNIT (VFD APPICATIONS ONLY)

A. The enclosure shall be Stainless Steel NEMA 4X rating fully gasketed for tight, leakproof installation. It shall be UL/CUL listed with closed loop cooling to allow the interior airflow system to be isolated from the ambient airflow system. The system shall be designed so no ambient air can invade the cool, dehumidified sensitive compartment.

B. Condenser Coils shall be Epoxy-Coated. This coating shall withstand 1000 hours of salt spray per the ASTM B 117 test method.

C. An air cured coating shall be sprayed on interior copper lines and brazed joints on the condenser side to provide protection from corrosive environments. The coating shall withstand 1000 hours of salt spray per the ASTM B 117 test method.

D. The unit shall include thermostatic Low Temperature Control to prevent over-cooling and to provide energy-efficient operation. Refrigerant shall be R410A.

E. Filters shall consist of a multi-layer grid of sturdy corrugated aluminum, securely held in a one-piece aluminum frame. Filters are required wherever air is drawn into an electronics enclosure or related cooling equipment to keep internal parts as clean as possible.

F. A short cycle relay shall be installed to protect the compressor from possible damage due to harmful short cycling, (frequent starting) where temperature controls enable the compressor to restart frequently or after a power interruption.

G. The unit shall be as manufactured by Kooltronic or approved equal. The unit shall be sized appropriately.

PART 3. EXECUTION

3.01 EXAMINATION & INSTALLATION

A. Verify items provided by other sections of Work are properly sized and located.

B. Verify that built-in items are in proper location, and ready for roughing into Work.

C. The Contractor shall provide limit switch to turn light "ON" when dry well hatch is opened.

D. Minimum interrupting capacity of the electrical panel shall be 10,000 AMPS.

E. Sump pump shall be provided with high level alarm wired to the telemetry.

F. A sump pump, discharge piping and local switch shall be installed in the valve pit in.

END OF SECTION

SECTION UC-250

GRAVITY SEWER SYSTEMS

PART 1 - GENERAL

1.01 SCOPE

A. These Specifications shall govern the design, materials and installation requirements of the Department for gravity sanitary sewer systems constructed in its service area when using Poly (Vinyl Chloride)(PVC) pipe and fittings, Vitrified Clay (V.C.) pipe and fittings or Ductile Iron pipe and fittings. "PVC" shall mean Poly (Vinyl Chloride) as it relates to pipe and fittings.

B. This Specification does not purport to cover all material or installation procedures which may be required, whether by the nature of the proposed work, or by the Department, or by other regulatory agencies.

C. It is intent of the Department to obtain a complete and working installation under this project, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

1.02 QUALITY ASSURANCE

A. All material and installation shall be in accordance with the Department's Design and Construction Standard Specifications and Details.

B. The material and installation for this project shall be in full compliance with all applicable standards listed in Section 01090, '' Reference Standards"

1.03 DEFINITIONS

See Section 01005, "Defined Terms"

1.04 PROJECT APPROVAL

The approval of the Department shall be secured, in accordance with Section 17005, prior to any construction related activity.

1.05 SPECIAL CONDITIONS

The work shall proceed in accordance with the following specification sections, bound herein:

A. Section 01011 - Site Conditions
B. Section 01016 - Safety Requirements and Protection of Property
C. Section 01031 - Grades, Lines and Levels
D. Section 01100 - Special Project Procedures
E. Section 01750 - Maintenance of Traffic and Public Streets

1.06 DESIGN REQUIREMENTS

A. GENERAL

1. Gravity sanitary sewer systems shall be designed in accordance with the State of Florida Department of Environmental Protection (DEP) Rules, Chapter 62-604 for Wastewater Facilities, with OSHA requirements and with the "Florida State Board Health Sewage Guide" and the recommendations of Chapter 12 of the ASCE Manual No. 37, "Sewer Design and Construction", except as otherwise provided herein. Wet wells and manholes shall be classified as hazardous areas, Class 1, Division 2, Group C.

2. In addition, systems shall be designed in accordance with the requirements of the Miami-Dade County Department of Environmental Resource Management (DERM), the requirements of the latest edition of the South Florida Building Code and the Miami-Dade Water and Sewer Department Standards and Specifications.

3. The use of PVC pipe or AWWA C900 PVC pipe within a public water supply wellfield cone of influence or in areas zoned industrial or commercial shall be as stated under "Tightness Standards" in Section UC-370.

4. Manhole to manhole runs shall be kept in the range of no more than 400 feet without permission.

5. Slope shall be such as to maintain two feet per second minimum velocity when running full or half full when calculated using the Manning Equation with a roughness coefficient of .013.

6. Minimum slope for terminal runs shall be 0.40 percent for eight inch pipe. This slope shall be maintained for a minimum of 300 feet and longer if loading is abnormally light.

7. Design shall be performed by experienced personnel who have previously designed sewerage collection systems in Miami-Dade County. Proof of experience shall be provided if required by the Department. All design work submitted for approval shall be signed, sealed and dated by a registered professional engineer licenced to practice in the State of Florida.

8. The Department reserves the right request complete design calculations, which shall be submitted and shall be in a format easily read.

9. Design shall be conservative with sufficient peaking and infiltration factors included. Absolute minimum slopes shall not be used since minor field construction variations will reduce slopes and give actual velocity of less than two feet per second.

10. The Department reserves the absolute right to require greater slopes, higher peaking or infiltration factors if this is considered necessary upon review of design. The design/build firm shall conform with any such requirements and supply said design and construct same at no extra cost to the County.

11. The use of PVC pipe and fittings will only be permitted for gravity sanitary sewers (and service laterals) 15-inches in diameter and smaller.

1.07 PERMITS, INSPECTIONS AND FEES

A. The Contractor shall obtain and pay for all permits, official inspections and all other fees in accordance with Section 01740, "Permits".

B. Inspection by Department personnel is required in addition to, not in lieu of, municipal and County department inspections (if any).

C. No installation will be accepted until it has passed all inspections, including pavement installation or replacement.

1.08 PRECONSTRUCTION CONFERENCE

Prior to commencement of the work, the Contractor shall attend a "Preconstruction Conference" in accordance with Section 01150, "Preconstruction Conference".

1.09 SUBMITTALS

A. The Contractor shall furnish "As-Builts" in accordance with Section 01725. Project Record Documents shall be submitted in accordance with Section 01720. The Contractor shall submit operating and maintenance instructions and all other submittals in accordance with Section 01730.

B. Where the Specifications require test certification or certification that certain products or material furnished are as specified, the Contractor shall deliver such certification to the Department. No material or equipment shall be approved for use in the work until individual certification has been received.

1.10 SAFETY REQUIREMENTS

A. The Contractor shall be in compliance with all applicable provisions of the Occupational Safety and Health Act of 1970, in general, and any subsequent amendments and revisions thereto and specifically to the provisions concerning confined space entry.

B. The Contractor's personnel will be in the vicinity of raw sewage. For his own protection, as well as for his employees, he shall check with Metropolitan Dade County Health Department, and based upon their recommendation, shall have his personnel properly immunized against disease.

C. Under this project, personnel may be required to enter the existing manholes/sewers to perform certain items of work. Before entering, the Contractor shall be in compliance with Dade County Manhole Ordinance No. 83-3 (which mandates, in part, that above-ground safety personnel shall be on duty at all times when someone enters or works in a manhole/sewer and the air within a manhole / sewer shall be tested with a combination oxygen deficiency meter-explosion meter to determine oxygen content and explosion potential). A test for the presence of hydrogen sulfide shall also be performed. The work area must be ventilated mechanically by the use of an air blower, before entry and during occupancy, to insure that an adequate quantity of oxygen is supplied to the work area.

D. The Contractor shall conduct his operations in such a manner, utilizing warning devices such as traffic cones, barricades and warning lights, and personnel such as flagmen and uniformed police officers, that the public is given adequate warning of hazards of the work site as may be deemed necessary by the authority having jurisdiction and/or the Department. See Section 01750, "Maintenance of Traffic and Public Streets."

E. In the instance of men working within the manholes, the Contractor shall provide safety provisions to cover any possible consequences of structural failure and/or flooding. Such provisions might take the form of, but not be limited to, ladders in position to permit rapid egress; safety harnesses ; stand-by pumping equipment; extra air supplies; and such other measures as the situation and good construction practices might indicate.

F. Certain products specified in these Specifications contain warnings by the manufacturers that under certain conditions, if instructions for use of the product are not followed, a hazardous condition may exist. It is the Contractor's responsibility to instruct his workmen in the safe use of the product, or any product substitution.

PART 2 - PRODUCTS

2.01 GENERAL

A. All material for use in the Project shall be new and of recent domestic manufacture and shall be the products of reliable manufacturers or suppliers who, unless otherwise specified, have been regularly engaged in the manufacture of such materials and equipment for at least five (5) years.

B. All fittings and components shall, wherever possible, be standard stock articles of well known manufacturers.

C. Where the Specifications designate the products of a particular manufacturer, the product specified has been found suitable for the intended use, but, unless otherwise provided, articles or products of similar characteristics may be offered for the approval of the Department, upon approval by the Engineer of Record.

D. Copies of complete descriptive data shall be furnished regarding all material, consisting of dimension drawings, catalog references and other information necessary to clearly identify each article.

E. When substitutions are permitted, the Contractor shall make all necessary changes in adjacent or connected structures and equipment, at his expense

F. Unless otherwise specified, all steel bolts, nuts, washers and all other miscellaneous ferrous metal items (except cast iron) furnished by the Contractor shall be hot-dip galvanized in accordance with ASTM A386, "Zinc Coating (Hot-Dip) on Assembled Steel Products" and ASTM A385, Providing High-Quality Zinc Coatings (Hot-Dip)". Where the word "galvanized" or its abbreviation is used on the Plans or in the Specifications, it shall mean hot-dip galvanized. Fabricated items shall be hot-dip galvanized after fabrication. Internal threads shall be tapped or re-tapped after galvanizing.

G. Where miscellaneous materials are required for a complete installation the Contractor shall provide such materials in conformance with Section 15065, "Miscellaneous Material".

H. See Section 01100 for water used in construction.

2.02 CASTINGS

A. GENERAL

1. Material used in the manufacture of the castings shall conform to ASTM A48, "Gray Iron Castings", for Class 30 iron. Manhole and valve box covers shall have a roadway or pedestrian type surface as required by location, and shall be non-rocking.

2. Castings shall be in compliance with Section 05550. Castings shall be as manufactured by U.S.F. Fabrication, Inc., Neenah Foundry, or approved equal.

3. Castings shall be delivered unpainted with a shotblasted finish.

B. MANHOLE FRAMES AND COVERS

Manhole covers and frames shall be Department Type "A" U.S.F.&F No. 310 as manufactured by U.S.F. Fabricating, Inc., Hialeah, Florida, or approved equal. The covers shall be cast labeled "SANITARY SEWER".

2.03 BRICK

A. Clay Brick: Bricks for manhole construction shall be dense, hard burned, common clay brick conforming to ASTM Standard C62, "Building Brick (Solid Masonry Units made from Clay or Shale)".

B. Concrete Brick: Concrete bricks shall conform to ASTM Standard C55, "Concrete Building Brick".

C. All bricks shall have true edges and sharp corners and shall have been cured for at least 14 days before being placed.

2.04 CONCRETE, MORTAR AND GROUT

See Section 17033, " Concrete, Mortar and Grout (Short)"

2.05 EMBEDMENT MATERIAL

Embedment material, for bedding, haunching and initial backfill, shall conform with the requirements of Section UC-300 “Gravity Sewer Pipe Foundation”.

2.06 MANHOLE

A. Shallow manholes shall be constructed of brick or precast concrete. All other manholes shall be constructed of precast concrete. See Section 02536, "Precast Manholes & Covers"

B. Castings for manhole frames, covers and other items shall conform to Subsection 2.02, above. Casting patterns shall conform to those designated in the Miami-Dade Water and Sewer Standard Details.

C. Concrete shall conform to Section 17033.

D. Brick for manhole construction shall be clay brick, in accordance with Subsection 2.03, above.

E. Cement mortar for manhole construction shall conform to Section 17033. It shall be mixed dry and then wetted to proper consistency for use. No mortars that have stood for more than one hour shall be used. Brick manholes shall be coated with 3/4-inch thickness of mortar both inside and outside.

F. The invert channels shall be formed of brick or brick rubble thoroughly bedded and covered with sand-cement grout, accurately shaped to a semicircular bottom conforming to the inside of the adjacent sewer section. Steep slopes outside the invert channels shall be avoided. Changes in size and grade shall be made gradually and evenly. Changes in the direction of the sewer or entering branch shall be a smooth curve with radius as long as practical.

G. Frames and covers shall be set accurately to grade with a minimum of 3 and a maximum of 5 courses of brick provided as a leveling course. It shall be the Contractor's responsibility to assure that the frames and covers are set to match existing and/or proposed finish paving grades at the manhole locations.

H. For PVC Sewers:

1. The first joint at both influent and effluent sewers at each manhole, including service laterals, shall consist of an approved manhole coupling grouted into the manhole wall, and providing a continuous watertight elastomeric gasket seal between the coupling and the pipe inserted therein. The coupling shall have an increasing tapered interior from the gasket groove to allow flexibility for the pipe in the event of future settlement of the manhole or pipeline.

2. The first length of PVC pipe into or out of the manhole shall be 2-feet long, maximum, and shall be either plain-end by plain-end, or plain-end by bell. In the first option, the next joint shall be a double bell PVC repair coupling (no stop) with a maximum 1-inch gap between the pipes inserted therein. In the latter option, the next joint shall be another 2-foot long section, maximum, of plain-end by bell PVC pipe.

I. For Ductile Iron and Vitrified Clay Sewers

The first length of pipe into or out of the manhole shall be a 2-foot length of plain end by plain end ductile iron pipe (i.e. 2' as measured from the outside wall) grouted directly into the opening in the manhole wall. This P.E. X P.E. short shall be joined to the spigot end of an adjacent ductile iron sewer main by use of a ductile iron solid sleeve. In the instance of a vitrified clay main, the ductile iron P.E. X P.E. short manhole stub out shall be joined to the V.C. spigot by use of a double hub connector for vitrified clay pipe. Note that C-900 PVC repair couplings shall not be used in ductile iron or vitrified clay mains.

J. Where shown on the drawings, the Contractor shall provide stub-outs for future extensions. Both ends of all such stubouts shall be closed with specified PVC plugs.

K. Precast manholes shall conform to Section 02536, "Precast Manholes & Covers". In precast concrete manholes, holes for sewer line connections, with a diameter equal to the outside diameter of the connecting sewer plus an additional four inches (4"), shall be formed in the manhole walls. No cutting or chipping at pre-formed holes, or cutting additional holes in precast concrete walls will be allowed.

L. A minimum of three to a maximum of five courses of brick shall be constructed atop each manhole corbel.

M. Prior to acceptance of manhole, the Contractor shall verify that he has installed required manhole accessories and coating/lining (See Section 02536)

2.07 POLY (VINYL CHLORIDE) PIPE

Pipe for use in gravity sewer systems shall be Vitrified Clay, Ductile Iron with polyethylene or ceramic epoxy (Protecto 401) lined , PVC SDR 35, or AWWA C900, C905 PVC as shown on the plans or called out elsewhere herein. For further information on these types of pipe, see Section 15060, “Piping and Fittings”.

2.08 REINFORCING STEEL

A. Bar reinforcement for concrete structures shall conform to the requirements of ASTM Standard A615 "Deformed and Plain Billet-Steel Bars for Concrete Reinforcement", Grade 60, Deformed, except that steel manufactured by the Bessemer Process will not be accepted. Wire mesh reinforcing for concrete paving or driveway repairs, if required, shall be welded wire fabric meeting the requirements of ASTM Standard A185, "Steel Welded Wire, Fabric, Plain, for Concrete Reinforcement".

B. The Contractor shall furnish the Department with manufacturer's test certificates showing the steel to meet the above requirements, in addition to which the Department may take representative samples from the material on the job and have them tested by an independent testing laboratory. Completely detailed shop drawings and bending schedules shall be submitted by the Contractor for the approval of the Engineer of Record. Such approval shall be obtained before the bars are cut and bent.

2.09 DUCTILE IRON CASING PIPE

Ductile iron casing pipe shall be ANSI/AWWA Standard C151/A21.51, Class 50, no lining required. Casing pipe shall be one size larger than PVC pipe to be encased, unless otherwise approved.

2.10 DUCTILE IRON SEWER PIPE

A. Ductile iron sewer pipe shall be ANSI/AWWA Standard C151/A21.51, Class 53 for 6-inch, Class

52 for 8-inch, Class 50 for 10-inch through 15-inch. Ductile iron pipe shall conform to Section 15060.

B. All ductile iron pipe and fittings 8-inches and larger in diameter for use in force mains and gravity sewers, except riser pipes, shall be delivered with either heat fused virgin polyethylene lining or ceramic epoxy lining (See Section 15060). The only ceramic epoxy material approved by the Department at this time is a high-build multi-component Amine cured Novalac epoxy, Protecto 401, by Vulcan Painters, Inc. of Bessemer, AL 35021.

2.11 MISCELLANEOUS MATERIAL

A. The Contractor shall furnish and install all miscellaneous material and appurtenances required for a complete installation. Section 15065 specifies material necessary for a complete installation, not specified herein. These material, including the following, shall be installed when required, whether shown on the Plans or not.

1. Paint, Bituminous
2. Caulking Compound
3. Manhole Couplings
4. PVC double bell repair couplings, No-stop (sleeves)
5. PVC double bell transition couplings or adapters PSM SDR-35 PVC Sewer Pipe to ductile-iron or AWWA C900 CI-PVC Pressure pipe.
6. Stainless steel repair clamps, with stainless steel bolts

PART 3 - EXECUTION

3.01 PIPE INSTALLATION, GENERAL

A. Proper and suitable tools and appliances for the safe convenient handling and laying of pipe shall be used and, in general, conform with manufacturer's recommendations. At the time of laying, the pipe shall be examined carefully for defects, and should any pipe be discovered to be defective after being laid, it shall be removed and replaced with sound pipe by the Contractor at his expense.

B. Pipe and fittings shall, at all times, be handled with great care to avoid damage. In loading and unloading, they shall be lifted with cranes or hoists or slid or rolled on skidways in such manner as to avoid shock. Under no circumstances shall this material be dropped or allowed to roll or slide against obstructions. Pipe an other material shall be distributed along the right-of-way in advance of installation only to the extent approved by the Department. Such materials shall be so placed as to keep obstruction to traffic minimum.

C. Upon satisfactory completion of the pipe bedding, a continuous trough for the pipe barrel and recesses for the pipe bells, or couplings, shall be excavated by hand digging. When the pipe is laid in the prepared trench, true to line and grade, the pipe barrel shall receive continuous, uniform support with no pressure being exerted on the pipe joints from the trench bottom.

D. Pipe shall be installed in accordance with the manufacturer's recommendation. Before being lowered into the trench, the pipes and accessories shall be carefully examined and the interior of

the pipes shall be thoroughly cleaned of all foreign matter and other deleterious materials by methods acceptable to the Department. During suspension of work, for any reason, at any time, a suitable stopper shall be placed in the end of the pipe last laid to prevent mud, dirt, groundwater or other foreign material from entering the pipe. Any pipe which is disturbed or found defective shall be immediately removed and replaced with sound pipe.

E. Gaskets shall be thoroughly checked for breaks, cuts or other damage, and shall be free of oil, grease, dirt or other foreign matter. Pipe joints shall be assembled with care. Lubricant, if required shall be as recommended by the manufacturer of the pipe, and shall have no deteriorating effects on the gasket and pipe materials. If assembly is under water, lubricant recommended by the manufacturer for underwater use is required.

F. Good alignment of the pipe is required for assembly. Align the spigot to the bell of the previously laid pipe and insert the spigot into the bell until it uniformly contacts the gasket. Apply steady pressure until the spigot easily slips through the gasket. Do not push or swing the spigot into the bell. Smaller diameter pipe and fitting may be assembled manually. Mechanical means such as bars and blocks, ratchets or jacks shall be used for joining larger pipe and fittings. Power equipment such as a backhoe bucket, shall not be used to assemble pipe and fittings, since excessive force may damage the gasket or bell.

G. Cutting the pipe in the field shall be done by the Contractor in a neat and workmanlike manner using manual or power saws. The pipe shall be marked around its entire circumference before cutting to assure a square cut. After cutting, the end shall be beveled with a beveling tool, rasp, or other approved equipment, to the proper taper. Mark the proper insertion depth on the cut and beveled end before installing the cut pipe into the pipeline. Pipe laying shall proceed up-grade from the lowest point of the proposed system, with spigot ends pointing in the direction of flow.

H. All pipe shall be laid straight, true to the lines and grades shown on the Plans, or matching existing grade, in each section between manholes. The pipe shall be laid so that the identification markings are located on the top of the installed pipelines.

I. Each individual length of pipe shall be solidly and evenly bedded and haunched throughout its length on a prepared bed on the floor of the trench and not supported in position on blocks or wedges. Pipe shall only be laid when the two preceding lengths have been thoroughly embedded in place to prevent any movement or disturbance of the finished joint. Any pipe which is disturbed or found to be defective after laying shall be taken up and relaid or replaced.

J. Any work within the pipe and fittings shall be performed with care to prevent damage to the interior wall of the pipe. Damaged interior walls shall be repaired or the pipe section or fitting replaced as required by the Department. No cables, lifting arms, hooks or other devices shall be inserted into the pipe or fitting. All lifting, pulling or pushing mechanisms shall be applied to the exterior of the pipe or fitting.

K. After pipe has been laid, reviewed and found satisfactory, sufficient backfill shall be placed along the pipe barrel to hold the pipe securely in place during the conduction of the required tests.

3.02 INSTALLATION OF DUCTILE IRON AND VITRIFIED CLAY PIPE

A. Installation of gravity sewers shall conform to the applicable requirements of ANSI/AWWA Standard C600-93, "Installation of Ductile Iron Water Mains and Appurtenances".

B. Cutting of ductile iron pipe for fittings and other connections shall be done by the Contractor in a neat and workmanlike manner without damage to the pipe, the lining, or the coating. Pipe shall be cut with a mechanical pipe saw. After cutting the pipe, the plain ends shall be filed to remove all sharp edges and burrs.

C. Polyethylene encasement of valves, cast iron pipe and fittings, if required by the Department, shall be installed in accordance with ANSI/AWWA C105/A21.5, "Polyethylene Encasement for Ductile-Iron Piping for Water and Other Liquids" Method A, B or C.

D. If any difficulty is experienced in assembling lengths of pipe together in the trench, the pipe sections shall be tried on the surface of the ground and each length of pipe plainly marked for position and sequence in which they are to be installed.

E. Ductile iron solid sleeves shall be used to connect D.I. pipe spigots to existing D.I. manhole stub spigots. Vitrified clay double hub connectors shall be used to connect D.I. manhole stub outs to V.C. pipe spigots.

F. All bolts, nuts, gaskets or other joint materials for use in the pipeline shall be properly protected.

G. Gaskets shall be properly stored, and care shall be exercised to keep them away from heat, light, oil, gasoline or other petroleum products. Gaskets shall be kept clean at all times and not handled with greasy or dirty hands.

3.03 INSTALLATION OF POLY VINYL CHLORIDE (PVC) PIPE

A. Each length of pipe, immediately prior to being placed in position in the trench, shall be inspected, cleaned and prepared for installation. Gaskets shall be thoroughly checked for breaks, cuts or other damage, and shall be free of oil, grease, dirt or other foreign matter. Pipe joints shall be assembled with care. Lubricant, if required, shall be as recommended by the manufacturer of the pipe, and shall have no deteriorating effects on the gasket and pipe materials. If assembly is underwater, lubricant recommended by the manufacturer for underwater use is required. Good alignment of the pipe is required for assembly. Align the spigot to the bell of the previously laid pipe and insert the spigot into the bell until it uniformly contacts the gasket. Apply steady pressure until the spigot easily slips through the gasket. Do not push or swing the spigot into the bell. Small diameter pipe and fittings may be assembled manually. mechanical means such as bars and blocks, ratchets or jacks shall be used for joining larger pipe and fittings. Power equipment, such as backhoe bucket, shall be not be used to assemble pipe and fittings, since excessive force may damage the gasket or bell.

B. Cutting the pipe in the field shall be done by the Contractor in a neat and workmanlike manner using manual or power saws. The pipe shall be marked around its entire circumference before cutting to assure a square cut. After cutting, the end shall be beveling tool, rasp, or other approved equipment, to the proper taper. Mark the proper insertion depth on the cut and beveled end before installing the cut pipe into the pipeline. Pipe laying shall proceed up-grade from the lowest point of the proposed system, with spigot ends pointing in the direction of flow. All pipe shall be laid straight, true to the lines and matching existing grade, in each section between manholes. The pipe shall be laid so that the identification markings are located on the top of the installed pipelines. At all times when work is not in progress, the exposed ends of all pipes shall be fully protected by an approved stopper to prevent groundwater, dirt, rocks or other substances from entering the pipe.

3.04 PIPE-TO-PIPE CONNECTIONS

Pipe-to-pipe connections shall be made by using solid sleeves for Ductile Iron, double hub

connectors for vitrified clay and double bell couplings for PVC.

3.05 PIPE-TO-PIPE MANHOLE CONNECTIONS

When a sound pipe stub-out exists at a manhole to which connection is to be made, a pipe-to-pipe connection shall be made as described above. If a stub-out is not present or is faulty, an opening shall be cut in the manhole wall and the connection made. The connection shall be constructed as specified above in paragraphs 2.06 H and I with the pipe material/method chosen to match that of the new line. The invert/shelf area inside the manhole shall be cut and reshaped as necessary to construct the new channels in compliance with WASD Standard Details

3.06 GRAVITY SEWER SERVICE LATERALS

See Section UC-310, "Gravity Sewer Service Laterals".

3.07 MODIFICATIONS OF EXISTING MANHOLES

See Section UC-330, "Repairs to Department Sewers"

3.08 EXCAVATION

See Section 02315, "Trenching and Backfilling for Piping Systems"

3.09 SEWER PIPE FOUNDATION

See Section UC-300, "Gravity Sewer Pipe Foundation"

3.10 CLEANING AND TESTING

See Section UC-370, "Cleaning and Testing Gravity Sewers"

3.11 SEWERAGE REMOVAL

See Section UC-290, "Removal of Sanitary Sewerage and Debris"

3.12 SEWAGE FLOW CONTROL

See Section UC-320, "Sewerage Bypass Pumping and Flow Control"

3.13 REPAIR OF DAMAGE TO DEPARTMENT MAINS & SEALING LEAKS

See Section UC-330, "Repairs to Department Sewers"

3.14 DEFLECTION TEST

See Section UC-350, "Sewer Deflection Test"

END OF SECTION

SECTION UC-290

REMOVAL OF SANITARY SEWERAGE AND DEBRIS

PART 1 - GENERAL

1.01 SCOPE

The Contractor shall furnish all labor, material and equipment required for the removal of sanitary sewer mains and appurtenances.

1.02 RELATED SECTIONS

Section 01016 - Safety Requirements and Protection of Property
Section 01100 - Special Project Procedures
Section 02315 - Trenching and Backfilling for Piping Systems

PART 2 - PRODUCTS

(Not Used)

PART 3 - EXECUTION

3.01 REMOVAL OF SANITARY SEWER

A. During cleaning operations and removal sewer mains, all sludge, dirt, sand, rock, grease, laitance (lime scum), roots, mortar, unsound concrete and other materials shall be completely removed. If the steel reinforcing is exposed, the Contractor shall request guidance from the Engineer of Record.

B. Under no circumstances shall sludge or other debris removed during cleaning or sewer main removal operations be dumped or spilled into the streets, ditches, storm drains or other sanitary sewers. However, water decanted from removed solids shall be returned to the sewer.

C. The Contractor is advised that he shall not dispose of this material by dumping on private or public property, by sale to others, or any means other than those given below. Any load of material, or any portion thereof, disposed of in a non-permitted fashion will result in a charge to the Contractor in the amount of $500.00 per load, or any portion thereof, which sum will be deducted by the Department from any monies due the Contractor. Additionally, the Contractor shall be backcharged for any fines, penalties, or other costs or damages imposed upon the City any agency or private party as a result of improper disposal by the Contractor.

D. The Contractor shall keep his haul route and work area(s) neat and clean and reasonably free of odor, and shall bear all responsibility for the cleanup of any spill which occurs during the transport of cleaning or surface preparation by-products and the cleanup of any such material which is authorized by or pursuant to this Contract and in accord with applicable law or regulations. The Contractor shall immediately cleanup any such spill or waste. If the Contractor fails to cleanup

such spill or waste immediately, the Department shall have the right to cleanup or arrange for its cleanup and shall charge to the Contractor all costs, including administrative cost and overhead, incurred by the Department in connection with such cleanup. The Department shall also charge to the Contractor any costs incurred or penalties imposed on the Department as a result of any spill, dump or discard. Under no circumstances is this spilled material to be discharged into the waterways or any place other than where authorized to do so by the appropriate authority. The term "Contractor" as used in this section shall include the Contractor's subcontractors and other Contractors.

D. The general requirements for vehicles hauling such waste materials are as follows: Transport vehicles must be of type(s) approved for this application by the political jurisdiction involved. General requirements are that the vehicles have watertight bodies, that they may be properly equipped and fitted with seals and covers to prohibit material spillage or drainage, and that they be cleaned as often as is necessary to prevent the deposit of material on the roadways. Vehicles must be loaded within legal weight limits and operated safely within all traffic and speed regulations.

E. The routes used by the Contractor for the conveyance of this material on a regular basis shall be subject to approval by the governing authority having jurisdiction over such routes.

F. All waste materials and debris removed during these operations shall be, if sufficiently dewatered (at least 20 percent solids and no visible moisture), conveyed directly to the County's Class I sanitary landfill, the South Dade Solid Waste Disposal Facility, 24000 S.W. 97th Avenue, Dade County, Florida. Solids which are too wet for direct deposit at the landfill shall be conveyed to and deposited on the Plant's "cleanout" pad established to receive and drain/dry this material. All cost for such removal and disposal, including tipping fees, shall be paid by the Contractor.

G. Material cleaned from the sewer shall be removed from the site for disposal as each truck is filled and at the end of each work shift.

H. Copies of records of all disposal shall be furnished to the Engineer of Record, indicating disposal site, date, amount, and a brief description of material disposed. Under no circumstances will the Contractor be allowed to accumulate debris, etc., on the site of work beyond the stated time, except in totally enclosed containers and as acceptable to the Department.

END OF SECTION

SECTION UC-300

GRAVITY SEWER PIPE FOUNDATION

PART 1 - GENERAL

1.01 WORK INCLUDED

The work under this Section includes the installation of gravity sewer pipe foundations.

1.02 RELATED SECTIONS

Section 01016 - Safety Requirements and Protection of Property
Section 01100 - Special Project Procedures
Section 02315 - Trenching and Backfilling for Piping Systems

PART 2 - PRODUCTS

2.01 Material: See Part 2 of Section 02315

PART 3 - EXECUTION

3.01 GENERAL

A. Excavation shall proceed in accordance with Section 02315, "Trenching and Backfilling for Piping Systems".

B. Gravity sewers shall be constructed using Vitrified Clay, Poly Vinyl Chloride (PVC) (SDR 35 or AWWA C900) pipe and fittings or ductile iron pipe and fittings, as shown on the approved Plans (See Section 15060, "Piping and Fittings" for D.I.P. or Section UC-250, “Gravity Sewer Systems” for PVC).

3.02 FOUNDATIONS FOR V.C. AND D.I.P. AT DEPTH OVER 10 FT. OR BELOW WATER

A. Sewer pipe constructed at a depth greater than 10 feet, or with a trench bottom below groundwater, shall have a rockbed foundation, in accordance with Section 02315. The trench shall be excavated to a depth of at least 6 inches below the bottom of the pipe, the trench backfilled with a layer of rockbed firmly compacted, the pipe solidly bedded and additional rockbed firmly packed and thoroughly compacted under and around the pipe up to the springline.

B. See Subsection 3.03, below, for sewer pipe constructed at a depth less than 10 feet and trench bottom above groundwater.

3.03 FOUNDATIONS FOR V.C. AND D.I.P. AT DEPTH ABOVE 10 FT. AND ABOVE WATER

Pipe constructed at cut ranges less than 10 feet, and the trench bottom is above ground water, shall be installed according to the following conditions:

A. Installation in Rock Bottom

Where rock is encountered at the bottom of a trench in which pipe is to be installed, the excavation shall be extended to a depth at least 6 inches below the bottom of the pipe and shall be backfilled with selected backfill material in 6-inch layers, with each layer being firmly compacted, and with the final layer carefully graded and compacted at the proper elevation to provide continuous support for the pipe barrels. Where pipe bells will be located, depressions shall be excavated in the trench bottom to provide clearance under the bell or socket.

B. Installation in Soil Bottom

Where rock is not encountered at the bottom of a trench excavation, and the soil is satisfactory for pipe foundation, in the opinion of the Engineer, excavation shall be halted at an elevation slightly above that for bedding the pipe, and the pipe bed carefully excavated by hand in the undisturbed trench bottom to provide continuous bearing for the pipe barrels and clearance under the bells or sockets, or machine excavation may extend slightly below the elevation for bedding the pipe with the trench bottom carefully backfilled and compacted as specified.

3.04 FOUNDATIONS FOR PVC GRAVITY SEWERS

Embedment material (for bedding, haunching and initial backfill) shall be Class I in stable soil conditions, and Class II in unstable soil conditions, as modified herein.

A. Class I materials shall be angular, 1/4 to 3/4 inch graded stone including washed and graded limerock.

B. Class II materials shall be well graded coarse sands and gravels with the following gradation requirements:

Sieve Size	Percent Passing By Weight
3/4	100
3/8	85-100
#8	40-60
#30	5-30
#100	0-2

END OF SECTION

SECTION UC-310

GRAVITY SEWER SERVICE LATERALS

PART 1 - GENERAL

1.01 SCOPE

The Contractor shall furnish all labor, material, equipment and appurtenances necessary for the installation of gravity sewer service laterals, complete, in accordance with these specifications.

1.02 RELATED SECTIONS

Section 01016 - Safety Requirements and Protection of Property
Section 02315 - Trenching and Backfilling for Piping Systems
Section UC-250 - Gravity Sewer Systems

1.03 QUALITY ASSURANCE

A. Lateral sewers shall be installed in accordance with all the applicable requirements for pipe installation. Branch fittings shall be installed in the main line sewer as it is constructed, in the locations and configuration of the original laterals or as designated by the Engineer.

B. All excavations shall be executed in accordance with the South Florida Building Codes, OSHA requirements, the State of Florida Trench Safety Act (TSA), the State of Florida Trench Safety Act (TSA) and all applicable requirements of Section 01016, including notification of the Sunshine State One-Call Center (1-800-432-4770), 48 hours prior to any excavation.

PART 2 - PRODUCTS

See Part 2 of Section UC-250, "Gravity Sewer Systems" & "Tightness Standards" under Section UC-370.

PART 3 - EXECUTION

3.01 INSTALLATION OF LATERALS

A. Service laterals shall be installed in accordance with the requirements for gravity main installation. Branch fittings shall be installed in the main line sewer as it is constructed. The branch fittings shall be either a tee set for a modified riser when the top of the sewer is 7 feet or deeper, or a wye set and connected as shown in the Miami-Dade Water and Sewer Department's Standard Details SS 1.0 and 2.0, respectively. In no case shall the branch be covered until its location has been measured and recorded.

B. Where a service lateral enters a manhole at an elevation of 2 feet or more above the

sewer main invert, a drop connection shall be required.

C. Each service lateral shall be plugged at the point shown on the Standard Details. Plug shall provide a watertight seal, without the use of adhesives or epoxies, and shall be subject to approval by the Department. In no case shall a service lateral be covered until its exact location is measured and recorded, nor until a two-inch square by two feet long, pressure-treated pine stake, with the top stained or painted green, has been set by the Contractor at the end of the service lateral.

D. The Contractor shall not excavate trenches for service laterals to both sides of the street at the same time unless written permission has been secured in advance to close the street.

3.02 REMOVAL AND REPLACEMENT OF LATERALS

A. Excavate in accordance with Section 02315, "Trenching and Backfilling for Piping Systems"

B. The existing laterals shall be hand excavated to a joint, disassembled, or if necessary saw cut, clean and square and the appropriate adapter installed to connect the replacement lateral. Care shall be taken to maintain the slopes of the existing lateral. The lateral shall be removed and replaced from the main line to a point along the existing lateral determined by the Engineer of Record to be in acceptable condition.

C. Placement of bedding/cover materials in the trench shall be the same for laterals as provided in Section UC-300, "Gravity Sewers Pipe Foundation".

END OF SECTION

SECTION UC-320

SEWERAGE BYPASS PUMPING AND FLOW CONTROL

PART 1 - GENERAL

1.01 SCOPE

The Contractor shall furnish and install all labor, material and equipment necessary to control the flow of sewage in accordance with this Section. This Section also contains provisions regarding surcharging sewers and sewage spills.

1.02 SUBMITTAL

The Contractor shall submit complete, detailed plans for this aspect of the work to the City for approval.

1.03 SPECIAL PROVISIONS

A. All applicable requirements in the following specification sections shall apply during execution of the work:

Section 01100 - Special Project Procedures
Section 01750 - Maintenance of Traffic and Public Streets

B. For projects where twenty-four (24) hour by-pass pumping of sewage is required, the Contractor shall provide personnel for manning and maintenance.

C. The Contractor shall be completely responsible for conditions at the job site, until acceptance of the project; he shall provide for traffic safety, traffic control and protection of property; and he shall be directly responsible to property owner(s) for any damage, injury, expense, loss, suits, or claims in accordance with Section 01016, "Safety Requirements and Protection of Property".

PART 2 - PRODUCTS

(Not Used)

PART 3 - EXECUTION

3.01 BYPASS PUMPING/FLOW CONTROL, GENERAL

A. The Contractor shall be prepared to bypass pump the sewage effluent as a part of his operations, if necessary. The Contractor shall provide all necessary pumps, piping, and other equipment to accomplish this task with each mobilized crew and shall be prepared to perform all construction; obtain all permits; pay all costs; and perform complete restoration of all existing facilities to equal or better condition and to the satisfaction of the City. Bypass

pumping will occur where high flow rates and insufficient upstream storage capacity make this necessary. All costs of accomplishing the bypass pumping tasks, at whatever volume, and all associated work, such as, for example, construction of intake and discharge points, and restoration, shall be considered as incidental to the work.

B. When sewer line flows at the upstream manhole of the gravity main being replaced or the pump station wet well are above the maximum allowable requirements for the replacement, the flows shall be reduced to the levels indicated by one of the following methods: manual operation of pumping stations by the City forces, by the Contractor plugging/blocking of the flows, or by the Contractor pumping/bypassing of the flows all as acceptable to the City.

C. In some applications, the sewer may be plugged and wastewater contained within the capacity of the collection system. This shall only be done when it has been determined that the system can accommodate the surcharging without any adverse impact.

D. When sewer line flows at the upstream manhole of the line being removed and replaced, in the opinion of the Engineer of Record, are too excessive to plug while the work is being performed; the Contractor shall submit for approval by the City, a written plan and pump/ bypass the flow.

E. For all service lateral reestablishment, testing and sealing, the depth of flow within the sewer shall not exceed that shown below for the respective pipe sizes as measured in the manhole.

	Maximum Depth of Flow
4-inch - 12-inch Pipe	25 percent of pipe diameter
15-inch - 18-inch Pipe	30 percent of pipe diameter

3.02 PLUGGING AND BLOCKING

A sewer line plug shall be inserted into the line at a manhole upstream from the section being removed and replaced or pump station wet well being re-worked. The plug shall be so designed that all or any portion of the operation flows can be released. During removals and replacement, the flows shall be shut off and monitored or pumped / bypassed, as acceptable to the City. After the work tasks have been completed, flows shall be restored to normal.

3.03 PUMPING AND BYPASSING

A. When pumping / bypassing is required, as approved by the City the Contractor shall supply the necessary pumps, conduits and other equipment to divert the flow of sewage around the sewer section or pump station in which work is to be performed. The bypass system shall be of sufficient capacity to handle existing flows plus additional flow that may occur during periods of rain storms. The Contractor shall be responsible for furnishing the necessary labor and supervision to set up and operate the pumping and bypassing system. A "setup" consists of the necessary pumps (including backup pumps if required), conduits and other equipment to divert the flow of sewage around the pump station or sewer section, from the start to finish of work performed in the pump station or sewer section.

B. Pumps and equipment shall be continuously monitored by a maintenance person capable of starting, stopping, refueling and maintaining these pumps during the construction. If pumping

is required on a 24-hour basis, engines shall be equipped in a manner to keep noise to a minimum. In the instance of work on a pump station, the Contractor may be required to provide, at his sole expense, a temporary electric service, electrically driven pump(s) and engine driven backup pump(s).

3.04 SURCHARGING SEWERS

A. Where the raw sewage flow is blocked or plugged, sufficient precautions must be taken to protect the public health. Upstream flow shall be monitored. The sewer lines shall also be protected from damage. The following occurrences will not be allowed:

1. No sewage shall be allowed to back up into any homes or buildings.

2. No sewage shall overflow any manholes, cleanouts or any other access to the sewers.

3. Users upstream of the repair area shall be able to use all their water and sewer utilities without interruption.

B. If any of the above occur or are expected to occur, the Contractor shall bypass pump to alleviate one or all of the conditions. Additionally, the Contractor is required to observe the conditions upstream of the plug and be prepared to immediately start bypass pumping, if needed.

3.05 PUMP DISCHARGE

Any sump pumps, bypass pumps, trash pumps or any other type pump which pulls sewage/water or any type of material out of the manhole or sewer shall discharge this material into another manhole, or appropriate vehicle or container acceptable to the Engineer of Record. Under no circumstances shall this material be discharged, stored or deposited on the ground, swale, road or open environment.

3.06 MAINTENANCE OF TRAFFIC FOR BYPASS PUMPING

The Contractor shall take appropriate steps to ensure that all pumps, piping and hoses that carry raw sewage are protected from vehicular traffic and pedestrian traffic. Maintenance of traffic shall be performed in accordance with Section 01750, "Maintenance of Traffic and Public Streets"

3.07 SEWAGE SPILLS

A. In the event, during any form of "Sewage Flow Control," that raw sewage is spilled, discharged, leaked or otherwise deposited in the open environment, due to the Contractor's work, the Contractor is responsible for any cleanup of solids and disinfection of the area affected and liability for any claims. This work shall be performed at the Contractor's expense with no cost to the City.

B. The Contractor is also responsible for notifying the sewer system maintenance personnel and complying with any and all regulatory requirements in regard to the size of spill with no cost to the City.

C. The Contractor shall be backcharged for any fines, penalties or other costs or damages imposed upon the City by any agency or private party as a result of a spill or improper discharge by the Contractor.

END OF SECTION

SECTION UC-330

REPAIRS TO DEPARTMENT SEWERS

PART 1 - GENERAL

1.01 SCOPE

The Contractor shall furnish all labor, material and equipment required to repair the Department's sewers due to damage caused by his operations or as required to perform necessary modifications to existing installations.

1.02 RELATED SECTIONS

Section 01016 - Safety Requirements and Protection of Property
Section 01100 - Special Project Procedures
Section 02315 - Trenching and Backfilling for Piping Systems
Section UC-250 - Gravity Sewer Systems

PART 2 - PRODUCTS

2.01 CHEMICAL JOINT AND CRACK SEALING MATERIALS FOR ACTIVE LEAKS

A. Chemical joint and crack sealing materials used on this Project shall have the following properties: react quickly to form a permanent watertight seal; resultant seal shall be flexible and immune to the effects of wet/dry cycles; non-biodegradable and immune to the effects of acids, alkalis, and organics in sewage; component packaging and mixing compatible with field conditions and worker safety; extraneous sealant left inside pipe shall be readily removable.

B. Chemical joint sealing material shall be acrylic resin type and shall be furnished with activators, initiators, inhibitors and any other materials recommended by the manufacturer for a complete grout system. Sealing grout shall be furnished in liquid form in standard manufacturer's containers. Sealing grout shall be AV-118 Duriflex manufactured by Avanti International, Houston, Texas (1-800-877-2570) or approved equal.

PART 3 - EXECUTION

3.01 REPAIRS DUE TO CONTRACTOR'S OPERATIONS

A. The Contractor shall exercise caution to insure that his operations do not damage the existing sewer. The Contractor shall be responsible for repairs to the sewers which are necessary due to damage caused by the Contractor's operations. Such repair shall be considered as part of the work.

B. Damaged pipe or manholes shall be replaced in kind or repaired by the Contractor to the satisfaction of the Department, with emphasis on providing a good, solid foundation for the new pipe. Temporary paving and permanent paving repairs shall also be made by the Contractor.

C. Contractor shall immediately repair any damage using methods satisfactory to the Engineer. Repairs shall proceed on a 24-hour/day, seven day/week basis if so directed by the Department. If the Contractor fails to immediately repair any such damage, the Department shall have the right to make the repair or have the repair made, and may charge to the Contractor all costs, including administrative costs and overhead, incurred by the Department in connection with the repair. The Department shall also charge to the Contractor any costs incurred or penalties imposed on the Department as a result of such damage.

D. The Contractor is strongly advised not to position equipment having greater than an AASHTO H-20 loading above the sewer line. Repair of any damage caused by such equipment loads shall be at the Contractor's expense.

E. Any repairs requiring excavation, except emergency work, shall have prior approval of the Engineer.

3.02 MODIFICATION OF EXISTING MANHOLES

Where modification of existing manholes are required to replace existing mains the following requirement shall be adhere to:

A. After satisfactory replacement and testing of mains all interior concrete surfaces of the modified manhole shall be high pressure washed and seal coated with 2 coats of a coal tar epoxy, Kop-Coat Company Bitumastic 300-M, or approved equal. Each coat shall have a dry film thickness of 8 mils, minimum. The requirements of this paragraph are not applicable to existing manholes to lined with a Department approved liner. (See Section 02536 for additional requirements.)

B. The modifications to the invert channels of the manhole shall be formed of brick or brick rubble thoroughly bedded and covered with sand-cement grout, accurately shaped to a semi-circular bottom conforming to the inside of the adjacent sewer section. Steep slopes outside the invert channel shall be in the direction of the sewer or entering branch shall be a smooth curve with radius as long as practical

C. Gravity sewer shall connect to the manholes in accordance with Miami Dade Water and Sewer Department's Standard Details and Section UC-250.

3.03 SEALING OF POST-REPLACEMENT LEAKS

In the event it becomes necessary to seal sewer pipe to stop leakage after sectional replacement, the following procedure shall be used:

A. Chemical joint or crack sealing material specified above or as approved by the Department shall be furnished and satisfactorily installed. The Contractor shall modify his equipment as necessary to seal the leaks, however both his equipment and sealing method shall meet the approval of the Department prior to use.

B. Extreme caution shall be utilized during leak sealing (pressure) operations in order to avoid damage of the sewer pipe. If any damage occurs, it shall be repaired as specified in Subsection 3.01, above, and to the satisfaction of the Department. Excessive pumping of grout which might plug a service lateral shall be avoided. Any service laterals blocked by the

grouting operation shall be cleared immediately by the Contractor.

END OF SECTION

SECTION UC-350

SEWER DEFLECTION TEST

PART 1 - GENERAL

1.01 SCOPE

The Contractor shall test new sewer system installations, completely and satisfactorily, prior to final acceptance by the Department.

PART 2 - PRODUCTS

(Not Used)

PART 3 - EXECUTION

3.01 GENERAL

All testing performed by the Contractor shall be witnessed by the Department Inspector, who shall be notified a minimum of twenty-four (24) hours in advance of the test.

3.02 DEFLECTION TESTS

A. Deflection testing of the new sewer shall be performed by the Contractor. No section of sewer shall be tested before at least 30 days have elapsed from the date of completed backfill over the section. The pipe will be observed for evidence of obvious ovality, deflected or offset joints, and other pipe defects.

B. The deflection, or deformation of the pipe due to external loading, shall not exceed approximately 7.5 percent. All labor, materials and equipment necessary for cleaning the sewers and performing the deflection testing shall be furnished by the Contractor. However, prior to the test, the Contractor's mandrel must pass a ring gauge test, performed by the Inspector at the site using the Department's ring gauge, to show that the mandrel is properly sized in accordance with the mandrel sizes listed hereinbelow 7.5 percent deflection.

C. Deflection testing the system may also be performed by the Department, at its cost, at any time during the Warranty or Contract Bond period, and the deflection in any pipe shall not exceed 7.5 percent.

D. Deflection shall be determined by passing an approved go/no go mandrel through the gravity sewer main. Deflection will be based on the average inside diameter as presented in ANSI/AWWA C900, "AWWA Standard for Polyvinyl Chloride (PVC) Pressure Pipe, 4 inches through 12 inches, for Water Distribution:", Table 1, for Poly (Vinyl Chloride) (PVC) C 900 pipe. However, no mandrel testing is required for AWWA C900 PVC pipe installed with up to 14 feet of cover, in accordance with subsection 1.05-C of Section UC-005.

E. The deflection may also be based on the average inside diameter as presented in ASTM D3034, Table XI.I, for PSM SDR35 PVC sewer pipe. The mandrel sizes are listed as follows:

Pipe Size Nominal (inches)	Average Inside Diameter	Mandrel 7.5% Deflection
6	5.893	5.31
8	7.891	7.09
10	9.864	8.84
12	11.737	10.51
15	14.374	12.86

F. If any pipe fails the deflection test, performed by the Contractor or by the Department, unstable conditions and/or improper bedding will be assumed. The overly deflected pipe shall be removed and replaced by the Contractor, at his expense. Re-rounding of overly deflected pipe will not be allowed. A trench to unstable conditions, as shown on Department Standard Detail SS 18.0, shall be excavated and new pipe installed to unstable soil condition specifications. New replacement pipe shall be connected to existing pipe to remain with new double bell PVC repair couplings (no stop) with a maximum 1-inch gap between the pipes inserted therein. The couplings shall conform to the Specifications herein for PVC pipe and fittings. The Contractor shall furnish the Department with a new one year Warranty or Contract Bond guaranteeing the replacement work and materials under the same terms and conditions as the original new Warranty or Contract Bond. The new warranty period shall commence from the Department's acceptance of the replacement work performed by the Contractor.

END OF SECTION

SECTION UC-370

CLEANING AND TESTING GRAVITY SEWERS

PART 1 - GENERAL

1.01 SCOPE OF WORK

The Contractor shall furnish all material, labor and equipment necessary to clean and test gravity sewers and sanitary force mains and shall conduct all testing required, under the direction of the Engineer.

1.03 QUALITY ASSURANCE

Cleaning and testing shall be performed in strict accordance with these specifications.

PART 2 - PRODUCTS

(Not Used)

PART 3 - EXECUTION

3.01 GENERAL

A. All drain and gravity sewer line segments or sections shall be separately and individually lamped and tested for infiltration and exfiltration, unless otherwise allowed by the Engineer. A line “segment” or “section” shall be defined as a run of pipe between a manhole and the next manhole either up or down stream of that manhole.

B. Each section of gravity pipe sewer, upon its completion or at such other time as the Engineer may direct, is to be cleaned, tested and inspected.

C. The allowable limits of infiltration or exfiltration or leakage for the drain or sewer lines, or any portion thereof shall not exceed the appropriate rate as specified in 3.04 “Tightness Standards”, below. Duration of tests shall be a minimum of two hours.

D. Since allowable leakage is defined in gallons per hour, testing shall be conducted in, at a minimum, two independent one-hour test periods. Testing shall continue for additional one-hour periods if during any subsequent test period leakage increases above that of any previous test period even if the leakage is within the allowable amount. Testing shall continue until the leakage stabilizes or decreases.

E. When allowed by the Engineer in writing, longer portions of the line may be tested. However, no more than three manhole sections or 1000 feet of sewer (whichever is the lesser) shall be tested at any one time.

F. When multiple sections of line are tested together as specified above, the leakage

shall be calculated based on the footage of the smallest segment being tested as if all of the leakage originated in the shortest segment of the group.

G. Prior to testing for infiltration, the system shall be pumped out so that normal infiltration conditions exist at the time of testing. The amounts of infiltration or exfiltration shall be determined by pumping into or out of calibrated drums, or by other approved methods.

H. The exfiltration test will be conducted by filling the portion of the system being tested with water to a level which will provide a minimum head of 2-feet in a lateral connected to the test portion, or, in the event there are no laterals in the test portion, a minimum difference in elevation of 5-feet between the crown of the highest portion of the drain or sewer and the test level.

I. If the ground water level is above the crown of the highest portion of the drain or sewer, the 5-foot differential shall be measured between the ground water level and the test level. Where insufficient depth of cover is available to produce a 5-foot differential, the maximum differential producible between ground water elevation and a test elevation set to avoid flow out of low manholes or into adjacent structures connected to the test section shall be used.

J. Where infiltration or exfiltration exceeds the allowable limits specified herein, the defective pipe, joints, or other faulty construction shall be located and repaired by the Contractor.

K. The Contractor shall locate and repair all leaks until the leakage is reduced to the limits specified. Any observed leaks or obviously defective joints or pipes shall be repaired or replaced as directed by the Engineer, even though the total leakage is below that specified above.

L. Lamping Test- Each section of sewer shall show, from each end, a full circle of light.

3.02 DEFECTS

In addition to the above requirements, the following shall also apply:

A. All repairs shown necessary by the tests are to be made, broken, cracked or obviously defected pipe replaced, all deposits removed, the sewer left true to line and grade, as herein specified, and entirely clean, free from lumps of cement, protruding gaskets, bulkheads, etc. and ready for use.

B. Each manhole or other appurtenance to the system shall have the specified size and form, be watertight, neatly and substantially made with the top set permanently to exact position and grade, and shall serve well and fully its intended use.

C. Any defects found in the system shall be corrected by the Contractor in accordance with the requirements of the Specifications or the MDWASD Design and Construction Standards, as approved by the Engineer.

D. In the event that a sewer line or structure, such as a manhole, leaks during the period that the Warranty or Contract Bond is in effect, the Contractor shall be required to return and replace it with a new section of pipe or manhole or, if approved by the Engineer, to eliminate infiltration leaks by external grouting or encasement. After the leaks have been stopped, all visible cracks shall be repaired inside the manhole.

3.03 ACCEPTANCE

A. No pipe installation will be accepted if the leakage is greater than that determined by the above requirements.

B. The Contractor shall locate and repair all leaks until the leakage is reduced to the limits specified. Any observed leaks or any obviously defective joints or pipes shall be repaired or replaced as directed by the Department, even though the total leakage is below that specified above.

C. The tests and repairs shall be continued or repeated until the Department is assured that the leakage into or from the section of line under test is less than the amount specified.

3.04 TIGHTNESS STANDARDS

Effective since 1987 (Per Public Notice No. 9), the Department adopted new tightness standards for gravity sanitary sewers and sanitary force mains to be installed within the it's service area. The new standards for maximum allowable exfiltration rates are to minimize the risk of contaminating the County's groundwater supplies in the Biscayne Aquifer. These standards are issued to comply with those adopted into Chapter 24 of the County Code by Ordinance 86-42, and to have leakage requirements for clay and PVC pipe materials. The term "cone of influence" as used below refers to limits of wellfield protection areas as defined the County. Tightness standards are specified below:

A. GRAVITY SANITARY SEWERS

The maximum allowable exfiltration, infiltration, or leakage in gravity sanitary sewers shall be as listed below, with no allowances for manholes or laterals. The duration of all tests shall be a minimum of two (2) hours. Any observed leaks or any obviously defective joints or pipes shall be replaced even when the total leakage is below that allowed. Only the piping materials listed for each specific area will be permitted in that area, including both gravity sanitary sewers and laterals. (Where reference is made to a "10 Day Travel Time" contact the Department or DERM for further information.)

1. Residential Zoned Areas

1.1a Within cone of influence and **outside** 10 Days Travel Time:

Mains: D.I.P. - 50 gpd/in. diameter/mile
C900 PVC - 50 gpd/in. diameter/mile

Laterals: may be D.I.P., C900 PVC, or

X.H.C.I.(Extra Heavy Cast Iron Soil Pipe)

1.1b Within cone of influence and **within** 10 Days Travel Time:

Mains and laterals shall only be D.I.P.

1.2 Outside of cone influence:

Mains: D.I.P. - 100 gpd/in. diameter/mile
C900 PVC - 100 gpd/in. diameter/mile
PVC - 100 gpd/in. diameter/mile
V.C.P. - 100 gpd/in. diameter/mile

Laterals: may be D.I.P., C900 PVC, PVC, or X.H.C.I. or V.C.P.

2. Commercial Zoned Areas

2.1a Within cone of influence and **outside** 10 Days Travel Time:

Mains: D.I.P. - 20 gpd/in. diameter/mile
C900 PVC - 20 gpd/in. diameter/mile

Laterals: may be D.I.P., C900 PVC or X.H.C.I.

2.1b Within cone of influence and **within** 10 Days Travel Time:

Mains and laterals shall only be D.I.P.

Note: In any event and any zoned areas, the Department may require D.I.P. based on minimum cover requirements, installation in grass areas or at depths of 14 feet or greater.

2.2 Outside of cone influence:

Mains: D.I.P. - 100 gpd/in. diameter/mile
C900 PVC - 100 gpd/in. diameter/mile
PVC - 100 gpd/in. diameter/mile
V.C.P. - 100 gpd/in. diameter/mile

Laterals: may be D.I.P., C900 PVC, PVC, or X.H.C.I. or V.C.P.

3. Industrial Zoned Areas

3.1 Within cone of influence:

Mains: D.I.P. - 20 gpd/in. diameter/mile

Laterals: may be D.I.P. or X.H.C.I.

3.2 Outside of cone influence:

Mains: D.I.P. - 100 gpd/in. diameter/mile
V.C.P. - 100 gpd/in. diameter/mile

Laterals: may be D.I.P., X.H.C.I. or V.C.P.

B. SANITARY FORCE MAINS - ALL AREAS

1. Sanitary force mains shall be constructed of either Protecto 401 lined ductile-iron pipe and fittings or prestressed concrete plastic lined (120° T.D.C. minimum) cylinder pipe and fittings meeting current Department Specifications.

2. No such ductile-iron pipe sanitary force main shall exfiltrate or leak at a rate greater than the allowable leakage rate specified in AWWA C600 (latest edition) at a test pressure of one hundred (100) psig. The duration of all test shall be a minimum of two (2) hours. Any observed leaks or any obviously defective joints or pipes shall be repaired or replaced even when the total leakage is below that allowed.

3. No such prestressed concrete cylinder pipe sanitary force main shall exfiltrate or leak at a rate greater than one-half (2) the allowable leakage rate specified for ductile iron pipe in AWWA C600 (latest edition) at a test pressure of one hundred (100) psig. The duration of all test shall be a minimum of two (2) hours. Any observed leaks or any obviously defective joints or pipes shall be repaired or replaced even when the total leakage is below that allowed.

4. See Section UC-170, "Cleaning and Testing of Main".

END OF SECTION

RESOLUTION NO. 24-XXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE CITY MANAGER TO IMPLEMENT A PILOT PROGRAM TO ELIMINATE FATS, OIL, AND GREASE (FOG) IN THE CITY'S SANITARY SEWER SYSTEM; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE

WHEREAS, the City of Opa-Locka ("City") is having increased problems with FOG in the sanitary sewer collection system; and

WHEREAS, this problem is more prevalent in areas with multi-family dwellings where more often fats, oils, and grease are disposed of improperly directly into the drains, which then coagulates and forms a solid lining in the sewer mains and laterals that results in clogs; and

WHEREAS, Fats, Oil and Grease (FOG) account for ninety-five percent (95%) of the sewer stoppages and pump station failures; and

WHEREAS, a proposed pilot program for the City aims to mitigate this concern at a cost of forty-eight thousand dollars ($48,000.00) for a six (6) month period; and

WHEREAS, In-Pipe Technology is a sole source provider that utilizes the science of dosing with microbes to eliminate FOG their microbe dosing system is a self-contained unit that can be deployed in a sewer manhole; and

WHEREAS, other systems require weekly or monthly direct dispensing of liquid chemicals which are corrosive and present a safety/health hazard for City employees. Additionally, microbes used in the treatment process reach end-of-life in the wet well of the pump station, since they cannot survive in an environment devoid of oxygen, which is the case in a force main; and

WHEREAS, other treatment processes include elements which continue to remain active even after arriving at the Miami-Dade County ("County") wastewater treatment facilities and would not be permitted by the County due to the disruptive impact of these elements on treatment facilities operations; and

WHEREAS, the proposed system will be installed in Wastewater Collection Basin Service Areas 11-A, 6 and 7; and

WHEREAS, the City Commission finds it in the best interest of the City and its residents to authorize the Interim City Manager to implement a pilot program to eliminate Fats, Oil, and Grease (FOG) in the City's sanitary sewer system.

NOW, THEREFORE, BE IT DULY RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA- LOCKA, FLORIDA:

SECTION 1. The recitals to the preamble herein are incorporated by reference.

SECTION 2. The City Commission of the City of Opa-Locka, Florida, hereby authorizes the Interim City Manager to implement a pilot program to eliminate Fats, Oil, and Grease (FOG) in the City's sanitary sewer system.

SECTION 3. Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager, following review by the City Attorney and without need of public hearing, by filing a corrected copy of same with the City.

SECTION 4. This Resolution shall take effect upon the adoption and is subject to the approval of the Governor or Governor's Designee.

PASSED and **ADOPTED** this _____ day of _____, 2024.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the City Manager to implement a pilot program to eliminate Fats, Oil, and Grease (FOG) in the City's sanitary sewer system.

Staff Summary:

Issue / Recommendation: Fats, Oil and Grease (FOG) account for 95% of the sewer stoppages and pump station failures. This pilot program aims to mitigate this concern at a cost of $48,000.00 for a six (6) month period. In-Pipe Technology is a sole source provider that utilizes the science of dosing with microbes to eliminate FOG.

Their microbe dosing system is a self-contained unit that can be deployed in a sewer manhole. Other systems require weekly or monthly direct dispensing of liquid chemicals which are corrosive and present a safety/health hazard for City employees. Additionally, microbes used in the treatment process reach end-of-life in the wet well of the pump station, since they cannot survive in an environment devoid of oxygen, which is the case in a force main. However, other treatment processes include elements which continue to remain active even after arriving at the County wastewater treatment facilities and would not be permitted by the County due to the disruptive impact of these elements on treatment facilities operations.

This system will be installed in Wastewater Collection Basin Service Areas 11-A, 6 and 7.

Background: The City is having increased problems with FOG in the sanitary sewer collection system. This problem is more prevalent in areas with multi-family dwellings where more often fats, oils, and grease are disposed of improperly directly into the drains, which then coagulates and forms a solid lining in the sewer mains and laterals that results in clogs.

Financial Impact: This procurement will be funded through the Sewer Division Other Contracted Services Account – 35-535340 which currently has an available balance of $131,351.

Proposed Action:

Staff recommends the City Commission approve the implementation of this pilot program with In-Pipe Technology for $48,000.00

IN-PIPE TECHNOLOGY Because Efficiency Counts

PROPOSAL TO:

City of Opa-locka

Fats, Oil, and Grease (FOG) Control Trial

Proposal No. 2023-WA101

October 26, 2023

IN-PIPE TECHNOLOGY Because Efficiency Counts

October 26, 2023

Mr. Airia Austin
Public Works & Utilities Director
City of Opa-locka
780 Fisherman Street
Opa-locka, FL 33054

Re: IN-PIPE Technology – Opa-locka
Proposal No. 2023-WA101

Dear Mr. Austin,

On behalf of IN-PIPE Technology (IPT) we are pleased to submit our proposal to the City of Opa-locka for your consideration of our biologically-based service for the elimination of buildups of Fats, Oils & Grease (FOG) in the collection system.

We are grateful for the opportunity to present this proposal and work with the City to prove out our solution.

Should you have any questions, or if I can be of further assistance, please do not hesitate to call.

Sincerely,

Douglas G. Fagans
Chief Commercial Officer
630-509-2488 ext.227

IN-PIPE TECHNOLOGY Because Efficiency Counts

IPTC COLLECTION SYSTEM TREATMENT

Introduction

Thank you allowing IN-PIPE Technology (IPT) the opportunity to present this proposal for our microbiological treatment to improve wastewater collections system operations. Please review this proposal in detail, if you have any questions, please do not hesitate to contact us.

The IPT Technology Solution

Summary

IPT introduces a proprietary blend of specialized facultative and aerobic bacteria near point sources of Fats, Oils, and Grease, to provide effective pre-treatment wherever issues arise. The continuous addition of microbes is achieved by installing dosing units at strategic locations in the collection system. These battery-powered, self-contained units are installed underground in manholes and/or in lift stations at strategic locations. The engineering dynamics of modifying the collection system microbiology, the partial digestion of the wastewater constituents, the control of FOG, and improved microbiological population entering the WWTP with the wastewater, all contribute to maintaining the life of existing infrastructure.

In-Pipe Application Strategy

The Microbial Dosing Units (MDUs) are battery powered, with each one containing a 30-60 day supply of IPT bacteria, a metering pump and electronics to dose continuously. The panels are inspected for functionality and reloaded periodically with microbes by the local IPT service team.

Fats, Oil, and Grease (FOG) Control

In-Pipe removes accumulations of Fats, Oils and Grease (FOG) in the collection system with a specific blend of bacteria that is highly effective at breaking down and removing FOG. Left untreated, grease buildup in the sewer pipes eventually leads to blockages and sanitary sewer overflows (SSO), leading to costly manual cleanouts and maintenance.

IPT will break down and metabolize FOG in the sewer piping and lift stations. Areas in the collection system that have historic grease problems are treated with In-Pipe's heavy grease bacteria (HGB), a blend of bacteria that specialize in producing the enzymes necessary to rapidly break down the lipolytic bonds that bind together the constituent components of FOG.

In-Pipe treatment will break down and metabolize FOG in the sewer piping and lift stations, reducing accumulations in the collection system by up to 95% thereby eliminating the need for manual cleanouts due to FOG. Once the FOG accumulations are removed, they will never return with continued In- Pipe service.

Additionally, FOG build up in lift stations contributes to the formation of odors and noxious gases and promotes the growth of filamentous bacteria that slough off and degrade the performance of the wastewater treatment plant process. As an example of our efficacy, In-Pipe has previously documented success in breaking down and eliminating FOG at the City of Sarasota. See the photo documentation results below from a typical lift station before and after In-Pipe Treatment.

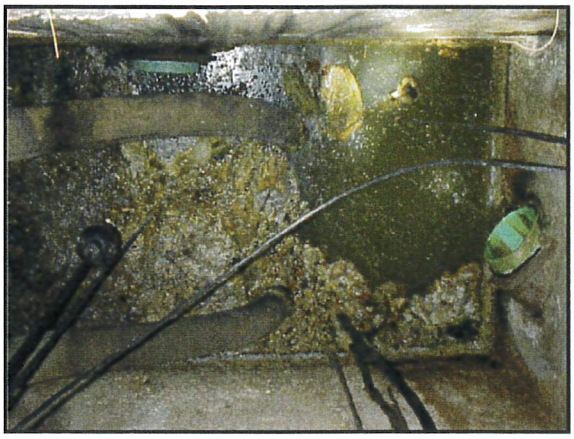

Figure 1 – Initial Conditions

Figure 2 – Conditions with IPT Treatment

Sanitary Sewer Overflow (SSO) Reduction

Using In-Pipe service may reduce SSO at locations where FOG occlusions are restricting flow during high flow events. For example, in late 2008 IPT began treating the collection system for the City of Sarasota. During that year, the City recorded nearly 69,000 gallons of spilled sewage due to SSOs. In 2009, this volume decreased to 11,300 gallons and in 2010, it was only 7,700 gallons. SSOs decreased by 90% in 3 years. We have been proud to serve the City of Sarasota ever since.

Gravity Sewer 5/22/2009

Gravity Sewer 1/22/2010 Downtown

A television survey of a gravity sewer line in the City of Sarasota showed a dramatic reduction in FOG buildup inside the gravity sewer after IPT treatment. The pictures above are screenshots from the two television surveys performed 7 months apart on an area treated with IPT bacteria. Though the process of biologically removing FOG takes time, the survey clearly shows the significant reduction in FOG accumulation as a result of the IPT bacteria. The removal of blockages like the one shown above throughout the City prevented tens of thousands of gallons of untreated raw wastewater spills.

Scope of Services

IPT Dosing Locations

IN-PIPE Technology customizes a collection system treatment solution for each customer. Strategic dosing locations are chosen at the outset of the project by our engineering staff. During installation and subsequent microbe reloads, each dosing location is evaluated and its state is documented (i.e., accumulation of FOG, excessive odor, etc.). Taking this information into consideration, the engineering team at IPT can make adjustments to the microbe blend at any location during the project in order to more effectively treat the specific situation at that location. Additionally, we provide reports highlighting potential problems that may be observed during our field service so that together, IPT and the City may be proactive in addressing potential problems before they occur.

The continuous introduction of In-Pipe microbes is achieved through numerous Microbial Dosing Units (MDUs) located below ground, inside manholes and pump stations throughout the collection system. The MDU is approximately 12-inches x 12-inches x 6-inches. They require no external power and no above-ground liquid storage. The MDUs remain the property of IPT for the duration of the project. Each MDU contains a 30-60 day supply of In-Pipe microbial solution and the panels are inspected for functionality and reloaded at 30 day intervals by the In-Pipe service team. Further, with In-Pipe service neither the MDU nor any other aspect of In-Pipe treatment requires any additional staffing or operating expense from the City.

Implementation Schedule

Upon acceptance of our proposal, IN-PIPE will implement the program as follows:

1. Receipt & Delivery of Product. We will deliver and install any required addiditional equipment: hardware, materials, and microbes on a date agreed by the City.

2. Regular service, maintenance, and review of the MDUs and locations to make sure the program progresses as expected. Each monthly supply will arrive within one week of the next service date. IPT will supply the City with a Service Reload Report for each site visit.

Packaging and Product Safety

The safety data sheet (SDS) for the IPT microbe blend is attached. IPT manufactures the microbes. The bacteria are safe to handle and are non-pathogenic. The bacteria will not harm the wastewater treatment plant, the sewer cleaning equipment or plant, animal or marine life. The product is shipped in two-liter bottles for installation into the MDUs.

Summary of Scope

- The supply, and installation of Microbial Dosing Units. **In the basins servicing Lift Stations 11A, 6 and 7.** These units remain the property of IPT
- A monthly service of MDUs, including repair and parts replacement as required, as well as the supply of Bacteria required for continuous 24/7/365 dosing.
- Monthly reports documenting the condition of the collection system treated and the impacts observed at agreed upon locations.
- 6 Months of continued bio-augmentation service to the City with monthly service intervals.
- $8,000 per month

BRYAN WEBER
Chief Executive Officer

Bryan Weber is a growth-oriented, diverse, global business executive with particular strengths in division general management (P&L), marketing and strategic planning. He has broad experience encompassing consumer products, management consulting, business services and engineered industrial products. He has led teams of 350 people, and managed businesses exceeding $100 million in size, including the water business at Underwriters Laboratories. He received his B.S. in chemical engineering from Purdue University and an M.B.A., with distinction in marketing and finance from Northwestern University's Kellogg Graduate School of Management.

DOUG FAGANS
Chief Commercial Officer

Doug Fagans is a global business strategy and sales executive with deep experience driving sustainable growth through operational excellence. His varied background includes senior leadership roles in Client Solutions/Implementation, Sales, Marketing, Strategy, Channel Management, Product Management, and Consulting. Doug received his BA in International Affairs from the George Washington University, and his MBA in Marketing, Strategy, and International Business from Northwestern University's Kellogg Graduate School of Management.

MARIE KROGER, PhD
Chief Science Officer

Dr. Marie Kroeger is an experienced scientist leading interdisciplinary research teams focused on understanding how the microbiome affects ecosystem functions and leveraging that knowledge to engineer ecosystems for functions like decreased greenhouse gas emissions. Marie's diverse research background integrated microbial physiology, multi-omics', and both synthetic and natural microbial communities to address fundamental and applied research objectives. Marie earned her BS in Biology from Northeastern Illinois University and PhD in Microbiology from the University of Massachusetts Amherst. Prior to joining In-Pipe, Marie earned a Chick-Keller Postdoctoral Fellowship at Los Alamos National Laboratory before becoming a staff scientist in the Bioscience Division.

XIAOLONG WANG, PhD
Head of Engineering

Dr. Xiaolong Wang has been studying and working in wastewater treatment and collection system modeling for 8 years, with projects aiming to improve plant treatment efficiency, reduce plant operation costs, and change wastewater characteristics in sewer system. Xiaolong received his BS in Environmental Engineering from Jilin Jianzhu University, and earned a PhD in Environmental Engineering from the Illinois Institute of Technology. He is a Licensed Professional Engineer (P.E) in the State of Wisconsin. He is active in WEF and IWEA member, joining both organizations in 2015. He received an Academic Excellence Award from the Central States Water Environmental Association in 2018. He currently serves on the IWEA the Plant Operations Committee and the Award Committee.

SAFETY DATA SHEET (SDS)

SECTION 1 - IDENTIFICATION

Product identifier : **BIO-25©**

Product Code(s) : BIO-25©

Product Use : Bioaugmentation treatment for wastewater.

Chemical Family : Mixture of: Water; Alcohol; Bacterial additive; Acrylic polymer.

Supplier's name and address:

In-Pipe Technology, LLC
725 N. Central Avenue
Wood Dale, IL, USA
60191

Manufacturer's name and address:

Refer to Supplier

Information Telephone # : (630) 509-2488

24 Hr. Emergency Tel # : (847) 343-0880

SECTION 2 - HAZARDS IDENTIFICATION

Classification : WHMIS information: This product is a WHMIS Controlled Product. It meets one or more of the criteria for a controlled product provided in Part IV of the Canadian Controlled Products Regulations (CPR). WHMIS classification:
Class D2B (Materials Causing Other Toxic Effects, Toxic Material).

OSHA: This material is classified as hazardous under OSHA regulations (29CFR 1910.1200). Hazardous classification:
Acute Health Hazard;
Chronic Health Hazard.

Emergency Overview : Milky, white liquid. Musty odor.
Caution! Ingestion will likely cause irritation to the throat and stomach. May cause respiratory irritation. High concentrations may cause nausea, headache, dizziness and incoordination. May cause eye irritation. Prolonged or repeated skin contact may cause drying and irritation. Prolonged overexposure may cause liver and kidney effects.

POTENTIAL HEALTH EFFECTS:

Signs and symptoms of short-term (acute) exposure

Inhalation : May cause irritation to the nose, throat and upper respiratory tract. In extremely high concentrations, may also cause nausea, vomiting, dizziness, drowsiness and other symptoms of central nervous system depression.

Skin : Direct skin contact may result in little or no irritation. May be absorbed through the skin.

Eyes : May cause moderate eye irritation.

Ingestion : May cause irritation of mouth, throat, and stomach. May cause nausea, vomiting, and diarrhea.

Effects of long-term (chronic) exposure
: Prolonged or repeated skin contact may cause irritation, defatting or dermatitis (rash). Prolonged overexposure may cause liver and kidney effects.

Carcinogenic status : See TOXICOLOGICAL INFORMATION, Section 11.

Additional health hazards : See TOXICOLOGICAL INFORMATION, Section 11.

Potential environmental effects
: See ECOLOGICAL INFORMATION, Section 12.

SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients	CAS #	Wt.%
Isopropyl alcohol	67-63-0	7.00 - 13.00

SECTION 4 - FIRST AID MEASURES

Inhalation : Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen by qualified medical personnel only. When symptoms persist or in all cases of doubt seek medical advice.

Skin contact : Remove contaminated clothing. Wash with water and soap as a precaution. When symptoms persist or in all cases of doubt seek medical advice. Wash contaminated clothing before re-use.

Eye contact : Immediately flush eye(s) with plenty of water. When symptoms persist or in all cases of doubt seek medical advice.

Ingestion : Do not induce vomiting. Have victim rinse mouth with water, then give one to two glasses of water to drink. Get medical attention. Never give anything by mouth to an unconscious person.

Notes for Physician : Treat symptomatically.

SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability

: Not flammable under normal conditions of use. Vapors are heavier than air and collect in confined and low-lying areas. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

Flammability classification (OSHA 29 CFR 1910.1200)

: Combustible Liquid Class III B.

Oxidizing properties : None known.

Explosion data: Sensitivity to mechanical impact / static discharge

: Not expected to be sensitive to mechanical impact or static discharge.

Suitable extinguishing media : Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special fire-fighting procedures/equipment

: Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame.

Hazardous combustion products

: Carbon oxides; unburned alcohols; Styrene; Acrylic monomer.

NFPA Rating

0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

: *Health:* 1 *Flammability:* 1 *Instability:* 0 *Special Hazards:* None.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions : Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with the clean-up should wear the appropriate chemically protective equipment. Refer to protective measures listed in sections 7 and 8.

Environmental precautions : No special environmental precautions required. Avoid contamination of natural waterways.

Spill response/cleanup : Ventilate area of release. Remove all sources of ignition. Contain and absorb spilled liquid with non-combustible, inert absorbent material (e.g. sand), then place absorbent material into a container for later disposal (see Section 13). Spill area: Wash with water and soap as a precaution. Flush into sewer with plenty of water. Avoid contamination of natural waterways. Notify the appropriate authorities as required.

Prohibited materials : None known.

Special spill response procedures

: If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002).
US CERCLA Reportable quantity (RQ): None reported.

SECTION 7 - HANDLING AND STORAGE

Safe Handling procedures : Ensure adequate ventilation. Wear suitable protective equipment during handling. Avoid breathing vapors. Avoid contact with skin, eyes and clothing. Keep away from extreme heat and flame. Avoid contact with incompatible materials. Wash thoroughly after handling.

Storage requirements : Store in a cool, dry, well-ventilated area. Keep away from incompatibles. Inspect periodically for damage or leaks. Protect from damage.

Incompatible materials : Strong oxidizing agents; Acids; Bases; Alkali metals; Bactericidal compounds.

Special packaging materials : Always keep in containers made of the same materials as the supply container.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure Limits

Ingredients	ACGIH TLV		OSHA PEL	
	TWA	STEL	PEL	STEL
Isopropyl alcohol	200 ppm	400 ppm	400 ppm	N/Av

Ventilation and engineering measures

: Use general or local exhaust ventilation to maintain air concentrations below recommended exposure limits.

Respiratory protection : If the TLV is exceeded, a NIOSH/MSHA-approved respirator is advised.

Skin protection : Gloves impervious to the material are recommended. Advice should be sought from glove suppliers. Wear as appropriate: PVC; Neoprene; Nitrile rubber.

Eye / face protection : Safety goggles or glasses as appropriate for the job.

Other protective equipment : Depending on conditions of use, an impervious apron should be worn. An eyewash station and safety shower should be made available in the immediate working area.

General hygiene considerations

: Avoid breathing vapors or mists. Avoid contact with skin, eyes and clothing. Do not eat, drink, smoke or use cosmetics while working with this product. Upon completion of work, wash hands before eating, drinking, smoking or use of toilet facilities. Remove soiled clothing and wash it thoroughly before reuse.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Physical state : Liquid.

Appearance : Milky, white liquid.

Odor : Musty odor.

Odor threshold : N/Av

pH : 6.8 - 7.2

Boiling point : 100°C (212°F)

Specific gravity : 1.0

Melting/Freezing point : N/Av

Coefficient of water/oil distribution : N/Av

Vapor pressure (mmHg @ 20° C / 68° F) : N/Av

Vapor density (Air = 1) : Heavier than air.

Solubility in water : completely soluble

Evaporation rate (n-Butyl acetate = 1) : same as water

Volatile organic Compounds (VOC's) : N/Av

Volatiles (% by weight) : N/Av

Flash point : > 100°C (212°F)

Flash point Method : Tag closed cup

Auto-ignition temperature : N/Av

Lower flammable limit (% by vol.) : N/Av

Upper flammable limit (% by vol.) : N/Av

Flame Projection Length : N/Ap

Flashback observed : N/Ap

Viscosity : N/Av

Absolute pressure of container : N/Ap

SECTION 10: STABILITY AND REACTIVITIY

Stability and reactivity : Stable under the recommended storage and handling conditions prescribed.

Hazardous polymerization : Hazardous polymerization does not occur.

Conditions to avoid : Avoid heat and open flame. Do not use in areas without adequate ventilation.

Materials to Avoid and Incompatibility : Strong oxidizing agents; Acids; Bases; Alkali metals; Bactericidal compounds.

Hazardous decomposition products : None known, refer to hazardous combustion products in Section 5.

SECTION 11 - TOXICOLOGICAL INFORMATION

Target organs : Eyes, skin, respiratory system and digestive system. Liver; Kidneys.

Routes of exposure : *Inhalation:* YES *Skin Absorption:* YES *Skin & Eyes:* YES *Ingestion:* YES

Toxicological data : There is no available data for the product itself, only for the ingredients. See Section 2.

Ingredients	LC_{50}(4hr) inh, rat	LD_{50} (Oral, rat)	LD_{50} (Rabbit, dermal)
Isopropyl alcohol	17,000 ppm	4720 mg/kg	12,890 mg/kg

Carcinogenic status : No components are listed as carcinogens by ACGIH, IARC, OSHA or NTP.

Reproductive effects : None known.

Teratogenicity : This product contains Isopropanol. Isopropanol is no longer considered a developmental toxin. Teratogenic / fetotoxic effects were observed in animals, however the effects were observed in the presence of maternal toxicity or at concentrations where maternal toxicity is expected to occur.

Mutagenicity : None known.

Epidemiology : Not available.

Sensitization to material : Not expected to be a skin or respiratory sensitizer.

Synergistic materials : None known.

Irritancy : Mild skin irritant. Moderate eye irritant.

other important hazards : CNS depression may result from extreme exposures.

Conditions aggravated by overexposure : Pre-existing skin, eye and respiratory disorders.

SECTION 12 - ECOLOGICAL INFORMATION

Ecotoxicity : See the following tables for individual ingredient ecotoxicity data.

Ecotoxicity data:

Ingredients	CAS No	Toxicity to Fish		
		LC50 / 96h	NOEC / 21 day	M Factor
Isopropyl alcohol	67-63-0	9640 mg/L (Fathead minnow)	N/Av	N/Ap

Ingredients	CAS No	Toxicity to Daphnia		
		EC50 / 48h	NOEC / 21 day	M Factor
Isopropyl alcohol	67-63-0	1400 mg/L (Water flea)	30 mg/L (Water flea)	N/Ap

Ingredients	CAS No	Toxicity to Algae		
		EC50 / 96h or 72h	NOEC / 96h or 72h	M Factor
Isopropyl alcohol	67-63-0	N/Av	N/Av	N/Ap

Mobility : The product itself has not been tested.

Persistence : The product itself has not been tested. Contains Isopropyl alcohol. Isopropyl alcohol is considered to be readily biodegradable.

Bioaccumulation potential : The product itself has not been tested. Contains Isopropyl alcohol. The bioaccumulation potential of Isopropyl alcohol is expected to be low. The bioconcentration factor (BCF) of Isopropyl alcohol is calculated at 1.0, based on a Log Kow value of 0.05.

Other Adverse Environmental effects

: None known or reported by the manufacturer.

SECTION 13 - DISPOSAL CONSIDERATIONS

Handling for Disposal : Handle waste according to recommendations in Section 7.

Methods of Disposal : Dispose in accordance with all applicable federal, state, provincial and local regulations. Contact your local, state, provincial or federal environmental agency for specific rules.

RCRA : If this product, as supplied, becomes a waste in the United States, it may meet the criteria of a hazardous waste as defined under RCRA, Title 40 CFR 261. It is the responsibility of the waste generator to determine the proper waste identification and disposal method. For disposal of unused or waste material, check with local, state and federal environmental agencies.

SECTION 14: TRANPORT INFORMATION

Regulatory Information	UN Number	Shipping Name	Class	Packing Group	Label
TDG	none	Not regulated.	Not regulated	none	
TDG Additional information	None.				
49CFR/DOT	None	Not regulated.	Not regulated	none

BIO-25©

MSDS Revision Date: 06/27/2017

49CFR/DOT Additional information	None.

SECTION 15 - REGULATORY INFORMATION

US Federal Information:

Components listed below are present on the following U.S. Federal chemical lists:

Ingredients	CAS #	TSCA Inventory	CERCLA Reportable Quantity(RQ) (40 CFR 117.302):	SARA TITLE III: Sec. 302, Extremely Hazardous Substance, 40 CFR 355:	SARA TITLE III: Sec. 313, 40 CFR 372, Specific Toxic Chemical	
					Toxic Chemical	de minimus Concentration
Isopropyl alcohol	67-63-0	Yes	N/Ap	N/Av	Yes	0.1%

SARA TITLE III: Sec. 311 and 312, MSDS Requirements, 40 CFR 370 Hazard Classes: Immediate (Acute) health hazard; Chronic Health Hazard. Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are 500 pounds for the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

.

US State Right to Know Laws:

The following chemicals are specifically listed by individual States:

Ingredients	CAS #	California Proposition 65		State "Right to Know" Lists					
		Listed	Type of Toxicity	CA	MA	MN	NJ	PA	RI
Isopropyl alcohol	67-63-0	No	N/Ap	Yes	Yes	Yes	Yes	Yes	Yes

Canadian Information:

WHMIS information: This product is a WHMIS Controlled Product. It meets one or more of the criteria for a controlled product provided in Part IV of the Canadian Controlled Products Regulations (CPR). Refer to Section 2 for a WHMIS Classification for this product.

This product has been classified according to the hazard criteria of the CPR and the MSDS contains all of the information required by the CPR.

International Information:

Components listed below are present on the following International Inventory list:

Ingredients	CAS #	European EINECs	Australia AICS	Philippines PICCS	Japan ENCS	Korea KECI/KECL	China IECSC	New Zealand IOC
Isopropyl alcohol	67-63-0	200-661-7	Present	Present	(2)-207	KE-29363	Present	HSR001180

SECTION 16 - OTHER INFORMATION

HMIS Rating : *- Chronic hazard 0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

IN-PIPE TECHNOLOGY Because Efficiency Counts

IN-PIPE TECHNOLOGY COMPANY, INC.
EXHIBIT A
STANDARD TERMS AND CONDITIONS

1.0 ACCEPTANCE Sale of any products or services (hereafter, the "Products") by In-Pipe Technology Company, Inc. ("Seller") to Purchaser shall be subject to the terms and conditions of sale contained herein. No change in or addition to these terms shall be binding upon Seller unless specifically accepted in writing by Seller. Seller objects in advance to any additional or different terms proposed in Purchaser's order.

2.0 PRICING Prices shall be Seller's price in effect at time of shipment unless otherwise specified in Seller's written quotation. Quotations automatically expire 90 calendar days from quotation date and may be canceled at any time by written notice.

3.0 FORCE MAJEURE LIMITATION Seller shall not be liable for any loss, damage or expense resulting from delay or failure in the performance of Seller's obligations hereunder if such delay or failure is due to acts of God or the public enemy, strikes, labor troubles, fire, explosions, riots, war, governmental orders or restrictions, shortages of materials or labor, delay in transportation, theft, accidents or any other cause which is beyond Seller's reasonable control. Upon the occurrence of any such event preventing the Seller from performing all of its then outstanding contracts, the Seller shall then be entitled to perform such of its contracts as it may select and shall incur no liability to the Purchaser by reason of performing contracts other than this agreement. The Seller's total liability for damages related to the performance of or failure to perform this agreement shall be limited to the amount of the contract price. IN NO EVENT SHALL THE SELLER BE LIABLE FOR LOSS OF PROFITS BY REASON OF PLANT SHUTDOWN, NON-OPERATION OR INCREASE IN EXPENSE OF OPERATION OF OTHER EQUIPMENT OR FACILITIES OR FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES.

4.0 DELIVERY Shipping dates are estimates only and are based on Seller's projected production schedules and commitments by suppliers. DELAY IN SHIPMENT OR VARIANCE FROM SHIPPING SCHEDULE SHALL NOT BE CAUSE FOR CANCELLATION OR CLAIM FOR DAMAGE. Receipt by the Purchaser of any Products or services shall constitute acceptance of delivery and waiver of any claims due to delay.

5.0 WARRANTY Supplier warrants that its labor, materials, and equipment supplied hereunder shall be free from defect and shall conform to the standards of care in effect in its industry at the time of performance of such labor, materials, and equipment for the time this contract is in effect.

5.1 Supplier's obligation is limited to repair or replacement F.O.B. Purchaser's facility when examination of any such equipment shall disclose them to Supplier's reasonable satisfaction to have been defective and Purchaser shall have promptly notified Supplier of the discovery of any such defect. Supplier will not be responsible for; work done, material or equipment furnished or repairs or alterations made by others.

5.2 For any breach hereunder, Supplier shall be liable to Purchaser for all damages (limited as stated in "Liability of Supplier") as shall be applicable under the law, except as otherwise provided in this agreement. Purchaser shall be entitled to pursue all rights and remedies available by law, except as otherwise provided in this agreement. In any event, Supplier's total liability towards Purchaser for alleged faulty performance or nonperformance under this contract shall be limited to the total contract price. THE ABOVE WARRANTY IS INLIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY DISCLAIMED.

6.0 LIABILITY OF SUPPLIER shall not be liable for any bodily injury, death, or injury to or destruction of tangible property except, as the same may have been caused by the negligence or willful misconduct of Supplier. In no event shall Supplier be liable for any delays or special, indirect, incidental or consequential damages. Purchaser agrees that the total limit of Supplier's liability (whether based on negligence, warranty, strict liability or otherwise) hereunder, shall not exceed the aggregate amount due Supplier for services rendered under this contract. All claims, including claims for negligence or any other cause whatsoever, shall be deemed waived unless made in writing and received by Supplier within one (1) year after Supplier's completion of work hereunder.

7.0 PAYMENTS Terms of payment are net 30 days. The maximum legal rate (or 18%) of interest and all costs of collection (including attorney's fees) shall be charged on past due accounts. All orders are subject to the continuing approval of Seller's credit department. If Purchaser is in default in any payment, Seller may declare all payments for work completed

immediately due and payable, stop all further work until payments are brought current and/or require advance payment for future shipments. If the financial condition of the Purchaser at any time does not in the judgment of Seller justify continuance of production or shipment on the terms of payment set forth herein, Seller may require full or partial payment in advance or shall be entitled to cancel any order then outstanding and shall receive reimbursement for its reasonable and proper cancellation charges. In the event of bankruptcy or insolvency of the Purchaser or in the event any proceeding is brought against the Purchaser, voluntarily or involuntarily under the bankruptcy or any insolvency laws, Seller shall be entitled to cancel any order then outstanding at any time during the period allowed for filing claims against the estate and shall receive reimbursement for its reasonable and proper cancellation charges.

8.0 DRAWINGS If drawings are furnished with this proposal, they are submitted only to show the general style, arrangement and approximate dimensions of the equipment and services offered. No work is to be based upon proposal drawings. It is the Purchaser's responsibility to verify that the data given on certified drawings is suitable for applicable installation conditions. Any changes made after the order is released for manufacture will be subject to extra charges.

9.0 TITLE/RISK OF LOSS/DEFAULT Unless otherwise specified by Seller, delivery will be made F.O.B. point of shipment to Purchaser. Title to right of possession and ownership of equipment covered herein shall remain the property of the Seller. The Purchaser agrees to do all acts necessary to perfect and maintain such right and title in the Seller. In case of failure or refusal to make payments when due, then and in any such event the whole of the unpaid portion of the purchase price shall, at Seller's option, become immediately due and payable and in case of such default on Purchaser's part, Seller shall thereupon have the right to enter the premises upon which such property shall be installed and take possession of and remove the same without legal process. This equipment shall retain its character as personal property regardless of its mode of attachment. Risk of loss or damage shall pass to Purchaser on delivery to carrier.

10.0 TAXES In addition to any price specified herein, Purchaser shall pay the gross amount of any present, or future sales, use, excess, value added or other similar tax applicable to the price, sale or delivery of any Products or their use by Seller or Purchaser, or Purchaser shall furnish Seller with a tax exempt certificate acceptable to the taxing authorities.

11.0 CANCELLATION Any order placed with Seller may be cancelled by the Purchaser only upon payment of reasonable cancellation charges, which shall take into account expenses already incurred and commitments made by the Seller.

12.0 PROPRIETARY IPT BULK MICROBE CULTURE The Client agrees that it will use prudent attempts to ensure that no analysis will be allowed on the IPT bulk microbe culture reagents without prior written authorization by In-Pipe Technology Company, LLC. In-Pipe Technology methodology is protected by US Patents (#5,578,211 and 5,788,841 and Canada Patent # 2,272,689) owned by the company.

13.0 DISPUTE RESOLUTION Any dispute or controversy arising out of, under, or in connection with, or in relation to, this Agreement and/or any amendments thereto, or the breach thereof, which is not resolved informally by prior mutual agreement of the Purchaser and Seller, shall be submitted to non-binding arbitration, unless otherwise waived and/or modified in writing by the Parties. The cost of such arbitration shall be paid by the Purchaser and Seller equally; however, the prevailing party in the arbitration shall be entitled to reimbursement of its attorney's fees and other costs and expenses incurred in connection therewith.

13.1 If a dispute arises which is not resolved by arbitration pursuant to the above, and either party reasonably retains counsel for the purpose of enforcing any provision of this Agreement, including without limitation the institution of any action or proceeding to enforce any provision of this Agreement, or to recover damages if otherwise available hereunder, or to obtain injunctive or other relief by reason of any alleged breach of any provision of this Agreement, or for a declaration based on a demonstrated necessity of such Party's rights or obligations under this Agreement, or for any other judicial or equitable remedy, then if the matter is settled by judicial or quasi-judicial determination, the prevailing Party shall be entitled, in addition to such other relief as may be granted, to be reimbursed by the losing Party for all costs and expenses incurred including, without limitation, all attorneys' fees and costs for services rendered to the prevailing Party and any attorneys' fees and costs incurred in enforcing any judgment or order entered. The prevailing Party shall be as determined by the court in the initial or any subsequent proceeding.

14.0 GENERAL The terms and conditions hereof cancel and supersede all previous understandings or agreements relating to the Products covered hereunder, written or oral, between Seller and Purchaser and contain the entire understanding of the parties hereto. Terms and conditions in the attached proposal supersede terms and conditions in this document No waiver, alteration, deletion or modification of or addition to any of the provisions hereof shall be binding unless in writing and signed by a duly authorized representative of the Seller. If any term, provision or condition contained herein shall, to any

expert, be invalid or unenforceable, the remainder of the terms, provisions and conditions hereof other than those which are invalid or unenforceable, shall not be affected thereby and each term, provision and condition of this order shall be valid and enforceable to the fullest extent permitted by law. This order and all rights and obligations of the parties shall be construed and interpreted under and pursuant to the laws of the State of Illinois.

IN-PIPE TECHNOLOGY Because Efficiency Counts

October 23, 2023

Mr. Airia Austin
Public Works Director
City of Opa-locka
780 Fisherman Street
Opa-locka, FL 33054

Dear Mr. Austin,

This letter is to confirm that the proprietary collection system microbial dosing method used by In-Pipe Technology is a sole source service, provided exclusively by In-Pipe Technology. We are not aware of any other company that provides comprehensive, turn-key microbial dosing of the entire collection system in substantially the same manner. This service must be purchased directly by the City from In-Pipe Technology. There are no agents or dealers authorized to represent this service in the State of Florida

We are not aware of any similar or like service available to the City of Opa-locka that would serve the same purpose or function.

If you desire additional information, don't hesitate to contact me at (630) 509-2488 at any time or visit our website at www.in-pipe.com. Thank you for your interest in our products and services.

Sincerely,

Douglas G. Fagans
Chief Commercial Officer
630-509-2488

Sponsored by: Interim City Manager

RESOLUTION NO. XX-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, DIRECTING THE INTERIM CITY MANAGER TO REQUEST THAT MIAMI-DADE COUNTY CONDUCT A FEASIBILITY STUDY TO INSTALL A PEDESTRIAN CROSSWALK ON FISHERMAN STREET IN FRONT OF CITY HALL, WITHIN THE CITY; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Interim City Manager of the City of Opa-Locka, Florida ("City") recommends that the City Commission authorize that a request be made to the Miami-Dade County Traffic Section to perform all necessary traffic surveys to determine the need for and feasibility of installing a Pedestrian Crosswalk on Fisherman Street in front of City Hall; and

WHEREAS, the Interim City Manager has determined that if the traffic study confirms the need for a pedestrian crosswalk on Fisherman Street, the various cost options for installation of a crosswalk will be included as part of the traffic study report; and

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interests of the City and its residents to approve a request to Miami-Dade County to conduct a feasibility study for the possible installation of a pedestrian crosswalk on Fisherman Street in front of City Hall, within the City.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

Section 2. AUTHORIZATION
The City Commission of the City of Opa-Locka hereby authorizes that a request be made to the appropriate department of Miami-Dade County for a feasibility study related to the installation of a pedestrian crosswalk on Fisherman Street in front of the City of Opa-Locka City Hall.

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the Interim City Manager, following review by the City Attorney and without need of

public hearing, by filing a corrected copy of same with the City.

Section 4. EFFECTIVE DATE.
This Resolution shall take effect immediately upon adoption and is subject to the approval of the Governor or his designee.

PASSED and **ADOPTED** this _____ day of _____, 2024.

Short Title:

Feasibility Study for Pedestrian Crosswalk

Staff Summary:

A resolution of the City Commission of the City of Opa-locka, Florida, directing the Interim City Manager to request Miami-Dade County conduct a Feasibility study to install a pedestrian crosswalk on Fisherman Street in front of City Hall as determined by the traffic study.

DocuSign Envelope ID: 5F780726-94CB-4A5D-B01E-46005B59B32E

Financial Impact – There is no cost associated with the County conducting a traffic study. If the study confirms the need for a crosswalk on Fisherman Street, the cost of various options for installation of a crosswalk will be included as part of the traffic study report.

Proposed Action:

Staff recommends the Interim City Manager be authorized to submit a request to the Miami-Dade County Traffic Section to perform all necessary traffic surveys to determine the need for and feasibility of installing a Pedestrian Crosswalk on Fisherman Street in front of City Hall.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE INTERIM CITY MANAGER TO ENTER INTO A SOLE SOURCE CONTRACT WITH HYDRA SERVICE, INC., IN AN AMOUNT NOT TO EXCEED FORTY-ONE THOUSAND, TWELVE DOLLARS ($41,012.00), FOR THE DIRECT PURCHASE OF TWO SUBMERSIBLE REPLACEMENT PUMPS FOR PUMP STATION NO. 14., WITHIN THE CITY; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, two new pumps are required for Pump Station #14 within the City of Opa-Locka ("City") and the Interim City Manager recommends the purchase of two ABS pumps from Hydra Service, Inc. in the amount of Forty-One Thousand, Twelve Dollars ($41,012.00); and

WHEREAS, Pump Station #14 was designed for ABS pumps; and

WHEREAS, two pumps were installed in 2012 and their expectancy was ten (10) years has expired with one pump having failed and the other routinely overheating; and

WHEREAS, Pump Station #14 is operating with a lower horsepower backup pump to avoid the Pump Station being placed in moratorium due to insufficient capacity; and

WHEREAS, to ensure the availability of reliable sufficient capacity, two new pumps must be procured; and

WHEREAS, because the Pump Station was designed for ABS pumps only, the new pumps must be from the same manufacturer to avoid costly pump station modifications; and

WHEREAS, Hydra Service, Inc. is the only authorized ABS pump dealer in the State, necessitating these pumps be procured through this vendor as a sole source; and

WHEREAS, Hydra Service, Inc., located in Debary, Florida, is a sole source distributor contracted for Selzer wastewater (formerly ABS) products, which territory includes the entire State of Florida; and

WHEREAS, the price for these two pumps is Forty One Thousand, Twelve Dollars ($41,012.00); and

WHEREAS, the Interim City Manager recommends the purchase of two XFP150G-CB1.8PE185/43PH 230V 17B0RPM 40' cable submersible pumps from Hydra Service, Inc. for Forty- One Thousand, Twelve Dollars ($41,012.00); and

WHEREAS, Pursuant to Section 2-318(1)(b) and 2-318(1)(c) of the City's Purchasing Ordinance 20-07, "b. A contract may be awarded without competition when the city manager makes a written determination, after conducting a good faith review of available sources, that there is only one (1) source for the required supplies or contractual service. The city manager shall conduct negotiations as appropriate to price, delivery and terms. A record of sole source procurement shall be maintained as a public record and shall list each contractors name, amount and type of each contract, and the identification number of each contract file; c. All sole source procurements, where the cost of the supplies or contractual services exceeds twenty- five thousand dollars ($25, 000. 00), shall be authorized by the city commission"; and

WHEREAS, the City Commission finds that it is in the best interest of the City and its residents to purchase two Submersible Replacement Pumps for Pump Station No. 14. within the City from sole source supplier Hydra Service, Inc.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

Section 2. AUTHORIZATION
The City Commission of the City of Opa-Locka, hereby authorizes the Interim City Manager to enter into a sole source contract with Hydra Service, Inc., in an amount not to exceed Forty-One Thousand, Twelve Dollars ($41,012.00), for the direct purchase of two Submersible Replacement Pumps for Pump Station No. 14, within the City and in a form approved by the City Attorney.

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager following review by the City Attorney and without need of public hearing, by filing a corrected copy of same with the City Clerk.

Section 4. EFFECTIVE DATE.
This Resolution shall be effective immediately upon adoption hereof and approval by the

Governor of the State of Florida or Governor's designee.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the City Manager to purchase Submersible Replacement Pumps for Pump Station No. 14. from the sole source vendor Hydra Service, Inc.

Staff Summary:

Issue / Recommendation: Two new pumps are required for Pump Station #14. Staff recommends the purchase of two ABS pumps from Hydra Service, Inc. for $41,012.00

Background: Pump Station #14 was designed for ABS pumps. Two pumps were installed in 2012 and their expected life of ten (10) years has expired, with one pump having failed and the other routinely overheating.

Current Activity: Pump Station #14 is operating with a lower horsepower backup pump to avoid the Pump Station being placed in moratorium due to insufficient capacity. To ensure the availability of reliable sufficient

DocuSign Envelope ID: 65DB7E26-7721-4BC6-B0A0-479BF72DE86B

capacity, two new pumps must be purchase. Since the Pump Station was designed for ABS pumps, the new pumps must be from the same manufacturer to avoid costly pump station modification. Hydra Services, Inc. is the only authorized ABS pump dealer in the State, necessitating these pumps be purchase through this vendor. The price for these two pumps is $41,012.

Financial Impact: This purchase will be funded through the Sewer Division Machinery and Equipment Account – 35-535640. This account currently has an available balance of $131,351. However, on the agenda for this meeting there is a separate project for $25,000 for an odor control system, leaving $106,351 available for these pumps.

Proposed Action:

Staff recommends the City Commission approve the purchase of two XFP150G-CB1.8PE185/43PH 230V 1780RPM 40' cable submersible pumps from Hydra Service, Inc., for $41,012.00

To: Owen Carney, City of Opa Locka, Florida

The purpose of this letter is to confirm that Hydra Service Inc., located in DeBary, Florida, is the sole Distributor contracted for Sulzer wastewater (formerly ABS) products, including pumps, mixers, blowers and aerators, for the Municipal Wastewater Collection and Treatment market. Hydra Service's territory includes the entire state of Florida.

Nationally, we utilize a network of independent distributors/service centers to serve the Municipal, Industrial, Building Trades and Dewatering market segments in specific territories. The authorized distributor for Sulzer products in these segments/territories has the expertise, knowledge, training and access to the latest product developments and upgrades, along with genuine OEM parts. Hydra Service staff is trained in the latest methods in care and start-up of our equipment and has the ability to execute warranty claims.

Please do not hesitate to contact me if I can provide any additional information.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE INTERIM CITY MANAGER TO ENTER INTO A SOLE SOURCE CONTRACT WITH HYDRA SERVICE, INC., IN AN AMOUNT NOT TO EXCEED TWENTY-EIGHT THOUSAND, SIX HUNDRED THIRTY DOLLARS ($28,630.00), FOR THE DIRECT PURCHASE OF A SUBMERSIBLE REPLACEMENT PUMP FOR PUMP STATION NO. 11-A, WITHIN THE CITY; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City's Lift Station No. 11-A located near Bahman Avenue and Sesame Street has experienced mechanical failure to one of the two submersible pumps in the station. The Interim City Manager recommends purchasing a new unit; and

WHEREAS, the pump that failed at Lift Station 11-A, was installed on March 20, 2012, making it nearly 12- years old. There is currently a back-up pump taking its place; and

WHEREAS, the repair of this pump is estimated to cost in the range of $10,000 to $13,000; and

WHEREAS, industry standards indicate that the life expectancy of a pump is between ten and twenty years. Rather than repair this pump, the Interim City Manager has determined this to be an appropriate opportunity to replace it with a grinder pump which grinds up material entering the wastewater system before it has the opportunity to clog up the system and create back-ups; and

WHEREAS, the Pump Station was designed for ABS pumps, the new pumps must be from the same manufacturer to avoid costly pump station modification; and

WHEREAS, Hydra Services, Inc. is the only authorized ABS pump dealer in the State, necessitating these pumps be procured through this vendor; and

WHEREAS, the Interim City Manager recommends the City Commission authorize the purchase a submersible pump for lift station No. 11-A from the sole source vendor Hydra Service, Inc. in the amount Twenty Eight Thousand, Six Hundred Thirty Dollars ($28,630.00); and

WHEREAS, Hydra Service, Inc., located in DeBary, Florida is a sole source distributor contracted for Selzer wastewater (formerly ABS) products, which territory includes the entire State of Florida; and

WHEREAS, Pursuant to Section 2-318(1)(b) and 2-318(1)(c) of the City's Purchasing Ordinance 20-07, "b. A contract may be awarded without competition when the city manager makes a written determination, after conducting a good faith review of available sources, that there is only one (1) source for the required supplies or contractual service. PROPOSAL TO:

City of Opa-locka

Advanced Oxidation Process Lift Station Odor Control Unit (AOP-16) – LS 11A

Date: October 23, 2023

Proposal Number 2023-WA99

IN-PIPE TECHNOLOGY Because Efficiency Counts

Lift Station Odor Control

In-Pipe Technology (IPT) is pleased to present this proposal for the capital purchase of our AOP-16 Lift Station Odor Control unit. The unit uses photohydroionization (PHI) to produce safe, environmentally friendly hydroxide ions that are very efficient at oxidizing hydrogen sulfide (H_2S) to reduce odor problems from lift station wet wells. Via the venturi effect created by an airflow eductor, negative pressure is created in the headspace of the wet well to slowly draw hazardous gases from the wet well and oxidize them inside of the unit itself.

Please see the attached equipment cut sheet and specification for details on the unit's benefits and operation. In general, an average of 80-95% reduction in H_2S gases can be achieved. For stricter control of H_2S emissions requiring either 100% removal or less than 5 parts per million (ppm), small amounts of activated carbon (less than 1-2 lbs total) can be added to the exhaust of the AOP-16.

This proposal will outline the costs of our unit if purchased.

The AOP-16 is meant for continuous operation. Maintenance of the AOP-16 should be performed every 10,000 hours or every 14 months. In general, maintenance involves replacing the (6) PHI (UV) light cells, and ensuring other components are operating as intended (and replaced as needed). If the unit is left installed and not operational, there is a significant risk of damage and corrosion to the internal PHI mechanisms from exposure to H_2S. Please see below for a schedule of maintenance options available.

Summary of Scope

- The supply of one (1) AOP-16 Lift Station Odor Control Unit at lift station 11A, including all required piping.

- Installation of the unit to the lift station exhaust valve. The exhaust valve must be detached of any other equipment prior to installation.
- Electrical hookup to 110v MUST be performed by the City or a county-approved licensed contractor.
- Sufficient space on a concrete pad must be provided by the City

Available Maintenance Services

Maintenance can be performed by City personnel (maintenance manual to be provided upon installation). Alternately IPT can perform the following services (prices are per unit):

- **Full Service - $500/month**. This includes a full replacement of all parts (as identified on our parts list) every 10,000 hours, monthly inspection on the unit and the monthly replacement of any optional additional carbon as required.
- **Full Service Plus $1,500/month**. We will continuously monitor via H2S Acrulog (which remains our property) and fully replace the parts (as identified on our parts list) every 10,000 hours. Includes a monthly inspection on the unit, monthly replacement of carbon filters (if selected), and monthly reporting of H2S levels at the exhaust of the unit.
- **Monthly Inspection and Carbon Filter Replacement - $300/month**. We will inspect the unit monthly and notify the customer if/when the unit requires maintenance – we also will replace the carbon (if using) monthly.
- **One Time Service (recommended every 10,000 hours/14 months of operation) - $4,000**. We will replace all 6 PHI cells and any other parts as necessary (provided the unit has not corroded due to H2S gasses allowed in due to the unit being inoperative) and ensure the unit is ready for an additional 10,000 hours of operation.
- **Replacement Activated Carbon and filter bags- $500/50lb box**.
- **Complete replacement of internal PHI unit - $7,500** (e.g. if unit is left installed inoperative and is corroded due to exposure to H2S gasses for a prolonged period of time)

IN-PIPE TECHNOLOGY Because Efficiency Counts

IN-PIPE TECHNOLOGY COMPANY, INC.
EXHIBIT A
STANDARD TERMS AND CONDITIONS

1.0 ACCEPTANCE Sale of any products or services (hereafter, the "Products") by In-Pipe Technology Company, Inc. ("Seller") to Purchaser shall be subject to the terms and conditions of sale contained herein. No change in or addition to these terms shall be binding upon Seller unless specifically accepted in writing by Seller. Seller objects in advance to any additional or different terms proposed in Purchaser's order.

2.0 PRICING Prices shall be Seller's price in effect at time of shipment unless otherwise specified in Seller's written quotation. Quotations automatically expire 90 calendar days from quotation date and may be canceled at any time by written notice.

3.0 FORCE MAJEURE LIMITATION Seller shall not be liable for any loss, damage or expense resulting from delay or failure in the performance of Seller's obligations hereunder if such delay or failure is due to acts of God or the public enemy, strikes, labor troubles, fire, explosions, riots, war, governmental orders or restrictions, shortages of materials or labor, delay in transportation, theft, accidents or any other cause which is beyond Seller's reasonable control. Upon the occurrence of any such event preventing the Seller from performing all of its then outstanding contracts, the Seller shall then be entitled to perform such of its contracts as it may select and shall incur no liability to the Purchaser by reason of performing contracts other than this agreement. The Seller's total liability for damages related to the performance of or failure to perform this agreement shall be limited to the amount of the contract price. IN NO EVENT SHALL THE SELLER BE LIABLE FOR LOSS OF PROFITS BY REASON OF PLANT SHUTDOWN, NON-OPERATION OR INCREASE IN EXPENSE OF OPERATION OF OTHER EQUIPMENT OR FACILITIES OR FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES.

4.0 DELIVERY Shipping dates are estimates only and are based on Seller's projected production schedules and commitments by suppliers. DELAY IN SHIPMENT OR VARIANCE FROM SHIPPING SCHEDULE SHALL NOT BE CAUSE FOR CANCELLATION OR CLAIM FOR DAMAGE. Receipt by the Purchaser of any Products or services shall constitute acceptance of delivery and waiver of any claims due to delay.

5.0 WARRANTY Supplier warrants that its labor, materials, and equipment supplied hereunder shall be free from defect and shall conform to the standards of care in effect in its industry at the time of performance of such labor, materials, and equipment for the time this contract is in effect.

5.1 Supplier's obligation is limited to repair or replacement F.O.B. Purchaser's facility when examination of any such equipment shall disclose them to Supplier's reasonable satisfaction to have been defective and Purchaser shall have promptly notified Supplier of the discovery of any such defect. Supplier will not be responsible for; work done, material or equipment furnished or repairs or alterations made by others.

5.2 For any breach hereunder, Supplier shall be liable to Purchaser for all damages (limited as stated in "Liability of Supplier") as shall be applicable under the law, except as otherwise provided in this agreement. Purchaser shall be entitled to pursue all rights and remedies available by law, except as otherwise provided in this agreement. In any event, Supplier's total liability towards Purchaser for alleged faulty performance or nonperformance under this contract shall be limited to the total contract price. THE ABOVE WARRANTY IS INLIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY DISCLAIMED.

6.0 LIABILITY OF SUPPLIER shall not be liable for any bodily injury, death, or injury to or destruction of tangible property except, as the same may have been caused by the negligence or willful misconduct of Supplier. In no event shall Supplier be liable for any delays or special, indirect, incidental or consequential damages. Purchaser agrees that the total limit of Supplier's liability (whether based on negligence, warranty, strict liability or otherwise) hereunder, shall not exceed the aggregate amount due Supplier for services rendered under this contract. All claims, including claims for negligence or any other cause whatsoever, shall be deemed waived unless made in writing and received by Supplier within one (1) year after Supplier's completion of work hereunder.

7.0 PAYMENTS Terms of payment are net 30 days. The maximum legal rate (or 18%) of interest and all costs of collection (including attorney's fees) shall be charged on past due accounts. All orders are subject to the continuing approval of Seller's credit department. If Purchaser is in default in any payment, Seller may declare all payments for work completed

immediately due and payable, stop all further work until payments are brought current and/or require advance payment for future shipments. If the financial condition of the Purchaser at any time does not in the judgment of Seller justify continuance of production or shipment on the terms of payment set forth herein, Seller may require full or partial payment in advance or shall be entitled to cancel any order then outstanding and shall receive reimbursement for its reasonable and proper cancellation charges. In the event of bankruptcy or insolvency of the Purchaser or in the event any proceeding is brought against the Purchaser, voluntarily or involuntarily under the bankruptcy or any insolvency laws, Seller shall be entitled to cancel any order then outstanding at any time during the period allowed for filing claims against the estate and shall receive reimbursement for its reasonable and proper cancellation charges.

8.0 DRAWINGS If drawings are furnished with this proposal, they are submitted only to show the general style, arrangement and approximate dimensions of the equipment and services offered. No work is to be based upon proposal drawings. It is the Purchaser's responsibility to verify that the data given on certified drawings is suitable for applicable installation conditions. Any changes made after the order is released for manufacture will be subject to extra charges.

9.0 TITLE/RISK OF LOSS/DEFAULT Unless otherwise specified by Seller, delivery will be made F.O.B. point of shipment to Purchaser. Title to right of possession and ownership of equipment covered herein shall remain the property of the Seller. The Purchaser agrees to do all acts necessary to perfect and maintain such right and title in the Seller. In case of failure or refusal to make payments when due, then and in any such event the whole of the unpaid portion of the purchase price shall, at Seller's option, become immediately due and payable and in case of such default on Purchaser's part, Seller shall thereupon have the right to enter the premises upon which such property shall be installed and take possession of and remove the same without legal process. This equipment shall retain its character as personal property regardless of its mode of attachment. Risk of loss or damage shall pass to Purchaser on delivery to carrier.

10.0 TAXES In addition to any price specified herein, Purchaser shall pay the gross amount of any present, or future sales, use, excess, value added or other similar tax applicable to the price, sale or delivery of any Products or their use by Seller or Purchaser, or Purchaser shall furnish Seller with a tax exempt certificate acceptable to the taxing authorities.

11.0 CANCELLATION Any order placed with Seller may be cancelled by the Purchaser only upon payment of reasonable cancellation charges, which shall take into account expenses already incurred and commitments made by the Seller.

12.0 PROPRIETARY IPT BULK MICROBE CULTURE The Client agrees that it will use prudent attempts to ensure that no analysis will be allowed on the IPT bulk microbe culture reagents without prior written authorization by In-Pipe Technology Company, LLC. In-Pipe Technology methodology is protected by US Patents (#5,578,211 and 5,788,841 and Canada Patent # 2,272,689) owned by the company.

13.0 DISPUTE RESOLUTION Any dispute or controversy arising out of, under, or in connection with, or in relation to, this Agreement and/or any amendments thereto, or the breach thereof, which is not resolved informally by prior mutual agreement of the Purchaser and Seller, shall be submitted to non-binding arbitration, unless otherwise waived and/or modified in writing by the Parties. The cost of such arbitration shall be paid by the Purchaser and Seller equally; however, the prevailing party in the arbitration shall be entitled to reimbursement of its attorney's fees and other costs and expenses incurred in connection therewith.

13.1 If a dispute arises which is not resolved by arbitration pursuant to the above, and either party reasonably retains counsel for the purpose of enforcing any provision of this Agreement, including without limitation the institution of any action or proceeding to enforce any provision of this Agreement, or to recover damages if otherwise available hereunder, or to obtain injunctive or other relief by reason of any alleged breach of any provision of this Agreement, or for a declaration based on a demonstrated necessity of such Party's rights or obligations under this Agreement, or for any other judicial or equitable remedy, then if the matter is settled by judicial or quasi-judicial determination, the prevailing Party shall be entitled, in addition to such other relief as may be granted, to be reimbursed by the losing Party for all costs and expenses incurred including, without limitation, all attorneys' fees and costs for services rendered to the prevailing Party and any attorneys' fees and costs incurred in enforcing any judgment or order entered. The prevailing Party shall be as determined by the court in the initial or any subsequent proceeding.

14.0 GENERAL The terms and conditions hereof cancel and supersede all previous understandings or agreements relating to the Products covered hereunder, written or oral, between Seller and Purchaser and contain the entire understanding of the parties hereto. Terms and conditions in the attached proposal supersede terms and conditions in this document No waiver, alteration, deletion or modification of or addition to any of the provisions hereof shall be binding unless in writing and signed by a duly authorized representative of the Seller. If any term, provision or condition contained herein shall, to any

expert, be invalid or unenforceable, the remainder of the terms, provisions and conditions hereof other than those which are invalid or unenforceable, shall not be affected thereby and each term, provision and condition of this order shall be valid and enforceable to the fullest extent permitted by law. This order and all rights and obligations of the parties shall be construed and interpreted under and pursuant to the laws of the State of Illinois.

IN-PIPE TECHNOLOGY Because Efficiency Counts

In-Pipe Technology Odor Control Unit (IPT-AOP-16) Advanced Oxidation Process System for Wastewater

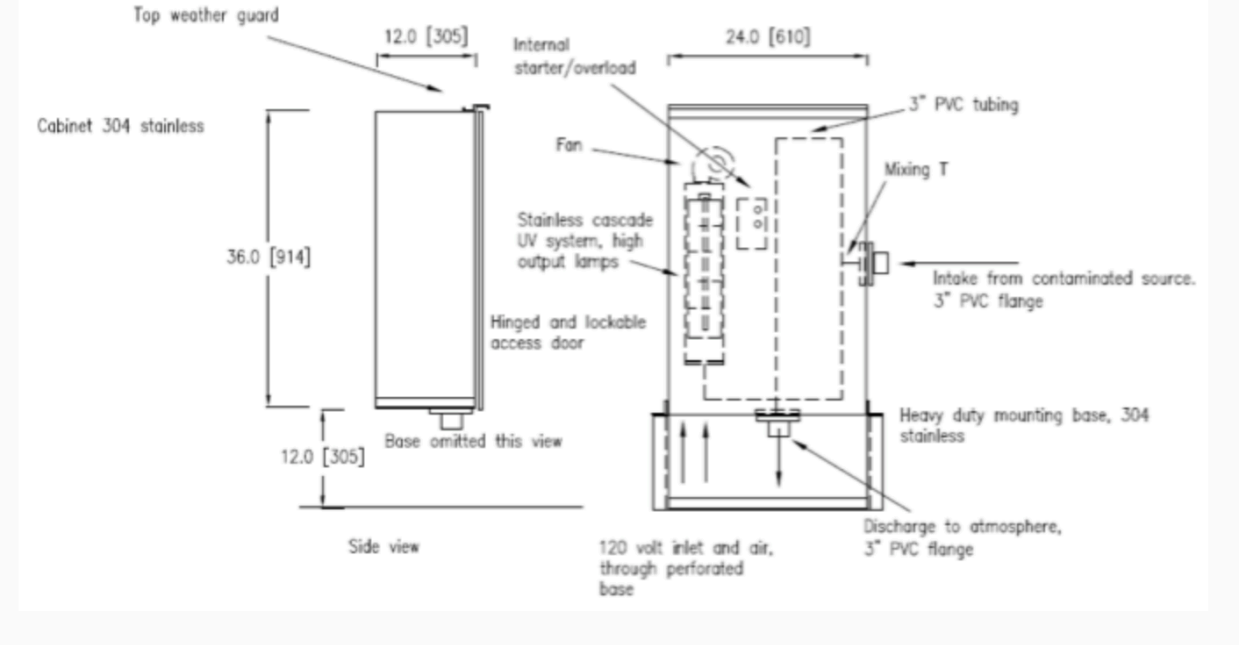
THE LOW COST IPT-AOP-16 ODOR CONTROL SYSTEM OF ADVANCED OXIDATION GAS PRODUCTION IS DESIGNED TO PROVIDE ODOR DESTRUCTION

IPT-AOP-16 Odor Control Unit produces advanced oxidation gases

High intensity UV light produces Advanced Oxidation gases (Ozone, Hydroperoxides, Super Oxide Ions, Hydroxides and Ozonide Ions)

Destroys odor molecules, bacteria, and organic pollutants

Highlights

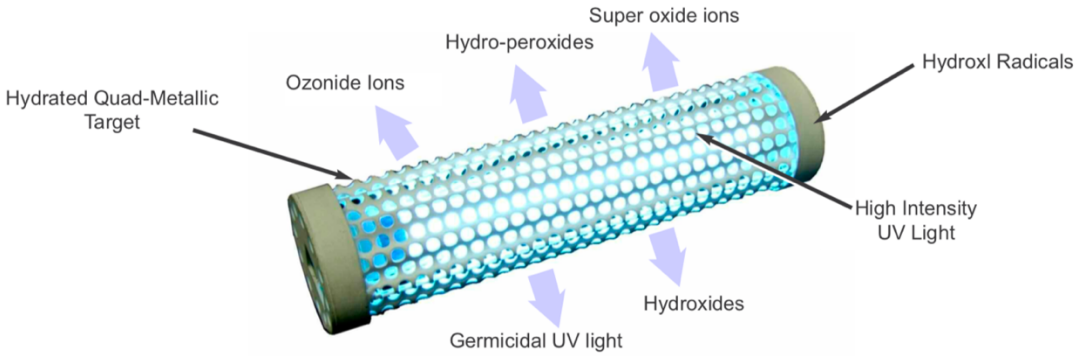


10,000 hours average cell life	All stainless steel
Plug and play, fully automatic, system	Easy to use and install, versatile and portable
No costly and complicated chemicals	Leaves no residue
Automatic Unattended Operation	Environmentally friendly
Low Maintenance	Low power consumption, 110V or 220V
Safety Service Cut Off Switch	On off indicator light
High-Capacity Blower	Eliminates odors

IN-PIPE TECHNOLOGY Because Efficiency Counts

Specification Table

Model	IPT-AOP-16
Design Criteria	One IPT-AOP-16 unit for approximate 4,000 ft^3 of foul air
Voltage	110V, 60Hz, Low:1.36 A, High: 2.17A 220V, 50/60 Hz, Low: 0.68A, High: 1.09A
Weight	Approximate 250 lbs
Material	Stainless steel
Color	Green
Dimensions	30" x 48" x 24"
Enclosure/shade for outdoor installations	Recommend a simple structure like a lean-to for shade
Inlet/Outlet	3" PVC Flange
Controls	On/off, High/low (Six cells on high setting - three cells on low setting)
Fan volume	100 CFM
Number of Phi cells	Six (6)
Phi cell	Life approx. 10000 hours
Oxidation gases	Hydro peroxides, Ozone, Super oxide ions, Ozonide ions



Internal Piping Schematic and Clearances

IN-PIPE TECHNOLOGY Because Efficiency Counts

Mechanism

The IPT-AOP-16 Odor Control Unit utilizes a high intensity UV light technology which when targeted on a hydrated Quad-Metallic target in a Ozone atmosphere creates Ozone, Hydroperoxides, Super Oxide Ions, Hydroxides and Ozonide Ions. The Ozone produced is a safe low concentration, produced by a targeted high intensity UV light technology. This method is far safer than the traditional ozone generators. Targeted UV ozone generators do not produce nitric oxide gas or nitric acid and they have a very high efficiency rating. The additional oxidizers provide a broader range of applications and redundant oxidation gases. All gases are very aggressive friendly gaseous oxidizers. The gaseous oxidizers produced revert back to oxygen and hydrogen after they oxidize the organics, bacteria, odor or gases.

Mr. Airia Austin
Public Works Director
City of Opa-locka
780 Fisherman Street
Opa-locka, FL 33054

Dear Mr. Austin,

This letter is to confirm that the proprietary lift station odor control method used by In-Pipe Technology is a sole source product, provided exclusively by In-Pipe Technology. We are not aware of any other company that provides complete treatment of noxious gases (including hydrogen sulfide) exiting lift stations in substantially the same manner. This product must be purchased directly by the City from In-Pipe Technology. There are no agents or dealers authorized to resell this product in the State of Florida.

We are not aware of any similar or like product available to The City of Opa-locka would serve the same purpose or function.

If you desire additional information, don't hesitate to contact me at (630) 509-2488 at any time or visit our website at www.in-pipe.com. Thank you for your interest in our products and services.

Sincerely,

Douglas G Fagans
Chief Commercial Officer

RESOLUTION NO. XX-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE INTERIM CITY MANAGER TO ENTER INTO AND EXECUTE A VOLUNTARY COOPERATION AND OPERATIONAL ASSISTANCE MUTUAL AID AGREEMENT BETWEEN THE CITY OF OPA-LOCKA, FLORIDA AND THE CITY OF MIAMI BEACH POLICE DEPARTMENT, ATTACHED HERETO AS EXHIBIT "A", FOR LAW ENFORCEMENT SERVICES AND RESOURCES; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Opa-Locka, Florida ("City"), and the City of Miami Beach Police Department, are authorized to enter into a Mutual Aid Agreement ("MAA") pursuant to Section 23.12, Florida Statutes, Florida Mutual Aid Act; and

WHEREAS, the Mutual Aid Agreement with the City of Miami Beach Police Department provides for requesting and rendering of mutual aid in the form of law enforcement services to adequately respond to continuing multi-jurisdictional law enforcement problems, so as to protect the public peace and safety, and preserve the lives and property of the people; and

WHEREAS, the City Commission of the City of Opa-Locka desires to authorize the Interim City Manager to enter into and execute a Mutual Aid Agreement with the City of Miami Beach Police Department, attached hereto as Exhibit "A".

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

Section 2. AUTHORIZATION
The City Commission of the City of Opa-Locka hereby authorizes and directs the Interim City Manager to enter into and execute an operational assistance Mutual Aid Agreement ("MAA") with the City of Miami Beach Police Department, for law enforcement services and resources, attached hereto as Exhibit "A".

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the Interim City Manager, following review by the City Attorney and without need of public hearing, by filing a corrected copy of same with the City.

Section 4. EFFECTIVE DATE.
This Resolution shall take effect immediately upon adoption and is subject to the approval of the Governor or his designee.

Short Title:

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE CITY OF MIAMI BEACH POLICE DEPARTMENT, MIAMI, FLORIDA FOR THE VOLUNTARY COOPERATION AND OPERATIONAL ASSISTANCE MUTUAL AID AGREEMENT; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

Staff Summary:

The Opa-locka Police Department is seeking a Mutual Aid Agreement (MAA) between the City of Opa-locka and the City of Miami Beach Police Department. The intent of this agreement is to receive and extend mutual aid in the form of law enforcement services to adequately_respond to continuing multi-jurisdictional law

enforcement problems, so as to protect the public peace and safety, and preserve the lives and property of the people.

Financial Impact: There is no financial impact associated with this item.

Proposed Action:

Staff recommends the Commission approve this resolution and authorize the Interim City Manager to sign the Mutual Aid Agreement with the City of Miami Beach Police Department, Miami Beach, Florida.

Attachment:

Miami Beach Police Department, Miami Beach, Florida Mutual Aid Agreement

VOLUNTARY COOPERATION AND OPERATIONAL ASSISTANCE MUTUAL AID AGREEMENT BETWEEN THE CITY OF OPA-LOCKA AND THE CITY OF MIAMI BEACH, FLORIDA

This Voluntary Cooperation and Operational Assistance Mutual Aid Agreement ("Cooperation Agreement") is made as of this ____ day of _____, 2023 ("Effective Date"), by and between the CITY OF MIAMI BEACH, FLORIDA, a municipal corporation having its principal office at 1700 Convention Center Drive, Miami Beach, Florida 33139, and the CITY OF OPA-LOCKA, FLORIDA, having its principal office at 780 Fisherman Street., 4th Floor, Opa-Locka, FL 33054, state as follows:

RECITALS

WHEREAS, it is the responsibility of the governments of the City of Opa-Locka, Florida, and the City of Miami Beach, Florida, to ensure the public safety of their respective citizens by providing adequate levels of police services to address any foreseeable routine or emergency situation; and

WHEREAS, because of the existing and continuing possibility of the occurrence of law enforcement problems and other natural and man-made conditions which are, or are likely to be, beyond the control of the services, personnel, equipment, or facilities of the City of Opa-Locka Police Department or the City of Miami Beach Police Department; and

WHEREAS, in order to ensure that preparation of these law enforcement agencies will be adequate to address any and all of these conditions, to protect the public peace and safety, and to preserve the lives and property of the people of the City of Opa-Locka and the City of Miami Beach; and

WHEREAS, it is to the advantage of each law enforcement agency to receive and extend mutual aid in the form of law enforcement services and resources to adequately respond to:

(1) Continuing, multi jurisdiction law enforcement problems, so as to protect the public peace and safety, and preserve the lives and property of the people; and

(2) Intensive situations including, but not limited to, emergencies as defined under Section 252.34 of the Florida Statutes, or requests for certain law enforcement services specified herein and as defined under Section 23.1225 of the Florida Statutes; and

WHEREAS, the City of Opa-Locka and the City of Miami Beach have the voluntary cooperation and assistance authority under the Florida Mutual Aid Act, Sections 23.12-23.127 of the Florida Statutes, to enter into this Cooperation Agreement for law enforcement service which:

(1) Permits voluntary cooperation and operational assistance of a routine law enforcement nature across jurisdictional lines as allowed under Section 23.1225 of the Florida Statutes; and
(2) Provides for rendering of assistance in a law enforcement emergency as defined in Section 252.34 of the Florida Statutes.

NOW THEREFORE, BE IT KNOWN that the City of Opa-Locka, Florida and the City of Miami Beach, Florida, in consideration for mutual promises to render valuable aid in times of

necessity, do hereby agree to fully and faithfully abide by and be bound by the following terms and conditions:

SECTION I: PROVISIONS FOR VOLUNTARY COOPERATION

Each of the aforesaid law enforcement agencies hereby approve and enter into this Cooperation Agreement whereby each of the agencies may request and render law enforcement assistance to the other in dealing with any violations of Florida Statutes to include, but not necessarily be limited to, investigating sex offenses, robberies, assaults, batteries, burglaries, larcenies, gambling, motor vehicle thefts, drug violations pursuant to Chapter 893 of the Florida Statutes, backup services during patrol activities, and interagency task forces and/or joint investigations as set forth pursuant to, and under the authority of Chapter 23 of the Florida Statutes.

SECTION II: PROVISIONS FOR OPERATIONAL ASSISTANCE

The aforesaid law enforcement agencies hereby approve and enter into this Cooperation Agreement whereby each of the agencies may request and render law enforcement assistance to the other to include, but not necessarily be limited to dealing with, the following:

1. Joint multi-jurisdictional criminal investigations
2. Civil affray or disobedience, disturbances, riots, large protest demonstrations and assemblies, controversial trials, political conventions, labor disputes, and strikes.
3. Any natural disaster.
4. Incidents which require rescue operations and crowd and traffic control measures including, but not limited to, large-scale evacuations, aircraft and shipping disasters, fires, explosions, gas line leaks, radiological incidents, train wrecks and derailments, chemical or hazardous waste spills, and electrical power failures.
5. Terrorist activities including, but not limited to, acts of sabotage.
6. Escapes from, or disturbances within, prisoner processing facilities.
7. Hostage and barricaded subject situations, and aircraft piracy.
8. Control of major crime scenes, area searches, perimeter control, back-ups to emergency and in-progress calls, pursuits, and missing person calls.
9. Enemy attack.
10. Transportation of evidence requiring security.
11. Major events, e.g., sporting events, concerts, parades, fairs, festivals, and conventions.
12. Security and escort duties for dignitaries.
13. Incidents requiring utilization of specialized units; e.g., underwater recovery, aircraft, canine, motorcycle, bomb, crime scene and police information.
14. Emergency situations in which one agency cannot perform its functional objective.
15. Joint training in areas of mutual need.
16. Joint multi-jurisdictional marine interdiction operations.

The following procedures will apply in mutual aid operations:

1. Mutual aid requested or rendered will be approved by the Chief of Police, or his/her designee.
2. Specific reporting instructions for personnel rendering mutual aid will be included in the request for mutual aid. In the absence of such instructions, personnel will report to the ranking on-duty supervisor on the scene.

3. Communications instructions will be included in each request for mutual aid and each agency's communications centers will maintain radio contact with each other until the mutual aid situation has ended.
4. Incidents requiring mass processing of arrestees, transporting prisoners, and operating temporary detention facilities will be handled per established procedures of the requesting agency, or directors involved.

SECTION III: PROCEDURE FOR REQUESTING ASSISTANCE AND LIMITATIONS OF ASSISTANCE

In the event that a party to this Cooperation Agreement is in need of assistance as set forth above, the Chief of Police or his/her designee, shall notify the Chief of Police or his/her designee from whom such assistance is requested. The Chief of Police or authorized agency representative whose assistance is sought shall evaluate the situation and the agency's available resources, consult with his/her supervisors, if necessary, and will respond in a manner he/she deems appropriate.

The Chief of Police in whose jurisdiction assistance is being rendered may determine who is authorized to lend assistance in his/her jurisdiction, for how long such assistance is authorized and for what purpose such authority is granted. This authority may be granted either verbally or in writing as the particular situation dictates.

Should a law enforcement officer be in another subscribed agency's jurisdiction for matters of a routine nature, such as traveling through the area on routine business, attending a meeting or going to or from work, and a violation of Florida Statutes occurs in the presence of said party, representing his/her respective agency, **HE/SHE SHALL ONLY BE EMPOWERED TO RENDER ENFORCEMENT ASSISTANCE AND ACT IN ACCORDANCE WITH FLORIDA LAW**. Should enforcement assistance be taken, said party shall notify the agency having normal jurisdiction and upon the latter's arrival, turn the situation over to them and offer any assistance requested including but not limited to a follow-up written report documenting the event and the actions taken. This provision so prescribed in this paragraph, is not intended to grant general authority to conduct investigations, serve warrants and/or subpoenas, or to respond without request to emergencies already being addressed by the agency of normal jurisdiction, but is intended to address critical, life-threatening or public safety situations, prevent bodily injury to citizens, or secure apprehension of criminals whom the law enforcement officer may encounter and such encounter results in a breach of the peace.

The parties acknowledge that the policy of the Florida Mutual Aid Act is to provide a means to deal with disasters, emergencies, and other major law enforcement problems. This Cooperation Agreement shall not extend police powers beyond the specific additional authority granted by the Legislature in Chapter 23 of the Florida Statutes, which intent was to assure the continued functioning of law enforcement in times of emergencies or in areas where major law enforcement efforts were being thwarted by jurisdictional barriers.

SECTION IV: COMMAND AND SUPERVISORY RESPONSIBILITY

The personnel and equipment that are assigned by the assisting Agency shall be under the immediate command of a supervising officer designated by the assisting Agency. Such supervising officer shall be under the direct supervision and command of the Chief of Police or his/her designee of the agency requesting assistance.

SECTION V: CONFLICTS

Whenever an officer is rendering assistance pursuant to this Cooperation Agreement, the officer shall abide by and be subject to the rules and regulations, personnel policies, general orders, and standard operating procedures of his/her own employer. If any such rule, regulation, personnel policy, general order or standard operating procedure is contradicted, contravened or otherwise in conflict with a direct order of a superior officer of the requesting agency, then such rule, regulation, policy, general order or procedure shall control and shall supersede the direct order.

SECTION VI: HANDLING COMPLAINTS

Whenever there is cause to believe that a complaint has arisen as a result of a cooperative effort as it may pertain to this Cooperation Agreement, the Chief of Police or his/her designee of the requesting agency shall be responsible for the documentation of said complaint to ascertain at a minimum:

1. The identity of the complainant.
2. An address where the complaining party can be contacted.
3. The specific allegation.
4. The identity of the employees accused without regard as to agency affiliation.

If it is determined that the accused is an employee of the assisting agency, the above information, with all pertinent documentation gathered during the receipt and processing of the complaint, shall be forwarded without delay to the agency for administrative review. The requesting agency may conduct a review of the complaint to determine if any factual basis for the complaint exists and/or whether any of the employees of the requesting agency violated any of their agency's policies or procedures.

SECTION VII: LIABILITY

Each party engaging in any mutual cooperation and assistance, pursuant to this Cooperation Agreement, agrees to assume responsibility for the acts, omissions or conduct of such party's own employees while engaged in rendering such aid pursuant to this Cooperation Agreement, subject to the provisions of Section 768.28, Florida Statutes, where applicable.

SECTION VIII: POWERS, PRIVILEGES, IMMUNITIES AND EXPENDITURES

(a) Employees of the City of Opa-Locka and the City of Miami Beach, when actually engaging in mutual cooperation and assistance outside of their normal jurisdictional limits but inside this State, under the terms of this Cooperation Agreement, shall pursuant to the provisions of Section 23.127(1), Fla. Stat. (as amended) and this Cooperation Agreement, have the same powers, duties, rights, privileges and immunities as if the employee was performing duties inside the employee's political subdivision in which normally employed.

(b) Each party agrees to furnish necessary personnel equipment, resources and facilities and to render services to each other party to this Cooperation Agreement as set forth above; provided however, that no party shall be required to deplete unreasonably its own personnel, equipment, resources, facilities, and services in furnishing such mutual aid.

(c) A party that furnishes equipment pursuant to this Cooperation Agreement must bear the cost of loss or damage to that equipment and must pay any expense incurred in the operation and maintenance of that equipment.

(d) The agency furnishing aid pursuant to this Cooperation Agreement shall compensate its appointees/employees during the time such aid is rendered and shall defray the actual travel and maintenance expenses of its employees while they are rendering such aid, including any amounts paid or due for compensation due to personal injury or death while such employees are engaged in rendering such aid.

(e) To the extent provided by applicable law, ordinance, or rule, the privileges and immunities from liability, exemption from laws, ordinances and rules, and all pension, insurance, relief, disability, worker's compensation, salary, death and other benefits that apply to the activity of an employee of an agency when performing the employee's duties within the territorial limits of the employee's agency apply to the employee to the same degree, manner, and extent while engaged in the performance of the employee's duties extraterritorially under the provisions of this Cooperation Agreement. The provisions of this section shall apply to paid, volunteer, and reserve employees.

(f) Nothing herein shall prevent the requesting agency from requesting supplemental appropriations from the governing authority having budgeting jurisdiction to reimburse the assisting agency for any actual costs or expenses incurred by the assisting agency performing hereunder.

(g) Should the City of Miami Beach receive reimbursement for expenditures from a third party for a mutual aid event covered by this Cooperation Agreement, the City of Opa-Locka shall be eligible to receive an equitable reimbursement share for any actual costs or expenses incurred that are directly attributable to the event, provided such costs and expenses are authorized by the third party for reimbursement purposes.

(h) Should the City of Opa-Locka receive reimbursement for expenditures from a third party for a mutual aid event covered by this Cooperation Agreement, the City of Miami Beach shall be eligible to receive an equitable reimbursement share for any actual costs or expenses incurred that are directly attributable to the event, provided such costs and expenses are authorized by the third party for reimbursement purposes.

(i) The parties acknowledge that the City of Miami Beach and the City of Opa-Locka are authorized to pursue property seized pursuant to the Florida Contraband Forfeiture Act. Each party shall have exclusive authority to initiate forfeiture proceedings originating in its respective jurisdiction under the Florida Contraband Forfeiture Act for any matters which arise from a mutual aid event that is covered by this Cooperation Agreement. Each respective party, upon successfully prosecuting a forfeiture action, shall equitably share in those proceeds seized and forfeited, as acceptable to the Chief of Police of the City of Miami Beach and the Chief of Police of the City of Opa-Locka.

SECTION IX: INSURANCE

Each party shall provide, upon request, satisfactory proof of liability insurance by one or more of the means specified in Section 768.28(16)(a), Florida Statutes, in an amount which is, in the judgment of the governing body of that party, at least adequate to cover the risk to which that party may be exposed. Should the insurance coverage, however provided, of any party be canceled or undergo material change, that party shall notify all parties to this agreement of such change within ten (10) days of receipt of notice or actual knowledge of such change.

SECTION X: EFFECTIVE DATE

This Cooperation Agreement shall take effect upon execution and approval by both parties and shall continue in full force and effect until December 31, 2028. Under no circumstances may this agreement be renewed, amended, or extended except in writing.

SECTION XI: CANCELLATION

Either party may cancel its participation in this Cooperation Agreement at any time upon delivery of written notice to the other party.

In witness whereof, the parties hereto cause to these presents to be signed on the date specified.

AGREED TO AND ACKNOWLEDGED this ____ day of _____, 2023.

RESOLUTION NO. XX-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE RETIREMENT AND CONVEYANCE OF THE CITY OF OPA-LOCKA POLICE DEPARTMENT CANINE THOR TO HIS HANDLER; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Canine Thor is a 3 year 11-month-old, intact male Belgian Malinois, who was obtained by the City of Opa-locka Police Department on March 24, 2021; and

WHEREAS, Canine Thor has been with his current handler, Officer Victor Riveron since December 15, 2022; and

WHEREAS, Canine Thor has been diagnosed by his veterinarian, Dr. Herrington, with multiple ongoing comorbidities making him unfit to return to active duty; and

WHEREAS, pending final disposition, Officer Victor Riveron releases the City of Opa-Locka for any and all liability on behalf of the canine, as documented by the attached signed release form, attached hereto as Exhibit "A"; and

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interest of the Opa-locka Police Department and Canine Thor that the dog be retired and donated to his handler, Officer Victor Riveron.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

Section 2. AUTHORIZATION
The City Commission of the City of Opa-Locka hereby authorizes the retirement and conveyance of the City of Opa-Locka Police Department Canine Thor to his handler, Officer Victor Riveron.

Section 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the Interim City Manager, following review by the City Attorney and without need of

public hearing, by filing a corrected copy of same with the City.

Section 4. EFFECTIVE DATE.
This Resolution shall take effect immediately upon adoption and is subject to the approval of the Governor or his designee.

Short Title:

A resolution directing the Interim City Manager to authorize the retirement and conveyance of the City of Opa-locka Police Department Canine Thor to his handler.

Staff Summary:

Canine Thor is a 3 year 11-month old, intact male Belgian Malinois, who was obtained by the City of Opa-locka Police Department on March 24, 2021. Canine Thor has been with his current handler, Officer Victor Riveron since December 15, 2022. Canine Thor has been diagnosed by his veterinarian, Dr. Herrington, with multiple ongoing comorbidities making him unfit to return to active duty. It is in the best interest of the Opa-locka Police Department and Canine Thor that the dog be retired and donated to his handler, Officer Victor Riveron. Pending final disposition, Officer Victor Riveron releases the City of Opa-locka for any and all liability on behalf of the canine, as documented by the attached signed release form.

DocuSign Envelope ID: 85446A46-4C76-4F5B-A9D4-4AC6364853C8

Financial Impact: There is no financial impact associated with this retirement. The cost of a replacement canine will be addressed in a future agenda item.

Proposed Action:

Staff recommends the City Commission approve legislation directing the Interim City Manager to authorize the retirement and conveyance of Canine Thor to his handler, Officer Victor Riveron.

MEMORANDUM
CITY OF OPA-LOCKA POLICE DEPARTMENT

DATE: October 26, 2023

TO: Darvin Williams/Interim City Manager

FROM: Kenneth D. Ottley/Interim Chief of Police

SUBJECT: Retirement of Canine Thor

Attached please find required documents to request approval of the retirement and conveyance of the City of Opa-locka Police Department Canine Thor to his handler, Officer Victor Riveron.

Canine Thor is a 3 year 11-month old, intact male Belgian Malinois, who was assigned to the City of Opa-locka Police Department March 24, 2021. Canine Thor has been with his current handler, Officer Victor Riveron since December 15, 2022. Canine Thor has been diagnosed with multiple ongoing comorbidities making him unfit to return to active duty.

Based on the recommendation of his veterinarian, Dr. Herrington, it is in the best interest of the Opa-locka Police Department and Canine Thor, that the dog be retired and donated to his handler, Officer Victor Riveron. Pending final disposition, Officer Victor Riveron releases the City of Opa-locka for any and all liability on behalf of the canine, as documented by the attached signed release form.

Authority to approve this request pursuant to approval by the City of Opa-locka Board of Commissioners.

Subject: Canine Officer Thor, requested medical retirement letter.

To whom it may concern,

This letter is regarding canine officer Thor, a 3-year 11month old, intact male Malinois, handler Riveron. My understanding is that medical recourses for the ongoing veterinary care of Thor have reached the limit. Thor has multiple ongoing comorbidities that will require further medical expense. Thor is presently unfit for return to active duty.

Respectfully,

Jim Herrington DVM, DABVP, CCRP

Medical Director AU1000

RETIRED ANIMAL CUSTODY AFFIDAVIT

Pursuant to the City of Opa-locka and approval by the City of Opa-locka Board of Commissioners, authorization is hereby granted to place retired animal, **Canine Thor, a Belgian Malinois, in custody of Officer Victor Riveron of the Opa-Locka Police Department**.

CRITERIA

Attached herein is an email from **Dr. James Herrington**, a licensed veterinarian, VCA Hollywood Animal Hospital, under care agreement with the City of Opa-locka, Police Department. The email certifies that the above mentioned animal no longer meets the requirements for service with the City of Opa-locka.

Furthermore, where appropriate, **Officer Victor Riveron** meets the requirements to adopt or receive the above mentioned animal. Also, a Release has been fully signed and witnessed which holds harmless and fully indemnifies the City of Opa-locka, their employees and agents for any acts of the retired animal.

HISTORY
K9 Thor - ID 0130

K9 Thor came to the department on March 24th, 2021 and was assigned to Officer Louis XVI. K9 Thor completed K9 School on January 8, 2022.

According to Officer Louis XVI, K9 Thor completed approximately 10-20 deployments and had 5-10 non-contact apprehensions. K9 Thor made one (1) contact apprehension on July 20, 2022.

****

On December 15, 2022, K9 Thor was reassigned to Officer Victor Riveron. K9 Thor attended and successfully completed an additional K9 School at the Miramar Police Department graduating on March 24, 2023.

DEPLOYMENTS WITH OFFICER VICTOR RIVERON

#1 Tuesday 4/4/23 @ 2110
REF CASE 23-0405-001
QTH: 2095 NW 141 ST
Synopsis: 22/32 aggravated assault. Subject was a black male wearing a black shirt with white letters in the front and black shorts, approximately 6 feet tall. Subject was part of a 22 ring with a Chop Shop at the above listed location. Assistance was requested from Miami Gardens Police Department K-9 Units due the size of the perimeter.

K-9 Thor was deployed on the ground at approximately 2230 hours. Wind was out of the east. The search was conducted out of the west using the wind to K-9 Thor's advantage. The first business was not able to be checked due to three large dogs inside the property and no viable access for K-9 Thor.

The second property was searched with negative results.

The area where the subject was last seen by CID units was searched. K-9 Thor alerted to a small fenced area in car parking lot on the east side and confirmed by a Miami Gardens K-9 Team; however, no subject was found.

#2 Wednesday 04/07/2023
QTR 1700 HOURS
CASE # 22-1005-018
QTH: 13875 NW 22ND AVE, APT 265 (BRICKS)
On Wednesday 04/07/2023 at approximately 1700 hours, I along my partner K9 Thor assisted CID with the apprehension of a wanted subject identified as a black male. The incident location

was 13875 NW 22ND AVE, APT 265 (BRICKS). The apartment was located on the second floor on the south building with the front door facing north.

The subject was last seen by units on scene hiding underneath the bed inside the last bedroom facing south. K9 announcements were given in an effort for subject to surrender. Getting no response, K9 Thor was casted inside the bedroom and commanded to find subject. During the search the subject began verbally alerting that he would be surrendering. Subject gave up upon deployment of K-9 Thor. Officer Riveron then secured his partner K9 Thor by his hardness and began giving the subject loud and clear verbal commands. Subject was taken into custody by assisting PRT units from Miami-Dade Police Department and turned over to Opa-Locka Police Department units without incident. No further information.

#3 Sunday 5/14/23
2375 NW 149 ST (ROCK & ROLL TRAILERS)
Alarm / made entry with K9 Thor / No alerts or change of behavior given

#4 Thursday 5/18/23
14201 NW 23 PI (RESIDENCE)
Responded to a 26 in progress – black male wearing green hoodie in the rear of residence. K9 Thor used to clear the backyard. No alerts or change in of behavior, subject gone out of area prior to arrival.

#5 Wednesday 05/31/23
Case: 230531-002
Signal: 32 Stabbing
Subject: B/M
Location: 500 Jann Ave Apt #7
K9 Thor was deployed to assist CID with the location of a stabbing subject who was possible hiding inside of an empty apartment. Next door neighbors stated they heard noises from the attic. After giving K9 announcements k9 Thor was given the search command. The deployment produced negative results for a subject.

NON BITE APPREHENSIONS

04/07/2023
CASE # 22-1005-018
QTH: 13875 NW 22ND AVE, APT 265 (BRICKS)
Assisted CID with the apprehension of subject

Subject was hiding in the closet. Subject gave up before deployment of K-9 Thor.

****

RESOLUTION NO. 24-

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, ACCEPTING THE PROPOSAL OF KING'S WRECKER SERVICE, INC. FOR CITYWIDE TOWING SERVICES, PURSUANT TO RFP NO. 23-1019200 AND FURTHER AUTHORIZING THE INTERIM CITY MANAGER TO ENTER INTO AN AGREEMENT WITH KING'S WRECKER SERVICE, INC. FOR SAID SERVICES, IN A FORM ACCEPTABLE TO THE CITY ATTORNEY; PROVIDING FOR ADOPTION OF REPRESENTATIONS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, on September 21, 2023, the City of Opa-Locka ("City") published Request for Proposals (RFP) No. 23-1019200 to obtain services for citywide towing services within the City; and

WHEREAS, six (6) sealed proposals was received by the City Clerk's Office and certified by the City Clerk on October 23, 2023; and

WHEREAS, an Evaluation Committee reviewed the proposals and subsequently selected King's Wrecker Service, Inc. as the most responsive responsible bidder; and

WHEREAS, King's Wrecker Service, Inc. pricing proposal adopts the pricing schedule as outlined by Miami-Dade County ("County"). The most current rate schedule was published by the County on October 1, 2023 and is provided herein as Exhibit "A". These fees are reviewed and modified annually by Miami-Dade County. Vendor pricing will be adjusted as the County schedule is modified; and

WHEREAS, King's Wrecker Service, Inc. tows vehicles for over a dozen Police Departments in Miami Dade County and has several private property towing contracts. The company is also experienced in towing oversized loads, with an array of trailers and equipment to service towing requests; and

WHEREAS, the City Commission finds that acceptance of King's Wrecker Service, Inc.'s proposal for Citywide Towing Services and entering into an agreement with said company, is in the best interest of the City of Opa-Locka and its residents.

NOW, THEREFORE, BE IT DULY RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA- LOCKA, FLORIDA:

SECTION 1. The recitals to the preamble herein are incorporated by reference.

SECTION 2. The City Commission of the City of Opa-Locka, Florida hereby accepts the proposal of King's Wrecker Service, Inc. relating to Request for Proposals (RFP) 23-1019200, for Citywide Towing Services and authorizes the Interim City Manager to enter into an agreement for same, in a form acceptable to the City Attorney.

SECTION 3. Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager following review by the City Attorney and without need of public hearing, by filing a corrected copy of same with the City.

SECTION 4. This Resolution shall take effect upon adoption and is subject to the approval of the Governor or Governor's Designee.

Short Title:

A resolution authorizing the Interim City Manager to accept the proposal of King Wrecker's Service, Inc for the Citywide Towing Services pursuant to RFP No. 23-1019200 and further authorizing the Interim City Manager to enter into an agreement with King Wrecker's Service, Inc for said services.

Staff Summary:

The City is seeking qualifications from licensed and experienced towing firms to enter into an agreement for citywide towing services. On September 21, 2023, the City issued Request for Proposals (RFP) 23-1016200 and six (6) proposal submissions were certified by the City Clerk certified on October 23, 2023. King Wrecker's Service, Inc. tows for over a dozen Police Departments n Miami Dade County and several private property towing contracts.

They also specialize in oversized loads, with an array of trailers and equipment to service all towing requests. The Interim City Manager shall accept the proposal of King Wrecker's Service, Inc and further enter into an agreement for citywide towing services. Services will be rendered and expended at the rate of the Miami Dade Fee Schedule and are subject to change annually.

Financial Impact: There is no negative fiscal impact for this.

Proposed Action:

Staff recommends the City Commission approve the recommendation for King Wrecker's Service, Inc and authorize the Interim City Manager to enter into an agreement with said company.

CITY OF OPA-LOCKA REQUEST FOR PROPOSALS
RFP NO: 23-1019200
Citywide Towing Services

Sealed Proposals for a towing service will be received by the City of Opa-locka at the Office of the City Clerk, 780 Fisherman St, 4th Floor, Opa-locka, Florida 33054, **Thursday, October, 19, 2023 by 2:00 p.m.** Any RFP Package received after the designated closing time will be returned unopened. The City of Opa-locka will be accepting proposals by mail, however it is your responsibility to submit your proposal by the due date. In addition, proposals may be submitted via www.demandstar.com (e-bid). The address to submit sealed proposals is listed below:

CITY OF OPA-LOCKA
Office of the City Clerk
780 Fisherman Street, 4th
Floor Opa-locka, Florida
33054

An original and six (6) copies for a total of seven (7) plus 1 copy of the Proposal package on USB Flash Drive in PDF format shall be submitted in sealed envelopes/packages addressed to the City Clerk, City of Opa-locka, Florida, and marked **RFP for Citywide Towing Services.**

Proposers desiring information for use in preparing proposals may obtain a set of such documents by visiting the City's website at www.opalockafl.gov or www.demandstar.com.

The City reserves the right to accept or reject any and all proposals and to waive any technicalities or irregularities therein. The City further reserves the right to award the contract to that proposer whose proposal best complies with the **RFP NO: 23-1019200** requirements. Proposers may not withdraw their proposal for a period of ninety (90) days from the date set for the opening thereof.

Joanna Flores, CMC
City Clerk

CITY OF OPA-LOCKA
RFP NO: 23-1019200
City Wide Towing Services

PART I

PROPOSAL GUIDELINES

1-1. Introduction: The City of Opa-locka is requesting proposals from qualified professional companies and firms to provide **Towing Services.** The City hereby requests proposals for the selection of one or more firms (collectively, the "Consultant" or "Respondent") to provide the services set forth in this RFP.

1-2. Proposal Submission and Withdrawal: The City of Opa-locka will be accepting proposals by mail, however it is Proposer's responsibility to submit Proposer's proposal by the due date. In addition, proposals may be submitted via www.demandstar.com (e-bid). The City must receive all proposals by 2:00 p.m. on October 19, 2023. The address to submit sealed proposals is listed below:

CITY OF OPA-LOCKA
Office of the City Clerk
780 Fisherman Street, 4th
Floor Opa-locka, Florida 33054

To facilitate processing, please clearly mark the outside of the proposal package as follows: **RFP NO. 23-1019200 – Citywide Towing Services.**

This package shall also include the Proposer's return address.

Proposers may withdraw their proposals by notifying the City in writing at any time prior to the deadline for proposal submittal. After the deadline, the proposal will constitute an irrevocable offer, for a period of 90 days. Once opened, proposals become a record of the City and will not be returned to the Proposer.

The City cautions Proposers to assure actual delivery of mailed or hand-delivered proposals directly to the City Clerk's Office at 780 Fisherman Street, 4th Floor, Opa-locka, Florida 33054 prior to the deadline set for receiving proposals. Telephone confirmation of timely receipt of the proposal may be made by calling (305) 688-4611 before proposal closing time. Any proposal received after the established deadline **will not** be considered and will be returned unopened to the Proposer(s).

1-3. Number of Copies: Proposers shall submit an **original and six (6) copies (a total of 7) plus one copy on USB flash drive in PDF format** of the proposal in a sealed, opaque package marked as noted above. The Proposer will be responsible for timely delivery, whether by personal delivery, US Mail or any other delivery medium.

1-4. Development Costs: Neither the City nor its representatives shall be liable for any expenses incurred in connection with preparation of a response to this Request for Proposal. Proposers should prepare their proposals simply and economically, providing a straightforward and concise description of the Proposer's ability to meet the requirements of the RFP.

1-5. Inquiries: The City Clerk will receive written requests for clarification concerning the meaning or interpretations of the RFP, until eight (8) days prior to the submittal date. City personnel are authorized only to direct the attention of prospective Proposers to various portions of the RFP so that they may read and interpret such for themselves. No employee of the City is authorized to interpret any portion of this RFP or give information as to the requirements of the RFP in addition to what is contained in the written RFP document.

1-6. Addendum: The City may record its response to inquiries and any supplemental instructions in the form of written addenda. The City may mail written addenda up to three (3) calendar days before the date fixed for receiving the proposals. Proposers shall contact the City to ascertain whether any addenda have been issued. Failure to do so could result in an unresponsive proposal. Any oral explanation given before the RFP opening will not be binding.

All Proposers are expected to carefully examine the proposal documents. Any ambiguities or inconsistencies should be brought to the attention of the City's Purchasing Agent through written communication prior to the opening of the proposals.

1-7. Contract Awards: The City anticipates entering into an Agreement with the Proposer who submits the proposal judged by the City to be most advantageous.

The Proposer understands that this RFP does not constitute an offer or an Agreement with the Proposer. An offer or Agreement shall not be deemed to exist and is not binding until proposals are reviewed, accepted by appointed staff, the best proposal has been identified, approved by the appropriate level of authority within the City and executed by all parties. The City anticipates that the final Agreement will be in substantial conformance with this sample Agreement; nevertheless, Proposers are advised that any Agreement may result from the RFP may deviate from the Sample Agreement.

The City reserves the right to reject all proposals, to abandon the project and/or to solicit and re-advertise for other proposals.

1-8. Contractual Agreement: This RFP and Consultant/Contractor proposal shall be included and incorporated in the final award. The order of contractual precedence will be the Contract or Agreement document, original Terms and Conditions, and Proposer response. Any and all legal action necessary to enforce the award will be held in Miami-Dade County and the contractual obligations will be interpreted according to the laws of Florida. **Any additional contract or agreement requested for consideration by the Proposer must be attached and enclosed as part of the proposal.**

1-9. Selection Process: The proposals will be evaluated and assigned points. The firm with the highest number of points will be ranked first; however, nothing herein will prevent the City from assigning work to any firm deemed responsive and responsible.

The City reserves the right to further negotiate any proposal, including price, with the highest rated Proposer. If an agreement cannot be reached with the highest rated Proposer, the City reserves the right to negotiate and recommend award to the next highest Proposer or subsequent Proposers until an agreement is reached.

1-10. Public Records: Upon award recommendation or ten (10) days after opening, whichever occurs first, proposals become "public records" and shall be subject to public disclosure consistent with Chapter 119 Florida Statutes. Proposers must invoke the exemptions to disclosure provided by law in the response to the RFP and must identify the data or other materials to be protected and must state the reasons why such exclusion from public disclosure is necessary. Document files may be examined, during normal working hours.

1-11. News Releases: The Proposer shall obtain the prior approval of the City Manager's Office for all news releases or other publicity pertaining to this RFP or the service, study, or project to which it relates.

1-12. Insurance: The awarded Proposer(s) shall maintain insurance coverage reflecting at least the minimum amounts and conditions specified herein. In the event the Proposer is a governmental entity or a self-insured organization, different insurance requirements may apply. Misrepresentation of any material fact, whether intentional or not, regarding the Proposers' insurance coverage, policies or capabilities may be grounds for rejection of the proposal and rescission of any ensuing Agreement.

1. Evidence of General Liability coverage with limits not less than $1,000,000 per Occurrence/ $2,000,000 Aggregate (Including Policy Number and Policy Period);

2. Evidence of Auto Liability coverage with limits not less than $1,000,000 per Occurrence/$1,000,000 Aggregate (Including Policy Number and Policy Period);

3. Evidence of Workers' Compensation coverage with statutory limits and Employer's Liability coverage with limits not less than $100,000 (Including Policy Number and Policy Period);

4. The City listed as an additional insured (this may be specifically limited to the specific job(s) the contractor will be performing);

5. Minimum 30-day written notice of cancellation.

1-13. Licenses: Proposers, both corporate and individual, must be fully licensed and certified in the State of Florida at the time of RFP submittal. The proposal of any Proposer who is not fully licensed and certified shall be rejected.

1-14. Public Entity Crimes: Award will not be made to any person or affiliate identified on the Department of Management Services' "Convicted Vendor List". This list is defined as consisting of persons and affiliates who are disqualified from public contracting and purchasing processes because they have been found guilty of a public entity crime. No public entity shall award any contract to or transact any business in excess of the threshold amount provided in Section 287.017 Florida Statutes for Category Two (currently $25,000) with any person or affiliated on the "Convicted Vendor List" for a period of thirty-six (36) months from the date that person or affiliate

was placed on the "Convicted Vendor List" unless that person or affiliate has been removed from the list. By signing and submitting the RFP proposal forms, Proposer attests that they have not been placed on the "Convicted Vendor List".

1-15. Code Of Ethics: If any Proposer violates or is a party to a violation of the code of ethics of the City of Opa-locka or the State of Florida with respect to this proposal, such Proposer may be disqualified from performing the work described in this proposal or from furnishing the goods or services for which the proposal is submitted and shall be further disqualified from submitting any future proposals for work, goods or services for the City of Opa-locka.

1-16. Drug-Free Workplace: Preference shall be given to businesses with Drug-Free Workplace (DFW) programs. Whenever two or more proposals which are equal with respect to price, quality, and service are received by the City for the procurement of commodities or contractual services, a proposal received from a business that completes the attached DFW form certifying that it is a DFW shall be given preference in the award process.

1-17. Permits and Taxes: The Proposer shall procure all permits, pay all charges, fees, and taxes, and give all notices necessary and incidental to the due and lawful execution of the work.

1-18. Protests: Protests of the plans, specifications, and other requirements of the request for proposal and bids must be received in writing by the City Clerk's Office at least ten (10) working days prior to the scheduled bid opening. A detailed explanation of the reason for the protest must be included. Protests of the award or intended award of the bid or contract must be in writing and received in the City Clerk's Office within seven (7) working days of the notice of award. A detailed explanation of the protest must be included.

1-19. Termination for Convenience: A contract may be terminated in whole or in part by the City at any time and for any reason in accordance with this clause whenever the City shall determine that such termination is in the best interest of the City. Any such termination shall be affected by the delivery to the contractor at least five (5) working days before the effective date of a Notice of Termination specifying the extent to which performance shall be terminated and the date upon which termination becomes effective. An equitable adjustment in the contract price shall be made for the completed service, but no amount shall be allowed for anticipated profit on unperformed services.

1.20 SCHEDULE OF EVENTS: The following schedule shall govern this RFP. The City reserves the right to change the scheduled dates and times at its sole discretion.

No.	Event	Date	Time (EST)
1	Advertisement/ Distribution of RFP (Cone of Silence Begins)	09/21/23	
2	Closing Date for Respondent Questions	TBA	5:00 P.M.
3	City's Answers to Questions by Respondents	TBA	5:00 P.M.
4	Proposals Due Date	TBA	2:00 P.M.
5	Review of Proposals for Responsiveness	TBA	TBA
6	Recommendation to Commission	TBA	TBA
7	Commission Meeting to Select Consultant(s) and Approve Agreement(s)	TBA	TBA

PART II

NATURE OF SERVICES REQUIRED

2.1 SCOPE OF SERVICES

The City of Opa-locka is seeking qualifications from licensed and experienced towing firms to enter into an agreement for citywide towing services.

The selected consultant shall provide the services, design, labor, materials, equipment, and all incidentals necessary, as further defined in Section 2 of this request for proposals (the "Services") to provide Citywide Towing Services within the City.

The City intends to award a contract to the selected Consultant for the Services described in this RFP.

The contract term is to be for an initial one (1) year period, with up to four (4) one-year option terms. The Respondent shall include all storage, refurbishment, and maintenance prices for each year of the contract.

Contract scope includes the removal and storage of vehicles and equipment that are creating a traffic hazard, abandoned, disabled from a traffic crash, or for non-consensual removal of vehicles from public streets and areas within the City. The proposer will provide 24-hour towing services, 365 days per year. The proposer will supply the City with priority services. The selected proposer/s will be given first call for all wrecker services requested by the City unless a motorist makes a specific request for another wrecker.

Proposer shall specify in their proposal two (2) subcontractors that may be called upon to perform services in an emergency; subcontractor facilities and available equipment are subject to inspection by the City. If services are split between one or more towing firms, a staggered service schedule, at the direction of the City, shall be arranged and adhered to.

Please note: Incumbent (current) firms contracted to provide Towing services to the City of Opa-locka shall submit a proposal package in accordance with this RFP to be considered as a part of the evaluation process.

2.2 REQUESTS FOR SERVICE

All requests for service shall be made through the City of Opa-locka Police Department, Code Compliance Division, or Public Works Department. The City reserves the right to cancel a request for service at any time, including up to the time of hookup.

All vehicles being towed to Proposer's storage compound shall be taken directly to that area. If after assessing an accident scene, the Police Officer or Aide determines the safety of the public requires immediate removal of the vehicle(s), or if the owner's requested tow service does not respond within a reasonable time, the proposer may be required to remove the vehicle(s) to the side of the road or other safe area. If so, the owner of the vehicle so moved may be charged in accordance with the rate schedule.

2.3 REQUIRED RESPONSE TIME

The proposer shall respond to the request for services within forty-five (45) minutes of the call for service. Proposer shall assess the call for service immediately, if the proposer is unable to meet their

obligation within the forty-five-minute time limit, the proposer shall immediately call the requesting department back and notify them that they cannot respond in a timely manner. The proposer shall call designated City-approved subcontractor to respond to the City's call. Subsequently, the City representative making the tow request shall be appropriately notified of the call's successful hand-off to subcontractor.

2.4 PAYMENT

The City will not be responsible for the collection or payment of any charge for services rendered by reasons of having dispatched service in accordance with this contract unless such service charge is a City authorized special service. All other such services rendered shall be charged to the owner of the towed vehicle or other lawful claimant of possession. The motor vehicle owner and/or operator shall be responsible for payment of charges imposed by the Proposer in accordance with the contract rate structure.

Proposer shall ALWAYS accept payment from the vehicle owner or authorized representative for charges in any of at least three (3) of the following forms:

1. Cash, money order, or valid traveler's check.
2. Valid credit card.
3. Valid personal check showing on its face the name and address of the vehicle owner or authorized representative.
4. Electronic funds transfer applications such as Paypal, Venmo, Zelle, or similar payment application.

2.5 ANCILLARY SERVICES

Any ancillary services are to be performed only if required and appropriate. If any such charges are questioned by the City, and such ancillary services were not noted on the Vehicle Storage Receipt, it shall be the proposer's responsibility to prove the validity of such charges.

2.6 SPECIAL SERVICES

If additional duties, like those herein, but not specified, are required by the City, and the firm is able to provide those special services, those services may be requested under this contract by authorized City staff. Examples of such special services could be removal of an aircraft from water or recovery of a large piece of City equipment from mud.

In such instances, the City will depend upon the firm's experience in such matters and authorize the firm to assemble all necessary special equipment and staff, including use of subcontractors, to resolve the special or emergency. Whenever possible estimated costs for such special services shall be provided to the City prior to engaging in work and all costs shall be subject to negotiation. In any such instances the City reserves the right, time and circumstances permitting, to seek the special services elsewhere in accordance with the City procurement ordinances and code.

2.7 RELEASE

The proposer shall directly release, within thirty (30) minutes of payment, any vehicle that has not been marked "hold" by the City, providing the proper proof of identification and ownership is presented. Any vehicle towed that is marked "hold" cannot be released without written authorization from the Police Department. Vehicles can be held up to five (5) days. If the period to hold the vehicle will exceed more than five days, the Police Department shall provide written authorization to the proposer to continue to hold the vehicle, or the vehicle may be removed to the Police Department holding facility. The vehicle owner shall be responsible for storage fees from the 1st through the 5th day. The City shall be responsible for the storage fees after the 5th day. The proposer shall release any vehicle towed in at the

request of the City only to the driver with sufficient identification, or to the person whose name appears on the title or registration certificate as the registered owner of the vehicle, or to the authorized agent of such person. Persons who make application for the release of such a vehicle shall be required to present proof of ownership by presentation of a title or registration, and where applicable, proof of agency or copy of lease agreement.

The storage site must be open for release of vehicles seven (7) days per week, from 8:00 a.m. until 8:00 p.m., and when closed, shall have a sign prominently displayed indicating a telephone number in Miami-Dade County where the operator of the site can be always reached. Upon receipt of a telephoned request to open the site to release a vehicle between the hours of 8:00 p.m. and 8:00 a.m., the operator must respond to the site within one (1) hour by having an authorized employee appear at the site to allow release of the vehicle. The phone number posted shall be always kept open for the receipt of calls. If that line is busy for five (5) continuous minutes, it shall create a rebuttable presumption that the line has been disconnected in violation of this requirement. All motor vehicles that have not been claimed must be disposed of according to state and county laws.

2.8 VIEWING OF IMPOUNDED VEHICLES / REMOVAL OF PERSONAL PROPERTY

The proposer agrees to allow the registered owner of an impounded vehicle or the registered owner's agent or insurance representative, upon proper identification, to view said vehicle on the premises of the proposer. The proposer shall allow every vehicle owner or authorized representative to inspect the towed vehicle within a reasonable time upon his/her arrival at the storage facility and before payment of any charges. The vehicle owner or authorized representative shall be permitted to remove from the vehicle all personal possessions not affixed to the vehicle, including but not limited to telephones, tapes, medicines, tools, etc., and proposer shall assist any vehicle owner/agent in doing so. Vehicle owner/authorized representative shall acknowledge receipt of such property on a form provided by proposer. The above provisions regarding the inspection, viewing, and photographing of a towed vehicle and the release of personal property do not apply to vehicles marked "HOLD" by the Police Department.

2.9 DROP FEES & CITY'S RIGHT TO CANCEL TOWS OR ORDER RELEASE OF VEHICLE

Drop fees occur when a vehicle owner arrives on the scene of a tow and the vehicle has been engaged (hooked) by the tow truck, but the tow truck has not left the scene. Although Florida low allows towing companies to assess a drop fee (of not more than 50% of the posted towing rates).

Contract Manager or designee reserves the right to cancel a tow on the scene before vehicle is attached to wrecker. Contract Manager or designee also reserves the right to order the release of an already impounded vehicle.

2.10 CITY VEHICLES

City of Opa-locka vehicles and equipment up to and including 1-ton trucks and other heavy-duty Public Works vehicles shall be towed at no charge anywhere within Miami-Dade County, Broward County and Palm Beach County. The City will not be charged for any scrap or derelict vehicles disposed of by the tow company. Calls for towing Opa-locka trucks and buses shall be responded to within thirty minutes. If unable to respond during the specified time, proposer shall call a subcontractor to respond.

2.11 COMPLAINTS AND DISPUTES

All complaints will be forwarded to the Chief of Police or designee. If the incident requires formal investigation, the proposer will be notified of the complaint by certified mail. The proposer will have seven (7) business days to reply to the complaint in writing. After the investigation is completed, a memo will be forwarded to the Chief of Police regarding the outcome. If the complaint is sustained, a recommendation of disciplinary action against the proposer will be forwarded to the Chief of Police.

The proposer agrees that any complaints received by the City of Opa-locka concerning misconduct on the part of the proposer, such as excessive charges, poor business practices, damage to vehicles, etc., that cannot be resolved between the proposer and the Police Chief's designee, will be referred to the Police Chief's office for appropriate action. If the complaint is not resolved to the satisfaction of the Police Chief or the owner of the vehicle, it may be referred to the City Manager's office.

2.12 CLEANLINESS

The proposer will be responsible for the cleaning of cars and vehicles from the streets and roadways as ordered by the Police officers or aides. It shall be proposer's responsibility to remove all glass and debris deposited upon the roadway and leave the area in complete cleanliness.
If the proposer is called by the Police Department to clean up an accident scene where another wrecker service has removed the vehicle, the proposer may bill the owner of the vehicle in accordance with the rate schedule.

2.13 STORAGE FACILITY (IES)

The proposer's storage and pick-up locations shall be properly identified by signs on the exterior of the structure, i.e., visible from the adjacent access road.

Inside Storage: Shall accommodate a minimum of four vehicles. Shall have paved floor, i.e., concrete or asphalt, in a condition acceptable to the City of Opa-locka Police Department, free of dirt, standing water, vegetation, and/or articles inappropriate to or inconsistent with the operation of a towing service. It shall have a working area of 12' x 20' per vehicle, with at least an 8' ceiling. Facility shall have an outside window or ventilation system and lighting sufficient to permit processing of vehicles. It must be located within the property of the proposer's towing facility or in proximity (walking distance). Said structure shall provide complete protection from weather and unauthorized entry.

Outside Storage: Shall be of a size to hold a minimum of twenty-five (25) vehicles, properly spaced to provide access for removal or addition of vehicles. Must have a durable surface, properly drained, and enclosed. Shrubbery, trees, and lawns shall be maintained, and junk tires and auto parts shall not be stored. It must be screened from all public rights-of-way by a six (6) foot masonry wall, or fence. Any wire at the top of the wall or fence must be in addition to the six (6) foot. No repair work or servicing of vehicles shall be permitted in the storage area. Facility should have video camera required on exterior stored vehicles w/ at least 10 days of recorded time. Recording 24/7, low light cameras, or lighted storage space. The proposer shall be responsible for all thefts and damage to stored vehicles occurring while the vehicle is in its possession.

2.14 OFFICE FACILITY (IES)
Shall include telephone and rest room facilities and workspace (i.e., desk, phone). Shall have name and mailing address on front of building. Shall be separate from any other business or enterprise. Office and storage shall be at one location.

2.15 POSTING OF RATES FOR TOWING AND STORAGE
Proposers shall have contract rates posted in an area that will be plainly visible to the public (offices, waiting area, etc.) The posting shall have a heading that reads "City of Opa-locka Police Contracted Towing Rates". The rates and heading shall be posted wherever the proposer releases vehicles at the storage compound.

2.16 NON-CONSENT TOW RATES
Non-Consent Tow Rates shall be in accordance with Miami-Dade County Maximum Non-Consent Tow Rates (Refer to Attachment "B") and will only be adjusted by County revisions to these rates.

2.17 INSPECTIONS
The proposer agrees that all records, equipment, personnel, office, and storage facilities will be subject to periodic inspections by properly authorized representatives of the City of Opa-locka.

2.18 TOW TRUCK DRIVERS
Proposer shall be solely responsible for selecting, training, and employing (or otherwise retaining) such personnel as is necessary for proposer to satisfy the requirements of the Contract and to satisfactorily perform the work and services required under the Contract.

- Proposer shall perform driver's license screening on all employees with driving responsibilities and a copy of each employee's driver's license shall be kept on file by Proposer and made available upon request of the City Manager or designee.
- Proposer shall be required to provide all employees with uniforms. Which shall be subject to the prior written approval by the City Manager or designee.
- Proposer shall perform drug test screening on all employees and provide pass/fail results to the City Manager or designee, upon request.

All employees and/or other individuals retained by proposer, shall not, for any purposes, be considered to be employees of the City of Opa-locka, and proposer shall be solely responsible for their supervision and daily direction and control.

It is the intent of the City and proposer, and proposer acknowledges, that the proposer is legally considered to be an independent contractor and that neither it, nor its officers, directors, employees, agents, contractors or servants, shall, under any circumstances, be considered officers, directors, employees, contractors, agents or servants of the City, and that the City shall at no time be legally responsible or liable for any negligent acts, errors, omissions, or misconduct on the part of proposer, or any of its officers, directors, employees, contractors, agents or servants. Additionally, toward that end, proposer agrees to have no markings on either vehicles, buildings, or correspondence that indicates or tends to indicate any official relationship between the proposer and the City of Opa-locka.

Proposer shall have qualified, trained employees. It will also ensure that all drivers possess a valid

commercial driver's license in accordance with the law. Drivers used on City calls shall be neat, clean, courteous, sober, and competent in operating skills.

2.19 EQUIPMENT REQUIREMENTS

Proposers shall provide and always maintain and have available a minimum of the following equipment (described in further detail below):

- Four (4) Class A wreckers
- Two (2) slide-back carriers, Class A or B
- One (1) Class B wrecker
- One (1) Class C wrecker (or greater)

All vehicles must be owned or directly leased by the proposer. The proposer shall produce evidence of ownership or valid first party lease of the required number of wreckers and slide back carriers. A rental agreement of Class B or C wreckers does not meet the qualifications of this contract. All equipment shall be maintained in a state of readiness for response as delineated in this contract and be for the sole use of the Contractor. All wreckers will be registered and shall have the appropriate licenses to operate as wreckers. All wreckers shall display a current decal issued by the City of Opa-locka.

All equipment shall be free of unsightly damages and shall always be clean and presentable to the public. Inappropriate decals on tow trucks shall be removed. City reserves the right to determine what is inappropriate. All trucks shall have fenders, doors, hoods, and bumpers intact always when in operation. Company names, addresses, and phone numbers shall be visible on both doors of the proposer call for service vehicles.

A) CLASS "A" WRECKER:

1. Commercially manufactured unit with a rated capacity of not less than 10,000 pounds gross vehicle weight (GVW), according to the manufacturer's identification plate. If there have been any modifications to the truck chassis that changes the GVW, documentation from the dealer or manufacturer supporting the changes must be provided.
2. Dual rear wheels
3. Cab to axle dimension of not less than 56 inches
4. Commercially manufactured hydraulic boom with a minimum total winching capacity of 8,000 pounds.
5. 100 feet of 3/8 inch steel core cable per winch
6. Hydraulically operated wheel lift with retracted rating of not less than 3,500 pounds and an extended rating of not less than 2,000 pounds.
7. Tow sling or tow bar with a safe lift rating of 3,500 pounds
8. Dolly equipped
9. Slings and protective devices to prevent damage to towed vehicle
10. Motorcycle sling
11. Four-way lug wrench
12. One pair of jumper cables
13. Air Tank
14. Tire plug kit to fix flat tires

B) CLASS "A" SLIDE BACK CAR CARRIER:

1. Commercially manufactured unit, with a rated capacity of not less than 14,500 pounds GVW.
2. Cab to axle dimension of not less than 102 inches.
3. Dual rear wheels
4. Hydraulically operated winch or winches with a minimum total winching capacity of 8,000 pounds.
5. 65 feet of 3/8 inch steel core cable per winch
6. Minimum of 17' hydraulically operated slide back or tilt bed
7. Four-way lug wrench
8. Two tie down chains, each ten feet in length.
9. One pair of jumper cables

C) CLASS "B" WRECKER:

1. Commercially manufactured unit with a rated capacity of not less than 18,000 pounds GVW, according to manufacturer's identification plate. Any modifications to increase GVW must be documented by the dealer or manufacturer.
2. Cab to axle dimension of not less than 84 inches
3. Commercially manufactured boom or booms with a minimum total capacity of 24,000 pounds.
4. 200 feet of ½ inch steel core cable for each winch
5. Hydraulically operated winch or winches with a minimum total winching capacity of 24,000 pounds
6. Hydraulically operated under reach with a retracted rating of not less than 10,500 pounds and an extended rating of not less than 8,500 pounds
7. Two snatch blocks, minimum of 8,000-pound capacity each
8. Two scotch blocks
9. Six to eight feet of extra towing chain with hooks, minimum 5,000-pound capacity
10. Slings and protective devices to prevent damage to towed vehicles
11. Four-way lug wrench
12. One pair of jumper cables

D) CLASS "B" SLIDE BACK CAR CARRIER:

1. Commercially manufactured unit with a rated capacity of not less than 20,000 pounds GVW according to the manufacturer's identification plate. Any modification to increase the GVW must be documented by the dealer or manufacturer.
2. Cab to axle dimension of not less than 138 inches
3. Dual rear wheels
4. 21 feet or longer hydraulically operated slide back or tilt bed.
5. Hydraulically operated winch or winches with a minimum winching capacity of 8,000 pounds.
6. 65 feet of 3/8 inch steel core cable
7. Two-tie-down chains, each ten feet in length
8. One snatch block, minimum 8,000-pound capacity
9. Four-way lug wrench
10. One pair of jumper cables

E) CLASS "C" WRECKER:

1. Commercially manufactured unit with a rated capacity of not less than 30,000 pounds GVW according to manufacturer's identification plate. Any modifications to increase the GVW must be documented by the dealer or the manufacturer.
2. Cab to bogey dimension of not less than 144 inches

3. Commercially manufactured boom or booms with a minimum total winching capacity of 50,000 pounds.
4. Hydraulically operated winch or winches with a minimum total winching capacity of 50,000 pounds.
5. 200 feet of 5/8 steel core cable per winch.
6. Hydraulically operated under reach with a retracted rating of not less than 25,000 pounds and an extended rating of not less than 12,000 pounds.
7. Rear support jacks or outriggers
8. Two ½ inch alloy safety chains
9. Tow bar or tow-sling equipped
10. External air hookup and minimum hoses to supply air to disabled vehicles
11. Two snatch blocks, minimum 24,000-pound capacity for each
12. Two scotch blocks
13. Spring brake-air lock
14. Six to eight feet of extra towing chain with hooks, minimum 4,000-pound capacity.

F) CLASS "D" WRECKER

1. Commercially manufactured unit with a rated capacity of not less than 52,000 pounds GVW according to the manufacturer's identification plate. Any modification to increase GVW must be documented by the dealer or manufacturer.
2. Cab to bogey dimension of not less than 180 inches
3. Commercially manufactured booms or booms with a minimum total capacity of 70,000 pounds.
4. Hydraulically operated winch or winches with a minimum total winching capacity of 70,000 pounds.
5. 200 feet of ¾ inch steel core cable per winch
6. Hydraulically operated under reach with a retracted rating of not less than 45,000 pounds and an extended rating of not less than 12,000 pounds.

7. Rear support jacks or outriggers
8. Two ½ inch alloy safety chains
9. Tow bar or tow-sling equipped
10. External air hookup and minimum hoses to supply air to disabled vehicles
11. Two snatch blocks, minimum 24,000-pound capacity for each.
12. Spring bake-air lock
13. Two scotch blocks
14. Six to eight feet of extra towing chain with hoods, minimum 4,000-pound capacity

G) EQUIPMENT REQUIRED ON EACH VEHICLE:

1. Sand or oil absorbent material
2. Heavy duty broom
3. Reflectors
4. Proper safety lights
5. Amber rotational dome light
6. Two flood lights at rear
7. Two-way radio
8. Quick-start jumper cable equipment

9. Safety cones (2 minimum, day-glow orange, 2' high)
10. Shovel
11. Axe
12. Fire extinguisher - 5 lb. dry chemical U.L. approved
13. First aid kit, minimum 16 units.
14. Crowbar or pry bar
15. Bolt cutter
16. Water
17. Tire inflation capabilities
18. Extra towing chain (8' to 10' with hooks)
19. Necessary hand tools
20. 4-way lug wrench
21. Steering wheel lock or belt or rope
22. Two jack stands
23. Flashlight
24. Six 30-minute fuses
25. Any other equipment as deemed necessary by the City.

2.20 SPECIAL EQUIPMENT

Equipment such as a lowboy, air cushions, or major street clean up equipment does not have to be part of the firm's inventory. However, the firm must demonstrate, to the satisfaction of the City that such equipment is immediately available to firm when the need for this equipment occurs.

Lowboy specifications:

1. Hydraulic roll back, flatbed, tilt, self-loading with 50,000 lbs. minimum capacity. 60,000 lbs. GVW
2. Hydraulic winch capacity of 10,000 lbs. minimum
3. Size: 48 feet long and 102" wide
4. Company must have access to a certified scale capable of weighing vehicles involved in serious or fatal accidents at the request of the investigator.

2.21 PROPOSER'S EQUIPMENT DURING STATE OF EMERGENCY OR DISASTER

Each proposer that is selected by the City of Opa-locka and awarded a contract to tow for the City shall be responsible for the following:

- The proposer that is on call or on duty for the session or time frame when an emergency or disaster strikes shall have available at least two (2) Class A wreckers or Class A flatbeds at the disposal of the City of Opa-locka Police Department.
- Proposer that are not on call or are not on duty when an emergency or disaster strikes will make available one (1) Class A wrecker or Class A flatbed to the City of Opa-locka Police Department.

The City Manager or designee will declare a state of emergency or state of disaster. The City Manager or designee will then notify each proposer that a state of emergency or state of disaster exists, and the required equipment is ordered on standby.

2.22 RADIO COMMUNICATIONS

The proposer will provide all towing vehicles used pursuant to this agreement with two-way radio communication systems. The communication shall be between the proposer's base station and all service trucks utilized in providing City towing service. The two-way radios will not be tuned to any City frequencies.

2.23 UNDERWATER DIVER
The proposer shall furnish a certified underwater diver if requested by the Police Department for removal of submerged or partially submerged vehicles. The proposer assumes all claims, liabilities, and expenses incurred by such diver. For every diver, duty time shall be computed from the time of arrival at the scene to the time vehicle or property is rigged and hoisted to dry land.

2.24 CITY DIVER
A City diver shall be used in the event of an emergency and the City will be reimbursed by the proposer at the rate provided on the Miami-Dade County Maximum Non-Consent Tow Rates (refer to Attachment "B.") Any monies reimbursed to the City by the proposer may in turn be charged back to the Owner. In the event of an emergency where a City diver is not available the proposer shall supply a diver and will charge the owner in accordance with the Miami-Dade County Maximum Non-Consent Tow Rates (refer to Attachment "B.") In the event of a non-emergency situation, vehicle owner shall be responsible for obtaining the services of a diver and wrecker for removal.

2.25 CHANGE OF TIRES / ROADSIDE ASSISTANCE
As a part of this service agreement, proposer agrees to respond to requests from the Police and City Departments to change vehicle tires where necessary and to provide roadside assistance.

2.26 REPORTS
In addition to the Vehicle Storage Receipt written by the Opa-locka Police officer or aide, or City Inspector at the scene, the following reports will be prepared and maintained at the place of business:

1. A daily log of all calls for service by the Opa-locka Police Department will be kept, and two copies submitted to the Police Department once each week, one copy to the Records Supervisor and one copy to the Police Department Designee.
2. A log of all unclaimed vehicles will be submitted to the Police Department once each month, two copies, one copy to the Records Supervisor and one copy to the Police Department Designee.
3. A notification log indicating date, time, and method of notification to the registered owner of an impounded vehicle, as in accordance with the State of Florida Statues, **EXCEPT THAT NOTIFICATION MUST BE MAILED TO REGISTERED OWNER WITHIN 48 HOURS OF PICK-UP OF VEHICLE.** The owner shall not be charged for storage for any days between 48 hours and the actual time of mailing of notification.
4. A release report, along with the administration fees collected, shall be submitted once each month to the Records Supervisor, and a copy submitted to the Police Department Designee.
5. Contractor shall copy the Contract Manager on any correspondence with the vehicle owner.

2.27 ANNUAL PERFORMANCE REVIEW, INSPECTIONS AND AUDITS
The City may conduct an annual performance review of the proposer. Criteria to be evaluated will consist of, but not be limited to, response times, complaints received, care and custody of vehicles and owners' possessions, condition of facilities and equipment, extent and clarity of records, and conduct of management and personnel. Such a review will be conducted ninety (90) days prior to the contract anniversary date and proposer will be provided a written copy of the review. Within thirty (30) days of the sending of the review, Contractor shall respond to the review in writing, and the parties shall meet to discuss the review and other pertinent subjects. A final report that will consist of the review,

proposer's written response, and a summary of the annual review meeting will be prepared by City staff with a copy sent to the City Manager and proposer. The proposer agrees that all records, equipment, personnel, office and storage facilities shall be subject to periodic checks and quarterly audits by representatives of the City without prior notice.

2.28 CRIME VICTIMS EXEMPTION

If the towed vehicle is determined by the Police Department's Police Legal Unit to be a crime scene and is being held for processing, no towing or storage charges shall be charged to the vehicle's owner.

2.29 ABANDONED AND DERELICT VEHICLES

The proposer may dispose of equipment to compensate for towing and storage charges after all responsibilities called for in accordance with Florida Statutes. The proposer agrees to maintain a log at the place of business listing date, time, and method of notification.

2.30 NON-EXCLUSIVE SERVICES

Nothing contained in this contract will prevent the owner or operator of a motor vehicle from calling a wrecker or tow truck of their choice or requesting that their vehicle be towed to a garage location or compound of his/her choice and not that of the City's proposer (s) for Towing Services, unless the disabled vehicle cannot be removed in forty-five (45) minutes or less is creating a tie up of traffic or hazardous situation, in the opinion of the officer at the scene.

2.31 SPECIAL CONDITIONS

2.31.1 MINIMUM QUALIFICATIONS

Respondents shall meet the qualifications as follows, to include but not be limited to the following:

1. To be eligible to provide towing services for the City, firms must maintain an office and adequate storage facility located in the City of Opa-locka or within a ten (10) mile radius of the City of Opa-locka (refer to Attachment "A" for boundary map). Location shall be properly identified by signs on the exterior of the structure, i.e., visible from the adjacent access road.
2. Respondents must demonstrate that they have successfully completed services like those specified herein.
3. Respondents must be regularly engaged in the towing business, be fully licensed to perform the work described herein, have prior successful experience in providing similar services during the past five (5) years, have satisfactory financial support, required equipment, staff, and organization sufficient to ensure that they can satisfactorily provide the services if awarded an exclusive service agreement.
4. Successful contractor shall not have any pending criminal or administrative charges against the firm, principal owners, partners, corporate officers, or management employees.
5. Twenty-four-hour service for release of towed vehicles shall be available.
6. Ability to always provide two (2) operators on duty to avoid delays and be able to respond to scene within forty-five (45) minutes.
7. Ability to ALWAYS accept at least three (3) forms of payment from customers.

2.31.2 COMPENSATION
In full consideration of the services of the Respondent hereunder, the Respondent shall pay on each and every vehicle towed within the City of Opa-locka, at the request of the City, an administrative charge in accordance with the Miami-Dade County Maximum Non-Consent Tow Rates (Refer to Attachment "B.") The administrative fee shall be paid automatically to the City on a monthly basis by the twentieth (20th) of the following month together with the list of tows. Failure to pay as provided for shall result in an interest penalty of 1.5% per month.

2.31.3 CITIZENS TOWING BILL OF RIGHTS
Awarded Respondents shall have the City of Opa-locka Citizen's Towing Bill of Rights (the "COMS Bill of Rights") posted inside of all service vehicles assigned to the City as well as at the pick-up office window, refer to Attachment "C". This informational sheet shall include but not be limited to all tow rates, methods of payments, and complaint contact information and shall be available in English, Spanish and Creole. The final COMS Bill of Rights to be posted will be approved in advance by the City Manager. Any change to the approved COMS Bill of Rights shall also require the prior written approval of the City Manager or designee.

2.31.4 PROHIBITION AGAINST OTHER BUSINESSES
Successful respondent(s) shall not engage directly or indirectly or through a subsidiary or other entity in the automobile paint and body repair business or salvage, junkyard or auto recycling. Further, the proposer shall not undertake any repairs to, or remove any part or parts from, any vehicle towed or stored pursuant to the provisions herein. Respondent also agrees that during the term of the agreement, contractor shall have no financial ties to a body shop/auto repair shop and will not accept any compensation for referral work on towed vehicles. The respondent agrees to refrain from soliciting any referrals from any auto body and/or repair facilities.

2.31.5 MATERIALS, INSPECTION, AND RESPONSIBILITY
The City shall have a right to inspect any vehicles/equipment/material to be used in carrying out this contract. The City does not assume any responsibility for the availability of any controlled materials or other materials and equipment required under this contract.

2.31.6 SUPERVISION
The respondent shall be responsible for their employees and Subcontractors, and for compliance with all laws and ordinances governing the work. Respondent shall always have a competent representative available to answer questions or handle problems, who shall be satisfactory to the City.

2.31.7 PROTECTION OF PROPERTY
The respondent shall take extra precaution to protect all property while conducting services. Any damage done by the respondent shall be corrected to its original or better state and shall be corrected to the satisfaction of the Contract Manager or designee.

2.31.8 PERSONNEL
The respondent shall provide a list of names, complete with Driver's Licenses of all respondent's personnel and subcontractors' personnel who will require access to the Police Department, along with a description of vehicles used, including license numbers. Respondent's personnel shall carry photo identification, commercial driver's license, and show same to City personnel at any time upon request.

The City reserves the right to request the same of Subcontractors. All workers shall, always, wear a company shirt or badge identifying the company name and individual's name. All vehicles shall have the company logo visible on the outside of the vehicle.

2.31.9 SUBCONTRACTORS AND ACCOUNT MANAGERS

Subcontractors shall not be utilized on a regular basis but on occasion and in the event of an emergency wherein the Contractor may be unable to fulfill the response time requirement due to extenuating circumstances. The City of Opa-locka shall approve all subcontractors used to respond to calls for service. The Contractor is fully responsible to the City for the acts and omissions of his subcontractors and of persons either directly or indirectly employed by said subcontractor.

Nothing contained in the Contract Documents shall create any contractual relations between any subcontractor and the City. Subcontractor shall follow the scope of services as stated herein and shall not charge City for any tows. Prior to any Subcontractor's response to City calls for service, the Contractor shall obtain written approval of the subcontractors used within the terms of this contract and shall submit for approval to the Police Department and the Procurement Division Certificates of Insurance. Subcontractors shall maintain the types of limits of insurance as required of the Contractor. A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the services covered by these specifications.

The Contractor shall furnish in writing to the City the names of the Subcontractors to be utilized on an emergency basis. The Contractor shall not contract with any Subcontractor to whom the City has made reasonable and timely objection. City shall have the right to approve all subcontractors, Account Manager, and staff assigned to City by Contractor. City shall have the right to approve all subcontractors, Account Manager, and staff assigned to City by Contractor. The Contractor, before making any subcontract for any portion of the services, will state in writing to the City the name of the proposed subcontractor, the portion of the Services which the subcontractor is to do, the place of business of such subcontractor, and such other information as the City may require.

The City will have the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved by the City. Before entering any subcontract hereunder, the Contractor will inform the subcontractor fully and completely of all provisions and requirements of the Agreement relating either directly or indirectly to the Services to be performed. Such Services performed by such subcontractor will strictly comply with the requirements of this Contract. The City may elect to have the selected Consultant(s) provide all of these services, some of the services, or none of these services. The selected Consultant(s) is/are not guaranteed any work by the City under this solicitation. All projects will be coordinated with the City Manager and/or the Police Department.

PART III

PROPOSAL REQUIREMENTS

3-1 RULES FOR PROPOSALS

In order to maintain comparability and enhance the review process, proposals shall be organized in the manner specified below and include all information required herein. The proposal must name all persons or entities interested in the proposal as principals. The proposal must declare that it is made without collusion with any other person or entity submitting a proposal pursuant to this RFP.

3-2 SUBMISSION OF PROPOSALS

The proposal shall be submitted on 8 ½ "x 11" paper, portrait orientation, with headings and sections numbered appropriately. Ensure that all information is written legibly or typed. The following should be submitted for a proposing firm to be considered:

3.2.1 Cover Page - Show the name of Proposer's agency/firm, address, telephone number, name of contact person, date, and the proposal number and description.

3.2.2 Tab 1 - Table of Contents
Include a clear identification of the material by section and by page number.

3.2.3 Tab 2 - Letter of Transmittal

3.2.3.1 Limit to one or two pages.
3.2.3.2 Briefly state the Proposer's understanding of the work to be done and make a positive commitment to perform the work.
3.2.3.3 Give the names of the persons who will be authorized to make representations for the Proposer, their titles, addresses and telephone numbers.
3.2.3.4 Provide an official signature of a Corporate Officer certifying the contents of the Proposer's responses to the City's Request for Proposal.

3.2.4 Tab 3 - General Information

3.2.4.1 Name of Business.
3.2.4.2 Mailing Address and Phone Number.
3.2.4.3 Names and contact information of persons to be contacted for information or services if different from name of person in charge.
3.2.4.4 Normal business hours.
3.2.4.5 State if business is local, national, or international and indicate the business legal status (corporation, partnership, etc.).
3.2.4.6 Give the date business was organized and/or incorporated, and where.
3.2.4.7 Give the location of the office from which the work is to be done and the number of professional staff employees at that office.
3.2.4.8 Indicate whether the business is a parent or subsidiary in a group of firms/agencies. If it is, please state the name of the parent company.
3.2.4.9 State if the business is licensed, permitted and/or certified to do business in the State of Florida and attach copies of all such licenses issued to the business entity.

3.2.5 Tab 4 – Project Approach
Describe in detail the proposal to fulfill the requirements of the scope of services listed in section 2.2 of this RFP.

3.2.6 Tab 5 – Experience and Qualifications

3.2.6.1 Specify the number of years the Proposer has been in business.

3.2.6.2 Identify the Proposer's qualifications to perform the services identified in this RFP as listed in section 2-2 of the Scope of Services.

Include resumes, not exceeding one page each, of all key personnel who will be assigned to the City for this project.

3.2.7 Tab 6 – Schedule

3.2.7.1 Include a timetable that identifies the amount of time required to complete each component of the Program.

3.2.7.2 Indicate the earliest available start date for Proposer's project team.

3.2.7.3 Indicate the project completion date based on the date provided in 3.2.7.1.

3.2.8 Tab 7 – Pricing of Services

3.2.8.1 Fee basis should be an all-inclusive, base fee.

3.2.9 Tab 8 – References

3.2.9.1 List a minimum of three (3) references in Florida for which the Proposer has provided towing services. Include the name of the organization, brief description of the project, name of contact person telephone number and email address.

3.2.10 Tab 9 – Additional Forms

Proposers must complete and submit as part of its Proposal all the following forms and/or documents.

- Proposer Qualifications
- Certification regarding debarment and suspension
- Drug Free workplace certification
- E-Verification

FAILURE TO SUBMIT ALL OF THE ABOVE REQUIRED DOCUMENTATION MAY DISQUALIFY PROPOSER.

PART IV

EVALUATION OF PROPOSALS

4-1 SELECTION COMMITTEE

A Selection Committee, consisting of City personnel, will convene, review and discuss all proposals submitted.

The Selection Committee will use a point formula during the review process to score proposals and assign points in the evaluation process in accordance with the evaluation criteria. The Proposer shall satisfy and explicitly respond to all the requirements of the RFP, including a detailed explanation of how the services shall be performed.

Each proposal will be reviewed to determine if the Proposal is responsive to the submission requirements outlined in the Solicitation. A responsive Proposal is one which follows the requirements of this Solicitation that includes all documents submitted in the format outlined in this Solicitation, is of timely submission, and has the appropriate signatures as required on each document. Failure to comply with these requirements may result in the Proposal being deemed non-responsive. The Contract (s) will be awarded to the most responsive Proposer whose Proposal best serves the interest of and represents the best value to the City of Opa-locka.

4-2 EVALUATION CRITERIA

The Committee may select and choose to invite any and/or or all firms to make presentations and be interviewed by the Committee as part of the evaluation process for this Solicitation. The Committee's decision will be communicated by staff to all Proposers. The Proposer's presentation may clarify but may not modify their submitted Proposal. Any discussion between the presenter (s) and Evaluation Committee during presentations are intended only for purposes of providing clarification in response to questions from the Committee.

Category	Points
Qualifications/Experience and Past Performance of the Firm/Respondent 1. To include years of municipal experience, ability, capacity, and skill of firm(s), whether the firm is a certified minority business enterprise, and adequacy of personnel to perform, including timeliness, stability and availability and licenses. 2. To be eligible to respond, the Consultant shall have five (5) years of continuous operation under the same entity name and provide proof of same. 3. To be eligible to respond, the Consultant shall have five (5) years of continuous operation under the same entity name and provide proof of same.	30
Qualifications/Experience of the Project Team 1. Professional credentials, qualifications, and accomplishments of the proposed team members to be used for City Projects.	20
References 1. Performance of similar services for governmental clients including at least three references.	20
Towing Equipment and Facilities 1. Proof of towing equipment and facilities in accordance with Section 2.	20
Price Proposal 1. Cost of proposed services	10
TOTAL	100

4-3 ORAL PRESENTATIONS

Proposers may be required to make individual presentations to the City Selection Committee in order to clarify their proposals. Only those firms with the highest rated scores in accordance with the stated criteria and their weights will be invited to give oral presentations. However, the City has the right to accept the best proposal as submitted, without discussion or negotiation.

If the City determines that such presentations are needed, a time and place will be scheduled for oral presentations. Each Proposer shall be prepared to discuss and substantiate any of the areas of the proposal submitted, and its qualifications to perform the specified services. During the oral presentations, the Proposers should relate their discussion to the evaluation criteria, which will include (but not be limited to) their approach to the project. The proposed Project Manager must be in attendance.

The Evaluation Criteria may be changed for the oral presentation evaluation phase. References and site visits (if completed) shall be included in the final evaluation criteria, along with other criteria and weights as determined by the Selection Committee. Finalists will be informed as to the revised criteria, if any, prior to their oral presentation.

Additionally, prior to award of an Agreement pursuant to this RFP, the City may require Proposers to submit such additional information bearing upon the Proposer's ability to perform the services in the Agreement as the City deems appropriate.

4-4 FINAL SELECTION

The City of Opa-locka will select the firm that meets the best interests of the City. The City shall be the sole judge of its own best interests, the proposals, and the resulting negotiated Agreement. The City's decisions will be final. Following the notification of the selected firm, it is expected that an Agreement will be executed between both parties. City staff will recommend award to the responsible Proposer whose Proposal is determined to provide overall best value to the City, considering the evaluation factors in this RFP.

4-5 AWARD AND CONTRACT EXECUTION

After review by the Selection Committee of the proposals and oral presentations a recommendation will be made to the City Manager for submission to the City Commission for final approval. Upon Commission authorization, contract negotiations will be initiated with the first ranked firm. If those negotiations are unsuccessful, the City will formally terminate negotiations with the first ranked firm and will commence contract negotiations with the next ranked firm, etc. Upon successful contract negotiations with the prevailing firm, the remaining firms will be notified that the process has been completed and that they were not selected.

RFP NO. 23-1019200
PROPOSER QUALIFICATIONS

The Proposer, as a result of this proposal, MUST hold a County and/or Municipal Contractor's Occupational License in the area of their fixed business location. The following information MUST be completed and submitted with the proposal to be considered:

1. Legal Name and Address:

   Name: _____

   Address: _____

   City, State, Zip:_____Phone/Fax: _____

2. Check One: Corporation ( ) Partnership ( ) Individual ( )

3. If Corporation, indicate:
   Date of Incorporation: _____ State in which Incorporated: _____

4. If an out-of-state Corporation, currently authorized to do business in Florida, give date of such authorization:_____

8. Provide a list of at least three commercial or government references that the bidder has supplied service/commodities meeting the requirements of the City of Opa-locka RFP during the last twenty-four months.

9. A copy of County and/or Municipal Occupational License(s)

Note: *Information requested herein and submitted by the Proposers will be analyzed by the City of Opa-locka and will be a factor considered in awarding any resulting contract. The purpose is to insure that the Contractors, in the sole opinion of the City of Opa-locka, can sufficiently and efficiently perform all the required services in a timely and satisfactory manner as will be required by the subject contract. If there are any terms and/or conditions that are in conflict, the most stringent requirement shall apply.*

RFP NO: 23-1019200

PRICE PROPOSAL FORM

If Proposer fees will be paid by City, Proposer understands and agrees that the Contract Price is the lump sum to furnish and install all of the Work complete in place. Vendor's price will not be adjusted unless the City changes the scope of the Project after the Contract Date.

As such, the Vendor shall furnish all labor, materials, equipment, tools, supervision and services necessary to provide a complete, in place Project for the Proposed Price of:

LUMP SUM PRICE: $_____

SUBMITTED THIS _____ DAY OF _____ 2023.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION PROPOSED DEBARMENT AND OTHER MATTERS OF RESPONSIBILITY

1. The Proposer certifies, to the best of its knowledge and belief, that the Proposer and/or any of its Principals:

A. Are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency.

B. Have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, or receiving stolen property; and

C. Are not presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph 1-B of this provision.

2. The Proposer has not, within a three-year period preceding this offer, had one or more contracts terminated for default by any City, State or Federal agency.

A. "Principals," for the purposes of this certification, means officers; directors; owners; partners; and persons having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment, and similar positions). This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

B. The Proposer shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Proposer learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

C. A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Proposer's responsibility. Failure of the Proposer to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Proposer non-responsive.

D. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph. (a) of this provision. The knowledge and information of a Proposer is not required to exceed

that which is normally possessed by a prudent person in the ordinary course of business dealings.

E. The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Proposer knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

AS THE PERSON AUTHORIZED TO SIGN THE STATEMENT, I CERTIFY THAT THIS FIRM COMPLIES FULLY WITH THE ABOVE REQUIREMENTS.

CITY OF OPA-LOCKA
RFP NO. 23-1019200

DRUG-FREE WORKPLACE CERTIFICATION FORM

Whenever two (2) or more bids/proposals, which are equal with respect to price, quality, and service, are received by the CITY OF OPA-LOCKA for the procurement of commodities or contractual services, a bid/proposal received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. In order to have a drug-free workplace program, a business shall:

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of controlled substances is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.
3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in number (1).
4. In the statement specified in number (1), notify the employees that as a condition for working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction on or plea of guilty or no contest to any violation of Chapter 893, Florida Statutes or of any controlled substance law of the United States or any singular state, for a violation occurring in the workplace no later than five (5) days after such conviction.
5. Impose a sanction on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community by any employee who is so convicted.
6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of Section 287.087, Florida Statutes.

This Certification is submitted by_____the
(Name)
_____ of_____
(Title/Position) (Company)

who does hereby certify that said Company has implemented a drug-free workplace program, which meets the requirements of Section 287.087, Florida Statutes, which are identified in numbers (1) through (6) above.

E-VERIFY

Effective January 1, 2021, public and private employers, contractors and subcontractors will be required to register with, and use of the E-Verify system in order to verify the work authorization status of all newly hired employees. Vendor/Consultant/Contractor acknowledges and agrees to utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

a) All persons employed by Vendor/Consultant/Contractor to perform employment duties within Florida during the term of the contract; and

b) All persons (including sub-vendors/sub-consultants/sub-contractors) assigned by Vendor /Consultant/ Contractor to perform work pursuant to the contract with the Department. The Vendor /Consultant/ Contractor acknowledges and agrees that use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City; and

By entering into a Contract, the Contractor becomes obligated to comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes but is not limited to utilization of the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. If t contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of 1 year after the date of termination. The Contractor acknowledges it is liable to the City for any additional costs as a result of termination of the contract due to Contractor's failure to comply with the provisions herein.

E-VERIFY FORM

Definitions:

"Contractor" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for salary, wages, or other remuneration.

"Subcontractor" means a person or entity that provides labor, supplies, or services to or for a contractor or another subcontractor in exchange for salary, wages, or other remuneration.

Effective January 1, 2021, public and private employers, contractors and subcontractors will begin required registration with, and use of the E-Verify system in order to verify the work authorization status of all newly hired employees. Vendor/Consultant/Contractor acknowledges and agrees to utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

a) All persons employed by Vendor/Consultant/Contractor to perform employment duties within Florida during the term of the contract; and

b) All persons (including sub-vendors/subconsultants/subcontractors) assigned by Vendor/Consultant/Contractor to perform work pursuant to the contract with the Department. The Vendor/Consultant/Contractor acknowledges and agrees that use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City of Opa-locka; and

Should vendor become successful Contractor awarded for the above-named project, by entering into this Contract, the Contractor becomes obligated to comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes but is not limited to utilization of the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. If this contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of 1 year after the date of termination.

Sponsored by: Interim City Manager

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE INTERIM CITY MANAGER TO PIGGYBACK THE OMNIA PARTNERS COOPERATIVE PURCHASING AGREEMENT WITH AFFORDABLE INTERIOR SYSTEMS, INC., IN AN AMOUNT NOT TO EXCEED SIXTY-ONE THOUSAND THREE HUNDRED THIRTY-SIX DOLLARS AND FORTY-FIVE CENTS ($61,336.45) TO FURNISH THE POLICE DEPARTMENT; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, there are various areas within in the current City of Opa=Locka ("City") Police Department that require furniture replacement; and

WHEREAS, the Interim City Manager is requesting approval to piggyback the Omnia Cooperative Contract with Affordable Interior Systems, Inc. for furniture for the Opa-Locka Police Department; and

WHEREAS, the contract piggyback will be used to purchase tables, desks, office chairs, workstations and seating for the lobby area of the police department. The proposed expenditure is Sixty-One Thousand Three Hundred Thirty-Six Dollars and Forty-Five Cents ($61,336.45); and

WHEREAS, this proposed contract is based on a competitively bid contract by Region 4 Education Service Center (ESC), Houston, which serves 47 public school districts and 40 public charter schools in Texas. This is made available through the National Intergovernmental Purchasing Alliance (National IPA) cooperative purchasing organization, which makes these agreements available to the education and public sectors. The parent organization is OMNIA Partners and the contract is one of approximately 400 competitive contracts available to these sectors; and

WHEREAS, National IPA (a/k/a OMNIA Partners, Public Sector) is "the nation's largest and most experienced cooperative purchasing organization for the public sector." Their purchasing power and suppliers have produced an extensive portfolio of cooperative contracts and partnerships, making OMNIA Partners "the most valued and trusted resource for organizations nationwide"; and

WHEREAS, all contracts in National IPA's portfolio are competitively solicited and publicly awarded by a lead agency (government entity/educational institution), using a competitive solicitation process consistent with applicable procurement laws and regulations. Region 4 Education Service Center ("Region 4 ESC"), one of National IPA's lead agencies, was established in 1967 by the State of Texas under Chapter 8 of the Texas Education Code; and

WHEREAS, Region 4 Education Service Center/National IPA considered the bid submitted by Affordable Interior Systems, Inc. ("Contractor") on December 11, 2019 in response to its RFP# 19-18; and

WHEREAS, the Region 4 Education Service Center has awarded Affordable Interior Systems, Inc. a contract (Contract #R191801) to provide Furniture, Installation and Related Services. The agreement is available to thousands of government agencies nationwide through OMNIA/National IPA Partners; and

WHEREAS, on April 28, 2020, National IPA awarded Affordable Interior Systems, Inc. a contract for Furniture, Installation and Related Services (attached hereto as Exhibit "A"). The contract became effective May 1, 2020 and was set to expire on April 30, 2023. On October 24, 2023, the contract was renewed with a new expiration date of April 30, 2025; and

WHEREAS, pursuant to Section 2-318 (3) of the City's Purchasing Code allows for purchases and acquisitions under contracts of the federal government, the State of Florida or its political subdivisions and also municipal co-operative purchasing organizations and programs. The City Manager has determined that the prices of the original contract are competitive and reasonable; and

WHEREAS, the City Commission finds that it is in the best interests of the City to piggyback on the Region 4 Education Service Center/National IPA contract with Affordable Interior Systems, Inc., in order to benefit from already negotiated rates and enter into an agreement to furnish the Police Department, in an amount not to exceed Sixty-One Thousand Three Hundred Thirty-Six Dollars and Forty-Five Cents ($61,336.45).

NOW, THEREFORE, BE IT DULY RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA:

Section 1. Adoption of Representations. The above recitals are true and correct and are incorporated into this Resolution by reference.

Section 2. Authorization. The City Commission hereby authorizes a piggyback of the Region 4 ESC/National Intergovernmental Purchasing Alliance (National IPA) / Omnia Partners Contract # R191801 with Affordable Interior Systems, Inc. for qualified professional services to furnish the Police Department, in an amount not to exceed Sixty-One Thousand Three Hundred Thirty-Six Dollars and Forty-Five Cents ($61,336.45).

Section 3. **Scrivener's Errors**. Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager following review by the City Attorney and without need of public hearing, by filing a corrected copy of same with the City.

Section 4. **Effective Date.**
This Resolution shall take effect immediately upon adoption and is subject to the approval of the Governor or his designee.

PASSED and **ADOPTED** this _____ day of _____, 2024.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the Interim City Manager to piggyback the Omnia Cooperative Contract with Affordable Interior Systems, Inc. to purchase furniture for the Opa-Locka Police Department.

Staff Summary:

The City of Opa-locka Police Department is anticipated to be completed within the next sixty (60) days and staff will immediately begin to transition into the station. However, there are various areas in the current Police Department that requires furniture to be replaced. The Interim City Manager is requesting approval to piggyback Omnia Cooperative Contract with Affordable Interior Systems, Inc. for furniture for the Opa-Locka

DocuSign Envelope ID: 9468528A-6602-4F18-BC06-F5EFB2E96BB2

Police Department. The contract will be used to purchase tables, desks, office chairs, workstations and seating for lobby area. The proposed expenditure is $61,336.45.

Financial Impact: This furniture will be funded by Police Department – Office Furniture & Equipment, Account 26-521642, which is being increased by $83,000 in the FY 24 Budget Amendment #1.

Proposed Action:

Staff recommends the City Commission authorizes the Interim City Manager to piggyback the Omnia Cooperative Contract with Affordable Interior Systems, Inc. to purchase furniture for the Opa-Locka Police Department.

FURNITURE, INSTALLATION AND RELATED SERVICES
Executive Summary

Lead Agency: Region 4 ESC

Solicitation: 19-18

RFP Issued: November 7, 2019

Pre-Proposal Date: November 21, 2019

Response Due Date: December 11, 2020

Proposals Received: #44

Awarded to: Affordable Interior Systems, Inc. (AIS) – R191801

The Board of Directors of Region 4 Education Service Center (ESC) issued RFP 19-18 on November 7, 2019, to establish a national cooperative contract for Furniture, Installation and Related Services.

The solicitation included cooperative purchasing language in Sections I. Scope of Work:

NATIONAL CONTRACT

> *Region 4 Education Service Center, as the Principal Procurement Agency, defined in Appendix D, has partnered with OMNIA Partners to make the resultant contract (also known as the "Master Agreement" in materials distributed by OMNIA Partners) from this solicitation available to other public agencies nationally, including state and local governmental entities, public and private primary, secondary and higher education entities, non-profit entities, and agencies for the public benefit ("Public Agencies"), through OMNIA Partners' cooperative purchasing program. Region 4 ESC is acting as the contracting agency for any other Public Agency that elects to utilize the resulting Master Agreement. Use of the Master Agreement by any Public Agency is preceded by their registration with OMNIA Partners (a "Participating Public Agency"). Appendix D contains additional information about OMNIA Partners and the cooperative purchasing agreement.*

Notice of the solicitation was sent to potential offerors, as well as advertised in the following:

- Region 4 ESC website
- OMNIA Partners, Public Sector website
- USA Today, nationwide
- Arizona Business Gazette, AZ
- San Bernardino Sun, CA
- Honolulu Star-Advertiser, HI
- The Advocate – New Orleans, LA
- New Jersey Herald, NJ
- Times Union, NY
- Daily Journal of Commerce, OR
- The State, SC
- Houston Community Newspapers, Cy Creek Mirror, TX
- Deseret News, UT
- Richmond Times, VA
- Seattle Daily Journal of Commerce, WA
- Helena Independent Record, MT

On January 8, 2020 proposals were received from the following offerors:

- 9to5 Seating LLC
- Affordable Interior Systems, Inc. (AIS)
- Allsteel Inc.
- Alumni Classroom Furniture Inc.
- AmTab Manufacturing Corporation
- Artcobell Corporation
- Bush Industries, Inc.
- ELB US Inc.
- ASSA Group, Inc. dba Enwork
- EPIC Business Essentials
- Exemplis LLC
- GMi Companies
- Haskell Office, LLC
- The HON Company LLC
- Indiana Furniture Industries, Inc.
- Irwin Seating Company
- Jasper Group (Jasper Seating Company, Inc.)
- Kaplan Early Learning Company
- Krueger International, Inc.
- Kwalu LLC
- LIAT, LLC
- Maxon Furniture Inc.
- Metalworks, Inc. – Great Openings
- MeTEOR Education, LLC.
- National Business Furniture, LLC
- National Office Furniture, Inc.
- NPS Public Furniture Corp
- NorvaNivel USA LP
- Office Depot, Inc.
- OFS Brands Inc.
- Origin US LLC
- Paragon Furniture, Inc.
- PS Furniture Inc.

- RT London
- Safco Products Co.
- School Specialty, Inc.
- SICO America, Inc.
- Spec Furniture Inc
- Special-T, LLC
- Teknion LLC
- Trendway Corporation
- VS America, Inc.
- WB Manufacturing

The proposals were evaluated by an evaluation committee. Using the evaluation criteria established in the RFP, the committee determined that eighteen (18) companies - Affordable Interior Systems, Inc. (AIS) Allsteel Inc., AM Tab Manufacturing Corporation, Exemplis LLC, The HON Company LLC, Irwin Seating Company, Jasper Group (Jasper Seating Company, Inc.), Kaplan Early Learning Company, Krueger International, Inc., Maxon Furniture Inc., Metalworks, Inc. – Great Openings, MeTEOR Education, LLC, National Office Furniture, Inc., NorvaNivel USA LP, Office Depot, Inc., OFS Brands Inc., Safco Products Co., School Specialty, Inc. Teknion LLC Trendway Corporation, VS America, Inc. - all demonstrated the ability to provide the services outlined in the solicitation while offering competitive pricing to members.

Region 4 ESC executed agreements with a contract effective date of May 1, 2020.

Contract includes:

- Systems, Beams/Blenching, Casegoods, Tables & Universal and Seating
- Products include freight to all locations within the US including Alaska and Hawaii
- Delivery and Installation will be quoted on a per project basis and subject to the same variations as inside delivery areas

Term:

Initial three-year agreement from May 1, 2020 through April 30, 2023 with the option to renew for two (2) additional one-year periods through April 30, 2025.

Pricing/Discount: Discount off List Price

Re: Renewal Award of Contract #R191801

Dear Mr. Poist:

Per official action taken by the Board of Directors of Region 4 Education Service Center on October 24, 2023, Region 4 ESC is pleased to announce that Affordable Interior Systems, Inc. (AIS) has been awarded an annual contract renewal for the following, based on the sealed proposal submitted to Region 4 on December 11, 2019, and subsequent performance thereafter:

Contract

Furniture, Installation and Related Services

The contract will expire on April 30, 2025, completing the fifth year of a five-year term contract. The contract is available through OMNIA Partners, Public Sector. Your designated OMNIA Partners, Public Sector contact is Christine Dorantes, at (615) 431-8182 or christine.dorantes@omniapartners.com.

The partnership between Affordable Interior Systems, Inc. (AIS), Region 4 and OMNIA Partners, Public Sector can be of great help to participating agencies. Please provide copies of this letter to your sales representative(s) to assist in their daily course of business.

Sincerely,

- School Specialty, Inc.
- SICO America, Inc.
- Spec Furniture Inc
- Special-T, LLC
- Teknion LLC
- Trendway Corporation
- VS America, Inc.
- WB Manufacturing

The recommended vendors submitted offers that were determined to be most advantageous to OMNIA Partners, Public Sector members, based upon the bid tabulation. All the recommended respondents were determined to be competitively priced and strong for the specified services outlined in the RFP.

We believe all recommended vendors demonstrate the ability to provide and perform the services requested in the proposal. We will monitor their performance and determine at the end of each year if they are eligible for renewal with each new term.

This multiple award is recommended as most advantageous as it limits contract awards to the least number of suppliers necessary to meet the requirements of OMNIA Partners, Public Sector members. In order to serve the entire nation, a multiple award is recommended to provide any governmental agency with complete coverage of commodities, services and any other offering within the scope of proposal.

Please let me know if you have any questions.

Re: Award of Contract #R191801

Dear Mr. Poist:

Per official action taken by the Board of Directors of Region 4 Education Service Center on April 28, 2020, we are pleased to announce that after successful negotiated terms and conditions, Affordable Interior Systems, Inc. (AIS) has been awarded an annual contract for the following, based on the sealed proposal (RFP#19-18) submitted on December 11, 2019:

Commodity/Service	**Supplier**
Furniture, Installation and Related Services	Affordable Interior Systems, Inc. (AIS)

This contract is effective May 1, 2020 and will expire on April 30, 2023. As indicated above, your contract # is R191801. This contract may be renewed annually for an additional two (2) years if mutually agreed upon by Region 4 ESC/OMNIA Partners, Public Sector and Affordable Interior Systems, Inc. (AIS).

Your participation in the proposal process is appreciated and we look forward to a successful partnership. Please feel free to provide copies of this letter to your sales representative(s) to assist in their daily course of business.

If you have any questions, please contact Christine Dorantes, the Contract Manager assigned to your contract, at (615) 431-8182 or christine.dorantes@omniapartners.com.

Sincerely,

DocuSigned by:

Region 4 Education Service Center (ESC)

Contract # R191801

for

Furniture, Installation and Related Services

with

Affordable Interior Systems, Inc.

Effective: May 1, 2020

The following documents comprise the executed contract between the Region 4 Education Service Center and Affordable Interior Systems, Inc. effective May 1, 2020:

I. Vendor Contract and Signature Form
II. Supplier's Response to the RFP, incorporated by reference

APPENDIX A

CONTRACT

This Contract ("Contract") is made as of April 28 *, 2020 by and between* Affordable Interior Systems, Inc. (AIS) *("Contractor") and Region 4 Education Service Center ("Region 4 ESC") for the purchase of Furniture, Installation, and Related Services ("the products and services").*

RECITALS

WHEREAS, Region 4 ESC issued Request for Proposals Number RFP #19-18 for Furniture, Installation, and Related Services ("RFP"), to which Contractor provided a response ("Proposal"); and
WHEREAS, Region 4 ESC selected Contractor's Proposal and wishes to engage Contractor in providing the services/materials described in the RFP and Proposal;

WHEREAS, both parties agree and understand the following pages will constitute the Contract between the Contractor and Region 4 ESC, having its principal place of business at 7145 West Tidwell Road, Houston, TX 77092.

WHEREAS, Contractor included, in writing, any required exceptions or deviations from these terms, conditions, and specifications; and it is further understood that, if agreed to by Region 4 ESC, said exceptions or deviations are incorporated into the Contract.

WHEREAS, this Contract consists of the provisions set forth below, including provisions of all attachments referenced herein. In the event of a conflict between the provisions set forth below and those contained in any attachment, the provisions set forth below shall control.

WHEREAS, the Contract will provide that any state and local governmental entities, public and private primary, secondary and higher education entities, non-profit entities, and agencies for the public benefit ("Public Agencies") may purchase products and services at prices indicated in the Contract upon the Public Agency's registration with OMNIA Partners.

1) Term of agreement. The term of the Contract is for a period of three (3) years unless terminated, canceled or extended as otherwise provided herein. Region 4 ESC shall have the right to renew the Contract for two (2) additional one-year periods or portions thereof. Region 4 ESC shall review the Contract prior to the renewal date and notify the Contractor of Region 4 ESC's intent renew the Contract. Contractor may elect not to renew by providing three hundred sixty-five days' (365) notice to Region 4 ESC. Notwithstanding the expiration of the initial term or any subsequent term or all renewal options, Region 4 ESC and Contractor may mutually agree to extend the term of this Agreement. Contractor acknowledges and understands Region 4 ESC is under no obligation whatsoever to extend the term of this Agreement.

2) Scope: Contractor shall perform all duties, responsibilities and obligations, set forth in this agreement, and described in the RFP, incorporated herein by reference as though fully set forth herein.

3) Form of Contract. The form of Contract shall be the RFP, the Offeror's proposal and Best and Final Offer(s).

4) Order of Precedence. In the event of a conflict in the provisions of the Contract as accepted by Region 4 ESC, the following order of precedence shall prevail:

   i. This Contract
   ii. Offeror's Best and Final Offer
   iii. Offeror's proposal
   iv. RFP and any addenda

5) Commencement of Work. The Contractor is cautioned not to commence any billable work or provide any material or service under this Contract until Contractor receives a purchase order for such work or is otherwise directed to do so in writing by Region 4 ESC.

6) Entire Agreement (Parol evidence). The Contract, as specified above, represents the final written expression of agreement. All agreements are contained herein and no other agreements or representations that materially alter it are acceptable.

7) Assignment of Contract. No assignment of Contract may be made without the prior written approval of Region 4 ESC. Contractor is required to notify Region 4 ESC when any material change in operations is made (i.e. bankruptcy, change of ownership, merger, etc.).

8) Novation. If Contractor sells or transfers all assets or the entire portion of the assets used to perform this Contract, a successor in interest must guarantee to perform all obligations under this Contract. Region 4 ESC reserves the right to accept or reject any new party. A change of name agreement will not change the contractual obligations of Contractor.

9) Contract Alterations. No alterations to the terms of this Contract shall be valid or binding unless authorized and signed by Region 4 ESC.

10) Adding Authorized Distributors/Dealers. Contractor is prohibited from authorizing additional distributors or dealers, other than those identified at the time of submitting their proposal, to sell under the Contract without notification and prior written approval from Region 4 ESC. Contractor must notify Region 4 ESC each time it wishes to add an authorized distributor or dealer. Purchase orders and payment can only be made to the Contractor unless otherwise approved by Region 4 ESC. Pricing provided to members by added distributors or dealers must also be less than or equal to the Contractor's pricing.

11) TERMINATION OF CONTRACT

   a) Cancellation for Non-Performance or Contractor Deficiency. Region 4 ESC may terminate the Contract if purchase volume is determined to be low volume in any 12-month period. Region 4 ESC reserves the right to cancel the whole or any part of this Contract due to failure by Contractor to carry out any obligation, term or condition of the contract. Region 4 ESC may issue a written deficiency notice to Contractor for acting or failing to act in any of the following:

      i. Providing material that does not meet the specifications of the Contract;
      ii. Providing work or material was not awarded under the Contract;
      iii. Failing to adequately perform the services set forth in the scope of work and specifications;

iv. Failing to complete required work or furnish required materials within a reasonable amount of time;
v. Failing to make progress in performance of the Contract or giving Region 4 ESC reason to believe Contractor will not or cannot perform the requirements of the Contract; or
vi. Performing work or providing services under the Contract prior to receiving an authorized purchase order.

Upon receipt of a written deficiency notice, Contractor shall have ten (10) days to provide a satisfactory response to Region 4 ESC. Failure to adequately address all issues of concern may result in Contract cancellation. Upon cancellation under this paragraph, all goods, materials, work, documents, data and reports prepared by Contractor under the Contract shall immediately become the property of Region 4 ESC.

b) Termination for Cause. If, for any reason, Contractor fails to fulfill its obligation in a timely manner, or Contractor violates any of the covenants, agreements, or stipulations of this Contract Region 4 ESC reserves the right to terminate the Contract immediately and pursue all other applicable remedies afforded by law. Such termination shall be effective by delivery of notice, to the Contractor, specifying the effective date of termination. In such event, all documents, data, studies, surveys, drawings, maps, models and reports prepared by Contractor will become the property of the Region 4 ESC. If such event does occur, Contractor will be entitled to receive just and equitable compensation for the satisfactory work completed on such documents.

c) Delivery/Service Failures. Failure to deliver goods or services within the time specified, or within a reasonable time period as interpreted by the purchasing agent or failure to make replacements or corrections of rejected articles/services when so requested shall constitute grounds for the Contract to be terminated. In the event Region 4 ESC must purchase in an open market, Contractor agrees to reimburse Region 4 ESC, within a reasonable time period, for all expenses incurred.

   i) Additional Delivery/Installation Charges: Contractor may enter into additional negotiations with a purchasing agency for additional delivery or installation charges based on onerous conditions. Additional delivery and/or installation charges may only be charged if mutually agreed upon by the purchasing agency and Contractor and can only be charged on a per individual project basis.

d) Force Majeure. If by reason of Force Majeure, either party hereto shall be rendered unable wholly or in part to carry out its obligations under this Agreement then such party shall give notice and full particulars of Force Majeure in writing to the other party within a reasonable time after occurrence of the event or cause relied upon, and the obligation of the party giving such notice, so far as it is affected by such Force Majeure, shall be suspended during the continuance of the inability then claimed, except as hereinafter provided, but for no longer period, and such party shall endeavor to remove or overcome such inability with all reasonable dispatch.

The term Force Majeure as employed herein, shall mean acts of God, strikes, lockouts, or other industrial disturbances, act of public enemy, orders of any kind of government of the United States or the State of Texas or any civil or military authority; insurrections; riots; epidemics; landslides; lighting; earthquake; fires; hurricanes; storms; floods; washouts; droughts; arrests; restraint of government and people; civil disturbances; explosions, breakage or accidents to machinery, pipelines or canals, or other causes not reasonably within the control of the party claiming such inability. It is understood and agreed that the settlement of strikes and lockouts shall be entirely within the discretion of the party having the difficulty, and that the above requirement that any Force Majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes and lockouts by acceding to the demands of the opposing party or parties when such settlement is unfavorable in the judgment of the party having the difficulty.

e) Standard Cancellation. Region 4 ESC may cancel this Contract in whole or in part by providing written notice. The cancellation will take effect 30 business days after the other party receives the notice of cancellation. After the 30th business day all work will cease following completion of final purchase order.

12) Licenses. Contractor shall maintain in current status all federal, state and local licenses, bonds and permits required for the operation of the business conducted by Contractor. Contractor shall remain fully informed of and in compliance with all ordinances and regulations pertaining to the lawful provision of services under the Contract. Region 4 ESC reserves the right to stop work and/or cancel the Contract if Contractor's license(s) expire, lapse, are suspended or terminated.

13) Survival Clause. All applicable software license agreements, warranties or service agreements that are entered into between Contractor and Region 4 ESC under the terms and conditions of the Contract shall survive the expiration or termination of the Contract. All Purchase Orders issued and accepted by Contractor shall survive expiration or termination of the Contract.

14) Delivery. Conforming product shall be shipped within 7 days of receipt of Purchase Order. If delivery is not or cannot be made within this time period, the Contractor must receive authorization for the delayed delivery. The order may be canceled if the estimated shipping time is not acceptable. All deliveries shall be freight prepaid, F.O.B. Destination and shall be included in all pricing offered unless otherwise clearly stated in writing.

15) Inspection & Acceptance. If defective or incorrect material is delivered, Region 4 ESC may make the determination to return the material to the Contractor at no cost to Region 4 ESC. The Contractor agrees to pay all shipping costs for the return shipment. Contractor shall be responsible for arranging the return of the defective or incorrect material.

16) Payments. Payment shall be made after satisfactory performance, in accordance with all provisions thereof, and upon receipt of a properly completed invoice.

17) Price Adjustments. Should it become necessary or proper during the term of this Contract to make any change in design or any alterations that will increase price, Region 4 ESC must be notified immediately. Price increases must be approved by Region 4 ESC and no payment for additional materials or services, beyond the amount stipulated in the Contract shall be paid without prior approval. All price increases must be supported by manufacturer documentation, or a formal cost justification letter. Contractor must honor previous prices for thirty (30) days after approval and written notification from Region 4 ESC. It is the Contractor's responsibility to keep all pricing up to date and on file with Region 4 ESC. All price changes must be provided to Region 4 ESC, using the same format as was provided and accepted in the Contractor's proposal.

Price reductions may be offered at any time during Contract. Special, time-limited reductions are permissible under the following conditions: 1) reduction is available to all users equally; 2) reduction is for a specific period, normally not less than thirty (30) days; and 3) original price is not exceeded after the time-limit. Contractor shall offer Region 4 ESC any published price reduction during the Contract term.

18) Audit Rights. Contractor shall, at its sole expense, maintain appropriate due diligence of all purchases made by Region 4 ESC and any entity that utilizes this Contract. Region 4 ESC reserves the right to audit the accounting for a period of three (3) years from the time such

purchases are made. This audit right shall survive termination of this Agreement for a period of one (1) year from the effective date of termination. Region 4 ESC shall have the authority to conduct random audits of Contractor's pricing at Region 4 ESC's sole cost and expense. Notwithstanding the foregoing, in the event that Region 4 ESC is made aware of any pricing being offered that is materially inconsistent with the pricing under this agreement, Region 4 ESC shall have the ability to conduct an extensive audit of Contractor's pricing at Contractor's sole cost and expense. Region 4 ESC may conduct the audit internally or may engage a third-party auditing firm. In the event of an audit, the requested materials shall be provided in the format and at the location designated by Region 4 ESC.

19) Discontinued Products. If a product or model is discontinued by the manufacturer, Contractor may substitute a new product or model if the replacement product meets or exceeds the specifications and performance of the discontinued model and if the discount is the same or greater than the discontinued model.

20) New Products/Services. New products and/or services that meet the scope of work may be added to the Contract. Pricing shall be equivalent to the percentage discount for other products. Contractor may replace or add product lines if the line is replacing or supplementing products, is equal or superior to the original products, is discounted similarly or greater than the original discount, and if the products meet the requirements of the Contract. No products and/or services may be added to avoid competitive procurement requirements. Region 4 ESC may require additions to be submitted with documentation from Members demonstrating an interest in, or a potential requirement for, the new product or service. Region 4 ESC may reject any additions without cause.

21) Options. Optional equipment for products under Contract may be added to the Contract at the time they become available under the following conditions: 1) the option is priced at a discount similar to other options; 2) the option is an enhancement to the unit that improves performance or reliability.

22) Warranty Conditions. All supplies, equipment and services shall include manufacturer's minimum standard warranty and one (1) year labor warranty unless otherwise agreed to in writing.

23) Site Cleanup. Contractor shall clean up and remove all debris and rubbish resulting from their work as required or directed. Upon completion of the work, the premises shall be left in good repair and an orderly, neat, clean, safe and unobstructed condition.

24) Site Preparation. Contractor shall not begin a project for which the site has not been prepared, unless Contractor does the preparation work at no cost, or until Region 4 ESC includes the cost of site preparation in a purchase order. Site preparation includes, but is not limited to: moving furniture, installing wiring for networks or power, and similar pre-installation requirements.

25) Registered Sex Offender Restrictions. For work to be performed at schools, Contractor agrees no employee or employee of a subcontractor who has been adjudicated to be a registered sex offender will perform work at any time when students are or are reasonably expected to be present. Contractor agrees a violation of this condition shall be considered a material breach and may result in the cancellation of the purchase order at Region 4 ESC's discretion. Contractor must identify any additional costs associated with compliance of this

term. If no costs are specified, compliance with this term will be provided at no additional charge.

26) Safety measures. Contractor shall take all reasonable precautions for the safety of employees on the worksite and shall erect and properly maintain all necessary safeguards for protection of workers and the public. Contractor shall post warning signs against all hazards created by its operation and work in progress. Proper precautions shall be taken pursuant to state law and standard practices to protect workers, general public and existing structures from injury or damage.

27) Smoking. Persons working under the Contract shall adhere to local smoking policies. Smoking will only be permitted in posted areas or off premises.

28) Stored materials. Upon prior written agreement between the Contractor and Region 4 ESC, payment may be made for materials not incorporated in the work but delivered and suitably stored at the site or some other location, for installation at a later date. An inventory of the stored materials must be provided to Region 4 ESC prior to payment. Such materials must be stored and protected in a secure location and be insured for their full value by the Contractor against loss and damage. Contractor agrees to provide proof of coverage and additionally insured upon request. Additionally, if stored offsite, the materials must also be clearly identified as property of Region 4 ESC and be separated from other materials. Region 4 ESC must be allowed reasonable opportunity to inspect and take inventory of stored materials, on or offsite, as necessary. Until final acceptance by Region 4 ESC, it shall be the Contractor's responsibility to protect all materials and equipment. Contractor warrants and guarantees that title for all work, materials and equipment shall pass to Region 4 ESC upon final acceptance.

29) Funding Out Clause. A Contract for the acquisition, including lease, of real or personal property is a commitment of Region 4 ESC's current revenue only. Region 4 ESC retains the right to terminate the Contract at the expiration of each budget period during the term of the Contract and is conditioned on a best effort attempt by Region 4 ESC to obtain appropriate funds for payment of the contract.

30) Indemnity. Contractor shall protect, indemnify, and hold harmless both Region 4 ESC and its administrators, employees and agents against all claims, damages, losses and expenses arising out of or resulting from the actions of the Contractor, Contractor employees or subcontractors in the preparation of the solicitation and the later execution of the Contract. Any litigation involving either Region 4 ESC, its administrators and employees and agents will be in Harris County, Texas.

31) Marketing. Contractor agrees to allow Region 4 ESC to use their name and logo within website, marketing materials and advertisement. Any use of Region 4 ESC name and logo or any form of publicity, inclusive of press releases, regarding this Contract by Contractor must have prior approval from Region 4 ESC.

32) Certificates of Insurance. Certificates of insurance shall be delivered to the Region 4 ESC prior to commencement of work. The Contractor shall give Region 4 ESC a minimum of ten (10) days' notice prior to any modifications or cancellation of policies. The Contractor shall require all subcontractors performing any work to maintain coverage as specified.

33) Legal Obligations. It is Contractor's responsibility to be aware of and comply with all local, state, and federal laws governing the sale of products/services and shall comply with all laws

while fulfilling the Contract. Applicable laws and regulation must be followed even if not specifically identified herein.

34) Tariff Surcharges: Contractor has the option to charge a surcharge, as an additional line item, if approved by the purchasing agency. All surcharges must be based on a percentage of total order and must be approved by Region 4 prior to use.

APPENDIX A

DRAFT CONTRACT

This Contract ("Contract") is made as of _____, 2020 by and between _____ Affordable Interior Systems, Inc. (AIS) ("Contractor") and Region 4 Education Service Center ("Region 4 ESC") for the purchase of Furniture, Installation and Related Services ("the products and services").

RECITALS

WHEREAS, Region 4 ESC issued Request for Proposals Number R_____ for _____ ("RFP"), to which Contractor provided a response ("Proposal"); and

WHEREAS, Region 4 ESC selected Contractor's Proposal and wishes to engage Contractor in providing the services/materials described in the RFP and Proposal;

WHEREAS, both parties agree and understand the following pages will constitute the Contract between the Contractor and Region 4 ESC, having its principal place of business at 7145 West Tidwell Road, Houston, TX 77092.

WHEREAS, Contractor included, in writing, any required exceptions or deviations from these terms, conditions, and specifications; and it is further understood that, if agreed to by Region 4 ESC, said exceptions or deviations are incorporated into the Contract.

WHEREAS, this Contract consists of the provisions set forth below, including provisions of all attachments referenced herein. In the event of a conflict between the provisions set forth below and those contained in any attachment, the provisions set forth below shall control.

WHEREAS, the Contract will provide that any state and local governmental entities, public and private primary, secondary and higher education entities, non-profit entities, and agencies for the public benefit ("Public Agencies") may purchase products and services at prices indicated in the Contract upon the Public Agency's registration with OMNIA Partners.

1) Term of agreement. The term of the Contract is for a period of three (3) years unless terminated, canceled or extended as otherwise provided herein. Region 4 ESC shall have the right to renew the Contract for two (2) additional one-year periods or portions thereof. Region 4 ESC shall review the Contract prior to the renewal date and notify the Contractor of Region 4 ESC's intent renew the Contract. Contractor may elect not to renew by providing three hundred sixty-five days' (365) notice to Region 4 ESC. Notwithstanding the expiration of the initial term or any subsequent term or all renewal options, Region 4 ESC and Contractor may mutually agree to extend the term of this Agreement. Contractor acknowledges and understands Region 4 ESC is under no obligation whatsoever to extend the term of this Agreement.

2) Scope: Contractor shall perform all duties, responsibilities and obligations, set forth in this agreement, and described in the RFP, incorporated herein by reference as though fully set forth herein.

3) Form of Contract. The form of Contract shall be the RFP, the Offeror's proposal and Best and Final Offer(s).

4) Order of Precedence. In the event of a conflict in the provisions of the Contract as accepted by Region 4 ESC, the following order of precedence shall prevail:

   i. This Contract
   ii. Offeror's Best and Final Offer
   iii. Offeror's proposal
   iv. RFP and any addenda

5) Commencement of Work. The Contractor is cautioned not to commence any billable work or provide any material or service under this Contract until Contractor receives a purchase order for such work or is otherwise directed to do so in writing by Region 4 ESC.

6) Entire Agreement (Parol evidence). The Contract, as specified above, represents the final written expression of agreement. All agreements are contained herein and no other agreements or representations that materially alter it are acceptable.

7) Assignment of Contract. No assignment of Contract may be made without the prior written approval of Region 4 ESC. Contractor is required to notify Region 4 ESC when any material change in operations is made (i.e. bankruptcy, change of ownership, merger, etc.).

8) Novation. If Contractor sells or transfers all assets or the entire portion of the assets used to perform this Contract, a successor in interest must guarantee to perform all obligations under this Contract. Region 4 ESC reserves the right to accept or reject any new party. A change of name agreement will not change the contractual obligations of Contractor.

9) Contract Alterations. No alterations to the terms of this Contract shall be valid or binding unless authorized and signed by Region 4 ESC.

10) Adding Authorized Distributors/Dealers. Contractor is prohibited from authorizing additional distributors or dealers, other than those identified at the time of submitting their proposal, to sell under the Contract without notification and prior written approval from Region 4 ESC. Contractor must notify Region 4 ESC each time it wishes to add an authorized distributor or dealer. Purchase orders and payment can only be made to the Contractor unless otherwise approved by Region 4 ESC. Pricing provided to members by added distributors or dealers must also be less than or equal to the Contractor's pricing.

11) TERMINATION OF CONTRACT

   a) Cancellation for Non-Performance or Contractor Deficiency. Region 4 ESC may terminate the Contract if purchase volume is determined to be low volume in any 12-month period. Region 4 ESC reserves the right to cancel the whole or any part of this Contract due to failure by Contractor to carry out any obligation, term or condition of the contract. Region 4 ESC may issue a written deficiency notice to Contractor for acting or failing to act in any of the following:

      i. Providing material that does not meet the specifications of the Contract;
      ii. Providing work or material was not awarded under the Contract;
      iii. Failing to adequately perform the services set forth in the scope of work and specifications;

iv. Failing to complete required work or furnish required materials within a reasonable amount of time;
v. Failing to make progress in performance of the Contract or giving Region 4 ESC reason to believe Contractor will not or cannot perform the requirements of the Contract; or
vi. Performing work or providing services under the Contract prior to receiving an authorized purchase order.

Upon receipt of a written deficiency notice, Contractor shall have ten (10) days to provide a satisfactory response to Region 4 ESC. Failure to adequately address all issues of concern may result in Contract cancellation. Upon cancellation under this paragraph, all goods, materials, work, documents, data and reports prepared by Contractor under the Contract shall immediately become the property of Region 4 ESC.

b) Termination for Cause. If, for any reason, Contractor fails to fulfill its obligation in a timely manner, or Contractor violates any of the covenants, agreements, or stipulations of this Contract Region 4 ESC reserves the right to terminate the Contract immediately and pursue all other applicable remedies afforded by law. Such termination shall be effective by delivery of notice, to the Contractor, specifying the effective date of termination. In such event, all documents, data, studies, surveys, drawings, maps, models and reports prepared by Contractor will become the property of the Region 4 ESC. If such event does occur, Contractor will be entitled to receive just and equitable compensation for the satisfactory work completed on such documents.

c) Delivery/Service Failures. Failure to deliver goods or services within the time specified, or within a reasonable time period as interpreted by the purchasing agent or failure to make replacements or corrections of rejected articles/services when so requested shall constitute grounds for the Contract to be terminated. In the event Region 4 ESC must purchase in an open market, Contractor agrees to reimburse Region 4 ESC, within a reasonable time period, for all expenses incurred.

   i) Additional Delivery/Installation Charges: Contractor may enter into additional negotiations with a purchasing agency for additional delivery or installation charges based on onerous conditions. Additional delivery and/or installation charges may only be charged if mutually agreed upon by the purchasing agency and Contractor and can only be charged on a per individual project basis.

d) Force Majeure. If by reason of Force Majeure, either party hereto shall be rendered unable wholly or in part to carry out its obligations under this Agreement then such party shall give notice and full particulars of Force Majeure in writing to the other party within a reasonable time after occurrence of the event or cause relied upon, and the obligation of the party giving such notice, so far as it is affected by such Force Majeure, shall be suspended during the continuance of the inability then claimed, except as hereinafter provided, but for no longer period, and such party shall endeavor to remove or overcome such inability with all reasonable dispatch.

The term Force Majeure as employed herein, shall mean acts of God, strikes, lockouts, or other industrial disturbances, act of public enemy, orders of any kind of government of the United States or the State of Texas or any civil or military authority; insurrections; riots; epidemics; landslides; lighting; earthquake; fires; hurricanes; storms; floods; washouts; droughts; arrests; restraint of government and people; civil disturbances; explosions, breakage or accidents to machinery, pipelines or canals, or other causes not reasonably within the control of the party claiming such inability. It is understood and agreed that the settlement of strikes and lockouts shall be entirely within the discretion of the party having the difficulty, and that the above requirement that any Force Majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes and lockouts by acceding to the demands of the opposing party or parties when such settlement is unfavorable in the judgment of the party having the difficulty.

e) Standard Cancellation. Region 4 ESC may cancel this Contract in whole or in part by providing written notice. The cancellation will take effect 30 business days after the other party receives the notice of cancellation. After the 30th business day all work will cease following completion of final purchase order.

12) Licenses. Contractor shall maintain in current status all federal, state and local licenses, bonds and permits required for the operation of the business conducted by Contractor. Contractor shall remain fully informed of and in compliance with all ordinances and regulations pertaining to the lawful provision of services under the Contract. Region 4 ESC reserves the right to stop work and/or cancel the Contract if Contractor's license(s) expire, lapse, are suspended or terminated.

13) Survival Clause. All applicable software license agreements, warranties or service agreements that are entered into between Contractor and Region 4 ESC under the terms and conditions of the Contract shall survive the expiration or termination of the Contract. All Purchase Orders issued and accepted by Contractor shall survive expiration or termination of the Contract.

14) Delivery. Conforming product shall be shipped within 7 days of receipt of Purchase Order. If delivery is not or cannot be made within this time period, the Contractor must receive authorization for the delayed delivery. The order may be canceled if the estimated shipping time is not acceptable. All deliveries shall be freight prepaid, F.O.B. Destination and shall be included in all pricing offered unless otherwise clearly stated in writing.

15) Inspection & Acceptance. If defective or incorrect material is delivered, Region 4 ESC may make the determination to return the material to the Contractor at no cost to Region 4 ESC. The Contractor agrees to pay all shipping costs for the return shipment. Contractor shall be responsible for arranging the return of the defective or incorrect material.

16) Payments. Payment shall be made after satisfactory performance, in accordance with all provisions thereof, and upon receipt of a properly completed invoice.

17) Price Adjustments. Should it become necessary or proper during the term of this Contract to make any change in design or any alterations that will increase price, Region 4 ESC must be notified immediately. Price increases must be approved by Region 4 ESC and no payment for additional materials or services, beyond the amount stipulated in the Contract shall be paid without prior approval. All price increases must be supported by manufacturer documentation, or a formal cost justification letter. Contractor must honor previous prices for thirty (30) days after approval and written notification from Region 4 ESC. It is the Contractor's responsibility to keep all pricing up to date and on file with Region 4 ESC. All price changes must be provided to Region 4 ESC, using the same format as was provided and accepted in the Contractor's proposal.

Price reductions may be offered at any time during Contract. Special, time-limited reductions are permissible under the following conditions: 1) reduction is available to all users equally; 2) reduction is for a specific period, normally not less than thirty (30) days; and 3) original price is not exceeded after the time-limit. Contractor shall offer Region 4 ESC any published price reduction during the Contract term.

18) Audit Rights. Contractor shall, at its sole expense, maintain appropriate due diligence of all purchases made by Region 4 ESC and any entity that utilizes this Contract. Region 4 ESC reserves the right to audit the accounting for a period of three (3) years from the time such

purchases are made. This audit right shall survive termination of this Agreement for a period of one (1) year from the effective date of termination. Region 4 ESC shall have the authority to conduct random audits of Contractor's pricing at Region 4 ESC's sole cost and expense. Notwithstanding the foregoing, in the event that Region 4 ESC is made aware of any pricing being offered that is materially inconsistent with the pricing under this agreement, Region 4 ESC shall have the ability to conduct an extensive audit of Contractor's pricing at Contractor's sole cost and expense. Region 4 ESC may conduct the audit internally or may engage a third-party auditing firm. In the event of an audit, the requested materials shall be provided in the format and at the location designated by Region 4 ESC.

19) Discontinued Products. If a product or model is discontinued by the manufacturer, Contractor may substitute a new product or model if the replacement product meets or exceeds the specifications and performance of the discontinued model and if the discount is the same or greater than the discontinued model.

20) New Products/Services. New products and/or services that meet the scope of work may be added to the Contract. Pricing shall be equivalent to the percentage discount for other products. Contractor may replace or add product lines if the line is replacing or supplementing products, is equal or superior to the original products, is discounted similarly or greater than the original discount, and if the products meet the requirements of the Contract. No products and/or services may be added to avoid competitive procurement requirements. Region 4 ESC may require additions to be submitted with documentation from Members demonstrating an interest in, or a potential requirement for, the new product or service. Region 4 ESC may reject any additions without cause.

21) Options. Optional equipment for products under Contract may be added to the Contract at the time they become available under the following conditions: 1) the option is priced at a discount similar to other options; 2) the option is an enhancement to the unit that improves performance or reliability.

22) Warranty Conditions. All supplies, equipment and services shall include manufacturer's minimum standard warranty and one (1) year labor warranty unless otherwise agreed to in writing.

23) Site Cleanup. Contractor shall clean up and remove all debris and rubbish resulting from their work as required or directed. Upon completion of the work, the premises shall be left in good repair and an orderly, neat, clean, safe and unobstructed condition.

24) Site Preparation. Contractor shall not begin a project for which the site has not been prepared, unless Contractor does the preparation work at no cost, or until Region 4 ESC includes the cost of site preparation in a purchase order. Site preparation includes, but is not limited to: moving furniture, installing wiring for networks or power, and similar pre-installation requirements.

25) Registered Sex Offender Restrictions. For work to be performed at schools, Contractor agrees no employee or employee of a subcontractor who has been adjudicated to be a registered sex offender will perform work at any time when students are or are reasonably expected to be present. Contractor agrees a violation of this condition shall be considered a material breach and may result in the cancellation of the purchase order at Region 4 ESC's discretion. Contractor must identify any additional costs associated with compliance of this

term. If no costs are specified, compliance with this term will be provided at no additional charge.

26) Safety measures. Contractor shall take all reasonable precautions for the safety of employees on the worksite and shall erect and properly maintain all necessary safeguards for protection of workers and the public. Contractor shall post warning signs against all hazards created by its operation and work in progress. Proper precautions shall be taken pursuant to state law and standard practices to protect workers, general public and existing structures from injury or damage.

27) Smoking. Persons working under the Contract shall adhere to local smoking policies. Smoking will only be permitted in posted areas or off premises.

28) Stored materials. Upon prior written agreement between the Contractor and Region 4 ESC, payment may be made for materials not incorporated in the work but delivered and suitably stored at the site or some other location, for installation at a later date. An inventory of the stored materials must be provided to Region 4 ESC prior to payment. Such materials must be stored and protected in a secure location and be insured for their full value by the Contractor against loss and damage. Contractor agrees to provide proof of coverage and additionally insured upon request. Additionally, if stored offsite, the materials must also be clearly identified as property of Region 4 ESC and be separated from other materials. Region 4 ESC must be allowed reasonable opportunity to inspect and take inventory of stored materials, on or offsite, as necessary. Until final acceptance by Region 4 ESC, it shall be the Contractor's responsibility to protect all materials and equipment. Contractor warrants and guarantees that title for all work, materials and equipment shall pass to Region 4 ESC upon final acceptance.

29) Funding Out Clause. A Contract for the acquisition, including lease, of real or personal property is a commitment of Region 4 ESC's current revenue only. Region 4 ESC retains the right to terminate the Contract at the expiration of each budget period during the term of the Contract and is conditioned on a best effort attempt by Region 4 ESC to obtain appropriate funds for payment of the contract.

30) Indemnity. Contractor shall protect, indemnify, and hold harmless both Region 4 ESC and its administrators, employees and agents against all claims, damages, losses and expenses arising out of or resulting from the actions of the Contractor, Contractor employees or subcontractors in the preparation of the solicitation and the later execution of the Contract. Any litigation involving either Region 4 ESC, its administrators and employees and agents will be in Harris County, Texas.

31) Marketing. Contractor agrees to allow Region 4 ESC to use their name and logo within website, marketing materials and advertisement. Any use of Region 4 ESC name and logo or any form of publicity, inclusive of press releases, regarding this Contract by Contractor must have prior approval from Region 4 ESC.

32) Certificates of Insurance. Certificates of insurance shall be delivered to the Region 4 ESC prior to commencement of work. The Contractor shall give Region 4 ESC a minimum of ten (10) days' notice prior to any modifications or cancellation of policies. The Contractor shall require all subcontractors performing any work to maintain coverage as specified.

33) Legal Obligations. It is Contractor's responsibility to be aware of and comply with all local, state, and federal laws governing the sale of products/services and shall comply with all laws

while fulfilling the Contract. Applicable laws and regulation must be followed even if not specifically identified herein.

34) Tariff Surcharges: Contractor has the option to charge a surcharge, as an additional line item, if approved by the purchasing agency. All surcharges must be based on a percentage of total order and must be approved by Region 4 prior to use.

OFFER AND CONTRACT SIGNATURE FORM

The undersigned hereby offers and, if awarded, agrees to furnish goods and/or services in strict compliance with the terms, specifications and conditions at the prices proposed within response unless noted in writing.

IV. EVALUATION PROCESS AND CRITERIA

1. A committee will review and evaluate all responses and make a recommendation for award of Contract(s). The recommendation for Contract awards will be based on the predetermined criteria factors outlined in this section, where each factor is assigned a point value based on its importance. In evaluating the responses, the following predetermined criteria is considered:

   a) Products/Pricing (40 Points)
   b) Performance Capability (30 Points)
   c) Qualification and Experience (20 Points)
   d) Value Add (10 Points)

2. Offeror's proposal should, at a minimum, include the following for Region 4 ESC's evaluation:
   a) Products/Services/Pricing

   i. Offerors shall provide pricing based on a discount from a manufacturer's price list or catalog, or fixed price, or a combination of both with indefinite quantities. Prices listed will be used to establish the extent of a manufacturer's product lines, services, warranties, etc. that are available from Offeror and the pricing per item. Multiple percentage discounts are acceptable if, where different percentage discounts apply, those different percentages are specified. Additional pricing and/or discounts may be included. Products and services proposed are to be priced separately with all ineligible items identified. Offerors may elect to limit their proposals to any category or categories.

Proposed Discounts

Systems, Beam/Benching, Casegoods, Tables & Universal	
Matrix, Divi, MWall, AO2, Day-to-Day PowerBeam, Oxygen, Aloft, Calibrate Casegoods, Day-to-Day and Calibrate Conference Tables, Support, Storage &Screens, Worksurfaces and Accessories	
List Price	**Discount**
$1 - $30,000	74.50%
$30,001 - $300,000	79%
$300,001 - $500,000	81%

Seating	
Bolton, Devens, Element, Granite, Natick, Upton, Paxton, Pierce, Rutland, Stow, Sulli, Triad, Trix, LB Lounge and Volker Cube	
List Price	**Discount**
$ 1 +	63.00%

ii. Include an electronic copy of the catalog from which discount, or fixed price, is calculated. Electronic price lists must contain the following: *(if applicable)*

- Manufacturer part #
- Offeror's Part # (if different from manufacturer part #)
- Description
- Manufacturers Suggested List Price and Net Price
- Net price to Region 4 ESC (including freight)

Media submitted for price list must include the Offerors' company name, name of the solicitation, and date on a Flash Drive (i.e. Pin or Jump Drives).
All AIS price lists have been provided on a USB.

iii. Is pricing available for all products and services?

Yes.

i. Please provide pricing for services based on a range, from minimum price per hour to maximum price per hour, with a not to exceed on the maximum price per hour charge.

a. Design: $65/hour (not to exceed)
b. Project Management: $85/hour (not to exceed)
c. Installation: Negotiable by project scope

iv. Describe any shipping charges.

AIS products include freight to all locations within the United States including Alaska and Hawaii.

i. Describe delivery charges along with definitions for:

1. Dock Delivery:

Included in pricing and executed by a variety of furniture freight carriers.

2. Inside Delivery:

Inside delivery for casegoods and seating will be quoted on an individual basis by our servicing dealer partners. This cost varies due to a variety of circumstances including (not limited to): Access to loading dock and freight elevator, normal hours due to OT or weekend, Union vs. nonunion and metro location vs. suburbs.

3. Deliver and Install:

Installation will be quoted on a per project basis and is subject to the same variations as inside delivery. areas.

It is in the best interest of Region 4 ESC, OMNIA and its partners to pursue “per project” quotes on installation as one “set price” nationwide would undoubtedly result in some excess charges that can be avoided by taking all aspects of project specifics into consideration.

v. Provide pricing for warranties on all products and services.

All products are covered under AIS’s Limited Lifetime Warranty. This Warranty is given to the initial purchaser and is valid for as long as the product is owned by the original Buyer. The warranty, which runs from the date of manufacture, covers defects in materials and craftsmanship found during normal usage of the products during the warranty period. If a product is defective, and if written notice of the defect is given to AIS within the applicable warranty period, AIS (at its option) will either repair or replace the defective product with a comparable component or product. The limited lifetime warranty applies to all products regardless of the number of shifts the product is used each day except as noted below.

Applicable Warranty Period	Products / Restrictions
Lifetime (as defined below)	All AIS branded products (except as noted below)
Ten (10) Years Ten (10) Years - 24/7 Shift	Electrical products AIS Seating (frames and control mechanisms) Calibrate Series Devens Seating
Five (5) Years	Moving parts, which include keyboard mechanisms, locks, suspensions, casters as well as AIS fabrics, upholsteries and mesh. AIS Seating (pneumatic cylinders, casters, glides, bases and arms, mesh and seating upholsteries, Granite and Sulli seating*)

This warranty does not apply to normal wear and tear damage caused by carrier, damage caused by transport of product from one site location to another, alterations to the product not expressly authorized by Seller, and products considered to be of a consumable nature such as bulbs and light ballast. AIS Seating normal use as defined under this warranty is the wear and tear that occurs during a 40 hour week when the product is used by a person weighing 300 pounds or less. *Granite is warranted for five years and rates for a person weighing 250 pounds or less. Sulli is warranted for five years and rates for a person weighing 300 pounds or less. AIS will not warrant any altered components or parts.

This warranty shall not cover labor or delivery charges and does not apply to items subjected to abuse, misuse, neglect, alteration, damage cause by shipment, storage, accident, fire, flood or act of God. The limited warranty is the sole remedy for product defect and no other expressed or implied warranty is provided, including but not limited to any implied warranties of merchantability or fitness for a particular purpose. AIS shall not be liable for consequential or incidental damages arising from any product defect. A customer's exclusive remedy with respect to any and all losses or damages resulting from any cause whatsoever shall be repaired or replaced as specified above.

It also does not apply to customer's own material (COM - i.e. material specified by Buyer that is not a standard AIS product offering) used in the manufacture of AIS products. Special Products that are not offered in the AIS standard price list will have a warranty of one year. A product will not be considered defective and Seller will not be obligated to replace it, if the product is not installed properly or is used in a "non-

standard" fashion as prescribed by AIS. It is at the sole discretion of AIS to make a determination if a defect is due to improper product installation.

THIS LIMITED WARRANTY IS THE SOLE REMEDY FOR PRODUCT DEFECT AND NO OTHER EXPRESS OR IMPLIED WARRANTY IS PROVIDED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. AIS SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL, INDIRECT, SPECIAL, PUNITIVE OR INCIDENTAL DAMAGES.

vi. Describe any return and restocking fees.

AIS understands that from time to time changes may be required on orders; however, as all AIS products are produced custom for each order, changes and cancellation costs will be assessed based on the following schedule. Review your acknowledgement thoroughly. All dates below are from time of acknowledgement.

- No fee for orders changed or canceled within one day (24 hours)
- A fee of 50% of the net pretax total of affected product if order is changed or canceled within two days (48 hours).
- A fee of 100% of the net pretax total of affected product if order is changed or canceled after two days (48 days).
- A fee of 100% of the net pretax total of all product on Rush Orders or orders with custom product if changed or canceled after 24 hours.

Any non-standard worksurface sizes, panels, fabrics, laminates, paint colors, or product modifications are considered custom.

Important: Changing a product size to another size is considered a "cancellation" of one product for another an falls under the above program.

vii. Describe any additional discounts or rebates available. Additional discounts or rebates may be offered for large quantity orders, single ship to location, growth, annual spend, guaranteed quantity, etc.

Large quantity orders will always be considered for additional discounting based on product category. AIS would welcome the negotiate a "growth incentive" after year one of the contract is complete and we have complete data to assess appropriate rebate structure.

Tiered volume discounts will be offered per the below. Any quote/order over our maximum order level (MOL) of $500,000 list (not net), will be negotiable.

viii. Describe how customers verify they are receiving Contract pricing.

Customers have several options to verify they are receiving contract pricing. AIS will post all published discounts from list price. Each authorized servicing dealer will be required to both list and net sell prices to the customer.

Other methods to verify contract pricing are:
1. Via the custom-built dedicated website to Region 4 ESC/OMNIA customers
2. Through our robust dealer network of over 1000 dealers
3. Contacting an AIS representative

ix. Describe payment methods offered.

ACH/EFT, check, wire and credit cards: Amex, Visa and Mastercard

x. Propose the frequency of updates to the Offeror's pricing structure. Describe any proposed indices to guide price adjustments. If offering a catalog contract with discounts by category, while changes in individual pricing may change, the category discounts should not change over the term of the Contract.

AIS regularly reviews its costs and seeks to always remain competitive in the marketplace, offering customers the very best value. Typically list prices will adjust annually based on material, labor and transportation costs. These increases are typically 0-3%. The discounts that are proposed will stay in place through the duration of the contract.

AIS uses the Price Producer Index (PPI) to gauge fluctuations in raw materials obtained from suppliers. The tiered volume discount structure for this contract will remain the same throughout the duration of the contract period, but we may request to adjust our list prices. Should a need to adjust our list pricing, we will submit PPI data to support our request to adjust list prices.

The US Government has imposed tariffs in recent years that has forced us to apply a minimal tariff fee on commercial orders. Currently, AIS does not apply these tariff fees to contract orders. Should we experience a major economic worldwide situation, we may request to implement a nominal fee to cover fees imposed by the Government.

xi. Describe how future product introductions will be priced and align with Contract pricing proposed.

AIS was built on ingenuity and we have the same panel systems today that launched the success of our company 30 years ago. We are continuously examining existing legacy product to make improvements for the office environments of today. Many of our furniture designs are universal and can be used with all product lines. We are dedicated to providing our customers with the best in furniture solutions that meet the client's interior needs now and for years to

come. AIS has a written non-obsolescence policy that assures a continual bridge from legacy systems to new systems.

New product introductions will be priced at current market value and the same tiered volume discount structure.

Consideration should be taken for the ability to reconfigure existing product by using updated products and universal parts. AIS products are easily reconfigurable and can incorporate new product introductions. This saves money on purchasing completely new office furniture. Our dealers can take the existing inventory and re-design it with selected new products that allow it to meet the current mission requirements.

xii. Provide any additional information relevant to this section.

A differentiating variable that benefits the customer compared to our competitors is our MOL for systems, casegoods and tables being $500,000. AIS will extend deeper discounting for quotes/orders over $500,000 list.

Not to Exceed Pricing. Region 4 ESC requests pricing be submitted as not to exceed pricing. Unlike fixed pricing, the Contractor can adjust submitted pricing lower if needed but, cannot exceed original pricing submitted. Contractor must allow for lower pricing to be available for similar product and service purchases. Cost plus pricing as a primary pricing structure is not acceptable.

b) Performance Capability

i. Include a detailed response to Appendix D, Exhibit A, OMNIA Partners Response for National Cooperative Contract. Responses should highlight experience, demonstrate a strong national presence, describe how Offeror will educate its national sales force about the Contract, describe how products and services will be distributed nationwide, include a plan for marketing the products and services nationwide, and describe how volume will be tracked and reported to OMNIA Partners.

Included with Tab 3 behind OMNIA App. D, Ex. A tab.

ii. The successful Offeror will be required to sign Appendix D, Exhibit B, OMNIA Partners Administration Agreement prior to Contract award. Offerors should have any reviews required to sign the document prior to submitting a response. Offeror's response should include any proposed exceptions to OMNIA Partners Administration Agreement on Appendix B, Terms and Conditions Acceptance Form.

Included with Tab 3 behind OMNIA App. D, Ex. B tab.

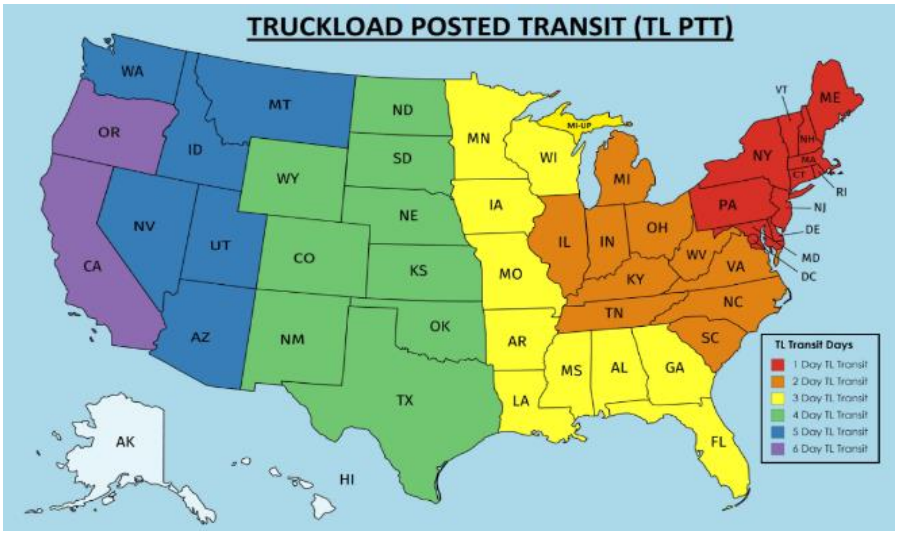
iii. Include completed Appendix D, Exhibits F. Federal Funds Certifications and G. New Jersey Business Compliance.

Included with Tab 3 behind OMNIA App. D, Ex. F & G tab.

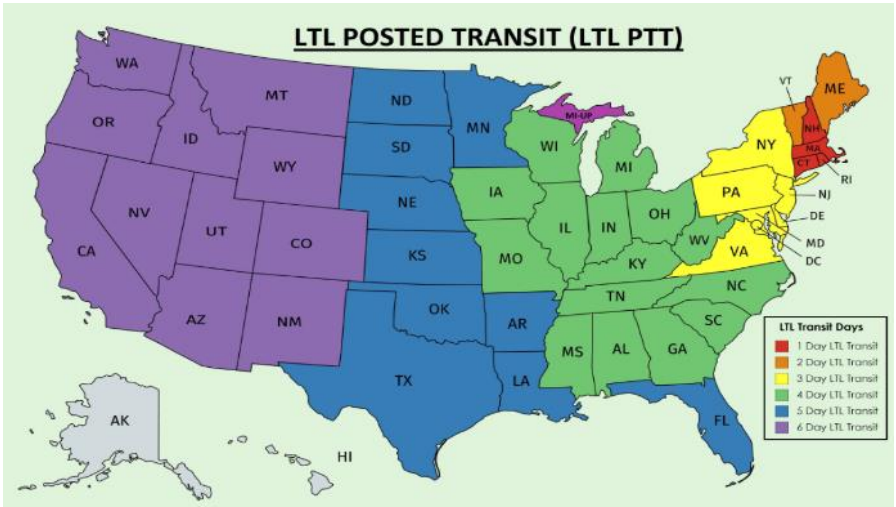
iv. Describe how Offeror responds to emergency orders.

One of the advantages AIS has over its competition is its lead times. AIS offers the best lead times in the industry and 75% of our products ship in two (2) weeks or less. If successful as a vendor partner, we will provide key internal contacts form our customer service and project management teams that can expedite emergency orders. If all the components of the emergency order are stock items, we can typically respond in less than two (2) weeks or even shorter depending on the products specified.

v. What is Offeror's average Fill Rate?



Our commitment to our customers comes through and sets AIS apart. From the range of products we offer to meet today's needs to our service levels across the company, we have an ever-present urgency to meet your schedules and respond promptly. And our focus remains constant on lean practices and doing the core elements well.



Average Fill Rates:
2017 - 98.2%
2018 - 98.6%
2019 - 99.1%

vi. What is Offeror's average on time delivery rate? Describe Offeror's history of meeting the shipping and delivery timelines.

AIS's commitment to lean manufacturing has fine-tuned our ability to have the fastest lead times in the industry. We continue to invest in efficient technologies and processes. AIS hand selects suppliers who share the AIS vision and are able to deliver materials in a matter of days. All of these factors combined allow AIS to have the flexibility to offer ten-day quick ship programs.

Currently AIS's average on-time delivery rate is 99.2%. As a Shingo Prize winner for Operational Excellence, AIS continues to monitor every metric from order entry to manufacturing to shipping to continually improve efficiencies developed by our own expert teams. AIS uses a combination of Full Truckloads and Consolidated Truckloads to guarantee "meet or beat" delivery dates. Shipping rates are continually measured not only for on-time delivery but for quality, safety, sustainability and value.

vii. Describe Offeror's return and restocking policy.

AIS understands that from time to time changes may be required on orders; however, as all AIS products are produced custom for each order, changes and cancellation costs will be assessed based on the following schedule. Review your acknowledgement thoroughly. All dates below are from time of acknowledgement.

- No fee for orders changed or canceled within one day (24 hours)
- A fee of 50% of the net pretax total of affected product if order is changed or canceled within two days (48 hours).
- A fee of 100% of the net pretax total of affected product if order is changed or canceled after two days (48 hours).
- A fee of 100% of the net pretax total of all product on Rush Orders or orders with custom product if changed or canceled after 24 hours.

Any non-standard worksurface sizes, panels, fabrics, laminates, paint colors, or product modifications are considered custom.

Important: Changing a product size to another size is considered a "cancellation" of one product for another an falls under the above program.

viii. Describe Offeror's ability to meet service and warranty needs.

From the beginning of a project, our teams are engaged to understand needs, develop the best plans and strategies, and execute seamlessly.

Customer Service

AIS will work through the servicing dealer to provide product representation and sales support. AIS' customer service members are trained on AIS' product and design tools to assist the customers with a complete support system.

Orders can be accepted as email, fax or electronic order entry.

AIS ensures that its superior customer service representative (CSR) will acknowledge all inquiries within one business day. Most inquiries will be resolved within 24 hours, however AIS customer service will advise a daily update on each inquiry until the inquiry is answered.

AIS tracks all quality issues within a database for trend analysis to identify the root cause and eliminate the error. AIS has an entire quality control department focused on customer feedback. Every AIS order is 100% digitally photographed prior to shipment. This action ensures all parts of the order have been included and are being shipped without defects. Photographs also provide better information for customer service as well as root causes for problems that are found in the field during installation, such as locating product within the shipment, if necessary. AIS' constant goal is to ensure the satisfaction of each customer.

Project Management

The AIS Project Management (PM) team monitors internal reports for orders exceeding $150,000 net, as this is the threshold that determines whether a project manager is required (unless otherwise requested by the AIS sales team).

By maintaining and shared spreadsheet, the AIS PMs track all large projects, documented from the Daily Sales Report; one AIS PM will be assigned per project and will draft a Shipping Schedule based on project details including, but not limited to:

- Product/System
- Quantity of Skids/Trucks
- Whether the project is phased
- Special delivery requirements

Once the schedule is drafted, a copy will be sent to the dealership for their review and feedback. Based on the dealership's response, any modifications necessary will be made to the shipping schedule and once approved, the schedule is forwarded to our Production and Shipping Department for application to the corresponding sales orders.

As the ship date(s) for the project approaches, the AIS PM will communicate directly with Production/Shipping regarding any important details pertinent to the project and ensure to the best of our ability that the sales order(s) ship complete according to the schedule provided.

Once the shipment has left the AIS facility, the AIS PM will communicate with the dealership or the dealer's installer with delivery details, circle sheets for receiving the product, and overall details on the project.

Once the shipment has been confirmed as received, the AIS PM will continue to work with the dealer/installer as needed to assist with any questions or concerns that may arise during the installation (product/install questions, missing/damaged items, etc.) until the project is complete.

Should any replacement items be needed to complete the installation, the AIS PM will work with the AIS Customer Service Rep (CSR), providing the necessary information so that replacement order(s) can be processed in a timely manner (part #'s, finishes, ship date, ship to, etc).

In addition to this overall process, the AIS PM team is also available for any field- or product-related questions both internal and external to AIS (CSRs, dealers, etc).

Field Services

In conjunction with the authorized dealer's representatives and installation team, AIS field services is available to assist when necessary with several quality control inspections throughout the installation process. All product is inspected as the items are being unloaded from the trucks. All items are cross checked for inventory purposes to the shipping documents as well as inspected for obvious physical damage. The items are then moved to the staging area, inspected again and staged for installation.

In addition, during the installation of the product, each item is thoroughly checked to meet standards before it is installed. After each phase of the installation is completed, there are several levels of inspection that take place. The supervisor completely walks through each workstation and verifies that the panels and work

surfaces are mounted correctly and flush, all drawers, overheads and task lights are working correctly and that all power is working.

Next, the project manager does an independent walk-through inspecting the same things. Lastly, at the end of each phase the project manager walks the customer through each station, demonstrating that everything is to their satisfaction. If at any time during the inspections there is product that needs to be replaced, the AIS is notified immediately, and the replacement product is ordered. Frequently the product is pulled from the next phase to replace the item, allowing that area to be completed without impacting the installation schedule and allowing the replacement product being ordered to be shipped for the next phase.

Specification Services

Our specification department made up of 15 designers across the United States that work from an online queue offering two main services; design checks and specification requests in which both of these services dealers can submit via our dealer portal, AIS DealerNet. AIS Design will provide specifications in CAP, GIZA or Project Matrix format. CET formats will be available in 2020.

Design checks are completed layouts that are specified with AIS products in which the authorized dealer requests our specification team to review the layout for accuracy prior to placing an order. Main items we look for in a check are related to the panels, connectors, electrical components and supports. We also offer an express check option which will be completed in 1-2 business days. What we do on an express check is review the layout, fix any errors and note any ways to reduce cost and send the layout only back (we do not provide 2D, 3D prints or run a BOM for these checks).

Specification requests are submissions in which AIS will use a typical layout, block plan or competitor layout to assist with the specification process using AIS symbols. Completed designs/specifications will be returned to dealer with the drawing file, worksheet file and a PDF which contains 2D, 3D prints and a BOM (bill of materials), the BOM's are created from the items that are specified in the drawing file, unless otherwise noted. Specification lead times can vary daily, ranging from anywhere from 2-4 business days on average.

Other design/specification services offered include:

- Rendering services – The turnaround time is typically 48 hours. The AIS team and/or rendering team are not able to create or render special symbols or other manufacture items, we can only render true AIS parts and pieces.
- Product Specification Training
- Mock-up & Showroom reviews - The AIS team will review these projects in detail and if necessary, add in any supports or parts/pieces required to be sure the AIS product is being showcased in the best way possible.
- General product & design questions can be answered by emailing the team design@ais-inc.com or contacting us via telephone 800-434-7400 during business hours M-F 8:30-5pm (EDT)

Warranty Protocol/Services

"The overall intention for AIS is to maintain an excellent customer relationship."

- Bruce Platzman, President

To provide our customers with the quality they desire, AIS designs and manufactures products to live long and useful lives. This is exemplified by a limited lifetime warranty on all systems furniture to the initial purchaser which is valid for as long as the product is owned by the original Buyer. The warranty which runs from the date of manufacture, covers defects in materials and craftsmanship found during normal usage of the products during the warranty period. Please see our product Lifetime Warranty for more information.

At AIS, we know that it can be difficult to foresee the future needs of your business. That's why our systems are designed to withstand repeated service, repair and handling for whatever the road ahead may bring. Our systems also feature standardized product parts and components, which are available to facilitate maintenance, servicing, and reassembly.

AIS offers a limited lifetime warranty on all our products.

Warranty issues are handled by our customer service department. They may be contacted directly at 800.434.7400 or through the servicing dealer. An AIS representative will be in contact within 24 hours to resolve warranty issues.

ix. Describe Offeror's customer service/problem resolution process. Include hours of operation, number of services, etc.

AIS participates in other GPO's and we have processes in place to be a long-term partner. We have a positive track record of reconciling issues quickly and faster than most.

AIS' escalation management plan will include the following chain from the authorized dealer through AIS:

- Customer Service Representative
- Manager of Customer Service
- Director of Customer Service
- OEM Contract Administrator
- Regional Vice President
- Executive Vice President
- President

The list of personnel listed above is the chain command within the organization.

AIS has a flat organizational structure, what we mean by this is that we do not need to go through each level of management to get things done. AIS is a very "get it done" type of company. Our customer service team is empowered by management to do what it takes to get things done. We also understand the urgency when a customer calls with an issue or a question. We feel that we can manage the customer's account easily within the first three tiers (Customer Service Representative, Manager of Customer Service, OEM Contract Administrator). But also know our entire team is behind the Region 4 ESC contract and ready to support the needs of all Region 4 ESC customers.

Many of AIS employees work outside of normal working hours of Monday through Friday, 8:00am – 5:00pm EDT. All employees have customer satisfaction as a driving force. Unlike other manufacturer's, AIS offers the below services.

- Dedicated Customer Service Representatives
- Project Management
- Field Services
- Design/Specifications Services

x. Describe Offeror's invoicing process. Include payment terms and acceptable methods of payments. Offerors shall describe any associated fees pertaining to credit cards/p-cards.

AIS generates an invoice at the time of shipment from our factory. Payment terms are Net 30. No fees on credit cards.

xi. Describe Offeror's contract implementation/customer transition plan.

AIS will be very aggressive in our efforts to market the Region 4 ESC award across the country. There are many channels we will employ to get the word out to all business entities in promoting the Region 4 ESC contract across the country.

Because AIS has such a vast dealer network across the country, it provides AIS a big advantage in marketing contracts such as this. Our over 1000 dealers (with an average five (5) sales reps per dealer allows for over 4,000 sales representatives nationwide) will all have boots on the ground in their marketplace actively promoting this contract to their client base.

Following AIS's standard Program Launch Plan, the executive leadership team will immediately define the messaging document and position statement for both internal stakeholders and internal and external audiences. The positioning document will include the overview of the Region 4 ESC contract and how AIS can provide workspace solutions for its customers.

Upon award, AIS will draft a co-branded press release to announce to the trade publications, including Monday Morning Quarterback, Office Insight, Business of Furniture and any other industry trade publications that may choose to publish the release. The draft announcement will be sent to Region 4 ESC partners for final approval before release.

AIS will publish the approved Region 4 ESC partnership announcement on AIS's public website and post the master agreement and contract details within the contract section of the website, to be easily accessed by dealers and Region 4 ESC partner customers, within 90 days of award.

The AIS Marketing and Contract team will create a program email announcement, social media, brochure, internal and external training presentation to share with AIS team members, dealers and Region 4 ESC partners. Upon approval from the Region 4 ESC team, these communications and materials will be released to publicly. These materials will be completed within 90 days of contract award.

AIS sales representatives and sales leaders will attend regional NIGP chapter meetings and summits in their respective regions and areas. The goal to attend these shows would be to make connections with purchasing decision makers who are involved with Region 4 ESC partners or looking for a partner supplier solution. Follow up, post event will be made by AIS team members to ensure needs are met with AIS or Region 4 ESC partners.

AIS will attend the annual NIGP Forum in Chicago, IL in August 2020. AIS's booth space will include AIS's most relevant products and will be staffed by our regional sales team. AIS will promote the NIGP Forum prior to the event to any pre-registered attendees, AIS dealers, designers and influencers. During the show, AIS will post on social media our participation and activities happening throughout the event.

Post show follow up will include communications to all show attendees. AIS representatives will receive contact information for anyone who visits the AIS booth and wishes to learn more or has an opportunity for an AIS solution. These attendees will be contacted within 48 hours after the show, if not sooner.

The AIS Marketing team will work with our creative partners and graphic design team to create advertising in appropriate trade publications, dealer network communications and social media connections.

AIS will continue to update Region 4 ESC partner brochures and program presentations with client install photos, project overviews and testimonials. We will continue to reach out to AIS dealers and Region 4 ESC partner contacts with new product and program introductions and promotions through email blasts, newsletters and social media channels.

AIS will create a website homepage accessed from www.ais-inc.com that will be co-branded for Region 4 ESC and AIS. This website will include a link to a pdf copy of the original RFP and Master Agreement and amendments. There will be links to the products offered on the Region 4 ESC agreement including brochures, price lists, idea starters, fabrics and finishes, product stylist, spaces by application, image library and specification resources. AIS's toll-free number, 800.434.7400 and contact email address, info@ais-inc.com, for Region 4 ESC will be available on this site.

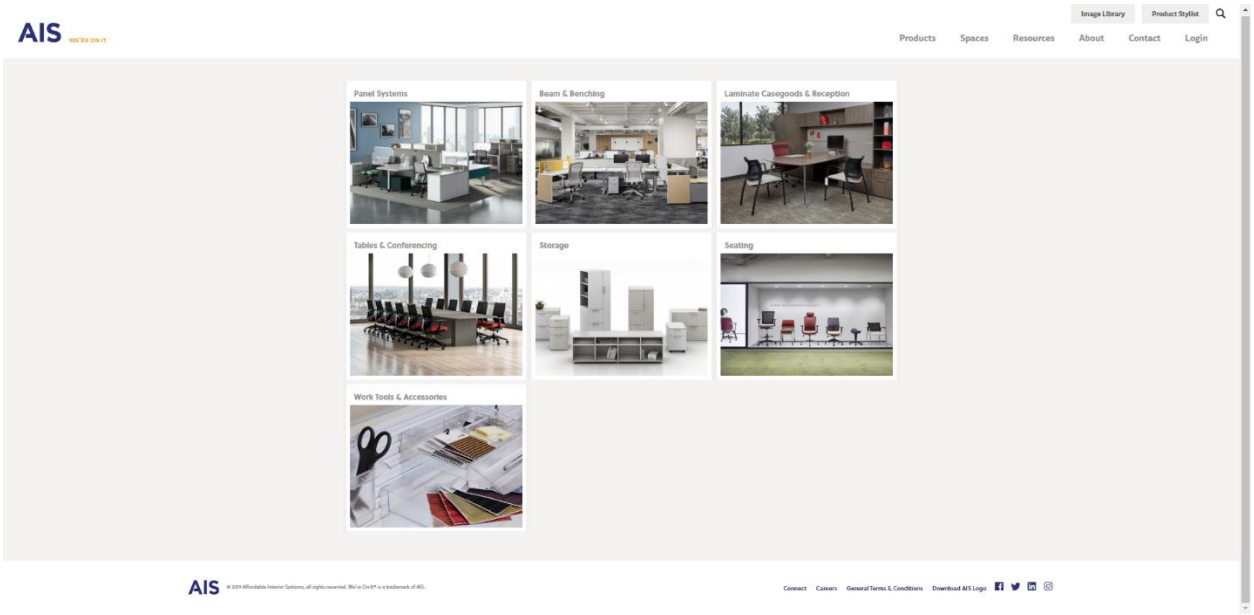
Additionally, this web page will link to Region 4 ESC website and online registration page.

As far as transitioning existing public agencies to utilizing the Region 4 ESC contract, AIS must remain compliant with existing federal, state and local contracts. When applicable, AIS will make the recommendation to use the Region 4 ESC contract. We recognize the multiple benefits to utilizing the Region 4 ESC contract. AIS will position the Region 4 ESC contract with a higher incentive to authorized dealers for using the Region 4 ESC contract.

xii. Describe the financial condition of Offeror.

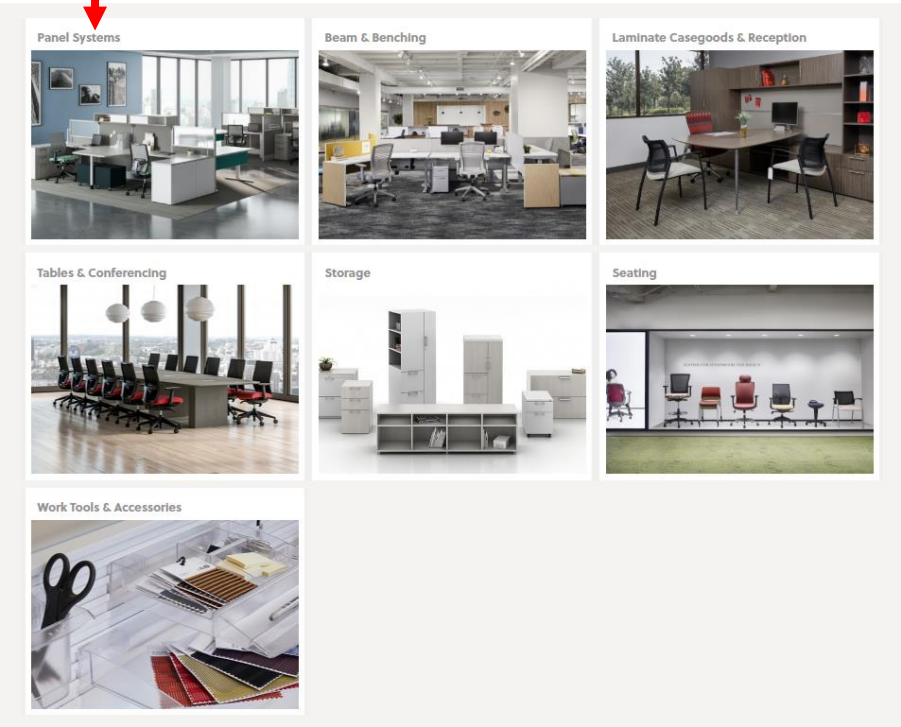
As a privately held company, AIS has a very strong financial position with equity over $80MM. Our current ratio is 1.4 to 1. Our 2019 sales will be over $219MM.

xiii. Provide a website link in order to review website ease of use, availability, and capabilities related to ordering, returns and reporting. Describe the website's capabilities and functionality.
www.ais-inc.com



AIS will create a website homepage accessed from www.ais-inc.com that will be co-branded for Region 4 ESC and AIS.

This website will feature:



- Link to PDF copy of the original RFP and Master Agreement with amendments
- Link to Region 4 ESC website
- Product offering
- Program discounts
- Price lists to verify list pricing
- Product information
- AIS representatives list
- Search capability to find a local dealer and showrooms
- Image library with thousands of images of our products
- Idea starters
- Colors, materials, finishes to choose from for product lines
- Environmental/sustainability information
- Warranty information
- Ability to check order status
- Design resources
- Product Stylist for seating
- AIS Contact information with toll free number and contact email address

xiv. Describe the Offeror's safety record.

Health & Safety

There is no job so important – nor any service so urgent – that can't we take time to work safely. At AIS, we believe that every person is entitled to a safe and healthy environment in which to work. Our policy is oriented toward affirmative control and minimization of risk to the greatest extent possible. We have a basic responsibility to make the safety of employees our concern because, at AIS, our employees are our most valuable asset. Therefore, safety is everybody's business and is to be given primary importance in every aspect of planning and performing all AIS activities so that our employees are protected against industrial injury and illness.

Establishment and maintenance of a safe working atmosphere is the shared responsibility between AIS and its employees at all levels of the organization. To this end, every effort will be made to achieve the goal of accident prevention and health preservation.

Each employee begins their career at AIS with comprehensive Health & Safety Training. The AIS' Health & Safety Team meets regularly to coordinate new hire training, and to keep informed on new processes and regulations that relate to employee health and safety. Regularly, the AIS Health & Safety Team will review and update our policy to incorporate any changes in the laws and regulations that govern our conduct, such as OSHA, as well as internal procedures and requirements.
We expect our employees to do their part in making our program an effective one. All employees are required to immediately report any job-related injury to their direct supervisor or manager so that corrective actions can be implemented that will detect, avoid, or respond to actual and potential threats to the health and safety of AIS' personnel.

- Avoid overloading electrical outlets with too many appliance or machines
- Use flammable items, such as cleaning fluids, with caution
- Walk – don't run
- Use stairs one at a time
- Report your manager if you or a co-worker becomes ill or is injured
- Ask for assistance when lifting heavy objects or moving heavy furniture
- Smoke only in designated smoking areas.
- Keep cabinet doors, file and desk drawers closed when not in use
- Sit firmly and squarely in chair that roll or tilt
- Wear or use appropriate safety equipment as required in your work
- Avoid "horseplay" or practical jokes
- Start work on any machine only after safety procedures and requirements have been explained (and you understand them)
- Use air hoses only for the use intended. Avoid blowing air at yourself or anyone else
- Wear appropriate personal protective equipment, like shoes, hats, gloves, goggles, spats, hearing protectors, etc., in designated areas or when working on operation which requires their use.
- Keep your work area clean and orderly, and the aisles clear
- Stack materials only to safe heights

- Watch out for the safety of fellow employees
- Use the right tool for the job, and use it correctly
- Wear gloves whenever handling castings, scrap, barrels, etc.
- No cell phones on factory floor or in use during work hours
- No headphones are allowed on the factory floor
- Operate motorized equipment only if authorized by your immediate manager. All operators must be licensed by AIS

xv. Provide any additional information relevant to this section.

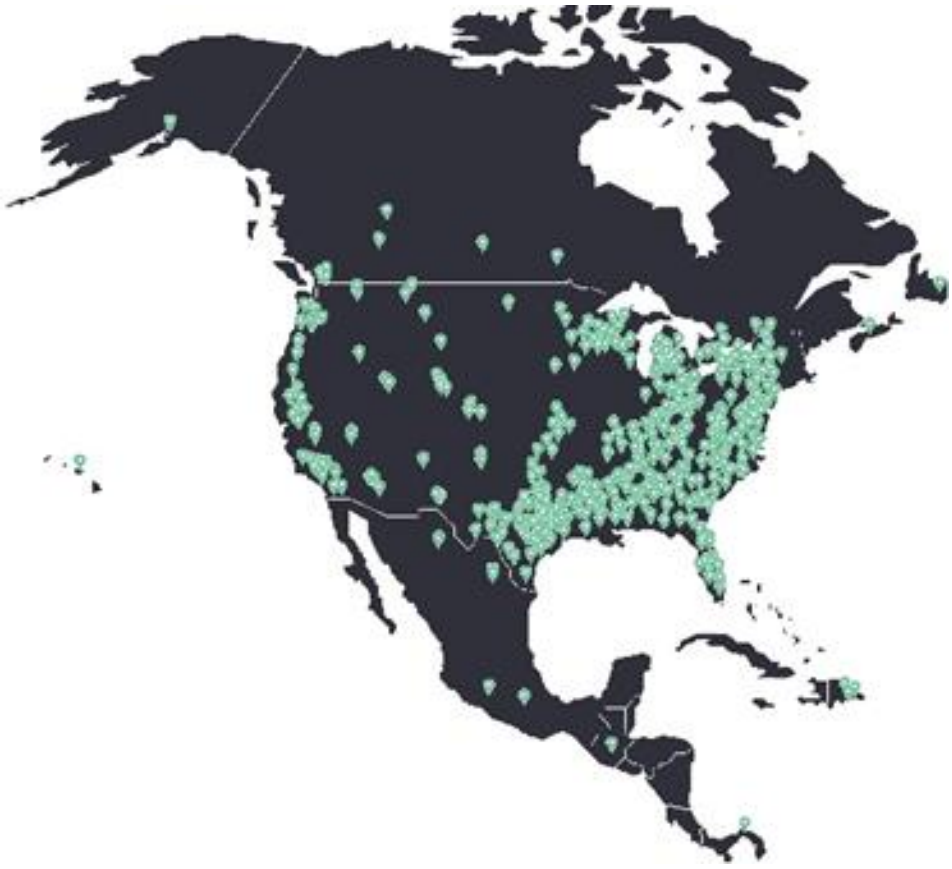
Appendix D, Exhibit A

3.1 Company

A. Brief history and description of Supplier.

A Story of Innovation.

In 1989 founders, Arthur Maxwell and Bruce Platzman started AIS by procuring and installing used furniture. AIS grew quickly in the early 90s to be a scalable company that embarked into manufacturing. We believe that good ideas will get you everywhere. In less than 30 years, we've evolved from a start-up based on the simple intent to adopt lean manufacturing to become one of the most highly regarded names in the industry. AIS has earned acclaim for product design, ground-breaking manufacturing and unparalleled sustainability across the industry and within our local and regional communities. And, our deep roots in New England are a great source of pride for us.



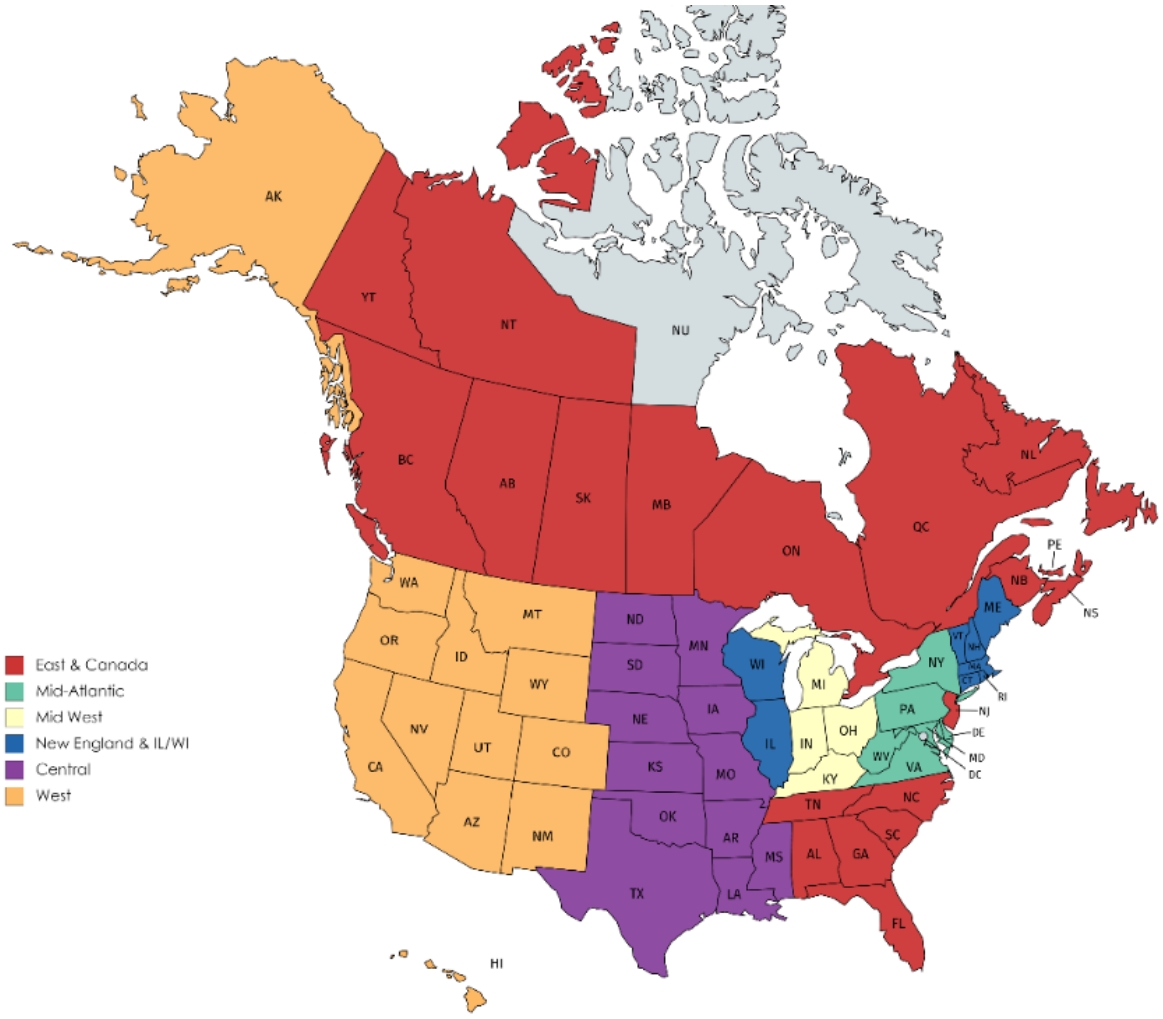
Tremendous growth and recognition.

AIS set out to disrupt the industry through true innovation and sustainability—a vision that has consistently paid off for our company and our customers. The talented, enthusiastic AIS team has virtually reinvented product development and manufacturing processes, helping us grow far faster than industry benchmarks and earning OFDA Manufacturer of the Year nine times since 2008. Today, with sales teams across North America and over 800 employees at our new 600,000-square-foot factory and headquarters, we've risen to annual sales of more than $200 million. One thing, however, will never change—our commitment to superior products with industry-beating lead times and attractive prices.

More than providers. True partners.

Through a robust network of expert dealers, our employees drive to continually break new ground with inventive products and processes, and unwavering dedication to our customers and community. AIS has established itself as a partner of choice—whether furnishing a start-up space or fulfilling a new vision for a Fortune 500® firm.

Strong Dealer Network Across North America.



Sustainable from the start.

Since the beginning, AIS has led the way in sustainability—making social responsibility and our environment a top priority. Our visionary team recognized early on that efficient manufacturing is naturally more sustainable, requiring fewer resources and less energy. We've invested in alternative energy and moved toward carbon neutrality. And as a privately held firm, AIS has greater freedom to explore innovative processes and equipment, as well as ways to eliminate wasted time, steps, inventory and resources, as we strive to inspire a greener industry overall.

Today, all AIS products are SCS Indoor Advantage™ Gold certified for air quality, and AIS systems contain at least 40% recycled materials. What's more, we've achieved BIFMA e3 level® certification on our products, and more than 50% of the power used in our state-of-the-art facility is returned to the grid through our rooftop solar panels.

From the talent we hire to the way we design, manufacture and distribute our products, AIS has always thought differently.

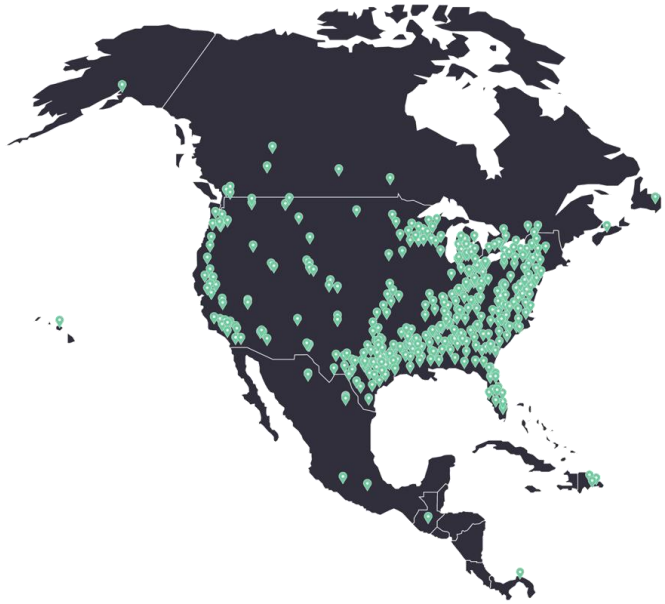
C. Number and location of support

AIS has permanent showrooms at its Leominster headquarters and in Chicago, New York City and Washington, D.C. With locations across the U.S., AIS has more than 800 employees and over 1 million square feet of office, showroom and factory space.

Chicago: Merchandise Mart, Suite 1086, Chicago, IL 60654
On the 10th floor of the Merchandise Mart in Chicago you'll find our 7000+ sf showroom where visitors are welcome daily.

New York: 257 Park Avenue South, 3rd Floor, New York, NY 10010
This recently renovated showroom highlights our products and houses our New York sales team.



Washington D.C.: 1400 I Street, Suite 750, Washington DC 20005
Located on I Street in Washington, DC – just a stone's throw from the White House, our AIS showroom features a wide range of our products and welcomes visitors regularly.

Corporate Headquarters: 25 Tucker Drive, Leominster, MA 01453
Just 45 miles from Boston, our headquarters shines, and guests visit regularly.

AIS has over 1000 dealers/support centers located across the United States and other countries. Our authorized dealer list is included in our response.

Strong Dealer Network Across North America.

D. Annual sales for the three previous fiscal years.

- 2019: $219MM
- 2018: $197MM
- 2017: $170MM

Affordable Interior Systems, Inc. (AIS) FEIN: 04-3489948

Our Dunn & Bradstreet report is managed by our parent company, Haworth, Inc. We are not able to provide the report in our response.

Haworth, Inc FEIN: 38-6053093

F. Describe any green or environmental initiatives or policies.

At AIS, sustainability isn't about making incremental changes to meet third-party standards—it's about fully reimagining design and manufacturing to create the leanest, most earth-friendly products and processes possible. Our company was founded on a single noble vision—to build tremendous value and efficiency into superior workplace products. Reducing waste, minimizing energy use and keeping items out of landfills are a natural part of achieving our mission. For example, durable, reconfigurable products last longer and can be reused. Cutting out weight reduces the drain on resources. And returning more than 50% of the energy we use every year back to the grid through our 10,000 solar panels ensures savings can be passed along to our customers. All AIS systems are SCS Indoor Advantage™ Gold certified for air quality, we hold BIFMA e3 level® certification, and we can help customers gain points toward LEED® certification for new and renovated environments. Our AIM Sustainability award further reinforces our leadership and commitment to sustainable practices.

Over 10,000 solar panels on roof of HQ in Leominster, MA.

Sustainability from design through delivery.

The AIS design philosophy recognizes that the greatest environmental impact can be made at the concept stage, as we select materials and construction methods. We continually challenge ourselves and, as a result, our products all contain at least 40% recycled materials and are manufactured in a facility where a majority of the energy is returned to the grid through rooftop solar panels.

Investments in emerging manufacturing technologies, alternative energy and carbon offsetting have helped bring our carbon footprint to almost zero.

Our partnership with ANEW helps ensure our used furniture has new life at nonprofits and public agencies. And, since our products are designed for easy disassembly and recycling, they will minimize environmental impact at the end of their useful lives. Sustainability is not a single, discrete initiative. It's been woven through everything AIS has done since we opened our doors.

Sustainability is not a single, discrete initiative. It's been woven through everything AIS has done since we opened our doors.

Corporate Sustainability Policy

AIS is committed to achieving excellence through continuous improvement and teamwork. As an established world- class manufacturer, it is our goal to achieve prominence within the office furniture industry by providing the best value to both our customers and our shareholders. AIS will aggressively pursue our following beliefs:

- AIS will exceed our customers' expectations in all that we do.
- AIS will pursue profitable growth returning value to our shareholders and better opportunities for our employees.
- AIS will deliver a low cost, innovative product on time, every time AIS will continuously improve our product quality as we strive for perfection.
- AIS will utilize the most environmentally friendly manufacturing processes and materials.
- AIS will aggressively eliminate all wastes throughout our operations.
- AIS will train and nurture our employees, our most valuable resource.
- AIS will operate with integrity and will participate in our civic duties.
- AIS will comply with all applicable environmental, health, safety, and inclusiveness laws and regulations

1.0 Environmental Sustainability

AIS is committed to the production of high quality, durable products that conserve resources. We understand that today's actions could be tomorrow's consequences. That's why AIS carries the philosophy of using today's actions to build a cleaner, healthier environment we can all benefit from. At AIS, sustainability is our corporate responsibility – from the environment, our products, our people and our processes, we are committed to developing sustainable business practices while enhancing the value offered to our customers.

Design for Environment
The opportunity for improving the environmental performance of our products starts on the drawing board. AIS' recognizes the importance of environmentally conscious design and has developed a Design for Environment (DfE) team committed to incorporating sustainable elements into our design process. When developing new products our DfE team considers and strives to improve the following design elements: Renewable Materials, Recycled Materials, Recyclable and Biodegradable Materials, End of Life Management, Water Management and Energy Efficiency.

Design for Durability / Upgradeability
To provide our customers with the quality they desire, AIS designs and manufactures products to live long and useful lives. This is exemplified by a limited lifetime warranty on all systems furniture to the initial purchaser which is valid for as long as the product is owned by the original Buyer. The warranty which runs from the date of manufacture, covers defects in materials and craftsmanship found during normal usage of the products during the warranty period. Please see our product Lifetime Warranty for more information.

At AIS, we know that it can be difficult to foresee the future needs of your business. That's why our systems are designed to withstand repeated service, repair and handling for whatever the road ahead may bring. Our systems also feature standardized product parts and components, which are available to facilitate maintenance, servicing, and reassembly.

Energy Conservation
By reducing our energy consumption and GHG emissions, AIS is making great strides in reducing our impact upon the environment while ensuring our sustainability as an organization. To do so, AIS practices an approach of continuous improvement to reduce our energy and carbon footprint. In fact, AIS has established a goal of zero GHG emissions. Our environmental management system ensures that we are establishing realistic targets and objectives for the future while holding ourselves accountable to these goals.

Still we felt this was not enough. We decided to think outside of the manufacturing walls and investigate ways to reduce our current global greenhouse gas (GHG) footprint by investing in renewable energy solutions and other low or zero GHG emission strategies. We believe this would provide benefits to not only AIS and our customers, but also the industry as a whole by taking a leading position in the right direction. Annually, AIS measures the CO2 emissions produced from our manufacturing operations, and with this data we are able to identify and implement strategies that ensure our energy is produced by renewable sources. To involve our stakeholders on this journey, AIS is committed to publishing our GHG emissions to hold ourselves accountable as we continue to strive towards our zero emissions goal.

Energy Efficient Purchasing
Whenever possible the AIS Purchasing Team will quote and purchase products that are Energy Star rated or have high energy efficiencies.

Solid Waste Management
As a part of the AIS Lean manufacturing philosophy, we analyze our manufacturing streams thoroughly and cut waste from every possible avoidable angle. With every new process or product that is developed our Lean committee continues to review and reduce waste whenever possible. Through these efforts, it is the goal of AIS to achieve 100% landfill diversion of solid waste from our manufacturing operations through our waste reduction efforts, lean manufacturing, recycling and product reuse.

Harmful Chemicals
It is the goal of AIS to assess and manage all chemicals associated with our products, processes, and maintenance operations in a manner that complies with all applicable federal, state, and local environmental regulations. As a good steward of human health and the environment, AIS will also go beyond basic chemical management to develop and implement a program that will address areas such as, but not limited to:

i. continuous improvement in the identification, reduction, and potential elimination of chemicals of concern Updated: 10/4/18
ii. prevention of pollution through reductions in exposure of workers, customers, and the environment to harmful chemicals
iii. consideration of the life cycle impacts through our DfE and chemical management plan of our products, manufacturing processes, and maintenance activities
iv. responsibility to the well-being of our workers, community, and the broader environment

G. Describe any diversity programs or partners supplier does business with and how Participating Agencies may use diverse partners through the Master Agreement. Indicate how, if at all, pricing changes when using the diversity program.

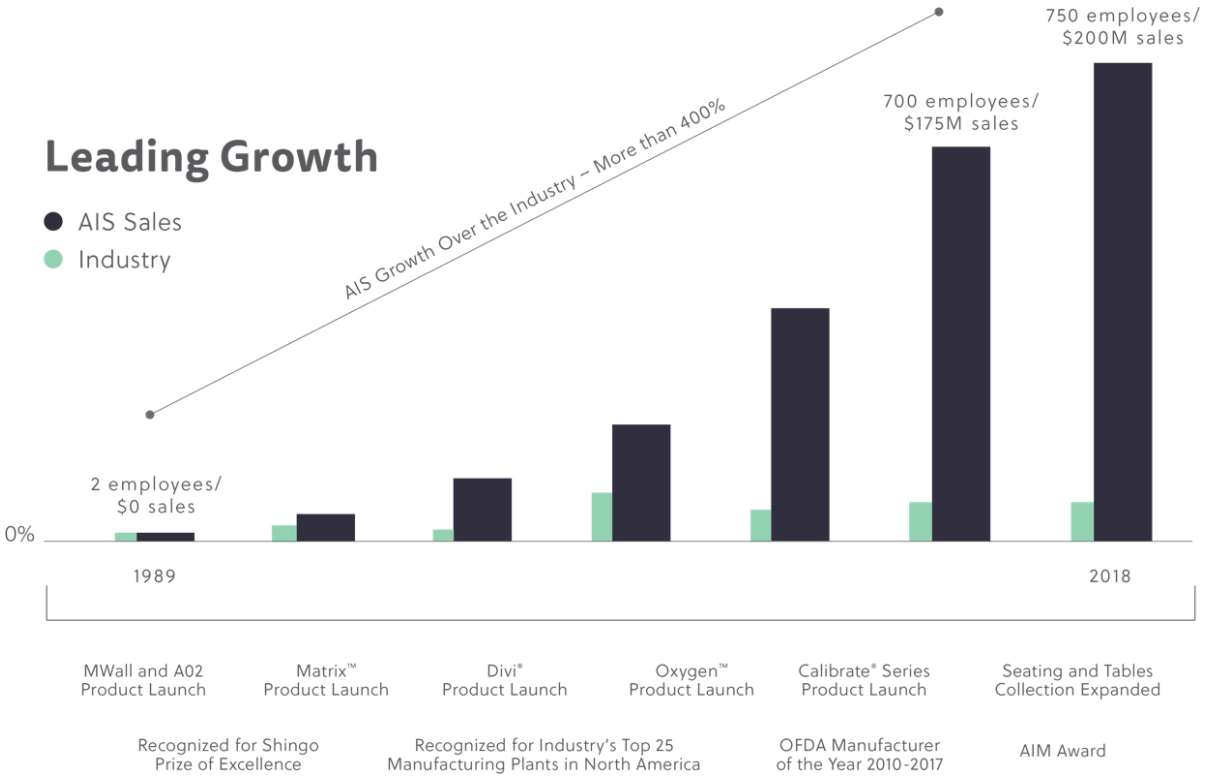
As a large business GSA contract holder, AIS is required to submit yearly small business subcontractor plans and reports to GSA. These plans and reports must be approved by GSA and the Small Business Administration (SBA). AIS makes a good faith effort to meet the established small business subcontracting goals while being cognizant of the overall cost to customers. Utilizing small businesses has the potential to reflect an increase in purchasing costs, resulting in inflated selling points. AIS' team of professionals will explore all small business opportunities that fall within our subcontracting plan while avoiding any extended impact on our customers.

AIS has numerous authorized dealers that hold minority status. Certificates for minority status can be provided by the authorized dealer. AIS can offer the following socio-economic set-aside solutions:

- Small Business
- Small Disadvantaged
- Woman Owned
- Woman Owned Small Business
- Veteran Owned Small Business
- Service-Disabled Veteran Owned Small Business
- HUBZone
- 8(a)
- And more

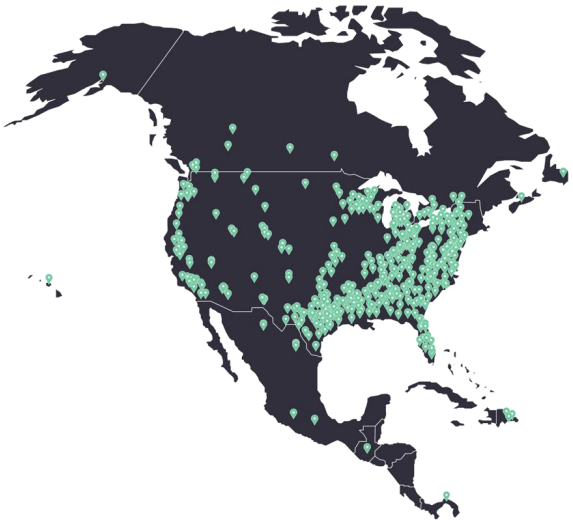
Being awarded the Region 4 ESC/OMNIA Master Agreement would provide a purchasing avenue for our clients that qualify. The Master Agreement would reduce our client's administrative costs by accessing this cooperative contract that has already been advertised and publicly competed, as well as enables the economic benefits of volume purchasing.

H. Describe any historically underutilized business certifications supplier holds and the certifying agency. This may include business enterprises such as minority and woman owned, small or disadvantaged, disable veterans, etc.



AIS is classified as a large business and does not hold any set aside certifications.

I. Describe how supplier differentiates itself from its competitors.



AIS is known in the marketplace for being an innovator that leads the industry in sustainable, lean manufacturing, lead-time performance and manufacturing flexibility.

The many advantages that differentiate AIS from its competitors include:

1. Our growth. AIS has outpaced the industry by more than 400%. Our growth is remarkable every year and our teams are committed to our customers every day.

2. A dealer network of over 1000 dealers across the United States and other countries. Our authorized dealer list is included in our response.

3. AIS offers the best lead times in the industry and 75% of our products ship in two (2) weeks or less. If successful as a vendor partner, we will provide key internal contacts form our customer service and project management teams that can expedite emergency orders. If all the components of the emergency order are stock items, we can typically respond in less than two (2) weeks or even shorter depending on the products specified.

4. A low maximum order limit (MOL) allowing increased opportunity for extending deeper discounting.

5. Shingo Prize winner for lean manufacturing.
The Shingo Prize for Operational Excellence was established in 1988 to promote awareness of lean manufacturing concepts and recognize companies in the United States, Canada, and Mexico that achieve world-class manufacturing starts. The Shingo Prize philosophy is that world-class business performance may be achieved through focused improvements in core manufacturing and business processes. AIS is a proud recipient of the Shingo Prize, and continues to uphold the highest manufacturing standards.

THE SHINGO PRIZE for OPERATIONAL EXCELLENCE

6. The AIS design philosophy recognizes that the greatest environmental impact can be made at the concept stage, as we select materials and construction methods. We continually challenge ourselves and, as a result, our products all contain at least 40% recycled materials and are manufactured in a facility where a majority of the energy is returned to the grid through rooftop solar panels.

Investments in emerging manufacturing technologies, alternative energy and carbon offsetting have helped bring our carbon footprint to almost zero.

Our partnership with ANEW helps ensure our used furniture has new life at nonprofits and public agencies. And, since our products are designed for easy disassembly and recycling, they will minimize environmental impact at the end of their useful lives. Sustainability is not a single, discrete initiative. It's been woven through everything AIS has done since we opened our doors. Sustainability is not a single, discrete initiative. It's been woven through everything AIS has done since we opened our doors.

7. No third-party design houses. All products are designed in-house by a small team.

8. Ability to reconfigure existing product by using updated products and universal parts. AIS products are easily reconfigurable and can easily incorporate new product additions. This saves time and money on purchasing agencies by not having to purchase completely new office furniture.

9. Few layers of management. We accomplish action items faster and can implement change quickly.

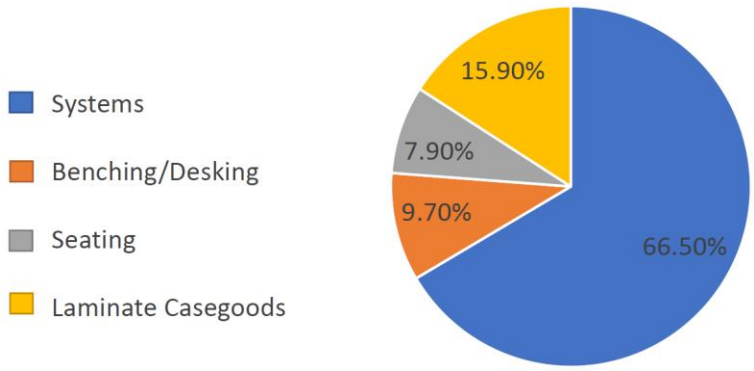
10. No job is too small. Whether you're a two-person firm or a global enterprise, AIS and our broad dealer network are ready to help you create work environments that best support your people and their unique needs.

11. Specification department to facilitate multiple design needs include design checks, specification support, rendering services and mock-up/showroom reviews.

12. Project managers and field service managers available on call to assist with installations.

J. Describe any present or past litigation, bankruptcy or reorganization involving supplier.
AIS does not have any present or past litigation, bankruptcy or reorganization.

K. Felony Conviction Notice: Indicate if the supplier
B. is not owned or operated by anyone who has been convicted of a felony.



L. Describe any debarment or suspension actions taken against supplier
AIS has not and does not have any debarment or suspension actions.

3.2 Distribution, Logistics

A. Describe the full line of products and services offered by supplier.
AIS is offering our entire product portfolio and all current commercial price lists. Our products can be classified in the following categories:

- Systems Furniture
- Freestanding Furniture
- Seating/Chairs
- Soft Seating
- Filing Systems, Storage and Equipment
- Technology Support Furniture
- Cafeteria Furniture
- Educational Office Furniture
- Career/Technical Education Furniture
- Related Products, Support Services and Solutions

The AIS product portfolio includes panel systems, benching and desking systems, tables, casegoods, storage and seating. The percentage of 2018 sales per product line is illustrated below.

AIS provides products and services for all phases of this project that will not only meet, but also exceed your expectations. AIS and our extensive dealer network will work together to accomplish your goals of a best-in-class office space that meets a wide variety of needs, while providing an environmentally preferred product, installed in a timely manner, at the lowest cost possible.

We are proposing our complete product portfolio listed on following pages.

Matrix

Creates sophisticated, flexible work spaces that stack up to stand the test of time—in the open plan, private offices, reception areas, conference rooms, and more. Paired with components and accessories from our Calibrate line, employees enter a new dimension of collaboration and productivity.

Open Plan Options: Introduced in 2002, Matrix offers users a 3" stackable panel with multiple options, including open raceways and upmounted glass. It's broad statement of line provides options for departments that need openness in order to collaborate, to departments that have a high need for privacy.

Functionality: Strong foundational and power elements ensure a broad range of applications thanks to the steel frame, stackability and flexible power management, ensuring that Matrix can withstand multiple changes. Clients can refresh the look of their space with tiles that can be interchanged quickly on-site. Stack options allow a client to modify their space - an open workspace can easily become a private office with stacks that can go floor to ceiling and an optional door for complete privacy. Matrix offers power every 8" of height, allowing for more capacity and placement options than any tile system in the market.

Integration: Matrix integrates well with the Calibrate Series of Casegoods and Storage to create a higher end look in the open plan or within the walls of a floor-to-ceiling Matrix office. A Matrix spine can easily integrate with Day-to-Day and Calibrate Conference height adjustable tables for a more ergonomic option, with power and data easily accessible at any height.

Divi

Slice, dice, and define the open plan with Divi. This smart, scalable panel system was made for the realities of modern work, where people need a healthy balance of privacy and connection. A smart subset of popular Divi elements are available through the Divi Fast Track program, with 10-day lead times.

Open Plan Options: Divi Linear is offered in monolithic, segmented, glass and limited stack panels, used alone or blended. Additional panel options include embossed metal, laminate and whiteboard. Change the look of open plan with upmounted storage and frameless glass screens.

Functionality: Divi's uncomplicated design allows for quick installation and ease of change with a universal hinge that allows 90-, 120- and 135-degree configurations using a single platform. Power and data needs are easily met through a 6" base raceway. The new Divi Linear is compatible with the former Divi panel design, ensuring elements can be retrofitted with ease.

Integration: Divi Linear forms the foundation for integration with Calibrate® Series laminate storage, Day-to-Day® Tables and readily accommodates height adjustable tables.

Divi Fast Track: Quick ship program with **10-day lead times**.

AO2

One of our longest tenured products for a reason—it works, like all timeless design should. AO2 is a monolithic panel system designed to be stand-alone, but it can also be used interchangeably or in tandem with Herman Miller® Action Office Series 2.

Open Plan Options: AO2 provides you the flexibility to design your space to meet your needs. Panels 2" thick and are offered in three heights, six widths and quarter-glass, half-glass and full glass options. From cluster working environments to private offices, you can design AO2 to work for you. Utilize low-panel heights to boost a teaming environment or integrate high panels to create an increasingly private configuration. Couple your chosen layout with storage options and an Element Executive chair to create a complete office space.

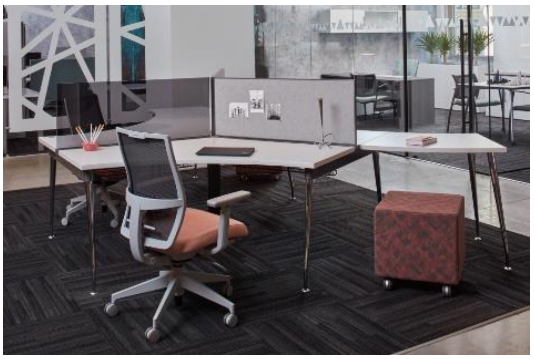
Functionality: The AO2 system is equipped with a 6” base raceway, 3 3/8" thick, to meet demanding electrical and data needs. AO2 panels are constructed of a rigid honeycomb core and trimmed with a steel frame. With virtually unlimited worksurfaces, components, accessories and finish options, AO2 is the ideal combination of performance and value. These features, coupled with its compatibility with Herman Miller® Action Office®, make A02 a sensible value-based option to expand an existing office space for less.

MWall

Looks like a panel system but acts like a chameleon—blending naturally into virtually every office setting. The engineering is based upon a well-known, high-end system and can be enhanced for increased flexibility and electrical options. And it's priced right for companies on a tight budget.

Open Plan Options: With panels offered in four varying heights from 41" - 80" and six varying widths from 18" - 60", as well as quarter glass, half glass, and full glass options - you can create spaces that will work for every type of environment. MWall's connection system allows panel connections at 90, 120 and 135 degrees. MWall utilizes an aluminum topcap and base that can be painted in any color. Panels at 80" high can be used to create private office spaces and conference rooms.

Functionality: There is ample room in the MWall powered raceway for Category 5/6, or other cable requirements. The top channel data raceway allows for added capacity and flexibility with true power and data separation in a single panel. MWall includes the patented Z-Panel option, providing desk-height access to power and communications. Z-Panel enables workers to plug in power or data cables with ease while also providing voice and data cable separation.



Day-to-Day Power Beam

Ultra-efficient PowerBeam adds impressive capabilities to Day-to-Day tables. Available in multiple lengths, angles, and heights to optimize space within your floorplate, PowerBeam ties it all together, putting power just where it's needed. Thousands of table combinations, and the power to support them. There's nothing this dynamic duo can't do.

- Extruded aluminum 2.5" x 8" beam
- Straight, 90-, 120-degree connections
- Heights (3): 21", 25", 29"
- Widths (11): 36", 42", 48", 54", 60", 66", 72", 78", 84", 90" & 96"
- Supports:
  - 12" and 18" T-base and disc-base
  - End Panel
  - Calibrate Series Storage (29" PowerBeam only)
- Legs have 2" of built-in leveling
- Power Options:
  - 4 duplexes (equaling 8 outlets)
  - 3 duplexes (equaling 6 outlets) and 1 data outlet
  - Dual USB ports
- Basefeed options:
  - Undermount, ceiling and wall feed
- Non-powered option available
- Optional Vertical Wire Manager and Powercord Tray
- Screen Options: Fabric, Whiteboard, and Glass
- Paints: All AIS paint grades and COM
- Optional attachments: bag hook and mini-shelf

Oxygen

From open, collaborative spaces to more focused environments, Oxygen is designed to meet the demands of any workplace. It's engineered for the way your customers work today, but since change happens, it's also designed for their future. More people? No worries. Switching spaces? Not a problem. Oxygen can constantly adapt with its flexible components and versatile design.

Open Plan Options: Oxygen benching offers many options for the open plan including straight or angled legs, fabric and glass screens, and a rail system that houses all the worktools needed to be productive throughout the day. Oxygen's sleek lines and straightforward design create an open plan that is lighter in scale than traditional workspace options. Its broad product offering was designed to maximize density requirements in order to utilize real estate and adjust to changing business needs.

Functionality: Oxygen's structural spine accommodates electrical needs with a standard 8-wire multi-circuit powerway. A 10-wire multi-circuit options is also available. Oxygen includes a standard tiered wire management basket for routing electrical and data bundles separately. The optional flip-top worksurface access box provides termination single gang device plates and access to duplex outlets. Desktop power access is also available.

Integration: Like many AIS products, Oxygen was designed to integrate. Storage needs can be met with Calibrate or L Series Storage. Work needs can be met through the integration with the AIS Universal Worktool line of products.

Aloft

Aloft is height-adjustable benching that's tailor-made for the open plan. A NeoCon Silver award winner, Aloft combines the features and functionality of a bench system with the ergonomic health benefits of standing workstations. For teams that need dynamic benching, this thoughtfully designed platform rises – and lowers – to the occasion.

Open Plan Options: Aloft worksurfaces are offered at fixed height or fluid programmable motorized option and are designed to meet the latest ergonomic standards for maximum health benefit. Aloft offers multiple worksurface shapes to meet the needs different workstyles. Its height adjustable 120-degree worksurfaces maximize space and provide more room to work. Additionally, privacy can be achieved at any height with screens that are mounted to Aloft's worksurfaces.

Functionality: Aloft's under the worksurface lateral baskets and vertical belts keep the office neat while channeling cables to the worksurface. The under-mount power can support up to four duplex outlets or combinations with two USBs per seat. It's return surfaces can receive power and data, creating multi-purpose work areas that allow users to find their most comfortable working position. Users will never be at a loss for their power needs in Aloft's user-friendly responsive spaces.

Calibrate Series

Calibrate Series has you covered—case closed. This collection of high-quality laminate casegoods looks great and works well across the private office. It's got a myriad of finishes, hardware options, and loads of styles to choose from. Best of all, it won't break the bank.

Comprehensive Product Offering: Calibrate offers an extensive statement of line with options for 2" high aluminum feet or a base that extends full to the floor. Pull options include Bar, L, Loop and Rectangle. Edge options include reverse knife edge and 2 mm. Leg options include tapered, round post, and straight. Existing AIS legs can be used: slim, slant, N, and A legs. Height adjustable options are available with a laminate base and can be ordered in programmable or manual lifts with a range of 26" - 46".

Wide Variety of Finish Options: Calibrate Series includes over 20 laminate colors and 5 paints. All of the aesthetic options can be used interchangeably between Calibrate Series Casegoods, Storage and Conferencing.

Integration: All Calibrate Series elements can be used alone to create beautiful private offices and boardrooms. Elements can also be integrated into the open plan to enhance Matrix, Divi, Oxygen and Aloft. All heights are synchronized within the line and with other AIS products without misalignment of heights. Calibrate Series laminates can be shared with all relevant AIS products to create a cohesive look across the floorplate.

Calibrate Conferencing

Calibrate Conferencing is current. It's contemporary. It's created for productive meetings, where people are connected to their technology and each other. Design choices include a variety of sizes, shapes, edge details, and bases. Power and data options optimize convenience. Best of all, with more than 20 high-quality laminate options, they coordinate seamlessly with other Calibrate Series products.

Comprehensive Product Offering: Calibrate Conferencing offers an extensive statement of line including buffets, bookcases and receptacle bins. Table shapes include rectangular, boat and tapered. Edge options include reverse knife edge and 2 mm. Legs are always fully laminate with 2, 3, and 4 base options. The line includes a height adjustable table with a laminate base and can be ordered in programmable or manual lifts with a range of 26" - 46". Additionally, tables are available with end panel storage with and without monitor mounting at standing or seated height. All tables can offer power and data integration.

Day-to-Day Tables

With over 6,500 design combinations, Day-to-Day Tables aren't just any table. They're every table. Formal, informal, training, café, height adjustable, occasional—whatever you need. From Monday meetings to Friday deadlines, Day-to-Day Tables deliver choice, value, and flexibility you can count on daily.

Features:

- Flip-top/nesting, height adjustable and fixed tables
- A variety of top shapes to select from
- Multiple base options in polished aluminum or painted finishes
- Available in 16", 29" and 42" heights
- Tables available with glides or locking casters
- 2mm or reverse knife edge options
- 18 Grade A laminate options
- Many power/data choices

Height Adjustable Table Features:

- Electronic adjustment with soft start/stop and memory presets
- Travel speed: 1.5" per second
- Dual motors
- 23.6" to 49.2" height adjustment range
- 350-lb. lifting capacity
- 42.25" to 74" adjustable base width

Calibrate Storage (Laminate)

With pull-out storage, wardrobes, bookcases, pedestals, lockers, and more, Calibrate Series does everything good storage should. No matter the application – traditional, open plan, etc. – you'll appreciate the finish choices, storage possibilities, smart design details, and super-easy integration with other AIS products.

Comprehensive Product Offering: Calibrate Series Storage offers an extensive statement of line including pedestals, lateral files, wardrobe storage towers, pantry pull-out storage, bookcases and lockers. Storage ranges from 28-42" on the floor, has four handle options and 2 feet options.

L-Series Storage (Metal)

A dynamic storage solution, L Series Steel Storage features loads of design options and finishes, ensuring ample design choices for working spaces. And they integrate beautifully with AIS desking and systems. Classic yet contemporary, L Series meets the needs of many users.

Features:

- 2, 3, 4, and 5 Drawer Lateral Files
- 49” and 65” Wardrobes
- B/F, B/B/F, F/F Mobile and Stationary Pedestals
- All storage standard with locks
- Bookcases
- 2 door cabinets
- 1” leveling glides
- Available with a laminate fronts

Seating

Task: Our task seating portfolio has just what you need for private offices, open plan spaces and conference rooms. From beautiful mesh backs to fully upholstered solutions, you'll see AIS has a great range of ergonomic task seating designed to ensure your teams have the support they need to perform. Portfolio includes 24/7 Devens, Natick, Upton, Bolton and Granite.

Side: Whether side or guest seating – or collaborative spaces, Grafton, Paxton, and Trix each bring their own personality to space. And with a variety of upholstery options to select from, it's easy to make the seating statement you want.

Multi-Purpose/Stack: Stow, Pierce, Triad and Rutland

Stools: Our range of stools and perches provide options for users today. And with height adjustability continuing to gain traction in the office, having the right seating to support posture shifts is important. Includes Natick, Upton, Pierce, Triad and Rutland.

Lounge: We haven't forgotten about the need for soft seating. In fact, we cover the range of fun to sophisticated with Volker Cubes and our LB Lounge Collection. Whether it's mobile cubes for side seating, settees for the lobby, booths for the café, or ottomans for the conference room, AIS has solutions.

Express Seating: The AIS Express Seating program supports those who need quality, comfortable seating quickly. We've selected the most common models, finishes and materials for our **three-day ship program**. When your employees need a place to sit, AIS has you covered with high-performing seating for workspaces, cafés, conference rooms, and more. With the AIS Express Seating program, new seating will be on its way in **just three days**.

Work Tools & Accessories

- Tasklights
- CPU holders
- Mobile whiteboards
- Paper flow elements
- Screens
- Anti-fatigue mat
- Monitor arms
- Hospitality cart
- And more!

AIS and our dealer network as a team can provide the following services:

- Furniture Sales and Consulting
- Design and Planning
- Delivery and Installation
- Project Management / Field Services
- Customer Service
- Reconfiguration Services
- Furniture Maintenance
- Furniture Refurbishment
- Furniture Removal and Repurpose
- Inventory and Inventory Control
- Technology Support
- Storage
- Product End-of-Life Support via ANEW

We have a fully staffed project team including furniture sales consultants, interior designers, space planners, project managers and project coordinators that use fully automated tools to take a project from concept to reality. Our customer service team will respond to Region 4 ESC/OMNIA staff and participating agency inquiries within one business day after receiving the request. Our project team is able to make field modifications and repairs on any item ordered. This process is supported through the utilization of electronic tools including, but not limited to CAD, 20/20, CAP and electronic order entry process. With our authorized dealer network, we have the personnel, vehicles and equipment available to make deliveries.

B. Describe how supplier proposes to distribute the products/service nationwide. Include any states where products and services will not be offered under the Master Agreement, including U.S. Territories and Outlying Areas.

AIS' manufacturing facility fulfills 250 sales orders a day that equates to coordinating approximately 650 pallets and dozens of trucks a day. AIS successfully supports large projects including international projects, as well as shipping small orders. AIS will work through the servicing dealer network of over 1000 dealers to provide product representation and sales support. AIS will serve its customers through a network of locally owned and operated dealers across the entire United States and Outlying Areas.

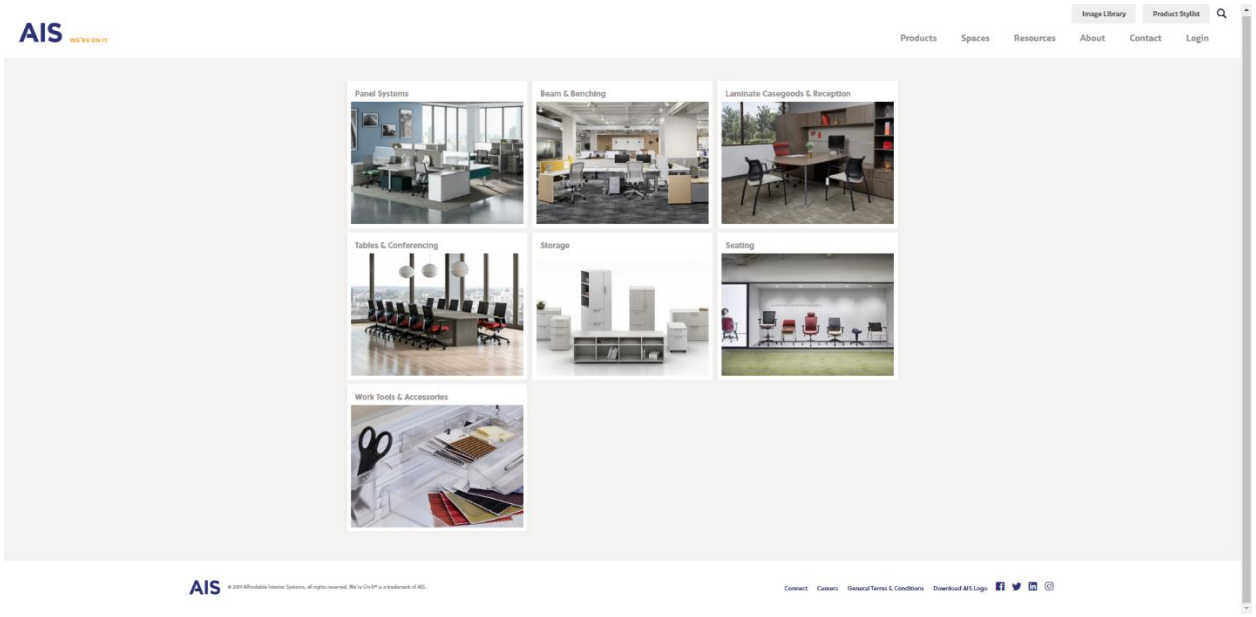
AIS' robust dealer network of authorized dealers will design, order and install products. For product specification, pricing and services, customers can email info@ais-inc.com or call our headquarters at 978.562.7500 or toll-free at 800.434.7400. The customer's request will be forwarded to a local AIS representative and/or dealer within 24 hours.

All products are made at our factory headquarters in Leominster, MA. Our geographic coverage includes the entire United States and Outlying Areas. For international shipments, the authorized dealer secures the freight forwarder of choice. AIS works with expert freight forwarders to coordinate product leaving AIS to the appropriate port. The freight forwarding company will then work with customers/service providers to manage containers and further

international shipping logistics. Once the freight leaves AIS's docks, the dealer is responsible for coordinating delivery to the final destination.

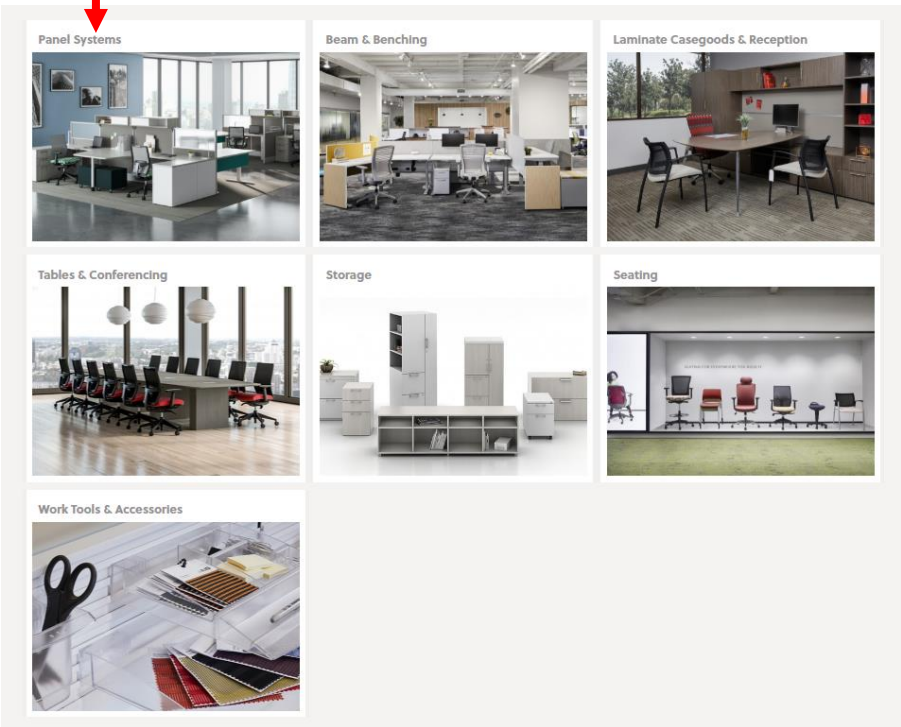
C. Describe how Participating Agencies are ensure they will receive the Master Agreement pricing; including all distribution channels such as direct ordering, retail or in-store locations, through distributors, etc. Describe how Participating Agencies verify and audit pricing to ensure its compliance with the Master Agreement.

Participating agencies can work with our authorized dealer network to verify Master Agreement pricing compliance. Our authorized dealers' proposals/quotes to Participating agencies will have list price and net price. Participating agencies will work with our dealer network for direct ordering and for showroom locations.



Any participating agency is welcome to work with our accounting department to perform necessary audits to confirm compliance with the Master Agreement.

In addition to working with our authorized dealer network, Participating agencies will have a Master Agreement dedicated website that will house all pertinent and useful information required by Region 4 ESC and OMNIA customers. This website will feature:



- Product offering
- Program discounts
- Price lists to verify list pricing
- Product information
- AIS representatives list
- Search capability to find a local dealer and showrooms
- Image library with thousands of images of our products
- Idea starters
- Colors, materials, finishes to choose from for product lines
- Environmental/sustainability information
- Warranty information
- Ability to check order status
- Design resources
- Product Stylist for seating

D. Identify all other companies that will be involved in processing, handling or shipping the products/service to the end user.

AIS works through a network of over 1,000 dealer service providers across North America. These dealers will work with the end users to identify project specifications, delivery and installation needs.

Once the project scope has been defined through specification, the purchase order is sent to AIS's Data Entry team. The Data Entry team process the order for manufacturing. After the order is built, AIS shipping team will coordinate logistics using third party shipping carriers. Depending on size the size of the order/number of pallets AIS will arrange either a dedicated Full Truck load carrier or a shared shipping carrier or LTL.

During the specification process the dealer and AIS will work with the end user to select a certified AIS installer to assist with product installation within the customer's facility.

E. Provide the number, size and location of Supplier's distribution facilities, warehouses and retail network as applicable.

AIS operates both its manufacturing and administrative facilities under the same roof in our 600,000 sq/ft headquarters facility located in Leominster, MA. This facility features a newly updated and expanded showroom. Additionally, AIS operates an additional 550,000 sq/ft private label OEM facility in Cameron, TX.

AIS has permanent showrooms at its Leominster headquarters and also in Chicago, New York City and Washington, D.C. With locations across the U.S., AIS has more than 800 employees and over 1 million square feet of office, showroom and factory space. Additional showrooms are located in various cities throughout the US including Pittsburg, Buffalo, Atlanta, Phoenix, Salt Lake City, Philadelphia, Denver, San Francisco managed through AIS Representatives.

All of our over 1000 authorized dealers have access to warehouses to receive furniture shipments and store product until ready for furniture install date.

3.3 Marketing and Sales

A. Provide a detailed ninety-day plan beginning from award date of the Master Agreement describing the strategy to immediately implement the Master Agreement as supplier's primary go to market strategy for Public Agencies to supplier's teams nationwide, to include, but not limited to:

i. Executive leadership endorsement and sponsorship of the award as the public sector as the public sector go-to-market strategy within the first 10 days
ii. Training and education of Supplier's national sales force with participation from the Supplier's executive leadership, along with the OMNIA Partners, Public Sector team within the first 90 days

Following AIS's standard Program Launch Plan, the executive leadership team will immediately define the messaging document and position statement for both internal stakeholders and internal and external audiences. The positioning document will include the overview of the Omnia contract and how AIS can provide workspace solutions for its customers.

AIS has been successful over the years launching national contract initiatives. AIS currently holds a GSA Contract that has been in place for almost twenty years. This has enabled AIS to market directly to the Department of Defense as well as civilian agencies nationwide. AIS has been recognized for our excellence in supporting the needs of the Federal marketplace by not only GSA but from many DOD and agencies. We are a BPA holder with the US Navy supporting the Spiral II Navy BPA program. It has been AIS' belief that in order to support contracts such as these, a targeted and successful program launch is key in gaining immediate awareness and developing success.

First 10 Days

- Once an award is made to AIS, we will distribute a company-wide announcement to announce our OMNIA Partners, public sector award and what the award means to the AIS sales efforts nationwide. The email will detail the business sectors that this contract will target and provide a timeline for the field sales launch effort.

- Send out an announcement of award to our dealer distribution and map out timeline of launch to our dealer distribution.

- Conference call coinciding with a webinar will be set up with our field sales group to introduce OMNIA Partners, public sector and what it means to AIS from a new business development perspective. Provide an overview of the contract itself, rolls and responsibilities, reporting, business development efforts and communication roll out to our dealer distribution. (Invite POC from OMNIA to participate in this call if interested)

First 90 Days

- Distribute launch packages to field sales by region with identified target accounts to penetrate and introduce with direct representation AIS and OMNIA contract.

- Distribute launch packages to dealer distribution which outlines OMNIA program and provide additional secondary target accounts identified by region and allow dealers to make contact and introduce AIS and OMNIA contract.

- Initiate email campaign to end users to get the word out on OMNIA award and AIS participation.

- All this would be implemented within 30 days of award by OMNIA.

Post 90 days

- Continue to uncover potential users and introduce OMNIA contract as a channel of procurement for their business segment.

- Repeat marketing emails and communications on a monthly basis with flyers and highlighted products from the OMNIA Partners, public sector contract to draw continued interest.

B. Provide a detailed ninety-day plan beginning from award date of the Master Agreement describing the strategy to market the Master Agreement to current Participating Public Agencies, existing Public Agency customers of Supplier, as well as to prospective Public Agencies nationwide immediately upon award, to include, but not limited to:

i. Creation and distribution of a co-branded press release to trade publications
ii. Announcement, Master Agreement details and contact information published on the Supplier's website within first 90 days
iii. Design, publication and distribution of co-branded marketing materials within first 90 days
iv. Commitment to attendance and participation with OMNIA Partners, Public Sector at national (i.e. NIGP Annual Forum, NPI Conference, etc.), regional (i.e. Regional NIGP Chapter Meetings, Regional Cooperative Summits, etc.) and supplier-specific trade shows, conferences and meetings throughout the term of the Master Agreement
v. Commitment to attend, exhibit and participate at the NIGP Annual Forum in an area reserved by OMNIA Partners, Public Sector for partner suppliers. Booth space will be purchased and staffed by Supplier. In addition, Supplier commits to provide reasonable assistance to the overall promotion and marketing efforts for the NIGP Annual Forum, as directed by OMNIA Partners, Public Sector.
vi. Design and publication of national and regional advertising in trade publications throughout the term of the Master Agreement
vii. Ongoing marketing and promotion of the Master Agreement throughout its term (case studies, collateral pieces, presentations, promotions, etc.)
viii. Dedicated OMNIA Partners, Public Sector internet web-based homepage on Supplier's website with:

- OMNIA Partners, Public Sector standard logo;
- Copy of original Request for Proposal;
- Copy of Master Agreement and amendments between Principal Procurement Agency and Supplier;
- Summary of Products and pricing;
- Marketing Materials
- Electronic link to OMNIA Partners, Public Sector's website including the online registration page;
- A dedicated toll-free number and email address for OMNIA Partners, Public Sector

Upon award, AIS will draft a co-branded press release to announce to the trade publications, including Monday Morning Quarterback, Office Insight, Business of Furniture and any other industry trade publications that may choose to publish the release. The draft announcement will be sent to OMNIA partners for final approval before release.

AIS will publish the approved OMNIA partnership announcement on AIS's public website and post the master agreement and contract details within the contract section of the website, to be easily accessed by dealers and OMNIA partner customers, within 90 days of award.

The AIS Marketing and Contract team will create a program email announcement, social media, brochure, internal and external training presentation to share with AIS team members, dealers and OMNIA partners. Upon approval from the OMNIA team, these communications and materials will be released to publicly. These materials will be completed within 90 days of contract award.

AIS sales representatives and sales leaders will attend regional NIGP chapter meetings and summits in their respective regions and areas. The goal to attend these shows would be to make connections with purchasing decision makers who are involved with OMNIA partners or looking for a partner supplier solution. Follow up, post event will be made by AIS team members to ensure needs are met with AIS or OMNIA partners.

AIS will attend the annual NIGP Forum in Chicago, IL in August 2020. AIS's booth space will include AIS's most relevant products and will be staffed by our regional sales team. AIS will promote the NIGP Forum prior to the event to any pre-registered attendees, AIS dealers, designers and influencers. During the show, AIS will post on social media our participation and activities happening throughout the event.

Post show follow up will include communications to all show attendees. AIS representatives will receive contact information for anyone who visits the AIS booth and wishes to learn more or has an opportunity for an AIS solution. These attendees will be contacted within 48 hours after the show, if not sooner.

The AIS Marketing team will work with our creative partners and graphic design team to create advertising in appropriate trade publications, dealer network communications and social media connections.

AIS will continue to update OMNIA partner brochures and program presentations with client case studies including install photos, project overviews and testimonials. We will continue to reach out to AIS dealers and OMNIA partner contacts with new product and program introductions and promotions through email blasts, newsletters and social media channels.

AIS will create a website homepage accessed from www.ais-inc.com that will be co-branded for OMNIA partners, Public Sector and AIS. This website will include a link to a pdf copy of the original RFP and Master Agreement and amendments. There will be links to the products offered on the OMNIA partner agreement including brochures, price lists, idea starters, fabrics and finishes, product stylist, spaces by application, image library and specification resources. AIS's toll-free number, 800.434.7400, and contact email address, info@ais-inc.com, for OMNIA Partners will be available on this site.

Additionally, this web page will link to OMNIA Partners, Public Sector website and online registration page.

C. Describe how Supplier will transition any existing Public Agency customers' accounts to the Master Agreement available nationally through OMNIA Partners, Public Sector. Include a list of current cooperative contracts (regional and national) Supplier holds and describe how the Master Agreement will be positioned among the other cooperative agreements.

AIS must remain compliant with existing federal, state and local contracts. When applicable, AIS will make the recommendation to use the Master Agreement. We recognize the multiple benefits to utilizing the Master Agreement. AIS will position the Master Agreement with a higher incentive to authorized dealers for using the Master Agreement.

Current cooperative contracts include:

- GSA
- Navy BPA
- NCPA
- TIPS
- Haworth GPO (Vizient, Premier, Intalere, HealthTrust & Greenhealth Exchange)
- Massachusetts Higher Education Consortium (MHEC)
- Illinois Public Higher Education Cooperative (IPHEC)

D. Acknowledge Supplier agrees to provide its logo(s) to OMNIA Partners, Public Sector and agrees to provide permission for reproduction of such logo in marketing communications and promotions. Acknowledge that use of OMNIA Partners, Public Sector logo will require permission for reproduction, as well.

AIS agrees to provide its logo(s), as well as branding guidelines to OMNIA Partners, Public Sector and will grant permission for reproduction of such logo in marketing communications and promotions. AIS will obtain permission from OMNIA Partners, Public Sector to use its logo for reproduction purposes.

E. Confirm Supplier will be proactive in direct sales of Supplier's goods and services to Public Agencies nationwide and the timely follow up to leads established by OMNIA Partners, Public Sector. All sales materials are to use the OMNIA Partners, Public Sector logo. At a minimum, the Supplier's sales initiatives should communicate:

i. Master Agreement was competitively solicited and publicly awarded by a Principal Procurement Agency

ii. Best government pricing
iii. No cost to participate
iv. Non-exclusive

AIS will be proactive in direct sales of good and services to Public Agencies nationwide. We will follow up on leads established by OMNIA Partners, Public Sector in a timely manner within 24 hours. AIS will obtain permission for use of OMNIA Partners, Public Sector logo and upon approval will use it on all sales materials. All sales material will include the above listed four (4) advantages to the OMNIA Partners contract.

F. Confirm Supplier will train its national sales force on the Master Agreement. At a minimum, sales training should include:

i. Key features of Master Agreement
ii. Working knowledge of the solicitation process
iii. Awareness of the range of Public Agencies that can utilize the Master Agreement through OMNIA Partners, Public Sector
iv. Knowledge of benefits of the use of cooperative contracts

AIS will train our national sales force on the Master Agreement via various methods. The training will include a sales presentation that will at a minimum address the above four (4) items. This sales presentation will serve as a sales tool that can by used by AIS representatives and our authorized dealers to present to interested agencies, as well as end users.

The outline for the sales presentation is below.

1. OMNIA Partners Overview
    a. Key features of Master Agreement
    b. General listing of who can utilize the Master Agreement with link to full listing of approved agencies
    c. Benefits to use the Master Agreement
2. General Information for Master Agreement
    a. Contract #
    b. Contract Term
    c. Products on Contract
    d. Price Lists to Use
    e. Design specification information
    f. Freight information
    g. Services and the Service Rates
3. Solicitation Process
    a. Verification of agency's qualification to use the Master Agreement with link to, "How to become a OMNIA Partners Approved Agency"
    b. Authorized dealer proposal/quote requirements
    c. Required items to be listed on agency PO (Who the PO is made out to, contract #, etc.)
4. AIS Order Entry Requirements
    a. Documentation requirements
    b. Important information (ship to address, requested ship date, etc.)
5. Invoicing Process
6. AIS OMNIA Partners Master Agreement Team (lists AIS points of contact)
7. Frequently Asked Questions (FAQ)

a. Include questions and answers on Master Agreement
b. Include links to Master Agreement resources (OMNIA website, Approved agency list, etc.)

G. Provide the name, title, email and phone number for the person(s), who will be responsible for:

i. Executive Support
ii. Marketing
iii. Sales
iv. Sales Support
v. Financial Reporting
vi. Accounts Payable
vii. Contracts

a. Executive Support:
Nick Haritos, Executive Vice President Sales & Distribution
nharitos@ais-inc.com
617.259.4214

b. Marketing:
Tracy Reed, Vice President of Marketing

Cronan & Associates
(Arkansas, Louisiana, Mississippi, Oklahoma & Texas)

I. Explain in detail how the sales teams will work with the OMNIA Partners, Public Sector team to implement, grow and service the national program.

AIS Executive Team to work alongside Omnia Executive Team/Directors to ensure nationwide training efforts are rolled out timely and effectively once contract is awarded. AIS Field Sales Team will partner with respective Omnia Regional Managers and Directors to ensure new supplier product offering is communicated to Members via face to face meetings as time permits, printed catalog distribution as well as a digital catalog offering. AIS to attend ongoing Premiere Cooperative Purchasing Events - Regional Connections once 2020 schedule is released. AIS Sales Team and authorized dealers to proactively call on agencies in tandem to generate new business and follow up on leads.

AIS will proactively survey our completed Omnia furniture projects and create case studies (large and small) on an annual basis to ensure Omnia Partners has fresh, digital content with professional photography. These mutually created co-branded case studies would be utilized by AIS and Omnia Partners for marketing and social media campaigns to increase brand awareness, grow sales and ultimately grow Omnia Partner memberships of all sizes in each region.

J. Explain in detail how Supplier will manage the overall national program throughout the term of the Master Agreement, including ongoing coordination of marketing and sales efforts, timely new Participating Public Agency account set-up, timely contract administration, etc.

AIS's will have a dedicated team supporting the management and growth of the OMNIA Partners, Public Sector program. Sales leadership will ensure ongoing national sales team training, networking and prospecting through quarterly AIS sales team webinars, monthly sales leadership conference calls, weekly sales team meetings and weekly one on one meetings.

Continued Marketing efforts will include broad promotion of AIS through trade publications, event marketing, direct target promotion and social media campaigns. As new product and programs

are introduced to the commercial market, a special dedicated campaign will also be targeted directly to OMNIA Partner customers.

Internal contract management will continue to educate support, reporting and customer service teams on account setup. As any changes are administered through OMNIA Partners, the AIS team will effectively communicate throughout the organization through documented process updates, webinar and live meeting trainings.

K. State the amount of Supplier's Public Agency sales for the previous fiscal year. Provide a list of Supplier's top 10 Public Agency customers, the total purchases for each for the previous fiscal year along with a key contact for each.

Our state agency sales equate to over $7MM last year in 2018. In 2018, our GSA sales were approximately $9MM.

No.	Public Agency	Total Purchases	Key Contact
1	State of New Jersey - Department of Children & Family	$1,104,495	Susan Santiago
2	State of New Jersey - Property Rentals	$512,789	N/A
3	State of New Jersey - Camden County Courthouse	$403,449	Glen Stranix
4	Cumberland County Improvement Authority	$369,468	Roseanne Duffy
5	State of New Jersey - Superior Courts	$348,667	Joanne Diego
6	State of New York - Onondaga County Facilities	$340,756	Julie McCarthy
7	Naval Surface Warfare Center at Navy Activity Station - Crane, IN	$200,000	Morgan Hughes
8	State of New York - Nassau County	$195,341	Margaret Reynolds
9	State of New Jersey - Atlantic County Civic Court Building	$153,404	Glen Stranix
10	State of NJ Dept of Labor - Division of Unemployment Insurance	$127,393	Marcia Szedula
	Total State of New Jersey agency sales for 2018	*$2.8MM*	*Ben Maxwell*
	Total State of New York agency sales for 2018	*$2.6MM*	*Ben Maxwell*

L. Describe Supplier's information systems capabilities and limitations regarding order management through receipt of payment, including description of multiple platforms that may be used for any of these functions.

Orders may be submitted to AIS via email, fax or through electronic upload submission through the website. Order formats can be pdf, SIF/SP4 and XML.

AIS accepts company check, direct deposit, ACH, wire transfer and credit cards (except for Discover card) as form of payment.

M. Provide the Contract Sales (as defined in Section 10 of the OMNIA Partners, Public Sector Administration Agreement) that Supplier will guarantee each year under the Master Agreement for the initial three years of the Master Agreement ("Guaranteed Contract Sales").

$_____.00 in year one
$_____.00 in year two
$_____.00 in year three

To the extent Supplier guarantees minimum Contract Sales, the administration fee shall be calculated based on the greater of the actual Contract Sales and the Guaranteed Contract Sales.

AIS is confident that our sales and distribution network will generate significant sales throughout North America as we have done with our GSA and other GPO contracts. We would welcome the opportunity to negotiate an additional incentive after year one of our contract is completed as it relates to guaranteed incentive. Historical data is essential to ensure that we put the appropriate minimum contract sales in place.

N. Even though it is anticipated many Public Agencies will be able to utilize the Master Agreement without further formal solicitation, there may be circumstances where Public Agencies will issue their own solicitations. The following options are available when responding to a solicitation for Products covered under the Master Agreement.

i. Respond with Master Agreement pricing (Contract Sales reported to OMNIA Partners, Public Sector).

   If solicitation does not specify which contracts are to be utilized, AIS will respond with the Master Agreement pricing and will report Master Agreement sales to OMNIA Partners, Public Sector. AIS will electronically provide the OMNIA Partners, Public Sector Contract Sales Monthly Report using the issued OMNIA Partners, Public Sector Exhibit C, Contract Sales Reporting Template in Microsoft Excel format.

   In the event items are returned (pre-approval required) credits on administrative fees will be deducted from the following month's reporting as a reconciliation and noted in report details.

ii. If competitive conditions require pricing lower than the standard Master Agreement not-to-exceed pricing, Supplier may respond with lower pricing through the Master Agreement. If Supplier is awarded the contract, the sales are reported as Contract Sales to OMNIA Partners, Public Sector under the Master Agreement.

   If utilizing the Master Agreement and the competitive solicitation environment is such that requires us to offer deeper discounting to an agency to secure award, AIS will report the sales to OMNIA Partners, Public Sector in compliance with the Master Agreement.

iii. Respond with pricing higher than Master Agreement only in the unlikely event that the Public Agency refuses to utilize Master Agreement (Contract Sales are not reported to OMNIA Partners, Public Sector).

   AIS may respond with pricing that is higher than that of the Master Agreement and will report these sales as necessary to the appropriate contract agency, if applicable.

iv. If alternative or multiple proposals are permitted, respond with pricing higher than Master Agreement, and include Master Agreement as the alternate or additional proposal.

   If an alternate proposal is acceptable, AIS will provide an option utilizing the Master Agreement pricing. If the Master Agreement pricing is favorable and results in a contract, AIS will report the sales to OMNIA Partners, Public Sector.

Detail Supplier's strategies under these options when responding to a solicitation.

Appendix B

TERMS & CONDITIONS ACCEPTANCE FORM

Signature on the Offer and Contract Signature form certifies complete acceptance of the terms and conditions in this solicitation and draft Contract except as noted below with proposed substitute language (additional pages may be attached, if necessary). The provisions of the RFP cannot be modified without the express written approval of Region 4 ESC. If a proposal is returned with modifications to the draft Contract provisions that are not expressly approved in writing by Region 4 ESC, the Contract provisions contained in the RFP shall prevail.

Check one of the following responses:

☐ Offeror takes no exceptions to the terms and conditions of the RFP and draft Contract.

(*Note: If none are listed below, it is understood that no exceptions/deviations are taken.)*

☒ Offeror takes the following exceptions to the RFP and draft Contract. All exceptions must be clearly explained, reference the corresponding term to which Offeror is taking exception and clearly state any proposed modified language, proposed additional terms to the RFP and draft Contract must be included:

(*Note: Unacceptable exceptions may remove Offeror's proposal from consideration for award. Region 4 ESC shall be the sole judge on the acceptance of exceptions and modifications and the decision shall be final.*

If an offer is made with modifications to the contract provisions that are not expressly approved in writing, the contract provisions contained in the RFP shall prevail.)

Section/Page	Term, Condition, or Specification	Exception/Proposed Modification	Accepted (For Region 4 ESC's use)
Appendix A, #14 Page 4	Delivery. Conforming product shall be shipped within 7 days of receipt of Purchase Order. If delivery is not or cannot be made within this time period, the Contractor must receive authorization for the delayed delivery. The order may be canceled if the estimated shipping time is not acceptable. All deliveries shall be freight prepaid, F.O.B. Destination and shall be included in all pricing offered unless otherwise clearly stated in writing.	Delivery. Conforming product shall be shipped ~~within 7 days of receipt of Purchase Order~~ within the timeframe mutually agreed to by the Vendor and the purchasing agency. If delivery is not or cannot be made within this time period, the Contractor must receive authorization for the delayed delivery. The order may be canceled if the estimated shipping time is not acceptable. All deliveries shall be freight prepaid, F.O.B. Destination and shall be included in all pricing offered unless otherwise clearly stated in writing.	

Exhibit F, Federal Certifications, Page 40 of 55	CERTIFICATION OF COMPLIANCE WITH BUY AMERICA PROVISIONS To the extent purchases are made with Federal Highway Administration, Federal Railroad Administration, or Federal Transit Administration funds, offeror certifies that its products comply with all applicable provisions of the Buy America Act and agrees to provide such certification or applicable waiver with respect to specific products to any Participating Agency upon request. Purchases made in accordance with the Buy America Act must still follow the applicable procurement rules calling for free and open competition.	CERTIFICATION OF COMPLIANCE WITH BUY AMERICA PROVISIONS To the extent purchases are made with Federal Highway Administration, Federal Railroad Administration, or Federal Transit Administration funds, vendor may be requested to certify individual product compliance ~~offeror certifies that its products comply~~ with all applicable provisions of the Buy America Act. ~~and~~ Vendor agrees to provide such certification or applicable waiver with respect to specific products to any Participating Agency upon request. It is the responsibility of the Purchasing Agency to notify the Vendor that requested product(s) must adhere to the Buy America Act. Purchases made in accordance with the Buy America Act must still follow the applicable procurement rules calling for free and open competition.	
2.2 Pricing Commitment, Page 20 of 55	**Pricing Commitment** Supplier commits the not-to-exceed pricing provided under the Master Agreement pricing is its lowest available (net to buyer) to Public Agencies nationwide and further commits that if a Participating Public Agency is eligible for lower pricing through a national, state, regional or local or cooperative contract, the Supplier will match such lower pricing to that Participating Public Agency under the Master Agreement.	**Pricing Commitment** Supplier commits the not-to-exceed pricing provided under the Master Agreement pricing is its lowest available (net to buyer) at the time the Vendor submits their proposal to Public Agencies nationwide and further commits that if a Participating Public Agency is eligible for lower pricing through a national, state, regional or local or cooperative contract, the Supplier will match such lower pricing to that Participating Public Agency under the Master Agreement. The “lowest, not-to-exceed pricing” shall be compared to other cooperative state and local contracts, buying the same product mix, for the same geographical areas, under the same terms and conditions.	

EXHIBIT F

FEDERAL FUNDS CERTIFICATIONS

FEDERAL CERTIFICATIONS

ADDENDUM FOR AGREEMENT FUNDED BY U.S. FEDERAL GRANT

TO WHOM IT MAY CONCERN:

Participating Agencies may elect to use federal funds to purchase under the Master Agreement. This form should be completed and returned.

DEFINITIONS

Contract means a legal instrument by which a non–Federal entity purchases property or services needed to carry out the project or program under a Federal award. The term as used in this part does not include a legal instrument, even if the non–Federal entity considers it a contract, when the substance of the transaction meets the definition of a Federal award or subaward

Contractor means an entity that receives a contract as defined in Contract.

Cooperative agreement means a legal instrument of financial assistance between a Federal awarding agency or pass-through entity and a non–Federal entity that, consistent with 31 U.S.C. 6302–6305:

(a) Is used to enter into a relationship the principal purpose of which is to transfer anything of value from the Federal awarding agency or pass-through entity to the non–Federal entity to carry out a public purpose authorized by a law of the United States (see 31 U.S.C. 6101(3)); and not to acquire property or services for the Federal government or pass-through entity's direct benefit or use;

(b) Is distinguished from a grant in that it provides for substantial involvement between the Federal awarding agency or pass-through entity and the non–Federal entity in carrying out the activity contemplated by the Federal award.

(c) The term does not include:

(1) A cooperative research and development agreement as defined in 15 U.S.C. 3710a; or

(2) An agreement that provides only:

(i) Direct United States Government cash assistance to an individual;

(ii) A subsidy;

(iii) A loan;

(iv) A loan guarantee; or

(v) Insurance.

Federal awarding agency means the Federal agency that provides a Federal award directly to a non–Federal entity

Federal award has the meaning, depending on the context, in either paragraph (a) or (b) of this section:

(a)(1) The Federal financial assistance that a non–Federal entity receives directly from a Federal awarding agency or indirectly from a pass-through entity, as described in § 200.101 Applicability; or

(2) The cost-reimbursement contract under the Federal Acquisition Regulations that a non–Federal entity receives directly from a Federal awarding agency or indirectly from a pass-through entity, as described in § 200.101 Applicability.

(b) The instrument setting forth the terms and conditions. The instrument is the grant agreement, cooperative agreement, other agreement for assistance covered in paragraph (b) of § 200.40 Federal financial assistance, or the cost-reimbursement contract awarded under the Federal Acquisition Regulations.

(c) Federal award does not include other contracts that a Federal agency uses to buy goods or services from a contractor or a contract to operate Federal government owned, contractor operated facilities (GOCOs).

(d) See also definitions of Federal financial assistance, grant agreement, and cooperative agreement.

Non–Federal entity means a state, local government, Indian tribe, institution of higher education (IHE), or nonprofit organization that carries out a Federal award as a recipient or subrecipient.

Nonprofit organization means any corporation, trust, association, cooperative, or other organization, not including IHEs, that:

(a) Is operated primarily for scientific, educational, service, charitable, or similar purposes in the public interest;

(b) Is not organized primarily for profit; and

(c) Uses net proceeds to maintain, improve, or expand the operations of the organization.

Obligations means, when used in connection with a non–Federal entity's utilization of funds under a Federal award, orders placed for property and services, contracts and subawards made, and similar transactions during a given period that require payment by the non–Federal entity during the same or a future period.

Pass-through entity means a non–Federal entity that provides a subaward to a subrecipient to carry out part of a Federal program.

Recipient means a non–Federal entity that receives a Federal award directly from a Federal awarding agency to carry out an activity under a Federal program. The term recipient does not include subrecipients.

Simplified acquisition threshold means the dollar amount below which a non–Federal entity may purchase property or services using small purchase methods. Non–Federal entities adopt small purchase procedures in order to expedite the purchase of items costing less than the simplified acquisition threshold. The simplified acquisition threshold is set by the Federal Acquisition Regulation at 48 CFR Subpart 2.1 (Definitions) and in accordance with 41 U.S.C. 1908. As of the publication of this part, the simplified acquisition threshold is $150,000, but this threshold is periodically adjusted for inflation. (Also see definition of § 200.67 Micro-purchase.)

Subaward means an award provided by a pass-through entity to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program. A subaward may be provided through any form of legal agreement, including an agreement that the pass-through entity considers a contract.

Subrecipient means a non–Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program; but does not include an individual that is a beneficiary of such program. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency.

Termination means the ending of a Federal award, in whole or in part at any time prior to the planned end of period of performance.

The following certifications and provisions may be required and apply when Participating Agency expends federal funds for any purchase resulting from this procurement process. Pursuant to 2 C.F.R. § 200.326, all contracts, including small purchases, awarded by the Participating Agency and the Participating Agency's subcontractors shall contain the procurement provisions of Appendix II to Part 200, as applicable.

APPENDIX II TO 2 CFR PART 200

(A) Contracts for more than the simplified acquisition threshold currently set at $150,000, which is the inflation adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41 U.S.C. 1908, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate.

Pursuant to Federal Rule (A) above, when a Participating Agency expends federal funds, the Participating Agency reserves all rights and privileges under the applicable laws and regulations with respect to this procurement in the event of breach of contract by either party.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(B) Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of $10,000)

Pursuant to Federal Rule (B) above, when a Participating Agency expends federal funds, the Participating Agency reserves the right to immediately terminate any agreement in excess of $10,000 resulting from this procurement process in the event of a breach or default of the agreement by Offeror as detailed in the terms of the contract.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(C) Equal Employment Opportunity. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30

CFR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

Pursuant to Federal Rule (C) above, when a Participating Agency expends federal funds on any federally assisted construction contract, the equal opportunity clause is incorporated by reference herein.

Does offeror agree to abide by the above? YES _____ Initials of Authorized Representative of offeror

(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non - Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to Federal Rule (D) above, when a Participating Agency expends federal funds during the term of an award for all contracts and subgrants for construction or repair, offeror will be in compliance with all applicable Davis-Bacon Act provisions.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(E) Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-Federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Pursuant to Federal Rule (E) above, when a Participating Agency expends federal funds, offeror certifies that offeror will be in compliance with all applicable provisions of the Contract Work Hours and Safety Standards Act during the term of an award for all contracts by Participating Agency resulting from this procurement process.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(F) Rights to Inventions Made Under a Contract or Agreement. If the Federal award meets the definition of "funding agreement" under 37 CFR §401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

Pursuant to Federal Rule (F) above, when federal funds are expended by Participating Agency, the offeror certifies that during the term of an award for all contracts by Participating Agency resulting from this procurement process, the offeror agrees to comply with all applicable requirements as referenced in Federal Rule (F) above.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(G) Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended—Contracts and subgrants of amounts in excess of $150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA)

Pursuant to Federal Rule (G) above, when federal funds are expended by Participating Agency, the offeror certifies that during the term of an award for all contracts by Participating Agency member resulting from this procurement process, the offeror agrees to comply with all applicable requirements as referenced in Federal Rule (G) above.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(H) Debarment and Suspension (Executive Orders 12549 and 12689)—A contract award (see 2 CFR 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the Executive Office of the President Office of Management and Budget (OMB) guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR part 1986 Comp., p. 189) and 12689 (3 CFR part 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

Pursuant to Federal Rule (H) above, when federal funds are expended by Participating Agency, the offeror certifies that during the term of an award for all contracts by Participating Agency resulting from this procurement process, the offeror certifies that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency. If at any time during the term of an award the offeror or its principals becomes debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency, the offeror will notify the Participating Agency.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

(I) Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)—Contractors that apply or bid for an award exceeding $100,000 must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

Pursuant to Federal Rule (I) above, when federal funds are expended by Participating Agency, the offeror certifies that during the term and after the awarded term of an award for all contracts by Participating Agency resulting from this procurement process, the offeror certifies that it is in compliance with all applicable provisions of the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352). The undersigned further certifies that:

(1) No Federal appropriated funds have been paid or will be paid for on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with the awarding of a Federal contract, the making of a Federal grant, the making of a Federal loan, the entering into a cooperative agreement, and the extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all covered sub-awards exceeding $100,000 in Federal funds at all appropriate tiers and that all subrecipients shall certify and disclose accordingly.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

RECORD RETENTION REQUIREMENTS FOR CONTRACTS INVOLVING FEDERAL FUNDS

When federal funds are expended by Participating Agency for any contract resulting from this procurement process, offeror certifies that it will comply with the record retention requirements detailed in 2 CFR § 200.333. The offeror further certifies that

offeror will retain all records as required by 2 CFR § 200.333 for a period of three years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

CERTIFICATION OF COMPLIANCE WITH THE ENERGY POLICY AND CONSERVATION ACT

When Participating Agency expends federal funds for any contract resulting from this procurement process, offeror certifies that it will comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (42 U.S.C. 6321 et seq.; 49 C.F.R. Part 18).

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

CERTIFICATION OF COMPLIANCE WITH BUY AMERICA PROVISIONS

To the extent purchases are made with Federal Highway Administration, Federal Railroad Administration, or Federal Transit Administration funds, offeror certifies that its products comply with all applicable provisions of the Buy America Act and agrees to provide such certification or applicable waiver with respect to specific products to any Participating Agency upon request. Purchases made in accordance with the Buy America Act must still follow the applicable procurement rules calling for free and open competition.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

CERTIFICATION OF ACCESS TO RECORDS – 2 C.F.R. § 200.336

Offeror agrees that the Inspector General of the Agency or any of their duly authorized representatives shall have access to any documents, papers, or other records of offeror that are pertinent to offeror's discharge of its obligations under the Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right also includes timely and reasonable access to offeror's personnel for the purpose of interview and discussion relating to such documents.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

CERTIFICATION OF APPLICABILITY TO SUBCONTRACTORS

Offeror agrees that all contracts it awards pursuant to the Contract shall be bound by the foregoing terms and conditions.

Does offeror agree? YES _____ Initials of Authorized Representative of offeror

Offeror agrees to comply with all federal, state, and local laws, rules, regulations and ordinances, as applicable. It is further acknowledged that offeror certifies compliance with all provisions, laws, acts, regulations, etc. as specifically noted above.

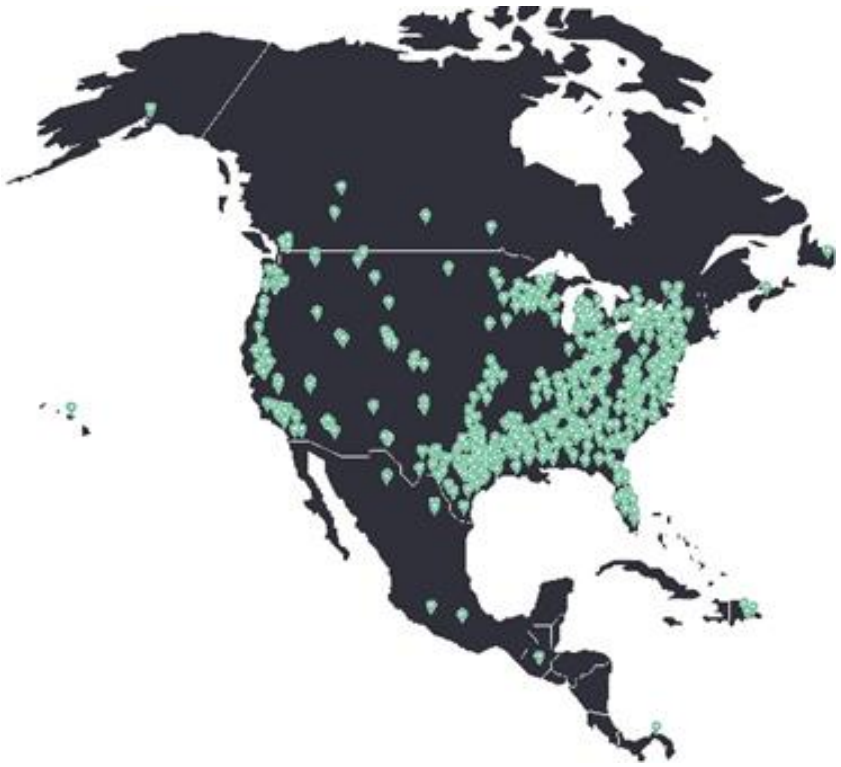
c) Qualification and Experience

i. Provide a brief history of the Offeror, including year it was established and corporate office location.

AIS was established in 1989. Our corporate address is 25 Tucker Drive, Leominster, MA 01453.

A Story of Innovation.

In 1989 founders, Arthur Maxwell and Bruce Platzman started AIS by procuring and installing used furniture. AIS grew quickly in the early 90s to be a scalable company that embarked into manufacturing. We believe that good ideas will get you everywhere. In less than 30 years, we've evolved from a start-up based on the simple intent to adopt lean manufacturing to become one of the most highly regarded names in the industry. AIS has earned acclaim for product design, ground-breaking manufacturing and unparalleled sustainability across the industry and within our local and regional communities. And, our deep roots in New England are a great source of pride for us.



Tremendous growth and recognition.

AIS set out to disrupt the industry through true innovation and sustainability—a vision that has consistently paid off for our company and our customers. The talented, enthusiastic AIS team has virtually reinvented product development and manufacturing processes, helping us grow far faster than industry benchmarks and earning OFDA Manufacturer of the Year nine times since 2008. Today, with sales teams across North America and 750 employees at our new 600,000-square-foot factory and headquarters, we've risen to annual sales of more than $200 million. One thing, however, will never change—our commitment to superior products with industry-beating lead times and attractive prices.

More than providers. True partners.

Through a robust network of expert dealers, our employees drive to continually break new ground with inventive products and processes, and unwavering dedication to our customers and community. AIS has established itself as a partner of choice—whether furnishing a start-up space or fulfilling a new vision for a Fortune 500® firm.

Strong Dealer Network Across North America.

Sustainable from the start.

Since the beginning, AIS has led the way in sustainability—making social responsibility and our environment a top priority. Our visionary team recognized early on that efficient manufacturing is naturally more sustainable, requiring fewer resources and less energy. We've invested in alternative energy and moved toward carbon neutrality. And as a privately held firm, AIS has greater freedom to explore innovative processes and equipment, as well as ways to eliminate wasted time, steps, inventory and resources, as we strive to inspire a greener industry overall.

Today, all AIS products are SCS Indoor Advantage™ Gold certified for air quality, and AIS systems contain at least 40% recycled materials. What's more, we've achieved BIFMA e3 level® certification on our products, and more than 50% of the power used in our state-of-the-art facility is returned to the grid through our rooftop solar panels.

From the talent we hire to the way we design, manufacture and distribute our products, AIS has always thought differently.

ii. Describe Offeror's reputation in the marketplace.

AIS is known for offering market-relevant, feature-rich product lines that entice designers and support the diverse needs of end-users while offering exceptional value. AIS is an innovator that leads the industry in sustainable, lean manufacturing, lead-time performance and manufacturing flexibility.
AIS is a self-taught and self-grown company. We know our capabilities and leverage the products and services we are confident we can deliver. We can be easy to do business with by answering the phone and really listening to our customers. We can do things quicker, because we have the passion. If we make a commitment, we deliver on that commitment. All these attributes are the fiber of our culture and existence.

AIS is known for being generously socially responsible. AIS is dedicated to supporting the local community and part of our culture is philanthropy. Whether it's volunteering time, providing financial assistance or both, employees are committed to making a difference. AIS was named one of the top 105 most charitable companies in Massachusetts for 2019 and was honored at the Boston Business Journal Corporate Citizenship Awards. Another significant philanthropic gesture was donating nearly $700,000 worth of installed office furniture for the new Make-A-Wish Massachusetts and Rhode Island headquarters in Boston. AIS also works with United Way of North Central Massachusetts, the American Red Cross and the cities of Leominster and Fitchburg.

AIS works with a diverse customer base stretching throughout North America. Customers include federal government, healthcare, high tech/IT companies, department stores/fashion, colleges and universities, general contractors, automobile manufacturers and airline companies just to name a few categories. Major U.S. customers and installations have included J.D. Power and Associates, IBM, Google, Macy's, Children's Hospital of Wisconsin, University of Chicago, NYSE, Lockheed Martin, Nissan, GM, JetBlue Airways and many, many others as shown below.

iii. Describe Offeror's reputation of products and services in the marketplace.

AIS products are mid-market with a full line of office furniture that is smartly in tune with customers' needs in the constantly changing landscape of the workplace. AIS is known for providing panel systems, benching and desking systems, tables, casegoods, storage and seating. We may not be first to the market with a product, but we see product trends evolve and engineer our new products better based on market feedback.

AIS has been recognized by the Office Furniture Dealers Alliance (OFDA) for various product awards for the past 11 years. In 2019, AIS received four (4) OFDA Dealers' Choice Awards in categories of Workstations, Casegoods, Seating and Tables. This year's OFDA Dealers' Choice Survey ran from early March to the end of April. According to OFDA, the survey is a carefully structured, anonymous dealer poll that measures six functional areas of manufacturer performance that are of greatest importance to a diverse cross-section of dealers throughout North America. The survey provides product category-level feedback from dealers of all sizes on the full range of support they receive from their primary non-aligned suppliers. Dealers are asked to rate these top-volume, non-aligned suppliers in each of six product categories recognized by the Business and Institutional Furniture Manufacturers Association (BIFMA) based on their 2018 interaction. The six product categories are: Casegoods, Storage, Filing, Tables, Seating and Workstations/Systems. The purpose of the survey is to promote an open discussion of business issues between dealers and manufacturers and improve the office furniture industry overall.

In July 2019, AIS conducted an Effective Partnering Survey Report, a customer satisfaction survey of selected Dealer staff.

The AIS Effective Partnering Survey evaluated the business process (how the Dealer interacts with AIS) as well as how the Dealership utilizes and values existing AIS resources. The survey measured both importance and expectations in six categories: Sales Support, Product Focus, Marketing, Pre-Order Process, Quote-To-Invoice Process and Improvements. Subcategories provided additional detail. There was a total of 17 subcategories, 76 specific areas, and 25 open-response feedback opportunities.

Strong scores in several key areas indicate Dealer acknowledgment that AIS does many things well. This survey confirms that AIS has several strengths to draw upon, and that Dealers value the investment AIS has made in people, processes and product. Overall, AIS meets or exceeds Dealer expectations in all 17 of the subcategories surveyed.

The survey data suggests that AIS is a good partner. The respondents rated 76 areas in the survey, rating all but two areas as important or higher and 64 areas as meeting or exceeding expectations. AIS uses this dealer survey to identify areas of continuous improvement.

AIS uses IMOS, SolidWorks and woodCAD|CAM software. We were able to set up a very efficient system using the latest technology capable of doing production manufacturing that is also very flexible for custom. We have the ability to stretch products, add shelves and do all sorts of other things our customers request. By embracing technology and not having the layers other manufacturers have for a company structure. All our products are designed in-house by a small on-site team and this allows us to get to the market a lot faster than other manufacturers.

AIS universalizes products maybe a lot more than the other manufacturers do. We can use the same pedestal in all of our different laminate case goods lines as opposed to having a more designed conceptual product that requires multiple SKUs and multiple disciplines for manufacturing. The variety and the speed with which we can design and manufacture product using this very consistent product is what our customers are requiring right now.

Over the past 10 years, we have focused on expanding our product lines to increase our breadth of line. The marketplace has seen us release new seating lines and complementary products for existing lines.

Our employees make a difference. In a sense our employees are all entrepreneurs and self-motivated. We are up for each challenge presented to us. Because of the very few layers of management at AIS, our people can do their jobs and take pride in the true value they add to AIS.

The Project Management team is an internal advocate for our dealers from purchase order planning to punch lists. The team checks, tests and double checks all aspects of a project. They are the primary contact for our dealers from the inception to the completion of the project. With a combined over 100 years of experience in the office furniture industry, each member brings their unique experience to the team. One reason for the team's success is the collaborative approach to process and risk mitigation.

AIS offers field services expertise for select installations. Field services conducts trainings for dealer installation teams on all AIS products. This department is on call 24/7. You can often find them "Facetiming" with installers to provide installation advice. For high profile projects, they can be on site to ensure the installation is successfully completed to end user's specification.

Our customer service representatives (CSR) go above and beyond daily to make sure our customers are satisfied. A few examples are responding to phone calls and emails in less than 24 hours, working closely with production and monitoring progress to ensure a ship date is met and pulling parts needed off the factory floor to FedEx out to customers to ensure installations can be completed on time. This department works outside of normal business hours to ensure they are responding to inquiries and resolving issues within one day. This department provides our customers with a complete support system.

iv. Describe the experience and qualification of key employees.

Nick Haritos, Executive Vice President of Sales & Distribution

Nick joined AIS in January 2018. He leads all sales and distribution throughout North America. Haritos' career spanning three decades in management and business development includes more than 25 years in contract furniture, including 16 years with Haworth, most recently as vice president of sales and distribution covering a five-region territory stretching from New England to the Caribbean. Before Haworth, he served as senior vice president of sales for Office Environments of New England. The native New Englander earned a bachelor's degree from Plymouth State University in New Hampshire and a master's degree from Saint Michael's College in Vermont. He earned a certificate in mediation from Woodbury College in Vermont and completed additional post-graduate work in alternative dispute resolution at Nova Southeastern University in Florida.

Tracy Reed, Vice President of Marketing

Tracy joined AIS in January 2017 as Marketing Vice President and brings over 20 years of vast industry experience to the role. Her strong understanding of dealer sales, product line management, marketing communications, and new product introductions ideally suit her as she leads AIS brand forward. Prior to joining the office furniture industry, she held various agency roles with Biggs-Gilmore Communications and led international product launches for Amway Corporation. Tracy hold a BBA and a BAS from Western Michigan University, and an MBA from Grand Valley State University.

Amy Transue, Director of Marketing and Strategic Resources

Amy began her career with AIS in 2005. As AIS Director of Marketing & Strategic Resources, she leads marketing, sustainability, bid opportunities, competitive strategies and forecasting. With her broad experience and holistic contract furniture industry experience, she provides leadership to the sales team with special projects and training. Through her acute market focus and creativity, she leads her team to deliver exemplary sales tools positioning AIS Best-In-Class. Transue holds a Bachelor of Science in Business Administration with a concentration in Management from Fitchburg State College.

Helen Woods, Bid & Contract Specialist

Helen joined the AIS team in 2016, however she has more than ten years of experience in the office furniture industry, six of which were focused on GSA bid and contract response. With experience both from the manufacturer and the dealer perspective in office furniture design, management and sales, Helen is adept in coordinating thorough, detailed responses to both commercial and government opportunities. With a background in design, Helen has an intimate understanding of furniture specification, configuration, space planning, and installation. Helen also contributes additional skills including communication with end-users, database maintenance and finance management to her role at AIS. She manages over 30 contracts including all GSA, Navy BPA, state and cooperative contracts. Helen has a Bachelor of Fine Arts degree in Interior Design as well as a Bachelor of Science degree in psychology.

v. Describe Offeror's experience working with the government sector.

AIS' GSA contract was awarded in 2000 and our Spiral III Navy BPA contract was awarded in 2017. Federal sales account for 10-15% of our overall sales. Our GSA sales for 2019 will exceed $11MM.

AIS has been elected to government offices across the country. Our success includes, but by no means limited to the following federal clients:

- Pentagon
- Consumer Products Safety Commission
- US Department of Defense
- US Department of Energy
- US Department of Navy
- Drug Enforcement Agency (DEA)
- National Guard
- NASA
- and more.

For over 20 years, the federal government has chosen AIS to meet their office furniture needs – and we've been honored to answer the call. For example, in 2001, right after 9/11, AIS was the chosen office furniture provider for the Pentagon. We delivered faster than any manufacturer could delivering and installing over 2000 workstations in 30 days. Governments often have to react and respond quickly. And we do the same. Our products are high quality, lifetime guaranteed and manufactured 15-20 days after we receive the order. We meet tight deadlines and tough expectations.

Example of successful projects include the below.

Sheppard Air Force Base Project
142 Matrix and Calibrate workstations

The new “80th Operations Group” sought office furniture with high environmental standards. AIS was selected for this project not only due to the company’s emphasis on environmentally -sound materials and lean manufacturing, but also our ability to provide a quality product at reasonable pricing.

U.S. Department Of Wildlife Project
300 Matrix workstations

The Southeast Region of the U.S. Fish and Wildlife Service covers 430,000 square miles. The Division of Realty is in the regional office headquarters located in Atlanta, GA, and is responsible for land acquisition and all aspects of realty management on 128 national wildlife refuges and 19 fish hatcheries throughout the Southeast region. AIS’s Matrix was selected due to its ability to meet their strict technical specifications, product quality, short leadtimes and affordability.

Ft. Lewis Readiness Center Project
200 Matrix workstations

The “Joint Base Lewis-McChord Readiness Center” (JBLM) validates authority for personnel, administrative and medical readiness of JBLM soldiers and civilians, and designates ARNG and USAR soldiers in preparing for mobilization or deployment. AIS was selected as part of a team to complete this project for its professional yet durable product.

Centers for Disease Control And Prevention Project
600 Matrix workstations

The CDC focuses on infectious diseases worldwide and acts as the single mouthpiece for the U.S. on diseases. The offices located in Hyattsville, MD are a regional headquarters for the agency based in Atlanta, GA. Housing 591 employees, the regional office will span four floors of a 10-story office building. The CDC selected Matrix because of the product’s flexibility, power and data management capabilities and the overall aesthetics.

vi. Describe past litigation, bankruptcy, reorganization, state investigations of entity or current officers and directors.

AIS has not and does not have any past litigation, bankruptcy, reorganization, state investigations of any current officers and directors.

vii. Provide a minimum of 10 customer references relating to the products and services within this RFP. Include entity name, contact name and title, contact phone and email, city, state, years serviced, description of services and annual volume.

No.	Entity	Contact Name	Contact Title	Contact Phone	Contact Email	Location of Entity	Years Served	Description of Products/Services	Annual Volume

AIS

d) Value Add

i. Provide any additional information related to products and services Offeror proposes to enhance and add value to the Contract.

AIS value add capabilities include:

- AIS is an award-winning lean manufacturer. Our manufacturing excellence sets us apart from the competition. By implementing innovative lean production methods, we are able to build superior product at a lower cost than the competition.
- Vast dealer network of over 1000 dealers.
- AIS uses IMOS, SolidWorks and woodCAD|CAM software. We were able to set up a very efficient system using the latest technology capable of doing production manufacturing that is also very flexible for custom. We have the ability to stretch products, add shelves and do all sorts of other things our customers request. By embracing technology and not having the layers other manufacturers have for a company structure. All our products are designed in-house by a small on-site team and this allows us to get to the market a lot faster than other manufacturers.
- AIS universalizes products maybe a lot more than the other manufacturers do. We can use the same pedestal in all of our different laminate case goods lines as opposed to having a more designed conceptual product that requires multiple SKUs and multiple disciplines for manufacturing. The variety and the speed with which we can design and manufacture product using this very consistent product is what our customers are requiring right now.
- AIS has a flat organizational structure, what we mean by this is that we do not need to go through each level of management to get things done. AIS is a very “get it done” type of company. Our customer service team is empowered by management to do what it takes to get things done. We also understand the urgency when a customer calls with an issue or a question. We feel that we can manage the customer’s account easily within the first three tiers (Customer Service Representative, Manager of Customer Service, OEM Contract Administrator). But also know our entire team is behind the Region 4 ESC contract and ready to support the needs of all Region 4 ESC customers.
- Our employees make a difference. In a sense our employees are all entrepreneurs and self-motivated. We are up for each challenge presented to us. Because of the very few layers of management at AIS, our people can do their jobs and take pride in the true value they add to AIS. Many of AIS employees work outside of normal working hours of Monday through Friday, 8:00am – 5:00pm EDT. All employees have customer satisfaction as a driving force.
- Our specification department made up of 15 designers across the United

States that work from an online queue offering two main services; design checks and specification requests. This department also facilitates rendering requests, product specification support and mock-up/showroom reviews to ensure our products are showcased in the best way.

- The Project Management team is an internal advocate for our dealers from purchase order planning to punch lists. The team checks, tests and double checks all aspects of a project. They are the primary contact for our dealers from the inception to the completion of the project. With a combined over 100 years of experience in the office furniture industry, each member brings their unique experience to the team. One reason for the team's success is the collaborative approach to process and risk mitigation.

- AIS offers field services expertise for select installations. Field services conducts trainings for dealer installation teams on all AIS products. This department is on call 24/7. You can often find them "Facetiming" with installers to provide installation advice. For high profile projects, they can be on site to ensure the installation is successfully completed to end user's specification.

- AIS offers the best lead times in the industry and 75% of our products ship in two (2) weeks or less. If successful as a vendor partner, we will provide key internal contacts form our customer service and project management teams that can expedite emergency orders. If all the components of the emergency order are stock items, we can typically respond in less than two (2) weeks or even shorter depending on the products specified.

- Freight costs are included for seating product category.

- Commitment to social responsibility with our many sustainable practices. AIS has partnered with ANEW to provide a take-back solution for surplus office furniture and materials. This partnership provides AIS clients with a means to repurpose their furniture, fixtures and architectural materials, diverting the items from landfill. All captured materials are donated to public agencies and charities within a 50 mile radius, benefiting the local communities to which the furniture resided.

3. Competitive Range: It may be necessary to establish a competitive range. Factors from the predetermined criteria will be used to make this determination. Responses not in the competitive range will not receive further award consideration. Region 4 ESC may determine establishing a competitive range is not necessary.

4. Past Performance: An Offeror's past performance and actions are relevant in determining whether or not the Offeror is likely to provide quality goods and services; the administrative aspects of performance; the Offeror's history of reasonable and cooperative behavior and commitment to customer satisfaction; and generally, the Offeror's businesslike concern for the interests of the customer may be taken into consideration when evaluating proposals, although not specifically mentioned in the RFP.

5. Additional Investigations: Region 4 ESC reserves the right to make such additional investigations as it deems necessary to establish the capability of any Offeror.

NOTICE TO OFFEROR

ADDENDUM NO. 1

Solicitation Number 19-18

Request for Proposal ("RFP")
by Region 4 Education Service Center ("ESC")
for Furniture, Installation, and Related Services

This Addendum No. 1 amends the Request for Proposals (RFP) for Furniture, Installation, and Related Services 19-18 ("Addendum"). To the extent of any discrepancy between the original RFP and this Addendum, this Addendum shall prevail.

Region 4 Education Service Center ("Region 4 ESC") requests proposals from qualified suppliers with the intent to enter into a Contract for Furniture, Installation, and Related Services. Addendum No. 1 is hereby issued as follows:

CLARIFICATIONS:

1. The changes being made to this RFP are being made to add Appendix C Documents #5-7 in order to fulfill FEMA requirements. While it is not expected that the services outlined in this RFP would be utilized in a disaster recovery or emergency situation, Region 4 ESC is including language should it be needed.

CHANGES TO THE RFP:

1. Remove Appendix C, Additional Required Documents, and replace with the version attached to this Addendum No. 2. This is the Appendix C that should be used for this solicitation and submitted as part of the Offeror's proposal.

Appendix C
ADDITIONAL REQUIRED DOCUMENTS

DOC #1 Acknowledgment and Acceptance of Region 4 ESC's Open Records Policy

DOC #2 Antitrust Certification Statements (Tex. Government Code § 2155.005)

DOC #3 Implementation of House Bill 1295 Certificate of Interested Parties (Form 1295)

DOC #4 Texas Government Code 2270 Verification Form

DOC #5 Special Conditions

DOC #6 Questionnaire

DOC #7 For applicable construction/reconstruction/renovation and related services, a bid guarantee is required not less than five percent (5%) of the total bid. Surety shall provide a copy of the Power of Attorney authorizing the Executing Agent the authority to execute the bid bond documents and bind the Surety to the bid bond conditions. The bid bond shall have a corporate Surety that is licensed to conduct business in Texas and authorized to underwrite bonds in the amount of the bid bond.

Appendix C, Doc #1

ACKNOWLEDGMENT AND ACCEPTANCE
OF REGION 4 ESC's OPEN RECORDS POLICY

OPEN RECORDS POLICY

All proposals, information and documents submitted are subject to the Public Information Act requirements governed by the State of Texas once a Contract(s) is executed. If an Offeror believes its response, or parts of its response, may be exempted from disclosure, the Offeror must specify page-by-page and line-by-line the parts of the response, which it believes, are exempt and include detailed reasons to substantiate the exemption. Price is not confidential and will not be withheld. Any unmarked information will be considered public information and released, if requested under the Public Information Act.

The determination of whether information is confidential and not subject to disclosure is the duty of the Office of Attorney General (OAG). Region 4 ESC must provide the OAG sufficient information to render an opinion and therefore, vague and general claims to confidentiality by the Offeror are not acceptable. Region 4 ESC must comply with the opinions of the OAG. Region 4 ESC assumes no responsibility for asserting legal arguments on behalf of any Offeror. Offeror is advised to consult with their legal counsel concerning disclosure issues resulting from this procurement process and to take precautions to safeguard trade secrets and other proprietary information.

Signature below certifies complete acceptance of Region 4 ESC's Open Records Policy, except as noted below (additional pages may be attached, if necessary).

Check one of the following responses to the Acknowledgment and Acceptance of Region 4 ESC's Open Records Policy below:

☐ We acknowledge Region 4 ESC's Open Records Policy and declare that no information submitted with this proposal, or any part of our proposal, is exempt from disclosure under the Public Information Act.

☒ We declare the following information to be a trade secret or proprietary and exempt from disclosure under the Public Information Act.

(Note: Offeror must specify page-by-page and line-by-line the parts of the response, which it believes, are exempt. In addition, Offeror must include detailed reasons to substantiate the exemption(s). Price is not confident and will not be withheld. All information believed to be a trade secret or proprietary must be listed. It is further understood that failure to identify such information, in strict accordance with the instructions, will result in that information being considered public information and released, if requested under the Public Information Act.)

Appendix C, DOC # 3

Implementation of House Bill 1295

Certificate of Interested Parties (Form 1295):

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016.

The Texas Ethics Commission was required to adopt rules necessary to implement that law, prescribe the disclosure of interested parties form, and post a copy of the form on the commission's website. The commission adopted the Certificate of Interested Parties form (Form 1295) on October 5, 2015. The commission also adopted new rules (Chapter 46) on November 30, 2015, to implement the law. The commission does not have any additional authority to enforce or interpret House Bill 1295.

Filing Process:

Staring on January 1, 2016, the commission made available on its website a new filing application that must be used to file Form 1295. A business entity must use the application to enter the required information on Form 1295 and print a copy of the completed form, which will include a certification of filing that will contain a unique certification number. An authorized agent of the business entity must sign the printed copy of the form. The completed Form 1295 with the certification of filing must be filed with the governmental body or state agency with which the business entity is entering into the contract.

The governmental entity or state agency must notify the commission, using the commission's filing application, of the receipt of the filed Form 1295 with the certification of filing not later than the 30th day after the date the contract binds all parties to the contract. This process is known as acknowledging the certificate. The commission will post the acknowledged Form 1295 to its website within seven business days after receiving notice from the governmental entity or state agency. The posted acknowledged form does not contain the declaration of signature information provided by the business.

A certificate will stay in the pending state until it is acknowledged by the governmental agency. Only acknowledged certificates are posted to the commission's website.

Texas Government Code 2270 Verification Form

House Bill 89 (85R Legislative Session), which adds Chapter 2270 to the Texas Government Code, provides that a governmental entity may not enter into a contract with a company without verification that the contracting vendor does not and will not boycott Israel during the term of the contract.

Furthermore, Senate Bill 252 (85R Legislative Session), which amends Chapter 2252 of the Texas Government Code to add Subchapter F, prohibits contracting with a company engaged in business with Iran, Sudan or a foreign terrorist organization identified on a list prepared by the Texas Comptroller.

I, Bryan Poist, as an authorized representative of

Affordable Interior Systems, Inc. (AIS), a contractor engaged by

Insert Name of Company

Region 4 Education Service Center, 7145 West Tidwell Road, Houston, TX 77092, verify by this writing that the above-named company affirms that it (1) does not boycott Israel; and (2) will not boycott Israel during the term of this contract, or any contract with the above-named Texas governmental entity in the future.

Also, our company is not listed on and we do not do business with companies that are on the Texas Comptroller of Public Accounts list of Designated Foreign Terrorists Organizations found at https://comptroller.texas.gov/purchasing/docs/foreign-terrorist.pdf.

I further affirm that if our company's position on this issue is reversed and this affirmation is no longer valid, that the above-named Texas governmental entity will be notified in writing within one (1) business day and we understand that our company's failure to affirm and comply with the requirements of Texas Government Code 2270 et seq. shall be grounds for immediate contract termination without penalty to the above-named Texas governmental entity.

I swear and affirm that the above is true and correct.

Bryan Poist

SPECIAL CONDITIONS

Awarded Offerors may need to respond to events and losses where products and services are needed for the immediate and initial response to emergency situations such as, but not limited to, water damage, fire damage, vandalism cleanup, biohazard cleanup, sewage decontamination, deodorization, and/or wind damage during a disaster or emergency situation. By submitting a proposal, the Offeror is accepted these Special Conditions required by the Federal Emergency Management Agency (FEMA).

Conflicts of Interest

No employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a FEMA award if he or she has a real or apparent conflict of interest. Such a conflict would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of these parties, has a financial or other interest in or a tangible personal benefit from a firm considered for award. 2 C.F.R. § 200.318(c)(1); See also Standard Form 424D, ¶ 7; Standard Form 424B, ¶ 3.

i. FEMA considers a "financial interest" to be the potential for gain or loss to the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of these parties as a result of the particular procurement. The prohibited financial interest may arise from ownership of certain financial instruments or investments such as stock, bonds, or real estate, or from a salary, indebtedness, job offer, or similar interest that might be affected by the particular procurement.

ii. FEMA considers an "apparent" conflict of interest to exist where an actual conflict does not exist, but where a reasonable person with knowledge of the relevant facts would question the impartiality of the employee, officer, or agent participating in the procurement. c. Gifts. The officers, employees, and agents of Region 4 ESC nor the Participating Public Agency ("NFE") must neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or parties to subcontracts. However, NFE's may set standards for situations in which the financial interest is de minimus, not substantial, or the gift is an unsolicited item of nominal value. 2 C.F.R. § 200.318(c)(1). d. Violations. The NFE's written standards of conduct must provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the NFE. 2 C.F.R. § 200.318(c)(1). For example, the penalty for a NFE's employee may be dismissal, and the penalty for a contractor might be the termination of the contract.

Contractor Integrity

A contractor must have a satisfactory record of integrity and business ethics. Contractors that are debarred or suspended as described in Chapter III, ¶ 6.d must be rejected and cannot receive contract awards at any level.

Public Policy

A contractor must comply with the public policies of the Federal Government and state, local government, or tribal government. This includes, among other things, past and current compliance with the:
a. Equal opportunity and nondiscrimination laws
b. Five affirmative steps described at 2 C.F.R. § 200.321(b) for all subcontracting under contracts supported by FEMA financial assistance; and FEMA Procurement Guidance June 21, 2016 Page IV- 7
c. Applicable prevailing wage laws, regulations, and executive orders

Affirmative Steps

For any subcontracting opportunities, Contractor must take the following Affirmative steps:

1. Placing qualified small and minority businesses and women's business enterprises on solicitation lists;
2. Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;
3. Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;
4. Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises; and
5. Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce;

Bid Guarantee

For proposals that are to include construction/reconstruction/renovation and related services, bids must be accompanied by Certified or Cashier's Check or an approved Bid Bond in the amount of not less than five percent (5%) of the total bid. Surety shall provide a copy of the Power of Attorney authorizing the Executing Agent the authority to execute the bid bond documents and bind the Surety to the bid bond conditions. The bid bond shall have a corporate Surety that is licensed to conduct business in the state of the lead agency and authorized to underwrite bonds in the amount of the bid bond.

Prevailing Wage Requirements

When applicable, the awarded Contractor(s) and any and all subcontractor(s) agree to comply with all laws regarding prevailing wage rates including the Davis-Bacon Act, applicable to this solicitation and/or Participating Public Agencies. The Participating Public Agency shall notify the Contractor of the applicable pricing/prevailing wage rates and must apply any local wage rates requested. The Contractor and any subcontractor(s) shall comply with the prevailing wage rates set by the Participating Public Agency.

Alternative Pricing for Federal Funding

When applicable, such as when products and services are used in response to an emergency or disaster recovery situation in which federal funding may be used, pricing may not include cost plus a percentage of cost or pricing based on time and materials. If time and materials is necessary in an applicable federal funding situation, a ceiling price that the contract exceeds at its own risk will be needed. In addition, Offeror is subject to and must comply with all federal requirements applicable to the funding including, but not limited, the to the 2 C.F.R. § 200.326 and 2 C.F.R. Part 200, Appendix II, Required Contract Clauses.

Federal Requirements

If products and services are issued in response to an emergency or disaster recovery the items below, located in this Special Conditions section of the Federal Funds Certifications, are activated and required when federal funding may be utilized.

2 C.F.R. § 200.326 and 2 C.F.R. Part 200, Appendix II, Required Contract Clauses

1. Termination for Convenience:

The right to terminate this Contract for the convenience of Region 4 ESC is retained by Region 4 ESC. In the event of a termination for convenience by Region 4 ESC, Region 4 ESC shall, at least ten (10) calendar days in advance, deliver written notice of the termination for convenience to Contractor. Upon Contractor's receipt of such written notice, Contractor immediately shall cease the performance of the Work and shall take reasonable and appropriate action to secure and protect the Work then in place. Contractor shall then be paid by Region 4 ESC, in accordance with the terms and provisions of the Contract Documents, an amount not to exceed the actual labor costs incurred, the actual cost of all materials installed and the actual cost of all materials stored at the project site or away from the project site, as approved in writing by Region 4 ESC but not yet paid for and which cannot be returned, and actual, reasonable and documented demobilization costs, if any, paid by Contractor and approved by Region 4 ESC in connection with the Scope of Work in place which is completed as of the date of termination by Region 4 ESC and that is in conformance with the Contract Documents, less all amounts previously paid for the Work. No amount ever shall be owed or paid to Contractor for lost or anticipated profits on any part of the Scope of Work not performed or for consequential damages of any kind.

2. Equal Employment Opportunity:

Region 4 ESC highly encourages Contractors to implement Affirmative Action practices in their employment programs. This means Contractor should not discriminate against any employee or applicant for employment because of race, color, religion, sex, pregnancy, sexual orientation, political belief or affiliation, age, disability or genetic information.

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

Employment, upgrading, demotion, or transfer, recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

(4) The contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the contractor's non-compliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be canceled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) The contractor will include the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: *Provided,* however, that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the

contractor may request the United States to enter into such litigation to protect the interests of the United States.

3. "During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions as may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the contractor may request the United States to enter into such litigation to protect the interests of the United States."

4. Davis Bacon Act and Copeland Anti-Kickback Act.

   a. Applicability of Davis-Bacon Act. The Davis-Bacon Act only applies to the emergency Management Preparedness Grant Program, Homeland Security Grant Program, Nonprofit Security Grant Program, Tribal Homeland Security Grant Program, Port Security Grant Program, and Transit Security Grant Program. **It does not apply to other FEMA grant and cooperative agreement programs, including the Public Assistance Program**.

   b. All prime construction contracts in excess of $2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. §§ 3141-3144 and 3146-3148) as supplemented by Department of Labor regulations at 29 C.F.R. Part 5 (Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction)). See 2 C.F.R. Part 200, Appendix II, ¶ D.

   c. In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week.

   d. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

   e. In contracts subject to the Davis-Bacon Act, the contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations at 29 C.F.R. Part 3 (Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States). The Copeland Anti- Kickback Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the

compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to FEMA.

f. The regulation at 29 C.F.R. § 5.5(a) does provide the required contract clause that applies to compliance with both the Davis-Bacon and Copeland Acts. However, as discussed in the previous subsection, the Davis-Bacon Act does not apply to Public Assistance recipients and subrecipients. **In situations where the Davis-Bacon Act does not apply, neither does the Copeland "Anti-Kickback Act."** However, for purposes of grant programs where both clauses do apply, FEMA requires the following contract clause:

"Compliance with the Copeland "Anti-Kickback" Act.

(1) Contractor. The contractor shall comply with 18 U.S.C. § 874, 40U.S.C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into this contract.

(2) Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as the FEMA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses

(3) Breach. A breach of the contract clauses above may be grounds for termination of the contract, and for debarment as a contractor and subcontractor as provided in 29 C.F.R. § 5.12."

5. Contract Work Hours and Safety Standards Act.

a. Applicability: This requirement applies to all FEMA grant and cooperative agreement programs.

b. Where applicable (see 40 U.S.C. § 3701), all contracts awarded by the non-Federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. See 2 C.F.R. Part 200, Appendix II, ¶ E.

c. Under 40 U.S.C. § 3702, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the workweek.

d. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or

articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

e. The regulation at 29 C.F.R. § 5.5(b) provides the required contract clause concerning compliance with the Contract Work Hours and Safety Standards Act:

"Compliance with the Contract Work Hours and Safety Standards Act.

(1) Overtime requirements. No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

(2) Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the clause set forth in paragraph (1) of this section the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (1) of this section, in the sum of $10 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (1) of this section.

(3) Withholding for unpaid wages and liquidated damages. The (write in the name of the Federal agency or the loan or grant recipient) shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (2) of this section.

(4) Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraph (1) through (4) of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier

subcontractor with the clauses set forth in paragraphs (1) through (4) of this section."

6. Rights to Inventions Made Under a Contract or Agreement.

   a. Stafford Act Disaster Grants. This requirement **does not apply to the Public Assistance**, Hazard Mitigation Grant Program, Fire Management Assistance Grant Program, Crisis Counseling Assistance and Training Grant Program, Disaster Case Management Grant Program, and Federal Assistance to Individuals and Households – Other Needs Assistance Grant Program, as

FEMA awards under these programs do not meet the definition of "funding agreement."

b. If the FEMA award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a) and the non-Federal entity wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the non-Federal entity must comply with the requirements of 37 C.F.R. Part 401 (Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements), and any implementing regulations issued by FEMA. See 2 C.F.R. Part 200, Appendix II, ¶ F.

   c. The regulation at 37 C.F.R. § 401.2(a) currently defines "funding agreement" as any contract, grant, or cooperative agreement entered into between any Federal agency, other than the Tennessee Valley Authority, and any contractor for the performance of experimental, developmental, or research work funded in whole or in part by the Federal government. This term also includes any assignment, substitution of parties, or subcontract of any type entered into for the performance of experimental, developmental, or research work under a funding agreement as defined in the first sentence of this paragraph.

7. Clean Air Act and the Federal Water Pollution Control Act. Contracts of amounts in excess of $150,000 must contain a provision that requires the contractor to agree to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act (42 U.S.C.§§ 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. §§ 1251-1387). Violations must be reported to FEMA and the Regional Office of the Environmental Protection Agency. See 2 C.F.R. Part 200, Appendix II, ¶ G.

   a. The following provides a sample contract clause concerning compliance for contracts of amounts in excess of $150,000:

"Clean Air Act

(1) The contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act, as amended, 42 U.S.C.§ 7401 et seq.

(2) The contractor agrees to report each violation to the (name of the state agency or local or Indian tribal government) and understands and agrees that the (name of the state agency or local or Indian tribal

government) will, in turn, report each violation as required to assure notification to the (name of recipient), Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.

(3) The contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with Federal assistance provided by FEMA.

Federal Water Pollution Control Act

(1) The contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Federal Water Pollution Control Act, as amended, 33 U.S.C. 1251 et seq.

(2) The contractor agrees to report each violation to the (name of the state agency or local or Indian tribal government) and understands and agrees that the (name of the state agency or local or Indian tribal government) will, in turn, report each violation as required to assure notification to the (name of recipient), Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.

(3) The contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with Federal assistance provided by FEMA."

8. Debarment and Suspension.

a. Applicability: This requirement applies to all FEMA grant and cooperative agreement programs.

b. Non-federal entities and contractors are subject to the debarment and suspension regulations implementing Executive Order 12549, *Debarment and Suspension* (1986) and Executive Order 12689, *Debarment and Suspension* (1989) at 2 C.F.R. Part 180 and the Department of Homeland Security's regulations at 2 C.F.R. Part 3000 (Non procurement Debarment and Suspension).

c. These regulations restrict awards, subawards, and contracts with certain parties that are debarred, suspended, or otherwise excluded from or ineligible for participation in Federal assistance programs and activities. See 2 C.F.R. Part 200, Appendix II, ¶ H; and *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200 (Uniform Rules): Supplement to the Public Assistance Procurement Disaster Assistance Team (PDAT) Field Manual* Chapter IV, ¶ 6.d, and Appendix C, ¶ 2 [hereinafter *PDAT Supplement*]. A contract award must not be made to parties listed in the SAM Exclusions. SAM Exclusions is the list maintained by the General Services Administration that contains the names of parties debarred, suspended, or otherwise excluded by

agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. SAM exclusions can be accessed at www.sam.gov. See 2 C.F.R. § 180.530; *PDAT Supplement,* Chapter IV, ¶ 6.d and Appendix C, ¶ 2.

d. In general, an "excluded" party cannot receive a Federal grant award or a contract within the meaning of a "covered transaction," to include subawards and subcontracts. This includes parties that receive Federal funding indirectly, such as contractors to recipients and subrecipients. The key to the exclusion is whether there is a "covered transaction," which is any non-procurement transaction (unless excepted) at either a "primary" or "secondary" tier. Although "covered transactions" do not include contracts awarded by the Federal Government for purposes of the non-procurement common rule and DHS's implementing regulations, it does include some contracts awarded by recipients and subrecipient.

e. Specifically, a covered transaction includes the following contracts for goods or services:

(1) The contract is awarded by a recipient or subrecipient in the amount of at least $25,000.

(2) The contract requires the approval of FEMA, regardless of amount.

(3) The contract is for federally required audit services.

(4) A subcontract is also a covered transaction if it is awarded by the contractor of a recipient or subrecipient and requires either the approval of FEMA or is in excess of $25,000.

d. The following provides a debarment and suspension clause. It incorporates an optional method of verifying that contractors are not excluded or disqualified:

"Suspension and Debarment

(1) This contract is a covered transaction for purposes of 2 C.F.R. pt. 180 and 2 C.F.R. pt. 3000. As such the contractor is required to verify that none of the contractor, its principals (defined at 2 C.F.R. § 180.995), or its affiliates (defined at 2 C.F.R. § 180.905) are excluded (defined at 2 C.F.R.§ 180.940) or disqualified (defined at 2 C.F.R. § 180.935).

(2) The contractor must comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C and must include a requirement to comply with these regulations in any lower tier covered transaction it enters into.

(3) This certification is a material representation of fact relied upon by (insert name of subrecipient). If it is later determined that the contractor did not comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C, in addition to remedies available to (name of state agency serving as recipient and name of subrecipient), the Federal

Government may pursue available remedies, including but not limited to suspension and/or debarment.

(4) The bidder or proposer agrees to comply with the requirements of 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C while this offer is valid and throughout the period of any contract that may arise from this offer. The bidder or proposer further agrees to include a provision requiring such compliance in its lower tier covered transactions."

9. Byrd Anti-Lobbying Amendment.

   a. Applicability: This requirement applies to all FEMA grant and cooperative agreement programs.

   b. Contractors that apply or bid for an award of $100,000 or more must file the required certification. See 2 C.F.R. Part 200, Appendix II, ¶ I; 44 C.F.R. Part 18; *PDAT Supplement*, Chapter IV, 6.c; Appendix C, ¶ 4.

   c. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. § 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award. See *PDAT Supplement*, Chapter IV, ¶ 6.c and Appendix C, ¶ 4.

   d. The following provides a Byrd Anti-Lobbying contract clause:

"Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352 (as amended)

Contractors who apply or bid for an award of $100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient."

APPENDIX A, 44 C.F.R. PART 18 – CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans, and Cooperative Agreements (To be submitted with each bid or offer exceeding $100,000)

The undersigned [Contractor] certifies, to the best of his or her knowledge, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form- LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31, U.S.C. § 1352 (as amended by the Lobbying Disclosure Act of 1995). Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The Contractor, Affordable Interior Systems, Inc. (AIS), certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. § 3801 *et seq.*, apply to this certification and disclosure, if any.

Signature of Contractor's Authorized Official

Bryan Poist, CFO

December 5, 2019

Date"

10. Procurement of Recovered Materials.

a. Applicability: This requirement applies to all FEMA grant and cooperative agreement programs.

b. A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, Pub. L. No. 89-272 (1965) (codified as amended by the Resource Conservation and Recovery Act at 42 U.S.C. § 6962). See 2 C.F.R. Part 200, Appendix II, ¶ J; 2 C.F.R. § 200.322; *PDAT Supplement*, Chapter V, ¶ 7.

c. The requirements of Section 6002 include procuring only items designated in guidelines of the EPA at 40 C.F.R. Part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired by the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

d. The following provides the clause that a state agency or agency of a political subdivision of a state and its contractors can include in contracts meeting the above contract thresholds:

"(1) In the performance of this contract, the Contractor shall make maximum use of products containing recovered materials that are EPA- designated items unless the product cannot be acquired—

(i) Competitively within a timeframe providing for compliance with the contract performance schedule;

(ii) Meeting contract performance requirements; or

(iii) At a reasonable price.

(2) Information about this requirement, along with the list of EPA- designate items, is available at EPA's Comprehensive Procurement Guidelines web site, https://www.epa.gov/smm/comprehensive- procurement-guideline-cpg-program."

11. Additional FEMA Requirements.

a. The Uniform Rules authorize FEMA to require additional provisions for non-Federal entity contracts. FEMA, pursuant to this authority, requires or recommends the following:

b. Changes.

To be eligible for FEMA assistance under the non-Federal entity's FEMA grant or cooperative

agreement, the cost of the change, modification, change order, or constructive change must be allowable, allocable, within the scope of its grant or cooperative agreement, and reasonable for the completion of project scope. FEMA recommends, therefore, that a non-Federal entity include a changes clause in its contract that describes how, if at all, changes can be made by either party to alter the method, price, or schedule of the work without breaching the contract. The language of the clause may differ depending on the nature of the contract and the end-item procured.

c. Access to Records.

All non-Federal entities must place into their contracts a provision that all contractors and their successors, transferees, assignees, and subcontractors acknowledge and

agree to comply with applicable provisions governing Department and FEMA access to records, accounts, documents, information, facilities, and staff. See DHS Standard Terms and Conditions, v 3.0, ¶ XXVI (2013).

d. The following provides a contract clause regarding access to records:

"Access to Records. The following access to records requirements apply to this contract:

(1) The contractor agrees to provide (insert name of state agency or local or Indian tribal government), (insert name of recipient), the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to any books, documents, papers, and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.

(2) The Contractor agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.

(3) The contractor agrees to provide the FEMA Administrator or his authorized representatives access to construction or other work sites pertaining to the work being completed under the contract."

12. DHS Seal, Logo, and Flags.

a. All non-Federal entities must place in their contracts a provision that a contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval. See DHS Standard Terms and Conditions, v 3.0, ¶ XXV (2013).

b. The following provides a contract clause regarding DHS Seal, Logo, and Flags: "The contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre- approval."

13. Compliance with Federal Law, Regulations, and Executive Orders.

    a. All non-Federal entities must place into their contracts an acknowledgement that FEMA financial assistance will be used to fund the contract along with the requirement that the contractor will comply with all applicable federal law, regulations, executive orders, and FEMA policies, procedures, and directives.

    b. The following provides a contract clause regarding Compliance with Federal Law, Regulations, and Executive Orders: "This is an acknowledgement that FEMA financial assistance will be used to fund the contract only. The contractor will comply will all applicable federal law, regulations, executive orders, FEMA policies, procedures, and directives."

14. No Obligation by Federal Government.

    a. The non-Federal entity must include a provision in its contract that states that the Federal Government is not a party to the contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

    b. The following provides a contract clause regarding no obligation by the Federal Government: "The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract."

15. Program Fraud and False or Fraudulent Statements or Related Acts.

    a. The non-Federal entity must include a provision in its contract that the contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to its actions pertaining to the contract.

    b. The following provides a contract clause regarding Fraud and False or Fraudulent or Related Acts: "The contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the contractor's actions pertaining to this contract."

Additional contract clauses per 2 C.F.R. § 200.325

For applicable construction/reconstruction/renovation and related services: A payment and performance bond are both required for 100 percent of the contract price. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract. A "payment bond" is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided in the contract.

Offeror agrees to comply with all terms and conditions outlined in the Special Conditions section of this solicitation.

Offeror's Name:
Affordable Interior Systems, Inc. (AIS)

Address, City, State, and Zip Code:
25 Tucker Drive, Leominster, MA 01453

Printed Name and Title of Authorized
Representative: Bryan Poist, Chief Financial Officer (CFO)

Email Address:
bpoist@ais-inc.com

Signature of Authorized Representative: 12-5-19 Date:

Appendix C, DOC # 6

QUESTIONNAIRE

Please provide responses to the following questions that address your company's operations, organization, structure and processes for providing products and services.

1. **Diversity Programs**
   - Do you currently have a diversity program or any diversity partners that you do business with? ☒Yes ☐No
     (If the answer is yes, attach a statement detailing the structure of your program, along with a list of your diversity alliances and a copy of their certifications.)

2. **Diverse Vendor Certification Participation**

   Region 4 ESC encourages the use of under-utilized businesses (HUB), minority and women business enterprises (MWBE), and small and/or disadvantages business enterprises (SBE) both as prime and subcontractors. Offerors shall indicate below whether or not they and/or any of their subcontractors (and if so which) hold certification in any of the classified areas and include proof of such certification with their response.

   a. **Minority Women Business Enterprise**
   Respondent certifies that this firm is an MWBE ☐Yes ☒No
   List certifying agency: _____

   b. **Small Business Enterprise (SBE) or Disadvantaged Business Enterprise (DBE)**
   Respondent certifies that this firm is a SBE or DBE ☐Yes ☒No
   List certifying agency: _____

   c. **Historically Underutilized Businesses (HUB)**
   Respondent certifies that this firm is a HUB ☐Yes ☒No
   List certifying agency: _____

   d. **Historically Underutilized Business Zone Enterprise (HUBZone)**
   Respondent certifies that this firm is a HUBZone ☐Yes ☒No
   List certifying agency: _____

   e. **Other**
   Respondent certifies that this firm is a recognized diversity certificate holder ☐Yes ☒No
   List certifying agency: _____

3. Has Offeror made and is Offeror committed to continuing to take all affirmative steps set forth in 2 CFR 200.321 as it relates to the scope of work outlined in this solicitation? ☒Yes ☐No

Furniture, Installation and Related Services

Appendix C, Doc #6 Questionnaire

Diversity Statement

As a large business GSA contract holder, AIS is required to submit yearly small business subcontractor plans and reports to GSA. These plans and reports must be approved by GSA and the Small Business Administration (SBA). AIS makes a good faith effort to meet the established small business subcontracting goals while being cognizant of the overall cost to customers. Utilizing small businesses has the potential to reflect an increase in purchasing costs, resulting in inflated selling points. AIS' team of professionals will explore all small business opportunities that fall within our subcontracting plan while avoiding any extended impact on our customers.

AIS has numerous authorized dealers that hold minority status. Certificates for minority status can be provided by the authorized dealer. AIS can offer the following socio-economic set-aside solutions:

- Small Business
- Small Disadvantaged
- Woman Owned
- Woman Owned Small Business
- Veteran Owned Small Business
- Service-Disabled Veteran Owned Small Business
- HUBZone
- 8(a)
- And more

Set aside certifications can be supplied upon request.

RECEIPT OF ADDENDUM NO. 1 ACKNOWLEDGEMENT

Offeror shall acknowledge this addendum by signing below and include in their proposal response.

OMNIA PARTNERS PROGRAM

AIS and OMNIA Partners work closely together to make ordering furniture simple and easy. AIS provides quality office and contract furnishings produced at our headquarters in Leominster, MA. Our diverse cross section of products are perfect for office, educational, and institutional use. Whether you're looking for tables, seating, storage, or desking solutions, we have what you need. And, if you happen to be looking for them quickly, we can do that too. Best of all, it won't break the bank.

OMNIA Partners is the purchasing organization that provides immense purchasing power and industry-leading suppliers to public sector, educational, and non-profit organizations. With no cost to participate and no minimum order requirements, organizations of any size have the ability to purchase the products, services and solutions they need at volume discount prices that would be nearly impossible to attain individually. No project is too small to reap the benefits of this competitively solicited contract. To learn more visit: To learn more, visit: OMNIA Partners & AIS Overview.

Save Time + Money With A Competitively Sourced Cooperative Contract

AIS & OMNIA Partners
Lead Agency: Region 4 ESC-TX

OMNIA® PARTNERS AIS

FURNITURE FOR PRIVATE OFFICES OR MEETING SPACES

Calibrate® Series has you covered—case closed. This collection of high-quality laminate casegoods and conferencing solutions looks great and performs well year after year. You'll appreciate the many finish choices, hardware options and styles to choose from.

Calibrate Private Office with Height Adjustable Cantilevered Return and L Shelves. Shown with Devens Task and Side Chair.

Calibrate Private Office with Height Adjustable Table in Bookcase Base. Shown with Auburn Chair and Grafton Side Chair.

Calibrate Conferencing Table with Boat Top, Three Bases and Incorporated Power and Data. Shown with Devens Task Seating.

Calibrate End Panel Table at Standing Height with Pierce Stools.

A RANGE OF WORKSTATIONS TO SUPPORT YOUR TEAMS

Open Plan

Open landscape offices continue to resonate. And we've got the right products to fill 'em—like Divi® and Matrix®. These panel-based systems offer high panels for privacy and low panels that keep employees close to the action. For benching, we designed Day-to-Day® PowerBeam and PowerBench—two proven desking solutions for the open plan. With a variety of storage and screen options, we've got the open plan solutions to help define space and support individual needs.

Divi Linear with Channel Mounted Screens, Devens Task Chair and Mobile Pedestal Storage.

Day-to-Day PowerBeam and Height Adjustable Tables with Slimline Screens.

Matrix with Quarter Glass Panels, Tri-Wheel Laminate Mobile Whiteboard to divide stations, and Calibrate Storage.

Day-to-Day PowerBench with Slimline Screens and Suspended Caddy.

YOU'LL APPRECIATE EVERTHING THAT'S POSSIBLE WITH AIS

AIS Training Rooms

Flip top, height adjustable and powered table options create flexible, interactive and effective training rooms. Choose from a variety of seating to support users' comfort and wellbeing.

AIS Lounge Spaces

Individual, small team, or collaborative meeting spaces provide comfort, relaxation and dedicated focus time.

AIS Café Spaces

Create engaging and flexible spaces with the level of technology support you need.

STORE YOUR STUFF, PULL UP A CHAIR, AND TAKE A SEAT AT ONE OF OUR TABLES

Storage

AIS' extensive statement of line - including lateral files, bookcases, wardrobes, suspended storage, pull-out pantry towers, personal storage, and lockers - will solve any storage need. With robust construction, tight tolerances, precision ball bearings and heavy weight shelf supports, AIS Storage will perform year after year.

Seating

When your team needs a place to sit, AIS has you covered with high-performing seating for workspaces, cafés and lounges, collaborative areas, training and conference rooms, and everywhere else. And when they need it fast, new seating can be on its way in a few days with the AIS Express Seating program.

Tables

From Monday meetings to Friday deadlines, AIS Tables deliver choice, value, and flexibility you can count on. Formal, informal, training, collaborative, café, height-adjustable, occasional — whatever you need.

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE SPECIAL EXCEPTION REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING IN THE SINGLE-FAMILY RESIDENTIAL ZONING DISTRICT (R-1), ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA-LOCKA BOULEVARD AND IDENTIFIED BY FOLIOS 08-2122-018-0200; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Applicant, DMG Investment Trust, LLC desires to construct a two-unit twin home building that will provide two three-bedroom units and appropriate parking spaces and landscaping on the single-family zoned parcel identified by folio 08-2122-018-0200; and

WHEREAS, in accordance with the City of Opa-Locka's Land Development Regulations ("City LDR"), Ordinance 15-31, Section 22-79 requires special exception review approval to permit the construction of a twin home on property zoned single-family; and

WHEREAS, the Applicant, has submitted a request for special exception review and provided documentation to meet the approval criteria as required by City LDR Section 22-60(B) to construct a two-unit twin home building in the Single-Family Residential Zoning District (R-1); and

WHEREAS, Planning & Community Development staff for the City of Opa-Locka has reviewed the application of DMG Investment Trust, LLC and has determined that the applicant has provided all information required by Section 22-55(I) of the City of Opa-Locka's Land Development Code for proper consideration by the City Commission; and

WHEREAS, the Planning and Zoning Board reviewed this request at a public hearing on December 12, 2023 and recommended approval of this request for special exception review by a 5—0 vote as the site plan is provided herein as Exhibit "A".

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interest of the City and its residents to approve the special exception request as provided herein.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AS FOLLOWS:

SECTION 1. RECITALS.
The above recitals are true and correct and are incorporated into this Resolution by reference.

SECTION 2. APPROVAL/DENIAL.
Approval/Denial of Special Exception Review. The City Commission of the City of Opa-Locka, Florida hereby approves / denies the request for the Special Exception for the Construction of a two three-bedroom units and appropriate parking spaces and landscaping in accordance with the City of Opa-Locka's Land Development Regulations on the property located at the corner of NW 17th Avenue and Opa Locka Boulevard and identified by folio 08-2122-018-0200, in the R-1 Zoning District, as set forth in Exhibit "A" attached to herein.

Section 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the Interim City Manager following review by the City Attorney, without the need of a public hearing by filing a corrected copy of same with the City Clerk.

Section 4. EFFECTIVE DATE.
This Resolution shall, upon adoption, become effective as specified by the City of Opa-Locka's Code of Ordinances, Land Development Regulations and the City of Opa-Locka Charter**.**

These blenders might cut you or burn your things. About 4.8 million have been recalled

BY DAVID J. NEAL
dneal@miamiherald.com

A blender should cut fruit, not your skin. Nor should it burn your possessions. So, BlendJet recalled about 4.9 million BlendJet 2 Portable Blenders sold in the United States and Canada.

"The recalled blenders can overheat or catch fire and the blender blades can break off, posing fire and laceration hazards to consumers," the U.S. Consumer Product Commission recall notice states.

That's not an idle concern. The recall notice says BlendJet knows about 329 times the blades broke; 49 times people got burned; one person who got sliced; 17 times the blenders overheated or started fires, causing $150,000 of property damage.

U.S. Consumer Product Safety Commission

BlendJet 2 Portable Blenders have been recalled.

BlendJet wants customers with the blenders, which were sold from October 2020 through this November, to reach out to the company for a free replacement of the base. Do this by cutting the rubber seal on the base into three or more pieces, shoot a photo with the pieces and the serial number on the base and email it to safety@blendjet.com or upload it to the recall website.

To see if this recall concerns your blender, you can go to BlendJet's site and enter your blender's serial number.

For other questions, either go to the recall website hyperlinked above or call BlendJet Monday through Friday, 8 a.m. to 10 p.m., Eastern time at 844-334-0562.

Miami Gardens, Palm Beach restaurant problems include rodents and flies

BY DAVID J. NEAL
dneal@miamiherald.com

A Miami Gardens and Rivera Beach restaurant were part of this week's Sick and Shut Down List of Miami-Dade and Palm Beach restaurants that failed inspection.

Once again, we remind you, we don't do the inspecting, and we don't choose who gets inspected. Direct your complaints to the Florida Department of Business and Professional Regulation.

In alphabetical order:

Caribbean Kitchen 305, 760 NW 183rd St., Miami Gardens: Routine inspection, 20 total violations, six High Priority violations.

We told you about this place with its hot water deficiencies — which means washing and cleaning deficiencies —and rodent problems earlier this week.

The kitchen was open again after it corrected the issue for the next day's re-inspection.

Mulligan's Beach House Singer Island, 2551 N. Ocean Ave., Riviera Beach: Complaint inspection, six total violations, five High Priority violations.

Eight flies at the inside bar were "flying around, landing on liquor bottles and the wall behind" the bar. Rodents left 34 droppings on the kitchen floor.

Mulligan's passed a second re-inspection two days after the original inspection.

CITY OF OPA-LOCKA, FLORIDA
NOTICE TO THE PUBLIC

NOTICE IS HEREBY GIVEN that the City Commission of the City of Opa-locka, Florida will hold public hearings at the Regular Commission Meeting on **Wednesday, January 10, 2024 at 7:00 p.m.,** in the City Commission Chambers at the Opa-locka Municipal Complex, 780 Fisherman Street, 3rd Floor, Opa-locka, Florida, to consider the following items for final adoption:

+ SITE INVESTIGATION NOTE

EXAMINATION OF CONTRACT DOCUMENTS AND SITE OF WORK THE BIDDER IS REQUIRED, BEFORE SUBMITTING HIS PROPOSAL, TO VISIT THE SITE OF THE PROPOSED WORK AND FAMILIARIZE HIM OR HERSELF WITH THE NATURE AND EXTENT OF THE WORK AND ANY LOCAL CONDITIONS THAT MAY IN ANY MANNER AFFECT THE WORK TO BE DONE AND EQUIPMENT, MATERIALS AND LABOR REQUIRED THEREFORE. SINCE THE WORK INVOLVES NEW AND/OR EXISTING BUILDINGS, SYSTEMS AND FACILITIES, SPECIAL CONSIDERATION SHALL BE GIVEN TO EXAMINATION OF WORKING CONDITIONS. NEW FACILITIES AND ALL BUILDING STRUCTURES FAMILIARIZE TO HIMSELF WITH ALL EXISTING CONDITIONS. SLIGHT VARIATION OF ROUTING AND OR CONSTRUCTIONS SHOULD BE ANTICIPATED BY THIS CONTRACTOR TO AVOID CONFLICTS WITH OTHER TRADES. THESE VARIATIONS ARE EXPRESSLY INCLUDED AS PART OF THE WORK WHENEVER REQUIRED AT NO ADDITIONAL COST TO THE OWNER. IGNORANCE ON THE PART OF THE CONTRACTOR WILL IN NO WAY RELIEVE HIM OF THE OBLIGATIONS AND RESPONSIBILITY ASSUMED UNDER THIS CONTRACT.

+ ALTERATION PROJECT PROCEDURES

REQUIREMENTS INCLUDED:

COORDINATE WORK OF TRADES AND SCHEDULE ELEMENTS OF ALTERATIONS AND RENOVATION WORK BY PROCEDURES AND METHODS TO EXPEDITE COMPLETION OF THE WORK.

CUT, MOVE OR REMOVE ITEMS AS NECESSARY TO PROVIDE ACCESS OR TO ALLOW ALTERATIONS AND NEW WORK TO PROCEED. INCLUDE SUCH ITEM AS:

a. REPAIR OR REMOVAL OF HAZARDOUS OR UNSANITY CONDITIONS.

b. REMOVAL OF ABANDONED ITEMS AND ITEMS SERVING NO USEFUL PURPOSE, SUCH AS ABANDONED PIPING, CONDUIT, AND WIRING.

c. REMOVAL OF UNSUITABLE OR EXTRAGENEOUS MATERIALS NOT MARKED FOR SALVAGE, SUCH AS ABANDONED EQUIPMENT AND DEBRIS INCLUDING ROTTED WOOD, RUSTED METALS AND DETERIORATED CONCRETE.

ALTERATIONS AND CONNECTIONS OF NEW CONTRUCTION TO EXISTING CONSTRUCTION OCCUR AT DUST SENSITIVE AREAS. EXECUTE ALL MEASURES TO COMPLETELY CONTROL AND SEPARATE DUST FROM EXISTING AREA AND EQUIPMENT.

+ TERMITE PROTECTION

ALL BUILDINGS SHALL HAVE PRE-CONSTRUCTION TREATMENT AGAINST SUBTERRANEAN TERMITES. THE RULES AND LAWS AS ESTABLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES SHALL BE DEEMED AS APPROVED WITH RESPECT TO PRE-CONSTRUCTION SOIL TREATMENT FOR PROTECTION AGAINST SUBTERRANEAN TERMITES. A CERTIFICATE OF COMPLIANCE SHALL BE ISSUED TO THE BUILDING DEPARTMENT BY THE LICENSED PEST CONTROL COMPANY THAT CONTAINS THE FOLLOWING STATEMENT: "THE BUILDING HAS RECEIVED A COMPLETE TREATMENT FOR THE PREVENTION OF SUBTERRABEAN TERMITES. TREATMENT IS IN ACCORDANCE WITH THE RULES AND LAWS ESTABLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES "

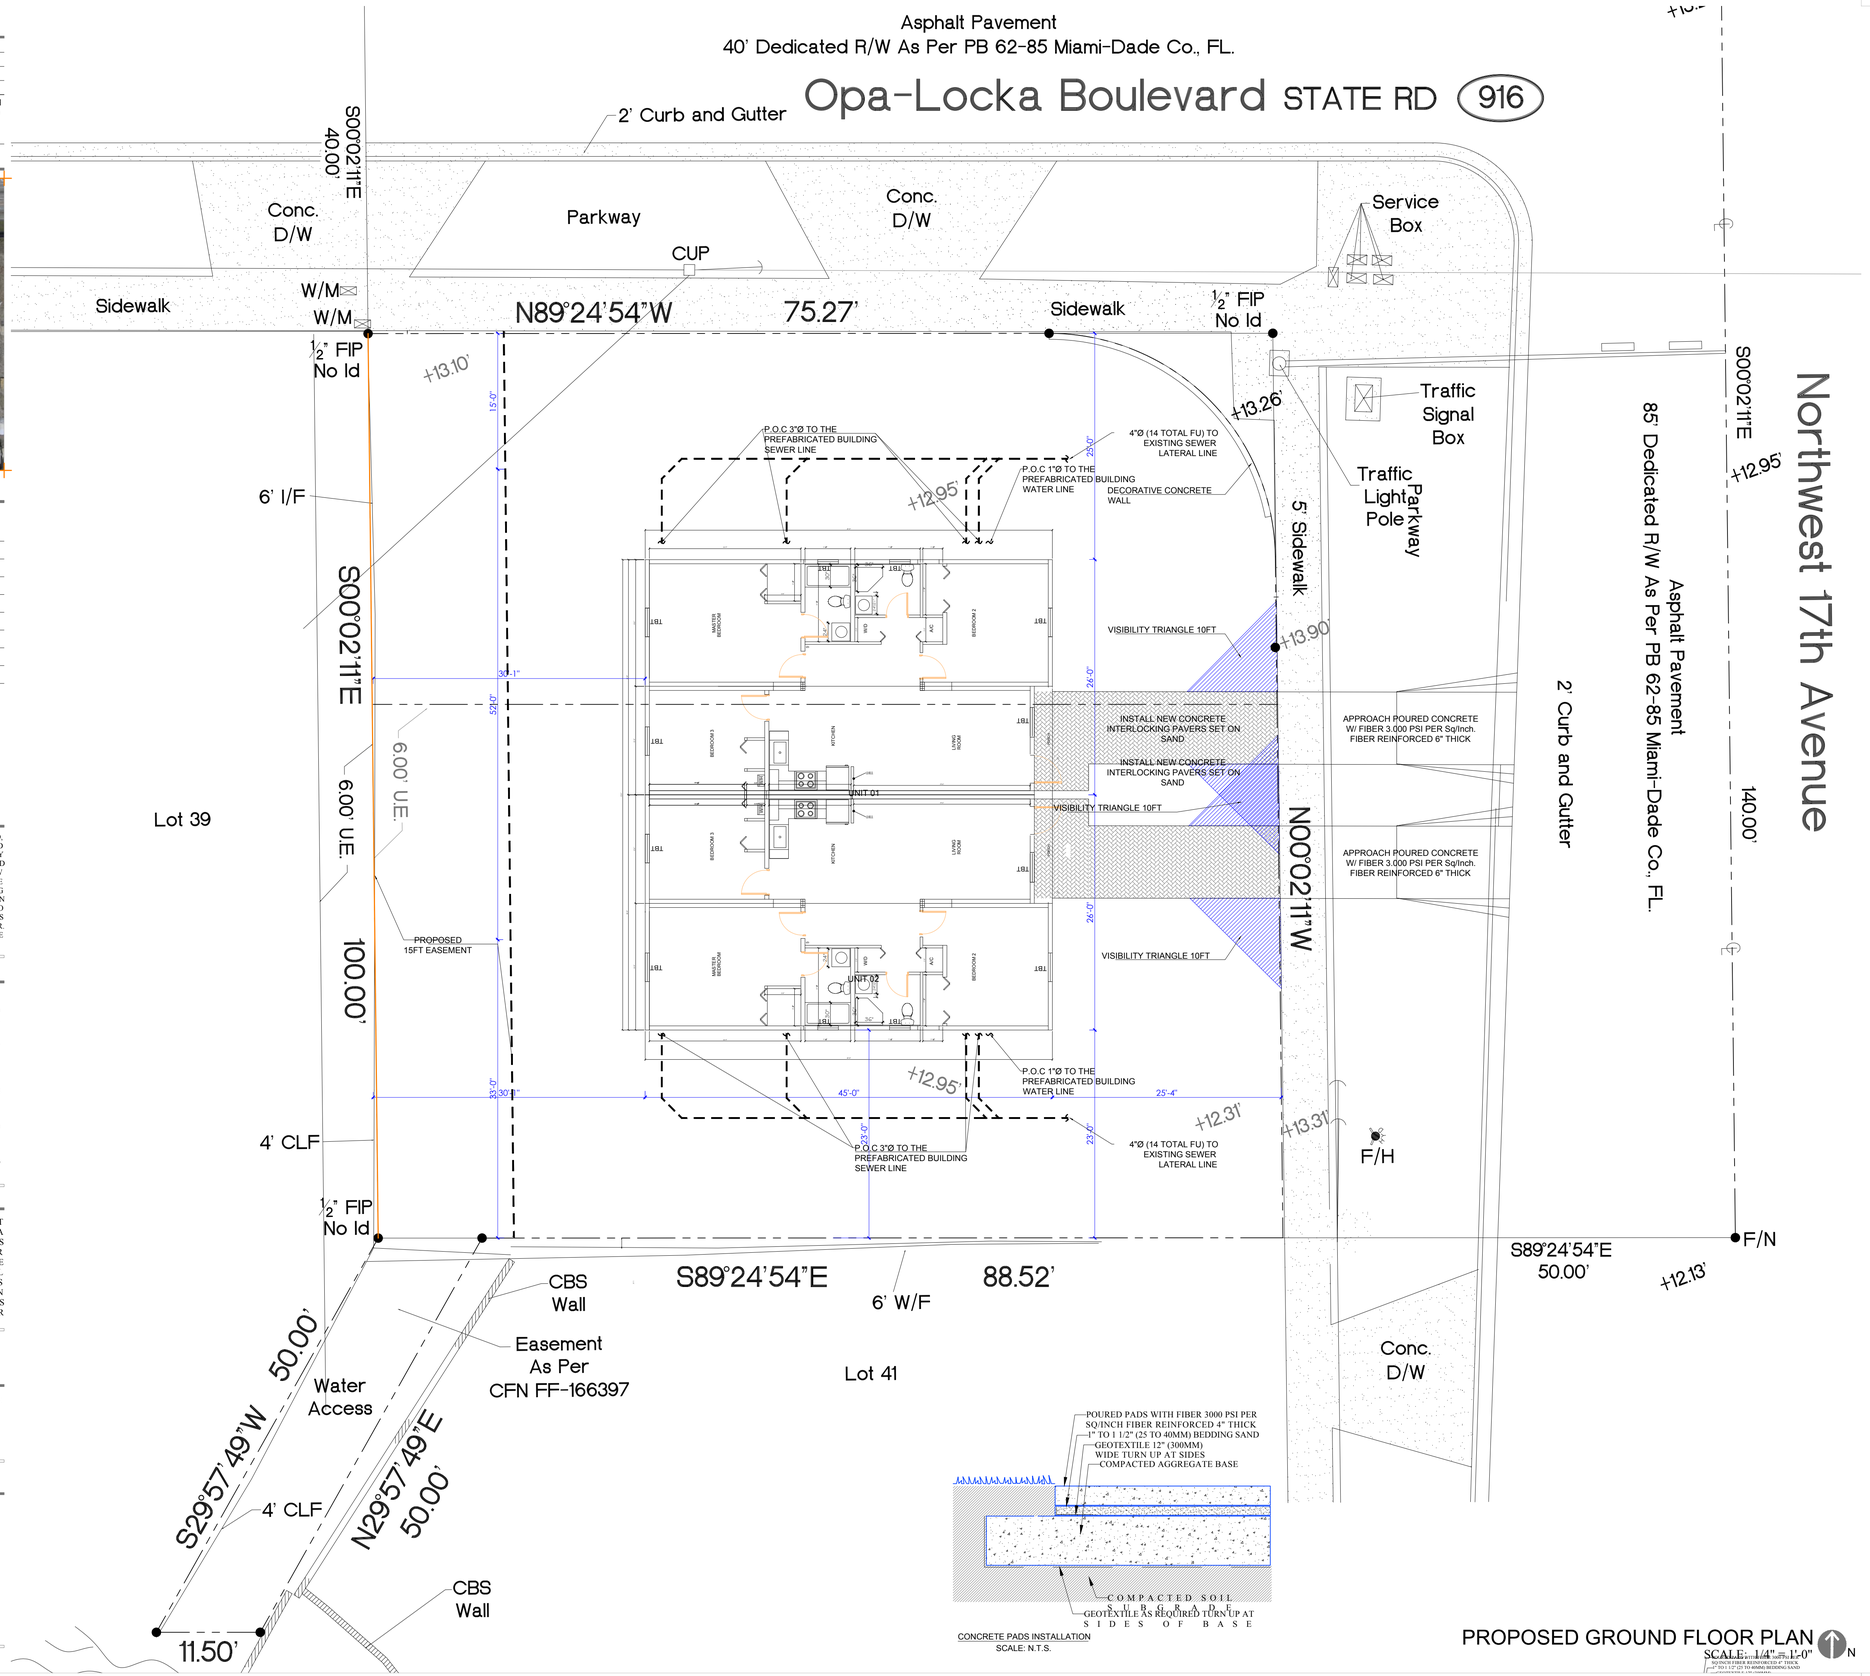
+ GENERAL SCOPE OF WORK

WORK ENCOMPASSED UNDER THIS SET OF CONTRACT DOCUMENTS INCLUDES THE CONSTRUCTION OF THE NEW ONE STORY RESIDENTIAL HOUSE.

+ NEW CONSTRUCTION:

- GROUND FLOOR:_____1,300,00 Sq.Ft.

+ NOTE



CONSTRUCTION DRAWINGS ARE DIAFRAMMATIC AND ARE NOT INTENDED TO SHOW EVERY DETAIL OF THE PROJECT.

CONTRACTOR TO PROVIDE ALL THE COMPONENTS NECESSARY FOR A COMPLETE AND FUNCTIONING PROJECT, EVEN IF NOT INCLUDED IN THE CONSTRUCTION DOCUMENTS.

ALTHOUGH IT IS UNDERSTOOD THAT THE CONTRACTOR IS NOT A LICENSED DESIGN PROFESSIONAL, THE CONTRACTOR SHALL COORDINATE ALL DIMENSIONS AND LOCATIONS OF SYSTEMS WITH ARCHITECTURE AND ALL DISCIPLINES INCLUDED IN THESE CONSTRUCTION DOCUMENTS.

THE CONTRACTOR AGREES TO PROMPTLY ADVISE THE ARCHITECT OF ANY NONCONFORMITY OBSERVED BY, OR MADE KNOWN TO, THE CONTRACTOR.

REFER TO "CONSTRUCTION NOTES" ON SHEET A0.02 FOR FURTHER INSTRUCTIONS.

January 3, 2023	November 18, 2022
February 7, 2023	December 16, 2022
March 7, 2023	January 13, 2023
April 4, 2023	February 18, 2023
May 2, 2023	March 17, 2023
June 6, 2023	April 14, 2023
July 11, 2023	May 19, 2023
August 1, 2023	June 16, 2023
September 5, 2023	July 21, 2023

1. All individuals seeking to appear before the Planning & Zoning Board must submit a complete Planning & Zoning Board application, with the required documents and fees totaling (as established by ordinance), paid by check or money order to the City of Opa-locka. Failure to submit all documents and fees will result in your case not being scheduled to be heard at a meeting.

2. If the applicant seeking to appear before the Planning & Zoning Board is not the property owner he must provide an affidavit of authorization from the property owner.

3. All regular meetings are held on the first Tuesday of each month at the City of Opa-locka City Commission Chambers, Meeting Time 7:00 P.M. *(time and location are subject to change, please check with the Planning and Community Development Department for exact time and location of the meetings).*

4. Application package must include all required documents per checklist and fees of The City of Opa-locka. The application will be reviewed by the Department and will be scheduled for the next P&Z meeting upon finding of sufficiency.

5. You are required to complete and return this application along with all the information and documentation (see page 2 check list) requested to the:

City of Opa-locka
Planning & Community Development Department
780 Fishermen Street 4th floor
Opa-locka, FL 33054

PLANNING & ZONING BOARD APPLICATION
(Checklist)

Applications will not be accepted without the following data. For a public hearing, all items below are necessary and must be submitted.

✓ Completed application form

✓ Application fee payable to the City of Opa-locka by check or money order

✓ Copy of property owner's and/or applicant's driver license/photo I.D. & Incorporation Documents (Inc., LLC, …)

✓ Affidavit (**see below**), and power of attorney of the property owner (**page 3**) (**Both must be Notarized**)

✓ A completed Neighborhood Petition form (attached) with the signature of each property owner in front, in the rear, to the left and to the right of the subject property, indicating his or her support for the proposed project. (Must include name, address, folio and phone number).

✓ All preliminary and final site plans, along with property survey, signed and notarized application(s) must be submitted on flash drive in PDF format.

✓ Fifteen (15) certified boundary and topographic surveys of the property (two copies size 36 x 24 inches & 13 copies 11 x 17 inches). (The submitted property survey must not exceed a maximum of two (2) years from date created in order to be considered acceptable by the City of Opa-locka)

✓ Fifteen (15) copies of Site Development Plan showing all drainage, water, sewer, structures, landscaping and parking in accordance with the City's zoning ordinance; (two copies size 36 x 24 inches & 13 copies size 11 x 17 inches & at least 7 original Sealed Copies)

✓ Map showing parcel to be considered and all properties' legal descriptions thereof, within 375' radius of said parcel. Map to be 1" = 100" scale. Owner's name, address, folio number and legal description on each parcel (Original and 2 copies size of document to accommodate scale)

✓ Narrative concept must be submitted with application

AFFIDAVIT

I, Joel Dominguez, being first duly sworn, depose and say that I am the **OWNER** of the property ,and I understand that this application must be complete and accurate before a public hearing can be advertised.

DMG
DEVELOPERS

PROJECT NARRATIVE

Preliminary Development Plan.

Pine Tree Lakes Twin-homes
13600 NW 17th Ave Miami, FL 33054

This narrative is written to provide a general project concept, the initial project timing, and details regarding the overall development. The proposed project is located near the southwest corner of NW 17th Avenue and Opa-Locka Blvd in Opa-Locka, Florida.

A site plan is included at the end of this narrative.

The project is consistent with several visions of the Opa-Locka's 20/30 Comprehensive Plan and will revitalize that corner.

The overall lot coverage is way under the required 35% at 2,252 SF or 22%.

The project consists of two 26'X42' side-by-side Modular units manufactured by a local business.

The developer takes into consideration a 15FT easement along the south limit of the property to allow the city access to the Pine Tree Lake for regular maintenance.

RE: Zoning Review-For the property at the corner Of NW 17th Ave & Opa-locka Boulevard, Opa-locka, FL 33054
Folio: 08-2122-018-0200

Mr. Dominguez,

Thank you for your interest in developing the property identified by folio 08-2122-018-0200. On December 2nd, 2021, we discussed your options to develop this 10,575 square foot property that is zoned for single-family development. We know you are interested in obtaining the highest and best use for this site and after review of the City Land Development Regulations we therefore inform you of the following options that are available to you:

1. Option 1 - Build one single family homes that complies with the required setbacks. (Single Family Detached) Submit building permits only.
2. Option 2 - Build two single family homes that share a common wall between the two homes [also referred to as a twin home] and each home complies with the required setbacks. (Single Family Attached) This path requires a formal Special Exception hearing review before the Planning & Zoning Board and formal review and approval by the City Commission at a public hearing. A maintenance easement for access to the lake would need to be considered as part of the siteplan of the property.

3. Option 3 – Replat your property into two lots. Each lot will be 5287.5 sf. A maintena easement for access to the lake would need to be considered as part of the replat of property. Build two single family homes by right or build two twinhomes by Spe Exception. Split the property will permit you to build four single family homes wl two [2] of each would share a common wall on each new parcel and each hc complies with the required setbacks. (Single Family Attached) This path require formal Special Exception hearing review before the Planning & Zoning Board and for review and approval by the City Commission at a public hearing.
4. Option 4 - Rezone the site to Duplex and build two duplexes/twin homes. rezoning request would require formal review before a Planning & Zoning Board formal review and approval by the City Commission at a public hearing. The site p for the proposed two duplex development would also be presented for review approval. A maintenance easement for access to the lake would need to be conside as part of the rezoning of the property.

Option 4 may be the most challenging as the PCD Department, by policy, is required to recomm against any zoning change request that may not meet the criteria for recommendation to change zoning to a higher adjacent residential zoning. We can further discuss this process if it is b considered.

This should make your options clear, however if you have any questions, please advise.

Thank you for helping make our City Great!

Sincerely,

Gerald Lee, Zoning Official-Planning & Community Development

PLANNING & ZONING BOARD

DECEMBER 05TH

2023

CONSTRUCTION OF A TWIN HOME BUILDING- SPECIAL EXCEPTION REVIEW

APPLICANT'S REQUEST:

Staff Report

A RESOLUTION OF THE PLANNING & ZONING BOARD OF THE CITY OF OPA-LOCKA, FLORIDA, RECOMMENDING APPROVAL OR DENIAL OF THE SPECIAL EXCEPTION REVIEW REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIOS 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

I. Site Background

- According to Miami-Dade County Property Appraiser's website, the subject Property's legal description is as follo

PB 65-85
1ST ADDN TO PINE TREE LAKE LOT 40 & PORT LOTS 39 & 41 BEG AT NW COR LOT 40 100FTS 29 DEG W50FT NELY 11.5 FT N 29 DEG E50 FT E88.52 FT N100 FT W100FT W100 FT TO POB LOT SIZE 10575 SQUARE FEET COC 23090-1810 02 2005 6

- The proposed project site is a vacant 10,575 square foot lot located at the south-east corner of Opa locka Boulevard and NW 17th Avenue. The site is zoned Single Family Residential and has a land use designation of Low-Density Residential. With the current residential zoning R-1, the square footage of this parcel and the residential land use designation, this site could be used for a twin home development after Special Exception Review approval and after Site Plan Review approval.

Figure 1: Google Street View: West View from NW 17th Avenue

II. Project Details

- **Applicant's intent**

The Applicant, DMG Investment Trust, LLC. intends to construct a twin home on this single family 10,575 square foot lot. Twin homes are permitted in the Duplex (R-2 Zoning District and in the Single Family R-1 Zoning district after Special Exception Review approval. They also intend to provide appropriate parking and landscaping in accordance with the City of Opa-locka's Land Development Regulations.

The applicant has submitted two application requests for the development of this site:

1. To review for special exception an opportunity to build a twin home on this site.
2. To review and consider for approval the site plan to build a twin home on this site.

To accommodate the new intended uses for this vacant residential site will require the review and recommendation of the Planning & Zoning Board and the review and approval of the City Commission concerning these two requests.

To be advertise at least 10 days prior to this Planning and Zoning Board meeting on Tuesday, December 5th, 2023. - City Commission Meeting: TBD		
Local Government Action Required	The City Commission must review this tentative plat and consider approval/disapproval after it is reviewed by the Planning and Zoning Board and any other applicable board or agency.		

• Overall Analysis

Existing Conditions:

- The Subject Property is generally adjacent to residential properties to the west and vacant land outside the City of Opa-locka to the east. There is also Industrial zoned properties North of this site.
- This development is within a residential neighborhood.
- Property is currently vacant and overgrown.

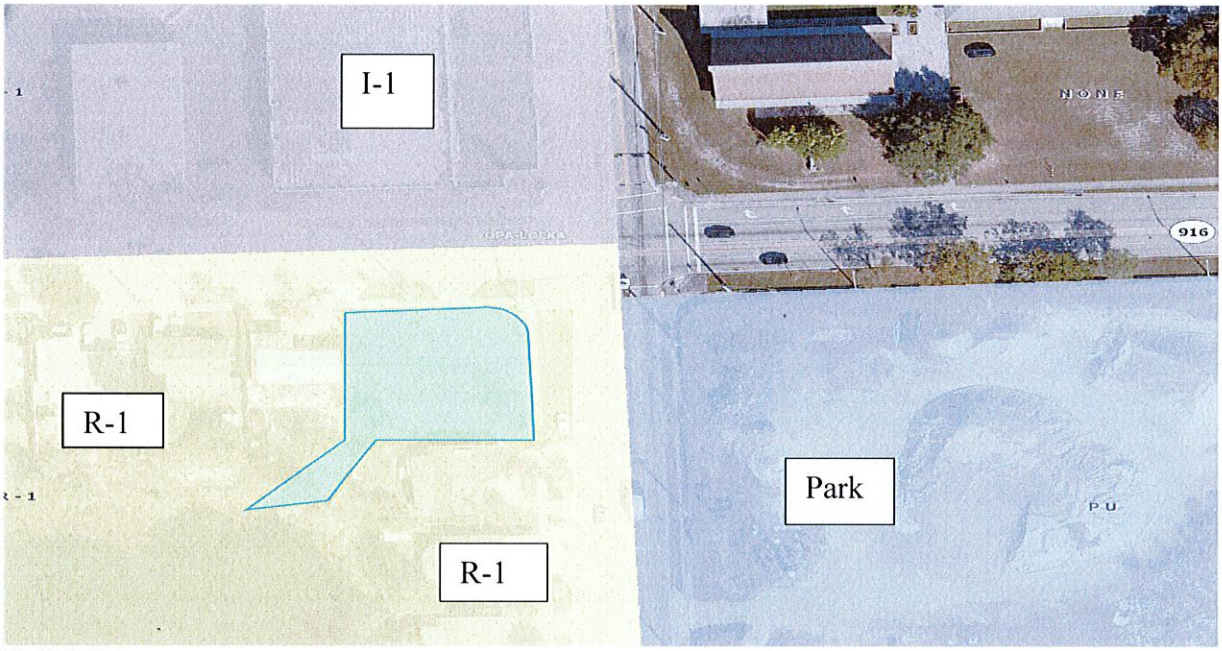
PZAB Special Exception Review Criteria- (Per Ordinance 15-31, Sec. 22-60, B Approval Criteria)

1. Compliance with the City's Comprehensive Plan.
2. Consistent with the "character and purpose" of the zoning district.
3. The size, shape and character of the property are suited for the proposed use.
4. Compatibility with the existing uses near the property.
5. Will not adversely affect the development of the general neighborhood or district.
6. Will not generate vehicular traffic or create vehicular circulation or ingress/egress problems or parking demands that have an unfavorable impact on surrounding properties when compared with uses permitted by right in the same district.
7. Potential for fire and/or other equally or greater dangerous hazards.
8. Create an unfavorable environment impacts on surrounding uses (e.g. noise, glare, smoke, dust, odor, fumes, water pollution, or general nuisance).
9. Consistent with existing and planned pedestrian and vehicular circulation adjacent to and near the property.

10. Site is adequately served by essential public services and facilities not requiring additional public expense in infrastructure improvements.
11. Will not adversely affect any site or feature of historical, cultural, natural or scenic importance.
12. Will not be contrary to the public health, safety, and welfare, provided that denial based exclusively on this language shall include explicit findings regarding the way in which granting the special exception would be contrary to the public health, safety and welfare.

PLANNING & COMMUNITY DEVELOPMENT DEPARTMENT: SPECIAL EXCEPTION REVIEW ANALYSIS:
The Development if approved

Would be in compliance with the City's Comprehensive Plan
Would be consistent with the character and purpose of the zoning district.
The size, shape and character of the property are suited for the proposed use.
Would be compatible with the existing uses near & adjacent to the property.
Would not adversely affect the development of the general neighborhood or district.
Would not generate vehicular traffic or create vehicular circulation or ingress/egress problems that would have an unfavorable impact on surrounding properties when compared with uses permitted by right in the same district given the size of the property.
Would not increase the potential for fire or /and other equally or greater dangerous hazards.
Would not create any unfavorable environmental impacts on surrounding uses, including noise, glare, smoke, dust, odor, fumes, water pollution, or general nuisance.
Would be consistent with existing and planned pedestrian and vehicular circulation adjacent to and near the property.



PZAB SITE PLAN APPROVAL CRITERIA-(Per Ordinance 15-31, Sec. 22-55, B Approval Criteria

1. The development permitted by the application, if granted, conforms to the Comprehensive Plan; is consistent with applicable area or neighborhood studies or plans, and would serve a public benefit warranting the granting of the application at the time it is considered.
2. The development permitted by the application, if granted, will have a favorable or unfavorable impact on the economy of the City.
3. The development permitted by the application, if granted, will efficiently use or not unduly burden water, sewer, solid waste disposal, recreation, education or other necessary public facilities which have been constructed or planned and budgeted for construction.

PLANNING & COMMUNITY DEVELOPMENT DEPARTMENT: SITE PLAN ANALYSIS

The development if approved conforms to the Comprehensive Plan.
The development if approved will have a favorable impact on the economy of the City.
The development if approved will efficiently use or not unduly burden water, sewer, solid waste disposal, recreation, education or other necessary public facilities which have been constructed or planned and budgeted for construction.

Surrounding Zoning Designation Map

The Site is highlighted in image

Surrounding Land Use and Zoning: Table 2

Location	Existing Land Use	Future Land Use (FLU)	Zoning
North	Commercial/Residential	Commercial/Residential	B-O to B-2/ R-1 R-2
South	Residential	Residential	R-TH
East	N/A	N/A	N/A
West	Residential	Residential	R-1

COMPLIES

- **General Character / Neighborhood Compatibility:** The proposed development use will be in Harmony with the general character of the surrounding neighborhood considering population density, design, scale, and bulk of any proposed new structures, intensity and character of activity, traffic and parking conditions?
  - **Findings:**
    - The propose development use to construct a twin home on this site is in harmony with the general characteristic of the surrounding neighborhood: Single Family Uses

- **Tree Preservation:** Compliance with Tree Preservation Ordinance required pursuant to City ORDINANCE NO.10-03

COMPLIES

  - **Findings:**
    - The Applicant is proposing to include landscaping for an area of 2,206 square feet. *(Please see attached Landscape Plan for Trees detailed information*).

- **Fence:** All fences constructed on property perimeters shall be in accordance with the requirements of the Land Development Regulation Section 22-134., however if additional walls, fences or hedges are installed they shall also comply with the requirements of this Section.
  - **Findings:**
    - The Applicant may install a fence in accordance with the LDR.

COMPLIES

- **Future Land Use:** Low Density Residential.
  - **Findings:**

- According to the City of Opa-locka Comprehensive Plan; the proposed project shall be located within the City's Low Density Residential LU category location which is appropriate for single family and duplex uses.

- **R-1 (Single-Family) Permitted Uses:** Project Specific: *Construction of a twin home on this vacant site.* **COMPLIES**
  - **Findings:**
    - According to the City's Land Development Regulation/ Zoning Code R-1 (Single-Family) zoning district would permit this use, if special exception review is approved by the City Commission. This use is compatible with the zoning of the proximal zoning district.

- **Community Comments/Petitions:** The Applicant verbally informed the Planning and Community Development Department that petitions were submitted to the surrounding businesses for signatures, comments or possible opposition.
  - **Findings:** The Planning and community Development Department has not received signed petitions submitted to the Neighboring Businesses as indicated by the Applicant.

COMPLIES

III. Project Need Assessment / other Required Approvals

1. Special Exception Review 3. Site Plan Review
   Application(s) submitted for Planning & Zoning Board Meeting (this meeting) Tuesday, December 5th, 2023

IV. Development Review Committee (DRC): *Meeting Review Comments*

1. **Capital Improvement Project (CIP):**
   - No issues reported for the proposed Site Plan
2. **Building:**
   - N/A
3. **Police:**
   - N/A
4. **Community Redevelopment Agency (CRA):**
   - N/A
5. **City Manager's Office (CMO):**
   - N/A
6. **Code Enforcement:**
   - N/A
7. **City Attorney's Office:**
   - Development Agreement under review
8. **Public works:**

SINCE THE WORK INVOLVES NEW AND/OR EXISTING BUILDINGS, SYSTEMS AND FACILITIES, SPECIAL CONSIDERATION SHALL BE GIVEN TO EXAMINATION OF WORKING CONDITIONS, NEW FACILITIES AND ALL BUILDING STRUCTURES FAMILIARIZE TO HIMSELF WITH ALL EXISTING CONDITIONS SLIGHT VARIATION OF ROUTING AND OR CONSTRUCTIONS SHOULD BE ANTICIPATED BY THIS CONTRACTOR TO AVOID CONFLICTS WITH OTHER TRADES THESE VARIATIONS ARE EXPRESSLY INCLUDED AS PART OF THE WORK WHENEVER REQUIRED AT NO ADDITIONAL COST TO THE OWNER. IGNORANCE ON THE PART OF THE CONTRACTOR WILL IN NO WAY RELIEVE HIM OF THE OBLIGATIONS AND RESPONSIBILITY ASSUMED UNDER THIS CONTRACT.

+ ALTERATION PROJECT PROCEDURES

REQUIREMENTS INCLUDED

COORDINATE WORK OF TRADES AND SCHEDULE ELEMENTS OF ALTERATIONS AND RENOVATION WORK BY PROCEDURES AND METHODS TO EXPEDITE COMPLETION OF THE WORK.

CUT, MOVE OR REMOVE ITEMS AS NECESSARY TO PROVIDE ACCESS OR TO ALLOW ALTERATIONS AND NEW WORK TO PROCEED. INCLUDE SUCH ITEM AS

a. REPAIR OR REMOVAL OF HAZARDOUS OR UNSAFETY CONDITIONS.

b. REMOVAL OF ABANDONED ITEMS AND ITEMS SERVING NO USEFUL PURPOSE, SUCH AS ABANDONED PIPING, CONDUIT, AND WIRING.

c. REMOVAL OF UNSUITABLE OR EXTRANEOUS MATERIALS NOT MARKED FOR SALVAGE, SUCH AS ABANDONED EQUIPMENT AND DEBRIS INCLUDING ROTTED WOOD, RUSTED METALS AND DETERIORATED CONCRETE.

ALTERATIONS AND CONNECTIONS OF NEW CONTRUCTION TO EXISTING CONSTRUCTION OCCUR AT DUST SENSITIVE AREAS EXECUTE ALL MEASURES TO COMPLETELY CONTROL AND SEPARATE DUST FROM EXISTING AREA AND EQUIPMENT.

+ TERMITE PROTECTION

ALL BUILDINGS SHALL HAVE PRE-CONSTRUCTION TREATMENT AGAINST SUBTERRANEAN TERMITES. THE RULES AND LAWS AS ESTABLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES SHALL BE DEEMED AS APPROVED WITH RESPECT TO PRE-CONSTRUCTION SOIL TREATMENT FOR PROTECTION AGAINST SUBTERRANEAN TERMITES. A CERTIFICATE OF COMPLIANCE SHALL BE ISSUED TO THE BUILDING DEPARTMENT BY THE LICENSED PEST CONTROL COMPANY THAT CONTAINS THE FOLLOWING STATEMENT "THE BUILDING HAS RECEIVED A COMPLETE TREATMENT FOR THE PREVENTION OF SUBTERRANEAN TERMITES. TREATMENT IS IN ACCORDANCE WITH THE RULES AND LAWS ESTABLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES."

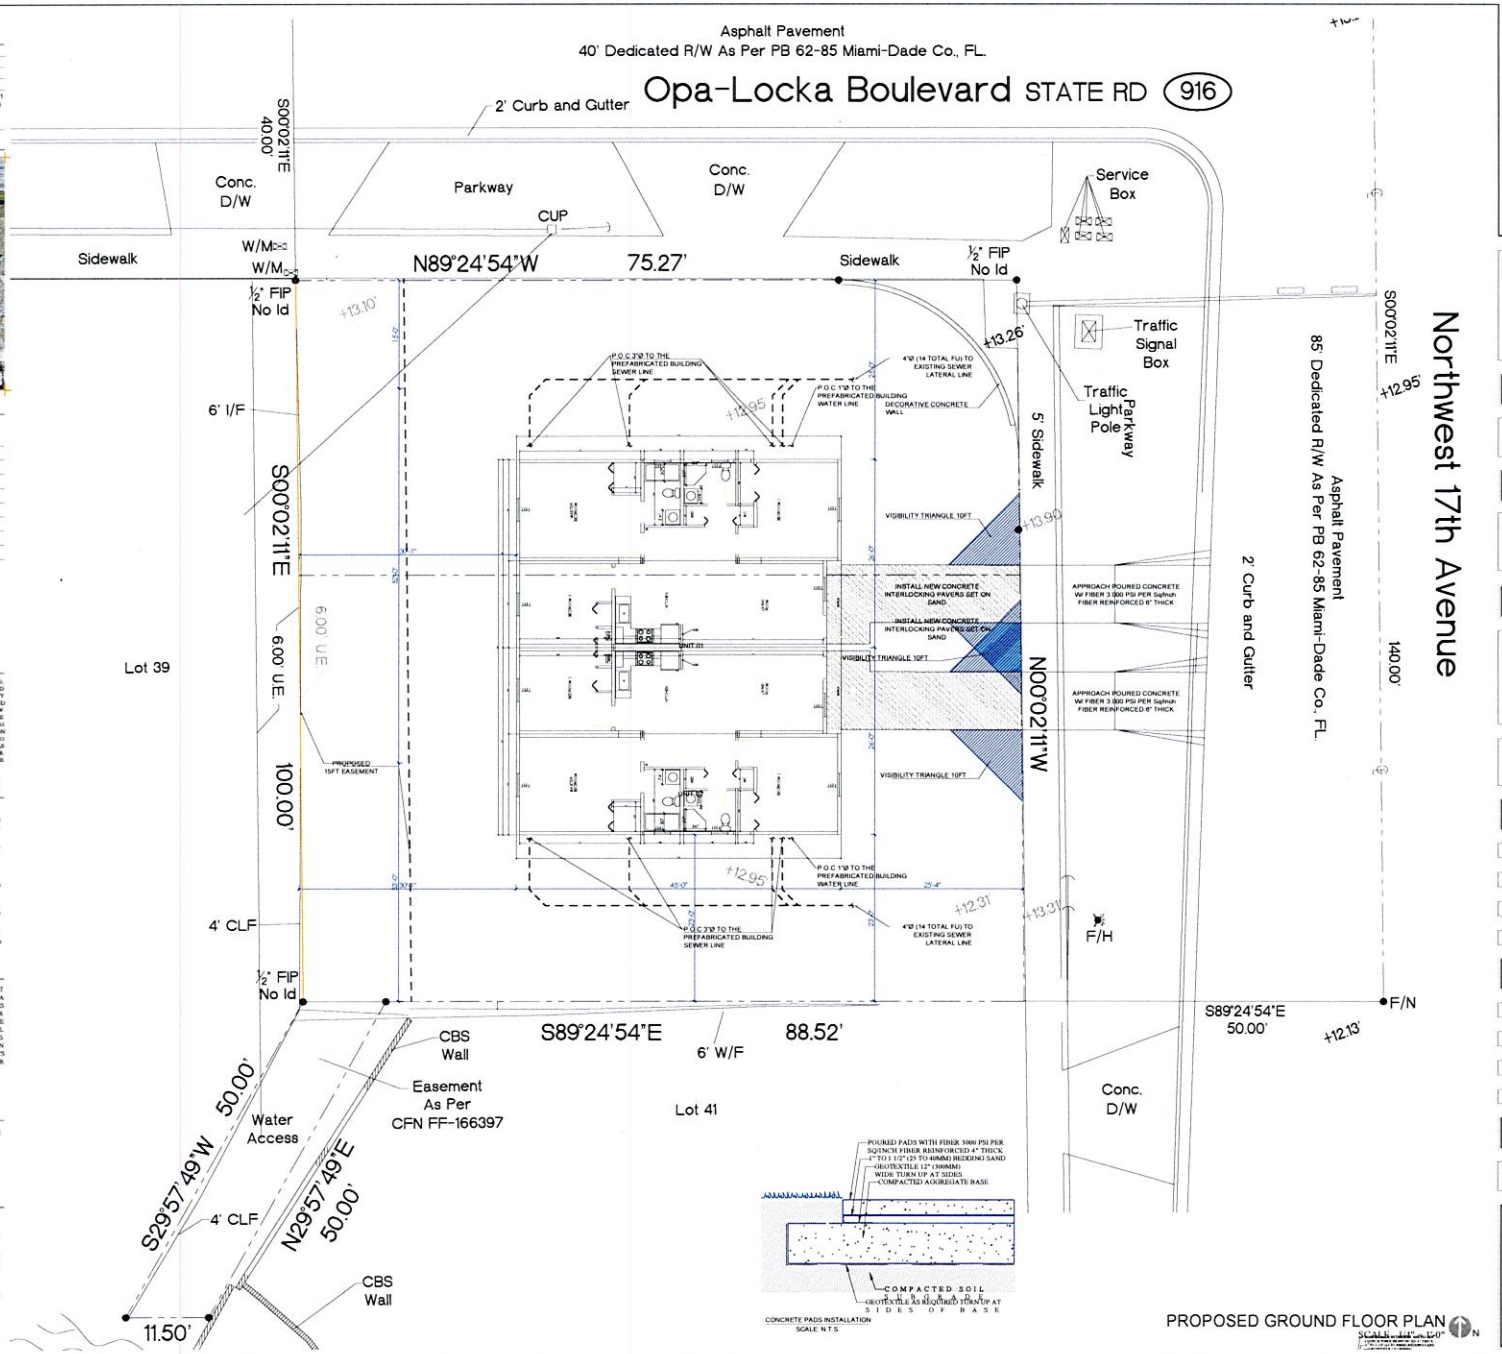
+ GENERAL SCOPE OF WORK

WORK ENCOMPASSED UNDER THIS SET OF CONTRACT DOCUMENTS INCLUDES THE CONSTRUCTION OF THE NEW ONE STORY RESIDENTIAL HOUSE.

- NEW CONSTRUCTION

GROUND FLOOR _____ 1,100.00 Sq Ft

+ NOTE



CONSTRUCTION DRAWINGS ARE DIAGRAMMATIC AND ARE NOT INTENDED TO SHOW EVERY DETAIL OF THE PROJECT.

CONTRACTOR TO PROVIDE ALL THE COMPONENTS NECESSARY FOR A COMPLETE AND FUNCTIONING PROJECT, EVEN IF NOT INCLUDED IN THE CONSTRUCTION DOCUMENTS.

ALTHOUGH IT IS UNDERSTOOD THAT THE CONTRACTOR IS NOT A LICENSED DESIGN PROFESSIONAL, THE CONTRACTOR SHALL COORDINATE ALL DIMENSIONS AND LOCATIONS OF SYSTEMS WITH ARCHITECTURE AND ALL DISCIPLINES INCLUDED IN THESE CONSTRUCTION DOCUMENTS.

THE CONTRACTOR AGREED TO PROMPTLY ADVISE THE ARCHITECT OF ANY NONCONFORMITY OBSERVED BY, OR MADE KNOWN TO, THE CONTRACTOR.

REFER TO "CONSTRUCTION NOTES" ON SHEET A0 02 FOR FURTHER INSTRUCTIONS

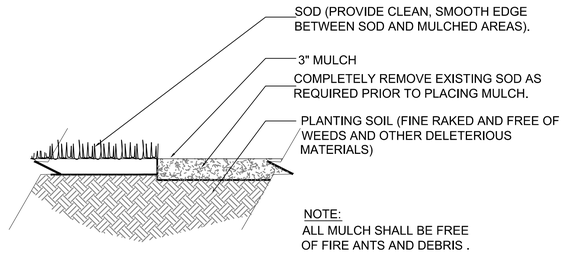
GENERAL NOTES

1. Before construction begins, the Landscape Contractor is responsible for locating all underground utilities and must avoid damaging any services during construction. If any damage occurs by fault of the Contractor, the necessary repairs must take place at the Landscape Contractor's expense and under the supervision of the Owner's representative.
2. All proposed trees and plant materials shall be graded as Nursery Grade Florida No. 1 or better as outlined by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry "Grades and standards for Nursery Plants", most current edition. All planting shall be done in accordance with the Florida Nurserymen's and Grower's Association approved practices.
3. In addition to these requirements the Landscape Contractor shall comply with all local landscape codes and requirements as part of this base bid and contract in order to satisfy the review and approval of the governing agency.
4. All screening hedges shall be planted and maintained in a way that they form a continuous visual screen. Screening hedges at VUA to be maintained at a minimum height of thirty (30) inches.
5. All planting beds shall be excavated to a minimum depth of twenty-four (24") inches and backfilled with a suitable soil. All plant material shall be planted in planting soil that is delivered to the site in a loose, clean and friable condition. The planting soil shall be the approximate proportions as follows: 50% sand and 50% organic material consisting of native peat, well-decomposed sawdust, leaf mold and top soil. It shall provide a good pliable and thoroughly mixed medium with adequate aeration, drainage and water-holding capacity. It shall also be free of all extraneous debris, such as roots, stones, weeds, etc.
6. All trees/palms and shrubs shall be fertilized with "Agriform" 20-10-5 planting tablets as per the manufacturers specifications at the time of installation and prior completion of pit backfilling also in conjunction with note #5. Tablets to be placed uniformly around the root mass at a depth that is between the middle and bottom of root mass at an application rate of: One (1) - 21 gram tablet for 1 gal container, two (2)- tablets for 3 gal container, three (3)- tablets for 5 gal container, four (4)-tablets for 7 gal container, three (3)-tablets for each 1/2 inch of tree caliper, and seven (7) tablets for palms. Ground Cover areas shall receive fertilization with "Ozmocote" time release fertilizer as per manufacturer's specification.
7. All plant beds shall receive a 3" layer of organic mulch, which is to be watered-in after installation. Mulch should be at least six (6) inches away from any portion of a structure or tree trunk and three (3) inches away from the base of shrubs. Only environmental friendly mulch shall be approved, Cypress mulch shall not be accepted.
8. All plant material shall be thoroughly watered in at the time of planting and until landscape material is established. No dry material shall be permitted.
9. The plant material schedule is presented for the convenience of the Landscape Contractor. In the event of a discrepancy between the plan and the plant key, the plan shall prevail.
10. Plants shall meet size, container, and spacing specifications. Any material not meeting specifications shall be removed and replaced at the contractor's expense.
11. All tree and shrub locations shall be approved by Landscape Architect prior to planting.
12. The Landscape Contractor shall grade planting beds, as required, to provide positive drainage and promote optimum plant growth.
13. The Landscape Contractor shall be responsible for examining fully both the site and bid documents. Discrepancies in the documents or the actual site conditions shall be reported to the Landscape Architect in writing at the time of bidding or discovery. No account shall be made after contract completion for failure by the Landscape Contractor to report such condition or for errors on the part of the Landscape Contractor at the time of bidding.
14. The Landscape Contractor shall be responsible for securing all necessary applicable permits and licenses to perform the work set forth in this plan set and the specifications.
15. Plant material shall be bid as specified unless unavailable, at which time the Landscape Architect shall be notified in writing of intended changes.
16. All questions concerning the plan set and/or specifications shall be directed to the Landscape Architect.
17. There shall be no additions, deletions or substitutions without written approval of the Landscape Architect.
18. The Landscape Contractor shall guarantee, in writing, plant survivability. Trees and palms for twelve (12) months, shrubs and groundcovers for ninety (90) days and sod for sixty (60) days from final acceptance by the Owner or Owner's representative.
19. All dimensions to be field-checked by the Landscape Contractor prior to landscape material installation. Discrepancies shall be reported immediately to the Landscape Architect.
20. All materials must be as specified on the landscape plan. If materials or labor do not adhere to specifications, they will be rejected by the Landscape Architect with proper installation carried out by the Landscape Contractor at no additional cost.
21. Existing sod shall be removed as necessary to accommodate new plantings
22. All existing trees on site shall be protected from damage during construction - See existing tree protection fence detail.
23. Any existing landscape and hardscape areas that are unnecessarily disturbed during the landscape installation shall be restored to original conditions by the Landscape Contractor.
24. The Landscape Contractor will be responsible for the collection, removal, and proper disposal of any and all debris generated during the installation of this project.
25. All landscape areas to have a positive drainage away from buildings and structures. Finished grade of landscape areas to be at or below the grade of adjacent sidewalks, slabs or VUA
26. All shade and medium trees installed within 5' of a public infrastructure shall utilize a root barrier system.

PLAN

NOTES:



1. FINAL TREE STAKING DETAILS AND PLACEMENT TO BE APPROVED BY LANDSCAPE ARCHITECT
2. CONTRACTOR SHALL ASSURE PERCOLATION OF ALL PLANTING PITS PRIOR TO INSTALLATION.

GENERAL NOTES

1. Before construction begins, the Landscape Contractor is responsible for locating all underground utilities and must avoid damaging any services during construction. If any damage occurs by fault of the Contractor, the necessary repairs must take place at the Landscape Contractor's expense and under the supervision of the Owner's representative.
2. All proposed trees and plant materials shall be graded as Nursery Grade Florida No. 1 or better as outlined by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry "Grades and standards for Nursery Plants", most current edition. All planting shall be done in accordance with the Florida Nurserymen's and Grower's Association approved practices.
3. In addition to these requirements the Landscape Contractor shall comply with all local landscape codes and requirements as part of this base bid and contract in order to satisfy the review and approval of the governing agency.
4. All screening hedges shall be planted and maintained in a way that they form a continuous visual screen. Screening hedges at VUA to be maintained at a minimum height of thirty (30) inches.
5. All planting beds shall be excavated to a minimum depth of twenty-four (24") inches and backfilled with a suitable soil. All plant material shall be planted in planting soil that is delivered to the site in a loose, clean and friable condition. The planting soil shall be the approximate proportions as follows: 50% sand and 50% organic material consisting of native peat, well-decomposed sawdust, leaf mold and top soil. It shall provide a good pliable and thoroughly mixed medium with adequate aeration, drainage and water-holding capacity. It shall also be free of all extraneous debris, such as roots, stones, weeds, etc.
6. All trees/palms and shrubs shall be fertilized with "Agriform" 20-10-5 planting tablets as per the manufacturers specifications at the time of installation and prior completion of pit backfilling also in conjunction with note #5. Tablets to be placed uniformly around the root mass at a depth that is between the middle and bottom of root mass at an application rate of: One (1) - 21 gram tablet for 1 gal container, two (2)- tablets for 3 gal container, three (3)- tablets for 5 gal container, four (4)-tablets for 7 gal container, three (3)-tablets for each 1/2 inch of tree caliper, and seven (7) tablets for palms. Ground Cover areas shall receive fertilization with "Ozmocote" time release fertilizer as per manufacturer's specification.
7. All plant beds shall receive a 3" layer of organic mulch, which is to be watered-in after installation. Mulch should be at least six (6) inches away from any portion of a structure or tree trunk and three (3) inches away from the base of shrubs. Only environmental friendly mulch shall be approved, Cypress mulch shall not be accepted.
8. All plant material shall be thoroughly watered in at the time of planting and until landscape material is established. No dry material shall be permitted.
9. The plant material schedule is presented for the convenience of the Landscape Contractor. In the event of a discrepancy between the plan and the plant key, the plan shall prevail.
10. Plants shall meet size, container, and spacing specifications. Any material not meeting specifications shall be removed and replaced at the contractor's expense.
11. All tree and shrub locations shall be approved by Landscape Architect prior to planting.
12. The Landscape Contractor shall grade planting beds, as required, to provide positive drainage and promote optimum plant growth.
13. The Landscape Contractor shall be responsible for examining fully both the site and bid documents. Discrepancies in the documents or the actual site conditions shall be reported to the Landscape Architect in writing at the time of bidding or discovery. No account shall be made after contract completion for failure by the Landscape Contractor to report such condition or for errors on the part of the Landscape Contractor at the time of bidding.
14. The Landscape Contractor shall be responsible for securing all necessary applicable permits and licenses to perform the work set forth in this plan set and the specifications.
15. Plant material shall be bid as specified unless unavailable, at which time the Landscape Architect shall be notified in writing of intended changes.
16. All questions concerning the plan set and/or specifications shall be directed to the Landscape Architect.
17. There shall be no additions, deletions or substitutions without written approval of the Landscape Architect.
18. The Landscape Contractor shall guarantee, in writing, plant survivability. Trees and palms for twelve (12) months, shrubs and groundcovers for ninety (90) days and sod for sixty (60) days from final acceptance by the Owner or Owner's representative.
19. All dimensions to be field-checked by the Landscape Contractor prior to landscape material installation. Discrepancies shall be reported immediately to the Landscape Architect.
20. All materials must be as specified on the landscape plan. If materials or labor do not adhere to specifications, they will be rejected by the Landscape Architect with proper installation carried out by the Landscape Contractor at no additional cost.
21. Existing sod shall be removed as necessary to accommodate new plantings
22. All existing trees on site shall be protected from damage during construction - See existing tree protection fence detail.
23. Any existing landscape and hardscape areas that are unnecessarily disturbed during the landscape installation shall be restored to original conditions by the Landscape Contractor.
24. The Landscape Contractor will be responsible for the collection, removal, and proper disposal of any and all debris generated during the installation of this project.
25. All landscape areas to have a positive drainage away from buildings and structures. Finished grade of landscape areas to be at or below the grade of adjacent sidewalks, slabs or VUA
26. All shade and medium trees installed within 5' of a public infrastructure shall utilize a root barrier system.

PROPOSED IRRIGATION PLAN (UNIT 01)

SCALE: 3/32"=1'-0"

DETAIL #1

NTS

GENERAL NOTES:

1. Pipe sizes shall conform to those shown on the drawings. No substitutions of smaller pipe sizes shall be permitted, but substitutions of larger sizes may be approved. All damaged and rejected pipe shall be removed from the site at the time of said rejection.
2. All mainline, lateral line and control wire conduit under paving shall be installed in separate sleeves. Sleeves shall be a minimum of twice (2X) the diameter of the pipe to be sleeved. Main Line shall be installed in with lateral pipe where possible.
3. Install all backflow prevention devices and all piping between the point of connection and the backflow preventer as per local codes.
4. Final location of the backflow preventer and automatic controller shall be approved by the owner's authorized representative.
5. 120 VAC electrical power source at controller location shall be provided by others. The electrical contractor shall make the final connection from the electrical source to the controller.
6. All sprinkler heads shall be set perpendicular to finish grade unless otherwise specified.
7. The irrigation contractor shall flush and adjust all sprinkler heads and valves for optimum spray with minimal overspray onto walks, streets, walls, etc.
8. This design is diagrammatic. All piping, valves, etc., shown within paved areas is for design clarification only and shall be installed in planting areas wherever possible. The contractor shall locate all valves in shrub areas where possible.
9. It is the responsibility of the irrigation contractor to familiarize himself with all grade differences, location of walls, retaining walls, structures and utilities. The irrigation contractor shall repair or replace all items damaged by his work. He shall coordinate his work with other contractors for the location and installation of pipe sleeves through walls, under roadways and paving, etc.
10. Do not willingly install the sprinkler system as shown on the drawings when it is obvious in the field that unknown obstructions, grade differences or differences in the area dimensions exist that might not have been considered in the engineering. such obstructions or differences should be brought to the attention of the owner's authorized representative. In the event this notification is not performed, the irrigation contractor shall assume full responsibility for any revisions necessary.
11. All sprinkler equipment not otherwise detailed or specified shall be installed as per manufacturer's recommendations and specifications.
12. The irrigation contractor shall install check valves on all heads in areas where finish grade exceeds 4:1, where post valve shut–off draining, of the irrigation head occurs or as directed by the owner's authorized representative.
13. The contractor shall provide 1800 PCS (pressure compensating screens) as necessary to reduce or eliminate overspray onto streets, walks or other areas as directed by the owner's authorized representative.
14. The contractor shall provide 1800 PCS (pressure compensating screens) as necessary to reduce or eliminate overspray onto streets, walks or other areas as directed by the owner's authorized representative.
15. All remote control valves, gate valves, quick couplers, control wire and computer cable pull points shall be installed in approved valves boxes with covers.
16. The installation devices are to be guaranteed for the period of (1) year from the date of final acceptance.

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE FINAL SITE PLAN FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Applicant, DMG Investment Trust, LLC intends to construct a two-unit twin home building that will provide two three-bedroom units and appropriate parking spaces and landscaping in accordance with the City of Opa-Locka's Land Development Regulations ("City"); and

WHEREAS, the Applicant, has submitted a request for final site plan review to construct a two-unit twin home building that will provide two three-bedroom units in the Single Family Residential Zoning District (R-1); and

WHEREAS, Planning & Community Development staff for the City of Opa-Locka has reviewed the application of DMG Investment Trust, LLC and has determined that the applicant has provided all information required by Section 22-55(I) of the City of Opa-Locka's Land Development Code for proper consideration by the City Commission; and

WHEREAS, the Planning and Zoning Board has recommended approval of the Special Exception site plan request as required for this use in the R-1 zoning district, and

WHEREAS, the Planning and Zoning Board reviewed this request at a public hearing on December 12, 2023 and recommended approval of this request for final site plan review by a 5—0 vote as the site plan is provided herein as Exhibit "A"; and

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interest of the City and its residents to approve the special exception request as provided herein.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AS FOLLOWS:

SECTION 1. RECITALS.
The above recitals are true and correct and are incorporated into this Resolution by reference.

SECTION 2. APPROVAL/DENIAL.
Approval/Denial of Site Plan Review. The City Commission of the City of Opa-Locka, Florida hereby recommends approval / denial of this request for the Final Site Plan approval for the Construction of a two three-bedroom units and appropriate parking spaces and landscaping in accordance with the City of Opa-Locka's Land Development Regulations on the property located at the corner of NW 17th Avenue and Opa Locka Boulevard and identified by folios 08-2122-018-0200 in the R-1 Zoning District as set forth in the Site Plan detailed in Exhibit "A" attached hereto and incorporated herein.

Section 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the Interim City Manager following review by the City Attorney, without the need of a public hearing by filing a corrected copy of same with the City Clerk.

Section 4. EFFECTIVE DATE.
This Resolution shall, upon adoption, become effective as specified by the City of Opa-Locka's Code of Ordinances, Land Development Regulations and the City of Opa-Locka Charter**.**

Short Title:

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, TO APPROVE OR DENY THE SITE PLAN REVIEW REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

Staff Summary:

The applicant, DMG Investment Trust, LLC desires to construct a two-unit twin home building that will provide two three-bedroom units and appropriate parking spaces and landscaping on the single-family (R-1) zoned parcel identified by folio 08-2122-018-0200. In accordance with the City of Opa-Locka's Land Development Regulations ("City LDR"), Ordinance 15-31, to permit the construction of a twin home on property zoned single-family. The Applicant, has submitted a request for site plan review and provided documentation to meet the approval criteria as required by City LDR Section 22-60, B, 1-12 to construct a two unit twin home building in the Single Family Residential Zoning District (R-1). The Planning & Community Development staff

has reviewed the application of DMG Investment Trust, LLC and has determined that the applicant has provided all information required by Section 22-55(I) of the City of Opa-Locka's Land Development Code for proper consideration by the Planning and Zoning Board and has reviewed this request at a public hearing on December 12, 2023 and recommended approval of this request for site plan review by a 5—0 vote and a copy of the site plan is provided herein as Exhibit "A".

Financial Impact

Approval of the Twin Home Site Plan Review will not provide any negative financial impact.

Proposed Action:

Staff recommended approval of this Resolution.

These blenders might cut you or burn your things. About 4.8 million have been recalled

BY DAVID J. NEAL
dneal@miamiherald.com

A blender should cut fruit, not your skin. Nor should it burn your possessions. So, BlendJet recalled about 4.9 million BlendJet 2 Portable Blenders sold in the United States and Canada.

"The recalled blenders can overheat or catch fire and the blender blades can break off, posing fire and laceration hazards to consumers," the U.S. Consumer Product Commission recall notice states.

That's not an idle concern. The recall notice says BlendJet knows about 329 times the blades broke; 49 times people got burned; one person who got sliced; 17 times the blenders overheated or started fires, causing $150,000 of property damage.

U.S. Consumer Product Safety Commission

BlendJet 2 Portable Blenders have been recalled.

BlendJet wants customers with the blenders, which were sold from October 2020 through this November, to reach out to the company for a free replacement of the base. Do this by cutting the rubber seal on the base into three or more pieces, shoot a photo with the pieces and the serial number on the base and email it to safety@blendjet.com or upload it to the recall website.

To see if this recall concerns your blender, you can go to BlendJet's site and enter your blender's serial number.

For other questions, either go to the recall website hyperlinked above or call BlendJet Monday through Friday, 8 a.m. to 10 p.m., Eastern time at 844-334-0562.

Miami Gardens, Palm Beach restaurant problems include rodents and flies

BY DAVID J. NEAL
dneal@miamiherald.com

A Miami Gardens and Rivera Beach restaurant were part of this week's Sick and Shut Down List of Miami-Dade and Palm Beach restaurants that failed inspection.

Once again, we remind you, we don't do the inspecting, and we don't choose who gets inspected. Direct your complaints to the Florida Department of Business and Professional Regulation.

In alphabetical order:

Caribbean Kitchen 305, 760 NW 183rd St., Miami Gardens: Routine inspection, 20 total violations, six High Priority violations.

We told you about this place with its hot water deficiencies — which means washing and cleaning deficiencies —and rodent problems earlier this week.

The kitchen was open again after it corrected the issue for the next day's re-inspection.

Mulligan's Beach House Singer Island, 2551 N. Ocean Ave., Riviera Beach: Complaint inspection, six total violations, five High Priority violations.

Eight flies at the inside bar were "flying around, landing on liquor bottles and the wall behind" the bar. Rodents left 34 droppings on the kitchen floor.

Mulligan's passed a second re-inspection two days after the original inspection.

CITY OF OPA-LOCKA, FLORIDA
NOTICE TO THE PUBLIC

NOTICE IS HEREBY GIVEN that the City Commission of the City of Opa-locka, Florida will hold public hearings at the Regular Commission Meeting on **Wednesday, January 10, 2024 at 7:00 p.m.,** in the City Commission Chambers at the Opa-locka Municipal Complex, 780 Fisherman Street, 3rd Floor, Opa-locka, Florida, to consider the following items for final adoption:

FIRST READING / PUBLIC HEARINGS:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN TO INCORPORATE THE ADOPTED 2022 10-YEAR WATER SUPPLY FACILITIES WORK PLAN UPDATE AND TO STRENGTHEN THE COORDINATION BETWEEN WATER SUPPLY PLANNING AND LOCAL LAND USE PLANNING BY AMENDING CERTAIN OBJECTIVES AND POLICIES IN THE INFRASTRUCTURE, CONSERVATION, INTERGOVERNMENTAL COORDINATION AND CAPITAL IMPROVEMENTS ELEMENTS AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3177(6), FLORIDA STATUTES; PROVIDING FOR TRANSMITTAL; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PROVIDING FOR EVALUATION AND APPRAISAL BASED AMENDMENTS TO THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3191(1), FLORIDA STATUTES; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

SECOND READING / PUBLIC HEARING:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, ENTITLED "OFF-STREET PARKING AND LOADING REQUIREMENTS" TO SPECIFICALLY AMEND SECTION 2-152(F) ENTITLED "GENERAL PRINCIPLES" TO PROVIDE FOR OUTDOOR STORAGE OF VEHICLES ONLY IN A DESIGNATED PARKING SPACE, PROHIBITING DOUBLE PARKING AND REQUIRING THAT ALL AREAS ARE FREE FROM UNSIGHTLY CONDITIONS; AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, SPECIFICALLY SECTION 2-160 (C)(4) ENTITLED "PERMITTED OFF-STREET PARKING" TO REQUIRE A CURRENT VALID LICENSE PLATE FOR RESIDENTIAL PARKING AND FURTHER REQUIRING THAT VEHICLES PARKED AS COMMERCIAL AND INDUSTRIAL FACILITIES HAVE A VALID LICENSE PLATE AND OR BILL OF SALE AND WORK ORDER POSTED VISIBLY ON THE DRIVER'S SIDE WINDOW, INCLUDING VIN NUMBER FOR VEHICLE, BUSINESS NAME, ADDRESS AND TELEPHONE NUMBER; PROVIDING FOR SEVERABILITY; PROVIDING FOR CODIFICATION IN CODE; PROVIDING FOR AN EFFECTIVE DATE.-

RESOLUTIONS / PUBLIC HEARINGS:

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE SPECIAL EXCEPTION REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING IN THE SINGLE-FAMILY RESIDENTIAL ZONING DISTRICT (R-1), ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200; PROVIDING FOR AN EFFECTIVE DATE.

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE FINAL SITE PLAN FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA-LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

All interested persons are encouraged to participate and will be heard with respect to the public hearings.

Additional information on the above item may be obtained by contacting the Office of the City Clerk by telephone 305-953-2800 or email jflores@opalockafl.gov. To participate or provide comments virtually, please register on the City of Opa-locka website at www.opalockafl.gov no later than 7:00 p.m. on Wednesday, January 10, 2024.

In accordance with the Americans with Disabilities Act of 1990, persons needing special accommodations to participate in the proceeding should contact the Office of the City Clerk at (305) 953-2800 for assistance not later than five (5) days prior to the proceeding. If hearing impaired, you may telephone the Florida Relay Service at (800) 955-8771 (TTY), (800) 955-8770 (Voice), (877) 955-8773 (Spanish) or (877) 955-8707 (Creole).

PURSUANT TO FS 286.0105: *Anyone who desires to appeal any decision made by any board, agency, or commission with respect to any matter considered at such meeting or hearing will need a record of the proceedings, and for that reason, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal may be based.*

Joanna Flores, CMC
City Clerk

+ SITE INVESTIGATION NOTE

EXAMINATION OF CONTRACT DOCUMENTS AND SITE OF WORK THE BIDDER IS REQUIRED, BEFORE SUBMITTING HIS PROPOSAL, TO VISIT THE SITE OF THE PROPOSED WORK AND FAMILIARIZE HIM OR HERSELF WITH THE NATURE AND EXTENT OF THE WORK AND ANY LOCAL CONDITIONS THAT MAY IN ANY MANNER AFFECT THE WORK TO BE DONE AND EQUIPMENT, MATERIALS AND LABOR REQUIRED THEREFORE. SINCE THE WORK INVOLVES NEW AND/OR EXISTING BUILDINGS, SYSTEMS AND FACILITIES, SPECIAL CONSIDERATION SHALL BE GIVEN TO EXAMINATION OF WORKING CONDITIONS, NEW FACILITIES AND ALL BUILDING STRUCTURES FAMILIARIZE TO HIMSELF WITH ALL EXISTING CONDITIONS. SLIGHT VARIATION OF ROUTING AND OR CONSTRUCTIONS SHOULD BE ANTICIPATED BY THIS CONTRACTOR TO AVOID CONFLICTS WITH OTHER TRADES. THESE VARIATIONS ARE EXPRESSLY INCLUDED AS PART OF THE WORK WHENEVER REQUIRED AT NO ADDITIONAL COST TO THE OWNER. IGNORANCE ON THE PART OF THE CONTRACTOR WILL IN NO WAY RELIEVE HIM OF THE OBLIGATIONS AND RESPONSIBILITY ASSUMED UNDER THIS CONTRACT.

+ ALTERATION PROJECT PROCEDURES

REQUIREMENTS INCLUDED:

COORDINATE WORK OF TRADES AND SCHEDULE ELEMENTS OF ALTERATIONS AND RENOVATION WORK BY PROCEDURES AND METHODS TO EXPEDITE COMPLETION OF THE WORK.

CUT, MOVE OR REMOVE ITEMS AS NECESSARY TO PROVIDE ACCESS OR TO ALLOW ALTERATIONS AND NEW WORK TO PROCEED. INCLUDE SUCH ITEM AS:

a. REPAIR OR REMOVAL OF HAZARDOUS OR UNSANITY CONDITIONS.

b. REMOVAL OF ABANDONED ITEMS AND ITEMS SERVING NO USEFUL PURPOSE, SUCH AS ABANDONED PIPING, CONDUIT, AND WIRING.

c. REMOVAL OF UNSUITABLE OR EXTRAGENEOUS MATERIALS NOT MARKED FOR SALVAGE, SUCH AS ABANDONED EQUIPMENT AND DEBRIS INCLUDING ROTTED WOOD, RUSTED METALS AND DETERIORATED CONCRETE.

ALTERATIONS AND CONNECTIONS OF NEW CONTRUCTION TO EXISTING CONSTRUCTION OCCUR AT DUST SENSITIVE AREAS. EXECUTE ALL MEASURES TO COMPLETELY CONTROL AND SEPARATE DUST FROM EXISTING AREA AND EQUIPMENT.

+ TERMITE PROTECTION

ALL BUILDINGS SHALL HAVE PRE-CONSTRUCTION TREATMENT AGAINST SUBTERRANEAN TERMITES. THE RULES AND LAWS AS ESTABLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES SHALL BE DEEMED AS APPROVED WITH RESPECT TO PRE-CONSTRUCTION SOIL TREATMENT FOR PROTECTION AGAINST SUBTERRANEAN TERMITES. A CERTIFICATE OF COMPLIANCE SHALL BE ISSUED TO THE BUILDING DEPARTMENT BY THE LICENSED PEST CONTROL COMPANY THAT CONTAINS THE FOLLOWING STATEMENT: "THE BUILDING HAS RECEIVED A COMPLETE TREATMENT FOR THE PREVENTION OF SUBTERRABEAN TERMITES. TREATMENT IS IN ACCORDANCE WITH THE RULES AND LAWS ESTABLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES "

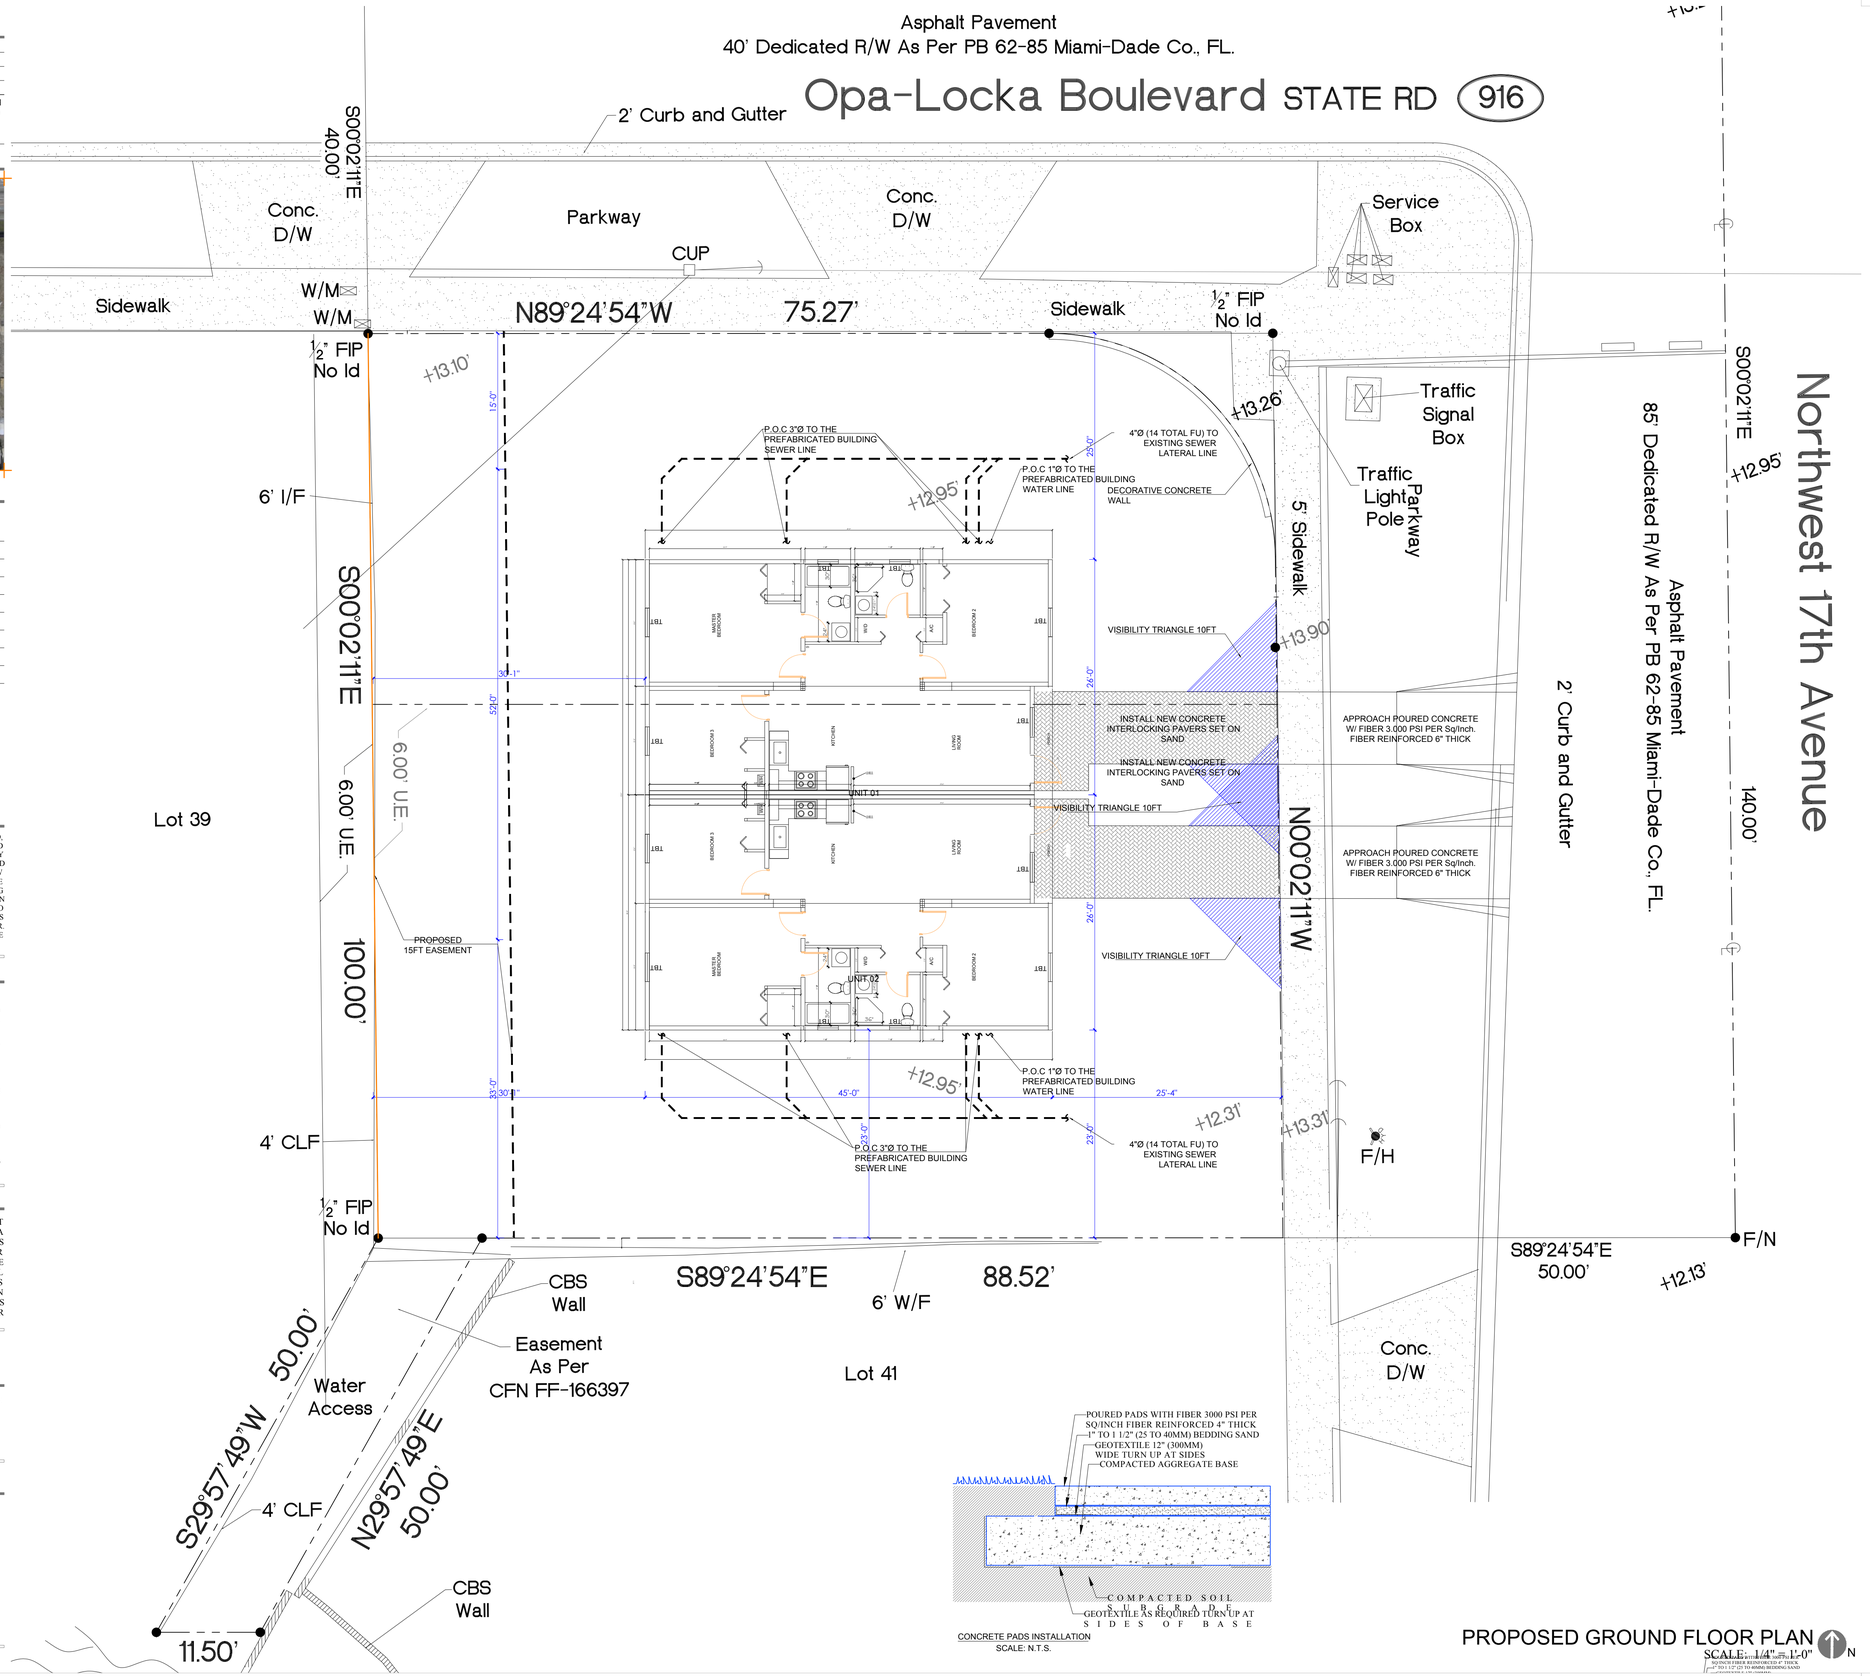
+ GENERAL SCOPE OF WORK

WORK ENCOMPASSED UNDER THIS SET OF CONTRACT DOCUMENTS INCLUDES THE CONSTRUCTION OF THE NEW ONE STORY RESIDENTIAL HOUSE.

+ NEW CONSTRUCTION:

- GROUND FLOOR:_____1,300,00 Sq.Ft.

+ NOTE



CONSTRUCTION DRAWINGS ARE DIAFRAMMATIC AND ARE NOT INTENDED TO SHOW EVERY DETAIL OF THE PROJECT.

CONTRACTOR TO PROVIDE ALL THE COMPONENTS NECESSARY FOR A COMPLETE AND FUNCTIONING PROJECT, EVEN IF NOT INCLUDED IN THE CONSTRUCTION DOCUMENTS.

ALTHOUGH IT IS UNDERSTOOD THAT THE CONTRACTOR IS NOT A LICENSED DESIGN PROFESSIONAL, THE CONTRACTOR SHALL COORDINATE ALL DIMENSIONS AND LOCATIONS OF SYSTEMS WITH ARCHITECTURE AND ALL DISCIPLINES INCLUDED IN THESE CONSTRUCTION DOCUMENTS.

THE CONTRACTOR AGREES TO PROMPTLY ADVISE THE ARCHITECT OF ANY NONCONFORMITY OBSERVED BY, OR MADE KNOWN TO, THE CONTRACTOR.

REFER TO "CONSTRUCTION NOTES" ON SHEET A0.02 FOR FURTHER INSTRUCTIONS.

DMG
DEVELOPERS

PROJECT NARRATIVE

Preliminary Development Plan.

Pine Tree Lakes Twin-homes
13600 NW 17th Ave Miami, FL 33054

This narrative is written to provide a general project concept, the initial project timing, and details regarding the overall development. The proposed project is located near the southwest corner of NW 17th Avenue and Opa-Locka Blvd in Opa-Locka, Florida.

A site plan is included at the end of this narrative.

The project is consistent with several visions of the Opa-Locka's 20/30 Comprehensive Plan and will revitalize that corner.

The overall lot coverage is way under the required 35% at 2,252 SF or 22%.

The project consists of two 26'X42' side-by-side Modular units manufactured by a local business.

The developer takes into consideration a 15FT easement along the south limit of the property to allow the city access to the Pine Tree Lake for regular maintenance.

RE: Zoning Review-For the property at the corner Of NW 17th Ave & Opa-locka Boulevard, Opa-locka, FL 33054
Folio: 08-2122-018-0200

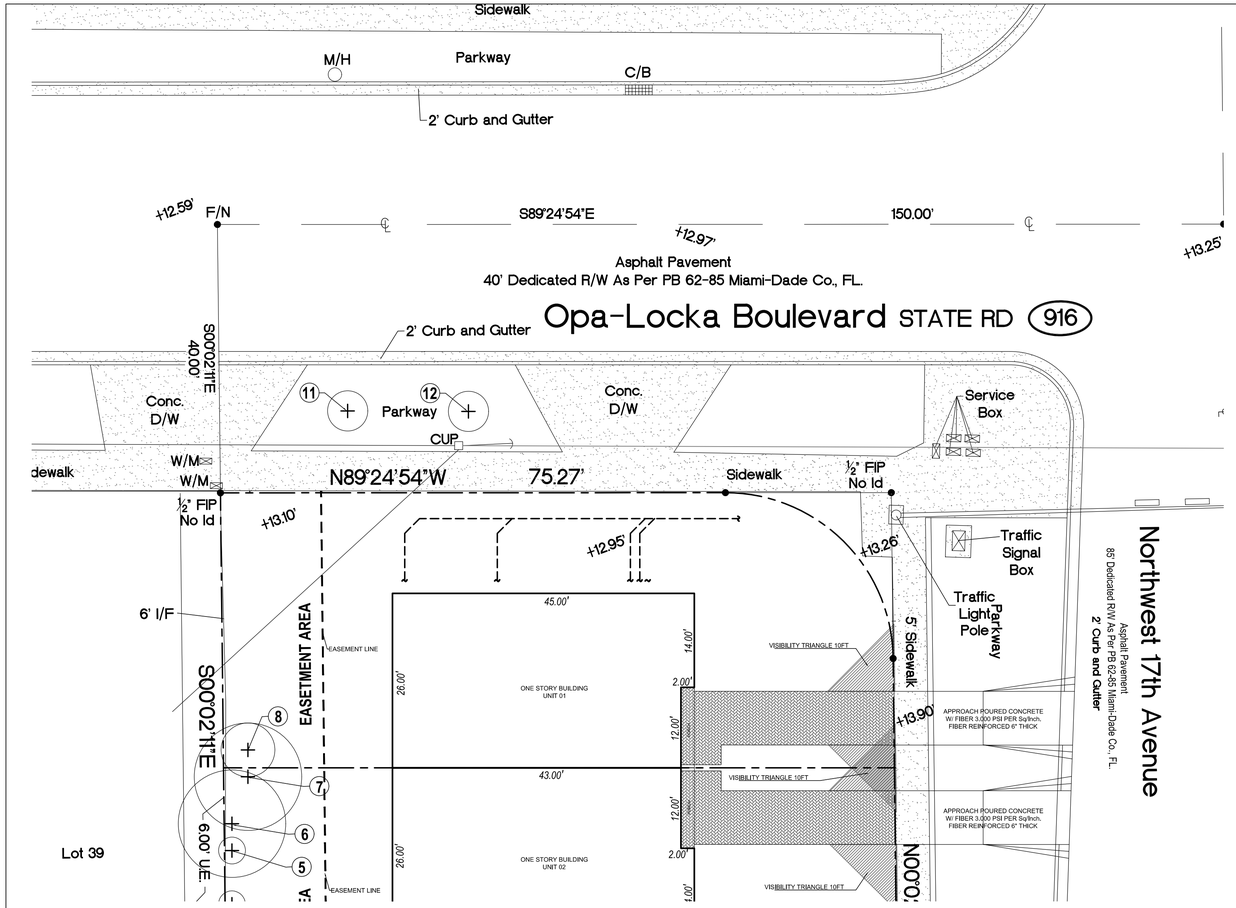
Mr. Dominguez,

Thank you for your interest in developing the property identified by folio 08-2122-018-0200. On December 2nd, 2021, we discussed your options to develop this 10,575 square foot property that is zoned for single-family development. We know you are interested in obtaining the highest and best use for this site and after review of the City Land Development Regulations we therefore inform you of the following options that are available to you:

1. Option 1 - Build one single family homes that complies with the required setbacks. (Single Family Detached) Submit building permits only.
2. Option 2 - Build two single family homes that share a common wall between the two homes [also referred to as a twin home] and each home complies with the required setbacks. (Single Family Attached) This path requires a formal Special Exception hearing review before the Planning & Zoning Board and formal review and approval by the City Commission at a public hearing. A maintenance easement for access to the lake would need to be considered as part of the siteplan of the property.

3. Option 3 – Replat your property into two lots. Each lot will be 5287.5 sf. A maintena easement for access to the lake would need to be considered as part of the replat of property. Build two single family homes by right or build two twinhomes by Spe Exception. Split the property will permit you to build four single family homes wl two [2] of each would share a common wall on each new parcel and each hc complies with the required setbacks. (Single Family Attached) This path require formal Special Exception hearing review before the Planning & Zoning Board and for review and approval by the City Commission at a public hearing.
4. Option 4 - Rezone the site to Duplex and build two duplexes/twin homes. rezoning request would require formal review before a Planning & Zoning Board formal review and approval by the City Commission at a public hearing. The site p for the proposed two duplex development would also be presented for review approval. A maintenance easement for access to the lake would need to be conside as part of the rezoning of the property.

Option 4 may be the most challenging as the PCD Department, by policy, is required to recomm against any zoning change request that may not meet the criteria for recommendation to change zoning to a higher adjacent residential zoning. We can further discuss this process if it is b considered.



This should make your options clear, however if you have any questions, please advise.

Thank you for helping make our City Great!

Sincerely,

Gerald Lee, Zoning Official-Planning & Community Development

cc Gregory D. Gay, Director of Development Services - B&L|PCD

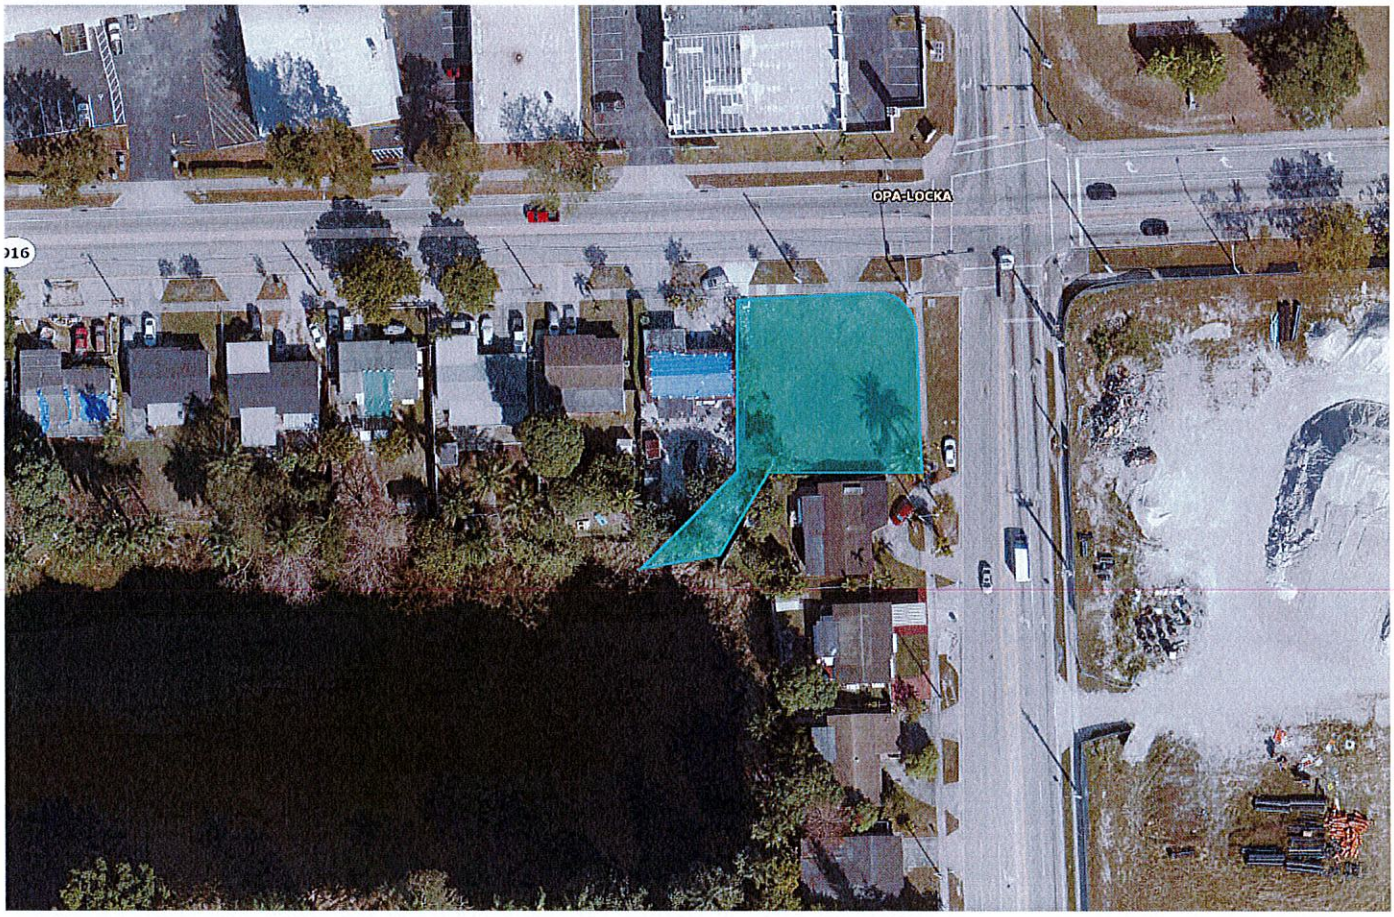
PLANNING & ZONING BOARD

DECEMBER 05TH



2023

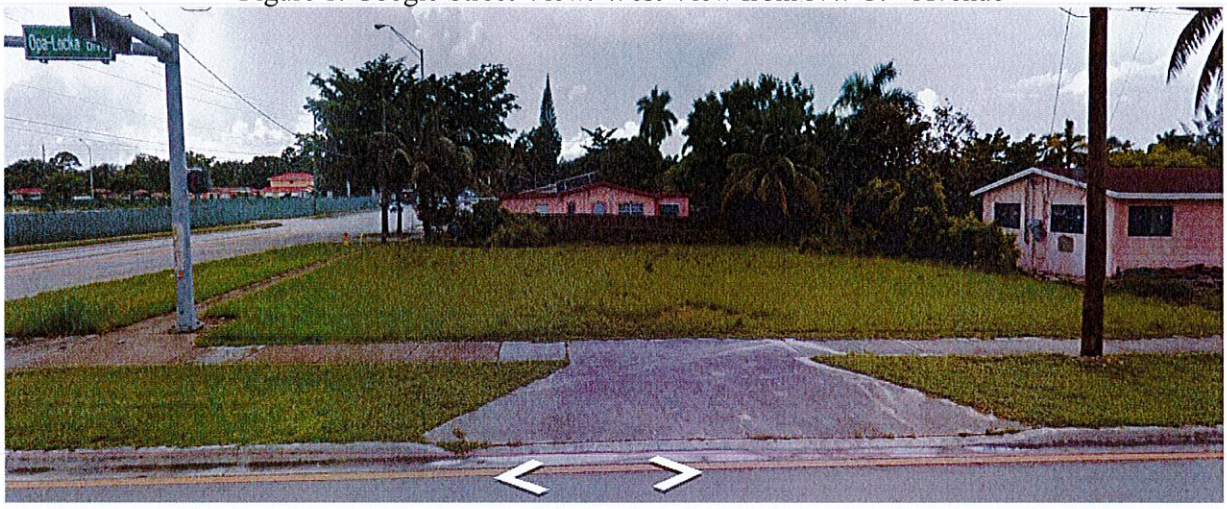
CONSTRUCTION OF A TWIN HOME BUILDING- SITE PLAN REVIEW

Staff Report

APPLICANT'S REQUEST:

A RESOLUTION OF THE PLANNING & ZONING BOARD OF THE CITY OF OPA-LOCKA, FLORIDA, RECOMMENDING APPROVAL OR DENIAL OF THE FINAL SITE PLAN REVIEW REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

I. Site Background



- According to Miami-Dade County Property Appraiser's website, the subject Property's legal description is as follo

PB 65-85
1ST ADDN TO PINE TREE LAKE LOT 40 & PORT LOTS 39 & 41 BEG AT NW COR LOT 40 100FTS 29 DEG W50FT NELY 11.5 FT N 29 DEG E50 FT E88.52 FT N100 FT W100FT W100 FT TO POB LOT SIZE 10575 SQUARE FEET COC 23090-1810 02 2005 6

- The proposed project site is a vacant 10,575 square foot lot located at the south-east corner of Opa locka Boulevard and NW 17th Avenue. The site is zoned Single Family Residential and has a land use designation of Low-Density Residential. With the current residential zoning R-1, the square footage of this parcel and the residential land use designation, this site could be used a twin home development after Special Exception Revie approval and after Site Plan Review approval.

Figure 1: Google Street View: West View from NW 17th Avenue

II. Project Details

- **Applicant's intent**

The Applicant, DMG Investment Trust, LLC. intends to construct a twin home on this single family 10,575 square foot lot. Twin homes are permitted in the Duplex (R-2 Zoning District and in the Single Family R-1 Zoning district after Special Exception Review approval. They also intend to provide appropriate parking and landscaping in accordance with the City of Opa-locka's Land Development Regulations.

The applicant has submitted two application requests for the development of this site:

1. To review for special exception an opportunity to build a twin home on this site.
2. To review and consider for approval the site plan to build a twin home on this site.

To accommodate the new intended uses for this vacant residential site will require the review and recommendation of the Planning & Zoning Board and the review and approval of the City Commission concerning these two requests.

Notification Requirement	This request will be properly noticed pursuant to state law and city charter by the city clerk's office. - A copy of notice for advertisement titles were given to the Clerk's Office on Tuesday, November 21st, 2023. To be advertise at least 10 days prior to this Planning and Zoning Board meeting on Tuesday, December 5th, 2023. - City Commission Meeting: TBD		
Local Government Action Required	The City Commission must review this tentative plat and consider approval/disapproval after it is reviewed by the Planning and Zoning Board and any other applicable board or agency.		

• Overall Analysis

Existing Conditions:

- The Subject Property is generally adjacent to residential properties to the west and vacant land outside the City of Opa-locka to the east. There is also Industrial zoned properties North of this site.
- This development is within a residential neighborhood.
- Property is currently vacant and overgrown.

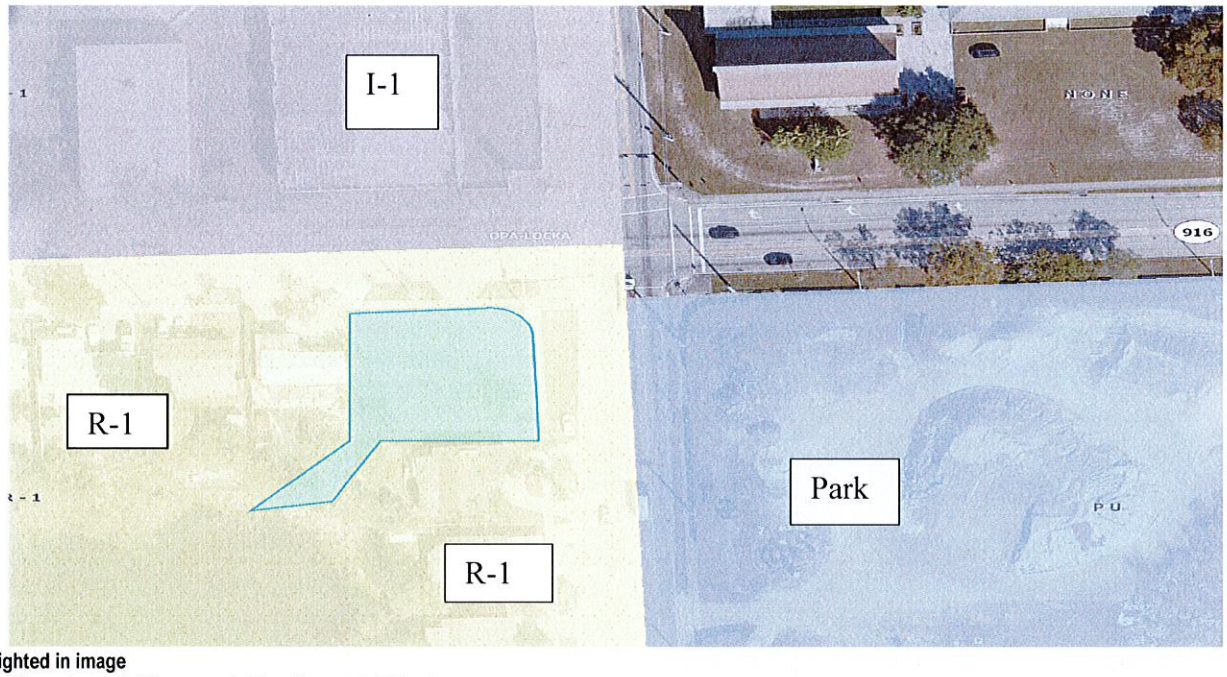
PZAB Special Exception Review Criteria-(Per Ordinance 15-31, Sec. 22-60, B Approval Criteria)

1. Compliance with the City's Comprehensive Plan.
2. Consistent with the "character and purpose" of the zoning district.
3. The size, shape and character of the property are suited for the proposed use.
4. Compatibility with the existing uses near the property.
5. Will not adversely affect the development of the general neighborhood or district.
6. Will not generate vehicular traffic or create vehicular circulation or ingress/egress problems or parking demands that have an unfavorable impact on surrounding properties when compared with uses permitted by right in the same district.
7. Potential for fire and/or other equally or greater dangerous hazards.
8. Create an unfavorable environment impacts on surrounding uses (e.g. noise, glare, smoke, dust, odor, fumes, water pollution, or general nuisance).
9. Consistent with existing and planned pedestrian and vehicular circulation adjacent to and near the property.

10. Site is adequately served by essential public services and facilities not requiring additional public expense in infrastructure improvements.
11. Will not adversely affect any site or feature of historical, cultural, natural or scenic importance.
12. Will not be contrary to the public health, safety, and welfare, provided that denial based exclusively on this language shall include explicit findings regarding the way in which granting the special exception would be contrary to the public health, safety and welfare.

PLANNING & COMMUNITY DEVELOPMENT DEPARTMENT: SPECIAL EXCEPTION REVIEW ANALYSIS: The Development if approved

Would be in compliance with the City's Comprehensive Plan
Would be consistent with the character and purpose of the zoning district.
The size, shape and character of the property are suited for the proposed use.
Would be compatible with the existing uses near & adjacent to the property.
Would not adversely affect the development of the general neighborhood or district.
Would not generate vehicular traffic or create vehicular circulation or ingress/egress problems that would have an unfavorable impact on surrounding properties when compared with uses permitted by right in the same district given the size of the property.
Would not increase the potential for fire or /and other equally or greater dangerous hazards.
Would not create any unfavorable environmental impacts on surrounding uses, including noise, glare, smoke, dust, odor, fumes, water pollution, or general nuisance.
Would be consistent with existing and planned pedestrian and vehicular circulation adjacent to and near the property.



PZAB SITE PLAN APPROVAL CRITERIA-(Per Ordinance 15-31, Sec. 22-55, B Approval Criteria)

1. The development permitted by the application, if granted, conforms to the Comprehensive Plan; is consistent with applicable area or neighborhood studies or plans, and would serve a public benefit warranting the granting of the application at the time it is considered.
2. The development permitted by the application, if granted, will have a favorable or unfavorable impact on the economy of the City.
3. The development permitted by the application, if granted, will efficiently use or not unduly burden water, sewer, solid waste disposal, recreation, education or other necessary public facilities which have been constructed or planned and budgeted for construction.

PLANNING & COMMUNITY DEVELOPMENT DEPARTMENT: SITE PLAN ANALYSIS

The development if approved conforms to the Comprehensive Plan.
The development if approved will have a favorable impact on the economy of the City.
The development if approved will efficiently use or not unduly burden water, sewer, solid waste disposal, recreation, education or other necessary public facilities which have been constructed or planned and budgeted for construction.

Surrounding Zoning Designation Map

The Site is highlighted in image

Surrounding Land Use and Zoning: Table 2

Location	Existing Land Use	Future Land Use (FLU)	Zoning
North	Commercial/Residential	Commercial/Residential	B-O to B-2/ R-1 R-2
South	Residential	Residential	R-TH
East	N/A	N/A	N/A
West	Residential	Residential	R-1

COMPLIES

- **General Character / Neighborhood Compatibility:** The proposed development use will be in Harmony with the general character of the surrounding neighborhood considering population density, design, scale, and bulk of any proposed new structures, intensity and character of activity, traffic and parking conditions?
  - **Findings:**
    - The propose development use 'to construct a twin home on this site is in harmony with the general characteristic of the surrounding neighborhood: Single Family Uses

- **Tree Preservation:** Compliance with Tree Preservation Ordinance required pursuant to City ORDINANCE NO.10-03

COMPLIES

  - **Findings:**
    - The Applicant is proposing to include landscaping for an area of 2,206 square feet. *(Please see attached Landscape Plan for Trees detailed information*).

- **Fence:** All fences constructed on property perimeters shall be in accordance with the requirements of the Land Development Regulation Section 22-134., however if additional walls, fences or hedges are installed they shall also comply with the requirements of this Section.
  - **Findings:**
    - The Applicant may install a fence in accordance with the LDR.

COMPLIES

- **Future Land Use:** Low Density Residential.

- **Findings:**
  - According to the City of Opa-locka Comprehensive Plan; the proposed project shall be located within the City's Low Density Residential LU category location which is appropriate for single family and duplex uses.

COMPLIES

- **R-1 (Single-Family) Permitted Uses:** Project Specific: *Construction of a twin home on this vacant site.*
  - **Findings:**
    - According to the City's Land Development Regulation/ Zoning Code R-1 (Single-Family) zoning district would permit this use, if special exception review is approved by the City Commission. This use is compatible with the zoning of the proximal zoning district.

- **Community Comments/Petitions:** The Applicant verbally informed the Planning and Community development Department that petitions were submitted to the surrounding businesses for signatures, comments or possible opposition.
  - **Findings:** The Planning and community Development Department has not received signed petitions submitted to the Neighboring Businesses as indicated by the Applicant.

COMPLIES

III. Project Need Assessment / other Required Approvals

1. Special Exception Review 3. Site Plan Review
   Application(s) submitted for Planning & Zoning Board Meeting (this meeting) Tuesday, December 5th, 2023

ORDINANCE NO. 2024-XX

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PROVIDING FOR EVALUATION AND APPRAISAL BASED AMENDMENTS TO THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3191(1)), FLORIDA STATUTES; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Florida Statutes provide that municipalities shall have the governmental, corporate, and proprietary powers to enable them to conduct municipal government, perform municipal functions including those relating to Comprehensive Planning, and render municipal service, and exercise any power for municipal purposes, except when expressly prohibited by law; and

WHEREAS, Section 2.5 of the City Charter of the City of Opa-Locka ("City") empowers the City Commission to adopt, amend, or repeal such ordinances as may be required for the proper governing of the City; and

WHEREAS, pursuant to F.S. 163.3191(1), at least once every 7 years ("Evaluation and Appraisal Cycle"), each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect changes in state requirements in Part II of Chapter 163, Florida Statutes, since the last update of the local government's comprehensive plan, and notify the state land planning agency as to its determination; and

WHEREAS, City of Opa-Locka City Commission recognizes that, periodically, it is necessary to amend the City Comprehensive Development Master Plan (the "Plan") in order to ensure that the Plan is current and consistent with the City's planning and regulatory needs; and

WHEREAS, the City Commission finds that the proposed evaluation and appraisal based text amendments, attached hereto as Exhibit "A", and incorporated herein by reference, will help strengthen the City's long-term ability to protect its residential neighborhoods and improve overall community character and quality of life; and

WHEREAS, the City Commission desires to comply with state law and adopt the text amendments to the City's Comprehensive Plan in the form prescribed by law; and

WHEREAS, notice was publicly advertised as required by City and State regulations regarding text amendments to the Comprehensive Plan; and,

WHEREAS, on December 12, 2023, the Planning and Zoning Appeals Board, as the local planning agency for the City held its hearing on this proposed Ordinance with due public notice and input, and recommended its adoption by a 5-0 vote; and

WHEREAS, on January 10, 2023, the City Commission held a first reading and public hearing of this proposed Ordinance; and

WHEREAS, the City Commission voted to transmit the proposed evaluation and appraisal based text amendments to the Comprehensive Plan to state agencies, after first reading, for review pursuant to Section 163.3184(3)(b), Florida Statutes; and

WHEREAS, on XXXXX XX, 2024, the City Commission held a second reading and public reading of this proposed Ordinance with due public notice and input; and

WHEREAS, the City Commission of the City of Opa-Locka, Florida, finds that it is in the best interest of the City and its residents amended the City Comprehensive Plan to incorporate the proposed text amendments, pursuant to Section 163.3184, Florida Statutes, as provided in Exhibit "A".

NOW, THEREFORE, IT IS HEREBY ORDAINED BY THE CITY OF OPA-LOCKA, FLORIDA, AS FOLLOWS:

SECTION 1. RECITALS.

The above recitals are true and correct and incorporated into this Ordinance by reference.

SECTION 2. AMENDING THE CITY OF OPA-LOCKA COMPREHENSIVE PLAN.

The City of Opa-Locka, Florida, Comprehensive Plan is hereby amended to incorporate the proposed text amendment, pursuant to Section 163.3184, Florida Statutes, as provided in Exhibit "A".

SECTION 3. SCRIVENER'S ERRORS.

Sections of this Ordinance may be renumbered or re-lettered and corrections of typographical errors, which do not affect the intent of this Ordinance may be authorized by the City Manager, following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

SECTION 4. CONFLICT AND REPEALER.

Any provision of any City of Opa-Locka ordinance or regulation which is in conflict with the provisions of this Ordinance is repealed prospectively to the extent of such conflict.

SECTION 5. LIBERAL CONSTRUCTION.

The terms and provisions of this Ordinance shall be liberally construed to affect the purpose for which it is adopted.

SECTION 6. SEVERABILITY.

If any portion of this Ordinance is for any reason held or declared to be unconstitutional, invalid or void, such holding shall not affect the remaining portions of this Ordinance. If this Ordinance shall be held to be inapplicable to any person, property or circumstances, such holding shall not affect the applicability of this Ordinance to any other person, property or circumstances.

SECTION 7. EFFECTIVE DATE.

That pursuant to Florida Law, the Comprehensive Plan amendment(s) adopted by this Ordinance shall not become effective until 31 days after the state land planning agency notifies the local government that the plan amendment package is complete. If timely challenged, an amendment does not become effective until the state land planning agency or the Administration Commission enters a final order determining the adopted amendment to comply.

Short Title:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PROVIDING FOR EVALUATION AND APPRAISAL BASED AMENDMENTS TO THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3191(1)), FLORIDA STATUTES; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

Staff Summary:

Florida Statutes provide that municipalities shall have the governmental, corporate, and proprietary powers to enable them to conduct municipal government, perform municipal functions including those relating to Comprehensive Planning, and render municipal service, and exercise any power for municipal purposes, except when expressly prohibited by law. Section 2.5 of the City Charter of the City of Opa-Locka ("City") empowers the City Commission to adopt, amend, or repeal such ordinances as may be required for the proper governing of the City. Pursuant to Florida Statutes, Section, 163.3191(1), at least

once every 7 years ("Evaluation and Appraisal Cycle"), each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect changes in state requirements in Part II of Chapter 163, Florida Statutes, since the last update of the local government's comprehensive plan, and notify the state land planning agency as to its determination. City of Opa-locka City Commission recognizes that, periodically, it is necessary to amend the City Comprehensive Development Master Plan (the "Plan") in order to ensure that the Plan is current and consistent with the City's planning and regulatory needs. The City Commission finds that the proposed evaluation and appraisal based text amendments, attached hereto as Exhibit "A", and incorporated herein by reference, will help strengthen the City's long-term ability to protect its residential neighborhoods and improve overall community character and quality of life. The City Commission desires to comply with state law and adopt the text amendments to the City's Comprehensive Plan in the form prescribed by law and notice was publicly advertised as required by City and State regulations regarding text amendments to the Comprehensive Plan.

On December 12, 2023, the Planning and Zoning Appeals Board, as the local planning agency for the City held its hearing on this proposed Ordinance with due public notice and input, and recommended its adoption by a 5 – 0 vote, and the City Commission will hold a first reading of this legislation and public hearing of this proposed evaluation and appraisal based text amendments to the Comprehensive Plan on January 10, 2024 at which time the City Commission may agree to approve this legislation and vote to transmit the proposed and will transmit to state agencies for review if approved, after first reading, pursuant to Section 163.3184(3)(b), Florida Statutes. The City Commission will hold a second reading and public reading of this proposed Ordinance with due public notice and input from state agencies for final adoption.

Financial Impact

Approval of the Evaluation and Appraisal Based Amendments to the Opa-Locka Comprehensive Development Master Plan will not provide any negative financial impact.

Proposed Action:

Staff recommended approval of this Ordinance.

These blenders might cut you or burn your things. About 4.8 million have been recalled

BY DAVID J. NEAL
dneal@miamiherald.com

A blender should cut fruit, not your skin. Nor should it burn your possessions. So, BlendJet recalled about 4.9 million BlendJet 2 Portable Blenders sold in the United States and Canada.

"The recalled blenders can overheat or catch fire and the blender blades can break off, posing fire and laceration hazards to consumers," the U.S. Consumer Product Commission recall notice states.

That's not an idle concern. The recall notice says BlendJet knows about 329 times the blades broke; 49 times people got burned; one person who got sliced; 17 times the blenders overheated or started fires, causing $150,000 of property damage.

U.S. Consumer Product Safety Commission

BlendJet 2 Portable Blenders have been recalled.

BlendJet wants customers with the blenders, which were sold from October 2020 through this November, to reach out to the company for a free replacement of the base. Do this by cutting the rubber seal on the base into three or more pieces, shoot a photo with the pieces and the serial number on the base and email it to safety@blendjet.com or upload it to the recall website.

To see if this recall concerns your blender, you can go to BlendJet's site and enter your blender's serial number.

For other questions, either go to the recall website hyperlinked above or call BlendJet Monday through Friday, 8 a.m. to 10 p.m., Eastern time at 844-334-0562.

Miami Gardens, Palm Beach restaurant problems include rodents and flies

BY DAVID J. NEAL
dneal@miamiherald.com

A Miami Gardens and Rivera Beach restaurant were part of this week's Sick and Shut Down List of Miami-Dade and Palm Beach restaurants that failed inspection.

Once again, we remind you, we don't do the inspecting, and we don't choose who gets inspected. Direct your complaints to the Florida Department of Business and Professional Regulation.

In alphabetical order:

Caribbean Kitchen 305, 760 NW 183rd St., Miami Gardens: Routine inspection, 20 total violations, six High Priority violations.

We told you about this place with its hot water deficiencies — which means washing and cleaning deficiencies —and rodent problems earlier this week.

The kitchen was open again after it corrected the issue for the next day's re-inspection.

Mulligan's Beach House Singer Island, 2551 N. Ocean Ave., Riviera Beach: Complaint inspection, six total violations, five High Priority violations.

Eight flies at the inside bar were "flying around, landing on liquor bottles and the wall behind" the bar. Rodents left 34 droppings on the kitchen floor.

Mulligan's passed a second re-inspection two days after the original inspection.

CITY OF OPA-LOCKA, FLORIDA
NOTICE TO THE PUBLIC

NOTICE IS HEREBY GIVEN that the City Commission of the City of Opa-locka, Florida will hold public hearings at the Regular Commission Meeting on **Wednesday, January 10, 2024 at 7:00 p.m.,** in the City Commission Chambers at the Opa-locka Municipal Complex, 780 Fisherman Street, 3rd Floor, Opa-locka, Florida, to consider the following items for final adoption:

FIRST READING / PUBLIC HEARINGS:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN TO INCORPORATE THE ADOPTED 2022 10-YEAR WATER SUPPLY FACILITIES WORK PLAN UPDATE AND TO STRENGTHEN THE COORDINATION BETWEEN WATER SUPPLY PLANNING AND LOCAL LAND USE PLANNING BY AMENDING CERTAIN OBJECTIVES AND POLICIES IN THE INFRASTRUCTURE, CONSERVATION, INTERGOVERNMENTAL COORDINATION AND CAPITAL IMPROVEMENTS ELEMENTS AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3177(6), FLORIDA STATUTES; PROVIDING FOR TRANSMITTAL; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PROVIDING FOR EVALUATION AND APPRAISAL BASED AMENDMENTS TO THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3191(1), FLORIDA STATUTES; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

SECOND READING / PUBLIC HEARING:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, ENTITLED "OFF-STREET PARKING AND LOADING REQUIREMENTS" TO SPECIFICALLY AMEND SECTION 2-152(F) ENTITLED "GENERAL PRINCIPLES" TO PROVIDE FOR OUTDOOR STORAGE OF VEHICLES ONLY IN A DESIGNATED PARKING SPACE, PROHIBITING DOUBLE PARKING AND REQUIRING THAT ALL AREAS ARE FREE FROM UNSIGHTLY CONDITIONS; AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, SPECIFICALLY SECTION 2-160 (C)(4) ENTITLED "PERMITTED OFF-STREET PARKING" TO REQUIRE A CURRENT VALID LICENSE PLATE FOR RESIDENTIAL PARKING AND FURTHER REQUIRING THAT VEHICLES PARKED AS COMMERCIAL AND INDUSTRIAL FACILITIES HAVE A VALID LICENSE PLATE AND OR BILL OF SALE AND WORK ORDER POSTED VISIBLY ON THE DRIVER'S SIDE WINDOW, INCLUDING VIN NUMBER FOR VEHICLE, BUSINESS NAME, ADDRESS AND TELEPHONE NUMBER; PROVIDING FOR SEVERABILITY; PROVIDING FOR CODIFICATION IN CODE; PROVIDING FOR AN EFFECTIVE DATE.-

RESOLUTIONS / PUBLIC HEARINGS:

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE SPECIAL EXCEPTION REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING IN THE SINGLE-FAMILY RESIDENTIAL ZONING DISTRICT (R-1), ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200; PROVIDING FOR AN EFFECTIVE DATE.

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE FINAL SITE PLAN FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA-LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

All interested persons are encouraged to participate and will be heard with respect to the public hearings.

Additional information on the above item may be obtained by contacting the Office of the City Clerk by telephone 305-953-2800 or email jflores@opalockafl.gov. To participate or provide comments virtually, please register on the City of Opa-locka website at www.opalockafl.gov no later than 7:00 p.m. on Wednesday, January 10, 2024.

In accordance with the Americans with Disabilities Act of 1990, persons needing special accommodations to participate in the proceeding should contact the Office of the City Clerk at (305) 953-2800 for assistance not later than five (5) days prior to the proceeding. If hearing impaired, you may telephone the Florida Relay Service at (800) 955-8771 (TTY), (800) 955-8770 (Voice), (877) 955-8773 (Spanish) or (877) 955-8707 (Creole).

PURSUANT TO FS 286.0105: *Anyone who desires to appeal any decision made by any board, agency, or commission with respect to any matter considered at such meeting or hearing will need a record of the proceedings, and for that reason, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal may be based.*

Comprehensive Plan Update (2035/2045)

Planning Zoning and Appeals Board

November 14, 2023

CITY OF OPA-LOCKA FLORIDA

The city of bright opportunities

@opalockafl

EBENBACH CONSULTING LLC

85 YEARS

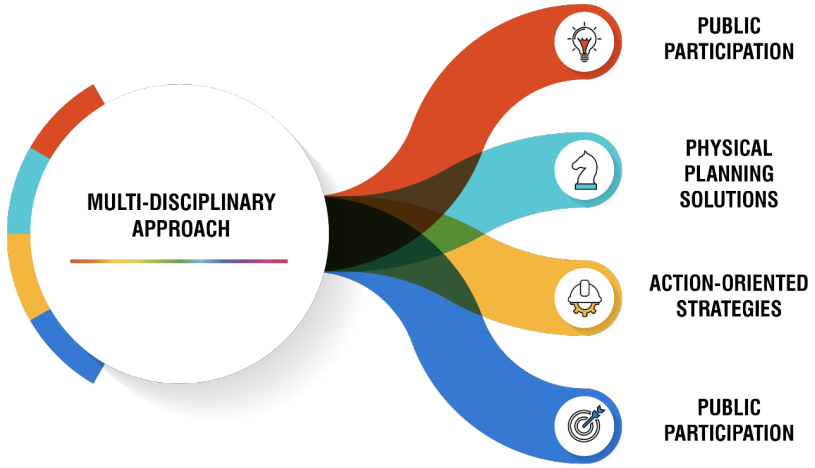
PROJECT UPDATE!

Where We're At Today and What We've Done!

Meetings

- Staff Kickoff – 12/07/22
- Kickoff – City Commission – 01/11/23
- PZAB Workshop – 03/07/23
- Interviews with City Commission, Boards and City Staff
- Property rights element was approved at 1st Reading by Commission
- Research and Analysis
- Draft Comprehensive Development Master Plan (Update)
- Commission Workshop – 10/25/23

Comprehensive Plan Review Process



We identified some of the challenges and opportunities the City of Opa-Locka faces based on Commission, HEPB, PZAB, CRA, Ten North Group, Community and Staff Input.

The updated plan addresses changes such as:

- Sustainability and Resiliency
- Housing
- Water Supply Planning
- Infrastructure
- Economic Development and Redevelopment
- Property Rights
- Current and Future Growth
- Florida Statute Changes

Comprehensive Plan Review Process

TASK 1	TASK 2	TASK 3	TASK 4	TASK 5	TASK 6	TASK 7	TASK 8
Public Kick-Off and Review of Existing Plan	Data Collection and Assessment Report	Review of Existing Plans	Community Visioning Process	Assessment of Future Demands and Opportunities	Goals, Objectives and Policies Development	Comprehensive Plan Update (Draft)	Comprehensive Plan Update (Final Draft)

PROPOSED CHANGES TO THE OPA-LOCKA COMREHENSIVE DEVELOPMENT MASTER PLAN (UPDATE)

FUTURE LAND USE ELEMENT

- Created new land use designations to match Proposed Future Land Use Map: Low-Moderate and split up Civic into Civic, Airport, Parks, Utilities and Water
- Changed Planning Horizons to 2035/2045 to meet Florida Statute requirements
- More focus on retail, neighborhood uses and the public realm
- Enhancing, beautifying downtown
- Strengthen developer requirements and incentives for public benefits
- Enhanced code enforcement strategies
- Starting to touch on Housing, Historic Resources, Climate Resiliency
- Recreated maps

REDEVELOPMENT AND ECONOMIC DEVELOPMENT ELEMENT

- Reference the 2021 Downtown Master Plan and create policies
- Reference Opportunity Zones and other county, state and federal programs
- Reference Brownfield redevelopment
- Reference Moorish Design Guidelines for new development
- Add policies to:
  - Minimize commercial displacement due to gentrification or redevelopment
  - Assist in searching for alternative commercial sites with private sector, providing relocation assistance

TRANSPORTATION ELEMENT

- Add policies to:
  - Provide regular resurfacing and restriping of roads where needed, and coordinate the improvement of sidewalks, lighting, street furnishings
  - Ensure that all public streets are kept openly connected and free of barricades
  - Upgrade of bicycle and pedestrian facilities – Complete Streets
  - Increasingly safe and accessible circulation options – Micro-mobility
  - Promote innovative, flexible, and efficient parking solutions
  - Coordinate with Downtown Redevelopment, TODs
  - Transition to municipal electric vehicles
- Recreate Transportation Map Series

HOUSING ELEMENT

- Add policies to:
  - Minimize displacement due to gentrification and providing relocation assistance to displaced households/resident retention through first options
  - Provide for various housing types and group homes at appropriate locations
  - Positively address the social determinants of health in housing and neighborhood design;
  - Protect historically, culturally and architecturally significant housing, and;
  - Increase the energy efficiency of housing units and reduce carbon emissions in new development or redevelopment.
  - Examine and consider adopting an inclusionary zoning ordinance, mandating integration of affordable and/or workforce housing units in proposed development
  - Increase affordable housing opportunities for cost-burdened families
  - Prioritize investments in infrastructure that mitigate chronic flooding in residential neighborhoods
  - Ensure Ten North Group, public/private partnerships, joint ventures and City Departments have capacity to address housing needs

INFRASTRUCTURE AND AQUIFER RECHARGE ELEMENT

- Updated several of the Levels of Service (LOS) to be in line with service provider – Miami-Dade County (Sewer, Water, Fire Flow, Solid Waste) and amend Parks LOS

CONSERVATION ELEMENT

- Add policies to:
  - Add native tree canopy and landscaping in public areas and streets
  - Continue to upgrade all aged City water pipes as needed to minimize system water losses
  - Continue to implement stormwater drainage improvement projects and inspect existing systems
  - Facilitate the conversion of septic tanks to sanitary sewer
  - Promote the remediation and redevelopment of identified brownfields sites
  - Promote green building standards
  - Address energy conservation and continue to advance flooding mitigation efforts
  - Strengthen vegetative buffer specifications
  - Preserve Lake Ingram
  - Provide for electric vehicle charging infrastructure incentives

RECREATION AND OPEN SPACE ELEMENT

- Revisited the Level of Service Standard for Parks changed from ¼ to ½ mile of residential areas
- Added policies to:
  - Promote use of bonus development incentives for additional park space dedication
  - Increase the inventory and distribution of park grounds and facilities, including new pocket parks, throughout the City, prioritizing residential areas where park space is lacking
  - Protect green resources through maintenance
  - Add more programming that serves all age groups
- Added Glorieta, Butterfly Garden and Coachman Gardens Parks to the Parks Map

PUBLIC SCHOOLS AND EDUCATION ELEMENT

- Add policies to:
  - Partner with Universities
  - Promote environmental education and understanding of resilience principles in grades K-12.

- Update Schools Map Series

INTERGOVERNMENTAL COORDINATION ELEMENT

- Added agencies that the City coordinates with: Miami-Dade County, South Florida Water Management District

CAPITAL IMPROVEMENTS ELEMENT

- Add policy to:
  - Require that when constructing capital infrastructure improvements, the City shall include an Action Plan to provide clear project schedules, monitor progress, provide regular updates and provide a post completion report

- Cleaned up Level of Service table to match standards of service providers (Water, Sewer)

PROPERTY RIGHTS ELEMENT

- Create new element to comply with Florida Statutes
- Add Goal, Objective and Policies series to ensure that a property owner maintains the right to use, maintain, develop, and improve his or her property

Next Steps

- City Commission will review at First Reading – December 2023
- If approved the amended Comprehensive Plan will be submitted to State and other agencies for review (60 Day Review Period)
- City Commission will review the Plan again at Adoption Hearing – March/April 2024

SUBJECT: Evaluation and Appraisal Based Amendments to the City Comprehensive Development Master Plan (*2035/2045 Sustainable Opa-Locka*)

DATE: November 14, 2023

Florida Statute 163.3191(1) requires that at least once every 7 years ("Evaluation and Appraisal Cycle"), each municipality must evaluate its comprehensive plan to determine if plan amendments are necessary to reflect changes in state requirements, reflect changes in conditions, be consistent with the City's planning and regulatory needs and vision.

The last major update to the Comprehensive Plan occurred in 2015 (adoption date: July 22, 2015). The proposed Comprehensive Plan Update is attached with changes shown as new wording (<u>underlined</u>) and deletions (~~strikethrough~~).

The changes were based on some of the challenges and opportunities the City of Opa-Locka faces based on Commission, HEPB, PZAB, CRA, Ten North Group, Community and Staff Input and addresses: Florida Statute Changes, Sustainability and Resiliency, Housing, Water Supply Planning, Infrastructure, Economic Development and Redevelopment, Property Rights, Current and Future Growth.

To date a number of meetings and individual interviews have taken place and which include:

- Staff Project Kickoff – 12/07/22
- Project Kickoff/Introduction – City Commission – 01/11/23
- PZAB Workshop – 03/07/23
- Interviews with City Commission, Members of City Boards and City Staff
- Commission Workshop – 10/25/23

During this time the:

- Property rights element was approved at 1st Reading by Commission
- Research and Analysis was conducted/completed
- Draft Comprehensive Plan (Update) was completed

The changes, as proposed, will help strengthen the City's long-term ability to protect its residential neighborhoods and improve overall community character and quality of life.

After recommendation by the Planning and Zoning Appeals Board to the City Commission and first reading by the Commission the proposed amendments to the Comprehensive Plan will be transmitted to the FloridaCommerce Department and other review agencies. Once agency reviews are completed the item will be scheduled for second reading (adoption).

RECOMMENDATION

Recommendation of approval to the City Commission of "The 2035/2045 Sustainable Opa-locka Comprehensive Plan Update", including all text and map amendments.

DRAFT CITY OF OPA-LOCKA EAR AMENDMENTS

ORDINANCE NO. 2023-XX

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PROVIDING FOR EVALUATION AND APPRAISAL BASED AMENDMENTS TO THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3191(1)), FLORIDA STATUTES; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Florida Statutes provide that municipalities shall have the governmental, corporate, and proprietary powers to enable them to conduct municipal government, perform municipal functions including those relating to Comprehensive Planning, and render municipal service, and exercise any power for municipal purposes, except when expressly prohibited by law; and

WHEREAS, Section 2.5 of the City Charter of the City of Opa-Locka ("City") empowers the City Commission to adopt, amend, or repeal such ordinances as may be required for the proper governing of the City; and

WHEREAS, pursuant to F.S. 163.3191(1), at least once every 7 years ("Evaluation and Appraisal Cycle"), each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect changes in state requirements in Part II of Chapter 163, Florida Statutes, since the last update of the local government's comprehensive plan, and notify the state land planning agency as to its determination; and

WHEREAS, City of Opa-locka City Commission recognizes that, periodically, it is necessary to amend the City Comprehensive Development Master Plan (the "Plan") in order to ensure that the Plan is current and consistent with the City's planning and regulatory needs; and

WHEREAS, the City Commission finds that the proposed evaluation and appraisal based text amendments, attached hereto as Exhibit "A", and incorporated herein by reference, will help strengthen the City's long-term ability to protect its residential neighborhoods and improve overall community character and quality of life; and

WHEREAS, the City Commission desires to comply with state law and adopt the text amendments to the City's Comprehensive Plan in the form prescribed by law; and

WHEREAS, notice was publicly advertised as required by City and State regulations regarding text amendments to the Comprehensive Plan; and,

WHEREAS, on XXXXX XX, 2023, the Planning and Zoning Appeals Board, as the local planning agency for the City held its hearing on this proposed Ordinance with due public notice and input, and recommended its adoption; and

WHEREAS, on XXXXX XX, 2023, the City Commission held a first reading and public hearing of this proposed Ordinance; and

WHEREAS, the City Commission voted to transmit the proposed evaluation and appraisal based text amendments to the Comprehensive Plan to state agencies, after first reading, for review pursuant to Section 163.3184(3)(b), Florida Statutes; and

WHEREAS, on XXXXX XX, 2024, the City Commission held a second reading and public reading of this proposed Ordinance with due public notice and input; and

NOW, THEREFORE, IT IS HEREBY ORDAINED BY THE CITY OF OPA-LOCKA, FLORIDA, AS FOLLOWS:

SECTION 1. RECITALS.

The above recitals are true and correct and incorporated into this Ordinance by reference.

SECTION 2. AMENDING THE CITY OF OPA-LOCKA COMPREHENSIVE PLAN.

The City of Opa-Locka, Florida, Comprehensive Plan is hereby amended to incorporate the proposed text amendment, pursuant to Section 163.3184, Florida Statutes, as found in Exhibit "A".

SECTION 3. SCRIVENER'S ERRORS.

Sections of this Ordinance may be renumbered or re-lettered and corrections of typographical errors, which do not affect the intent of this Ordinance may be authorized by the City Manager, following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

SECTION 4. CONFLICT AND REPEALER.

Any provision of any City of Opa-Locka ordinance or regulation which is in conflict with the provisions of this Ordinance is repealed prospectively to the extent of such conflict.

SECTION 5. LIBERAL CONSTRUCTION.

The terms and provisions of this Ordinance shall be liberally construed to affect the purpose for which it is adopted.

SECTION 6. SEVERABILITY.

If any portion of this Ordinance is for any reason held or declared to be unconstitutional, invalid or void, such holding shall not affect the remaining portions of this Ordinance. If this Ordinance shall be held to be inapplicable to any person, property or circumstances, such holding shall not affect the applicability of this Ordinance to any other person, property or circumstances.

SECTION 7. EFFECTIVE DATE.

That pursuant to Florida Law, the Comprehensive Plan amendment(s) adopted by this Ordinance shall not become effective until 31 days after the state land planning agency notifies the local government that the plan amendment package is complete. If timely challenged, an amendment does not become effective until the state land planning agency or the Administration Commission enters a final order determining the adopted amendment to comply.

ORDINANCE NO. 2024-XX

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN TO INCORPORATE THE ADOPTED 2022 10-YEAR WATER SUPPLY FACILITIES WORK PLAN UPDATE AND TO STRENGTHEN THE COORDINATION BETWEEN WATER SUPPLY PLANNING AND LOCAL LAND USE PLANNING BY AMENDING CERTAIN OBJECTIVES AND POLICIES IN THE INFRASTRUCTURE, CONSERVATION, INTERGOVERNMENTAL COORDINATION AND CAPITAL IMPROVEMENTS ELEMENTS AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3177(6)), FLORIDA STATUTES; PROVIDING FOR TRANSMITTAL; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Florida Statutes provide that municipalities shall address water supply planning by strengthening the statutory links between the regional water supply plans prepared by the water management districts and the comprehensive plans prepared by local governments; and

WHEREAS, Florida Statutes also require improving coordination between the local land use planning and water supply planning; and

WHEREAS, Section 163.3177(6), Florida Statutes, requires local governments to assess their current as well as projected water needs and sources for at least a ten-year planning period, considering the approved regional and county water supply plan for the respective local government; and

WHEREAS, Section 163.3177(4)(a), Florida Statutes, requires coordination of the local comprehensive plan with the water management district's regional water supply plan; and

WHEREAS, City residents receive potable water from the Miami-Dade County Water and Sewer Department (M-D WASD) which is the water supplier; and

WHEREAS, Miami-Dade County adopted its 10-Year Water Supply Facilities Work Plan Update on January 19, 2023; and

WHEREAS, Florida Statutes provide that municipalities shall have the governmental, corporate, and proprietary powers to enable them to conduct municipal government, perform municipal functions including those relating to Water Supply Planning and render municipal service, and exercise any power for municipal purposes, except when expressly prohibited by law; and

WHEREAS, Section 2.5 of the City Charter of the City of Opa-Locka ("City") empowers the City Commission to adopt, amend, or repeal such ordinances as may be required for the proper governing of the Commission; and

WHEREAS, the City of Opa-Locka City Commission recognizes that, every 5 years, it is necessary to amend the City's Water Supply Facilities Work Plan (the "Plan") and water supply plan related text amendments, attached hereto as Exhibit "A", and incorporated herein by reference in order to ensure that the Plan is current and consistent with the City's planning and regulatory needs; and

WHEREAS, the City Commission desires to comply with state law and adopt the City's Water Supply Facilities Work Plan (the "Plan") and water supply plan related text amendments in the form prescribed by law; and

WHEREAS, notice was publicly advertised as required by City and State regulations regarding text amendments to the Comprehensive Plan; and,

WHEREAS, on December 12, 2023, the Planning and Zoning Appeals Board, as the local planning agency for the City held its hearing on this proposed Ordinance with due public notice and input, and recommended its adoption; and

WHEREAS, on January 10, 2024, the City Commission held a first reading and public hearing of this proposed Ordinance; and

WHEREAS, the City Commission voted to transmit the proposed water supply plan related text amendments to the Comprehensive Plan to state agencies, after first reading, for review pursuant to Section 163.3177(6), Florida Statutes; and

WHEREAS, on XXXXX XX, 2024, the City Commission held a second reading and public reading of this proposed Ordinance with due public notice and input; and

NOW, THEREFORE, IT IS HEREBY ORDAINED BY THE CITY OF OPA-LOCKA, FLORIDA, AS FOLLOWS:

SECTION 1. RECITALS.

The above recitals are true and correct and incorporated into this Ordinance by reference.

SECTION 2. AMENDING THE CITY OF OPA-LOCKA COMPREHENSIVE PLAN.

The City of Opa-Locka, Florida, Comprehensive Plan is hereby amended to incorporate by reference the 2022 10-Year Water Supply Facilities Work Plan Update (Exhibit "A") and proposed water supply plan related text amendments, pursuant to Section 163.3177(6), Florida Statutes, as follows:

Infrastructure Element

Policy I-1.1: To assure adequate level of service, the following LOS standards are hereby adopted, and shall be used as the basis for determining the facility capacity and the demand generated by a development.

FACILITY	LEVEL OF SERVICE STANDARDS
Sanitary Sewer Facilities	The ~~system shall maintain the~~ wastewater treatment plants shall operate with a physical capacity of no less than ~~to collect and dispose of 102 percent of~~ the average daily influent sewage flow for the ~~system demand for the~~ preceding ~~five years~~ 12 months. Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards. The system shall collectively maintain the capacity to collect and dispose of no less than 102 percent of the average daily influent sewage system flow for the preceding five years accounting for reserved capacity. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months. The annual average daily influent sewage flow shall be calculated as the average of the daily volume received at the facility over a 12-month period. ~~All treatment plants shall maintain the capacity to treat no less than the average daily sewage flow.~~

<table>
<tr><td></td><td>~~Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards.~~

The per capita Level of Service standard for sanitary sewer shall be 122 gallons per capita per day.</td></tr>
<tr><td>Fire Flow</td><td>Water shall be delivered to users at a pressure no less than 20 pounds per square inch (psi) and no greater than 100 psi. Unless otherwise approved by the Miami-Dade Fire Rescue Department, minimum fire flows based on the land use served shall be maintained as follows:

<table>
<tr><td>Land Use:</td><td>Min. Fire Flow (gpm)
~~Gallons Per Minute~~</td></tr>
<tr><td>Single Family Residential Estate</td><td>~~750~~
500</td></tr>
<tr><td>Single Family and Duplex; Residential on minimum lots of 7,500 sf</td><td>750</td></tr>
<tr><td>Multi-Family Residential (Low Medium Density), Semiprofessional Offices</td><td>1,500</td></tr>
<tr><td>Multi-Family Residential (Medium and High Density)</td><td>2,000</td></tr>
<tr><td>Hospitals, Schools, Business and Industry</td><td>~~2~~3,000</td></tr>
<tr><td>~~Commercial/Industrial~~</td><td>~~3,000~~</td></tr>
</table></td></tr>
<tr><td colspan="2">* * *</td></tr>
</table>

Potable Water	Regional treatment. System shall operate with a maximum daily rated capacity that is no less than 2% above maximum daily flow for the preceding year, and an average daily capacity 2% above the average daily system demand for the preceding 5 years. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months. User LOS. Maintain capacity to produce and deliver ~~126.82~~ 120.26 gallons per capita per day systemwide. Water Quality. Shall meet all county, state and federal primary potable water standards. Countywide Storage. Storage capacity for finished water shall equal no less than 15% of countywide average daily demand.

Objective I-5 Monitoring Measures:

1. Achievement of regional water conservation goals.
2. The City's Work Plan Update shall remain consistent with the County's ~~2~~1 0-Year Supply Facilities Work Plan Update, which is compatible with the Miami Dade County Water Use Permit renewals and with projects as listed in the South Florida Water Management District's 201~~3~~8 Lower East Coast Regional Water Supply Plan Update. The Work Plan will be updated, at a minimum, every 5 years and within 18 months after the South Florida Water Management District's approval of an updated Lower East Coast Regional Water Supply Plan.

Policy I-5.4: The City of Opa-Locka must adopt by reference into its Comprehensive Plan the City of Opa-Locka 20~~15~~22 ~~2~~10-year Water Supply Facilities Work Plan Update (Work Plan Update) adopted ~~May 25, 2016~~ XXXX, as required by section 163.3177(6)(c), F.S. within 18 months after the governing board of the South Florida Water Management District approves its 201~~3~~8 Lower East Coast Water Supply Plan Update. The Work Plan will be updated, at a minimum, every 5 years. The City of Opa-Locka 20~~15~~22 ~~2~~10-year Water Supply Facilities Work Plan Update is designed to: assess current and projected potable water demands; evaluate the sources and capacities of available water supplies; and, identify those water supply projects, using all available technologies, necessary to meet the City's water demands for a 20-year period.

Policy I-5.5: Comply with the 20~~15~~22 ~~2~~10-year Water Supply Facilities Work Plan Update adopted on ~~May 25, 2016~~ XXXX and incorporate such Work Plan Update into the City of Opa-Locka Comprehensive Plan.

Conservation Element

Policy C-3.5: The implementation of the 20~~15~~22 ~~2~~10-year Water Supply Facilities Work Plan Update will ensure that adequate water supplies and public facilities are available to serve the water supply demands of the City's growing population.

Policy C-3.7: By July 1, 2024, the City shall adopt conservation measures by ordinance in conformance with the SFWMD's Mandatory Year-Round Landscape Irrigation Conservation Measures (as detailed in 40E-24, Florida Administrative code). Specifically, the City ordinance shall prohibit landscape irrigation during those periods of the day when irrigation efficiency significantly decreases, and limit landscape irrigation water use to two days per week. The City ordinance shall further encourage users to apply no more than 3/4 -inch to 1-inch of water per week on their lawns and landscape areas and only as needed to supplement rainfall.

Implementation:

- Who? The City
- How? Through the enforcement of SFWMD's Mandatory Year-Round Landscape Irrigation Conservation Measures
- When? Upon Ordinance adoption

Intergovernmental Coordination

Objective IC-1 Monitoring Measures:

1. Demonstrated compliance with policies IC-1.1 – IC1.8 (ongoing participation in intergovernmental coordination efforts).

Policy IC-1.6: The City shall coordinate the planning of potable water and sanitary sewer facilities and services and level-of-service standards within the Miami-Dade County Water and Sewer Department, Department of Regulatory and Economic Resources, the South Florida Water Management District, and the 201~~3~~8 Lower East Coast Water Supply Plan Update.

Policy IC-1.7: The City will coordinate with the South Florida Water Management District concerning its jurisdictional authority as necessary and support its efforts concerning the *201~~3~~8 Lower East Coast Water Supply Plan Update*, ACCELER8 Everglades and CERP and the Biscayne Bay Coastal Wetlands

Project to protect an Outstanding Florida Water – Biscayne Bay. The City hereby adopts by reference the Miami-Dade County Comprehensive Development Master Plan Amendments adopted ~~February 4, 2015~~ January 19, 2023, the Miami-Dade Water and Sewer Department ~~2~~10-year Water Supply Facilities Work Plan ~~(2014-2033) Support Data (November 2014)~~, the *201~~3~~8 Lower East Coast Water Supply Plan Update* (LEC) approved by the South Florida Water Management District (SFWMD) on ~~October 10, 2013~~ November 8, 2018 and additional information found within Water Use Permit 13-00017-W are herein incorporated by reference. The Water Use Permit which was modified and approved by the SFWMD on ~~February 9, 2015~~ March 8, 2022, will now expire on ~~February 9, 2035~~ December 27, 2065.

Capital Improvements

Policy CI-3.1: The City shall utilize the following level of service standards as the basis for determining facility capacity and the demand generated by development.

FACILITY	LEVEL OF SERVICE STANDARDS
Sanitary Sewer Facilities	The ~~system shall maintain the~~ wastewater treatment plants shall operate with a physical capacity of no less than ~~to collect and dispose of 102 percent of~~ the average daily influent sewage flow for the ~~system demand for the~~ preceding ~~five years~~ 12 months. Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards. The system shall collectively maintain the capacity to collect and dispose of no less than 102 percent of the average daily influent sewage system flow for the preceding five years accounting for reserved capacity. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months. The annual average daily influent sewage flow shall be calculated as the average of the daily volume received at the

<table>
<tr><td></td><td>facility over a 12-month period.

~~All treatment plants shall maintain the capacity to treat no less than the average daily sewage flow.~~

~~Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards.~~

The per capita Level of Service standard for sanitary sewer shall be 122 gallons per capita per day.</td></tr>
<tr><td>Fire Flow</td><td>Water shall be delivered to users at a pressure no less than 20 pounds per square inch (psi) and no greater than 100 psi. Unless otherwise approved by the Miami-Dade Fire Rescue Department, minimum fire flows based on the land use served shall be maintained as follows:

<table>
<tr><th>Land Use:</th><th>Min. Fire Flow (gpm) ~~Gallons Per Minute~~</th></tr>
<tr><td>Single Family Residential Estate</td><td>~~750~~ 500</td></tr>
<tr><td>Single Family and Duplex; Residential on minimum lots of 7,500 sf</td><td>750</td></tr>
<tr><td>Multi-Family Residential (Low Medium Density), Semiprofessional Offices</td><td>1,500</td></tr>
<tr><td>Multi-Family Residential (Medium and High Density)</td><td>2,000</td></tr>
<tr><td>Hospitals, Schools, Business and Industry</td><td>~~2~~3,000</td></tr>
<tr><td>~~Commercial/Industrial~~</td><td>~~3,000~~</td></tr>
</table>
</td></tr>
</table>

* * *	
Potable Water	Regional treatment. System shall operate with a maximum daily rated capacity that is no less than 2% above maximum daily flow for the preceding year, and an average daily capacity 2% above the average daily system demand for the preceding 5 years. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months. User LOS. Maintain capacity to produce and deliver ~~126.82~~ 120.26 gallons per capita per day systemwide. Water Quality. Shall meet all county, state and federal primary potable water standards. Countywide Storage. Storage capacity for finished water shall equal no less than 15% of countywide average daily demand.

SECTION 3. SCRIVENER'S ERRORS.

Sections of this Ordinance may be renumbered or re-lettered and corrections of typographical errors, which do not affect the intent of this Ordinance may be authorized by the City Manager, following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

SECTION 4. CONFLICT AND REPEALER.

Any provision of any City of Opa-Locka ordinance or regulation which is in conflict with the provisions of this Ordinance is repealed prospectively to the extent of such conflict.

SECTION 5. LIBERAL CONSTRUCTION.

The terms and provisions of this Ordinance shall be liberally construed to affect the purpose for which it is adopted.

SECTION 6. SEVERABILITY.

If any portion of this Ordinance is for any reason held or declared to be unconstitutional, invalid or void, such holding shall not affect the remaining portions of this Ordinance. If this Ordinance shall be held to be inapplicable to any person, property or circumstances, such holding shall not affect the applicability of this Ordinance to any other person, property or circumstances.

SECTION 7. EFFECTIVE DATE.

That pursuant to Florida Law, the Comprehensive Plan amendment(s) adopted by this Ordinance shall not become effective until 31 days after the state land planning agency notifies the local government that the plan amendment package is complete. If timely challenged, an amendment does not become effective until the state land planning agency or the Administration Commission enters a final order determining the adopted amendment to comply.

Short Title:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN TO INCORPORATE THE ADOPTED 2022 10-YEAR WATER SUPPLY FACILITIES WORK PLAN UPDATE AND TO STRENGTHEN THE COORDINATION BETWEEN WATER SUPPLY PLANNING AND LOCAL LAND USE PLANNING BY AMENDING CERTAIN OBJECTIVES AND POLICIES IN THE INFRASTRUCTURE, CONSERVATION, INTERGOVERNMENTAL COORDINATION AND CAPITAL IMPROVEMENTS ELEMENTS AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3177(6)), FLORIDA STATUTES; PROVIDING FOR TRANSMITTAL; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

Staff Summary:

Florida Statutes provide that municipalities shall address water supply planning by strengthening the statutory links between the regional water supply plans prepared by the

water management districts and the comprehensive plans prepared by local governments. Florida Statutes also require improving coordination between the local land use planning and water supply planning. Florida Statutes, Section 163.3177(6), requires local governments to assess their current as well as projected water needs and sources for at least a ten-year planning period, considering the approved regional and county water supply plan for the respective local government. Section 163.3177(4)(a), Florida Statutes, requires coordination of the local comprehensive plan with the water management district's regional water supply plan. City of Opa-locka residents receive potable water from the Miami-Dade County Water and Sewer Department (M-D WASD) which is the City's water supplier and Miami-Dade County adopted its 10-Year Water Supply Facilities Work Plan Update on January 19, 2023.

Florida Statutes provides that municipalities shall have the governmental, corporate, and proprietary power to enable them to conduct municipal government, perform municipal functions including those relating to Water Supply Planning and render municipal service, and exercise any power for municipal purposes, except when expressly prohibited by law. Section 2.5 of the City Charter of the City of Opa-Locka ("City") empowers the City Commission to adopt, amend, or repeal such ordinances as may be required for the proper governing of the City by the Commission. The City of Opa-locka City Commission recognizes that, every 5 years, it is necessary to amend the City's Water Supply Facilities Work Plan (the "Plan") and water supply plan related text amendments, attached hereto as Exhibit "A", and incorporated herein by reference in order to ensure that the Plan is current and consistent with the City's planning and regulatory needs.

The City Commission desires to comply with state law and adopt the City's Water Supply Facilities Work Plan (the "Plan") and water supply plan related text amendments in the form prescribed by law and notice was publicly advertised as required by City and State regulations regarding text amendments to the Comprehensive Plan.

On December 12, 2023, the Planning and Zoning Appeals Board, as the local planning agency for the City held its hearing on this proposed Ordinance with due public notice and input, and recommended its adoption by a 5 – 0 vote, and the City Commission will hold a first reading and public hearing of this proposed Ordinance on January 10, 2024 at which time the City Commission may agree to approve this legislation and vote to transmit the proposed water supply plan related text amendments to the Comprehensive Plan to State Agencies after first reading for review pursuant to Section 163.3177(6), Florida Statutes. The City Commission will hold a second reading and public reading of this proposed Ordinance with due public notice and input from state agencies for final adoption.

Financial Impact

Approval of the Opa-Locka Comprehensive Development Master Plan to incorporate the adopted 2022 10-year water supply facilities work plan will not provide any negative financial impact.

Proposed Action:

Staff recommended approval of this Ordinance.

CGA Memo -Water Supply Plan Update and Comprehensive Plan Amendments
Draft Work Plan Update & Related Comprehensive Plan Amendments

These blenders might cut you or burn your things. About 4.8 million have been recalled

BY DAVID J. NEAL
dneal@miamiherald.com

A blender should cut fruit, not your skin. Nor should it burn your possessions. So, BlendJet recalled about 4.9 million BlendJet 2 Portable Blenders sold in the United States and Canada.

"The recalled blenders can overheat or catch fire and the blender blades can break off, posing fire and laceration hazards to consumers," the U.S. Consumer Product Commission recall notice states.

That's not an idle concern. The recall notice says BlendJet knows about 329 times the blades broke; 49 times people got burned; one person who got sliced; 17 times the blenders overheated or started fires, causing $150,000 of property damage.

U.S. Consumer Product Safety Commission

BlendJet 2 Portable Blenders have been recalled.

BlendJet wants customers with the blenders, which were sold from October 2020 through this November, to reach out to the company for a free replacement of the base. Do this by cutting the rubber seal on the base into three or more pieces, shoot a photo with the pieces and the serial number on the base and email it to safety@blendjet.com or upload it to the recall website.

To see if this recall concerns your blender, you can go to BlendJet's site and enter your blender's serial number.

For other questions, either go to the recall website hyperlinked above or call BlendJet Monday through Friday, 8 a.m. to 10 p.m., Eastern time at 844-334-0562.

Miami Gardens, Palm Beach restaurant problems include rodents and flies

BY DAVID J. NEAL
dneal@miamiherald.com

A Miami Gardens and Rivera Beach restaurant were part of this week's Sick and Shut Down List of Miami-Dade and Palm Beach restaurants that failed inspection.

Once again, we remind you, we don't do the inspecting, and we don't choose who gets inspected. Direct your complaints to the Florida Department of Business and Professional Regulation.

In alphabetical order:

Caribbean Kitchen 305, 760 NW 183rd St., Miami Gardens: Routine inspection, 20 total violations, six High Priority violations.

We told you about this place with its hot water deficiencies — which means washing and cleaning deficiencies —and rodent problems earlier this week.

The kitchen was open again after it corrected the issue for the next day's re-inspection.

Mulligan's Beach House Singer Island, 2551 N. Ocean Ave., Riviera Beach: Complaint inspection, six total violations, five High Priority violations.

Eight flies at the inside bar were "flying around, landing on liquor bottles and the wall behind" the bar. Rodents left 34 droppings on the kitchen floor.

Mulligan's passed a second re-inspection two days after the original inspection.

CITY OF OPA-LOCKA, FLORIDA
NOTICE TO THE PUBLIC

NOTICE IS HEREBY GIVEN that the City Commission of the City of Opa-locka, Florida will hold public hearings at the Regular Commission Meeting on **Wednesday, January 10, 2024 at 7:00 p.m.,** in the City Commission Chambers at the Opa-locka Municipal Complex, 780 Fisherman Street, 3rd Floor, Opa-locka, Florida, to consider the following items for final adoption:

FIRST READING / PUBLIC HEARINGS:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN TO INCORPORATE THE ADOPTED 2022 10-YEAR WATER SUPPLY FACILITIES WORK PLAN UPDATE AND TO STRENGTHEN THE COORDINATION BETWEEN WATER SUPPLY PLANNING AND LOCAL LAND USE PLANNING BY AMENDING CERTAIN OBJECTIVES AND POLICIES IN THE INFRASTRUCTURE, CONSERVATION, INTERGOVERNMENTAL COORDINATION AND CAPITAL IMPROVEMENTS ELEMENTS AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3177(6), FLORIDA STATUTES; PROVIDING FOR TRANSMITTAL; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PROVIDING FOR EVALUATION AND APPRAISAL BASED AMENDMENTS TO THE OPA-LOCKA COMPREHENSIVE DEVELOPMENT MASTER PLAN AS REQUIRED BY AND IN CONFORMITY WITH SECTION 163.3191(1), FLORIDA STATUTES; PROVIDING FOR INCLUSION IN THE COMPREHENSIVE PLAN AND SCRIVENER'S ERRORS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR LIBERAL CONSTRUCTION; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

SECOND READING / PUBLIC HEARING:

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, ENTITLED "OFF-STREET PARKING AND LOADING REQUIREMENTS" TO SPECIFICALLY AMEND SECTION 2-152(F) ENTITLED "GENERAL PRINCIPLES" TO PROVIDE FOR OUTDOOR STORAGE OF VEHICLES ONLY IN A DESIGNATED PARKING SPACE, PROHIBITING DOUBLE PARKING AND REQUIRING THAT ALL AREAS ARE FREE FROM UNSIGHTLY CONDITIONS; AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, SPECIFICALLY SECTION 2-160 (C)(4) ENTITLED "PERMITTED OFF-STREET PARKING" TO REQUIRE A CURRENT VALID LICENSE PLATE FOR RESIDENTIAL PARKING AND FURTHER REQUIRING THAT VEHICLES PARKED AS COMMERCIAL AND INDUSTRIAL FACILITIES HAVE A VALID LICENSE PLATE AND OR BILL OF SALE AND WORK ORDER POSTED VISIBLY ON THE DRIVER'S SIDE WINDOW, INCLUDING VIN NUMBER FOR VEHICLE, BUSINESS NAME, ADDRESS AND TELEPHONE NUMBER; PROVIDING FOR SEVERABILITY; PROVIDING FOR CODIFICATION IN CODE; PROVIDING FOR AN EFFECTIVE DATE.-

RESOLUTIONS / PUBLIC HEARINGS:

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE SPECIAL EXCEPTION REQUEST FOR THE CONSTRUCTION OF A TWIN HOME BUILDING IN THE SINGLE-FAMILY RESIDENTIAL ZONING DISTRICT (R-1), ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200; PROVIDING FOR AN EFFECTIVE DATE.

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE FINAL SITE PLAN FOR THE CONSTRUCTION OF A TWIN HOME BUILDING ON THE PROPERTY LOCATED AT THE CORNER OF NW 17TH AVENUE AND OPA-LOCKA BOULEVARD AND IDENTIFIED BY FOLIO 08-2122-018-0200 IN THE R-1 ZONING DISTRICT; PROVIDING FOR AN EFFECTIVE DATE.

All interested persons are encouraged to participate and will be heard with respect to the public hearings.

Additional information on the above item may be obtained by contacting the Office of the City Clerk by telephone 305-953-2800 or email jflores@opalockafl.gov. To participate or provide comments virtually, please register on the City of Opa-locka website at www.opalockafl.gov no later than 7:00 p.m. on Wednesday, January 10, 2024.

In accordance with the Americans with Disabilities Act of 1990, persons needing special accommodations to participate in the proceeding should contact the Office of the City Clerk at (305) 953-2800 for assistance not later than five (5) days prior to the proceeding. If hearing impaired, you may telephone the Florida Relay Service at (800) 955-8771 (TTY), (800) 955-8770 (Voice), (877) 955-8773 (Spanish) or (877) 955-8707 (Creole).

PURSUANT TO FS 286.0105: *Anyone who desires to appeal any decision made by any board, agency, or commission with respect to any matter considered at such meeting or hearing will need a record of the proceedings, and for that reason, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal may be based.*

SUBJECT: 2022 10-Year Water Supply Facilities Work Plan Update, including all text and map amendments

DATE: November 14, 2023

Changes to the City's 10-Year Water Supply Facilities Work Plan Update and associated amendments to the Comprehensive Plan were last adopted May 25, 2016. Florida Statutes require a review every five years.

BACKGROUND AND ANALYSIS

The City is subject to the jurisdiction of the South Florida Water Management District (SFWMD) in regard to State requirements for local water supply planning. The SFWMD has concluded that traditional water supply sources will not be sufficient to meet the water needs of the growing South Florida population. As a result, the Florida Legislature enacted seven (7) bills in Sessions between 2002 and 2016 in order to address the State's water supply needs, as potential limitations on the continued use of traditional water supplies became increasingly apparent.

Chapter 163, F.S. requires all local municipalities to update their Water Supply Facilities Work Plan and adopt that plan into the comprehensive plan within 18 months of the SFWMD's approval of the Lower East Coast Water Supply Plan. The work plan and the comprehensive plan amendments must address the development of traditional and alternative water supplies and conservation and reuse programs that are necessary to serve existing and new development for at least a 10-year planning period. The Lower East Coast Water Supply Plan was approved on November 8, 2018. Therefore, the deadline for local governments within the Lower East Coast jurisdiction to amend their comprehensive plans to adopt a Work Plan Update was May 2020. This deadline could not be achieved because Miami-Dade County did not adopt their water supply plan until January 19, 2023.

The previous LOS as established by the City and based on Miami-Dade County data was 126.82 gallons per capita per day. With conservation and leak detection efforts the per capita per day demand has now been lowered to 120.26 gallons. Therefore, the recommended LOS is 120.26 gallons per capita per day.

A copy of the draft Work Plan Update and the related Comprehensive Plan amendments are attached.

After recommendation by the Planning and Zoning Appeals Board to the City Commission and first reading by the Commission the proposed water supply plan related amendments to the Comprehensive Development Master Plan will be transmitted to the FloridaCommerce Department and other review agencies. Once agency reviews are completed the item will be scheduled for second reading (adoption).

RECOMMENDATION

Recommendation of approval to the City Commission of "2022 10-Year Water Supply Facilities Work Plan Update", including all text and map amendments.

Miami-Dade County Final Recommendations Report to Amend the CDMP (Adopted January 19, 2023)

Miami-Dade County 10-Year Water Supply Facilities Work Plan (April 2022)

MDWASD Water Conservation Plan (November 2020)

1.0 INTRODUCTION

The City of Opa-Locka (City) acknowledges the importance of water conservation and reuse and has included policies in its Comprehensive Plan ~~in order~~ to assist in implementing related strategies. The City also recognizes that ~~in order~~ to maintain a proactive water conservation program there must be an effective coordination program with Miami-Dade County Water and Sewer Department (MDWASD) to ensure the success of the program. In addition, the City maintains an excellent working relationship with MDWASD as a wholesale customer to ensure compliance with all applicable regulations and guidelines. Since the City is a wholesale customer, City residents and businesses buy their water from the City at a determined rate. Under this arrangement, the City's Public Works Department coordinates with WASD to ensure that enough capacity is available for existing and future customers and supporting infrastructure such as the water lines are adequately maintained.

The City of Opa-Locka ~~2015~~ 2022 ~~2~~10-Year Water Supply Facilities Work Plan Update (hereinafter the Work Plan Update) adopted on ~~May 25, 2016~~ XXXX will reference the initiatives already identified in the Miami-Dade County's ~~2~~10-year Water Supply Facilities Work Plan Update, which was adopted on ~~February 4, 2015~~ January 19, 2023, since the City is a wholesale customer obtaining 100% of its water needs from MDWASD. According to state guidelines, the Work Plan Update and the Comprehensive Plan elements must address the development of traditional and alternative water supplies, bulk sales agreements and conservation and reuse programs that are necessary to serve existing and new development for at least a 10-year planning period.

The purpose of the City's ~~new 2015~~ 2022 ~~2~~10-Year Water Supply Facilities Work Plan Update is to identify and plan for the water supply sources and facilities needed to serve existing and new development within the local government's jurisdiction. The City's first Work Plan was adopted on September 14, 2011 with a 10-year planning horizon while the second Work Plan was adopted on May 25, 2016 with a 20-year planning horizon. This Work Plan Update will be adopted with a ~~2~~10-year planning horizon to be consistent with both the Miami-Dade County and South Florida Water Management District Water Facilities Work Plans. Chapter 163, Part II, F.S., requires local governments to prepare and adopt Water Supply Work Plans into their comprehensive plans within 18 months after the water management district approves a regional water supply plan or its update. Updates to the original Work Plan are required every five years. The City is located in the South Florida Water Management District region in southeast Florida (Figure 1). The 201~~3~~8 *Lower East Coast Water Supply Plan Update* (LEC) was approved by the South Florida Water Management District (SFWMD) on ~~October 10, 2013~~ November 8, 2018. Therefore, local governments within the South Florida Water Management District Lower East Coast jurisdiction should amend their comprehensive plans to adopt a Work Plan Update ~~by March 12, 2015~~ within the referenced timeframe. As stated previously,

MDWASD provides wholesale potable water service to its customers in the City (Figure 2).

The City's Work Plan is divided into six sections:
Section 1 – Introduction
Section 2 – Background Information
Section 3 – Data and Analysis
Section 4 – Intergovernmental Coordination
Section 5 -- Capital Improvement Elements
Section 6 – Goals, Objectives, Policies

1.1 Statutory History

The Florida Legislature has enacted bills in the 2002, 2004, 2005, ~~and~~ 2011, 2012, 2015 and 2016 sessions to address the state's water supply needs. These bills, especially Senate Bills 360 and 444 (2005 legislative session), significantly changed Chapter 163 and 373 Florida Statutes (F.S.) by strengthening the statutory links between the regional water supply plans prepared by the water management districts and the comprehensive plans prepared by local governments. In addition, these bills established the basis for improving coordination between the local land use planning and water supply planning.

1.2 Statutory Requirements

The City of Opa-Locka has considered the following statutory provisions when updating the Water Supply Facilities Work Plan (Work Plan):

1. Coordinate appropriate aspects of its comprehensive plan with the South Florida Water Management District's Regional Water Supply Plan, [163.3177(6)(a), F.S.].

2. Ensure that its future land use plan is based upon availability of adequate water supplies and public facilities and services [s.163.3177(6)(a), F.S. Data and analysis demonstrating that adequate water supplies and associated public facilities will be available to meet projected growth demands must accompany all proposed Future Land Use Map amendments submitted for review.

3. Ensure that adequate water supplies and facilities are available to serve new development no later than the issuance by the local government of a certificate of occupancy or its functional equivalent and consult with the applicable water supplier to determine whether adequate water supplies will be available to serve the development by the anticipated issuance date of the certificate of occupancy [s.163.3180 (2)(a), F.S.].

4. For local governments subject to a regional water supply plan, revise the General Sanitary Sewer, Solid Waste, Drainage, Potable Water, and Natural Groundwater Aquifer Recharge Element (the "Infrastructure Element"), within 18 months after the water management district approves an updated regional water supply plan, to:

a. Identify and incorporate the alternative water supply project(s) selected by the local government from projects identified in the updated SFWMD Regional Water Supply Plan or the alternative project(s) proposed by the local government under s. 373.709(8)(b), F.S. [s. 163.3177(6)(c), F.S.];

b. Identify the traditional and alternative water supply projects, and the conservation and reuse programs necessary to meet water needs identified in the SFWMD Regional Water Supply Plan [s. 163.3177(6)(c), F.S.]; and,

c. Update the Work Plan for at least a 10-year planning period for constructing the public, private, and regional water supply facilities identified in the element as necessary to serve existing and new development. [s. 163.3177(6)(c), F.S.].

5. Revise the Five-Year Schedule of Capital Improvements to include water supply, reuse, and conservation projects and programs to be implemented during the five-year period [s. 163.3177(3)(a)4, F.S.].

6. To the extent necessary to maintain internal consistency after making changes described in Paragraph 1 through 5 above, revise the Conservation Element to assess projected water needs and sources for at least a 10-year planning period, considering the SFWMD Regional Water Supply Plan, the applicable District Water Management Plan, as well as applicable consumptive use permit(s). [s.163.3177 (6)(d), F.S.]. The plan must address the water supply sources necessary to meet and achieve the existing and projected water use and demand for the established planning period, considering the SFWMD Regional Water Supply Plan [s.163.3167(9), F.S.].

7. To the extent necessary to maintain internal consistency after making changes described in Paragraphs 1 through 5 above, revise the Intergovernmental Coordination Element to ensure coordination of the comprehensive plan with the SFWMD Regional Water Supply Plan [s.163.3177(6)(h)1., F.S.].

8. While an Evaluation and Appraisal Report is not required, local governments are encouraged to comprehensively evaluate, and as necessary, update comprehensive plans to reflect changes in local conditions. The evaluation could address the extent to which the local government has implemented the need to update their Work Plan, including the development of alternative water supplies, and determine whether the identified alternative water supply projects, traditional water supply projects, and conservation and reuse programs are meeting local water use demands [s.163.3181(3), F.S.].

9. A local government that does not own, operate, or maintain its own water supply facilities, including, but not limited to, wells, treatment facilities, and distribution infrastructure, and is served by a public water utility with a permitted allocation of greater than 300 million gallons per day is not required to amend its comprehensive plan in response to an updated regional water supply plan or to maintain a work plan if any such local government's usage of water constitutes less than 1 percent of the public water utility's total permitted allocation. However, any such local government is required to cooperate with, and provide relevant data to, any local government or utility provider that provides and natural groundwater aquifer recharge element updated in accordance with

s. 163.3191. Any local government may verify its qualifications for the exemption with the Florida Department of Economic Opportunity (DEO) [s. 163.3177(6)(c)4., F.S.].

2.0 BACKGROUND INFORMATION

2.1 Overview

The City of Opa-locka, incorporated in 1926, ~~and~~ is located in northwestern Miami-Dade County. The City has an ~~combined~~ area of approximately 4.4 square miles. The City is bounded by NW 151 Street to the north, NW 119 Street to the south, NW 17 Avenue to the east and NW 47 Avenue to the west. The City is located near major transportation roadways including State Road 9, NW 37 Avenue, Gratigny Parkway, NW 27 Avenue, NW 22 Avenue, and NW 135 Street.

The City had a 2010 Census population of ~~14,886~~ 16,463. The Miami-Dade Water and Sewer Department Wholesale Customers Report reflects a 20~~16~~20 population of ~~15,507~~ 16,631 persons living in Opa-Locka. For the purposes of this Update, the data found in the Miami-Dade County 10-Year Water Supply Facilities Work Plan (April 2022) will be utilized.

~~Nearly 14% of Opa-Locka's gross acreage is vacant and, as indicated by the current economy, it is unlikely that t~~The City will experience a population ~~boom in the next several years unless development of mixed-use projects within the downtown is realized~~ increase during this planning period. ~~The~~ A potential expansion of the City's current boundaries through annexations is another factor which might result in a ~~significant~~ population increase during the planning period. ~~The Commission has actively sought to annex several mostly commercial/industrial areas.~~

~~The City of Opa-Locka Sustainable Communities Challenge Initiative: Current Conditions Report dated September 2012 provided~~ aAn evaluation of land uses by gross acreage~~.~~ ~~This report~~ has revealed the following approximate breakdown: Industrial (34~~8~~ %); Vacant (~~21~~6%); Residential (1~~5~~7 %); Government (~~1~~5%); Commercial (~~11~~3%); Institutional (~~2~~6%); Roads/ROW (20%) and, ~~Other~~ Water (~~3~~4%).

2.2 Relevant Regional Issues

Regional issues that affect the City of Opa-Locka include minimizing pressure on the Everglades and Biscayne Bay ecosystems and, Biscayne and Florida Aquifers. To that end, the Comprehensive Everglades Restoration Plan (CERP) is providing the foundation for one of the largest ecosystem restoration projects in the world. The SFWMD and the US Army Corps of Engineers have partnered in order to restore, protect and preserve the water resources of central and southern Florida, including the Everglades. Various projects under CERP help ensure the proper quantity, quality, timing, and distribution of

waters to the Everglades and all of South Florida. The goal of CERP is to capture fresh water that now flows unused to the Atlantic Ocean and the Gulf of Mexico redirect it to areas that need it most.

The SFWMD's priorities have focused on creating Water reservation rules to facilitate construction of CERP project components. The City is in support of CERP and other restoration projects listed in the 2018 Lower East Coast (LEC) Water Supply Plan Update that further the Northern/Southern Everglades 20-year commitment to Everglades restoration, including the C-111 South Dade, C-111 Spreader, Biscayne Bay Coastal Wetland BBCW L-31 East Floway, BBCW Deering Estate and BBCW Cutler Wetlands projects.

The South Florida Water Management District is the state agency responsible for water supply in the Lower East Coast planning area which includes the jurisdictional boundaries of Opa-Locka. SFWMD plays a pivotal role in resource protection, through criteria used for Consumptive Use Permitting. As pressure increased on the Everglades ecosystem resource, the Governing Board initiated rulemaking to limit increased allocations dependent on the Everglades system. As a result, the Regional Water Availability Rule was adopted by the Governing Board on February 15, 2007, as part of the SFWMD's water use permit program. This reduced reliance on the regional system for future water supply needs, mandates the development of alternative water supplies, and increasing conservation and reuse.

Even with an ever-increasing population, withdrawals from the Aquifers will be limited, greater conservation will be required to reduce per capita use; and, reclaimed water must continue to be an important alternative water source per the 2008 Leah G. Schad Ocean Outfall Program. The City does not have any domestic wastewater facilities which discharge to the ocean. But supports Miami-Dade County efforts in reducing wastewater outflows and providing for reuse.

The 2013~~3~~8 Lower East Coast Water Supply Plan Update notes that a number of utilities have diversified their water supplies, including treatment and storage technologies, and water conservation programs. These alternatives include constructing brackish Floridan aquifer wells and reverse osmosis treatment plants, reclaimed water treatment and distribution facilities, and aquifer storage and recovery systems. ~~Between 2007 and 2009, 41 MGD of potable water supply capacity was added. From 2010 to 2013, nine utilities built potable water supply (PWS) projects with a capacity of 49 MGD. Approximately 14 percent of the current PWS allocation is now from an alternative water source, primarily brackish groundwater.~~

From FY2013 to FY2018, the SFWMD provided more than $3 million in alternative water supply funding for 11 projects in the LEC Planning Area. Funded projects created 9.25 million gallons per day (mgd) of new reclaimed water capacity and 4.19 mgd of additional reclaimed water distribution or storage in the LEC Planning Area.

The 2018 Lower East Coast Water Supply Plan Update water supply major issues are as follows: 1. Fresh surface water and groundwater are limited; further withdrawals could have impacts on the regional system, wetlands, existing legal uses, and saltwater intrusion. As a result, additional alternative water supplies need to be developed. 2. Surface water allocations from Lake Okeechobee and the Water Conservation Areas are limited in accordance with the Lake Okeechobee Service Area RAA criteria. 3. Construction of additional storage systems (e.g., reservoirs, aquifer storage and recovery systems) to capture wet season flow volumes will be necessary to increase water availability during dry conditions and attenuate damaging peak flow events from Lake Okeechobee. 4. Expanded use of reclaimed water is necessary to meet future water supply demands and the Ocean Outfall Law. 5. Expanded use of brackish groundwater from the Floridan aquifer system requires careful planning and wellfield management to prevent undesirable changes in water quality.

Through Infrastructure Objective AR-1 and Policy AR-1.1 the City supports protecting the integrity of groundwater. Additionally, Conservation Objective C-2 and its implementing policies protects ground and surface resources.

As further outlined in Section 3.~~6~~7 of this Plan the City will support and assist in disseminating information on water conservation related programs and incentives from Miami-Dade County and SFWMD.

3.0 DATA AND ANALYSIS

The intent of the data and analysis section of the Work Plan Update is to describe the information that local governments need to provide to state planning and regulatory agencies as part of their proposed comprehensive plan amendments, particularly those that would change the Future Land Use Map (FLUM) to increase density and/or intensity.

3.1 Population Information

The City's existing and future population figures were derived from the MDWASD Wholesale Customers Report estimate. Below is a comparison in tabular format. As stated previously, for the purpose of water supply planning the ~~LEC~~ MDWASD projections will be utilized. As shown in Table 1, the ~~LEC~~ MDWASD ~~Update~~ Plan states that the MDWASD Service Area has a 2020 population of ~~2,239,773~~ 2,533,548.

For informational purposes, the total 201~~0~~6 population of Miami-Dade County, in which the City's population is included, was ~~2,496,435~~ 2,700,794 (Table ~~A-7~~ B-1. PWS and DSS population projections for the Miami-Dade LEC Planning Area, *201~~3~~8 LEC Water Supply Plan Update*). Of that total the Miami-Dade WASD serviced ~~2,141,885~~ 2,351,064 residents.

Table 1.
City vs. Miami-Dade County Population Comparison

	~~2016~~	~~2020~~	~~2025~~	~~2030~~	~~2035~~

Miami-Dade County Total Pop.	2,777,310	2,924,743	3,072,175		

Sources: Exhibit C-3, MDWASD Wholesale Customers – Water Service Area Population by Utility Served, MDWASD 10-Year Water Supply Facilities Work Plan (April 2022) and Table 4-2 Population Projections to be Served by WASD.

The City does not have additional data on domestic self-supply systems. After review of City records it has been determined they are incomplete with respect to self-supply systems.

3.2 Maps of Current and Future Areas Served

The City of Opa-locka is located in the MDWASD Hialeah-Preston Subarea.

Figure 3 depicts current and future water service areas of the City. MDWASD is the only service provided to customers within the City's municipal boundaries. There are no areas anticipated to be annexed.

3.3 Potable Water Level of Service Standard

Policy ~~I-1.1~~ CI-3.1 of the ~~Potable Water~~ Capital Improvements Element in the adopted Comprehensive Plan sets the level of service (LOS) standard for potable water at ~~155~~ 120.26 gallons per capita per day. This policy also requires water delivered at a rate between 20 and 100 pounds per square inch. Using population and water demand figures provided by the Miami-Dade Water and Sewer Department, the ~~2014~~ 2022 actual LOS for the City is ~~126.82~~ 120.26 gallons per capita per day. WASD uses ~~137.2~~ 139 gallons per capita systemwide.

The Miami-Dade Water and Sewer Department (WASD) is in charge of maintaining the water distribution and treatment facilities which it wholesales to the City of Opa-Locka. Water service is provided through the John E. Preston Water Plant. Currently the potable water system serves all non-residential and residential land uses in Opa-Locka.

The City will also revise Policy I-1.1 of the Sanitary Sewer, Solid Waste, Drainage, Potable Water & Natural Groundwater Aquifer Recharge Element, setting the level of service standard to deliver ~~126.82~~ 120.26 gallons per capita per day. The proposed policy change matches the recommendation by WASD to deliver ~~126.82~~ 120.26 gallons of potable water per capita per day to the residents of Opa-Locka.

3.4 Sanitary Sewer Level of Service Standard

Policy CI-3.1 of the Capital Improvements Element in the adopted Comprehensive Plan sets the level of service (LOS) standard for sanitary sewer at 122 gallons per capita per day.

The Miami-Dade Water and Sewer Department (WASD) is in charge of maintaining the wastewater collection and treatment facilities for the City of Opa-Locka through the North District Wastewater Treatment Plant.

The City will also revise Policy I-1.1 of the Sanitary Sewer, Solid Waste, Drainage, Potable Water & Natural Groundwater Aquifer Recharge Element, setting the level of service standard to collect 122 gallons per capita per day. The proposed policy changes match the LOS Standard by WASD.

3.45 Population and Potable Water Demand Projections for the City

The South Florida Water Management District *2013~~8~~ Lower East Coast Water Supply Plan Update* (LEC) details the projected potable water demand for MDWASD, which includes the City of Opa-Locka. Since MDWASD provides water to a number of Miami-Dade County municipalities and most of the unincorporated area, the analysis of the City's water needs is determined by the City's percentage of the overall population of the MDWASD service area population (Table 2).

Table 2.
MDWASD – Including Opa-Locka
Current and Projected Water Supply
(MDWASD) Water Use Permit No. 13-00017-W

	~~**ACTUAL**~~	~~**PROJECTED**~~			
	~~2016~~	~~2020~~	~~2025~~	~~2030~~	~~2035~~

~~2. Per Capita data from LEC Chapter 6: Water Supply Development Projects, p. 248~~

	ACTUAL	**PROJECTED**			
	2020	2025	2030	2035	2040
Population of Opa-Locka Service Area	20,987	21,853	22,719	23,585	24,451
OPL Per Capita (126.82 gallons per day finished water)	120.26	120.26	120.26	120.26	120.26

Potable Water Demands (daily average annual) – City of Opa-Locka service area	2.52	2.63	2.73	2.84	2.94

Notes:

1. Population projections MDWASD Wholesale Customers
2. Per Capita data from ~~LEC Chapter 6: Water Supply Development Projects, p. 248~~ MDWASD 10-Year Water Supply Facilities Work Plan, Appendix C, Exhibit C-2, p. 368 (April 2022)

3.~~5~~6 Water Supply Distribution Provided by the City of Opa-Locka

MDWASD is a regional water and wastewater utility that furnishes potable water service to approximately ~~2.2~~ 2.5 million inhabitants and tens of thousands of commercial establishments. The service area covers numerous municipalities and most of the unincorporated areas of Miami-Dade County. The City is a wholesale customer and distributes potable water to the City's residents or businesses. Additionally, potable water is supplied to portions of the City of Miami Gardens and unincorporated Miami-Dade County. In August 2014 the City, through the Florida Department of Environmental Protection Drinking Water State Revolving Fund Program, commissioned a study entitled Potable Water Infrastructure Improvements. This study reviewed Alternatives to upgrade the City's potable water distribution system. To date and due to funding shortfalls work has not ~~been~~ begun. The City continues to evaluate its funding options, including grants.

3.~~6~~7 Water Supply Provided by Miami-Dade County WASD

As stated above, the MDWASD System supplies potable water to over 2.~~2~~5 million persons, including residents and businesses within the City, and is an interconnected system of three subareas. Other water suppliers within Miami-Dade County include: North Miami Beach, North Miami, Homestead and Florida City. Currently within the MDWASD Service Area there are 15 municipal wholesale customers (including the City of Opa-Locka).

The information contained in the City's Comprehensive Development Master Plan ~~Amendments~~ adopted February 4, 2015 and the Miami-Dade WASD ~~2~~10-year Water Supply Facilities Work Plan ~~(2014-2033) Support Data~~ (~~November 2014~~ April 2022), the *Lower East Coast Water Supply Plan Update* (LEC) approved by the South Florida Water Management District (SFWMD) on ~~October 10, 2013~~ November 8, 2018, and additional information found within Water Use Permit 13-00017-W are herein incorporated by reference. The Water Use Permit which was modified and approved by the SFWMD on ~~February 9, 2015~~ March 8, 2022, will now expire on ~~February 9, 2035~~ December 27, 2065.

The following Miami-Dade County CDMP Policy supports the coordination with the SFWMD LEC Update:
WS-6D. In the development of its future potable water supplies, Miami-Dade County shall,

to the maximum extent feasible, utilize methods which preserve the integrity of the Biscayne Aquifer, protect the quality of surface water and related ecosystems, consider and are compatible with the South Florida Water Management District's ~~2013~~ Lower East Coast Regional Water Supply Plan Update and the current Water Use Permit, and comply with the land use and environmental protection policies of the Miami-Dade County CDMP, the Strategic Regional Policy Plan for South Florida, and the State Comprehensive Plan.

The City of Opa-Locka is served by the Hialeah-Preston sub-area water treatment plant. The Hialeah-Preston (H-P) subarea is comprised of dedicated low-pressure pipelines, remote storage tanks, pumping facilities and high pressure systems. This system delivers water to Hialeah, Miami Springs, the City of Miami and other portions of northeastern Miami-Dade County, generally north of Flagler Street. The Hialeah Reverse Osmosis (R.O.) plant was completed in October 2013 and is providing water to the City of Hialeah and unincorporated Miami-Dade County.

The Hialeah-Preston subarea water treatment plants are supplied by four water supply wellfields which extract water from the Biscayne Aquifer. The total designed installed capacity from the four wellfields in the Hialeah-Preston subarea is approximately 295 million gallons per day (MGD). The Hialeah-Preston subarea also accesses water from the Floridan Aquifer by ~~five~~ six wells that have a finished water supply capacity of 10 MGD, 7.5 MGD well capacity has been completed with the remaining 2.5 MGD well capacity to be completed by the end of ~~2016~~ 2022. In addition to these wellfields, WASD's plans for ASR include the Southwest and West Wellfield.

WASD anticipates using these wells for storage of fresh Biscayne Aquifer water during the wet season (when operating water levels in the canal allows) for extraction and use in the dry season. In order to use the Upper Floridan Aquifer wells, the WASD designed an ultra-violet (UV) light disinfection system for each ASR site to treat the Biscayne Aquifer water before injecting it into the Floridan Aquifer. M-D WASD Capital Improvements Projects impacting the City are referenced in **Section 5.0** of this Plan Update.

3.~~7~~8 Conservation

Water conservation is the key to maintaining the health and productivity of the Surifical and Floridan Aquifers. Promoting water conservation equipment, techniques, and practices will benefit customers economically and maintain a realistic water demand picture for utilities. Protection of the aquifer system and wellfields (Figure 3.) through conservation and reuse, recharge enhancement, limitations on withdrawal, regulation of land use, and maintenance of minimum flows and levels will ensure the availability of an adequate water supply for all competing demands, maintain and enhance the functions of natural systems and preserve water quality.

The City of Opa-Locka works in coordination with MDWASD, SFWMD and state efforts aimed at promoting conservation through a variety of means including:

- Water Use Efficiency requirements included in the Code of Miami-Dade County

- Limiting Irrigation Hours
- Florida-Friendly Landscape Ordinance
- Rain Sensor Ordinance
- Water Conservation Rate Structure
- Leak Detection and Repair Program
- Public education
- Offering low-cost kits to its customers to reduce water use in their homes (High-Efficiency Fixtures).

For more information about WASD's Water Conservation Program visit http://www.miamidade.gov/conservation/home.asp

3.~~7~~8.1 County-wide Efforts

Section 4.5 Water Conservation and Reuse of the Miami-Dade WASD ~~2~~10-year Water Supply Facilities Work Plan (~~2014-2033~~ April 2022) ~~Support Data (November 2014)~~ outlines additional MDWASD efforts (pages 4-~~6~~7 and ~~7~~8).

Presently, water utilities are saving substantial amounts of water through strategic water-efficiency programs and Best Management Practices (BMP) included in their Water Use Efficiency Plan. The savings from water conservation often translate into more potable water available for residential and non-residential use, capital and operating savings, which allow systems to defer or avoid significant expenditures for water supply facilities and wastewater facilities. As a result of these efforts, the County has achieved 16.19 MGD of water saving through fiscal year 2021.

The City continues to remain in full support of the water conservation initiatives adopted by the SFWMD and Miami-Dade County.

While the City is not responsible for the Comprehensive Everglades Restoration Project, it is supportive of the regional water conservation efforts related to this regional rehydration of the Florida Everglades. The City is also supportive of mandating yard water restrictions that have been directed by the South Florida Regional Water Management District. There are no water conservation projects identified in the City's Capital Improvements Element or Capital Improvements Schedule.

The City will continue to coordinate future water conservation efforts with WASD and SFWMD to ensure that proper techniques are applied. In addition, the City will continue to support and expand existing goals, objectives and policies in the ~~GMP~~ City's Comprehensive Development Master Plan that promotes water conservation in a cost-effective and environmentally sensitive manner. The City will continue to actively support SFWMD and Miami-Dade County in the implementation of new regulations or programs that are designed to conserve water.

Reuse

For the past several years, the State of Florida ~~is leading~~ has led the nation in water reuse. The water reuse effort in the state is primarily led by utilities, local governments, the water management districts and state agencies. The intent of ~~their efforts~~ this is to implement water reuse programs that increase the volume of reclaimed water used and promotes public acceptance of reclaimed water. ~~The City is in full support of the water reuse initiatives under consideration by both the SFWMD and Miami-Dade County. The County has committed to implement a total of 117.5 mgd of water reuse as noted in the County's 20-year water use permit.~~

The County's projected finished water demands are now markedly lower than anticipated when the first 20-year water use permit application was submitted. As such, wastewater reuse to address water supply demands is no longer required, and other alternative water supplies (Floridan aquifer, water conservation, C-51 reservoir, etc.) have been determined to be more viable and shall be considered in the future. WASD is currently implementing a total of 16.49 MGD of reuse at each of the Wastewater Treatment Plants, primarily for in-plant (process water) use. In addition, WASD will be providing up to 15 MGD of reclaimed water from the South District Wastewater Treatment Plant to the FPL facilities at Turkey Point, per Miami-Dade County Resolution No. R-579-20 approved by the BCC on June 16, 2020.

3.~~7~~8.2 City Specific Actions, Programs, Regulations, or Opportunities

The City will coordinate future water conservation and reuse efforts with MDWASD and the SFWMD to ensure that proper techniques are applied. In addition, the City will continue to support and expand existing goals, objectives and policies in the comprehensive plan that promotes water conservation and reuse in a cost-effective and environmentally sensitive manner. The City will continue to actively support the SFWMD and MDWASD in the implementation of new regulations or programs that are design to conserve water during the dry season. Finally, the City will administer its own water conservation practices. The City has also implemented a tiered rate structure for potable water.

The City has been successful in implementing, as applicable, its water conservation policies and supporting efforts by Miami-Dade County and the South Florida Water Management District in their efforts to promote water conservation and reuse. The City promotes the policies, requirements and procedures as outlined in Section 3.~~7~~8, including those found within the Miami-Dade County Water Use Efficiency Standards Manual (2009). As shown by the City's per capita consumption rate of ~~126.82~~ 120.26 gallons per capita vs. ~~147~~ 139 generally countywide, the City has been a leader by this metric. Recently, the City of Opa-locka customer water billing function has transitioned to Miami-Dade County WASD. As a result, additional water conservation information is being

disseminated to property owners within the City, unincorporated area and Miami Gardens (See MDWASD Water Conservation Plan, November 2020).

3. ~~7~~8.3 MDWASD Specific Regulations

MDWASD, and therefore the City, implement water conservation through the following Ordinances: Irrigation Hours, Florida-Friendly Landscape, High-Efficiency Fixtures, Rain Sensor, Water Conservation Rate Structure, Leak Detect & Repair Program and Public Education Programs. The City will also continue to comply with all the Water Use Efficiency requirements included in the Code of Miami-Dade County. Additionally, the following code requires that the City is governed by County regulations:

Sec. 22-174. Compliance with County Standards
Minimum standards or requirements for landscaping and irrigation within the City, if not addressed in this Article shall only then be governed by the following, as may be amended: 1. Chapter 18A, Miami-Dade County Landscaping Ordinance and Landscape Manual 2. Chapter 18B, Miami-Dade County Right-Of-Way Landscape Ordinance 3. Chapter 24, Miami-Dade County Environmental Protection Ordinance 4. Chapter 32, Miami-Dade County Water and Sewer Regulations 5. In instances where conflicts between Articles or Chapters occur, the Director shall determine upon review of a proposed application which Article sections shall apply.

4.0 INTERGOVERNMENTAL COORDINATION

The provision of water supply needs in the City of Opa-Locka is achieved in coordination with local, county, and regional partners including Miami-Dade County WASD and South Florida Water Management District. MDWASD is the City's primary water partner as they provide the City its water service utilities. As part of the water supply planning process and intergovernmental coordination in general the City has reviewed the Miami-Dade County Plan while outside agencies will review the City's Plan. MDWASD ensures that water supply services are provided to the majority of ~~residents~~ customers of Miami-Dade County in the most efficient and effective manner. SFWMD acts to protect the region's water supply resources and coordinates the implementation of state water regulations and policies through local water planning efforts and water supply services.

In this update of the ~~original~~ 10-Year Water Supply Facilities Work Plan, the City has reviewed its water supply related Objectives and policies and updated them as necessary. Changes to the Objectives and policies are outlined in Section 6.0. Policies are included which detail coordination efforts with both MDWASD and SFWMD. As a wholesale customer, the City must coordinate through data collection and billings the adequate supply of water and conservation practices with MDWASD and implement the requirements of County Code.

Recently, the City of Opa-locka customer water billing function has transitioned to Miami-Dade County WASD. As a result, additional water conservation information is being disseminated (See MDWASD Water Conservation Plan, November 2020). The City strives to continue coordination with Miami-Dade County WASD for pump station replacement and other necessary upgrades to the potable water system.

5.0 CAPITAL IMPROVEMENTS

The information contained in the City's Comprehensive Development Master Plan ~~Amendments adopted February 4, 2015~~ and the Miami-Dade WASD ~~2~~10-year Water Supply Facilities Work Plan (~~2014-2033~~ April 2022) ~~Support Data (November 2014)~~, the *201~~3~~8 Lower East Coast Water Supply Plan Update* (LEC) approved by the South Florida Water Management District (SFWMD) on ~~October 10, 2013~~ November 8, 2018 and additional information found within Water Use Permit 13-00017-W are herein incorporated by reference. The Water Use Permit which was modified and approved by the SFWMD on ~~February 9, 2015~~ March 8, 2022, will now expire on ~~February 9, 2035~~ December 27, 2065.

As a wholesale customer the City is not responsible for the provision of infrastructure for potable water treatment and distribution. Below is a partial list of MDWASD projects and changes to its Capital Improvement Schedule.

As stated previously in Section 3.~~6~~7 the City is within the Hialeah-Preston Subarea. The MDWASD Capital Plan Bond/Fund Allocation for water projects through FY2029-2030 is $1.6 Billion. The following major Capital Improvements Projects may impact the City and are as further described in the Miami-Dade WASD ~~2~~10-year Water Supply Facilities Work Plan (~~2014-2033~~ April 2022) ~~Support Data (November 2014) Table 12~~ Appendix B 2021-2030 Multi-Year Capital Plan:

1) Systemwide Wellfield Improvements;
2) Systemwide Water ~~Main~~ Line Extensions and Improvements;
3) ~~Central M-D Water Transmission Mains Improvements: and,~~;
4) ~~Alexander Orr, Jr.~~ Water Treatment Plants ~~Expansion~~ Rehabilitation~~.~~;
4) Purchase of Lake Property Adjacent to Northwest Wellfield;
5) Miami Springs Wellfield Rehabilitation – Phase 1-3; and,
6) C-51 Reservoir Water Project.

~~Alternative Water Supply Projects~~
~~10 MGD Hialeah RO WTP Phase 1 – Operational October 2013 (7.5 MGD well capacity constructed)~~
~~20 MGD South Miami Heights WTP – under design (17.5 MGD Biscayne Aquifer/2.5 MGD Florida Aquifer)~~
~~CANCELLED AWSP's~~

~~Hialeah RO WTP Phase 2 and 3~~
~~Blending and canal recharge projects~~

~~Reuse Projects~~
~~Updated Reuse Projects~~
~~Existing Reuse at Three Wastewater Treatment Plants~~
~~Biscayne Bay Coastal Wetlands Rehydration~~
~~Pilot Completed~~
~~Full Scale capacity~~

6.0 GOALS, OBJECTIVES AND POLICIES

The following Comprehensive Plan ~~goals,~~ objectives and policies are consistent with the Water Supply Facilities Work Plan Update.

Add the following new or amended Objectives, policies and Monitoring Measures as follows:

Infrastructure Element

Policy I-1.1: To assure adequate level of service, the following LOS standards are hereby adopted, and shall be used as the basis for determining the facility capacity and the demand generated by a development.

FACILITY	LEVEL OF SERVICE STANDARDS
Sanitary Sewer Facilities	The ~~system shall maintain the~~ wastewater treatment plants shall operate with a physical capacity of no less than ~~to collect~~

	~~and dispose of 102 percent of~~ the average daily influent sewage flow for the ~~system demand for the~~ preceding ~~five years~~ 12 months. Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards. The system shall collectively maintain the capacity to collect and dispose of no less than 102 percent of the average daily influent sewage system flow for the preceding five years accounting for reserved capacity. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months. The annual average daily influent sewage flow shall be calculated as the average of the daily volume received at the facility over a 12-month period. ~~All treatment plants shall maintain the capacity to treat no less than the average daily sewage flow.~~ ~~Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards.~~ The per capita Level of Service standard for sanitary sewer shall be 122 gallons per capita per day.
Fire Flow	Water shall be delivered to users at a pressure no less than 20 pounds per square inch (psi) and no greater than 100 psi. Unless otherwise approved by the Miami-Dade Fire Rescue Department, minimum fire flows based on the land use served shall be maintained as

follows:

Land Use:	Min. Fire Flow (gpm) ~~Gallons Per Minute~~
Single Family Residential Estate	~~750~~ 500
Single Family and Duplex; Residential on minimum lots of 7,500 sf	750
Multi-Family Residential (Low Medium Density), Semiprofessional Offices	1,500
Multi-Family Residential (Medium and High Density)	2,000
Hospitals, Schools, Business and Industry	~~2~~3,000
~~Commercial/Industrial~~	~~3,000~~

* * *

Potable Water	Regional treatment. System shall operate with a maximum daily rated capacity that is no less than 2% above maximum daily flow for the preceding year, and an average daily capacity 2% above the average daily system demand for the preceding 5 years. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months. User LOS. Maintain capacity to produce and deliver ~~126.82~~ 120.26 gallons per capita per day systemwide. Water Quality. Shall meet all county, state and federal primary potable water standards. Countywide Storage. Storage capacity for finished water shall equal no less than 15% of countywide average daily demand.

Objective I-5 Monitoring Measures:

1. Achievement of regional water conservation goals.
2. The City's Work Plan Update shall remain consistent with the County's ~~2~~10-Year Supply Facilities Work Plan Update, which is compatible with the Miami Dade County Water Use Permit renewals and with projects as listed in the South Florida Water Management District's 201~~3~~8 Lower East Coast Regional Water Supply Plan Update. The Work Plan will be updated, at a minimum, every 5 years and within 18 months after the South Florida Water Management District's approval of an updated Lower East Coast Regional Water Supply Plan.

Policy I-5.4: The City of Opa-Locka must adopt by reference into its Comprehensive Plan the City of Opa-Locka 201~~5~~22 ~~2~~10-year Water Supply Facilities Work Plan Update (Work Plan Update) adopted ~~May 25, 2016~~ XXXX, as required by section 163.3177(6)(c), F.S. within 18 months after the governing board of the South Florida Water Management District approves its 201~~3~~8 Lower East Coast Water Supply Plan Update. The Work Plan will be updated, at a minimum, every 5 years. The City of Opa-Locka 201~~5~~22 ~~2~~10-year Water Supply Facilities Work Plan Update is designed to: assess current and projected potable water demands; evaluate the sources and capacities of available water supplies; and, identify those water supply projects, using all available technologies, necessary to meet the City's water demands for a 20-year period.

Policy I-5.5: Comply with the 20~~15~~22 ~~2~~10-year Water Supply Facilities Work Plan Update adopted on ~~May 25, 2016~~ XXXX and incorporate such Work Plan Update into the City of Opa-Locka Comprehensive Plan.

Conservation Element

Policy C-3.5: The implementation of the 20~~15~~22 ~~2~~10-year Water Supply Facilities Work Plan Update will ensure that adequate water supplies and public facilities are available to serve the water supply demands of the City's growing population.

Policy C-3.7: By July 1, 2024, the City shall adopt conservation measures by ordinance in conformance with the SFWMD's Mandatory Year-Round Landscape Irrigation Conservation Measures (as detailed in 40E-24, Florida Administrative code). Specifically, the City ordinance shall prohibit landscape irrigation during those periods of the day when irrigation efficiency significantly decreases, and limit landscape irrigation water use to two days per week. The City ordinance shall further encourage users to apply no more than 3/4 -inch to 1-inch of water per week on their lawns and landscape areas and only as needed to supplement rainfall.

Implementation:

- Who?The City
- How?Through the enforcement of SFWMD's Mandatory Year-Round Landscape Irrigation Conservation Measures
- When? Upon Ordinance adoption

Intergovernmental Coordination

Objective IC-1 Monitoring Measures:

1. Demonstrated compliance with policies IC-1.1 – IC1.8 (ongoing participation in intergovernmental coordination efforts).

Policy IC-1.6: The City shall coordinate the planning of potable water and sanitary sewer facilities and services and level-of-service standards within the Miami-Dade County Water and Sewer Department, Department of Regulatory and Economic Resources, the South Florida Water Management District, and the 201~~3~~8 Lower East Coast Water Supply Plan Update.

Policy IC-1.7: The City will coordinate with the South Florida Water Management District concerning its jurisdictional authority as necessary and

support its efforts concerning the *201~~3~~8 Lower East Coast Water Supply Plan Update*, ACCELER8 Everglades and CERP and the Biscayne Bay Coastal Wetlands Project to protect an Outstanding Florida Water – Biscayne Bay. The City hereby adopts by reference the Miami-Dade County Comprehensive Development Master Plan Amendments adopted ~~February 4, 2015~~ January 19, 2023, the Miami-Dade Water and Sewer Department ~~2~~10-year Water Supply Facilities Work Plan ~~(2014-2033) Support Data (November 2014)~~, the *201~~3~~8 Lower East Coast Water Supply Plan Update* (LEC) approved by the South Florida Water Management District (SFWMD) on ~~October 10, 2013~~ November 8, 2018 and additional information found within Water Use Permit 13-00017-W are herein incorporated by reference. The Water Use Permit which was modified and approved by the SFWMD on ~~February 9, 2015~~ March 8, 2022, will now expire on ~~February 9, 2035~~ December 27, 2065.

Capital Improvements

Policy CI-3.1: The City shall utilize the following level of service standards as the basis for determining facility capacity and the demand generated by development.

FACILITY	LEVEL OF SERVICE STANDARDS
Sanitary Sewer Facilities	The ~~system shall maintain the~~ wastewater treatment plants shall operate with a physical capacity of no less than ~~to collect and dispose of 102 percent of~~ the average daily influent sewage flow for the ~~system demand for the~~ preceding ~~five years~~ 12 months. Effluent discharged from the wastewater treatment plants shall meet all federal, State and County standards. The system shall collectively maintain the capacity to collect and dispose of no less than 102 percent of the average daily influent sewage system flow for the preceding five years accounting for reserved capacity. The maximum daily flow shall be determined by calculating the average of the highest five single

<table>
<tr><td></td><td>day flows for the previous 12 months. The annual average daily influent sewage flow shall be calculated as the average of the daily volume received at the facility over a 12-month period.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, PIGGYBACKING THE SOURCEWELL COOPERATIVE PROGRAM AGREEMENT 101221-VTR WITH ENVIRONMENTAL PRODUCTS GROUP, INC. TO ACCEPT A FOUR-YEAR CAPITAL LEASE AGREEMENT FOR THE PURCHASE OF A VACTOR MODEL 2115I MOUNTED ON A NEW 2023 FREIGHTLINER MODEL 114SD TRUCK CHASSIS, IN THE AMOUNT OF FOUR HUNDRED SEVENTY THOUSAND EIGHT HUNDRED FORTY-ONE DOLLARS AND TWENTY-FOUR CENTS ($470,841.24); PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, on October 5, 2023, the City Commission approved Resolution 22-045 for the procurement of a new Vactor Truck (Vactor Model 2115i mounted on a 2023 Freightliner Model 114SD truck chassis) with the intent to lease and finance for a five-year term with an interest rate of 4.57% and annual payments of One Hundred Six Thousand Two Hundred Thirty-One Dollars and seventy-seven cents ($106,231.77), where at the end of the lease term, the City assumes ownership of the vehicle; and

WHEREAS, no contract has been executed, and the Interim City Manager recommends financing the lease for a four-year period; and

WHEREAS, the vehicle is anticipated to be delivered during the month of January, 2024, at which time the leasing contract would begin. An evaluation has been conducted and it has been determined that there will be a slightly lower interest rate of 4.55% which would be a savings to the City and a more attractive financing option; and

WHEREAS, the total cost of the five-year lease to own plan is Five Hundred Thirty-One Thousand One Hundred Fifty-Eight Dollars and eighty-five cents ($531,158.85). The total cost of the four-year lease to own plan is Four Hundred Seventy Thousand Eight Hundred Forty-One Dollars and twenty-four cents ($470,841.24), providing a savings of sixty thousand three hundred seventeen dollars and sixty-one cents ($ 60,317.61); and

WHEREAS, Sourcewell previously awarded a contract to Environmental Products Group, Inc., pursuant to its Request for Proposals (RFP) No. 101221 for Sewer Vacuum, Hydro-Excavation, and Municipal Pumping Equipment with Related

Accessories and Supplies, for a four-year period commencing December 20, 2021 through November 29, 2025. The contract may be extended for a fifth year at Sourcewell's discretion; and

WHEREAS, the City Commission finds that it is in the best interest of the City to piggyback Sourcewell Cooperative Program Agreement 101221-VTR with Environmental Products Group, Inc. to accept a four-year capital lease agreement in the amount of Four Hundred Seventy Thousand Eight Hundred Forty-One Dollars and twenty-four cents ($ 470,841.24).

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, THAT:

Section 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

Section 2. AUTHORIZATION
The City Commission of the City of Opa-Locka, Florida piggybacks the Sourcewell Cooperative Program Agreement 101221-VTR with Environmental Products Group, Inc. to accept a four-year capital lease agreement for the purchase of a new Vactor Model 2115i mounted on a new 2023 Freightliner Model 114SD truck chassis, in the amount of Four Hundred Seventy Thousand Eight Hundred Forty-One Dollars and twenty-four cents ($ 470,841.24).

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Ordinance may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager, following review by the City Attorney, without the need for public hearing, by filing a corrected copy of same with the City Clerk.

SECTION 4. CONFLICT AND REPEALER.

Any provision of any City of Opa-Locka ordinance or regulation or resolution which is in conflict with the provisions of this Ordinance is repealed prospectively to the extent of such conflict.

SECTION 5. LIBERAL CONSTRUCTION.

The terms and provisions of this Ordinance shall be liberally construed to affect the purpose for which it is adopted.

SECTION 6. SEVERABILITY.

If any portion of this Ordinance is for any reason held or declared to be unconstitutional, invalid or void, such holding shall not affect the remaining portions of this Ordinance. If this Ordinance shall be held to be inapplicable to any person, property or circumstances, such holding shall not affect the applicability of this Ordinance to any other person, property or circumstances.

SECTION 7. EFFECTIVE DATE.

This Ordinance shall take effect upon the adoption and is subject to the approval of the Governor or Governor's Designee.

Short Title:

Lease Financing – Vactor Truck

Staff Summary:

Issue/Recommendation: Resolution 22-045 authorized the procurement of a new Vactor Truck with lease financing with a five-year term. Staff recommends amending the lease financing to a four-year period.

History: On October 5, 2023, the City Commission authorized the procurement of a Vactor Model 2115i mounted on a 2023 Freightliner Model 114SD truck chassis. This procurement was to be financed with a five-year lease with an interest rate of 4.57% and annual payments of $106,231.77. At the end of the lease term, the City assumes ownership of the vehicle.

Current Activity: The vehicle is anticipated to be delivered this month (January, 2024), at which time the leasing contract will begin. Staff has evaluated a four-year lease with a slightly lower interest rate of 4.55% and believes the savings, as outlined in the Financial Impact Section, are significant enough to make the four-year plan a more attractive financing option.

Financial Impact:

	Five-Year Plan	Four-Year Plan	Savings
Annual Payment	106,231.77	113,960.31	
Interest Rate	4.57%	4.55%	
Years Of Maintenance Included	5.00	4.00	
Total Lease Cost	531,158.85	455,841.24	
Fifth Year Of Maintenance	Incl Above	15,000.00	
Total Five-Year Cost	531,158.85	470,841.24	60,317.61

.Proposed Action:

Staff recommends the City Commission approve the procurement of the Vactor truck with a four-year lease plan.

ORDINANCE NO. 23-XX

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, ENTITLED "OFF-STREET PARKING AND LOADING REQUIREMENTS" TO SPECIFICALLY AMEND SECTION 2-152(F) ENTITLED "GENERAL PRINCIPLES" TO PROVIDE FOR OUTDOOR STORAGE OF VEHICLES ONLY IN A DESIGNATED PARKING SPACE, PROHIBITING DOUBLE PARKING AND REQUIRING THAT ALL AREAS ARE FREE FROM UNSIGHTLY CONDITIONS; AMENDING ARTICLE VI OF THE CITY'S LAND DEVELOPMENT REGULATIONS, SPECIFICALLY SECTION 2-160 (C)(4) ENTITLED "PERMITTED OFF-STREET PARKING" TO REQUIRE A CURRENT VALID LICENSE PLATE FOR RESIDENTIAL PARKING AND FURTHER REQUIRING THAT VEHICLES PARKED AS COMMERCIAL AND INDUSTRIAL FACILITIES HAVE A VALID LICENSE PLATE AND OR BILL OF SALE AND WORK ORDER POSTED VISIBLY ON THE DRIVER'S SIDE WINDOW, INCLUDING VIN NUMBER FOR VEHICLE, BUSINESS NAME, ADDRESS AND TELEPHONE NUMBER; PROVIDING FOR SEVERABILITY; PROVIDING FOR CODIFICATION IN CODE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, City of Opa-Locka departments, to include the City of Opa-Locka's Code Enforcement Department and the City's Planning and Community Development Department have identified opportunities to amend the City's Land Development Regulations pertaining to off-street parking to improve current parking conditions; and

WHEREAS, the City Commission finds that certain amendments to Article VI, Section 22-152(f) of the City's Land Development Regulations, entitled "General Principles"and to Article VI, Section 2-160(C)(4) of the City's Land Development Regulations, entitled "Permitted Off-Street Parking" would be in the best interest of the City of Opa-Locka, Florida.

NOW, THEREFORE, BE IT DULY ORDAINED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA:

Section 1. The recitals to the preamble herein are incorporated by reference.

Section 2. Article VI, Section 22-152(f) of the City's Land Development Regulations, entitled "General Principles" is hereby amended and shall read:

> (F) Off-street parking and loading facilities shall be used solely for the parking of vehicles in operating condition by the patrons, occupants or employees of the use to which such facilities are accessory. No motor vehicle repair work, except emergency service, shall be permitted in association with off-street parking and loading facilities. The storage of commercial vehicles, except for those associated with the use, or merchandise or the sale of vehicles shall be prohibited in a required off-street parking or loading area, except as specifically authorized in this Chapter.
>
> The outdoor storage of vehicles is permitted only in a designated parking space; not obstructing the right of way allowing egress and ingress. Double parking is prohibited. All areas must be free from unsightly conditions including wreaked and or non-operable vehicles unless otherwise authorized by the City's Code of Ordinances. No motor vehicle repair work, except emergency service, shall be permitted in conjunction with an off-street parking and loading facility.

Section 3. Article VI, Section 2-160(C)(4) of the City's Land Development Regulations, Ordinance 15-31, entitled "Permitted Off-Street Parking" is hereby amended and shall read:

> 4. No vehicle without a current valid license plate shall be permitted to park in a residential~~, commercial or industrial area (except as provided herein) or public zoned area.~~ Vehicles parked at a commercial and or industrial facility must have a valid license plate and or bill of sale and work order posted visibly on the driver 's side window, including the following information: VIN number for vehicle, business name, address, and telephone number.

Section 4. If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions of this Ordinance.

Section 5. All ordinances or resolutions or parts of ordinances or resolutions in conflict herewith, are hereby repealed.

Section 6. This Ordinance shall be codified in the Code of Ordinances when the code is recodified.

Section 7. This Ordinance shall, upon adoption, become effective as specified by the City of Opa-Locka Code of Ordinances and the City of Opa-Locka Charter.

Short Title:

An ordinance of the City Commission of the City of Opa-locka amending and adding to Article IV Section 22-152 and Section 22-160 entitled- "Off-Street parking and loading requirements."

Staff Summary:

Through conversations with the City's business community, the City's Code Enforcement Manager and Officers identified opportunities to improve the City's Code to ensure that the outdoor parking facilities for businesses in the city are accessible and maintained in orderly conditions, while allowing the business in the city to provide services to their patrons. The proposed legislation would make the following amendments and additions to the City's current Ordinances:

Revisions to Section 22-152 (F) shall read **The outdoor storage of vehicles is permitted only in a designated parking space; not obstructing the right of way allowing egress and ingress. Double parking is prohibited. All areas must be' free from unsightly conditions including wreaked and or non-operable vehicles unless otherwise authorized**. **No motor vehicle repair work, except emergency service, shall be permitted in association with off-street parking and loading facility.**

DocuSign Envelope ID: 968331BC-F9A4-4C5D-9921-6A65BFAF8646

Additionally, Sec 22-160 (4) shall state "No vehicle without a valid license plate shall be permitted to park in a residential area. Vehicles parked at a commercial and or industrial facility must have a valid license plate and or bill of sale and work order posted visibly on the driver window, including the following information: VIN number, business name, address, and phone number.

Financial Impact – There is no financial impact from this proposed ordinance amendment.

Proposed Action:

It is recommended the City Commission of the City of Opa-locka adopt legislation amending and adding to Article IV Section 22-152 and Section 22-160 entitled- "Off-Street parking and loading requirements."

Attachment:

Article IV: Off-street parking and loading requirements

These blenders might cut you or burn your things. About 4.8 million have been recalled

BY DAVID J. NEAL
dneal@miamiherald.com

A blender should cut fruit, not your skin. Nor should it burn your possessions. So, BlendJet recalled about 4.9 million BlendJet 2 Portable Blenders sold in the United States and Canada.

"The recalled blenders can overheat or catch fire and the blender blades can break off, posing fire and laceration hazards to consumers," the U.S. Consumer Product Commission recall notice states.

That's not an idle concern. The recall notice says BlendJet knows about 329 times the blades broke; 49 times people got burned; one person who got sliced; 17 times the blenders overheated or started fires, causing $150,000 of property damage.

U.S. Consumer Product Safety Commission

BlendJet 2 Portable Blenders have been recalled.

BlendJet wants customers with the blenders, which were sold from October 2020 through this November, to reach out to the company for a free replacement of the base. Do this by cutting the rubber seal on the base into three or more pieces, shoot a photo with the pieces and the serial number on the base and email it to safety@blendjet.com or upload it to the recall website.

To see if this recall concerns your blender, you can go to BlendJet's site and enter your blender's serial number.

For other questions, either go to the recall website hyperlinked above or call BlendJet Monday through Friday, 8 a.m. to 10 p.m., Eastern time at 844-334-0562.

Miami Gardens, Palm Beach restaurant problems include rodents and flies

BY DAVID J. NEAL
dneal@miamiherald.com

A Miami Gardens and Rivera Beach restaurant were part of this week's Sick and Shut Down List of Miami-Dade and Palm Beach restaurants that failed inspection.

Once again, we remind you, we don't do the inspecting, and we don't choose who gets inspected. Direct your complaints to the Florida Department of Business and Professional Regulation.

In alphabetical order:

Caribbean Kitchen 305, 760 NW 183rd St., Miami Gardens: Routine inspection, 20 total violations, six High Priority violations.

We told you about this place with its hot water deficiencies — which means washing and cleaning deficiencies —and rodent problems earlier this week.

The kitchen was open again after it corrected the issue for the next day's re-inspection.

Mulligan's Beach House Singer Island, 2551 N. Ocean Ave., Riviera Beach: Complaint inspection, six total violations, five High Priority violations.

Eight flies at the inside bar were "flying around, landing on liquor bottles and the wall behind" the bar. Rodents left 34 droppings on the kitchen floor.

Mulligan's passed a second re-inspection two days after the original inspection.

CITY OF OPA-LOCKA, FLORIDA
NOTICE TO THE PUBLIC

NOTICE IS HEREBY GIVEN that the City Commission of the City of Opa-locka, Florida will hold public hearings at the Regular Commission Meeting on **Wednesday, January 10, 2024 at 7:00 p.m.,** in the City Commission Chambers at the Opa-locka Municipal Complex, 780 Fisherman Street, 3rd Floor, Opa-locka, Florida, to consider the following items for final adoption:

FIRST READING / PUBLIC HEARINGS:

PURSUANT TO FS 286.0105: *Anyone who desires to appeal any decision made by any board, agency, or commission with respect to any matter considered at such meeting or hearing will need a record of the proceedings, and for that reason, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal may be based.*

Joanna Flores, CMC
City Clerk
City of Opa-locka

ARTICLE VI. OFF-STREET PARKING AND LOADING REQUIREMENTS

Sec. 22-151. Purpose and intent

The purpose of this Article is to ensure the provision of adequate pedestrian circulation and off-street parking and loading areas, to protect the level of service and capacity of existing streets, to avoid unnecessary conflicts between pedestrian and vehicles and to promote the general health, safety, and public welfare. These regulations shall apply to all parking and loading areas, including driveways for single-family and two-family dwellings, within the City.

Sec. 22-152 General Principles

Off-street parking and loading areas should be designed to minimize breaks in the pedestrian environment along the public street and create safe and comfortable passage for pedestrians. The following standards shall be met.

A. Unless it is shown not to be possible due to lot configuration, access issues, or health and safety issues, parking and loading areas shall be placed behind the front of the primary building façade except for single-family and two-family residential uses.

B. To the extent possible, adjoining parking and loading areas serving nonresidential buildings shall be interconnected.

C. Off-street parking and loading areas shall be designed to facilitate adequate movement and access by sanitation, emergency, and other public service vehicles without posing a danger to pedestrians or impeding the function of the parking area.

D. Off-street parking and loading areas shall be designed so that parked vehicles do not encroach upon or extend onto public rights-of-way, sidewalks or strike against or damage any wall, vegetation, utility, or other structure.

E. Ingress/Egress to and from corner lots shall be no closer than thirty (30) feet from any intersection and no closer than five (5) feet from any lot line.

F. Off-street parking and loading facilities shall be used solely for the parking of vehicles in operating condition by the patrons, occupants or employees of the use to which such facilities are accessory. No motor vehicle repair work, except emergency service, shall be permitted in association with off-street parking and loading facilities. The storage of commercial vehicles, except for those associated with the use, or merchandise or the sale of vehicles shall be prohibited in a required off-street parking or loading area, except as specifically authorized in this Chapter.

G. In no event shall parking or loading areas be provided in a manner that requires vehicles to back out into the public rights-of-way, or that requires vehicles to enter or exit a site in a manner which would require them to make an unlawful maneuver within the public right-of-way. This requirement does not apply to areas consisting of driveways serving single-family detached or two-family dwellings, although direct access onto arterial roadways is discouraged.

H. Parking and loading facilities shall be maintained in a clean, orderly and dust-free condition so as not to create a hazard or nuisance, at the expense of the owner or lessee. Parking and loading areas shall be resealed or repaved and pavement markings periodically repainted and on-site traffic control signs replaced, as necessary, to maintain a clear identification of individual parking and loading spaces and to facilitate the safe movement of pedestrian and

Section 22-160

3. No boat or vehicle parked in a residential district may be occupied or used for living, sleeping or housekeeping purposes.

4. No vehicle without a current license plate shall be permitted to park in a residential, commercial or industrial (except as provided herein) or public zoned area.

Reserved Sec. 22-161 – 22-170.
