CITY OF OPA-LOCKA

The City of Bright Opportunities

REGULAR COMMISSION MEETING
Agenda

Wednesday, January 10, 2024
7:00 PM

Commission Chamber
780 Fisherman Street, 3rd Floor
Opa-locka, FL 33054

City Commission
Mayor John H. Taylor, Jr.
Vice Mayor Natasha L. Ervin
Commissioner Sherelean Bass
Commissioner Joseph L. Kelley
Commissioner Veronica Williams

Appointed Officials
Interim City Manager Darvin Williams
City Attorney Burnadette Norris-Weeks
City Clerk Joanna Flores, CMC

SPEAKING BEFORE THE CITY COMMISSION

NOTE: All persons speaking shall come forward and give your full name and address, and the name and address of the organization you are representing.

There is a three (3) minute time limit for speaker/citizens forum and participation at all city commission meetings and public hearings. Your cooperation is appreciated in observing the three (3) minute time limit policy. If your matter requires more than three (3) minutes, please arrange a meeting or an appointment with the City Clerk prior to the commission meeting. City of Opa-locka Code of Ordinances Section 2-57

DECORUM POLICY

Any person making impertinent or slanderous remarks or who become boisterous while addressing the commission, shall be declared to be out of order by the presiding officer, and shall be barred from further audience before the Commission by the presiding officer, unless permission to continue or again address the commission be granted by the majority vote of the commission members. City of Opa-locka Code of Ordinances Section 2-58

NOTICE TO ALL LOBBYISTS

Any person appearing in a paid or remunerated representative capacity before the city staff, boards, committees and the City Commission is required to register with the City Clerk before engaging in lobbying activities. *City of Opa-locka Code of Ordinances Section 2-18*

FLORIDA STATUTES, CHAPTER 285.0105

"If a person decides to appeal any decision made by the Board, Agency or Commission with respect to the proceedings, and that, for such purpose, that person may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based."

PROCEDURES FOR PUBLIC PARTICIPATION

How to watch the meeting

Members of the public can watch public meetings and public hearings at https://www.youtube.com/user/CityofOpaLocka

City Commission Meetings are held in-person while allowing virtual participation. Members of the public wishing to address the Commission may do so in person or virtually.

To participate virtually, please register by 7:00 p.m. on the scheduled meeting date via the City of Opa-locka website at www.opalockafl.gov.

9. DISTRICT ONE / DISTRICT TWO - COUNTY COMMISSIONER REPORT:

There was no report.

10. PUBLIC PRESENTATIONS:

There were none.

11. CITIZENS' FORUM:
(Opportunity for discussion of any concerns – please limit to 3 minutes)

City Clerk Flores announced the protocol for public participation at City Commission meetings.

City Clerk Flores stated there are no virtual public comments.

Mayor Taylor opened the Citizens' Forum.

Mr. Andrew Herman, 1770 Opa-locka Boulevard, said he recently started having issues with the Police Department. He described recent personal situations. He asked the City Commission to look into it.

Ms. Audrey Dominguez, 1147 Jann Avenue, said Resolution 3 is a great idea and she commends the idea. She also spoke about Resolution 8 and said it is time to part ways with the PR firm. She noted they receive most of their updates through Facebook via Vice Mayor Ervin and Commissioner Kelley. She commended the City Clerk for her flyer designs. She asked for an update on the meeting held on September 13m 2023, regarding the RFP for the gateway signage. She noted it has been 90 days and money was allocated. She inquired about the status regarding the evaluation of charter members. She mentioned being excited she is about the beautiful work being done on the old historical City Hall.

Mr. Alex Van Meckel, 806 Jann Avenue, wished the City Commission happy holidays. He expressed disappointment that the City Commission wants to part ways with the PR firm. He said they have been doing incredible work on the City's brand, reputation, and relationship building. He said they will set themselves back. He said the resolution is an abomination.

Mayor Taylor asked the Assistant City Manager Ellis to have someone high-ranking from the Police Department to speak to Mr. Herman. Commissioner Kelley requested an update on the issues that were brought forward by Mr. Herman.

Mayor Taylor thanked Ms. Dominquez for her support. He said the charter member template passed a few months ago but they have not moved forward. He noted the City Commission will discuss.

Mayor Taylor acknowledged Mr. Van Meckel's concerns.

12. ACTION ITEMS (items from consent agenda pull list):

1. **[13-1] A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, DIRECTING THE INTERIM CITY MANAGER AND CITY CLERK TO WORK WITH MAYOR JOHN H. TAYLOR TO DEVELOP AND IMPLEMENT A "BRIGHT HOME OF THE MONTH" PROGRAM, ENCOURAGING AND INCENTIVIZING RESIDENTS TO BEAUTIFY THEIR HOMES; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.** *Sponsored by Mayor Taylor*

The above resolution was read by Assistant City Attorney Candice Cobb.

It was moved by Commissioner Bass, seconded by Vice Mayor Ervin, to discuss Agenda Item 12-1.

Mayor Taylor introduced the item. He said the Resolution is to request an amount of $2,500 to incentivize the program.

Vice Mayor Ervin asked if there would be a plaque. Mayor Taylor there will be a plaque or signage, plus a gift card for the winner.

Commissioner Bass asked if this will be incorporated into the Beautification Plan. Mayor Taylor said it can be engrafted into it the plan.

Commissioner Kelley liked the idea. He asked about the implementation. He requested to include one resident in the evaluation process. Mayor Taylor explained the process, including a nomination form and an evaluation committee.

There being no additional discussion, the motion to approve the Resolution passed by a 5-0 vote.

Vice Mayor Ervin Yes
Commissioner Kelley Yes
Commissioner Williams Yes
Commissioner Bass Yes
Mayor Taylor Yes

2. **[13-5] A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, DIRECTING THE INTERIM CITY MANAGER TO MULCH ALL CITY THOROUGHFARES, ROUNDABOUTS, AND OTHER AREAS DEEMED NECESSARY FOR BEAUTIFYING THE CITY NO LATER THAN JANUARY 9, 2024, AT A TOTAL COST NOT TO EXCEED SIX**

THOUSAND, FOUR HUNDRED AND FIFTY DOLLARS ($6,450.00); PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE. *Sponsored by Commissioner Kelley*

The above resolution was read by Assistant City Attorney Candice Cobb.

It was moved by Commissioner Kelley, seconded by Commissioner Williams, to discuss Agenda Item 12-2.

Commissioner Kelley introduced the item. He said mulch can make the City look better. He noted the timeline shifted. He said it could be included in the weekly or monthly schedule and should be part of the beautification plan. He stated even if they have to do a budget amendment in the future, it is well worth it.

Commissioner Bass agreed the City needs sprucing up, but she does not agree with mulch. She said sod would be more appropriate and will last longer. She expressed concern about the mulch washing way and the amount of work for staff. She asked Mr. King for his opinion.

Mr. King said he prefers mulching for beautification efforts.

Commissioner Williams asked to hear Mr. King's presentation from the previous meeting since she missed it. She said she does not want to piecemeal beautification projects. Mr. King said mulching was included in the beautification plan.

Commissioner Kelley clarified that the backup said that mulching was not included but he would like to see it included. Mr. King reiterated it is part of the plan and he apologized if it was not included. He said the efforts throughout the City include mulch, plants, and sod.

Mayor Taylor asked the Assistant City Manager to schedule individual meetings with Mr. King to better understand the beautification plan.

There being no additional discussion, the motion to approve the Resolution passed by a 5-0 vote.

Vice Mayor Ervin Yes
Commissioner Kelley Yes
Commissioner Williams Yes
Commissioner Bass Yes
Mayor Taylor Yes

the Consent Agenda.

14. NEW ITEMS:

1. A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE INTERIM CITY MANAGER TO ACCEPT GRANT FUNDING FROM THE FLORIDA DEPARTMENT OF LAW ENFORCEMENT (FDLE) FOR FISCAL YEAR 2023-2024 EDWARD BYRNE MEMORIAL JUSTICE ASSISTANCE GRANT PROGRAM IN THE AMOUNT OF $3,772.00 FOR AUTOMATED EXTERNAL DEFIBRULATOR REPLACEMENT PARTS; FURTHER AUTHORIZING THE INTERIM CITY MANAGER TO EXECUTE THE GRANT PROGRAM AWARD AGREEMENT BETWEEN THE FLORIDA DEPARTMENT OF LAW ENFORCEMENT AND THE CIT OF OPA-LOCKA, FLORIDA; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE. *Sponsored by Interim City Manager*

The above resolution was read by Assistant City Attorney Candice Cobb.

Assistant City Manager Ellis introduced the item.

Commissioner Kelley asked if it is reimbursable. Interim City Manager Ellis said Chief Ottley would have to answer that question.

Commissioner Kelley inquired when they heard about the grant. Chief Ottley explained that they have been working through the process for several months. He clarified it is a straight grant and not reimbursable. He further explained the process.

Commissioner Kelley said the documentation indicates that it is a cost reimbursable deliverable.

There being no additional discussion, the motion to approve the Resolution passed by a 5-0 vote.

Vice Mayor Ervin Yes
Commissioner Kelley Yes
Commissioner Williams Yes
Commissioner Bass Yes
Mayor Taylor Yes

17. CITY MANAGER'S REPORT:

1. Update on the City's 5-Year Financial Recovery Plan

Assistant City Manager Ellis introduced the item.

Mr. Dake Schwarte, Senior Budget Analyst, highlighted the following: Executive Summary; and General Fund Revenue.

Commissioner Kelley asked about loss of revenue from lowering the millage rate. Mr. Schwarte confirmed it will restrict some of the CIP projects.

Commissioner Kelley inquired about the sewer and stormwater numbers. Mr. Schwarte said he is not aware of the numbers from the rate study. He said their analysis is based on what the Budget Department assumed.

Mr. Robert Anathan, Budget Administrator, said the contract has not yet been awarded for the rate study. He said only one firm has bid on the rate study. He said they assumed 10% for the purpose of the exercise.

Mr. Schwarte continued the presentation and reviewed the following: General Fund Balance; Water and Sewer Fund; Stormwater Fund; Stormwater Fund Balance; and CIP Investments.

Mayor Taylor requested to see the CIP Investment for 2024. Mr. Schwarte referenced Page 19 in the provided booklet and summarized the data.

Mr. Schwarte noted that ARPA funding is also included on Page 25.

Commissioner Kelley noticed that annexation is not considered due to complexity. Mr. Schwarte said they needed to start with a benchmark, which is why they did not include annexation. He added that they are not taking it off the table, but the complexity and the variables are vast.

Mayor Taylor stressed that the City Commission passed a resolution for an annexation plan.

Mr. Anathan said the funding needs to be spent now so they can put some reasonable parameters around it.

Commissioner Kelley expressed concern that annexation is not considered. He asked Assistant City Manager Ellis to schedule individual meetings with the Commissioners and the Budget Administration Department to understand the 5-Year Financial Recovery Plan.

Mayor Taylor asked if it is a draft plan. Mr. Anathan replied that it is a dynamic document. He recommended a spring workshop leading into the next budget cycle.

Commissioner Williams stated they voted on a firm to explore annexation feasibility and it should have been added to the plan. She asked for the same sense of urgency for the Commission's projects.

Mr. Anathan clarified that the annexation is moving forward and is covered by the budget. It was just not mentioned tonight.

Assistant City Manager Ellis confirmed he will set up individual meetings with the Budget Administration Department and the Commissioners.

Commissioner Kelley requested an update on Carroll Lane. He also asked if there is an opportunity to provide a bonus for City employees for the holidays. City Attorney Norris-Weeks stated there is a statute that needs to be followed. She will provide it to the City Commission.

18. OFFICIAL BOARD REPORTS:

There were none.

Mayor Taylor expressed concern there are Boards who are not meeting due.

Assistant City Manager Ellis will look into it and provide an update later this week.

19. MAYOR/COMMISSION REPORTS:

1. **Mayor John H. Taylor Jr.**
   Financial Oversight Update provided by Interim City Manager Darvin Williams
   Next Steps for City Manager Search

Assistant City Manager Ellis said they recently came back from Tallahassee and met with those responsible for oversight. He said they have not had any meetings with the local Financial Oversight Board within the last year and a half.

Mayor Taylor said they recently switched auditors and the Commission is interested in the timeline of the audit. He requested an update.

Mayor Taylor asked if the HR Director started. Ms. Mary Adams said she has not received an executed contract or purchase order, so she is not authorized to present herself as the City's HR Director at this time.

Mayor Taylor asked about the holdup on the contract. Assistant City Manager Ellis said he does not know the answer.

Commissioner Williams said they are on the second meeting and the contract has still not been signed, which is preventing the City Manager search from moving forward. She does not like when management does not speak with her, including the Interim City Manager not being in attendance for the second City Commission meeting in a row. She said they risk losing every single candidate. She stated that Assistant City Manager Ellis has no answers as well.

Assistant City Manager Ellis said he was not initially involved in contract, and he only heard about the process when he was in Tallahassee.

Commissioner Williams said being an Assistant City Manager means he should know what the Interim City Manager knows. She said it reflects poorly on the City Manager's Office that Assistant City Managers do not have answers.

Commissioner Kelley said everyone received the letter from the State to the City Manager's Office. He expected the things outlined in the letter to be completed by this City Commission meeting. He said they cannot move forward and demanded to see something by 5pm tomorrow from the Interim City Manager.

2. Commissioner Joseph L. Kelley
Jet Ski Waterway Enforcement
Legislative Review of Resolution No. 23-181 reference Outside Entity Human Resources Director

Commissioner Kelley explained the challenges between fishing in Ingram Park and jet skis. He asked the City Manager's Office and the City Attorney to look into this so he can bring legislation forth. He asked for direct and signage to be reinstalled to restrict the area. He asked for an update for the January meeting so he can sponsor legislation.

It was moved by Mayor Taylor, seconded by Commissioner Williams, for the City Manager's Office to complete the deliverables outlined and the signed contract by December 14, 2023, at 5pm.

There being no additional discussion, the motion passed by a 5-0 vote.

Vice Mayor Ervin Yes
Commissioner Kelley Yes
Commissioner Williams Yes
Commissioner Bass Yes
Mayor Taylor Yes

3. Commissioner Veronica J. Williams Citywide Beautification Plan

Commissioner Williams reiterated that they have a plan for each of them to meet with Mr. King individually. She recommended a workshop in 2024, featuring experts from other cities.

Mayor Taylor invited additional reports by the Commissioners.

Commissioner Bass announced that Commissioner Williams is the Assistant Principal of the Year. She said that bingo was phenomenal.

Vice Mayor Ervin said they need to find funding to purchase a pickup truck for Parks and Recreation. Mayor Taylor asked why they cannot repurpose the old Parks vans. Assistant City Manager agreed and noted they will look into it. She agreed with Commissioner Kelley's suggestion to provide a holiday bonus to City employees. She thanked the Commission, staff, and residents for a great bingo event. She expressed how pleased she was they could give out 500 turkeys for Thanksgiving. She said the Fishing Tournament was nice. She recognized the Town of Medley for sending 60 residents to Santa's Enchanted Forrest for free. She announced the Toy Drive at Sherbondy Park. She expressed gratitude for the art festival hosted in the City. She thanked her husband and Coach Mark for putting together 80 bicycles for the Toy Drive. She wished happy holidays to everyone.

Commissioner Kelley thanked her colleagues for supporting the Art of Transformation. He spoke about the turkey giveaways at Sherbondy Park and Feeding South Florida distribution. He noted there were at least 200 people at bingo, so they need at least 200 chairs for future bingo events. He said they honored food distribution volunteers at the most recent Meet Me Monday. He send the 2nd Annual Fishing Tournament featured all ages and 35 fish were caught. He said they are hosting a holiday light contest for the best lit home and the deadline to register is Friday. He commended Vice Mayor Ervin and the Booster Club on the Toy Drive. He asked the hours of operation and programming for Ingraham Park. He wished everyone a happy holiday.

Commissioner Williams recognized this year's tree lighting.

It was moved by Commissioner Williams, seconded by Mayor Taylor, to cancel the December 27, 2023, City Commission meeting.

There being no additional discussion, the motion passed by a 5-0 vote.

Vice Mayor Ervin Yes
Commissioner Kelley Yes
Commissioner Williams Yes
Commissioner Bass Yes
Mayor Taylor Yes

20. OFFICIAL BOARD APPOINTMENTS:

There were none.

21. ADJOURNMENT:

There being no further business to come before the City Commission, it was moved by Commissioner Williams, seconded by Vice Mayor Ervin to adjourn the meeting at 9:15 p.m.

Opa-Locka, Florida 33054

Re: Engagement of Bryant Miller Olive P.A.

Dear Ms. Norris-Weeks:

You have requested to retain Bryant Miller Olive P.A. (the "Firm") as Bond Counsel for the City of Opa-Locka, Florida (the "City"). The purpose of this letter is to advise you of the fee structure to be used by the Firm in its representation of the City and to describe the services the Firm will perform as Bond Counsel to the City. This letter also discloses and discusses the potential arising of conflicts of interest during this representation.

SCOPE OF ENGAGEMENT

In this transaction as Bond Counsel, we expect to perform the following duties:

(1) Review of proposed financing program as to legal feasibility, compliance with applicable law and pending or proposed revisions to the law, including United States Treasury regulations;

(2) Advice as to structuring procedures, required approvals and filings, schedule of events for timely debt issuance, and other legal matters relative to such debt;

(3) Attend meetings with the City staff and public officials, the financial advisor, the bank, underwriters and others as appropriate for development of the debt materials or dissemination of information in connection therewith;

(4) Prepare resolutions and any amendments thereto in order to authorize the debt;

(5) Preparation of all validation pleadings, including complaint, notice of service, proposed answer, memorandum of law, and proposed order and to conduct the validation proceeding, if required;

(6) If sale is by competitive bid, assist in preparation of the bid comments, notice of sale, evaluation of bids and any other documentation or action necessary to conduct a sale of the Bonds in that manner;

(7) Review the transcripts of all proceedings in connection with the foregoing and indicate any necessary corrective action;

(8) Prepare, obtain, deliver and file all closing papers necessary in connection with the Bonds and serve as the City's closing agent in connection with the Bonds;

(9) Review any disclosure documents prepared and authorized by the City, but only insofar as such documents describe the Bonds and summarize the underlying documents; and

(10) Subject to the completion of proceedings to our satisfaction, render our legal opinion (the "Bond Opinion") regarding the validity and binding effect of the Bonds, the source of payment and security for the Bonds, and, as applicable, the excludability of interest on the Bonds from gross income for federal income tax purposes.

Our Bond Opinion will be addressed to the City and will be delivered by us on the date the Bonds are exchanged for their purchase price (the "Closing").

The Bond Opinion will be based on facts and law existing as of its date. The Firm will not be obligated to update our Bond Opinion after the date rendered due to any subsequent changes in law or the interpretation thereof or changed circumstances that may affect the opinion as rendered. In rendering our Bond Opinion, we will rely on the certified proceedings and other certifications of public officials, officers of the City, the bank and other persons furnished to us without undertaking to verify the same by independent investigation, and we will assume continuing compliance by the City with applicable laws relating to the Bonds. During the course of this engagement, we rely on the City to provide us with complete and timely information on all developments pertaining to any aspect of the financing, the Bonds and the security for the Bonds. Among other things, we will require the City to execute a certificate of fact relating to the use of the proceeds of the Bonds.

LIMITATIONS ON SCOPE OF ENGAGEMENT

Our duties as Bond Counsel and Disclosure Counsel are limited to those expressly set forth above. Among other things, our scope of services as Bond Counsel and Disclosure

Counsel in connection with the issuance of the Bonds does not include, unless separately specifically engaged:

(a) Assisting in the preparation or review of an official statement, if any, or any other disclosure document with respect to the Bonds, or performing an independent investigation to determine the accuracy, completeness or sufficiency of any such document or rendering advice that the official statement or other disclosure document does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements contained therein, in light of the circumstances under which they were made, not misleading.

(b) Preparing blue sky or investment surveys with respect to the Bonds.

(c) Drafting state constitutional or legislative amendments.

(d) Pursuing test cases or other litigation (such as contested validation proceedings), except as set forth above.

(e) Making an investigation or expressing any view as to the creditworthiness of City, any credit enhancement provider, any liquidity provider or the Bonds.

(f) Assisting in the preparation of, or opining on, a continuing disclosure undertaking pertaining to the Bonds or, after the Bond is delivered to the purchaser thereof in exchange for the purchase price, providing advice concerning any actions necessary to assure compliance with any continuing disclosure undertaking.

(g) Representing the City in post-closing regulatory investigation or matters.

(h) After Closing, providing continuing advice to the City, the bank or any other party concerning any matter whatsoever.

(i) Providing any advice or opinions on bankruptcy matters.

(j) Review of post-closing investment contracts or provide legal services in connection with interest rate swaps or other financial product agreements.

(k) Provide business, financial or accounting advice.

(l) Conducting environmental due diligence or providing services with respect to the acquisition, construction or permitting of the Project.

(m) Addressing any other matter not specifically set forth above that is not required to render our Bond Counsel Opinion.

ATTORNEY-CLIENT RELATIONSHIP

As Bond Counsel, the City will be our client and an attorney-client relationship will exist between the City and the Firm. Our understanding is that the City Attorney will represent the City on certain matters. We assume that with each transaction other parties to the transaction will retain such counsel as they deem necessary and appropriate to represent the respective interests of such parties. In performing our legal services as Bond Counsel to the City, we will represent the interests of the City exclusively. We will not be representing any other party and will not be acting as an intermediary among the parties. Should the City desire to terminate its relationship with the Firm as Bond Counsel, it may do so by providing written notice to the Firm, which termination shall not be less than thirty (30) days after the date of the written notice.

CONFLICTS

The Firm has disclosed to the City that it currently and may in the future, serve as bond counsel, disclosure counsel, special counsel, or general counsel to other local governments and as special counsel to underwriters, banks, trustees and other parties that may from time to time transact business with the City in unrelated public finance matters. Such representations are standard and customary within the industry and the Firm can effectively represent the City and the discharge of the Firm's professional responsibilities to the City will not be prejudiced as a result, either because such engagements will be sufficiently different or because the potential for such prejudice is remote and minor and outweighed by consideration that it is unlikely that advice given to the other client will be relevant in any respect to the subject matter. The City acknowledges and agrees that the Firm's role as bond counsel, disclosure counsel, or special counsel to any local governmental entity or to any financial institution in conjunction with unrelated public finance transactions is not likely to create or cause any actual conflict, and service as disclosure, bond, or special counsel to other Firm clients will not *per se* be construed as a conflict or be objectionable to the City. Accordingly, the City expressly consents to such representation by the Firm consistent with the circumstances described above and waives any conflict of interest with respect thereto. The foregoing consent and waiver shall not apply and the Firm agrees not to undertake any representation in a controversy or litigation between City and any other client of the Firm, unless otherwise consented to in writing by the City.

FEES AND PAYMENT OF COSTS AND EXPENSES

The City will be responsible for payment of our flat fee of $24,500. Based upon: (i) our current understanding of the terms, structure, size and schedule of the financing represented by the Bonds; (ii) the duties we will undertake pursuant to this engagement letter; (iii) the time we anticipate devoting to the financing in connection therewith; and (iv) the responsibilities we will assume. Our fee may vary: (a) if the principal amount of Bonds actually issued differs significantly from the amount stated above; (b) if material changes in the structure or schedule of the financing occur; or (c) if unusual or unforeseen circumstances arise which require a significant increase in our time or responsibility. If, at any time, we believe that circumstances require an adjustment of our original fee estimate, we will advise you.

In addition to our proposed fees, we will be reimbursed for all client charges made or incurred in connection with the Bond issue. Such costs generally include travel costs, photocopying, document printing, deliveries, long distance telephone and conference call charges, telecopier charges, filing fees, computer-assisted research, transcript preparation and other expenses. Our fee is usually paid at the Closing, and we customarily do not submit any statement until the Closing unless there is a substantial delay in completing the financing. Detailed supporting documentation is available upon request for statement billings.

If the financing is not consummated, we understand and agree that we will not be paid our proposed fee; however, we expect that all out-of-pocket expenses are subject to reimbursement.

This letter is being sent to you electronically (.pdf file). If the foregoing is acceptable, please sign and email a copy to me at jherring@bmolaw.com. We look forward to working with you on successful financing transactions.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the Interim City Manager to select Greenspoon Marder, P.A. to provide bond counsel services for the City's debt financing.

Staff Summary:

Debt financing is recommended as the most appropriate way to meet certain City requirements in the next two years; however, this will require a Bond Counsel. Staff recommends that the City Commission authorize the Interim City Manager to select Greenspoon Marder, P.A. to provide Bond Counsel services for debt financing to meet these City requirements.

DocuSign Envelope ID: 9FCB829A-E322-4AFB-961B-136EA5E97E19

History: The Municipal Complex at 780 Fisherman Street is currently provided air conditioning services by multiple small AC roof units that are at the end of their useful lives and are characterized by repeated failures, adversely impacting operations and incurring costly repairs. A more consolidated central system will provide operating efficiencies and improved environmental performance, greatly improved reliability and a significant reduction in repair costs.

The Municipal Complex was financed by the City National Bank in 2015. As of January 1, 2024, there will be a balance outstanding on this Note of $3,744,876. As of June 1, 2025, a final payment (balloon payment) of $3,229,070 will be due. A payment of this amount in FY 25 would adversely impact ongoing operations, making the refinancing of this debt appropriate to avoid this balloon payment.

Ingram Park requires investment to make it one of the premier parks in South Florida. Staff is developing tentative plans to accomplish this objective.

Current Activity: Staff has determined on a very preliminary basis an estimated cost of $1.5 million to fully upgrade the Municipal Complex air conditioning system. Staff estimates that in total a $6.0 million bond would be appropriate with the proceeds to be used as follows:

1. Refinance the current FY 2015 Note financing the Municipal Complex
2. New Municipal Complex air conditioning system
3. Ingram Park improvements

As noted, part of the process of issuing bonds requires engagement of a Bond Counsel. In accordance with the City's Code of Ordinances, Section 2-317 (4) b., legal services are exempt from the requirement for formal competitive bidding.

Financial Impact**:** Bond Counsel issuing fees typically range from $15,000 to $100,000 depending on the complexity. The proposed bond issuance isn't deemed to be very complicated, and the cost is estimated to be at the lower end of this range. This fee will be charged to the Non-Department Professional Services Account (19-519312) with an initial FY 24 budget of $580,000.

Proposed Action:

Staff recommends the City Commission authorize the Interim City Manager to select Greenspoon Marder, P.A. to provide Bond Counsel services for the City's proposed debt financing and provide his recommendation to the City Commission for approval if the total Bond Counsel fee will exceed $25,000.

Re: City of Opa Locka Capital Improvement Revenue and Revenue Refunding Notes (the "Notes")

Dear Mr. Williams:

Thank you for your consideration of this firm as bond counsel to the City of Opa Locka (the "City") in connection with the City's issuance of the Notes to finance the costs of infrastructure improvements in the City and the refunding of the City's Capital Improvement Note, Series 2014 (collectively, the "Project"). It is our understanding that the Notes will be secured by one or more sources of the City's legally available non ad valorem revenues. This letter will set forth the basis on which we are prepared to render legal services to the City.

In our capacity as bond counsel, our primary responsibility will be to render an objective legal opinion with respect to the authorization and closing of the Notes. As bond counsel, we will examine applicable law, prepare the appropriate documents authorizing and securing the Notes and other necessary documents, consult with the parties to the transaction prior to the closing of the Notes, review certified proceedings, and undertake such additional duties as we deem necessary to render the opinion.

Assuming completion of the proceedings to our satisfaction, we will render our opinion, subject to customary assumptions and limitations, to the City and the lender of the Loan (the "Lender") to the effect that (a) the resolution authorizing the Notes, any loan agreement between the City and the Lender, and the Notes are valid and binding obligations of the City, enforceable against the City in accordance with their respective terms, and (b) the interest paid on the Notes will be excluded from gross income for federal income tax purposes.

Our opinion of bond counsel will be executed and delivered on the date the Notes are closed and will be based on facts and laws existing as of their date. Upon delivery of such opinions, our responsibilities as bond counsel will be concluded with respect to the Notes.

In rendering our opinion as bond counsel, we will rely upon the certified proceedings and other certifications of public officials and other persons furnished to us without undertaking to verify the same by independent investigation. We will also rely on the opinion of the City Attorney with respect to certain matters relating to the due and valid existence of the City, and its due enactment or adoption of the resolution authorizing the City to issue the Notes. We do not review the financial condition of the City, the feasibility of the Project, or the adequacy of the security provided to the purchasers of the Notes and will express no opinion relating thereto. We also do not prepare a request for proposals or similar document for the City to utilize to select a purchaser for the Notes.

I will be the primary attorney in the firm providing your representation. I will involve other attorneys in the firm to the extent necessary to provide you with proper representation.

In performing services as bond counsel, our client will be the City and we will represent its interests. We assume that other parties to the transaction will retain such counsel as they deem necessary and appropriate to represent their interests in this transaction. Our representation of the City does not alter our responsibility to render an objective opinion of bond counsel.

We invite you to discuss freely with us any questions you may have concerning our understanding relative to fees generally, or to particular fees charged for any particular matter. We wish for our clients to be satisfied with both the quality of our legal services and the reasonableness of the fees we charge for those services. We have found that an engagement letter such as this, which confirms the general scope of the representation and outlines the fee and cost arrangement, assists both the lawyer and the client in dealing with the business side of their relationship, while preserving a good working relationship with respect to the representation of the client.

In connection with the foregoing, we will charge our time at an hourly rate of $460, billed monthly. Said hourly fees will be credited against a flat fee of $30,000, due at closing. The $460 per hour is a 20% discount off of my standard hourly rate. This assumes that the Notes will be privately placed with a lending institution without the use of an offering document. We reserve the right to adjust our fee in the event of a substantial change in (i) the size of the financing, (ii) the structure of the financing, (iii) the schedule of the financing; and (iv) the occurrence of unusual or unforeseen circumstances which require a significant increase in our time or responsibility. In

addition to our fee, we will expect to be reimbursed for all out-of-pocket expenses, including travel costs (exclusive of travel to and from our offices to the City), photocopying, deliveries, long distance telephone charges, filing fees, and other necessary office disbursements. We estimate that such out-of-pocket expenses will not exceed $1,000.

If, for any reason, the Notes do not close, we will not expect to receive compensation from the City in excess of time billed at an hourly rate, other than reimbursement of our actual out-of-pocket costs. In the event the Notes close, our fees for services rendered will be paid at the closing of the Notes, out of Note proceeds.

We have agreed to commence work without a retainer. We reserve the right to require a retainer at any time if, in our sole judgment, that is warranted.

As a matter of professional responsibility, we are required to preserve the confidences and secrets of our client. This professional obligation and the legal privilege for attorney-client communications exist to encourage candid and complete communication between a client and his attorney. We can perform truly beneficial services for you only if we are aware of all information that may be relevant to our representation. Consequently, we trust that our attorney-client relationship with you will be based on mutual confidence and unrestricted communication. Your cooperation is very important. Please keep us informed immediately of any change in contact information and provide full disclosure of all facts to enable us to properly represent you.

You hereby acknowledge that neither our firm nor its representatives have made any guarantees whatsoever regarding the disposition or outcome of any matter for which we have been retained, as all expressions relative thereto are only our opinions. It is expressly understood that either party to this engagement letter may terminate this relationship at any time for any reason, including conflicts of interest that may arise during representation. Any party so terminating shall notify the other party in writing that they are terminating this agreement.

We look forward to working with you. Please let us know if you have any questions.

Sincerely,

GREENSPOON MARDER LLP

By: 

Morris G. (Skip) Miller

We engage Greenspoon Marder LLP as bond counsel to the City of Opa Locka in accordance with the provisions of this letter.

Short Title:

A Resolution of the City Commission to approve an Engagement Letter for Bond Counsel Services with Greenspoon Marder, P.A. and authorize the City Manager and Finance Director to execute the Engagement Letter in connection with Series 2013 Bonds.

Staff Summary:

The City of Opa-locka desires to issue Series 2013 Bonds to finance the acquisition of properties in the City for construction, installation and equipping of a new administration building and related facilities on the site.

Greenspoon Marder, P.A. has submitted to the City an Engagement Letter to provide Bond Counsel Services to the City in connection with Series 2013 Bonds for financing the facilities.

Greenspoon Marder, P.A., in their capacity as bond counsel, will primarily be responsible for rendering an objective legal opinion with respect to the authorization and issuance of the Bonds. As bond counsel, they will examine applicable law, prepare the appropriate resolutions and other documents authorizing and securing the Bonds and other necessary documents, including closing documents and certificates, consult with the parties to the transaction prior to the issuance of the bonds, review certified proceedings, and undertake such additional duties as deem necessary to render the opinion.

Assuming completion of the proceedings to their satisfaction, they will render an opinion, subject to customary assumptions and limitations, that:

(i) The City resolution relating to the issuance of the Bonds has been duly adopted by the City and creates a valid pledge of the City's Public Service Tax and Communication Services Tax revenues and constitutes a valid and binding obligation of the City enforceable against the City in accordance with its terms;

(ii) The issuance and sale of the Bonds has been authorized by the City and upon proper execution and authentication, the bonds constitute valid and binding obligations of the City payable in accordance with the terms of the related resolution;

(iii) The interest paid on the Bonds will be excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of the federal alternative minimum tax imposed upon individuals and corporations.

Greenspoon Marder's opinion as bond counsel will be executed and delivered on the date the Bonds are exchanged for their purchase price and will be based on facts and laws existing as of its date. Upon delivery of such opinion, their responsibilities as bond counsel will be concluded with respect to the Bonds.

Specifically, but without limitation, Greenspoon Marder, P.A. will not undertake (unless separately engaged) to provide continuing advice to the City or any other party concerning any actions necessary to assure that interest paid on the Bonds will continue to be excluded from gross income for federal income tax purposes.

In rendering their opinion as bond counsel, Greenspoon Marder, P.A. will rely upon the certified proceedings and other certifications of public officials and other persons furnished to them without undertaking to verify the same by independent investigations. Greenspoon Marder, P.A. will not review the financial condition of the City, the feasibility of any project to be financed by proceeds of the Bonds, or the adequacy of the security provided to owners thereof and will express no opinion relating thereto.

In performing services as bond counsel, their clients will be the City and they will represent its interests. Greenspoon Marder, P.A. will assume that other parties to the transaction will retain such counsel as they deem necessary and appropriate to represent their interests in any transaction. Greenspoon Marder, P.A.'s representation of the City does not alter their responsibility to render an objective opinion as bond counsel.

Proposed Action:

Staff recommends approval.

RE: **A Resolution of the City Commission to approve an Engagement Letter for Bond Counsel Services with Greenspoon Marder, P.A. and authorize the City Manager and Finance Director to execute the Engagement Letter, in connection with Series 2013 Bonds.**

Request:

A Resolution of the City of Opa-locka approving an Engagement Letter for Bond Counsel Services with Greenspoon Marder, P.A. ; and providing an effective date.

Description:

The City of Opa-locka desires to issue Series 2013 Bonds to finance the acquisition of properties in the City for construction, installation and equipping of a new administration building and related facilities on the site.
Greenspoon Marder, P.A. has submitted to the City an Engagement Letter to provide bond counsel services to the City in connection with Series 2013 Bonds for financing the facilities.

Greenpoon Marder, P.A., in their capacity as bond counsel, will primarily be responsible for rendering an objective legal opinion with respect to the authorization and issuance of the Bonds.

As bond counsel, they will examine applicable law, prepare the appropriate resolutions and other documents authorizing and securing the Bonds and
other necessary documents, including closing documents and certificates, consult with the parties to the transaction prior to the issuance of the bonds, review certified proceedings, and undertake such additional duties as we deem necessary to render the opinion.

Assuming completion of the proceedings to their satisfaction, they will render an opinion, subject to customary assumptions and limitations, that:

(i) The City resolution relating to the issuance of the Bonds has been duly adopted by the City and creates a valid pledge of the City's Public Service Tax and Communication Services Tax revenues and constitutes a valid and binding obligation of the City enforceable against the City in accordance with its terms;

(ii) The issuance and sale of the Bonds has been authorized by the City and upon proper execution and authentication, the bonds constitute valid and binding obligations of the City payable in accordance with the terms of the related resolution;

(iii) The interest paid on the Bonds will be excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of the federal alternative minimum tax imposed upon individuals and corporations.

Greenspoon Marder's opinion as bond counsel will be executed and delivered on the date the Bonds are exchanged for their purchase price and will be based on facts and laws existing as of its date. Upon delivery of such opinion, their responsibilities as bond counsel will be concluded with respect to the Bonds.

Specifically, but without limitation, Greenspoon Marder, P.A will not undertake (unless separately engaged) to provide continuing advice to the City or any other party concerning any actions necessary to assure that interest paid on the Bonds will continue to be excluded from gross income for federal income tax purposes

In rendering their opinions as bond counsel, Greenspoon Marder, P.A. will rely upon the certified proceedings and other certifications of public officials and other persons furnished to them without undertaking to verify the same by independent investigation. Greenspoon Marder, P.A. will not review the financial condition of the City, the feasibility of any project to be financed by proceeds of the Bonds, or the adequacy of the security provided to owners thereof and will express no opinion relating thereto.

In performing services as bond counsel, their clients will be the City and they will represent its interests. Greenspoon Marder, P.A. will assume that other parties to the transaction will retain such counsel as they deem necessary and appropriate to represent their interests in any transaction. Greenspoon Marder, P.A.'s representation of the City does not alter their responsibility to render an objective opinion as bond counsel.

VIA E-MAIL
Kelvin Baker, City Manager
City of Opa-locka, Florida
3400 NW 135th Street
Building B
Opa-locka, FL 32907

Re: City of Opa-Locka, Florida Revenue Bonds, Series 2013(the "Bonds")

Dear Mr. Baker:

This will confirm the acknowledgement by the City of Opa-Locka, Florida (the "City") of the retention of this firm to serve as bond counsel in connection with the proposed issuance of the above referenced Bonds. Assuming the Bonds are issued and purchased by a single institutional purchaser in a negotiated private placement, we would charge a fixed bond counsel fee of $40,000, payable from legally available funds of the City and/or proceeds of the Bonds. We would expect that the bond counsel fees will be paid at the time of the successful closing and delivery of the Bonds. Notwithstanding the foregoing, if the Bonds are not issued for any reason on or before December 31, 2013, we would expect to receive payment of the fees actually incurred in connection with the Bonds by this firm and our special tax counsel, McCarter and English, P.A. These fees are in addition to our actual out of pocket expenses incurred in rendering bond counsel services to the City in connection with the Bonds, which we would not expect to exceed $750.

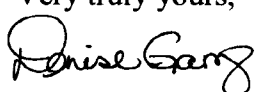
In our capacity as bond counsel, our primary responsibility will be to render an objective legal opinion with respect to the authorization and issuance of the Bonds. As bond counsel, we will examine applicable law, prepare the appropriate resolutions and other documents authorizing and securing the Bonds and other necessary documents, including closing documents and certificates, consult with the parties to the transaction prior to the issuance of the bonds, review certified proceedings, and undertake such additional duties as we deem necessary to render the opinion.

Assuming completion of the proceedings to our satisfaction, we will render our opinion, subject to customary assumptions and limitations, that:

(i) The City resolution relating to the issuance of the Bonds has been duly adopted by the City and creates a valid pledge of the City's Public Service Tax and Communication Services Tax revenues and constitutes a valid and binding obligation of the City enforceable against the City in accordance with its terms;

(ii) The issuance and sale of the Bonds has been authorized by the City and upon proper execution and authentication, the bonds constitute valid and binding obligations of the City payable in accordance with the terms of the related resolution;

(iii) The interest paid on the Bonds will be excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of the federal alternative minimum tax imposed upon individuals and corporations.



Our opinion as bond counsel will be executed and delivered on the date the Bonds are exchanged for their purchase price and will be based on facts and laws existing as of its date. Upon delivery of such opinion, our responsibilities as bond counsel will be concluded with respect to the Bonds. Specifically, but without limitation, we do not undertake (unless separately engaged) to provide continuing advice to the City, the City or any other party concerning any actions necessary to assure that interest paid on the Bonds will continue to be excluded from gross income for federal income tax purposes

In rendering our opinions as bond counsel we will rely upon the certified proceedings and other certifications of public officials and other persons furnished to us without undertaking to verify the same by independent investigation. We do not review the financial condition of the City, the feasibility of any project to be financed by proceeds of the Bonds, or the adequacy of the security provided to owners thereof and will express no opinion relating thereto.

In performing services as bond counsel, our clients will be the City and we will represent its interests. We assume that other parties to the transaction will retain such counsel as they deem necessary and appropriate to represent their interests in any transaction. Our representation of the City does not alter our responsibility to render an objective opinion as bond counsel.

Please acknowledge the foregoing in the space provided below for that purpose. We appreciate the opportunity to be of assistance to the City.

Very truly yours,

Denise J. Ganz

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the Interim City Manager to procure a new passenger bus to accommodate the City's Seniors Program.

Staff Summary:

The City has a large and active Senior Citizen population. The Seniors Program provides transportation services for the senior community to various locations and activities within and around City limits. It is essential that the City can accommodate the residents with safe and reliable transportation. It is in the best interest of the City for the Interim City Manager to take all necessary steps to procure a new bus for the Seniors Program.

DocuSign Envelope ID: 98BDDB0A-F615-4E93-B07C-D6E9565EF481

Financial Impact: The FY 24 Budget includes $150,000 for a possible Seniors Bus with the intent to seek its funding through a potential grant. To date, an appropriate grant hasn't been identified, which will require an alternate source of General Fund funding. The FY 24 General Fund budget is very tight with all available General Fund funding appropriated for various uses. As the year progresses, savings from planned uses may appear which can be used for unanticipated requirements such as this. However, so far this year, these savings have been minimal and have been used to fund other unanticipated requirements. In the absence of the recognition of any meaningful savings currently available to fund this significant expenditure, staff recommends the use of Contingency to fund this item.

Procurement of a passenger bus involves sorting through literally hundreds of options to identify the combination of options best suited to meet the City's needs. This hasn't been done yet due to the extremely limited time available since the request for this item was received. Staff will have to first develop the bus specifications best satisfying City needs. Then either an RFP will be issued or an existing contract suitable for piggyback purposes will be identified. If an RFP is required, this could add up to two months to the process. At such time that the appropriate vehicle has been identified, staff will return to the Commission for authorization to proceed with the procurement and to inform the Commission as to the budget amendment that will be necessary for its funding.

From a very preliminary review of different types of buses and their features, the price could vary from $125,000 to over $200,000 depending on the configuration best meeting City needs. As noted, currently the use of Contingency appears to be the only source of funding immediately available for a procurement of this magnitude.

Proposed Action:

Staff recommends the City Commission approves legislation authorizing the Interim City Manager to develop the configuration of a bus best meeting the needs of the City's Seniors program and then either issue an RFP or identify another agency's competitively-bid bus contract suitable for piggyback purposes, and then return within 90-days for Commission authorization to proceed.

RESOLUTION 2024-__

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPOINTING MEMBERS TO THE CHARTER REVIEW BOARD; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, City of Opa-Locka Ordinance 2021-14 requires the appointment of members to the City's Charter Review Board for a term of (1) one year from the date of appointment; and

WHEREAS, the work of the last board has completed and the City Commission of the City of Opa-Locka ("City Commission") desires to appoint new members to the Charter Review Board to review any potential Charter changes that may be brought before the City Commission prior to the next election; and

WHEREAS, the Charter Review Board shall consist of (5) resident electors of the City of Opa-Locka appointed by the City Commission (each appointed by one member of the city commission) and two (2) advisory (non-voting) members by a majority vote of the city commission; and

WHEREAS, each board member shall also be a qualified elector of the city with an outstanding reputation for civic pride, interest, integrity, responsibility and business or professional ability; and

WHEREAS, the Charter Review Board may provide recommendations to the City Commission regarding amendments and revisions to the Charter, which may be advisable for placement on the election ballot; and

WHEREAS, the responsibilities of the Charter Review Board shall be consistent with Ordinance 2021-14; and

WHEREAS, this resolution is intended to accomplish the appointment of one person to be selected by each City Commissioner and the appointment of two advisory non-voting members to be selected by the full commission – all appointed during a commission meeting; and

WHEREAS, the City Commission finds that appointment of members to the Charter Review Board is in the best interests of the City of Opa-Locka.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA:

=

Section 1. Adoption of Representations. The foregoing "Whereas" clauses are hereby true and correct and incorporated by reference.

Section 2. Appointment of Members. The City Commission hereby appoints the following members to the Charter Review Board:

(1) _____(Appointed by Mayor Taylor)
(2) _____(Appointed by Vice-Mayor Ervin)
(3) _____(Appointed by Commissioner Bass)
(4) _____(Appointed by Commissioner Kelley)
(5) _____(Appointed by Commissioner Williams)
(6) _____(Full Commission non-voting member)
(7) _____(Full Commission non-voting member)

Section 3. Effective Date**.** This Resolution shall be effective immediately upon its passage and adoption.

ORDINANCE NO. 2021-14

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, ESTABLISHING A CHARTER REVIEW BOARD FOR THE CITY OF OPA-LOCKA, FLORIDA; PROVIDING FOR METHOD OF APPOINTMENT AND COMPOSITION OF THE BOARD; ESTABLISHING MEMBERSHIP, TERM, DUTIES AND RESPONSIBILITIES OF THE BOARD; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR CONFLICT AND REPEALER; PROVIDING FOR CODIFICATION AND SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Opa-Locka ("City"), by vote of the citizens, adopted a new Charter on November 6, 2012; and

WHEREAS, pursuant to Article III, Section 3.9 of the City Charter "All City boards or agencies existing prior to the adoption of this charter shall be de-authorized subject to reauthorization under the provisions of this charter. The Commission shall establish or terminate such boards and agencies as it may deem advisable from time to time. The boards and agencies shall report to the Commission"; and

WHEREAS, the City of Opa-Locka desires to create a Charter Review Board to review its Charter and propose any amendments or revisions that may be advisable for placement on the ballot.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, THAT:

Section 1: The recitals to the preamble herein are incorporated by reference.

Section 2: Creation of a Charter Review Board. The City Commission of the City of Opa-Locka hereby creates an advisory board to the Commission to be known as the Charter Review Board ("Charter Review Board").

Section 3: Membership, Term, Duties and Responsibilities.

A. Membership. The Charter Review Board shall consist of five (5) resident electors (each appointed by one member of the city commission) and two (2) advisory (non-voting) members appointed by a majority vote of the City Commission. Each Board member so appointed shall be a qualified elector of the city with an outstanding reputation for civic pride, interest, integrity, responsibility and business or professional ability. Advisory Board Members may reside outside of the City.

B. Term. Upon City Commission appointment, the term of each individual member to the Charter Review Board shall commence. Each member so appointed shall be appointed for a term of (1) one year from the date of appointment. The Charter Review Board shall provide its Report and Recommendations to the City Clerk. Any recommended Charter changes shall be prepared for consideration by the City Commission.

C. Duties. The Charter Review Board may provide recommendations to the City Commission regarding amendments and revisions to the Charter, which may be advisable for placement on the election ballot.

D. Responsibilities.

1. The Charter Review Board shall have an organization meeting. The Charter Review Board shall elect a Chair and a Vice Chair from among its membership. The meetings shall be held on the call of the Chair or a majority of its members at a noticed meeting. All meetings shall be open to the public and held in the City Commission Chambers. A majority of members shall constitute a quorum to do business.
2. Notice of all meetings shall be posted at least 48 hours in advance in City Hall and on the City's Website. The City shall provide a written record of each meeting through summary minutes.
3. The meetings shall be conducted governed by Robert's Rules of Order.
4. The Charter Review Board shall make recommendations to the City Commission. No amendments or revisions to the Opa-Locka Charter shall be submitted to the City Commission for consideration unless favorably voted upon by an affirmative vote of a majority of the Board members.

   (a) Any elector of the city who in good faith believes that an amendment should be made to the Charter of the city shall indicate his or her recommendation in writing and shall file the same with the clerk of the city who shall forward a copy of same to each of the members of the charter board and at the next regularly scheduled public meeting of the board, said elector shall be heard and may give evidence concerning his recommendations. The board shall also hear the recommendations of the city commission, the city attorney, the city manager and the city clerk, when presented.

   (b) The board shall make all recommendations to the city commission as to revisions to the Charter within one hundred twenty (120) days from passage of said recommendations.

5. The members shall serve without compensation but sufficient funds shall be provided by the city commission in the annual budget for reasonable

and necessary expenses to be incurred by the board in performance of its duties. The city manager shall provide such administrative and clerical staff as may be necessary in the proper performance of its duties.

Section 4: Effective Date. This Ordinance shall become effective immediately upon adoption.

PASSED FIRST READING this 13th day of October, 2021.

PASSED SECOND READING this 10th day of November, 2021.

Miami-Dade County elected officials, including Miami-Dade Mayor Daniella Levine Cava, and MDFR personnel along with their families get ready to participate in the annual Making Strides Against Breast Cancer Walk.

MIAMI-DADE COUNTY | AMERICAN CANCER SOCIETY

Making strides against breast cancer

Every October, Miami-Dade County comes together to raise awareness about breast cancer. Since 2007, the county, in partnership with the American Cancer Society, has raised over $2.5 million for breast cancer research. Miami-Dade Fire Rescue has been a part of the drive to help provide information, treatment and support for women with breast cancer. On Saturday, Oct. 23, Fire Chief Alan Cominsky, along with a delegation of sworn and non-sworn personnel, gathered at loanDepot Park to join Miami-Dade County Mayor Daniella Levine-Cava, members of the Board of County Commissioners, and thousands of Miami-Dade residents for the annual Making Strides Against Breast Cancer Walk.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, TERMINATING INTERIM CITY MANAGER DARVIN WILLIAMS; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE

WHEREAS, at a Special City Commission Meeting held on April 5, 2022, the City Commission of the City of Opa-Locka, Florida ("City Commission") voted to appoint Darvin Williams as Interim City Manager to serve for a term not to exceed nine (9) months starting on April 5, 2022, and requiring a national search for the appointment of a permanent City Manager; and

WHEREAS, the City Commission desires to immediately terminate Darvin Williams as Interim City Manager at its City Commission meeting of January 10, 2024, and appoint _____ as the Interim City Manager for a temporary period starting 12:01 AM on January 11, 2024, at a salary compensation of $_____; and

WHEREAS the City Commission is currently engaged in a national search for a permanent City Manager and the passage of this Resolution contemplates that the Interim City Manager shall serve until a national search is completed and a permanent City Manager is selected; and

WHEREAS, the newly appointed Interim City Manager shall have the power to approve purchase orders, execute agreements, sign bank checks and perform all other functions allowable for a City Manager pursuant to City's existing financial policies and code of ordinances; and

WHEREAS, the City Commission finds that it is in the best interests of the City of Opa-Locka to immediately terminate Darvin Williams, who shall be disallowed, barred and otherwise prohibited from further access to the City's computer systems and signing authority of any kind. Further, Darvin Williams shall return, without delay, any and all property belonging to the City of Opa-Locka.

NOW THEREFORE, BE IT RESOLVED THAT THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. Recitals. The recitals to the preamble herein are incorporated by reference.

Section 2. Termination of Interim City Manager Darvin Williams and Appointment of New Interim City Manager. The City Commission of the City of Opa-Locka hereby terminates Darvin Williams as Interim City Manager. Darvin Williams shall be disallowed, barred, and otherwise prohibited from further access to the City's computer systems and signing authority of any kind. Darvin Williams shall return, without delay, any and all property belonging to the City of Opa-Locka. The City Commission hereby appoints _____ as the new Interim City Manager, for a temporary period starting 12:01 AM on January 11, 2024.

Section 3. Scrivener's Errors. Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Attorney or designee, without need of public hearing by filing a corrected copy of the same with the City Clerk.

Section 4. Effective Date. This Resolution shall take effect immediately upon passage.

PASSED AND ADOPTED this _____ day of _____, 2024.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the termination of employment of the Interim City Manager, Darvin Williams.

Staff Summary:

It has been proposed to terminate the employment of Darvin Williams as the Interim City Manager of the City of Opa-locka. The City Charter, Section 3.2 indicates "The City Manager may be removed by a majority vote of the Commission provided that at least three affirmative votes shall be required for removal."

Financial Impact – Interim City Manager Williams doesn't have an Employment Agreement with the City and there is no contractual basis for a determination of a financial impact. The City's Employee Handbook is silent in regard to any financial considerations regarding termination of employment.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the Interim City Manager to issue an RFP for citywide Public Relations Services.

Staff Summary:

On December 13th, 2023, the City Commission voted to terminate the City's contract with Roar Media for Public Relations and Marketing services. The City is now seeking a professional full-time firm to render these services. The firm will be expected to provide a comprehensive and innovative plan that increases awareness and informs the community and/or stakeholders of the City's mission, initiatives, projects, goals and programs. The firm must also demonstrate expertise and remain proactive in identifying and responding to any potential issue that may affect the City. The Interim City Manager shall be authorized to issue an RFP for citywide Public Relations Services to include the Scope of Services.

DocuSign Envelope ID: 9A50998D-B653-44BF-941C-1D20E4DA6FAB

Financial Impact: In addition to the electronic distribution of this RFP, staff may choose to advertise in publications to ensure broad awareness of this request for bids for an expenditure not to exceed $3,000. This advertising will be charged to Non-department Other Advertising (19-515491) which currently has $13,059 available.

Proposed Action:

Staff recommends the City Commission approves legislation authorizing the Interim City Manager to issue an RFP for citywide Public Relations Services.

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING ISSUANCE OF A REQUEST FOR PROPOSALS ("RFP") FOR QUALIFIED FINANCIAL INSTITUTIONS TO OFFER FINANCING TERMS FOR THE REFINANCING OF CERTAIN CURRENT CITY DEBT AND CERTAIN CAPITAL PROJECTS IN AN RFP FORM TO BE APPROVED BY THE CITY ATTORNEY PRIOR TO ISSUANCE; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE

WHEREAS, debt financing is recommended by the Interim City Manager as the most appropriate way to meet certain City of Opa-Locka ("City") financial obligations within the next two years; and

WHEREAS, the Interim City Manager recommends that the City Commission authorize the issuance of a Request For Proposal (RFP) for financial institutions to provide debt financing to meet these City requirements; and

WHEREAS, the RFP form shall be prepared by city management, but shall be submitted to the City Attorney for review, comments and approval prior to RFP issuance; and

WHEREAS, the City has determined that authorizing the issuance of an RFP for said services is in the best interest of the City and its residents. The City Commission further authorizes the spending of up to Three Thousand Dollars ($3,000.00) for advertising purposes, if deemed appropriate.

NOW, THEREFORE, BE IT DULY RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA:

Section 1. Adoption of Representations. The above recitals are true and correct and are incorporated into this Resolution by reference.

Section 2. Approval of Issuance of RFP for Capital Projects Refinancing. The City Commission of the City of Opa-Locka hereby approves the issuance of a Request For Proposal (RFP) for qualified financial institutions to offer financing terms for the refinancing of certain current City debt and for certain capital projects, in an RFP form to be approved by the City

Attorney prior to RFP issuance. The City Commission further authorizes the spending of up to Three Thousand Dollars ($3,000.00) for advertising purposes, if deemed appropriate.

Section 3. Scrivener's Errors.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors, which do not affect the intent of this Resolution may be authorized by the Interim City Manager, following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

A resolution of the City Commission of the City of Opa-locka authorizing the Interim City Manager to issue a Request For Proposals (RFP) for qualified banking institutions to offer bond financing terms for the replacement of the City's A/C Chiller at the Municipal Complex.

Staff Summary:

The multiple old AC roof units that serves the Municipal Complex have remained in a malfunctioning state for an extended period and may completely fail at any given time. Without an efficient and reliable air conditioning system, daily City operations may be hindered. The City is investigating a centralized roof AC chiller system with an initial estimated cost of $1.5 million, which will require bond financing. The Interim City Manager is

DocuSign Envelope ID: 44E310E3-6440-45BB-A425-14E83AE2E355

seeking approval to issue a Request For Proposal (RFP) for qualified banking institutions to offer bond financing terms to replace the current old AC roof units located at the Municipal Complex

Financial Impact:

Proposed Action:

Staff recommends the City Commission authorize the Interim City Manager to issue a Request For Proposal (RFP) for qualified banking institutions to offer bond financing terms to replace the antiquated A/C roof units currently servicing the Municipal Complex with a centralized AC chiller unit.

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THREE BIDS FOR COMMUNITY ENGAGEMENT SERVICES IN CONNECTION WITH EDUCATING THE PUBLIC ON THE NEED TO REFINANCE A BOND FOR CERTAIN INGRAM PARK IMPROVEMENTS AND FOR AIR CONDITIONING CHILLER REPAIR SERVICES AT THE CITY'S MUNICIPAL COMPLEX; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, it is important that residents remain informed about the City of Opa-Locka's financial health, especially when it pertains to the issuance of revenue bonds; and

WHEREAS, the Interim City Manager recommends that the City Commission finance the cost of infrastructure improvements at Ingram Park and the installation of a new air-conditioning system through refinancing of the current 2015 Note that financed the Municipal Complex; and

WHEREAS, the City Commission desires that the City conduct community engagement so that the public is educated on the need to refinance a bond for certain improvements to Ingram Park and for air conditioning chiller repair services at the City's Municipal Complex; and

WHEREAS, the Interim City Manager recommends that the City Commission authorizes three bids for engagement services to inform the community of the need to refinance a bond and for certain improvements at Ingram Park, as well air conditioning chiller repair services at the City's Municipal Complex; and

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interest of the City and its residents to authorize the Interim City Manager to seek three bids for engagement services to inform the community of the need to refinance a bond for Ingram Park improvements, as well for air conditioning chiller repair services at the City's Municipal Complex.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

SECTION 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

SECTION 2. AUTHORIZATION

The City Commission of the City of Opa-Locka hereby authorizes the Interim City Manager to seek three bids for community engagement services in connection with educating the public on the need to refinance a bond for certain Ingram Park improvements and for air conditioning chiller repair services at the City's Municipal Complex.

SECTION 3. SCRIVENER'S ERRORS.

Short Title:

A resolution of the City Commission of the City of Opa-locka authorizing the Interim City Manager to seek three bids for engagement services to inform the community of the refinancing of the bond and its use for the redevelopment of Ingram Park and for the repair of air conditioning chiller services at the city's Municipal Complex.

Staff Summary:

It is important that residents remain informed of the City's financial health, especially when it includes the issuance of revenue bonds. As the City seeks to finance the cost of infrastructure improvements such as Ingram Park, the installation of a new air-conditioning system and to refinance the current 2015 Note financing the Municipal Complex, it imperative to engage the community. The Interim City Manager shall seek three bids for engagement services to inform the residents.

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, APPROVING THE SELECTION OF POPULAR BANK AS AN EXEMPTION TO COMPETITIVE PROCUREMENT; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has been dissatisfied with the banking services it has been receiving for a considerable period of time. Staff recommends the selection of Popular Bank to provide banking services; and

WHEREAS, as the result of dissatisfaction with the current banking relationship, the Interim City Manager conducted exploratory discussions with other banks, including Popular Bank and recommends the selection of Popular Bank as an exemption from the City's regular competitive procurement process; and

WHEREAS, Popular Bank is rated with a "BBB" rating which denotes good prospects for ongoing viability; and

WHEREAS, the City's Code of Ordinances, Section 2-318, (4)o states: "The foregoing enumeration of services deemed to be exempt from the competitive procurement requirements is not intended to be an exhaustive or exclusive list. The City Manager, or his designee, may determine if a contractual service must be procured through the competitive procurement process, if not expressly indicated above". In light of the urgency to move forward immediately to begin to secure long-term debt financing, the Interim City Manager recommends that this item be approved under this provision of the Code; and

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interest of the City to select Popular Bank to provide banking services.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

SECTION 1. RECITALS ADOPTED.

The recitals to the preamble herein are incorporated by reference.

SECTION 2. AUTHORIZATION

The City Commission of the City of Opa-Locka authorizes the selection of Popular Bank to provide banking services for the City of Opa-Locka as an exemption to a regular procurement process.

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors, which do not affect the intent of this Resolution may be authorized by the Interim City Manager, following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

SECTION 4. EFFECTIVE DATE
This Resolution shall take effect upon the adoption and is subject to the approval of the Governor or Governor's Designee.

PASSED and **ADOPTED** this _____ day of _____, 2024.

Short Title:

A resolution of the City Commission of the City of Opa-locka approving the selection of Popular Bank to provide the City's banking services.

Staff Summary:

Issue / Recommendation: The City has received banking services from City National Bank for more than a decade and it is staff's opinion that the current bank is not meeting the expectations of management. Staff recommends the selection of Popular Bank to provide banking services for the City.

Current Activity: As a result of dissatisfaction with its current banking relationship, staff has conducted exploratory discussions with other banks, including Popular Bank, that serve South Florida to better understand what might be available. During the course of these discussions, Popular Bank made it extremely

DocuSign Envelope ID: 6131800F-5412-4F5A-95FA-3B39E045C141

clear that they would be interested in having the City as a client and have provided a proposal with very competitive rates for services, significantly increasing interest income to the City for the funds maintained within City accounts

Popular Bank is rated with a "bbb" rating which denotes good prospects for ongoing viability.

Financial Impact: In addition to improved services, the City will now receive in excess of $150,000 per year in interest income on its accounts at the bank. Although the bank is ready and able to assist in the City in arranging long-term debt for its future needs, no specific long-term debt proposal is included in this item.

Proposed Action:

Staff recommends the City Commission authorize the Interim City Manager to enter into an agreement with Popular Bank to provide banking services to the City.

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING EXECUTION FOR THE ENVIRONMENTAL REVIEW EXCEPTION FORM AND OTHER NECESSARY DOCUMENTS RELATED TO THE CANAL PROJECT GRANT REQUEST FOR THE CANAL LOCATED AT NW 127TH STREET; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, on January 28, 2022, Governor Ron DeSantis announced, through the Department of Economic Opportunity, the award to the City of Opa-Locka of seven million dollars ($7,000,000.00) for the complete renovation of the 127th Street Canal within the City, including expanding the depth of the canal and stabilizing the bank on both sides to enhance community flood protection; and

WHEREAS, the City Commission desires to authorize the execution of the Environmental Review Exception Form and any other required documentation related to the canal project grant request for the canal located at NW 127th Street for the City of Opa-Locka and the Department of Economic Development Community Development Block Grant Mitigation Program (CDBG-MIT); and

WHEREAS, the City Commission of the City of Opa-Locka finds that it is in the best interests of the City and its residents to authorize execution of the Environmental Review Exception Form and other necessary documents related to the Canal project grant request for the canal located at NW 127th Street.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

SECTION 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

SECTION 2. AUTHORIZATION
The City Commission of the City of Opa-Locka hereby authorizes the Interim City Manager or appropriate management staff to execute the Environmental Review Exception Form and other necessary documents related to the Canal project grant request for the canal located at NW 127th Street.

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors, which do not affect the intent of this Resolution may be

authorized by the Interim City Manager following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

SECTION 4. EFFECTIVE DATE
This Resolution shall take effect upon the adoption and is subject to the approval of the Governor or Governor's Designee.

State of Florida
Department of Economic Opportunity

Federally Funded
Community Development Block Grant
Mitigation Program (CDBG-MIT)
Subrecipient Agreement

THIS SUBRECIPIENT AGREEMENT is entered into by the State of Florida, Department of Economic Opportunity, (hereinafter referred to as "DEO") and the **City of Opa-Locka** (hereinafter referred to as the "Subrecipient"), each individually a "Party" and collectively "the Parties."

THIS AGREEMENT IS ENTERED INTO BASED ON THE FOLLOWING REPRESENTATIONS:

WHEREAS, pursuant to Public Law (P.L.) P.L. 115-123 Bipartisan Budget Act of 2018 and Additional Supplemental Appropriations for Disaster Relief Act 2018 (approved February 9, 2018), and P.L. 116-20 Supplemental Appropriations for Disaster Relief Requirements Act, 2019 (approved June 6, 2019), Division B, Subdivision 1 of the Bipartisan Budget Act of 2018, P.L. 115-56, the "Continuing Appropriations Act, 2018" ; and the requirements of the Federal Register (FR) notices entitled "Allocations, Common Application, Waivers, and Alternative Requirements for Community Development Block Grant Mitigation Grantees", 84 FR 45838 (August 30, 2019) and "Allocations, Common Application, Waivers, and Alternative Requirements for Community Development Block Grant Disaster Recovery Grantees" (CDBG Mitigation) 86 FR 561 (January 6, 2021);(hereinafter collectively referred to as the "Federal Register Guidance"), the U.S. Department of Housing and Urban Development (hereinafter referred to as "HUD") has awarded Community Development Block Grant–Mitigation (CDBG-MIT) funds to DEO for mitigation activities authorized under Title I of the Housing and Community Development Act of 1974 (HCDA) (42 United States Code (U.S.C.) § 5301 *et seq.*) and applicable implementing regulations at 24 C.F.R. part 570 and consistent with the Appropriations Act.

WHEREAS, CDBG-MIT funds made available for use by the Subrecipient under this Agreement constitute a subaward of the DEO Federal award, the use of which must be in accordance with requirements imposed by Federal statutes, regulations and the terms and conditions of DEO's Federal award.

WHEREAS, the Subrecipient has legal authority to enter into this Agreement and by signing this Agreement, the Subrecipient represents and warrants to DEO that it will comply with all the requirements of the subaward described herein.

WHEREAS, all CDBG-MIT activities carried out by the Subrecipient will: (1) meet the definition of mitigation activities. For the purpose of this funding, mitigation activities are defined as those activities that increase resilience to disasters and reduce or eliminate the long-term risk of loss of life, injury, damage to and loss of property, and suffering and hardship, by lessening the impact of future disasters; (2) address the current and future risks as identified in DEO's Mitigation Needs Assessment of most impacted and distressed area(s); (3) be CDBG-eligible activities under the HCDA or otherwise eligible pursuant to a waiver or alternative requirement; and (4) meet a national objective, including additional criteria for mitigation activities and a Covered Project.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

NOW THEREFORE, DEO and the Subrecipient agree to the following:

(1) SCOPE OF WORK

The Scope of Work for this Agreement includes Attachment A, Project Description and Deliverables. With respect to Attachment B, Project Budget, and Attachment C, Activity Work Plan, the Subrecipient shall submit to DEO such Attachments in conformity with the current examples attached hereto as necessary and appropriate. Provided further, if there is a disagreement between the Parties, with respect to the formatting and contents of such attachments, then DEO's decisions with respect to same shall prevail, at DEO's sole and absolute discretion.

(2) INCORPORATION OF LAWS, RULES, REGULATIONS AND POLICIES

Subrecipient has diligently reviewed this Agreement and is a sophisticated organization having experience managing projects with funds made available through federal grants. Subrecipient is familiar with DEO's grant agreement with HUD, has reviewed applicable CDBG-MIT regulations and guidelines, will conduct, and will ensure its activities are in compliance with DEO's grant agreement with HUD and all applicable CDBG-MIT regulations and guidelines. Subrecipient agrees to abide by all applicable State and Federal laws, rules and regulations as now in effect and as may be amended from time to time, including but not limited to, the Federal laws and regulations set forth in 24 CFR Part 570, applicable Federal Register Notices, the State's Action Plan, and all applicable CDBG-MIT regulations and guidelines.

Subrecipient shall ensure that all its activities under this Contract shall be conducted in conformance with these provisions, as applicable: 45 CFR Part 75, 29 CFR Part 95, 2 CFR Part 200, 20 CFR Part 601, 24 CFR Part 570 subpart I, *et seq.*, and all other applicable federal laws, regulations, and policies governing the funds provided under this Agreement as now in effect and as may be amended from time to time.

(3) PERIOD OF AGREEMENT

This Agreement is effective as of the date DEO executes this Agreement (the "Effective Date") and ends forty-eight (48) months after execution by DEO, unless otherwise terminated as set forth herein.

(4) RENEWAL AND EXTENSION

This Agreement shall not be renewed. DEO shall not grant any extension of this Agreement unless the Subrecipient provides justification satisfactory to DEO in its sole discretion and DEO's Director of the Division of Community Development approves such extension in writing

(5) MODIFICATION OF AGREEMENT

Modifications to this Agreement shall be valid only when executed in writing by the Parties. Any modification request by the Subrecipient constitutes a request to negotiate the terms of this Agreement. DEO may accept or reject any proposed modification based on DEO's sole determination and absolute discretion, that any such acceptance or rejection is in the State's best interest.

(6) RECORDS

(a) The Subrecipient's performance under this Agreement shall be subject to 2 CFR part 200 – Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards as now in effect and as may be amended from time to time.

(b) Representatives of DEO, the Chief Financial Officer of the State of Florida, the Auditor General of the State of Florida, the Florida Office of Program Policy Analysis and Government Accountability, and representatives of the Federal government and their duly authorized representatives shall have access to any of the Subrecipient's books, documents, papers and records, including electronic storage media, as

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

they may relate to this Agreement, for the purposes of conducting audits or examinations or making excerpts or transcriptions.

(c) The Subrecipient shall maintain books, records, and documents in accordance with generally accepted accounting procedures and practices which sufficiently and properly reflect all expenditures of funds provided by DEO under this Agreement.

(d) The Subrecipient will provide to DEO all necessary and appropriate financial and compliance audits in accordance with Paragraph (7), Audit Requirements and Attachments I and J herein and ensure that all related party transactions are disclosed to the auditor.

(e) The Subrecipient shall retain sufficient records to show its compliance with the terms of this Agreement and the compliance of all subrecipients, contractors, subcontractors and consultants paid from funds under this Agreement for a period of six (6) years from the date DEO issues the final closeout for this award. The Subrecipient shall also comply with the provisions of 24 CFR 570.493 and 24 CFR 570.502(a)(7)(ii). The Subrecipient shall further ensure that audit working papers are available upon request for a period of six (6) years from the date DEO issues the final closeout of this Agreement, unless extended in writing by DEO. The six-year period may be extended for the following reasons:

1. Litigation, claim or audit initiated before the six-year period expires or extends beyond the six-year period, in which case the records shall be retained until all litigation, claims or audit findings involving the records have been resolved.

2. Records for the disposition of non-expendable personal property valued at $1,000 or more at the time of acquisition shall be retained for six (6) years after final disposition.

3. Records relating to real property acquired shall be retained for six (6) years after the closing on the transfer of title.

(f) The Subrecipient shall maintain all records and supporting documentation for the Subrecipient and for all contractors, subcontractors and consultants paid from funds provided under this Agreement, including documentation of all program costs in a form sufficient to determine compliance with the requirements and objectives of the scope of work and all other applicable laws and regulations.

(g) The Subrecipient shall either (i) maintain all funds provided under this Agreement in a separate bank account or (ii) ensure that the Subrecipient's accounting system shall have sufficient internal controls to separately track the expenditure of all funds from this Agreement. Provided further, that the only option available for advanced funds is to maintain such advanced funds in a separate bank account. There shall be no commingling of funds provided under this Agreement with any other funds, projects or programs. DEO may, in its sole discretion, disallow costs made with commingled funds and require reimbursement for such costs as described herein, Subparagraph (22)(e), Repayments.

(h) The Subrecipient, including all of its employees or agents, contractors, subcontractors and consultants to be paid from funds provided under this Agreement, shall allow access to its records at reasonable times to representatives of DEO, the Chief Financial Officer of the State of Florida, the Auditor General of the State of Florida, the Florida Office of Program Policy Analysis and Government Accountability or representatives of the Federal government or their duly authorized representatives. "Reasonable" shall ordinarily mean during normal business hours of 8:00 a.m. to 5:00 p.m., local time, Monday through Friday.

(7) AUDIT REQUIREMENTS

(a) The Subrecipient shall conduct a single or program-specific audit in accordance with the provisions of 2 CFR part 200 if it expends seven hundred fifty thousand dollars ($750,000) or more in Federal awards from all sources during its fiscal year.

(b) Within sixty (60) calendar days of the close of Subrecipient's fiscal year, on an annual basis, the Subrecipient shall electronically submit a completed Audit Compliance Certification to audit@deo.myflorida.com, and DEO's grant manager; a blank version of which is attached hereto as Attachment J . The Subrecipient's timely submittal of one completed Audit Compliance Certification for

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

each applicable fiscal year will fulfill this requirement within all agreements (e.g., contracts, grants, memorandums of understanding, memorandums of agreement, economic incentive award agreements, etc.) between DEO and the Subrecipient.

(c) In addition to the submission requirements listed in Attachment I, Audit Requirements, the Subrecipient shall send an electronic copy of its audit report to DEO's grant manager for this Agreement by June 30 following the end of each fiscal year in which it had an open CDBG-MIT subgrant.

(d) Subrecipient shall also comply with the Federal Audit Clearinghouse rules and directives, including but not limited to the pertinent Report Submissions provisions of 2 C.F.R 200.512, when such provisions are applicable to this Agreement.

(8) REPORTS

Subrecipient shall provide DEO with all reports and information set forth in Attachment G, Reports. The monthly reports and administrative closeout reports must include the current status and progress of Subrecipient and all subcontractors in completing the work described in the Scope of Work, Attachment A, Project Description and Deliverables, and the expenditure of funds under this Agreement. Within 10 calendar days of a request by DEO, Subrecipient shall provide additional program updates or information. Without limiting any other remedy available to DEO, if all required reports and copies are not sent to DEO or are not completed in a manner acceptable to DEO, payments may be withheld until the reports are completed to DEO's satisfaction. DEO may also take other action as stated in Paragraph (13) Remedies or otherwise allowable by law.

(9) INSPECTIONS AND MONITORING

(a) Subrecipient shall cooperate and comply with DEO, HUD, and auditors with any inspections and will immediately provide access to records and financial statements as deemed necessary by DEO, HUD, and their respective auditors at least in accordance with requirements of 2 CFR part 200 and 24 CFR 570.489.

(b) Subrecipient shall cooperate and comply with monitoring of its activities as deemed necessary by DEO to ensure that the subaward is used for authorized purposes in compliance with federal statutes, regulations, and this Agreement.

(c)Without limiting the actions DEO, HUD, or their respective investigators may take, monitoring procedures will include at a minimum: (1) reviewing financial and performance reports required by DEO; (2) following-up and ensuring Subrecipient takes timely and appropriate action on all deficiencies pertaining to the federal award provided to Subrecipient from DEO as detected through audits, on-site reviews and other means; and (3) issuing a management decision for audit findings pertaining to this Federal award provided to Subrecipient from DEO as required by 2 CFR §200.521.

(d) Corrective Actions: DEO may issue management decisions and may consider taking enforcement actions if noncompliance is detected during audits. DEO may require Subrecipient to take timely and appropriate action on all deficiencies pertaining to the federal award provided to Subrecipient from the pass-through entity as detected through audits, on-site reviews and other means. In response to audit deficiencies or other findings of noncompliance with this agreement, DEO may in its sole discretion and without advance notice, impose additional conditions on the use of the CDBG-MIT funds to ensure future compliance or provide training and technical assistance as needed to correct noncompliance. DEO may also take other action as stated in Paragraph (13) Remedies or otherwise allowable by law.

(10) DUPLICATION OF BENEFITS

Subrecipient shall not carry out any of the activities under this Agreement in a manner that results in a prohibited duplication of benefits as defined by Section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1974 (42 U.S.C. 5155 *et seq.*) and described in Appropriations Acts. Subrecipient must comply with HUD's requirements for duplication of benefits, as described in the Federal Register and

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

HUD guidance (including HUD training materials). Subrecipient shall carry out the activities under this Agreement in compliance with DEO's procedures to prevent duplication of benefits. Subrecipient shall sign a Subrogation Agreement (See Attachment M).

(11) LIABILITY

(a) If Subrecipient is a state agency or subdivision, as defined in Section 768.28(2), F.S., pursuant to Section 768.28(19), F.S., neither Party indemnifies nor insures or assumes any liability for the other Party for the other Party's negligence.

(b) Subrecipient assumes sole responsibility for the training and oversight of the parties it deals with or employs to carry out the terms of this Agreement to the extent set forth in Section 768.28, Florida Statutes. Subrecipient shall hold DEO harmless against all claims of whatever nature arises from the work and services performed by third parties under this Agreement. For purposes of this Agreement, Subrecipient agrees that it is not an employee or agent of DEO but is an independent contractor.

(c) Subrecipient agrees to be fully responsible for its negligent or tortious acts or omissions, which result in claims or suits against DEO. Subrecipient agrees to be liable for any damages proximately caused by the acts or omissions to the extent set forth in Section 768.28, F.S. Nothing herein shall be construed as consent by DEO to be sued by third parties in any matter arising out of any agreement, contract or subcontract.

(d) Nothing herein is intended to serve as a waiver of sovereign immunity by DEO or the Subrecipient.

(12) EVENTS OF DEFAULT

If any of the following events occur ("Events of Default"), DEO may, in its sole and absolute discretion, elect to terminate any obligation to make any further payment of funds, exercise any of the remedies available through this Agreement or pursue any remedy at law or in equity, without limitation:

(a) Any warranty or representation made by Subrecipient, in this Agreement or any previous agreement with DEO, is or becomes false or misleading in any respect, or if Subrecipient fails to keep or perform any of the obligations, terms, or covenants in this Agreement or any previous agreement with DEO or HUD, and/or has not cured them in timely fashion and/or is unable or unwilling to meet its obligations under this Agreement and/or as required by statute, rule, or regulation;

(b) Any material adverse change occurs in the financial condition of Subrecipient at any time during the term of this Agreement and the Subrecipient fails to cure this adverse change within thirty (30) calendar days from the date written notice is sent by DEO;

(c) If Subrecipient fails to submit any required report or submits any required report with incorrect, incomplete, or insufficient information or fails to submit additional information as requested by DEO;

(d) If Subrecipient fails to perform or timely complete any of its obligations under this Agreement, including participating in DEO's Implementation Workshop. The Parties agree that in the event DEO elects to make payments or partial payments after any Events of Default, it does so without waiving the right to exercise any remedies allowable herein or at law and without becoming liable to make any further payment.

(e) Neither Party shall be liable to the other for any delay or failure to perform under this Agreement if such delay or failure is neither the fault nor the negligence of the Party or its employees or agents and the delay is due directly to acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond the Party's control or for any of the foregoing that affects subcontractors or suppliers if no alternate source of supply is available. However, in the event of delay from the foregoing causes, the Party shall take all reasonable measures to mitigate any and all resulting delay or disruption in the Party's performance obligation under this Agreement. If the delay is excusable under this paragraph, the delay will

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

not result in any additional charge or cost under the Agreement to either Party. In the case of any delay the Subrecipient believes is excusable under this paragraph, Subrecipient shall notify DEO in writing of the delay or potential delay and describe the cause of the delay either: (1) within ten (10) calendar days after the cause that creates or will create the delay first arose, if Subrecipient could reasonably foresee that a delay could occur as a result or (2) within five (5) calendar days after the date Subrecipient first had reason to believe that a delay could result, if the delay is not reasonably foreseeable. **THE FOREGOING SHALL CONSTITUTE SUBRECIPIENT'S SOLE REMEDY OR EXCUSE WITH RESPECT TO DELAY**. Providing notice in strict accordance with this paragraph is a condition precedent to such remedy. DEO, in its sole discretion, will determine if the delay is excusable under this paragraph and will notify Subrecipient of its decision in writing. No claim for damages, other than an extension of time, shall be asserted against DEO. Subrecipient shall not be entitled to an increase in the Agreement price or payment of any kind from DEO for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency arising because of delay, disruption, interference or hindrance from any cause whatsoever. If performance is suspended or delayed, in whole or in part, due to any of the causes described in this paragraph, after the causes have ceased to exist, Subrecipient shall perform at no increased cost, unless DEO determines, in its sole discretion, that the delay will significantly impair the value of the Agreement to DEO or the State, in which case, DEO may do any or all of the following: (1) accept allocated performance or deliveries from Subrecipient, provided that Subrecipient grants preferential treatment to DEO with respect to products or services subjected to allocation; (2) purchase from other sources (without recourse to and by Subrecipient for the related costs and expenses) to replace all or part of the products or services that are the subject of the delay, which purchases may be deducted from the Agreement quantity or (3) terminate the Agreement in whole or in part.

(13) REMEDIES

If an Event of Default occurs, DEO may in its sole discretion and without limiting any other right or remedy available, provide thirty (30) calendar days written notice to the Subrecipient and if the Subrecipient fails to cure within those thirty (30) calendar days DEO may choose to exercise one or more of the following remedies, either concurrently or consecutively:

(a) Terminate this Agreement upon written notice by DEO sent in conformity with Paragraph (17) Notice and Contact;

(b) Begin any appropriate legal or equitable action to enforce performance of this Agreement;

(c) Withhold or suspend payment of all or any part of a request for payment;

(d) Demand Subrecipient return to DEO any funds used for ineligible activities or unallowable costs under this Agreement or any applicable law, rule or regulation governing the use of the funds; and

(e) Exercise any corrective or remedial actions, including but not limited to:

1. Request additional information from the Subrecipient to determine the reasons for or the extent of non-compliance or lack of performance;

2. Issue a written warning to advise that more serious measures may be taken if the situation is not corrected; and/or

3. Advise the Subrecipient to suspend, discontinue or refrain from incurring costs for any activities in question.

(f) Exercise any other rights or remedies which may be otherwise available under law.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Pursuit of any of the above remedies does not preclude DEO from pursuing any other remedies in this Agreement or provided at law or in equity. Failure to exercise any right or remedy in this Agreement or failure by DEO to require strict performance does not affect, extend or waive any other right or remedy available or affect the later exercise of the same right or remedy by DEO for any other default by the Subrecipient.

(14) DISPUTE RESOLUTION

DEO shall decide disputes concerning the performance of the Agreement, and document dispute decisions in writing and serve a copy of same to Subrecipient. All decisions are final and conclusive unless the Subrecipient files a petition for administrative hearing with DEO within twenty-one (21) days from the date of receipt of the decision. Exhaustion of administrative remedies prescribed in Chapter 120, F.S., is an absolute condition precedent to Subrecipient's ability to pursue any other form of dispute resolution; provided however, that the Parties may mutually agree to employ the alternative dispute resolution procedures outlined in Chapter 120, F.S.

(15) Citizen Complaints. The goal of DEO is to provide an opportunity to resolve citizen complaints in a timely manner, usually within fifteen (15) business days of the receipt of the complaint as expected by HUD, if practicable, and to provide the right to participate in the process and appeal a decision when there is reason for an applicant to believe its application was not handled according to program policies. All applications, guidelines and websites will include details on the right to file a complaint or appeal and the process for filing a complaint or beginning an appeal.

The Subrecipient will handle citizen complaints by:

(a) Conducting investigations, as necessary;
(b) Finding a resolution; or
(c) Conducting follow-up actions.

Program Appeals

Applicants may appeal program decisions related to one of the following activities:

(a) A program eligibility determination;
(b) A program assistance award calculation; or
(c) A program decision concerning housing unit damage and the resulting program outcome.

Citizens may file a written complaint or appeal with the Office of Long-Term Resiliency by email at CDBG-DR@deo.myflorida.com or by mail to the following address:

Attention: Office of Long-Term Resiliency
Florida Department of Economic Opportunity
107 East Madison Street
The Caldwell Building, MSC 420
Tallahassee, Florida 32399

HUD Complaints

If the complainant is not satisfied by the Subrecipient's determination or DEO's response, then the complainant may file a written appeal by following the instructions issued in the letter of response. If the complainant has not been satisfied with the response at the conclusion of the complaint or appeals process, a formal complaint may then be addressed directly to the regional Department of Housing and Urban Development (HUD) at:

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Department of Housing & Urban Development
Charles E. Bennet Federal Building
400 West Bay Street, Suite 1015
Jacksonville, FL 32202

Fair Housing Complaints

The Florida Office of Long-Term Resiliency operates in Accordance with the Federal Fair Housing Law (The Fair Housing Amendments Act of 1988). Anyone who feels he or she has been discriminated against may file a complaint of housing discrimination: 1-800-669-9777 (Toll Free), 1-800-927-9275 (TTY) or www.hud.gov/fairhousing.

(16) TERMINATION

(a) DEO may immediately suspend or terminate this Agreement for cause by providing written notice, from the date notice is sent by DEO. Cause includes, but is not limited to: an Event of Default as set forth in this Agreement; Subrecipient's improper or ineffective use of funds provided under this Agreement; fraud; lack of compliance with any applicable rules, regulations, statutes, executive orders, HUD guidelines, policies, directives or laws; failure, for any reason, to timely and/or properly perform any of the Subrecipient's obligations under this Agreement; submission of reports that are incorrect or incomplete in any material respect and refusal to permit public access to any document, paper, letter or other material subject to disclosure under law, including Chapter 119, F.S., as amended. The aforementioned reasons for termination are listed in the immediately preceding sentence for illustration purposes but are not limiting DEO's sole and absolute discretion with respect to DEO's right to terminate this Agreement. In the event of suspension or termination, Subrecipient shall not be entitled to recover any cancellation charges or unreimbursed costs.

(b) DEO may unilaterally terminate this Agreement, in whole or in part, for convenience by providing Subrecipient fourteen (14) days written notice from the date notice is sent by DEO, setting forth the reasons for such termination, the effective date and, in the case of partial termination, the portion to be terminated. However, if in the case of partial termination, DEO determines that the remaining portion of the award will not accomplish the purpose for which the award was made, DEO may terminate the portion of the award which will not accomplish the purpose for which the award was made. Subrecipient shall continue to perform any work not terminated. In the event of termination for convenience, Subrecipient shall not be entitled to recover any cancellation charges or unreimbursed costs for the terminated portion of work.

(c) The Parties may terminate this Agreement for their mutual convenience in writing, in the manner agreed upon by the Parties, which must include the effective date of the termination.

(d) In the event that this Agreement is terminated, Subrecipient shall not incur new obligations under the terminated portion of the Agreement after the date Subrecipient has received the notification of termination. Subrecipient shall cancel as many outstanding obligations as possible. DEO shall disallow all costs incurred after Subrecipient's receipt of the termination notice. DEO may, to the extent authorized by law, withhold payments to Subrecipient for the purpose of set-off until the exact amount of damages due to DEO from Subrecipient is determined.

(e) Upon expiration or termination of this Agreement, Subrecipient shall transfer to DEO any CDBG-MIT funds on hand at the time of expiration or termination and any accounts receivable attributable to the use of CDBG-MIT funds.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(f) Any real property under Subrecipient's control that was acquired or improved in whole or in part with CDBG-MIT funds (including CDBG-MIT funds provided to the subrecipient in the form of a loan) in excess of $25,000 must either:

1. Be used to meet a national objective until five years after expiration or termination of this Agreement, unless otherwise agreed upon by the Parties, or except as otherwise set forth herein; or

2. If not used to meet a national objective, Subrecipient shall pay to DEO an amount equal to the current market value of the property less any portion of the value attributable to expenditures of non-CDBG-MIT funds for the acquisition or improvement of the property for five years after expiration or termination of this Agreement.

(g) The rights and remedies under this clause are in addition to any other rights or remedies provided by law or under this Agreement.

(17) NOTICE AND CONTACT

(a) All notices provided under or pursuant to this Agreement shall be in writing, either by hand delivery, first class or certified mail with return receipt requested, email with confirmation of receipt of email from Subrecipient, to the representative identified below at the address set forth below or said notification attached to the original of this Agreement.

(b) The name and address of DEO's Grant Manager for this Agreement is:

Jorge Passalacqua
107 E Madison Street
Tallahassee, FL 32399
850-921-3278
Jorge.Passalacqua@deo.myflorida.com

(c) The name and address of the Local Government Project Contact for this Agreement is:

Veronica Williams
780 Fisherman Street
Opa-locka, FL 33054
305-928-2868 x1003
VWilliams@opalockafl.gov

(d) If different representatives or addresses are designated by either Party after execution of this Agreement, notice of the name, title and address of the new representative will be provided as provided for in this Agreement. Such change shall not require a formal amendment of the Agreement.

(18) CONTRACTS

If the Subrecipient contracts any of the work required under this Agreement, a copy of the proposed contract template and any proposed amendments, extensions, revisions, or other changes thereto, must be forwarded to the DEO grant manager for prior written approval. For each contract, the Subrecipient shall report to DEO as to whether that contractor or any subcontractors hired by the contractor, is a minority vendor, as defined in Section 288.703, F.S. The Subrecipient shall comply with the procurement standards in 2 CFR §200.318 - §200.327and §200.330 when procuring property and services under this Agreement (refer to Attachments D & E).

The Subrecipient shall include the following terms and conditions in any contract pertaining to the work required under this Agreement:

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(a) the period of performance or date of completion;
(b) the performance requirements;
(c) that the contractor is bound by the terms of this Agreement;
(d) that the contractor is bound by all applicable State and Federal laws, rules, and regulations;
(e) that the contractor shall hold DEO and Subrecipient harmless against all claims of whatever nature arising out of the contractor's performance of work under this Agreement;
(f) the obligation of the Subrecipient to document in Subrecipient's reports the contractor's progress in performing its work under this Agreement;
(g) the requirements of 2 CFR Appendix II to Part 200 – Contract Provision for Non-Federal Entity Contract Under Federal Awards – (refer to Attachment L)

Subrecipient must comply with CDBG regulations regarding debarred or suspended entities (24 CFR 570.489(l)), pursuant to which CDBG funds must not be provided to excluded or disqualified persons and provisions addressing bid, payment, performance bonds, if applicable, and liquidated damages.

Subrecipient shall maintain oversight of all activities performed under this Agreement and shall ensure that its contractors perform according to the terms and conditions of the procured contracts or agreements and the terms and conditions of this Agreement.

(19) TERMS AND CONDITIONS

This Agreement contains all the terms and conditions agreed upon by the Parties. There are no provisions, terms, conditions, or obligations other than those contained in this Agreement; and this Agreement supersedes all previous understandings. No waiver by DEO may be effective unless made is writing by an authorized DEO official.

(20) ATTACHMENTS

(a) If any inconsistencies or conflict between the language of this Agreement and the attachments arise, the language of the attachments shall control, but only to the extent of the conflict or inconsistency.

(b) This Agreement contains the following attachments:

Attachment A – Project Description and Deliverables
Attachment B – Project Budget (Example)
Attachment C – Activity Work Plan (Example)
Attachment D – Program and Special Conditions
Attachment E – State and Federal Statutes, Regulations and Policies
Attachment F – Civil Rights Compliance
Attachment G – Reports
Attachment H – Warranties and Representations
Attachment I – Audit Requirements and Exhibit 1 to Attachment I – Funding Sources
Attachment J – Audit Compliance Certification
Attachment K – SERA Access Authorization Form (form provided after execution of this agreement)
Attachment L – 2 CFR Appendix II to Part 200
Attachment M – Subrogation Agreement

(21) FUNDING/CONSIDERATION

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(a) The funding for this Agreement shall not exceed **Seven Million Dollars and Zero Cents ($7,000,000.00)** subject to the availability of funds. The State of Florida and DEO's performance and obligation to pay under this Agreement is contingent upon annual appropriations by the Legislature and subject to any modification in accordance with Chapter 216, F.S. or the Florida Constitution.

(b) DEO will provide funds to Subrecipient by issuing a Notice of Subgrant Award/Fund Availability ("NFA") through DEO's financial management information system. Each NFA may contain specific terms, conditions, assurances, restrictions or other instructions applicable to the funds provided by the NFA. By accepting funds made available through an NFA, Subrecipient agrees to comply with all terms, conditions, assurances, restrictions or other instructions listed in the NFA.

(c) By execution of this Agreement, Subrecipient certifies that necessary written administrative procedures, processes and fiscal controls are in place for the operation of its CDBG-MIT program for which Subrecipient receives funding from DEO. These written administrative procedures, processes and fiscal controls must, at minimum, comply with applicable state and federal law, rules, regulations, guidance and the terms of this Agreement. Subrecipient agrees to comply with all the terms and conditions of Attachment D, Program and Special Conditions.

(d) Subrecipient shall expend funds only for allowable costs and eligible activities, in accordance with the Scope of Work.

(e) Subrecipient shall request all funds in the manner prescribed by DEO. The authorized signatory for the Subrecipient set forth on the SERA Access Authorization Form must approve the submission of each Request for Funds ("RFF") on behalf of Subrecipient. SERA Access Authorization Form will be provided after the execution of this Agreement.

(f) Except as set forth herein, or unless otherwise authorized in writing by DEO, costs incurred for eligible activities or allowable costs prior to the effective date of this Agreement are ineligible for funding with CDBG-MIT funds.

(g) If the necessary funds are not available to fund this Agreement as a result of action by the United States Congress, the Federal Office of Management and Budget, the Florida Legislature, the State Chief Financial Officer or under Subparagraph (23), Mandated Conditions of this Agreement, all obligations on the part of DEO to make any further payment of funds will terminate and the Subrecipient shall submit its administrative closeout report and subgrant agreement closeout package as directed by DEO within thirty (30) calendar days from receipt of notice from DEO.

(h) Subrecipient is ultimately responsible for the administration of this Agreement, including monitoring and oversight of any person or entity retained or hired by Subrecipient.

(i) All expenditures under this Agreement shall be made in accordance with this Agreement and any applicable state or federal statutes, rules, or regulations.

(j) Funding for this Agreement is appropriated under Public Law 115-254, Division I, the "Supplemental Appropriations for Disaster Relief Act, 2018" and Public Law 116-20, the "Additional Supplemental Appropriations for Disaster Relief Act, 2019" for the purpose of assisting in long-term recovery from major disasters that occurred in 2017, 2018, and 2019 in accordance with the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 et seq., (the "Stafford Act").

(k) CDBG-DR funds, appropriated and identified by Public Law, are governed by one or more Federal Register notices that contain requirements, applicable waivers, and alternative requirements that apply to the use of these funds.

(22) REPAYMENTS

(a) Subrecipient shall only expend funding under this Agreement for allowable costs resulting from obligations incurred during the Agreement period. Subrecipient shall ensure that its contractors, subcontractors, and consultants only expend funding under this Agreement for allowable costs resulting from obligations incurred during the Agreement period.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(b) In accordance with Section 215.971, F.S., Subrecipient shall refund to DEO any unobligated funds which have been advanced or paid.

(c) Subrecipient shall refund to DEO any funds paid in excess of the amount to which the Subrecipient or its contractors, subcontractors or consultants are entitled under the terms and conditions of this Agreement.

(d) Subrecipient shall refund to DEO any funds received for an activity if the activity does not meet one of the three National Objectives listed in 24 CFR § 570.483(b), (c) and (d); provided, however, the Subrecipient is not required to repay funds for subgrant administration unless DEO, in its sole discretion, determines Subrecipient is at fault for the ineligibility of the activity in question.

(e) Subrecipient shall refund to DEO any funds not spent in accordance with the conditions of this Agreement or applicable law. Such reimbursement shall be sent to DEO, by the Subrecipient, within thirty (30) calendar days from Subrecipient's receipt of notification of such non-compliance.

(f) In accordance with Section 215.34(2), F.S., if a check or other draft is returned to DEO for collection, the Subrecipient shall pay to DEO a service fee of $15.00 or five percent of the face amount of the returned check or draft, whichever is greater. All refunds or repayments to be made to DEO under this Agreement are to be made payable to the order of "Department of Economic Opportunity" and mailed directly to DEO at the following address:

Department of Economic Opportunity
Community Development Block Grant Programs Cashier
107 East Madison Street – MSC 420
Tallahassee, Florida 32399-6508

(23) MANDATED CONDITIONS

(a) The validity of this Agreement is subject to the truth and accuracy of all the information, representations and materials submitted or provided by the Subrecipient in this Agreement, in any later submission or response to a DEO request or in any submission or response to fulfill the requirements of this Agreement. All of said information, representations and materials are incorporated herein by reference.

(b) This Agreement shall be construed under the laws of the State of Florida and venue for any actions arising out of this Agreement shall be in the Circuit Court of Leon County. The Parties explicitly waive any right to jury trial.

(c) If any provision of this Agreement is in conflict with any applicable statute or rule, or is unenforceable, then that provision shall be null and void only to the extent of the conflict or unenforceability, and that provision shall be severable from and shall not invalidate any other provision of this Agreement.

(d) Any power of approval or disapproval granted to DEO under the terms of this Agreement shall survive the term of this Agreement.

(e) This Agreement may be executed in any number of counterparts, any one of which may be taken as an original.

(f) Subrecipient shall comply with all applicable local, state and federal laws, including the Americans With Disabilities Act of 1990, as amended (P.L. 101-336, 42 U.S.C § 12101 *et seq.*); the Florida Civil Rights Act, as amended, Chapter 760, Florida Statutes; Title VII of the Civil Rights Act of 1964, as amended; and laws which prohibit discrimination by public and private entities on in employment, public accommodations, transportation, state and local government services and telecommunications.

(g) Pursuant to Section 287.133(2)(a), F.S., a person or affiliate, as defined in Section 287.133(1), F.S., who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal or reply on a contract with a public entity for the construction or repair of a public

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

building or public work; may not submit bids, proposals or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor or consultant under a contract with any public entity; and may not transact business with any public entity in excess of thirty-five thousand dollars ($35,000) for a period of thirty-six (36) months following the date of being placed on the convicted vendor list. By executing this Agreement, the Subrecipient represents and warrants that neither it nor any of its affiliates is currently on the convicted vendor list. The Subrecipient shall disclose if it or any of its affiliates is placed on the convicted vendor list.

(h) Pursuant to Section 287.134(2)(a), F.S., an entity or affiliate, as defined in Section 287.134(1), who has been placed on the discriminatory vendor list may not submit a bid, proposal or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor or consultant under a contract with any public entity; and may not transact business with any public entity. By executing this Agreement, the Subrecipient represents and warrants that neither it nor any of its affiliates is currently on the discriminatory vendor list. The Subrecipient shall disclose if it or any of its affiliates is placed on the discriminatory vendor list.

(i) All bills for fees or other compensation for services or expenses shall be submitted in detail sufficient for a proper pre-audit and post-audit thereof.

(j) In the event travel is pre-approved by DEO, any bills for travel expenses shall be submitted and reimbursed in accordance with Section 112.061, F.S., the rules promulgated thereunder and 2 CFR § 200.474.

(k) If Subrecipient is allowed to temporarily invest any advances of funds under this Agreement, any interest income shall either be returned to DEO or be applied against DEO's obligation to pay the Agreement award amount.

(l) Subrecipient acknowledges being subject to Florida's Government in the Sunshine Law (Section 286.011, F.S.) with respect to the meetings of Subrecipient's governing board or the meetings of any subcommittee making recommendations to the governing board. Subrecipient agrees that all such aforementioned meetings shall be publicly noticed, open to the public and the minutes of all the meetings shall be public records made available to the public in accordance with Chapter 119, F.S.

(m) Subrecipient shall comply with section 519 of P. L. 101-144, the Department of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1990; and section 906 of P.L. 101-625, the Cranston-Gonzalez National Affordable Housing Act, 1990, by having, or adopting within ninety (90) days of execution of this Agreement, and enforcing, the following:

1. A policy prohibiting the use of excessive force by law enforcement agencies within its jurisdiction against any individuals engaged in non-violent civil rights demonstrations; and

2. A policy of enforcing applicable State and local laws against physically barring entrance to or exit from a facility or location which is the subject of such non-violent civil rights demonstrations within its jurisdiction.

(n) Upon expiration or termination of this Agreement, Subrecipient shall transfer to DEO any CDBG-MIT funds remaining at the time of expiration or termination, and any accounts receivable attributable to the use of CDBG-MIT funds.

(24) LOBBYING PROHIBITION

(a) No funds or other resources received from DEO under this Agreement may be used directly or indirectly to influence legislation or any other official action by the Florida Legislature or any state agency.

(b) The Subrecipient certifies, by its signature to this Agreement, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the Subrecipient, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress or an employee of a Member of

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any general loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment or modification of any federal contract, grant, loan or cooperative agreement;

2. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress or an employee of a Member of Congress in connection with this Federal contract, grant, loan or cooperative agreement, the Subrecipient shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions; and

3. Subrecipient shall require that this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose as described in this Agreement. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31 U.S.C. § 1352. Any person who fails to file the required certification shall be subject to a civil penalty of not less than ten thousand dollars ($10,000) and not more than one hundred thousand dollars ($100,000) for each such failure.

(25) COPYRIGHT, PATENT AND TRADEMARK

Any and all patent rights accruing under or in connection with the performance of this Agreement are hereby reserved to the State of Florida. Any and all copyrights accruing under or in connection with the performance of this Agreement are hereby transferred by Subrecipient to the State of Florida.

(a) If the Subrecipient has a pre-existing patent or copyright, Subrecipient shall retain all rights and entitlements to that pre-existing patent or copyright unless this Agreement expressly provides otherwise.

(b) If any discovery or invention is developed in the course of or as a result of work or services performed under this Agreement or in any way connected with it, Subrecipient shall refer the discovery or invention to DEO for a determination whether the State of Florida will seek patent protection in its name. Any patent rights accruing under or in connection with the performance of this Agreement are reserved to the State of Florida. If any books, manuals, films or other copyrightable material are produced, Subrecipient shall notify DEO. Any copyrights accruing under or in connection with the performance under this Agreement are transferred by the Subrecipient to the State of Florida.

(c) Within thirty (30) calendar days of execution of this Agreement, Subrecipient shall disclose all intellectual properties relating to the performance of this Agreement which give rise to a patent or copyright. Subrecipient shall retain all rights and entitlements to any pre-existing intellectual property which is so disclosed. Failure to disclose will indicate that no such property exists, and DEO shall have the right to all patents and copyrights which accrue during performance of this Agreement.

(26) LEGAL AUTHORIZATION

(a) Subrecipient certifies that it has the legal authority to receive the funds under this Agreement and that its governing body has authorized the execution and acceptance of this Agreement. Subrecipient certifies that the undersigned person has the authority to legally execute and bind the Subrecipient to the terms of this Agreement. DEO may, at its discretion, request documentation evidencing the undersigned has authority to bind Subrecipient to this Agreement as of the date of execution; any such documentation is incorporated herein by reference.

(b) Prior to the execution of this Agreement, Subrecipient warrants that, to the best of its knowledge, there is no pending or threatened action, proceeding, investigation or any other legal or financial condition that would in any way prohibit, restrain or diminish Subrecipient's ability to satisfy its obligations.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Subrecipient shall immediately notify DEO in writing if its ability to perform is compromised in any manner during the term of this Agreement.

(27) PUBLIC RECORD RESPONSIBILITIES

(a) In addition to Subrecipient's responsibility to directly respond to each request it receives for records, in conjunction with this Agreement and to provide the applicable public records in response to such request, Subrecipient shall notify DEO of the receipt and content of all such requests by sending an email to PRRequest@deo.myflorida.com within one (1) business day from receipt of the request.

(b) Subrecipient shall keep and maintain public records required by DEO to perform the Subrecipient's responsibilities hereunder. Subrecipient shall, upon request from DEO's custodian of public records, provide DEO with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided by Chapter 119, F.S., or as otherwise provided by law. Subrecipient shall allow public access to all documents, papers, letters or other materials made or received by the Subrecipient in conjunction with this Agreement, unless the records are exempt from Article I, Section 24(a) of the Florida Constitution and Section 119.07(1), F.S. For records made or received by Subrecipient in conjunction with this Agreement, Subrecipient shall respond to requests to inspect or copy such records in accordance with Chapter 119, F.S. For all such requests for records that are public records, as public records are defined in Section 119.011, F.S., Subrecipient shall be responsible for providing such public records per the cost structure provided in Chapter 119, F.S., and in accordance with all other requirements of Chapter 119, F.S., or as otherwise provided by law.

(c) This Agreement may be terminated by DEO for refusal by Subrecipient to comply with Florida's public records laws or to allow public access to any public record made or received by the Subrecipient in conjunction with this Agreement.

(d) If, for purposes of this Agreement, Subrecipient is a "contractor" as defined in Section 119.0701(1)(a), F.S. ("Subrecipient-contractor"), the Subrecipient-contractor shall transfer to DEO, at no cost to DEO, all public records upon completion including termination, of this Agreement or keep and maintain public records required by DEO to perform the service. If Subrecipient-contractor transfers all public records to the public agency upon completion of this Agreement, Subrecipient-contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If Subrecipient-contractor keeps and maintains public records upon completion of the Agreement, the Subrecipient-contractor shall meet all applicable requirements for retaining public records in accordance with Chapters 119 and 257, F.S. All records stored electronically must be provided to DEO, upon request from DEO's custodian of public records, in a format that is compatible with the information technology systems of DEO.

(e) If DEO does not possess a record requested through a public records request, DEO shall notify Subrecipient-contractor of the request as soon as practicable, and the Subrecipient-contractor must provide the records to DEO or allow the records to be inspected or copied within a reasonable time, but in all cases within fourteen business days. If the Subrecipient-contractor does not comply with DEO's request for records, DEO shall enforce the provisions set forth in this Agreement. Subrecipient-contractor who fails to provide public records to DEO within a reasonable time may be subject to penalties under Section 119.10, F.S.

(f) Subrecipient shall notify DEO verbally within twenty-four (24) hours and in writing within seventy-two (72) hours if any data in the Subrecipient's possession related to this Agreement is subpoenaed or improperly used, copied or removed (except in the ordinary course of business) by anyone except an authorized representative of DEO. Subrecipient shall cooperate with DEO, in taking all steps as DEO deems advisable, to prevent misuse, regain possession or otherwise protect the State's rights and the data subject's privacy.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(g) Subrecipient acknowledges DEO is subject to the provisions of Chapter 119, F.S., relating to public records and that reports, invoices and other documents Subrecipient submits to DEO under this Agreement constitute public records under Florida Statutes. Subrecipient shall cooperate with DEO regarding DEO's efforts to comply with the requirements of Chapter 119, F.S.

(h) If Subrecipient submits records to DEO that are confidential and exempt from public disclosure as trade secrets or proprietary confidential business information, such records should be identified as such by Subrecipient prior to submittal to DEO. Failure to identify the legal basis for each exemption from the requirements of Chapter 119, F.S., prior to submittal of the record to DEO serves as the Subrecipient's waiver of a claim of exemption. Subrecipient shall ensure public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Agreement term and following completion of this Agreement if the Subrecipient-contractor does not transfer the records to DEO upon completion, including termination, of this Agreement.

(i) **IF SUBRECIPIENT-CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE SUBRECIPIENT-CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS by telephone at 850-245-7140, via email at PRRequest@deo.myflorida.com, or by mail at Department of Economic Opportunity, Public Records Coordinator, 107 East Madison Street, Caldwell Building, Tallahassee, Florida 32399-4128.**

(j) To the extent allowable by law, Subrecipient shall be fully liable for the actions of its agents, employees, partners, contractors and subcontractors and shall fully indemnify, defend, and hold harmless the State and DEO, and their officers, agents and employees, from suits, actions, damages, and costs of every name and description, including attorneys' fees, arising from or relating to public record requests or public record law violation(s), alleged to be caused in whole or in part by the Subrecipient, its agents, employees, partners, contractors or subcontractors, provided, however, Subrecipient does not indemnify for that portion of any costs or damages proximately caused by the negligent act or omission of the State or DEO. DEO, in its sole discretion, has the right, but not the obligation, to enforce this indemnification provision.

(k) DEO does not endorse any Subrecipient, commodity, or service. Subject to Chapter 119, F.S., Subrecipient shall not publicly disseminate any information concerning this Agreement without prior written approval from DEO, including, but not limited to, mentioning this Agreement in a press release or other promotional material, identifying DEO or the State as a reference, or otherwise linking Subrecipient's name and either a description of the Agreement or the name of DEO or the State in any material published, either in print or electronically, to any other entity that is not a Party to this Agreement, except potential or actual employees, agents, representatives or subcontractors with the professional skills necessary to perform the work services required by the Agreement.

(l) Subrecipient shall comply with the requirements set forth in Section 119.0701, F.S., when entering into any public agency contract for services after the Effective Date of this Agreement. Subrecipient shall amend each of the Subrecipient's public agency contracts for services already in effect as of the Effective Date of this Agreement and which contract will or may be funded in whole or in part with any public funds. DEO may terminate this Agreement if the Subrecipient does not comply with this provision.

(28) EMPLOYMENT ELIGIBILITY VERIFICATION

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(a) Section 448.095, F.S., requires the following:

1. Every public employer, contractor, and subcontractor shall register with and use the E-Verify system to verify the work authorization status of all newly hired employees. A public employer, contractor, or subcontractor may not enter into a contract unless each party to the contract registers with and uses the E-Verify system.

2. A private employer shall, after making an offer of employment which has been accepted by a person, verify such person's employment eligibility. A private employer is not required to verify the employment eligibility of a continuing employee hired before January 1, 2021. However, if a person is a contract employee retained by a private employer, the private employer must verify the employee's employment eligibility upon the renewal or extension of his or her contract.

(b) E-Verify is an Internet-based system that allows an employer, using information reported on an employee's Form I-9, Employment Eligibility Verification, to determine the eligibility of all new employees hired to work in the United States. There is no charge to employers to use E-Verify. The Department of Homeland Security's E-Verify system can be found at:

https://www.e-verify.gov/

(c) If the Recipient does not use E-Verify, the Recipient shall enroll in the E-Verify system prior to hiring any new employee or retaining any contract employee after the effective date of this Agreement.

(29) PROGRAM INCOME

(a) The Subrecipient shall report to DEO all program income (as defined at 24 CFR § 570.500(a) or in the Federal Register Guidance governing the CDBG-MIT funds) generated by activities carried out with CDBG-MIT funds made available under this Agreement as part of the Subrecipient's Quarterly Progress Report. The Subrecipient shall use program income in accordance with the applicable requirements of 2 CFR part 200, 24 CFR part 570.489, 570.500, 570.504 and the terms of this Agreement.

(b) Program income generated after closeout shall be returned to DEO. Program income generated prior to closeout shall be returned to DEO unless the program income is used to fund additional units of CDBG-MIT activities, specified in a modification to this Agreement and duly executed prior to administrative closeout.

(30) NATIONAL OBJECTIVES

All activities funded with CDBG-MIT funds must meet the criteria for one of the CDBG program's National Objectives. The Subrecipient certifies that the activities carried out under this Agreement shall meet the following national objectives and satisfy the following criteria:

(a) Benefit low- and moderate- income persons;
(b) Meet a particularly urgent need;
(c) Aid in the prevention or elimination of slums or blight.

(31) INDEPENDENT CONTRACTOR

(a) In Subrecipient's performance of its duties and responsibilities under this Agreement, it is mutually understood and agreed Subrecipient is at all times acting and performing as an independent contractor. Nothing in this Agreement is intended to or shall be deemed to constitute an employer/employee relationship, partnership or joint venture between the Parties. Subrecipient shall at all times remain an independent contractor with respect to the services to be performed under this Agreement. Nothing in this Agreement shall be construed to create any agency or employment

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

relationship between DEO Subrecipient, its employees, subcontractors or agents. Neither Party shall have any right, power or authority to assume, create or incur any expense, liability or obligation, express or implied, on behalf of the other.

(b) Subrecipient, its officers, agents, employees, subcontractors or assignees, in performance of this Agreement shall act in the capacity of an independent contractor and not as an officer, employee, agent, joint venturer, or partner of the State of Florida.

(c) Subrecipient shall have sole right to control the manner, method and means by which the services required by this Agreement are performed. DEO shall not be responsible to hire, supervise or pay Subrecipient's employees. Neither Subrecipient, nor its officers, agents, employees, subcontractors or assignees are entitled to State retirement or State leave benefits, or to any other compensation of State employment as a result of performing the duties and obligations of this Agreement.

(d) Subrecipient agrees to take such actions as may be necessary to ensure that each subcontractor will be deemed to be an independent contractor and will not be considered or permitted to be an agent, employee, servant, joint venturer or partner of the State of Florida.

(e) Unless justified by the Subrecipient, and agreed to by DEO in the Scope of Work, DEO will not furnish services of support (*e.g.*, office space, office supplies, telephone service, secretarial or clerical support) to the Subrecipient or its subcontractor or assignee.

(f) DEO shall not be responsible for withholding taxes with respect to the Subrecipient's use of funds under this Agreement. Subrecipient shall have no claim against DEO for vacation pay, sick leave, retirement benefits, social security, workers' compensation, health or disability benefits, reemployment assistance benefits or employee benefits of any kind. Subrecipient shall ensure that its employees, subcontractors and other agents, receive benefits and necessary insurance (health, workers' compensation, reemployment assistance benefits) from an employer other than the State of Florida.

(g) Subrecipient, at all times during the Agreement, must comply with the reporting and Reemployment Assistance contribution payment requirements of Chapter 443, F.S.

(h) DEO shall not be responsible for providing any training to Subrecipient, its employees, assigns, agents, representatives or subcontractors in the professional skills necessary to perform the work services required by this Agreement; DEO may provide training in the form of an Implementation Workshop in keeping with implementation

Attachment A – Project Description and Deliverables

1. PROGRAM DESCRIPTION: In April 2018, the U.S. Department of Housing and Urban Development (HUD) announced the State of Florida, Department of Economic Opportunity (DEO) would receive $633,485,000 in funding to support long-term mitigation efforts following declared disasters in 2016 and 2017 through HUD's Community Development Block Grant Mitigation (CDBG-MIT) program. Awards were distributed on a competitive basis targeting HUD designated Most Impacted and Distressed (MID) Areas, primarily addressing the Benefits to Low-to-Moderate Income (LMI) National Objective. Additional information may be found in the Federal Register, Vol. 84, No. 169.

The Florida Department of Economic Opportunity (DEO) has apportioned the Federal Award to include the following initiatives: Critical Facility Hardening Program $75,000,000; General Planning Support Program $20,000,000; General Infrastructure Program $475,000,000; and State Planning and Administration $63,485,000.

This award has been granted under the **General Infrastructure Program**. Projects eligible for, but not limited to, funding under this program are infrastructure investments related to the following:

1. Restoration of critical infrastructure
2. Re-nourishment of protective coastal dune systems and state beaches
3. Building or fortifying buildings that are essential to the health, safety and welfare of a community
4. Rehabilitation or construction of stormwater management systems
5. Improvements to drainage facilities
6. Reconstruction of lift stations and sewage treatment plants
7. Road repair and improvement and bridge strengthening

2. PROJECT DESCRIPTION: The City of Opa-Locka, Florida has been awarded Seven Million Dollars and Zero Cents ($7,000,000.00) in CDBG-MIT (Community Block Grant – Mitigation) funding for a Community Flood Protection project involving the 127th Ave. canal, which is approximately 0.6 miles long, is located in the C-7 Canal Basin, and flows west to east discharging into the Spur Canal. The project will consist of canal dredging and restoration to reduce flood risk for the surrounding area. Canal will be stabilized by using a stacked canal bank stabilization (CBS) system.

3. SUBRECIPIENT RESPONSIBILITIES:

A. Complete and submit to DEO within thirty (30) days of Agreement execution a staffing plan which must be reviewed and approved by the DEO Grant Manager prior to implementation. Should any changes to the staffing plan be deemed necessary, an updated plan must be submitted to DEO for review and approval. The Staffing plan must include the following:
   1. Organizational Chart; and
   2. Job descriptions for Subrecipient's employees, contracted staff, vendors, and contractors.

B. Develop and submit a copy of the following policies and procedures to the DEO Grant Manager for review and approval within thirty (30) days of Agreement execution. The DEO Grant Manager will provide approval in writing prior to the policies and procedures being implemented.
   1. Procurement policies and procedures that incorporate 2 CFR Part 200.317-327.
   2. Administrative financial management policies, which must comply with all applicable HUD CDBG-MIT and State of Florida rules.
   3. Quality assurance and quality control system policies and procedures that comply with all applicable HUD CDBG-MIT and DEO policies.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

4. Policies and procedures to detect and prevent fraud, waste and abuse that describe how the Subrecipient will verify the accuracy of applicant information, monitoring policy indicating how and why monitoring is conducted, the frequency of monitoring policy, and which items will be monitored, and procedures for referring instances of fraud, waste and abuse to HUD OIG Fraud Hotline (phone: 1-800-347-3735 or email hotline@hudoig.gov).
5. Policies and procedures for the requirements under 2 CFR 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Award.

C. Attend fraud related training offered by HUD OIG to assist in the proper management of the CDBG-MIT grant funds when available.
D. Upload required documents into a system of record provided by DEO.
E. Complete and submit an updated Project Detail Budget (Attachment B) for review and approval by DEO no later than thirty (30) days after Agreement execution. Any changes to the Project Detail Budget must be submitted in the monthly report submitted to DEO for review and approval by the DEO Grant Manager.
F. Maintain organized Subrecipient agreement files and make them accessible to DEO or its representatives upon request.
G. Comply with all terms and conditions of the Subrecipient Agreement, Infrastructure Program Guidelines, Action Plans, Action Plan amendments, and Federal, State, and local laws.
H. Provide copies of all proposed procurement documents to DEO ten (10) days prior to posting as detailed in Attachment D of Subrecipient Agreement. The proposed procurement documents will be reviewed and approved by DEO Grant Manager. Should the procurement documents require revisions based on state or federal requirements, Subrecipient will be required to postpone procurement and submit revised documents for review and approval.
I. Complete procurement of all applicants for internal grants management and compliance and direct program and product production, including:
    1. Selection of applicants, subrecipients and/or staff that will be responsible for managing applicant intake and related operations, compliance, finance, and administration.
    2. Selection of applicants, subrecipients and/or staff that will be responsible for appraisal, environmental review, title services and legal services.
    3. Copies of all contracts that will be executed by Subrecipient. Contracts must be provided to DEO prior to execution as detailed in Attachment D. Any contract executed by Subrecipient must follow the terms and conditions set forth in this Agreement. Should the submitted contract require necessary additions and/or changes, DEO's Contract Manager will contact Subrecipient regarding changes. Subrecipient is required to submit the updated contract within thirty (30) days. Should the contract not be submitted in a timely manner, Subrecipient will be required to complete the selection process once more.
J. Ensure all projects seeking assistance under the current CDBG-MIT funds, and any future funds allocated for Mitigation, provided by DEO, receive the required Environmental Clearance from DEO prior to Subrecipient being able to commit CDBG-MIT funds.
K. Provide the following documentation to DEO within ten (10) calendars after the end of each month:
    1. A revised detail report measuring the actual cost versus the project cost.
    2. An updated Attachment C which documents any changes to the project progress along with justification for the revision.
L. Develop and submit to DEO a monthly revised detailed timeline for implementation consistent with the milestones outlined in the Mitigation Program Guidelines and report actual progress against the projected progress ten (10) calendar days after the end of each month.
M. Provide the following information on a quarterly basis within ten (10) calendar days of the end of each quarter:
    1. Submit updated organization chart on a quarterly basis with quarterly report.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

2. If staffing changes, there must be s submittal stating the names, job descriptions, on the monthly report deadline.
3. A progress report documenting the following information:
   a. Accomplishments within the past quarter.
   b. Issues or risks that have been faced with resolutions; and
   c. Projected activities to be completed within the following quarter.

N. Subrecipient shall adhere to the deadlines for the project as agreed upon in the Attachment C – Activity Work Plan. If Subrecipient is unable to meet a deadline within thirty (30) calendar days of the due date, Subrecipient shall request an extension of such deadline from DEO in writing at least thirty (30) business days prior to the deadline. Deadlines shall not be extended outside of the term of this Agreement except by a formal amendment executed in accordance with Section (5) Modification of Agreement.

O. Close out report will be no later than sixty (60) calendar days after this Agreement ends or is otherwise terminated.

4. ELIGIBLE TASKS AND DELIVERABLES:

A. Deliverable 1 – Project Implementation

Subrecipient shall:

1. Perform grant management activities to include invoicing, record keeping, preparing and awarding bid to vendor, and financial oversight.
2. Perform Data and Document Management; create and submit all required Semi-Annual reports, Quarterly reports, and other required reports, as well as maintain project files and financial records related to project activities.
3. Ensure compliance to Section 3, Davis-Bacon Labor Standards, and Fair Housing activities.
4. Conduct Environmental review administrative activities (Environmental Exemption, Public Notice Publication(s), etc.).

B. Deliverable 2 – Engineering and Design

Subrecipient shall:

1. Submit a copy of the final design solicitation package, the awarded submittal package, award documentation, contract documentation for the awarded design firm and project delivery schedule at kickoff.
2. Submit a full design package, signed, and sealed by a professional engineer licensed in Florida, including, but not limited to, engineering drawings, specifications, construction cost estimate, surveys, and any other reports, documents, or information relevant to the design showing extent of project reporting at 20%, 40%, 60%, 80% design and final.

C. Deliverable 3 – Construction

Subrecipient shall:

1. Perform clearing and preparation of land including recovery of easement, tree/shrub removal, and any additional necessary removals of construction impediments.
2. Perform dredging of canal, bringing depth to 11ft and width to 30ft.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

3. Perform proper disposal of riverbed pollutants and contaminants in accordance with the Solid Waste Disposal Act and the Federal Water Pollution Control Act.
4. Perform stacked Canal Bank Stabilization (CBS) system on both sides of the canal for the entire length to include grading and sodding.

5. DEO RESPONSIBILITIES:

A. Monitor the ongoing activities of Subrecipient to ensure all activities are being performed in accordance with the Agreement to the extent required by law or deemed necessary be DEO in its discretion
B. Assign a Grant Manager as a point of contact for Subrecipient
C. Review Subrecipient's invoices described herein and process them on a timely basis
D. DEO shall monitor progress, review reports, conduct site visits, as DEO determines necessary at DEO's sole and absolute discretion, and process payments to Subrecipient

6. DELIVERABLES:

Subrecipient agrees to provide the following services as specified:

Deliverable No. 1 - Program Implementation		
Tasks	**Minimum Level of Service**	**Financial Consequences**
Subrecipient shall complete tasks as detailed in Section 4.A. of this Scope of Work.	Subrecipient may request reimbursement upon completion of task listed in 4.A of this Scope of Work as evidenced by submittal of the following documentation: 1) Completed Environmental Review Record 2) Payroll documentation 3) Invoice package in accordance with Section 7 of this scope of Work	Failure to complete the Minimum performance measures as specified shall result in non-payment for this deliverable.
		Deliverable No. 1 Cost: $250,000.00
Deliverable No. 2 – Engineering and Design		
Tasks	**Minimum Level of Service**	**Financial Consequences**
Subrecipient shall complete tasks as detailed in Section 4.B. of this Scope of Work.	Subrecipient may request reimbursement upon completion of task listed in 4.B of this Scope of Work as evidenced by submittal of the following documentation: 1) Copy of all bidding documents 2) Copy of all services contracts 3) Staff payroll documentation 4) Policy memorandum documenting compliance V.C.2 under 84 FR 45838. 5) Updated SOW, budget, and timeline for the project.	Failure to complete the Minimum Level of Service as specified shall result in non-payment for this deliverable.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

	6) Invoice package in accordance with Section 7 of this Scope of Work.	
		Deliverable No. 2 Cost: $700,000.00
Deliverable No. 3 – Construction		
Tasks	**Minimum Level of Service**	**Financial Consequences**
Subrecipient shall complete tasks as detailed in Section 4.C. of this Scope of Work.	Subrecipient may request reimbursement upon completion of task listed in 4.C of this Scope of Work, or upon completion of construction at the 10%, 15%, 25%, 40%, 60%, 75%, 90% and closeout milestones. All reimbursement requests must be evidenced by submittal of the following documentation: 1) AIA forms G702, G703 or their substantive equivalent, certifying that the project, or a quantifiable portion of the project is complete. 2) Photographs of the completed project, or progress made. 3) Invoice package in accordance with Section 7 of this Scope of Work	Failure to complete the Minimum Level of Service as specified shall result in non-payment for this deliverable.
		Deliverable No. 3 Cost: $6,050,000.00
		Total Project Cost Not to Exceed: $7,000,000.00

COST SHIFTING: The deliverable amounts specified within the Deliverables Section 5 table above are established based on the Parties' estimation of sufficient delivery of services fulfilling grant purposes under the Agreement in order to designate payment points during the Agreement Period; however, this is not intended to restrict DEO's ability to approve and reimburse allowable costs Subrecipient incurred providing the deliverables herein. Prior written approval from DEO's Grant Manager is required for changes to the above Deliverable amounts that do not exceed **10%** of each deliverable total funding amount. Changes that exceed **10%** of each deliverable total funding amount will require a formal written amendment request from Subrecipient, as described in **MODIFICATION** section of the Agreement. Regardless, in no event shall DEO reimburse costs of more than the total amount of this Agreement.

7. INVOICE SUBMITTAL

DEO shall reimburse Subrecipient in accordance with Section 5, above. In accordance with the Funding Requirements of s. 215.971(1), F.S. and Section 21 of this Agreement, Subrecipient and its subcontractors may only expend funding under this Agreement for allowable costs resulting from obligations incurred during this Agreement. To be eligible for reimbursement, costs must be in compliance with laws, rules and regulations applicable to expenditures of State funds, including, but not limited to, the Reference Guide for State Expenditures.(https://myfloridacfo.com/docs-sf/accounting-and-auditing-libraries/state-agencies/referenceguideforstateexpenditures4a8dd8e7f6fd4eaeb3eb12363d341f74.pdf?sfvrsn=ae70963d_2).

A. Subrecipient shall provide one (1) invoice for services rendered during the applicable period of time as defined in the deliverable table. In any month no deliverable has been completed, the subrecipient will provide notice that no invoicing will be submitted.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

B. The following documents shall be submitted with the itemized invoice:
   1. A cover letter signed by Subrecipient's Grant Manager certifying that the costs being claimed in the invoice package: (1) are specifically for the project represented to the State in the budget appropriation; (2) are for one or more of the components as stated in Section 5, DELIVERABLES, of this Attachment A; (3) have been paid; and (4) were incurred during this Agreement.
   2. Subrecipient's invoices shall include the date, period in which work was performed, amount of reimbursement, and work completed to date;
   3. A certification by a licensed professional using AIA forms G702 and G703, or their substantive equivalents, certifying that the project, or a quantifiable portion of the project, is complete.
   4. Photographs of the project in progress and completed work;
   5. A copy of all supporting documentation for vendor payments;
   6. A copy of the bank statement that includes the cancelled check or evidence of electronic funds transfer. The State may require any other information from Subrecipient that the State deems necessary to verify that the services have been rendered under this Agreement.

C. Subrecipient's invoice and all documentation necessary to support payment requests must be submitted into DEO's Subrecipient Enterprise Resource Application (SERA). Further instruction on SERA invoicing and reporting, along with a copy of the invoice template, will be provided upon execution of the Agreement.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

1. The Subrecipient shall demonstrate that progress is being made in completing project activities in a timely fashion pursuant to the activity work plan. If the Subrecipient does not comply with the activity work plan schedule, a justification for the delay and a plan for timely accomplishment shall be submitted to DEO within 21 calendar days of receiving DEO's request for justification for the delay. Any project for which the Subrecipient has not completed the activities listed in the Activity Work Plan may be rescinded unless DEO agrees that the Subrecipient has provided adequate justification for the delay.

2. The Subrecipient shall maintain records of expenditure of funds from all sources that will allow accurate and ready comparison between the expenditures and the budget/activity line items as defined in the Project Budget and Activity Work Plan.

3. The Subrecipient shall request DEO's approval for all professional services contracts and/or agreements that will be reimbursed with CDBG-MIT funds. Copies of the following procurement documents must be provided to DEO for review:

   a. When publication of a Request for Proposal (RFP) is used as a means of solicitation, a copy of the advertisement, including an affidavit of publication;
   b. DEO will either approve the procurement or notify the Subrecipient that the procurement cannot be approved because it violates State, Federal or local procurement guidelines. The Subrecipient shall notify DEO in writing no later than 90 calendar days from the effective date of this agreement if it will not be procuring any professional services or if it will be using non-CDBG-MIT funds to pay for professional services.

4. Prior to the obligation or disbursement of any funds, except for administrative expenses and not to exceed $5000, the Subrecipient shall complete the following:
   a. Submit for DEO's approval the documentation required in paragraph 3 above for any professional services contract. The Subrecipient proceeds at its own risk if more than the specified amount is incurred before DEO approves the procurement. If DEO does not approve the procurement of a professional services contract, the local government will not be able to use CDBG-MIT funds for that contract beyond $5,000.
   b. Comply with 24 CFR part 58 and the regulations implementing the National Environmental Policy Act, 40 CFR §§ 1500-1508. When the Subrecipient has completed the environmental review process, it shall submit a Request for Release of Funds and Certification. DEO will issue an Authority to Use Grant Funds (form HUD-7015.16) when this condition has been fulfilled to the satisfaction of DEO. If DEO has not issued an Authority to use Grant Funds within 15 days of Subrecipient's submission of the required documentation, DEO shall provide the Subrecipient a written update regarding the status of the review process. **SUBRECIPIENT SHALL NOT BEGIN CONSTRUCTION BEFORE DEO HAS ISSUED THE "AUTHORITY TO USE GRANT FUNDS."**

5. The Subrecipient agrees to comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S.C. §§ 4601-4655; hereinafter, the "URA"), implementing regulations at 24 CFR part 42, 49 CFR part 24 and 24 CFR § 570.606(b), the requirements of 24 CFR § 42.325 – 42.350 governing the Residential Anti-displacement and Relocation Assistance Plan under section 104(d) of the Housing and Community Development Act of 1974 (42 U.S.C. § 5304(d)), and the requirements in 24 CFR § 570.606(d), governing optional relocation assistance policies.

6. If the Subrecipient undertakes any activity subject to the URA, the Subrecipient shall document completion of the acquisition by submitting all documentation required for a desk monitoring of the acquisition, including a notice to property owners of his or her rights under the URA, an invitation to accompany the appraiser, all appraisals, offer to the owner, acceptance, contract for sale, statement of settlement costs, copy of deed, waiver of rights (for donations), as applicable. The documentation shall be submitted prior to completing the acquisition (closing) so that DEO can determine whether remedial action may be needed. The Subrecipient shall provide relocation assistance to displaced

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

persons as defined by 24 CFR § 570.606(b)(2), that are displaced as a direct result of acquisition, rehabilitation, demolition, or conversion for a CDBG-assisted project.

7. The Subrecipient shall timely submit completed forms for all prime and subcontractors as required by this Agreement, DEO, HUD, and applicable, regulations and guidance laws, specifically including but not limited to:

   a. Certification Regarding Debarment, Suspension, and Other Responsibility Matters (Primary Covered Transactions);
   b. Section 3 Participation Report (Construction Prime Contractor);
   c. Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion (Subcontractor), (if applicable); and
   d. Section 3 Participation Report (Construction Subcontractor), (if applicable).

8. In addition, each construction contract or agreement for new or replacement housing must contain language that requires the contractor to meet the Green Building Standard for Replacement and New Construction of Residential Housing, as defined in the Allocation notice published in the Federal Register Volume 81, Number 224 on Monday, November 21, 2016.

9. For each Request for Funds (RFF) that includes reimbursement of construction costs, the Subrecipient shall provide a copy of the American Institute of Architects (AIA) form G702, Application and Certification for Payment, or a comparable form approved by DEO, signed by the contractor and inspection engineer, and a copy of form G703, Continuation Sheet, or a comparable form approved by DEO. For each RFF that includes construction costs, the Subrecipient shall provide a copy of AIA form G702, or a comparable form approved by DEO, if applicable, signed by the contractor and the local building inspector or housing specialist and a copy of form G703, or a comparable form approved by DEO, if applicable.

10. For each project, when the Subrecipient issues the Notice to Proceed to the contractor(s), copies of the following documents shall be sent to DEO:

    a. Notice to Proceed;
    b. The contractor's performance bond (100 percent of the contract price); and
    c. The contractor's payment bond (100 percent of the contract price).

11. The Subrecipient shall undertake an activity each quarter to affirmatively further fair housing pursuant to 24 CFR § 570.487(b).

12. The Subrecipient shall ensure that a deed restriction is recorded on any real property or facility, excluding easements, acquired with CDBG-MIT funds. This restriction shall limit the use of that real property or facility to the use stated in the subgrant application and that title shall remain in the name of the Subrecipient. Such deed restriction shall be made a part of the public records in the Clerk of Court of the county in which the real property is located. Any future disposition of that real property shall be in accordance with 24 CFR § 570.505. Any future change of use of real property shall be in accordance with 24 CFR § 570.489(j).

13. The Subrecipient shall comply with the historic preservation requirements of the National Historic Preservation Act of 1966, as amended, the procedures set forth in 36 CFR part 800, and the Secretary of the Interior's Standards for Rehabilitation, codified at 36 CFR 67, and Guidelines for Rehabilitating Historic Buildings.

14. Pursuant to section 102(b), Public Law 101-235, 42 U.S.C. § 3545, the Subrecipient shall update and submit Form HUD 2880 to DEO within thirty (30) calendar days of the Subrecipient's knowledge of changes in situations which would require that updates be prepared. The Subrecipient must disclose:

    a. All developers, contractors, consultants and engineers involved in the application or in the planning, development or implementation of the project or CDBG- MIT-funded activity; and
    b. Any person or entity that has a financial interest in the project or activity that exceeds $50,000 or 10 percent of the grant, whichever is less.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

15. If required, the Subrecipient shall submit a final Form HUD 2880, to DEO with the Subrecipient's request for administrative closeout, and its absence or incompleteness shall be cause for rejection of the administrative closeout.

16. Conflicts of interest relating to procurement shall be addressed pursuant to 24 CFR § 570.489(g). Title 24 CFR § 570.489(h) shall apply in all conflicts of interest not governed by 24 CFR § 570.489(g), such as those relating to the acquisition or disposition of real property; CDBG-MIT financial assistance to beneficiaries, businesses or other third parties; or any other financial interest, whether real or perceived. Additionally, the Subrecipient agrees to comply with, and this Agreement is subject to, Chapter 112 F.S.

17. Any payment by the Subrecipient using CDBG-MIT funds for acquisition of any property, right-of-way, or easement that exceeds fair market value as determined through the appraisal process established in HUD Handbook 1378 shall be approved in writing by DEO prior to distribution of the funds. Should the Recipient fail to obtain DEO pre-approval, any portion of the cost of the acquisition exceeding Fair Market Value shall not be paid or reimbursed with CDBG-MIT funds.

18. The Subrecipient shall take photographs or video of all activity locations prior to initiating any construction. As the construction progresses, additional photography or videography shall document the ongoing improvements. Upon completion of construction, final documentation of the activity locations will be provided to DEO with the administrative closeout package for this Agreement.

19. If an activity is designed by an engineer, architect or other licensed professional, it shall be certified upon completion by a licensed professional as meeting the specifications of the design, as may have been amended by change orders. The date of completion of construction shall be noted as part of the certification. This certification shall be accomplished prior to submission of an administrative closeout package and a copy of the certification shall be submitted with the administrative closeout package.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

The CDBG-MIT funds available to the Subrecipient through this agreement constitute a subaward of DEO's Federal award under the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, 2 CFR part 200. This agreement includes terms and conditions of DEO's Federal award that are imposed on the Subrecipient and the Subrecipient agrees to carry out its obligations in compliance with all of the obligations described in this Agreement.

The Subrecipient agrees to, and, by signing this Agreement, certifies that, it will comply with all applicable provisions of the Housing and Community Development Act of 1974, as amended, and the regulations at 24 CFR part 570, as modified by the Federal Register notices that govern the use of CDBG-MIT funds available under this agreement. These Federal Register notices include, but are not limited to, Federal Register Guidance Vol. 84, No. 169/Friday, August 30, 2019/Notices, Vol. 81, No. 224/Monday, November 21, 2016/Notices, Volume 83, No. 28/Friday, February 9, 2018/Notices, Volume 82, No. 11/Wednesday, January 18, 2017/Notices, Volume 82, No. 150/Monday, August 7, 2017/Notices, and Vol. 83, No. 157/Tuesday, August 14, 2018/Notices. Notwithstanding the foregoing, (1) the Subrecipient does not assume any of DEO's responsibilities for environmental review, decision-making and action, described in 24 CFR part 58 and (2) the Subrecipient does not assume any of DEO's responsibilities for initiating the review process under the provisions of 24 CFR Part 52. The Subrecipient shall also comply with all other applicable Federal, state and local laws, regulations and policies as now in effect and as may be amended from time to time that govern the use of the CDBG-MIT funds in complying with its obligations under this agreement, regardless of whether CDBG-MIT funds are made available to the Subrecipient on an advance or reimbursement basis.

The Subrecipient also agrees to use funds available under this Agreement to supplement rather than supplant funds otherwise available. The Subrecipient further agrees to comply with all other applicable Federal, State, and local laws, regulations and policies governing the funds provided under this Agreement, including, but not limited to the following:

1. State of Florida Requirement
   State of Florida Requirements are stated throughout this Agreement and Attachments thereto.

2. Audits, Inspections and Monitoring
   a. Single Audit
      The Subrecipient must be audited as required by 2 CFR part 200, subpart F when it is expected that the Subrecipient's Federal awards expended during the respective fiscal year equaled or exceeded the threshold set forth in §200.501 Audit requirements.

   b. Inspections and Monitoring
      The Subrecipient shall permit DEO and auditors to have access to the Subrecipient's records and financial statements as necessary for DEO to meet the requirements of 2 CFR part 200.

      The Subrecipient must submit to monitoring of its activities by DEO as necessary to ensure that the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of this agreement.

      This review must include:
      (1) Reviewing financial and performance reports required by DEO;
      (2) Following up and ensuring that the Subrecipient takes timely and appropriate action on all deficiencies pertaining to the Federal award provided to the Subrecipient from DEO detected through audits, on-site reviews, and other means; and
      (3) Issuing a management decision for audit findings pertaining to this Federal award provided to the Subrecipient from DEO as required by 2 CFR §200.521.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

c. Corrective Actions
The Subrecipient shall be subject to reviews and audits by DEO, including onsite reviews of the Subrecipient as may be necessary or appropriate to meet the requirements of 42 U.S.C. 5304(e)(2). DEO may issue management decisions and may consider taking enforcement actions if noncompliance is detected during audits. DEO may require the Subrecipient to take timely and appropriate action on all deficiencies pertaining to the Federal award provided to the subrecipient from the pass-through entity detected through audits, on-site. DEO may impose additional conditions on the use of the CDBG-MIT funds to ensure future compliance or provide training and technical assistance as needed to correct noncompliance.

3. Drug-Free Workplace
Subrecipients must comply with drug-free workplace requirements in Subpart B of part 2429, which adopts the government-wide implementation (2 CFR part 182) of sections 5152-5158 of the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, Title V, Subtitle D; 41 U.S.C. 701-707).

4. Procurement and Contractor Oversight
The Subrecipient shall comply with the procurement standards in 2 CFR §200.318 - §200.327 when procuring property and services under this agreement. The Subrecipient shall impose the Subrecipient's obligations under this agreement on its contractors, specifically or by reference, so that such obligations will be binding upon each of its contractors.

The Subrecipient must comply with CDBG regulations regarding debarred or suspended entities, specifically including, 24 CFR 570.609 or 24 CFR 570.489, as applicable. CDBG funds may not be provided to excluded or disqualified persons.

The Subrecipient shall maintain oversight of all activities under this agreement and shall ensure that for any procured contract or agreement, its contractors perform according to the terms and conditions of the procured contracts or agreements, and the terms and conditions of this agreement. To check for debarred or suspended entities, please visit https://www.sam.gov/SAM/

5. Property Standards
Real property acquired by the Subrecipient under this agreement shall be subject to 24 CFR 570.489(j) and 24 CFR 570.200(j). The Subrecipient shall also comply with the Property Standards at 2 CFR 200.310, 2 CFR 200.312, 2 CFR 200.314 through 2 CFR 200.316. The Subrecipient shall also comply with 2 CFR 200.313 Equipment, except that when the equipment is sold, the proceeds shall be program income and equipment not needed by the Subrecipient for activities under this agreement shall be transferred to DEO for its CDBG-MIT program or shall be retained after compensating DEO.

The Subrecipient shall also comply with the Property Standards in 2 CFR 200.310 through 2 CFR 200.316, except to the extent they are inconsistent with 24 CFR 570.200(j) and 24 CFR 570.489(j), in which case Subrecipient shall comply with 24 CFR 570.200(j) and 24 CFR 570.489(j), except to the extent that proceeds from the sale of equipment are program income and subject to the program income requirements under this agreement, pursuant to 24 CFR 570.489(e)(1)(ii).

6. Federal Funding Accountability and Transparency Act (FFATA)
The Subrecipient shall comply with the requirements of 2 CFR part 25 Universal Identifier and System for Award Management (SAM). The Subrecipient must have an active registration in SAM, https://www.sam.gov/SAM/ in accordance with 2 CFR part 25, appendix A, and must have a Unique Entity Identifies (UEI) number https://fedgov.dnb.com/webform/ The Subrecipient must also comply with provisions of the Federal Funding Accountability and Transparency Act, which includes requirements on executive compensation, 2 CFR part 170 Reporting Subaward and Executive Compensation Information.

7. Relocation and Real Property Acquisition
The Subrecipient shall comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (URA), 42 USC 4601 – 4655, 49 CFR part 24, 24 CFR part 42, and 24 CFR 570.606.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

In addition to other URA requirements, these regulations (49 CFR § 24.403(d)) implement Section 414 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 USC § 5181, which provides that "Notwithstanding any other provision of law, no person otherwise eligible for any kind of replacement housing payment under the URA shall be denied such eligibility as a result of his being unable, because of a major disaster as determined by the President, to meet the occupancy requirements set by such Act".

8. Non-discrimination

a. 24 CFR Part 6

The Subrecipient will comply with 24 CFR part 6, which implements the provisions of section 109 of title I of the Housing and Community Development Act of 1974 (Title I) (42 U.S.C. 5309). Section 109 provides that no person in the United States shall, on the ground of race, color, national origin, religion or sex, be excluded from participation in, be denied the benefits of or be subjected to discrimination under any program or activity funded in whole or in part with Federal financial assistance. The Subrecipient will adhere to the prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975 (42 U.S.C. 6101-6107) (Age Discrimination Act) and the prohibitions against discrimination on the basis of disability under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) (Section 504). Section 109 of the HCDA makes these requirements applicable to programs or activities funded in whole or in part with CDBG-MIT funds. Thus, the Subrecipient shall comply with regulations of 24 CFR part 8, which implement Section 504 for HUD programs, and the regulations of 24 CFR part 146, which implement the Age Discrimination Act for HUD programs.

b. Architectural Barriers Act and the Americans with Disabilities Act

The Subrecipient shall ensure that its activities are consistent with requirements of Architectural Barriers Act and the Americans with Disabilities Act. The Architectural Barriers Act of 1968 (42 U.S.C. 4151-4157) requires certain Federal and Federally funded buildings and other facilities to be designed, constructed, or altered in accordance with standards that ensure accessibility to, and use by, physically handicapped people. A building or facility designed, constructed or altered with funds allocated or reallocated under this part after December 11, 1995 and meets the definition of "residential structure" as defined in 24 CFR 40.2 or the definition of "building" as defined in 41 CFR 101-19.602(a) is subject to the requirements of the Architectural Barriers Act of 1968 (42 U.S.C. 4151-4157) and shall comply with the Uniform Federal Accessibility Standards (appendix A to 24 CFR part 40 for residential structures, and appendix A to 41 CFR part 101-19, subpart 101-19.6, for general type buildings).

The Americans with Disabilities Act (42 U.S.C. 12131; 47 U.S.C. 155, 201, 218 and 225) (ADA) provides comprehensive civil rights to individuals with disabilities in the areas of employment, public accommodations, State and local government services and telecommunications. It further provides that discrimination includes a failure to design and construct facilities for first occupancy no later than January 26, 1993, that are readily accessible to and usable by individuals with disabilities. Further, the ADA requires the removal of architectural barriers and communication barriers that are structural in nature in existing facilities, where such removal is readily achievable—that is, easily accomplishable and able to be carried out without much difficulty or expense.

c. State and Local Nondiscrimination Provisions

The Subrecipient must comply with the Florida Small and Minority Business Assistance Act (§§ 288.703-288.706, F.S.); Title VI of the Civil Rights Act of 1964 (24 CFR part 1)

(1) General Compliance

The Subrecipient shall comply with the requirements of Title VI of the Civil Rights Act of 1964 (P.L. 88-352), as amended. No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity funded by this agreement. The specific nondiscrimination provisions at 24 CFR 1.4 apply to the use of these funds. The Subrecipient shall not intimidate, threaten, coerce or discriminate against any person for the purpose of interfering with any right or privilege secured by title VI of the Civil Rights Act of 1964 or 24 CFR part 1, or because an individual has made a complaint, testified, assisted or participated in any manner in an investigation, proceeding or hearing under 24 CFR part 1. The identity of complainants

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

shall be kept confidential except to the extent necessary to carry out the purposes of 2 CFR part 1, including the conduct of any investigation, hearing or judicial proceeding arising thereunder.

(2) Assurances and Real Property Covenants

As a condition to the approval of this Agreement and the extension of any Federal financial assistance, the Subrecipient assures that the program or activities described in this Agreement will be conducted and the housing, accommodations, facilities, services, financial aid or other benefits to be provided will be operated and administered in compliance with all requirements imposed by or pursuant to this part 1.

If the Federal financial assistance under this agreement is to provide or is in the form of personal property or real property or interest therein or structures thereon, the Subrecipient's assurance herein shall obligate the Subrecipient or, in the case of a subsequent transfer, the transferee, for the period during which the property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits, or for as long as the recipient retains ownership or possession of the property, whichever is longer. In all other cases, the assurance shall obligate the Subrecipient for the period during which Federal financial assistance is extended pursuant to the contract or application. This assurance gives DEO and the United States a right to seek judicial enforcement of the assurance and the requirements on real property.

In the case of real property, structures or improvements thereon, or interests therein, acquired with Federal financial assistance under this Agreement or acquired with CDBG-MIT funds and provided to the Subrecipient under this Agreement, the instrument effecting any disposition by the Subrecipient of such real property, structures or improvements thereon, or interests therein, shall contain a covenant running with the land assuring nondiscrimination for the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. If the Subrecipient receives real property interests or funds or for the acquisition of real property interests under this Agreement, to the extent that rights to space on, over, or under any such property are included as part of the program receiving such assistance, the nondiscrimination requirements of this part 1 shall extend to any facility located wholly or in part in such space.

d. Affirmative Action

(1) Approved Plan

The Subrecipient agrees that it shall carry out pursuant to DEO's specifications an Affirmative Action Program in compliance with the President's Executive Order 11246 of September 24, 1965, as amended, and implementing regulations at 41 CFR 60. DEO shall provide Affirmative Action guidelines to the Subrecipient to assist in the formulation of such program. The Subrecipient shall submit a plan for an Affirmative Action Program for approval prior to the release of funds under this agreement.

(2) Women- and Minority-Owned Businesses (W/MBE)

The Subrecipient shall take the affirmative steps listed in 2 CFR 200.321(b)(1) through (5) to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible when the Subrecipient procures property or services under this agreement.

(3) Notifications

The Subrecipient will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or worker's representative of the Subrecipient's commitments hereunder, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) Equal Employment Opportunity and Affirmative Action (EEO/AA) Statement

The Subrecipient shall, in all solicitations or advertisements for employees placed by or on behalf of the Subrecipient, state that it is an Equal Opportunity or Affirmative Action employer.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

9. Labor and Employment

Labor Standards

The Subrecipient shall comply with the in labor standards in Section 110 of the Housing and Community Development Act of 1974, as amended and ensure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed in whole or in part with assistance received under this agreement shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis- Bacon Act, as amended (40 U.S.C. 3141, *et seq.*) and 29 CFR part 1, 3, 5, 6 and 7, provided, that this requirement shall apply to the rehabilitation of residential property only if such property contains not less than 8 units.

The Subrecipient agrees to comply with the Copeland Anti-Kick Back Act (18 U.S.C. 874) and its implementing regulations of the U.S. Department of Labor at 29 CFR part 3 and part 5. The Subrecipient shall maintain documentation that demonstrates compliance with applicable hour and wage requirements. Such documentation shall be made available to DEO for review upon request.

10. Section 3 of the Housing and Urban Development Act of 1968

a. Low-Income Person Definition

A low-income person, as this term is defined in Section 3 (b)(2) of the 1937 Act (42 U.S.C. 1437a(b)(2)). Section 3(b)(2) of the 1937 Act defines this term to mean families (including single persons) whose incomes do not exceed 80 per centum of the median income for the area, as determined by the Secretary, with adjustments for smaller and larger families, except that the Secretary may establish income ceilings higher and or lower than 80 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of prevailing levels of construction costs or unusually high or low-income families; or (ii) A very low-income person, as this term is defined in Section 3(b)(2) of the 1937 Act (42 U.S.C. 1437 a(b)(2)). Section 3(b)(2) of the 1937 Act (42 U.S.C. 1437a(b)(2)) defines this term to mean families (including single persons) whose incomes do not exceed 50 per centum of the median family income for the area, as determined by the Secretary with adjustments for smaller and larger families, except that the Secretary may establish income ceilings higher or lower than 50 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of unusually high or low family incomes.

b. Compliance

Subrecipient shall comply with the provisions of Section 3 of the Housing Urban Development Act of 1968, as amended, 12 USC 1701u, and implementing its implementing regulations at 24 CFR part 75 (formerly 24 CFR part 135). Compliance with Section 3 shall be achieved, to the greatest extent feasible, consistent with existing Federal, state and local laws and regulations. Accordingly, a subrecipient of Section 3-covered assistance is required to develop strategies for meeting both the regulatory requirements at 24 CFR part 75 and any other applicable statutes or regulations. Subrecipient and any of its contractors and subcontractors shall include the following "Section 3 clause" in every "Section 3-covered contract":

(1) The work to be performed under this contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u (Section 3). The purpose of Section 3 is to ensure that employment and other economic opportunities generated by HUD assistance or HUD-assisted projects covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing.

(2) The parties to this contract agree to comply with HUD's regulations in 24 CFR part 75, which implement Section 3. As evidenced by their execution of this contract, the parties to this contract certify that they are under no contractual or other impediment that would prevent them from complying with the part 75 regulations.

(3) The contractor agrees to send to each labor organization or representative of workers with which the contractor has a collective bargaining agreement or other understanding, if any, a notice advising the labor organization or workers' representative of the contractor's commitments under this Section 3 clause, and will post copies of the notice in conspicuous places at the work site where both employees and applicants

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

for training and employment positions can see the notice. The notice shall describe the Section 3 preference, shall set forth minimum number and job titles subject to hire, availability of apprenticeship and training positions, the qualifications for each; and the name and location of the person(s) taking applications for each of the positions; and the anticipated date the work shall begin.

(4) The contractor agrees to include this Section 3 clause in every subcontract subject to compliance with regulations in 24 CFR part 75, and agrees to take appropriate action, as provided in an applicable provision of the subcontract or in this Section 3 clause, upon a finding that the subcontractor is in violation of the regulations in 24 CFR part 75. The contractor will not subcontract with any subcontractor where the contractor has notice or knowledge that the subcontractor has been found in violation of the regulations in 24 CFR part 75.

(5) The contractor will certify that any vacant employment positions, including training positions, that are filled (1) after the contractor is selected but before the contract is executed, and (2) with persons other than those to whom the regulations of 24 CFR part 75 require employment opportunities to be directed, were not filled to circumvent the contractor's obligations under 24 CFR part 75.

(6) Noncompliance with HUD's regulations in 24 CFR part 75 may result in sanctions, termination of this contract for default, and debarment or suspension from future HUD assisted contracts.

(7) With respect to work performed in connection with Section 3 covered Indian housing assistance, Section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e) also applies to the work to be performed under this contract. Section 7(b) requires that to the greatest extent feasible (i) preference and opportunities for training and employment shall be given to Indians, and (ii) preference in the award of contracts and subcontracts shall be given to Indian organizations and Indian-owned Economic Enterprises. Parties to this contract that are subject to the provisions of Section 3 and Section 7(b) agree to comply with Section 3 to the maximum extent feasible, but not in derogation of compliance with Section 7(b).

c. Section 3 Benchmarks and Reporting

A. Benchmarks. Contracts over $200,000 trigger Section 3 Benchmark requirements. When triggered, best efforts must be made to extend Section 3 opportunities to verified Section 3 workers and business concerns to meet these *minimum* numeric goals:

1. Twenty-five percent (25%) of the total hours on a Section 3 project must be worked by Section 3 workers; and
2. Five percent (5%) of the total hours on a Section 3 project must be worked by Targeted Section 3 workers.

B. Reporting. If the subrecipient's reporting indicates that the subrecipient has not met the Section 3 benchmarks described in 24 CFR § 75.23, pursuant to 24 CFR § 75.25(b), the subrecipient must report in a form prescribed by HUD on the qualitative nature of its activities and those its contractors and subcontractors pursued.

C. Recipient will comply with any Section 3 Project Implementation Plan documents provided by HUD or DEO which may be amended from time to time for HUD reporting purposes.

11. Conduct

a. Hatch Act

The Subrecipient shall comply with the Hatch Act, 5 USC 1501 – 1508, and shall ensure that no funds provided, nor personnel employed under this agreement, shall be in any way or to any extent engaged in the conduct of political activities in violation of Chapter 15 of Title V of the U.S.C.

b. Conflict of Interest

In the procurement of supplies, equipment, construction, and services pursuant to this agreement, the Subrecipient shall comply with the conflict of interest provisions in DEO's procurement policies and procedures. In all cases not governed by the conflict of interest provisions in DEO's procurement policies and procedures, the Subrecipient shall comply with the conflict of interest provisions in 24 CFR 570.489(h).

c. Lobbying Certification

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

The Subrecipient hereby certifies that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of it, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement and the extension, continuation, renewal, amendment or modification of any Federal contract, grant, loan, or cooperative agreement;

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, it will complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(3) The language of paragraph (i) through (iv) of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants and contracts under grants, loans and cooperative agreements) and that all subrecipients shall certify and disclose accordingly; and

(4) This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is required by section 1352, title 31, U.S.C. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

d. Religious Activities

The Subrecipient agrees that funds provided under this agreement shall not be utilized for inherently religious activities prohibited by 24 CFR 570.200(j), such as worship, religious instruction, or proselytization.

Equal Treatment for Faith-Based Organizations. Prohibits any State or local government receiving funds under any Department program, or any intermediate organization with the same duties as a governmental entity, from discriminating for or against an organization on the basis of the organization's religious character or affiliation. Prohibits religious organizations from engaging in inherently religious activities, such as worship, religious instruction, or proselytization, as part of the programs or services funded with direct financial assistance.

Prohibits an organization that participates in programs funded by direct financial assistance from the Department, in providing services, from discriminating against a program beneficiary or prospective program beneficiary on the basis of religion or religious belief. Any restrictions on the use of grant funds shall apply equally to religious and non-religious organizations.

e. Environmental Conditions

(1) Prohibition on Choice Limiting Activities Prior to Environmental Review

The Subrecipient must comply with the limitations in 24 CFR 58.22 even though the Subrecipient is not delegated the requirement under Section 104(g) of the HCD Act for environmental review, decision- making and action (see 24 CFR part 58) and is not delegated DEO's responsibilities for initiating the review process under the provisions of 24 CFR Part 52. 24 CFR 58.22 imposes limitations on activities pending clearance and specifically limits commitments of HUD funds or non-HUD funds by any participant in the development process before completion of the environmental review. A violation of this requirement may result in a prohibition on the use of Federal funds for the activity. If DEO has not issued an Authority to Use Grant Funds within 15 days of Subrecipient's submission of the required documentation, DEO shall provide the Subrecipient a written update regarding the status of the review process.

(2) Air and Water

The Subrecipient shall comply with the following requirements insofar as they apply to the performance of this agreement:

(a) Air quality. (1) The Clean Air Act (42 U.S.C. 7401 et. seq.) as amended; particularly section 176(c) and (d) (42 U.S.C. 7506(c) and (d)); and (2) Determining Conformity of Federal Actions to State or Federal Implementation Plans (Environmental Protection Agency—40 CFR parts 6, 51, and 93); and

(b) Federal Water Pollution Control Act, as amended, 33 U.S.C. 1251, *et seq.*, as amended, including the requirements specified in Section 114 and Section 308 of the Federal Water Pollution Control Act, as amended, and all regulations and guidelines issued thereunder.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

(c) The Clean Air and Water Act: If this Contract is in excess of $100,000, Contractor shall comply with all applicable standards, orders or regulations issued under the Clean Air Act, as amended, 42 U.S.C. 7401, Section 508 of the Clean Water Act, as amended, 33 U.S.C. 1368, et seq., Executive Order 11738 and Environmental Protection Agency regulations. Contractor shall report any violation of the above to DEO.

(d) Energy Efficiency: Contractor shall comply with mandatory standards and policies relating to energy efficiency which are contained in the State of Florida's energy conservation plan issued in compliance with the Energy Policy and Conservation Act, Pub. L. 94-163.

(3) Flood Disaster Protection

The Subrecipient shall comply with the mandatory flood insurance purchase requirements of Section 102 of the Flood Disaster Protection Act of 1973, as amended by the National Flood Insurance Reform Act of 1994, 42 USC 4012a. Additionally, the Subrecipient shall comply with Section 582 of the National Flood Insurance Reform Act of 1994, as amended, (42 U.S.C. 5154a), which includes a prohibition on the provision of flood disaster assistance, including loan assistance, to a person for repair, replacement or restoration for damage to any personal, residential, or commercial property if that person at any time has received Federal flood disaster assistance that was conditioned on the person first having obtained flood insurance under applicable Federal law and the person has subsequently failed to obtain and maintain flood insurance as required under applicable Federal law on such property. Section 582 also includes a responsibility to notify property owners of their responsibility to notify transferees about mandatory flood purchase requirements. More information about these requirements is available in the Federal Register notices governing the CDBG-MIT award and listed at the beginning of this Attachment.

(4) Lead-Based Paint

The Subrecipient shall follow DEO's procedures with respect to CDBG assistance that fulfill the objectives and requirements of the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821-4846), the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. 4851-4856), and implementing regulations at part 35, subparts A, B, J, K, and R of this title.

(5) Historic Preservation

The Subrecipient shall comply with the Historic Preservation requirements set forth in the National Historic Preservation Act of 1966, as amended, codified in title 54 of the United States Code, and the procedures set forth in 36 CFR part 800 insofar as they apply to the performance of this agreement.

In general, this requires concurrence from the State Historic Preservation Officer for all rehabilitation and demolition of historic properties that are fifty years old or older or that are included on a Federal, State, or local historic property list.

(6) **Additional Regulations**

(a) The Temporary Assistance for Needy Families Program ("TANF"), 45 CFR Parts 260-265, the Social Services Block Grant ("SSBG"), 42 U.S.C. 1397d, and other applicable federal regulations and policies promulgated thereunder.

(b) Title IX of the Education Amendments of 1972, as amended, 20 U.S.C. 1681, *et seq.*, which prohibits discrimination on the basis of sex in educational programs.

(c) Section 654 of the Omnibus Budget Reconciliation Act of 1981, as amended, 42 U.S.C. 9849, which prohibits discrimination on the basis of race, creed, color, national origin, sex, handicap, political affiliation or beliefs.

(d) The Pro-Children Act: Contractor agrees to comply with the Pro-Children Act of 1994, 20 U.S.C. 6083. Failure to comply with the provisions of the law may result in the imposition of civil monetary penalty up to $1,000 for each violation and/or the imposition of an administrative compliance order on the responsible entity. This clause is applicable to all approved sub-contracts. In compliance with Public Law (Pub. L.) 103-277, the Contract shall not permit smoking in any portion of any indoor facility used for the provision of federally funded services including health, day care, early childhood development, education or library services on a routine or regular basis, to children up to age 18.

(e) Public Announcements and Advertising: When issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with federal money, Contractor shall clearly state (1) the percentage of the total costs of the program or project which will be financed with federal money, (2) the dollar amount of federal funds for the project

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

or program, and (3) percentage and dollar amount of the total costs of the project or program that will be financed by nongovernmental sources.

(f) Purchase of American-Made Equipment and Products: Contractor assures that, to the greatest extent practicable, all equipment and products purchased with funds made available under this Agreement will be American-made.

(g) The Consolidated Appropriations Act, 2010, Division E, Section 511 (Pub. L. 111-117), which prohibits distribution of federal funds made available under the Act to the Association of Community Organizations for Reform Now (ACORN) or its subsidiaries. The Continuing Appropriations Act, 2011, Sections 101 and 103 (Pub. L. 111-242), provides that appropriations made under Pub. L. 111-117 are available under the conditions provided by Pub. L. 111-117.

(h) Contract Work Hours and Safety Standards Act (40 U.S.C. §327–333) — If this Contract involves federal funding in excess of $2,000 for construction contracts or in excess of $2,500 for other contracts that involve the employment of mechanics or laborers, compliance with sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), as supplemented by Department of Labor regulations (29 CFR Part 5) is required. Under section 102 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1 ½ times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

(i) Resource Conservation and Recovery Act (RCRA). Under RCRA (Pub. L. 94–580 codified at 42 U.S.C. 6962), state and local institutions of higher education, hospitals, and non-profit organizations that receive direct Federal awards or other Federal funds shall give preference in their procurement programs funded with Federal funds to the purchase of recycled products pursuant to the EPA guidelines.

(j) Immigration Reform and Control Act. Contractor shall comply with the requirements of the Immigration Reform and Control Act of 1986, which requires employment verification and retention of verification forms for any individuals hired who will perform any services under the contract.

When it is determined that the Subrecipient is in non-compliance with federal or state program requirements, the State may impose any of the additional conditions and/or requirements outlined in 2 CFR § 200.207.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Fair Housing

As a condition for the receipt of CDBG-MIT funds, each Subrecipient must certify that it will "affirmatively further fair housing" in its community. A Subrecipient shall demonstrate its commitment to affirmatively further fair housing by implementing the actions listed below.

Each Subrecipient shall do the following:

1. Have in place a fair housing resolution or ordinance that covers all Federally protected classes (race, color, familial status, handicap, national origin, religion and sex);
2. Designate an employee as the Fair Housing Coordinator who is available during regular business hours to receive fair housing calls;
3. Publish the Fair Housing Coordinator's contact information quarterly in a newspaper of general circulation in the Subrecipient's jurisdiction so that people know who to call to ask fair housing questions or register a complaint. Alternatively, the Subrecipient can post the coordinator's contact information throughout the quarter on the home page of its website;
4. Establish a system to record the following for each fair housing call:
   a) The nature of the call,
   b) The actions taken in response to the call,
   c) The results of the actions taken and
   d) If the caller was referred to another agency, the results obtained by the referral agency;
5. Conduct at least one fair housing activity each quarter. Identical activities (see examples below) shall not be conducted in consecutive quarters; and
6. Display a fair housing poster in the CDBG-MIT Office. (This does not count as a fair housing activity.)

The Subrecipient shall ensure that the fair housing contact person has received training so that he/she can handle fair housing phone inquiries or refer the inquiries to the appropriate people/agencies. Records maintained by the contact will help the community do the following:

1. Define where discriminatory practices are occurring,
2. Help the community measure the effectiveness of its outreach efforts, and
3. Provide the community with a means to gain information that can be used to design and implement strategies that will eliminate fair housing impediments.

Examples of fair housing activities include the following:

1. Making fair housing presentations at schools, civic clubs and neighborhood association meetings;
2. Conducting a fair housing poster contest or an essay contest;
3. Manning a booth and distributing fair housing materials at libraries, health fairs, community events, yard sales and church festivals; and
4. Conducting fair housing workshops for city/county employees, realtors, bank and mortgage company employees, insurance agents and apartment complex owners.

Printing a fair housing notice on a utility bill is no longer accepted as a fair housing activity; however, mailing a DEO-approved fair housing brochure as an insert with utility bills will be accepted as an activity. Placing posters in public buildings does not meet the requirement for a fair housing activity.

The Subrecipient shall document its fair housing activities by keeping photographs, newspaper articles, sign-in sheets and copies of handouts in their CDBG-MIT project file and include information about the activities in the comment section of each quarterly report.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Equal Employment Opportunity

As a condition for the receipt of CDBG-MIT funds, each Subrecipient must certify that it and the contractors, subcontractors, subrecipients and consultants that it hires with CDBG-MIT funds will abide by the Equal Employment Opportunity (EEO) Laws of the United States. A Subrecipient shall demonstrate its commitment to abide by the laws through the actions listed below.

Each Subrecipient shall do the following:

1. Have in place an equal employment opportunity resolution or ordinance that protects its applicants and employees and the applicants and employees of its contractors, subcontractors, subrecipients and consultants from discrimination in hiring, promotion, discharge, pay, fringe benefits, job training, classification, referral and other aspects of employment, on the basis of race, color, religion, sex, national origin, disability, age or genetics;
2. Designate an employee as the EEO Coordinator who is available during regular business hours to receive EEO calls;
3. Publish the EEO Coordinator's contact information quarterly in a newspaper of general circulation in the Subrecipient's jurisdiction so that people know who to call to ask EEO questions or register a complaint. Alternatively, the Subrecipient can post the coordinator's contact information throughout the quarter on the home page of its website; and
4. Establish a system to record the following for each EEO call:
   a) The nature of the call,
   b) The actions taken in response to the call and
   c) The results of the actions taken;
5. Each Subrecipient shall maintain a list of certified minority-owned business enterprises (MBE) and women-owned business enterprises (WBE) that operate in its region. The Subrecipient shall use this list to solicit companies to bid on CDBG-MIT-funded construction activities and shall provide a copy of the list to the prime contractor(s) to use when it hires subcontractors and consultants. The Department of Management Services maintains a list of certified minority- and women-owned businesses that can be used to develop a local MBE/WBE list at the following website: https://osd.dms.myflorida.com/directories.
6. Incorporate the Equal Employment Opportunity clause set forth in 41 CFR Part 60-1.4(b) into any contracts or subcontracts that meet the definition of "federally assisted construction contract" in 41 CFR 60-1.3.

Section 504 and the Americans with Disabilities Act (ADA)

As a condition for the receipt of CDBG-MIT funds, the Subrecipient must certify that it provides access to all federally funded activities to all individuals, regardless of handicap. The Subrecipient shall demonstrate its commitment to abide by the laws through the actions listed below.

The Subrecipient shall do the following:

1. Have in place a resolution or ordinance that is designed to eliminate discrimination against any person who:
   a) Has a physical or mental impairment which substantially limits one or more major life activities,
   b) Has a record of such an impairment, or
   c) Is regarded as having such an impairment;
2. Designate an employee as the Section 504/ADA Coordinator who is available during regular business hours to receive Section 504/ADA calls;
3. Publish the Section 504/ADA Coordinator's contact information quarterly in a newspaper of general circulation in the Subrecipient's jurisdiction so that people know who to call to ask Section 504/ADA questions or register a complaint. Alternatively, the Subrecipient can post the coordinator's contact information throughout the quarter on the home page of its website; and
4. Establish a system to record the following for each Section 504/ADA call:
   a) The nature of the call,
   b) The actions taken in response to the call and

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

c) The results of the actions taken.

Section 504 prohibitions against discrimination (see 45 CFR part 84) apply to service availability, accessibility, delivery, employment and the administrative activities and responsibilities of organizations receiving Federal financial assistance. A Subrecipient of Federal financial assistance may not, on the basis of disability:

1. Deny qualified individuals the opportunity to participate in or benefit from Federally funded programs, services or other benefits,
2. Deny access to programs, services, benefits or opportunities to participate as a result of physical barriers, or
3. Deny employment opportunities, including hiring, promotion, training and fringe benefits, for which they are otherwise entitled or qualified.

The ADA regulations (Title II, 28 CFR part 35, and Title III, 28 CFR part 36) prohibit discrimination on the basis of disability in employment, State and local government, public accommodations, commercial facilities, transportation, and telecommunications. To be protected by the ADA, one must have a disability or have a relationship or association with an individual with a disability.

Title II covers all activities of state and local governments regardless of the government entity's size or receipt of Federal funding. Title II requires that State and local governments give people with disabilities an equal opportunity to benefit from all of their programs, services and activities (e.g. public education, employment, transportation, recreation, health care, social services, courts, voting and town meetings). State and local governments are required to follow specific architectural standards in the new construction and alteration of their buildings. They also must relocate programs or otherwise provide access in inaccessible older buildings, and communicate effectively with people who have hearing, vision or speech disabilities.

Title III covers businesses and nonprofit service providers that are public accommodations, privately operated entities offering certain types of courses and examinations, privately operated transportation and commercial facilities. Public accommodations are private entities who own, lease, lease to or operate facilities such as restaurants, retail stores, hotels, movie theaters, private schools, convention centers, doctors' offices, homeless shelters, transportation depots, zoos, funeral homes, day care centers and recreation facilities including sports stadiums and fitness clubs. Transportation services provided by private entities are also covered by Title III.

Section 3 - Economic Opportunities for Low- and Very Low-Income Persons

Each Subrecipient shall encourage its contractors to hire qualified low- and moderate-income residents for any job openings that exist on CDBG-MIT-funded projects in the community. The Subrecipient and its contractors shall keep records to document the number of low- and moderate-income people who are hired to work on CDBG-MIT-funded projects. The number of low- and moderate-income residents who are hired to work of the project shall be reported in the comment section of the quarterly report.

The following Section 3 clause is required to be included in any contracts and subcontracts funded by this Agreement:

Section 3 Clause

1. The work to be performed under this contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. § 1701u (Section 3). The purpose of Section 3 is to ensure that employment and other economic opportunities generated by HUD assistance or HUD-assisted projects covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are Subrecipients of HUD assistance for housing.

2. The Parties to this contract agree to comply with HUD's regulations in 24 CFR part 75, which implement Section 3. As evidenced by their execution of this contract, the parties to this contract certify that they are under no contractual or other impediment that would prevent them from complying with the part 75 regulations.

3. The contractor agrees to send to each labor organization or representative of workers with which the contractor has a collective bargaining agreement or other understanding, if any, a notice advising the labor organization or workers' representative of the contractor's commitments under this Section 3 clause, and will post copies of the

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

notice in conspicuous places at the work site where both employees and applicants for training and employment positions can see the notice. The notice shall describe the Section 3 preference, shall set forth minimum number and job titles subject to hire, availability of apprenticeship and training positions, the qualifications for each; and the name and location of the person(s) taking applications for each of the positions; and the anticipated date the work shall begin.

4. The contractor agrees to include this Section 3 clause in every subcontract subject to compliance with regulations in 24 CFR part 75, and agrees to take appropriate action, as provided in an applicable provision of the subcontract or in this Section 3 clause, upon a finding that the subcontractor is in violation of the regulations in 24 CFR part 75. The contractor will not subcontract with any subcontractor where the contractor has notice or knowledge that the subcontractor has been found in violation of the regulations in 24 CFR part 75.
5. The contractor will certify that any vacant employment positions, including training positions, that are filled (1) after the contractor is selected but before the contract is executed, and (2) with persons other than those to whom the regulations of 24 CFR part 75 require employment opportunities to be directed, were not filled to circumvent the contractor's obligations under 24 CFR part 75.
6. Noncompliance with HUD's regulations in 24 CFR part 75 may result in sanctions, termination of this contract for default and debarment or suspension from future HUD assisted contracts.
7. With respect to work performed in connection with Section 3 covered Indian housing assistance, Section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. § 450e) also applies to the work to be performed under this contract. Section 7(b) requires that to the greatest extent feasible (i) preference and opportunities for training and employment shall be given to Indians, and (ii) preference in the award of contracts and subcontracts shall be given to Indian organizations and Indian-owned Economic Enterprises. Parties to this contract that are subject to the provisions of Section 3 and Section 7(b) agree to comply with Section 3 to the maximum extent feasible, but not in derogation of compliance with Section 7(b).

Civil Rights Regulations

As a condition for the receipt of CDBG-MIT funds, each Subrecipient must certify that it will abide by the following Federal laws and regulations:

1. Title VI of the Civil Rights Act of 1964 – Prohibits discrimination by government agencies that receive Federal funding;
2. Title VII of the Civil Rights Act of 1964 – prohibits employment discrimination on the basis of race, color, religion, sex or national origin;
3. Title VIII of the Civil Rights Act of 1968 – as amended (the Fair Housing Act of 1988);
4. 24 CFR § 570.487(b) – Affirmatively Furthering Fair Housing;
5. 24 CFR § 570.490(b) – Unit of general local government's record;
6. 24 CFR § 570.606(b) – Relocation assistance for displaced persons at URA levels;
7. Age Discrimination Act of 1975;
8. Executive Order 12892 – Leadership and Coordination of Fair Housing in Federal Programs: Affirmatively Furthering Fair Housing;
9. Section 109 of the Housing and Community Development Act of 1974 – No person shall be excluded from participation in, denied benefits of or subjected to discrimination under any program or activity receiving CDBG-MIT funds because of race, color, religion, sex or national origin;
10. Section 504 of the Rehabilitation Act of 1973 and 24 CFR part 8, which prohibits discrimination against people with disabilities;
11. Executive Order 11063 – Equal Opportunity in Housing;
12. Executive Order 11246 – Equal Employment Opportunity; and
13. Section 3 of the Housing and Urban Development Act of 1968, as amended – Employment/Training of Lower Income Residents and Local Business Contracting.

Attachment G – Reports

The following reports must be completed and submitted to DEO in the time frame indicated below. Failure to timely file these reports constitutes an Event of Default, as defined in Paragraph (10) Default, of this Agreement.

1. **Monthly Progress Report** must be submitted to DEO ten (10) calendar days after the end of each month.

2. A **Quarterly Progress** Report must be submitted to DEO on forms to be provided by DEO no later than the 10th of every April, July, October and January.

3. A **Contract and Subcontract Activity** form, Form HUD-2516, currently available at https://www.hud.gov/sites/documents/DOC_36660; which is incorporated herein by reference, must be submitted by April 15 and October 15 each year through the DEO's SERA reporting system. The form must reflect all contractual activity for the period, including Minority Business Enterprise and Woman Business Enterprise participation. If no activity has taken place during the reporting period, the form must indicate "no activity".

   The Subrecipient shall closeout its use of the CDBG-MIT funds and its obligations under this Agreement by complying with the closeout procedures in 2 CFR § 200.343. Activities during this close-out period may include, but are not limited to: making final payments, disposing of program assets (including the return of all unused materials, equipment, unspent cash advances, program income balances and accounts receivable to the Subrecipient) and determining the custodianship of records.

   Notwithstanding the terms of 2 CFR 200.343, upon the expiration of this Agreement, the Subrecipient shall transfer to the recipient any CDBG-MIT funds on hand at the time of expiration and any accounts receivable attributable to the use of CDBG-MIT funds. Further, any real property under the Subrecipient's control that was acquired or improved in whole or in part with CDBG-MIT funds (including CDBG-MIT funds provided to the Subrecipient in the form of a loan) shall be treated in accordance with 24 CFR 570.503(b)(7).

4. In accordance with 2 CFR part 200, should the Subrecipient meet the threshold for submission of a single or program specific audit, the audit must be conducted in accordance with 2 CFR part 200 and submitted to DEO no later than nine months from the end of the Subrecipient's fiscal year. If the Subrecipient did not meet the audit threshold, an **Audit Certification Memo** must be provided to DEO no later than nine months from the end of the Subrecipient's fiscal year.

5. A copy of the **Audit Compliance Certification** form, Attachment J, must be emailed to audit@deo.myflorida.com within sixty (60) calendar days of the end of each fiscal year in which this subgrant was open.

6. **Section 3 Quarterly Reporting Requirements**. Reporting of labor hours for Section 3 projects must comply with 24 CFR §75.25(a). Subrecipients must report the following: (i) the total number of labor hours worked; (ii) the total number of labor hours worked by Section 3 workers; and (iii) the total number of labor hours worked by Targeted Section 3 workers. If Section 3 benchmarks are not met, the subrecipient's qualitative efforts must be reported in a manner required by 24 CFR §75.25(b).

   Subrecipients shall provide Section 3 Reporting quarterly to DEO by the 10th of each quarter (January 10, April 10, July 10, and October 10). For Section 3 Reporting, Subrecipients should complete and return the Project Implementation Plan template to DEO.

7. Request for Funds must be submitted as required by DEO and in accordance with the ***Project Description and Deliverables***, ***Project Budget and Activity Work Plan.***

8. All forms referenced herein are available online or upon request from DEO's grant manager for this Agreement.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Financial Management

The Subrecipient's financial management system must comply with the provisions of 2 CFR part 200 (and particularly 2 C.F.R 200.302 titled "Financial Management"), Section 218.33, F.S., and include the following:

1. Accurate, current and complete disclosure of the financial results of this project or program.
2. Records that identify the source and use of funds for all activities. These records shall contain information pertaining to grant awards, authorizations, obligations, unobligated balances, assets, outlays, income and interest.
3. Effective control over and accountability for all funds, property and other assets. The Subrecipient shall safeguard all assets and assure that they are used solely for authorized purposes.
4. Comparison of expenditures with budget amounts for each Request for Funds (RFF). Whenever appropriate, financial information should be related to performance and unit cost data.
5. Written procedures to determine whether costs are allowed and reasonable under the provisions of the 2 CFR part 200 (and particularly 2 CFR 200 Subpart E titled "Costs Principles") and the terms and conditions of this Agreement.
6. Cost accounting records that are supported by backup documentation.

Competition

All procurement transactions must follow the provisions of 2 CFR §§ 200.318-200.327 and be conducted in a manner providing full and open competition. The Subrecipient shall be alert to conflicts of interest as well as noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids or requests for proposals shall be excluded from competing for such procurements. Awards must be made to the responsible and responsive bidder or offeror whose proposal is most advantageous to the program, considering the price, quality and other factors. Solicitations shall clearly set forth all requirements that the bidder or offeror must fulfill in order for the bid or offer to be evaluated by the Subrecipient. Any and all bids or offers may be rejected if there is a sound, documented reason.

Codes of Conduct

The Subrecipient shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of contracts. No employee, officer or agent shall participate in the selection, award or administration of a contract supported by a Federal award if he or she has a real or apparent conflict of interest. Such a conflict would arise when the employee, officer or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated, has a financial or other interest in a tangible personal benefit from a firm considered for a contract. The officers, employees and agents of the Subrecipient shall neither solicit nor accept gratuities, favors or anything of monetary value from contractors or parties to subcontracts. The standards of conduct must provide for disciplinary actions to be applied for violations of the standards by officers, employees or agents of the Subrecipient. (*See* 2 CFR § 200.318(c)(1).)

Business Hours

The Subrecipient shall have its offices open for business, with the entrance door open to the public, and at least one employee on site at all reasonable times for business. "Reasonable" shall be construed according to circumstances, but ordinarily shall mean normal business hours of 8:00 a.m. to 5:00 p.m., local time, Monday through Friday.

Licensing and Permitting

All contractors or employees hired by the Subrecipient shall have all current licenses and permits required for all of the particular work for which they are hired by the Subrecipient.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

The administration of resources awarded by DEO to the Subrecipient may be subject to audits and/or monitoring by DEO as described in this section.

MONITORING

In addition to reviews of audits conducted in accordance with 2 CFR 200 Subpart F - Audit Requirements, and section 215.97, F.S., as revised (see "AUDITS" below), monitoring procedures may include, but not be limited to, on-site visits by DEO staff, limited scope audits as defined by 2 CFR §200.425, or other procedures. By entering into this Agreement, the Subrecipient agrees to comply and cooperate with any monitoring procedures or processes deemed appropriate by DEO. In the event DEO determines that a limited scope audit of the Subrecipient is appropriate, the Subrecipient agrees to comply with any additional instructions provided by DEO staff to the Subrecipient regarding such audit. The Subrecipient further agrees to comply and cooperate with any inspections, reviews, investigations or audits deemed necessary by the Chief Financial Officer (CFO) or Auditor General.

AUDITS

PART I: FEDERALLY FUNDED. This part is applicable if the Subrecipient is a state or local government or nonprofit organization as defined in 2 CFR §200.1.

1. A Subrecipient that expends $750,000 or more in federal awards in its fiscal year must have a single or program-specific audit conducted in accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements. EXHIBIT 1 to this form lists the federal resources awarded through DEO by this agreement. In determining the federal awards expended in its fiscal year, the Subrecipient shall consider all sources of federal awards, including federal resources received from DEO. The determination of amounts of federal awards expended should be in accordance with the guidelines established in 2 CFR §§200.502-503. An audit of the Subrecipient conducted by the Auditor General in accordance with the provisions of 2 CFR §200.514 will meet the requirements of this Part.

2. For the audit requirements addressed in Part I, paragraph 1, the Subrecipient shall fulfill the requirements relative to auditee responsibilities as provided in 2 CFR §§200.508-512.

3. A Subrecipient that expends less than $750,000 in federal awards in its fiscal year is not required to have an audit conducted in accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements. If the Subrecipient expends less than $750,000 in federal awards in its fiscal year and elects to have an audit conducted in accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, the cost of the audit must be paid from non-federal resources (i.e., the cost of such an audit must be paid from Subrecipient resources obtained from other than federal entities).

PART II: STATE FUNDED. This part is applicable if the Subrecipient is a non-state entity as defined by Section 215.97(2), F.S.

1. In the event that the Subrecipient expends a total amount of state financial assistance equal to or in excess of $750,000 in any fiscal year of such Subrecipient (for fiscal years ending June 30, 2017, and thereafter), the Subrecipient must have a state single or project-specific audit for such fiscal year in accordance with section 215.97, F.S.; Rule Chapter 69I-5, F.A.C., State Financial Assistance; and Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. EXHIBIT 1 to this form lists the state financial assistance awarded through DEO by this agreement. In determining the state financial assistance expended in its fiscal year, the Subrecipient shall consider all sources of state financial assistance, including state financial assistance received from DEO, other state agencies, and other nonstate entities. State financial assistance does not include federal direct or pass-through awards and resources received by a nonstate entity for federal program matching requirements.

2. For the audit requirements addressed in Part II, paragraph 1, the Subrecipient shall ensure that the audit complies with the requirements of section 215.97(8), F.S. This includes submission of a financial reporting

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

package as defined by section 215.97(2), F.S., and Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.

3. If the Subrecipient expends less than $750,000 in state financial assistance in its fiscal year (for fiscal years ending June 30, 2017, and thereafter), an audit conducted in accordance with the provisions of section 215.97, F.S., is not required. If the Subrecipient expends less than $750,000 in state financial assistance in its fiscal year and elects to have an audit conducted in accordance with the provisions of section 215.97, F.S., the cost of the audit must be paid from the nonstate entity's resources (i.e., the cost of such an audit must be paid from the Subrecipient's resources obtained from other than state entities).

PART III: OTHER AUDIT REQUIREMENTS

(NOTE: This part would be used to specify any additional audit requirements imposed by the State awarding entity that are solely a matter of that State awarding entity's policy (i.e., the audit is not required by Federal or State laws and is not in conflict with other Federal or State audit requirements). Pursuant to Section 215.97(8), F.S., State agencies may conduct or arrange for audits of state financial assistance that are in addition to audits conducted in accordance with Section 215.97, F.S. In such an event, the State awarding agency must arrange for funding the full cost of such additional audits.)

N/A

PART IV: REPORT SUBMISSION

1. Copies of reporting packages for audits conducted in accordance with 2 CFR 200, Subpart F - Audit Requirements, and required by Part I of this form shall be submitted, when required by 2 CFR § 200.512, by or on behalf of the Subrecipient directly to the Federal Audit Clearinghouse (FAC) as provided in 2 CFR § 200.1 and §200.512.

   The FAC's website provides a data entry system and required forms for submitting the single audit reporting package. Updates to the location of the FAC and data entry system may be found at the OMB website.

2. Copies of financial reporting packages required by Part II of this form shall be submitted by or on behalf of the Subrecipient directly to each of the following:

   a. DEO at each of the following addresses:

   Electronic copies (preferred):
   Audit@deo.myflorida.com

   or

   Paper (hard copy):
   Department Economic Opportunity
   MSC # 75, Caldwell Building
   107 East Madison Street
   Tallahassee, FL 32399-4126

   b. The Auditor General's Office at the following address:

   Auditor General
   Local Government Audits
   342 Claude Pepper Building, Room 401
   111 West Madison Street
   Tallahassee, Florida 32399-1450

   The Auditor General's website (https://flauditor.gov/) provides instructions for filing an electronic copy of a financial reporting package.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29
DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

3. Copies of reports or the management letter required by Part III of this form shall be submitted by or on behalf of the Subrecipient directly to:

Electronic copies (preferred):	or	Paper (hard copy):
Audit@deo.myflorida.com		Department Economic Opportunity MSC # 75, Caldwell Building 107 East Madison Street Tallahassee, FL. 32399-4126

4. Any reports, management letters, or other information required to be submitted DEO pursuant to this agreement shall be submitted timely in accordance with 2 CFR §200.512, section 215.97, F.S., and Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, as applicable.

5. Subrecipients, when submitting financial reporting packages to DEO for audits done in accordance with 2 CFR 200, Subpart F - Audit Requirements, or Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, should indicate the date that the reporting package was delivered to the Subrecipient in correspondence accompanying the reporting package.

PART V: RECORD RETENTION. The Subrecipient shall retain sufficient records demonstrating its compliance with the terms of this Agreement for a period of five (5) years from the date the audit report is issued, or six (6) state fiscal years after all reporting requirements are satisfied and final payments have been received, whichever period is longer, and shall allow DEO, or its designee, CFO, or Auditor General access to such records upon request. The Subrecipient shall ensure that audit working papers are made available to DEO, or its designee, CFO, or Auditor General upon request for a period of six (6) years from the date the audit report is issued, unless extended in writing by DEO. In addition, if any litigation, claim, negotiation, audit, or other action involving the records has been started prior to the expiration of the controlling period as identified above, the records shall be retained until completion of the action and resolution of all issues which arise from it, or until the end of the controlling period as identified above, whichever is longer.

Exhibit 1 to Attachment I – Funding Sources

Federal Resources Awarded to the Subrecipient Pursuant to this Agreement Consist of the Following:

Federal Awarding Agency:	U.S. Department of Housing and Urban Development
Federal Funds Obligated to Subrecipient:	*$7,000,000.00*
Catalog of Federal Domestic Assistance Title:	Community Development Block Grants/State's Program and Non-Entitlement Grants in Hawaii
Catalog of Federal Domestic Assistance Number:	14.228
Project Description: *This is not a research and development award.*	Funding is being provided to the City of Opa-Locka for a Community Flood Protection project involving the 127th Ave. canal, which is approximately 0.6 miles long, is located in the C-7 Canal Basin, and flows west to east discharging into the Spur Canal. The project will consist of canal dredging and restoration to reduce flood risk for the surrounding area. Canal will be stabilized by using a stacked canal bank stabilization (CBS) system.

Compliance Requirements Applicable to the Federal Resources Awarded Pursuant to this Agreement are as Follows:

Federal Program

1. The Subrecipient shall perform its obligations in accordance with Sections 290.0401- 290.048, F.S.
2. The Subrecipient shall perform its obligations in accordance with 24 CFR §§ 570.480 – 570.497.
3. The Subrecipient shall perform the obligations as set forth in this Agreement, including any attachments or exhibits thereto.
4. The Subrecipient shall perform the obligations in accordance with chapter 73C-23.0051(1) and (3), F.A.C.
5. The Subrecipient shall be governed by all applicable laws, rules and regulations, including, but not necessarily limited to, those identified in Award Terms & Conditions and Other Instructions of the Subrecipient's Notice of Subgrant Award/Fund Availability (NFA).

State Resources Awarded to the Subrecipient Pursuant to this Agreement Consist of the Following: *N/A*

Matching Resources for Federal Programs: *N/A*

Subject to Section 215.97, Florida Statutes: *N/A*

Compliance Requirements Applicable to State Resources Awarded Pursuant to this Agreement are as Follows: *N/A*

NOTE: Title 2 CFR § 200.331 and Section 215.97(5), F.S., require that the information about Federal Programs and State Projects included in Exhibit 1 and the Notice of Subgrant Award/Fund Availability be provided to the Subrecipient.

Attachment J – Audit Compliance Certification

Email a copy of this form within 60 days of the end of each fiscal year in which this subgrant was open to audit@deo.myflorida.com.	
Subrecipient:	
FEIN:	Subrecipient's Fiscal Year:
Contact Name:	Contact's Phone:
Contact's Email:	

1. Did the Subrecipient expend state financial assistance, during its fiscal year that it received under any agreement (e.g., contract, grant, memorandum of agreement, memorandum of understanding, economic incentive award agreement, etc.) between the Subrecipient and the Department of Economic Opportunity (DEO)? ☐ Yes ☐ No

   If the above answer is yes, answer the following before proceeding to item 2.

   Did the Subrecipient expend $750,000 or more of state financial assistance (from DEO and all other sources of state financial assistance combined) during its fiscal year? ☐ Yes ☐ No

   If yes, the Subrecipient certifies that it will timely comply with all applicable State single or project-specific audit requirements of Section 215.97, Florida Statutes and the applicable rules of the Department of Financial Services and the Auditor General.

2. Did the Subrecipient expend federal awards during its fiscal year that it received under any agreement (e.g., contract, grant, memorandum of agreement, memorandum of understanding, economic incentive award agreement, etc.) between the Subrecipient and DEO? ☐ Yes ☐ No

   If the above answer is yes, also answer the following before proceeding to execution of this certification:

   Did the Subrecipient expend $750,000 or more in federal awards (from DEO and all other sources of federal awards combined) during its fiscal year? ☐ Yes ☐ No

   If yes, the Subrecipient certifies that it will timely comply with all applicable single or program-specific audit requirements of 2 CFR part 200, subpart F, as revised.

By signing below, I certify, on behalf of the Subrecipient, that the above representations for items 1 and 2 are true and correct.

Appendix II to Part 200 - Contract Provisions for Non-Federal Entity Contracts Under Federal Awards

In addition to other provisions required by the Federal agency or non-Federal entity, all contracts made by the non-Federal entity under the Federal award must contain provisions covering the following, as applicable.

(A) Contracts for more than the simplified acquisition threshold, which is the inflation adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41 U.S.C. 1908, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate.

(B) All contracts in excess of $10,000 must address termination for cause and for convenience by the non-Federal entity including the manner by which it will be affected and the basis for settlement.

(C) Equal Employment Opportunity. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

(E) Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-Federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

(F) Rights to Inventions Made Under a Contract or Agreement. If the Federal award meets the definition of "funding agreement" under 37 CFR § 401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

(G) Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended - Contracts and subgrants of amounts in excess of $150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

(H) Debarment and Suspension (Executive Orders 12549 and 12689) - A contract award (see 2 CFR 180.220) must not be made to parties listed on the governmentwide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR part 1986 Comp., p. 189) and 12689 (3 CFR part 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

(I) Byrd Anti-Lobbying Amendment (31 U.S.C. 1352) - Contractors that apply or bid for an award exceeding $100,000 must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

(J) See 200.323 – Procurement of Recovered Materials.

(K) See 200.216 – Prohibition on certain telecommunications and video surveillance services or equipment.

(L) See 200.322 – Domestic Preferences for procurements.

Attachment M

State of Florida
Department of Economic Opportunity

Federally Funded
Community Development Block Grant
Disaster Recovery (CDBG-MIT) Subrogation Agreement

This Subrogation and Assignment Agreement ("Agreement") is made and entered into by and between the City of Opa-Locka hereinafter referred to as "Subrecipient") and the State of Florida, Department of Economic Opportunity (hereinafter referred to as "DEO").

In consideration of Subrecipient's receipt of funds or the commitment by DEO to evaluate Subrecipient's application for the receipt of funds (collectively, the "Grant Proceeds") under the DEO Community Development Block Grant-Mitigation Program (the "CDBG-MIT Program") administered by DEO, Subrecipient hereby assigns to DEO all of Subrecipient's future rights to reimbursement and all payments received from any grant, subsidized loan, lawsuit or insurance policies of any type or coverage or under any reimbursement or relief program related to or administered by the Federal Emergency Management Agency ("FEMA") or the Small Business Administration ("SBA") (singularly, a "Disaster Program" and collectively, the "Disaster Programs") that was the basis of the calculation of Grant Proceeds paid or to be paid to Subrecipient under the CDBG-MIT Program and that are determined in the sole discretion of DEO to be a duplication of benefits ("DOB") as provided in this Agreement.

The proceeds or payments referred to in the preceding paragraph, whether they are from insurance, FEMA or the SBA or any other source, and whether or not such amounts are a DOB, shall be referred to herein as "Proceeds," and any Proceeds that are a DOB shall be referred to herein as "DOB Proceeds." Upon receiving any Proceeds, Subrecipient agrees to immediately notify DEO who will determine in its sole discretion if such additional amounts constitute a DOB. If some or all of the Proceeds are determined to be a DOB, the portion that is a DOB shall be paid to DEO, to be retained and/or disbursed as provided in this Agreement. The amount of DOB determined to be paid to DEO shall not exceed the amount received from the CDBG-MIT Program.

Subrecipient agrees to assist and cooperate with DEO to pursue any of the claims Subrecipient has against the insurers for reimbursement of DOB Proceeds under any such policies. Subrecipient's assistance and cooperation shall include but shall not be limited to allowing suit to be brought in Subrecipient's name(s) and providing any additional documentation with respect to such consent, giving depositions, providing documents, producing record and other evidence, testifying at trial and any other form of assistance and cooperation reasonably requested by DEO. Subrecipient further agrees to assist and cooperate in the attainment and collection of any DOB Proceeds that the Subrecipient would be entitled to under any applicable Disaster Program.

If requested by DEO, Subrecipient agrees to execute such further and additional documents and instruments as may be requested to further and better assign to DEO, to the extent of the Grant Proceeds paid to Subrecipient under the CDBG-MIT Program, the Policies, any amounts received under the Mitigation Programs that are DOB Proceeds and/or any rights thereunder, and to take, or cause to be taken, all actions and to do, or cause to be done, all things requested by DEO to consummate and make effective the purposes of this Agreement.

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29
DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

Subrecipient explicitly allows DEO to request of any company with which Subrecipient held insurance policies, or FEMA or the SBA or any other entity from which Subrecipient has applied for or is receiving Proceeds, any non-public or confidential information determined to be reasonably necessary by DEO to monitor/enforce its interest in the rights assigned to it under this Agreement and give Subrecipient's consent to such company to release said information to DEO.

If Subrecipient (or any lender to which DOB Proceeds are payable to such lender, to the extent permitted by superior loan documents) hereafter receives any DOB Proceeds, Subrecipient agrees to promptly pay such amounts to DEO, if Subrecipient received Grant Proceeds under the CDBG-MIT Program in an amount greater than the amount Subrecipient would have received if such DOB Proceeds had been considered in the calculation of Subrecipient's award.

In the event that the Subrecipient receives or is scheduled to receive any subsequent Proceeds, Subrecipient shall pay such subsequent Proceeds directly to DEO, and DEO will determine the amount, if any, of such subsequent Proceeds that are DOB Proceeds ("Subsequent DOB Proceeds"). Subsequent Proceeds in excess of Subsequent DOB Proceeds shall be returned to the Subrecipient. Subsequent DOB Proceeds shall be disbursed as follows:

1. If the Subrecipient has received full payment of the Grant Proceeds, any Subsequent DOB Proceeds shall be retained by DEO.
2. If the Subrecipient has received no payment of the Grant Proceeds, any Subsequent DOB Proceeds shall be used by DEO to reduce payments of the Grant Proceeds to the Subrecipient, and all Subsequent DOB Proceeds shall be returned to the Subrecipient.
3. If the Subrecipient has received a portion of the Grant Proceeds, any Subsequent DOB Proceeds shall be used, retained and/or disbursed in the following order: (A) Subsequent DOB Proceeds shall first be used to reduce the remaining payments of the Grant Proceeds, and Subsequent DOB Proceeds in such amount shall be returned to the Subrecipient; and (B) any remaining Subsequent DOB Proceeds shall be retained by DEO.
4. If DEO makes the determination that the Subrecipient does not qualify to participate in the CDBG-MIT Program or the Subrecipient determines not to participate in the CDBG-MIT Program, the Subsequent DOB Proceeds shall be returned to the Subrecipient, and this Agreement shall terminate.

Once DEO has recovered an amount equal to the Grant Proceeds paid to Subrecipient, DEO will reassign to Subrecipient any rights assigned to DEO pursuant to this Agreement.

Subrecipient represents that all statements and representations made by Subrecipient regarding Proceeds received by Subrecipient shall be true and correct as of the date of the signing of this Agreement.

Warning: Any person who intentionally or knowingly makes a false claim or statement to HUD may be subject to civil or criminal penalties under 18 U.S.C. 287, 1001 and 31 U.S.C. 3729.

Remainder of this page is intentionally left blank

DocuSign Envelope ID: 2B831CC7-B050-4F97-A757-315FADDA7E29

The person executing this Agreement on behalf of the Subrecipient hereby represents that he\she has received, read, and understands this notice of penalties for making a false claim or statement regarding Proceeds received by Subrecipient.

In any proceeding to enforce this Agreement, DEO shall be entitled to recover all costs of enforcement, including actual attorney's fees.

Environmental Review
for Activity/Project that is Exempt or Categorically Excluded Not Subject to Section 58.5
Pursuant to 24 CFR Part 58.34(a) and 58.35(b)

This is a suggested format that may be used by Responsible Entities to document completion of an Exempt or Categorically Excluded Not Subject to Section 58.5 environmental review.

Project Information

Project Name: NW 127th Street Canal Bank Stabilization

Responsible Entity: City of Opa-locka

Grant Recipient (if different than Responsible Entity): Click or tap here to enter text.

State/Local Identifier: MT123

Preparer: Adelina Gross

Certifying Officer Name and Title: John H. Taylor, Mayor

Consultant (if applicable): Click or tap here to enter text.

Project Location: NW 127th Street, Opa-locka FL 33054

Description of the Proposed Project [24 CFR 58.32; 40 CFR 1508.25]**:**
The project is located in the NW 127th Street Canal is approximately 0.6 miles long, is located in the C-7 (Little River) Canal Basin between NW 37th Ave and 32nd Ave along NW 127th Street. The NW 127th Street Canal begins at NW 47th Avenue and flows west to east discharging into the Spur Canal. The Spur Canal flows primarily south and makes an open connection with the C-7 Canal at NW 107th Street.
The three reaches that comprise the N.W. 127th Street Canal system are as follows:

- Segment #7- Flows 5,200 feet from Cairo Lane to the confluence of the Spur Canal, which is 400 feet of NW 27th Avenue.
- Segment #8- Flows from NW 42nd Avenue (Le Jeune Road) 3,200 feet to Cairo Lane.
- Segment #9- Begins at N.W 47th Avenue on the east side of Gratigny Parkway and flows east to N.W. 42nd Avenue for 2,100 feet.
    - Proposed improvements:
- 1) Construct steel sheet pile wall with concrete cap along northern bank of the canal at 20 feet offset from the canal R/W line. The improvements will facilitate 20' wide maintenance berm along most
- of the northern properties.
- 2) Construct steel sheet pile wall with concrete cap along southern bank of the canal at 5 feet offset from the canal R/W line. The improvements will prevent further erosion along the canal bank.

- 3) Dredge the canal to have a consistent canal bottom elevation of (-)15.00 feet NAVD between the
- proposed sheet pile walls.

Level of Environmental Review Determination:

☒ Activity/Project is Exempt per 24 CFR 58.34(a): *(choose all that apply below)*

x	1.	Environmental and other studies, resource identification and the development of plans and strategies;
	2.	Information and financial services;
x	3.	Administrative and Management Activities;
	4.	Public services that will not have a physical impact or result in any physical changes, including but not limited to, services concerned with employment, crime prevention, child-care, health, drug abuse, education, counseling, energy conservation and welfare or recreational needs;
x	5.	Inspections and testing of properties for hazards or defects;
	6.	Purchase of insurance;
	7.	Purchase of tools;
x	8.	Engineering or design costs;
	9.	Technical assistance and training;
x	10.	Assistance for temporary or permanent improvements that do not alter environmental conditions and are limited to protection, repair, or restoration activities necessary only to control or arrest the effects from disasters or imminent threats to public safety including those resulting from physical deterioration; *{This exemption applies only in certain circumstances; HUD has released clarification regarding the use and applicability of this exemption. Documentation of Compliance with 24 CFR Part 58.6 required when this exemption is used.}*
	11.	Payment of principal and interest on loans made or obligations guaranteed by HUD;
	12.	Any of the categorical exclusions listed in Sec. 58.35(a) provided that if there are no circumstances that require compliance with any other federal laws and authorities cited in Section 58.5. *{Before you can consider activities listed in Sec. 58.35(a) as exempt activities, you must complete the categorical exclusion checklist and related review process. Documentation of Compliance with 24 CFR Part 58.6 is required}*

☐ Activity/Project is Categorically Excluded Not Subject To §58.5 per 24 CFR 58.35(b): *(choose all that apply below)*

	1.	Tenant-based rental assistance;
	2.	Supportive services including, but not limited to, health care, housing services, permanent housing placement, day care, nutritional services, short-term payments for rent/mortgage/utility costs, and assistance in gaining access to local, state, and federal government benefits and services;
	3.	Operating cost including maintenance, security, operations, utilities, furnishings, equipment, supplies, staff training and recruitment and other incidental costs;
	4.	Economic development activities, including but not limited to, equipment purchase, inventory financing, interest subsidy, operating expenses and similar costs not associated with construction or expansion of existing operations;
	5.	Activities to assist homebuyers to purchase existing dwelling units or dwelling units under construction, including closing costs and down payment assistance, interest buydowns, and similar activities which result in transfer of title;
	6.	Affordable housing pre-development costs including legal, consulting, developer and other costs related to obtaining site options, project financing, administrative costs and fees for loan commitments, zoning approvals, and other related activities which do not have a physical impact;
	7.	Approval of supplemental assistance (including insurance or guarantee) to a project previously approved under this part, if the approval is made by the same responsible entity that conducted the environmental review on the original project and re-evaluation of the environmental findings is not required under §58.47.

Sponsored by: Interim City Manager

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE CITY MANAGER TO PIGGYBACK THE CITY OF MIAMI CONTRACT WITH H&R PAVING, INC. FOR QUALIFIED PROFESSIONAL SERVICES FOR PAVEMENT RESURFACING (CITY OF MIAMI IFB #1115382(28), AND ENTER INTO AN AGREEMENT WITH H&R PAVING, INC FOR PAVEMENT RESURFACING THROUGHOUT THE CITY, FOR PHASE V OF THE CITY SIDEWALK INSTALLATION PROJECT, IN AN AMOUNT NOT TO EXCEED TWO HUNDRED FIFTY-EIGHT THOUSAND, FOUR HUNDRED THIRTY SIX DOLLARS AND EIGHTEEN CENTS ($258,436.18) PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Opa-Locka ("City") initiated the Sidewalk Installation Project ("Project") to install new sidewalks in all areas within the City lacking sidewalks. Staff has divided the Project into phases based on priority needs in order to spread out the fiscal impact over time; and

WHEREAS, Staff has developed a scope for Phase V of the Project and received a proposal for this scope of work for Two Hundred Fifty-Eight Thousand, Four Hundred Thirty Six Dollars and Eighteen Cents ($258,436.18); and

WHEREAS, the City of Miami previously awarded a contract to H&R Paving Inc. for pavement resurfacing services (attached as Exhibit "A"), pursuant to its Invitation for Bid (IFB) No. 1115382(28), for a three year period commencing March 22, 2021 through March 21, 2024; and

WHEREAS, pursuant to Section 2-318(3) of the City's Purchasing Code (as approved by Ordinance 2020-07) the City may purchase and acquire under contracts with the federal government, the State of Florida or its political subdivisions and also municipal co-operative purchasing organizations and programs and when the City Manager has determined that the prices of the original contract are competitive and reasonable; and

WHEREAS, the City received a proposal from H&R Paving, Inc., attached hereto as Exhibit "B", for Two Hundred Fifty-Eight Thousand, Four Hundred Thirty Six Dollars and Eighteen Cents ($258,436.18) for pavement resurfacing services, within the City, as provided herein; and

WHEREAS, the City Commission finds that it is in the best interests of the City to piggyback the City of Miami contract with H&R Paving Inc., attached hereto as Exhibit "A", in order to benefit from already negotiated rates and enter into an agreement, attached hereto as Exhibit "C", for pavement resurfacing services, throughout the City for Phase V of the City Sidewalk Installation Project, as provided herein, in an amount not to exceed Two Hundred Fifty-Eight Thousand, Four Hundred Thirty Six Dollars and Eighteen Cents ($258,436.18).

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. RECITALS ADOPTED.
The recitals to the preamble herein are incorporated by reference.

Section 2. AUTHORIZATION
The City Commission of the City of Opa-Locka, Florida hereby authorizes the City Manager to piggyback on the City of Miami contract (IFB #1115382(28)) with H&R Paving Inc. for qualified professional services for pavement resurfacing services and enter into an Agreement with H&R Paving, Inc., attached hereto as Exhibit "C", for pavement resurfacing services, throughout the City of Opa-Locka, for Phase V of the City Sidewalk Installation Project, in an amount not to exceed Two Hundred Fifty-Eight Thousand, Four Hundred Thirty Six Dollars and Eighteen Cents ($258,436.18).

SECTION 3. SCRIVENER'S ERRORS.
Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager, or the City Manager's designee, following review by the City Attorney, without need of public hearing, by filing a corrected copy of same with the City Clerk.

Section 4. EFFECTIVE DATE.
This Resolution shall take effect upon the adoption and is subject to the approval of the Governor or Governor's Designee.

PASSED and **ADOPTED** this _____ day of _____, 2024.

Short Title:

Sidewalk Installation Phase IV

Staff Summary:

The City initiated the Sidewalk Installation Project to install new sidewalks in the City in areas lacking sidewalks. The staff has divided the project into phases based on prioritized needs to spread out the fiscal impact over time. The staff has developed a scope for Phase V and received a proposal for this scope for $258,436.18.

Staff recommends continuing this project as it will enhance the City's image as well as improve walkability and address pedestrian safety.

DocuSign Envelope ID: 7076AF06-8092-4B2E-A24E-37583E369778

Therefore, Staff is requesting approval from the City Commission to authorize the City Manager to piggyback City of Miami IFB 1115382 for PAVEMENT RESURFACING SERVICES and accept the proposal from H&R Paving, Inc. for completion of Phase IV.

Financial Impact:

Account	Description	Available	Project	Remaining Balance
44-541835	PTP-Sidewalks	$350,000	$258,436.18	$91,563.82

Proposed Action:

Staff recommends the City Commission's approval of this item to enhance City walkability and to address pedestrian safety issues.

CITY OF OPA-LOCKA AGREEMENT FOR SIDEWALK INSTALLATION SERVICES

Piggyback City of Miami Invitation for Bid (IFB) 1115382 for Pavement Resurfacing Services

This Agreement is made this ____ day of _____, 2023, between the City of Opa-Locka, a municipal corporation organized and existing under the laws of the State of Florida and whose address is 780 Fisherman Street, Opa-Locka, Florida 33054 (the **"City"),** and H&R Paving, Inc. whose address is 1955 N.W. 110 Avenue, Miami, FL 33172 (the **"Contractor").**

WITNESSETH

WHEREAS, the Contractor desires to enter into this Agreement ("Agreement") with City to provide pavement resurfacing services to the City (Sidewalk Installation – Phase V) (the "Project"); and

WHEREAS, the parties desire to incorporate the terms and conditions of the solicitation and contractual arrangement between City of Miami and the Contractor, as set forth in the City of Miami Invitation for Bid for Pavement Resurfacing Services ("the IFB"); and

WHEREAS, the City Code provides authority for the City to select and contract through the use of the competitive bid process of another government entity as an exception to the otherwise required formal bidding process.

NOW THEREFORE, in consideration of the mutual covenants set forth in this Agreement, the receipt and sufficiency of which is acknowledged, the parties agree as follows:

Section 1. Term. The term of this Agreement commences upon fully execution of this agreement and continues through March 21,2024, unless terminated earlier by its terms. The City shall have the option to renew for two (2) additional one-year terms.

Section 2. Contract Terms. The Contractor agrees to provide the City with pavement resurfacing services in accordance with the City's requirements as set forth herein and the Standard Contract between City of Miami and the Contractor dated on or about March 11, 2021 (the "City of Miami Agreement"), attached hereto and incorporated herein as Exhibit "A". The exhibits are incorporated into this Agreement for all purposes, and are collectively referred to as the "Contract Documents", and represent the entire agreement between the parties. In the event of conflict between or among the Contract Documents, the order of priority shall be: this Agreement, the City of Miami Agreement and the Contractor's accepted proposal.

Section 3. Scope of Work

The following provisions are included:

A City shall pay Contractor no more than the unit prices set forth in the Contract Documents and in accordance with the provisions of the Contract Documents. If the City requires services not covered by unit prices already made a part of the Contract Documents, the Contractor shall submit a detailed written proposal to the authorized City representative before providing any such services. For these purposes, Adelina Gross as Capital Improvements Program Manager, shall be the City Representative and may be reached at (305)953-2868 Ext. 3001.

B. If permits are required, Contractor shall submit complete and accurate permit applications to all applicable permitting agencies within ten work days of receiving from the City all documents necessary to file such permit applications. The City shall pay all permit and related fees directly to the permitting agencies, including any permit fees charged by the City.

C. The City of Opa-Locka shall be substituted for the City of Miami with regard to any and all provisions of the City of Miami Agreement, the IFB, and the Contractor's bid, including by example and not limitation, with regard to bond requirements, insurance, indemnification, licensing, termination, default and ownership of documents. All recitals, representations, and warranties of Contractor made in those documents are restated as if set forth fully herein,made for the benefit of the City, and incorporated herein.

D. Contractor shall not commence work on the Project unless and until the

requirements for insurance have been fully met by Contractor and appropriate evidence thereof, in the City's sole discretion, has been provided to and approved by the City.

Section 4. Assignment. Neither party may assign its rights or obligations under this Agreement without the consent of the other.

Section 5. Notice. Notice hereunder shall be provided in writing by certified mail, return receipt requested, or customarily used overnight transmission with proof of delivery, to the following parties, with mandatory copies, as provided below:

401 NW 7th Avenue
Fort Lauderdale, Florida 33311

For Contractor: Raul Gonzalez
1955 N. W. 110 AVE
Miami, FL 33172

Section 5. Severability. This Agreement sets forth the entire agreement between Contractor and City with respect to the subject matter of this Agreement. This Agreement supersedes all prior and contemporaneous negotiations, understandings and agreements, written or oral, between the parties. This Agreement may not be modified except by the parties' mutual agreement set forth in writing and signed by the parties.

IN WITNESS WHEREOF, the parties hereto have accepted, made, and executed this Agreement upon the terms and conditions above stated on the day and year first above written.

Terms and Conditions

1. General Terms and Conditions

1.1. GENERAL TERMS AND CONDITIONS

Intent: The General Terms and Conditions described herein apply to the acquisition of goods/equipment/services with an estimated aggregate cost of $25,000.00 or more.

Definition: A formal solicitation is defined as issuance of a/an Invitation for Bid (IFB), Request for Proposals (RFP), Request for Qualifications (RFQ), or Request for Letters of Interest (RFLI) pursuant to the City of Miami Procurement Code and/or Florida Law, as amended. Formal Solicitation and Solicitation shall be defined in the same manner herein.

1.1. ACCEPTANCE OF GOODS, EQUIPMENT OR SERVICES - Any good(s), equipment or services delivered under this formal solicitation, if applicable, shall remain the property of the seller until a physical inspection and actual usage of the good is made, and thereafter is accepted as satisfactory to the City. It must comply with the terms herein and be fully in accordance with specifications and of the highest quality. In the event the goods/equipment supplied to the City are found to be defective or does not conform to specifications, the City reserves the right to cancel the order upon written notice to the Contractor and return the product to the Contractor at the Contractor's expense. In terms of this Solicitation the use of the word "services" includes without limitation professional and personal services as that term professional and personal services is defined by the City of Miami Procurement Ordinance and as set forth in the Definitions Section 18-73 of the City Code.

1.2. ACCEPTANCE OF OFFER -Subject to prior occurrence of all condition's precedent set forth in Section 1.88, The signed or electronic submission of your solicitation response shall be considered an offer on the part of the Proposer; such offer shall be deemed accepted upon the occurrence of all conditions precedent and issuance by the City of a purchase order or notice to proceed, as applicable. In summation, execution of a Professional Services Agreement and/or Agreement, approval by a referendum as stated in this RFP, and issuance by the City of a purchase order, and/or notice to proceed, as applicable.

1.3. ACCEPTANCE/REJECTION -The City reserves the right to accept or reject any or all responses or parts of after opening/closing date and request re-issuance on the goods/services described in the formal solicitation. In the event of such rejection, the Director of Procurement shall notify all affected Proposers and make available a written explanation for the rejection. The City also reserves the right to reject:

1. the response of any Proposer who has previously failed to properly perform under the terms and conditions of a Professional Services Agreement ("PSA") and/or Agreement,

2.Failed to deliver on time contracts of a similar nature,

3. Who is not in a position to perform the requirements defined in this formal solicitation

4. Who has been debarred,

5.Who is on the convicted vendors list,

6.Who is indebted to the City,

7.Who is otherwise determined to be non- responsive or non-responsible.

The City further reserves the right to waive any irregularities, minor informalities, or technicalities in any or all responses and may, at its discretion, re-issue this formal solicitation.

1.4. ADDENDA -It is the Proposer's responsibility to ensure receipt of all Addenda. Addenda are available on the BidSync website.

1.5. ALTERNATE RESPONSES WILL NOT BE CONSIDERED.

1.6. ASSIGNMENT - Contractor agrees not to subcontract, assign, transfer, convey, sublet, or otherwise dispose of the resulting Contract, or any or all of its right, title or interest herein, without the City of Miami's prior written consent.

1.7. ATTORNEY'S FEES - In connection with any litigation, mediation and arbitration arising out of this Contract, each party shall bear their own attorney's fees through and including appellate litigation and any post-judgment proceedings.

1.8. AUDIT RIGHTS AND RECORDS RETENTION - The Successful Proposer agrees to provide access at all reasonable times to the City, or to any of its duly authorized representatives, to any books, documents, papers, and records of Contractor which are directly pertinent to this formal solicitation, for the purpose of audit, examination, excerpts, and transcriptions. The Successful Proposer shall maintain and retain any and all of the books, documents, papers and records pertinent to the Contract for three (3) years after the City makes final payment and all other pending matters are closed. Contractor's failure to or refusal to comply with this condition shall result in the immediate cancellation of this contract by the City. The audit and inspection provisions set forth in Sections 18-100

to 18-102, City Code, are deemed as being incorporated by reference herein as set forth in full.

1.9. AVAILABILITY OF CONTRACT STATE-WIDE - Any governmental, not-for-profit, or quasi-governmental entity in the State of Florida, may avail itself of this Contract and purchase any, and all goods/services, specified herein from the Successful Proposer at the Contract price(s) established herein, when permissible by Federal, State, and local laws, rules, and regulations.

Additionally, any governmental entity outside of the State of Florida but, within the Continental United States of America, may avail itself to this Contract and purchase any and all goods/services, specified herein from the Successful Proposer at the Contract price(s) established herein, when permissible by Federal, State, and local laws, rules, and regulations.

Each governmental, not-for-profit or quasi-governmental entity which uses this Formal Solicitation and resulting Contract will establish its own Contract, place its own orders, issue its own purchase orders, be invoiced there from and make its own payments, determine shipping terms and issue its own exemption certificates as required by the Successful Proposer.

1.10. AWARD OF CONTRACT:

A.The PSA and/or Agreement, the Formal Solicitation, the Proposer's response, any addenda issued, and the blanket purchase order shall constitute the entire contract, unless modified in accordance with any ensuing amendment or addenda.

B.The award of this contract may be preconditioned on the subsequent submission of other documents as specified in the Special Conditions or Technical Specifications. Proposer shall be in default of its contractual obligation if such documents are not submitted in a timely manner and in the form required by the City. Where Proposer is in default of these contractual requirements, the City, through action taken by the Department of Procurement, will void its acceptance of the Proposer's Response and may accept the Response from the next lowest responsive, responsible Proposal most advantageous to the City or re-solicit the City's requirements. The City, at its sole discretion, may seek monetary restitution from Proposer and its proposal bond or guaranty, if applicable, as a result of damages or increased costs sustained as a result of the Proposer's default.

C.The term of the contract shall be specified in one of three documents which shall be issued to the Successful Proposer. These documents may either be a blanket purchase order, notice of award and/or contract award sheet.

D.The City reserves the right to automatically extend this contract for up to one hundred twenty (120) calendar days beyond the stated contract term in order to provide City departments with continual service and supplies while a new contract is being solicited, evaluated, and awarded. If the right is exercised, the City shall notify the Proposer, in writing, of its intent to extend the contract at the same price, terms and conditions for a specific number of days.

Additional extensions over the first one hundred twenty (120) day extension may occur, if, the City and the Successful Proposer are in mutual agreement of such extensions.

E.Where the contract involves a single shipment of goods to the City, the contract term shall conclude upon completion of the expressed or implied warranty periods.

F.An PSA and/or Agreement shall be awarded to the Proposer by the City Commission based upon the minimum qualification requirements reflected herein. As a result of a RFP, RFQ, or RFLI, the City reserves the right to execute or not execute, as applicable, an PSA and/or Agreement with the Proposer, whichever is determined to be in the City's best interests. Such PSA and/or Agreement which will be furnished by the City, will contain certain terms as are in the City's best interests, and will be subject to approval as to legal form by the City Attorney. All conditions precedent identified in Section 1.88 before any Agreement is binding.

1.11.BID BOND/ BID SECURITY - A cashier's or certified check, or a Bid Bond signed by a recognized surety company that is licensed to do business in the State of Florida, payable to the City of Miami, for the amount bid is required from all Proposers, if so indicated under the Special Conditions. This check or bond guarantees that the Proposer will accept the order or contract/agreement, as proposed, if it is awarded to the Proposer. Proposer shall forfeit proposal deposit to the City should the City award the contract/agreement to the Proposer and if Proposer fails to accept the award. The City reserves the right to reject any and all surety tendered to the City. Proposal deposits are returned to unsuccessful Proposers within ten (10) days after the award and Successful Proposer's acceptance of award. If sixty (60) days have passed after the date of the formal solicitation closing date, and no contract has been awarded, all deposits will be returned on demand.

1.12.RESPONSE FORM (HARDCOPY FORMAT) - All forms should be completed, signed and submitted accordingly.

1.13.BID SECURITY FORFEITED LIQUIDATED DAMAGES - Failure to execute a PSA and/or Agreement and/or file an acceptable Performance Bond, when required, as provided herein, shall be just cause for the annulment of the award and the forfeiture of the Bid Security to the City, which forfeiture shall be considered, not as a penalty, but in mitigation of damages sustained. Award may then be negotiated with the next highest ranked responsive and responsible Proposal most advantageous to the City or all responses may be rejected.

1.14.BRAND NAMES - If and wherever in the specifications brand names, makes, models, names of any manufacturers, trade names, or Proposer catalog numbers are specified, it is for the purpose of establishing the type, function, minimum standard of design, efficiency, grade or quality of goods only. When the City does not wish to rule out other competitors' brands or makes, the phrase "OR EQUAL" is added. When bidding/proposing an approved equal, Proposers will submit, with their response, complete sets of necessary data (factory information sheets, specifications, brochures, etc.) in order for the City to evaluate and determine the equality of the item(s) bid/proposed. The City shall be the sole judge of equality and its decision shall be final. Unless otherwise

specified, evidence in the form of samples may be requested if the proposed brand is other than specified by the City. Such samples are to be furnished after formal solicitation opening/closing only upon request of the City. If samples should be requested, such samples must be received by the City no later than seven (7) calendar days after a formal request is made.

1.15.CANCELLATION - The City reserves the right to cancel all formal solicitations before its opening/closing. In the event of proposal cancellation, the Director of Procurement shall notify all prospective Proposers and make available a written explanation for the cancellation.

1.16.CAPITAL EXPENDITURES - Proposer understands that any capital expenditures that the firm makes, or prepares to make, in order to deliver/perform the goods/services required by the City, is a business risk which the Contractor must assume. The City will not be obligated to reimburse amortized or unamortized capital expenditures, or to maintain the approved status of any Contractor. If Contractor has been unable to recoup its capital expenditures during the time it is rendering such goods/services, it shall not have any claim upon the City.

1.17.CITY NOT LIABLE FOR DELAYS - It is further expressly agreed that in no event shall the City be liable for, or responsible to, the Proposer/Consultant, any sub-contractor/sub-consultant, or to any other person for, or on account of, any stoppages or delay in the work herein provided for by injunction or other legal or equitable proceedings or on account of any delay for any cause over which the City has no control.

1.18.COLLUSION -Proposer, by submitting a response, certifies that its response is made without previous understanding, agreement or connection either with any person, firm or corporation submitting a response for the same items/services or with the City of Miami's Procurement Department or initiating department. The Proposer certifies that its response is fair, without control, collusion, fraud or other illegal action. Proposer certifies that it is in compliance with the Conflict of Interest and Code of Ethics Laws. The City will investigate all potential situations where collusion may have occurred, and the City reserves the right to reject any and all responses where collusion may have occurred.

1.19. COMPLIANCE WITH FEDERAL, STATE AND LOCAL LAWS - Contractor understands that contracts between private entities and local governments are subject to certain laws and regulations, including laws pertaining to public records, conflict of interest, records keeping, competitive solicitations etc., et. al., as applicable. City and Contractor agree to comply with and observe all applicable laws, codes and ordinances as that may in any way affect the goods or equipment offered, including but not limited to:

A.Executive Order 11246, which prohibits discrimination against any employee, applicant, or client because of race, creed, color, national origin, sex, or age with regard to, but not limited to, the following: employment practices, rate of pay or other compensation methods, and training selection.

B.Occupational, Safety and Health Act (OSHA), as applicable to this Formal Solicitation.

C.The State of Florida Statutes, Section 287.133(3)(A) on Public Entity Crimes.

D.Environment Protection Agency (EPA), as applicable to this Formal Solicitation.

E.Uniform Commercial Code (Florida Statutes, Chapter 672).

F.Americans with Disabilities Act of 1990, as amended.

G.National Institute of Occupational Safety Hazards (NIOSH), as applicable to this Formal Solicitation.

H.National Forest Products Association (NFPA), as applicable to this Formal Solicitation.

I.City Procurement Ordinance City Code Section 18, Article III.

J.Conflict of Interest, City Code Section 2-611;61.

K.Cone of Silence, City Code Section 18-74.

L.The Florida Statutes Sections 218.73 and 218.74 on Prompt Payment.

M.City Financial Policies, City Code Chapter 18, Article IX.

N.City of Miami Charter Sections 3(f) (iii) and 29-B.

O. City of Miami Sale or Lease of Real Property, City Code Chapter 18, Article V.

P.City of Miami Living Wage Ordinance, Chapter 18, Article X, City Code.

Q.Alcoholic beverage, food and beverage laws, approvals and permits as required by state and local laws.

R.Miami -Dade County Shoreline Review Ordinance Chapter 33D, Article III, Miami-Dade County Code.

Lack of knowledge or notice by the Proposer will in no way be a cause for relief from responsibility. Non-compliance with all local, state, and federal directives, orders, regulations, and laws may be considered grounds for termination of contract(s).

Copies of the City Ordinances may be obtained from the City Clerk's Office.

1.20. CONE OF SILENCE - Pursuant to Section 18-74 of the City of Miami Code, a "Cone of Silence" is imposed upon each RFP, RFQ, or RFLI after advertisement and terminates at the time the City Manager issues a written recommendation to the Miami City Commission. The Cone of Silence shall be applicable only to Contracts for the

provision of goods and services and public works or improvements for amounts greater than $200,000. The Cone of Silence prohibits any communication regarding RFPs, RFQs, or RFLIs between, among others:

Potential vendors, service providers, Proposers, lobbyists or consultants and the City's professional staff including, but not limited to, the City Manager and the City Manager's staff; the Mayor, City Commissioners, or their respective staffs and any member of the respective selection/evaluation committee.

The provision does not apply to, among other communications:

Oral communications with the City's Procurement staff, provided the communication is limited strictly to matters of process or procedure already contained in the formal solicitation document; the provisions of the Cone of Silence do not apply to oral communications at duly noticed site visits/inspections, pre-proposal conferences, oral presentations before selection/evaluation committees, contract negotiations during any duly noticed public meeting, or public presentations made to the Miami City Commission during a duly noticed public meeting; or communications in writing or by email at any time with any City employee, official or member of the City Commission unless specifically prohibited by the applicable RFP, RFQ, or RFLI documents (See Section 2.2. of the Special Conditions); or communications in connection with the collection of industry comments or the performance of market research regarding a particular RFP, RFQ, or RFLI, by City Procurement staff.

Proposers must file a copy of any written communications with the Office of the City Clerk, which shall be made available to any person upon request. The City shall respond in writing and file a copy with the Office of the City Clerk (clerks@miamigov.com), which shall be made available to any person upon request. Written communications may be in the form of e-mail, with a copy to the Office of the City Clerk.

In addition to any other penalties provided by law, violation of the Cone of Silence by any Proposer shall render any award voidable. A violation by a particular Proposer, Offeror, Respondent, lobbyist or consultant shall subject same to potential penalties pursuant to the City Code. Any person having personal knowledge of a violation of these provisions shall report such violation to the State Attorney and/or may file a complaint with the Miami-Dade County Ethics Commission. Proposers should reference Section 18-74 of the City of Miami Code for further clarification.

This language is only a summary of the key provisions of the Cone of Silence. Please review City of Miami Code Section 18-74 for a complete and thorough description of the Cone of Silence. You may contact the City Clerk at 305-250-5360, to obtain a copy of same.

1.21. CONFIDENTIALITY - As a political subdivision and Florida municipality, the City of Miami is subject to the Florida Sunshine Act and Public Records Law. If this Contract/Agreement contains a confidentiality provision, it shall have no application when disclosure is required by Florida law or upon court order.

1.22. CONFLICT OF INTEREST - Proposers, by responding to this Formal Solicitation, certify that to the best of their knowledge or belief, no elected/appointed official or employee of the City of Miami is financially interested, directly or indirectly, in the purchase of goods/services specified in this Formal Solicitation. Any such interests on the part of the Proposer or its employees must be disclosed in writing to the City. Further, you must disclose the name of any City employee (or former employee of the City who left City service within the past two (2) years) who owns, directly or indirectly, an interest of five percent (5%) or more of the total assets of capital stock in the

Proposer's firm.

A. Proposer further agrees not to use or attempt to use any knowledge, property or resource which may be within their trust, or perform their duties, to secure a special privilege, benefit, or exemption for itself, or others. Proposer may not disclose or use information not available to members of the general public and gained by reason of their position, except for information relating exclusively to governmental practices, for their personal gain or benefit or for the personal gain or benefit of any other person or business entity.

B.Proposer who is a person (every officer, official and employee of the city, including every member of any board, commission or agency of the city) as defined in Section 2-611 of the City Code, hereby acknowledges that it has not contracted or transacted any business with the City or any person or agency acting for the City and has not appeared in representation of any third party before any board, commission or agency of the City within the past two years. Proposer further warrants that they are not related, specifically the spouse, son, daughter, parent, brother or sister, to: (i) any member of the commission; (ii) the mayor; (iii) any city employee; or (iv) any member of any board or agency of the City.

C.A violation of this section may subject the Proposer to immediate termination of any Professional Services Agreement with the City, imposition of the maximum fine and/or any penalties allowed by law.

Additionally, violations may be considered by and subject to action by the Miami-Dade County Commission on Ethics.

1.23.COPYRIGHT OR PATENT RIGHTS - Proposers warrant that there has been no violation of any intellectual property, copyright or patent rights in manufacturing, producing, or selling the goods or equipment shipped or ordered and/or services provided as a result of this formal solicitation, and Proposers agree to hold the City harmless from any and all liability, loss, or expense occasioned by any such violation.

1.24.COST INCURRED BY PROPOSER - All expenses involved with the preparation and submission of Responses to the City, or any work performed in connection therewith shall be borne by the Proposer(s).

1.25. DEBARMENT AND SUSPENSIONS (Sec 18-107)

(a)Authority and requirement to debar and suspend. After reasonable notice to an actual or prospective Contractual

Party, and after reasonable opportunity for such party to be heard, the City Manager, after consultation with the Chief Procurement Officer and the city attorney, shall have the authority to debar a Contractual Party, for the causes listed below, from consideration for award of city Contracts. The debarment shall be for a period of not fewer than

three years. The City Manager shall also have the authority to suspend a Contractual Party from consideration for award of city Contracts if there is probable cause for debarment, pending the debarment determination. The authority to debar and suspend contractors shall be exercised in accordance with regulations which shall be issued by the Chief Procurement Officer after approval by the City Manager, the city attorney, and the City Commission.

(b)Causes for debarment or suspension. Causes for debarment or suspension include the following:

(1)Conviction for commission of a criminal offense incident to obtaining or attempting to obtain a public or private Contract or subcontract, or incident to the performance of such Contract or subcontract.

(2)Conviction under state or federal statutes of embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, or any other offense indicating a lack of business integrity or business honesty.

(3)Conviction under state or federal antitrust statutes arising out of the submission of Bids or Proposals.

(4)Violation of Contract provisions, which is regarded by the Chief Procurement Officer to be indicative of non-responsibility. Such violation may include failure without good cause to perform in accordance with the terms and conditions of a Contract or to perform within the time limits provided in a Contract, provided that failure to perform caused by acts beyond the control of a party shall not be considered a basis for debarment or suspension.

(5)Debarment or suspension of the Contractual Party by any federal, state, local, or other governmental (public) agency or entity.

(6)False certification pursuant to paragraph (c) below.

(7)Found in violation of a zoning ordinance for which the violation remains noncompliant.

(8)Found in violation any city ordinance or regulation and for which a civil penalty or fine is due and owing to the city.

(9)Any other cause judged by the City Manager to be so serious and compelling as to affect the

responsibility of the Contractual Party performing city Contracts.

(c)Certification. All Contracts for goods and services, sales, and leases by the city shall contain a certification that neither the Contractual Party nor any of its principal owners or personnel have been convicted of any of the violations set forth above or debarred or suspended as set forth in paragraph (b)(5).

(d)Debarment and suspension decisions. Subject to the provisions of paragraph (a), the City Manager shall render a written decision stating the reasons for the debarment or suspension. A copy of the decision shall be provided promptly to the Contractual Party, along with a notice of said party's right to seek judicial relief.

1.26.DEBARRED/SUSPENDED VENDORS -An entity or affiliate who has been placed on the State of Florida debarred or suspended vendor list may not: 1) submit a response fora contract to provide goods or services to a public entity; 2) Submit a response on a contract with a public entity for the construction or repair of a public building or public work; 3) Submit response on leases of real property to a public entity; 4)award or perform work as a contractor, supplier, subcontractor, or consultant under contract with any public entity; and 5) transact business with any public entity.

1.27.DEFAULT/FAILURE TO PERFORM - The City shall be the sole judge of nonperformance, which shall include any failure on the part of the successful Proposer to accept the award, to furnish required documents, and/or to fulfill any portion of this contract within the time stipulated.

Upon default by the successful Proposer to meet any terms of this agreement, the City will notify the Proposer of the default and will provide the contractor three (3) days (weekends and holidays excluded) to remedy the default. Failure on the contractor's part to correct the default within the required three (3) days shall result in the Contract being terminated and upon the City notifying in writing the contractor of its intentions and the effective date of the termination. The following shall constitute default:

A.Failure to perform the work or deliver the goods/services required under the Contract and/or within the time required or failing to use the subcontractors, entities and personnel as identified and set forth, and to the degree specified in the Contract.

B.Failure to begin the work under this Contract within the time specified.

C.Failure to perform the work with sufficient workers and equipment or with sufficient materials to ensure timely completion.

D.Neglecting or refusing to remove materials or perform new work where prior work has been rejected as nonconforming with the terms of the Contract.

E.Becoming insolvent, being declared bankrupt, or committing any act of bankruptcy or insolvency, or making an assignment for the benefit of creditors, if the insolvency, bankruptcy, or assignment renders the successful Proposer incapable of performing the work in accordance with and as required by the Contract.

F. Failure to comply with any of the terms of the Contract in any material respect.

All costs and charges incurred by the City as a result of a default or a default incurred beyond the time limits stated, together with the cost of completing the work, shall be deducted from any monies due or which may become due on this Contract.

1.28. DETERMINATION OF RESPONSIVENESS AND RESPONSIBILITY - Each proposal will be reviewed to determine if it is responsive to the submission requirements outlined in the Formal Solicitation.

A. Responsive Proposal is one which follows the requirements of the Formal Solicitation, includes all

documentation, is submitted in the format outlined in the Formal Solicitation, is of timely submission, and has appropriate signatures as required on each document. Failure to comply with these requirements may deem a Proposal non-responsive.

B. Determination of Responsibility. A Responsible Proposer shall mean a Proposer who has submitted a proposal and who has the capability, as determined under Section 18-95 of the City Code, in all respects to fully perform the Contract requirements, and the integrity and reliability of which give reasonable assurance of good faith and performance.

1) Proposals will only be considered from any person or firm who are regularly engaged in the business of providing the good(s)/service(s) required by the Formal Solicitation. Proposer must be able to demonstrate a satisfactory record of performance and integrity, and have sufficient financial, material, equipment, facility, personnel resources, and expertise to meet all contractual requirements.

2) The City may consider any information available regarding the financial, technical, and other qualifications and abilities of a Proposer, including past performance (experience) with the City or any other governmental entity, in making the award.

3) The City may require the Proposer(s) to provide documentation that they have been designated as an authorized representative of a manufacturer or supplier which is the actual source of supply, if required by the Formal Solicitation.

1.29. DISCOUNTS OFFERED DURING TERM OF CONTRACT - Discount Prices offered in the response shall be fixed after the award by the Commission, unless otherwise specified in the Special Terms and Conditions. Price discounts off the original prices quoted in the response will be accepted from successful Proposer(s) during the term of the contract. Such discounts shall remain in effect for a minimum of 120 days from approval by the City Commission. Any discounts offered by a manufacturer to Proposer will be passed on to the City.

1.30. DISCREPANCIES, ERRORS, AND OMISSIONS - Any discrepancies, errors, or ambiguities in the Formal Solicitation or addenda (if any) should be reported in writing to the City's Purchasing Department. Should it be found necessary, a written addendum will be incorporated in the Formal Solicitation and will become part of the purchase agreement (contract documents). The City will not be responsible for any oral instructions, clarifications, or other communications.

A. Order of Precedence -Any inconsistency in this formal solicitation shall be resolved by giving precedence to the following documents, the first of such list being the governing documents.

1) PSA and/or Agreement and/or any Amendments to the PSA and/or Agreement

2)Specifications

3)Special Conditions

4)General Terms and Conditions

1.31.EMERGENCY / DISASTER PERFORMANCE - In the event of a hurricane or other emergency or disaster situation, the successful vendor shall provide the City with the commodities/services defined within the scope of this formal solicitation at the price contained within vendor's response. Further, successful vendor shall deliver/perform for the city on a priority basis during such times of emergency.

1.32.ENTIRE BID CONTRACT OR AGREEMENT - The Bid Contract or Agreement consists of this City of Miami Formal Solicitation and specifically this General Conditions Section, Contractor's Response and any written agreement entered into by the City of Miami and Contractor in cases involving RFPs, RFQs, and RFLIs, and represents the entire understanding and agreement between the parties with respect to the subject matter hereof and supersedes all other negotiations, understanding and representations, if any, made by and between the parties. To the extent that the agreement conflicts with, modifies, alters or changes any of the terms and conditions contained in the Formal Solicitation and/or Response, the Formal Solicitation and then the Response shall control. This Contract may be modified only by a written agreement signed by the City of Miami and Contractor.

1.33.ESTIMATED QUANTITIES - Estimated quantities or estimated dollars are provided for your guidance only. No guarantee is expressed or implied as to quantities that will be purchased during the contract period. The City is not obligated to place an order for any given amount subsequent to the award of this contract. Said estimates may be used by the City for purposes of determining the most advantageous Proposer meeting specifications. The City reserves the right to acquire additional quantities at the prices bid/proposed or at lower prices in this Formal Solicitation.

1.34. EVALUATION OF RESPONSES

A. Rejection of Responses

The City may reject a Response for any of the following reasons:

1)Proposer fails to acknowledge receipt of addenda;

2)Proposer misstates or conceals any material fact in the Response;

3)Response does not conform to the requirements of the Formal Solicitation;

4)Response requires a conditional award that conflicts with the method of award;

5)Response does not include required samples, certificates, licenses as required; and,

6)Response was not executed by the Proposer's authorized agent.

The foregoing is not an all-inclusive list of reasons for which a Response may be rejected. The City may reject and re-advertise for all or any part of the Formal Solicitation whenever it is deemed in the best interest of the City.

B. Elimination from Consideration

1)A contract shall not be awarded to any person or firm which is in arrears to the City upon any debt or contract, or which is in default on a bid, payment/ performance, bond they have submitted or as the surety bond or certificate furnished has not performed despite demand they do so or otherwise upon any obligation to the City.

2)A contract may not be awarded to any person or firm which has failed to perform under the terms and conditions of any previous contract with the City or deliver on time contracts of a similar nature.

3)A contract may not be awarded to any person or firm which has been debarred by the City in accordance with the City's Debarment and Suspension Ordinance.

C. Determination of Responsibility

1)Responses will only be considered from entities who are regularly engaged in the business of providing the goods/equipment/services required by the Formal Solicitation. Proposer must be able to demonstrate a satisfactory record of performance and integrity; and, have sufficient financial, material, equipment, facility, personnel resources, and expertise to meet all contractual requirements. The terms "equipment and organization" as used herein shall be construed to mean a fully equipped and well-established entity in line with the best industry practices in the industry as determined by the City.

2)The City may consider any evidence available regarding the financial, technical and other qualifications and abilities of a Proposer, including past performance (experience) with the City or any other governmental entity in making the award.

3)The City may require the Proposer(s) to show proof that they have been designated as an authorized representative of a manufacturer or supplier which is the actual source of supply, if required by the Formal Solicitation.

1.35. EXCEPTIONS TO GENERAL AND/OR SPECIAL CONDITIONS OR SPECIFICATIONS - Exceptions to the specifications shall be listed on the Response and shall reference the section. Any exceptions to the General or Special Conditions shall be cause for the bid (IFB) to be considered non-responsive. It also may be cause for a RFP, RFQ, or RFLI to be considered non-responsive; and, if exceptions are taken to the terms and conditions of the resulting agreement it may lead to terminating negotiations.

1.36. F.O.B. DESTINATION - Unless otherwise specified in the Formal Solicitation, all prices quoted/proposed by the Proposer must be F.O.B. DESTINATION, inside delivery, with all delivery costs and charges included in the bid/proposal price, unless otherwise specified in this Formal Solicitation. Failure to do so may be cause for rejection of bid/proposal.

1.37. FIRM PRICES - The Proposer warrants that prices, terms, and conditions quoted in its response will be firm throughout the duration of the contract unless otherwise specified in the Formal Solicitation. Such prices will remain firm for the period of performance or resulting purchase orders or contracts, which are to be performed or supplied over a period of time.

1.38. FLORIDA MINIMUM WAGE AND CITY OF MIAMI LIVING WAGE ORDINANCE -

A. Florida Minimum Wage. In accordance with the Constitution of the State of Florida, Article X, Section 24, employers shall pay employee wages no less than the minimum wage for all hours worked in Florida. Accordingly, it is the Successful Proposer's/Contractor's and their subcontractor's responsibility to understand and comply with this Florida minimum wage requirement and pay its employees the current established hourly minimum wage rate. This minimum wage rate is subject to change or adjusted by the rate of inflation using the consumer price index ("CPI") for urban wage earners and clerical workers, CPI-W, or a successor index as calculated by the United States Department of Labor. Each adjusted minimum wage rate calculated, shall be determined and published by the Agency Workforce Innovation on September 30th of each year and take effect on the following January 1st.

It is the Proposer's and their subcontractor's (if applicable), full responsibility to determine whether any of their employees may be impacted by this Florida Minimum Wage Law, at any given point in time during the term of the Bid Contract. If impacted, Proposer must provide, with its bid, employee name(s), job title(s), job description(s), and current pay rate(s). Failure to submit this information at the time of bid submittal constitute Successful Proposer's/Contractor's acknowledgement and understanding that the Florida Minimum Wage Law will not impact its prices throughout the term of the Bid Contract, and a waiver of any contractual price increase request(s). The City reserves the right to request and the Successful Proposer/Contractor must provide for any, and all information to make a wage and contractual price increase(s) determination.

B. City of Miami Living Wage Ordinance. The City of Miami adopted a Living Wage Ordinance for City Service Contracts with a total contract value exceeding $100,000 annually, and that have been competitively solicited and awarded on, or after January 1, 2017 by the City.

"Service Contract" means a contract to provide services to the City, excluding, however, professional services as defined by the "Consultants Competitive Negotiation Act" set forth in F.S. § 287.055, and Section 18-87 of the City Code, and/or the other exclusions provided by Section 18-557 of the City Code. Section 18-557 is attached as Attachment A. Please see provisions in Attachment A.

If a solicitation requires services, effective on January 1, 2017, Contractors must pay to all its employees, who provide services, a living wage of no less than $15.00 per hour without health benefits; or a wage of no less than $13.19 an hour, with health benefits.

This language is only a summary of the key provisions of the City of Miami Living Wage Ordinance. Please review Attachment A, attached hereto, for a complete and thorough description of the City of Miami Living Wage Ordinance.

1.39. GOVERNING LAW AND VENUE - The validity and effect of this Contract shall be governed by the laws of the State of Florida. The parties agree that any action, mediation or arbitration arising out of this Contract shall take place in Miami-Dade County, Florida. In any action or proceeding each party shall bear their own respective attorney's fees.

1.40. HEADINGS AND TERMS - The headings to the various paragraphs of this Contract have been inserted for convenient reference only and shall not in any manner be construed as modifying, amending or affecting in any way the expressed terms and provisions hereof.

1.41. HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPPA) - Any person or entity that performs or assists the City of Miami with a function or activity involving the use or disclosure of "individually identifiable health information (IIHI) and/or Protected Health Information (PHI) shall comply with the Health Insurance Portability and Accountability Act (HIPAA) of 1996 and the City of Miami Privacy Standards. HIPAA mandates for privacy, security and electronic transfer standards, which include but are not limited to:

A.Use of information only for performing services required by the contract or as required by law;

B.Use of appropriate safeguards to prevent non-permitted disclosures;

C.Reporting to the City of Miami of any non-permitted use or disclosure;

D.Assurances that any agents and subcontractors agree to the same restrictions and conditions that apply to the Proposer and reasonable assurances that IIHI/PHI will be held confidential;

E.Making Protected Health Information (PHI) available to the customer;

F.Making PHI available to the customer for review and amendment; and incorporating any amendments requested by the customer;

G.Making PHI available to the City of Miami for an accounting of disclosures; and

H.Making internal practices, books and records related to PHI available to the City of Miami for compliance audits.

PHI shall maintain its protected status regardless of the form and method of transmission (paper records, and/or electronic transfer of data). The Proposer must give its customers written notice of its privacy information practices including specifically, a description of the types of uses and disclosures that would be made with protected health information.

1.42 INDEMNIFICATION - Contractor shall indemnify, hold/save harmless and defend at its own costs and expense the City, its officials, officers, agents, directors, and employees, from liabilities, damages, losses, and costs, including, but not limited to reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of Contractor and persons employed or utilized by Contractor in the performance of this Contract and will indemnify, hold harmless and defend the City, its officials, officers, agents, directors and employees against, any civil actions, statutory or similar claims, injuries or damages arising or resulting from the permitted work, even if it is alleged that the City, its officials and/or employees were negligent. These indemnifications shall survive the term of this Contract. In the event that any action or proceeding is brought against City by reason of any such claim or demand, Contractor shall, upon written notice from City, resist and defend such action or proceeding by counsel satisfactory to City. The Contractor expressly understands and agrees that any insurance protection required by this Contract or otherwise provided by Contractor shall in no way limit the responsibility to indemnify, keep and save harmless and defend the City or its officers, employees, agents and instrumentalities as herein provided.

The indemnification provided above shall obligate Contractor to defend at its own expense to and through appellate, supplemental or bankruptcy proceeding, or to provide for such defense, at City's option, any and all claims of liability and all suits and actions of every name and description which may be brought against City whether performed by Contractor, or persons employed or utilized by Contractor.

This indemnity will survive the cancellation or expiration of the Contract. This indemnity will be interpreted under the laws of the State of Florida, including without limitation and which conforms to the limitations of §725.06 and/or §725.08, Fla. Statues, as amended from time to time as applicable.

Contractor shall require all Sub-Contractor agreements to include a provision that they will indemnify the City.

The Contractor agrees and recognizes that the City shall not be held liable or responsible for any claims which may result from any actions or omissions of the Contractor in which the City participated either through review or concurrence of the Contractor's actions. In reviewing, approving or rejecting any submissions by the Contractor or other acts of the Contractor, the City in no way assumes or shares any responsibility or liability of the Contractor or Sub-Contractor, under this Agreement.

1.43. FORMATION AND DESCRIPTIVE LITERATURE - Proposer must furnish all information requested in the spaces provided in the Formal Solicitation. Further, as may be specified elsewhere, each Proposer must submit for evaluation, cuts, sketches, descriptive literature, technical specifications, and Material Safety Data Sheets (MSDS)as required, covering the products offered. Reference to literature submitted with a previous response or on file with the Buyer will not satisfy this provision.

1.44. INSPECTIONS - The City may, at reasonable times during the term hereof, inspect Contractor's facilities and perform such tests, as the City deems reasonably necessary, to determine whether the goods and/or services required to be provided by the Contractor under this Contract conform to the terms and conditions of the Formal Solicitation. Contractor shall make available to the City all reasonable facilities and assistance to facilitate the performance of tests or inspections by City representatives. All tests and inspections shall be subject to, and made in accordance with, the provisions of the City of Miami Ordinance No. 12271 (Section 18-79), as same may be amended or supplemented from time to time.

1.45. INSPECTION OF RESPONSE - Responses received by the City pursuant to a Formal Solicitation will not be made available until such time as the City provides notice of a decision or intended decision or within 30 days after bid closing, whichever is earlier. Bid/Proposal results will be tabulated and may be furnished upon request via fax or e-mail to the Sr. Procurement Specialist issuing the Solicitation. Tabulations also are available on the City's Web Site following recommendation for award.

1.46. INSURANCE - Within ten (10) days after receipt of Notice of Award, the successful Contractor, shall furnish Evidence of Insurance to the Purchasing Department, if applicable. Submitted evidence of coverage shall demonstrate strict compliance to all requirements listed on the Special Conditions entitled "Insurance Requirements". The City shall be listed as an "Additional Insured."

Issuance of a Purchase Order is contingent upon the receipt of proper insurance documents. If the insurance certificate is received within the specified time frame but not in the manner prescribed in this Solicitation the Contractor shall be verbally notified of such deficiency and shall have an additional five (5) calendar days to submit a corrected certificate to the City. If the Contractor fails to submit the required insurance documents in the manner prescribed in this Solicitation within fifteen (15) calendar days after receipt Notice of Award, the contractor shall be in default of the contractual terms and conditions and shall not be awarded the contract. Under such circumstances, the Proposer may be prohibited from submitting future responses to the City. Information regarding any insurance requirements shall be directed to the Risk Administrator, Department of Risk Management, at 444 SW 2nd Avenue, 9th Floor, Miami, Florida 33130, 305-416-1604.

The Proposer shall be responsible for assuring that the insurance certificates required in conjunction with this Section remain in effect for the duration of the contractual period; including any and all option terms that may be granted to the Proposer.

1.47. INVOICES - Invoices shall contain purchase order number and details of goods and/or services delivered (i.e. quantity, unit price, extended price, etc.); and in compliance with Chapter 218 of the Florida Statutes (Prompt Payment Act).

1.48. LOCAL PREFERENCE

A.City Code Section 18-85, states, "when a responsive, responsible non-local bidder submits the lowest bid price, and the bid submitted by one or more responsive, responsible local bidders who maintain a local office, as defined in Section 18-73, is within fifteen percent (15%) of the price submitted by the non-local bidder, then that non-local bidder and each of the aforementioned responsive, responsible local bidders shall have the opportunity to submit a best and final bid equal to or lower than the amount of the low bid previously submitted by the non-local bidder. Contract award shall be made to the lowest responsive, responsible bidder submitting the lowest best and final bid. In the case of a tie in the best and final bid between a local bidder and a non-local bidder, contract award shall be made to the local bidder."

B.City Code Section 18-86, states, "the RFP, RFLI or RFQ, as applicable, may, in the exercise of the reasonable professional discretion of the City Manager, director of the using agency, and the Chief Procurement Officer, include a five (5%) percent evaluation criterion in favor of proposers who maintain a local office, as defined in Section 18-73. In such cases, this five (5%) percent evaluation criterion in favor of proposers who maintain a local office will be specifically defined in the RFP, RFLI or RFQ, as applicable; otherwise, it will not apply.

1.49. MANUFACTURER'S CERTIFICATION - The City reserves the right to request from Proposers a separate Manufacturer's Certification of all statements made in the bid/proposal. Failure to provide such certification may result in the rejection of bid/proposal or termination of contract/agreement, for which the Proposer must bear full liability.

1.50. MODIFICATIONS OR CHANGES IN PURCHASE ORDERS AND CONTRACTS - No contract or understanding to modify this Formal Solicitation and resultant purchase orders or contracts, if applicable, shall be binding upon the City unless made in writing by the Director of Procurement of the City of Miami, Florida through the issuance of a change order, addendum, amendment, or supplement to the contract, purchase order or award sheet as appropriate.

1.51. MOST FAVORED NATIONS - Successful Proposer shall not treat the City of Miami ("City") worse than any other similarly-situated local government and, in this regard, grants the City a "most favored nations clause" meaning the City will be entitled to receive and be governed by the most favorable terms and conditions that Successful Bidder/Proposer grants now or in the future to a similarly situated local government.

1.52. NO PARTNERSHIP OR JOINT VENTURE - Nothing contained in this Contract will be deemed or construed to create a partnership or joint venture between the City of Miami and Contractor, or to create any other similar relationship between the parties.

1.53. NONCONFORMANCE TO CONTRACT CONDITIONS - Items may be tested for compliance with specifications under the direction of the Florida Department of Agriculture and Consumer Services or by other

appropriate testing Laboratories as determined by the City. The data derived from any test for compliance with specifications is public record and open to examination thereto in accordance with Chapter 119, Florida Statutes.

Items delivered not conforming to specifications may be rejected and returned at Proposer's expense. These non-conforming items not delivered as per delivery date in the response and/or Purchase Order may result in Proposer being found in default in which event any and all re-procurement costs may be charged against the defaulted contractor. Any violation of these stipulations may also result in the supplier's name being removed from the City of Miami's Supplier's list.

1.54. NONDISCRIMINATION -Proposer agrees that it shall not discriminate as to race, sex, color, age, religion, national origin, marital status, or disability in connection with its performance under this formal solicitation. Furthermore, Proposer agrees that no otherwise qualified individual shall solely by reason of his/her race, sex, color, age, religion, national origin, marital status or disability be excluded from the participation in, be denied benefits of, or be subjected to, discrimination under any program or activity.

In connection with the conduct of its business, including performance of services and employment of personnel, Proposer shall not discriminate against any person on the basis of race, color, religion, disability, age, sex, marital status or national origin. All persons having appropriate qualifications shall be afforded equal opportunity for employment.

1.55. NON-EXCLUSIVE CONTRACT/ PIGGYBACK PROVISION - At such times as may serve its best interest, the City of Miami reserves the right to advertise for, receive, and award additional contracts for these herein goods and/or services, and to make use of other competitively bid (governmental) contracts, agreements, or other similar sources for the purchase of these goods and/or services as may be available.

It is hereby agreed and understood that this formal solicitation does not constitute the exclusive rights of the successful Proposer(s) to receive all orders that may be generated by the City in conjunction with this Formal Solicitation.

In addition, any and all commodities, equipment, and services required by the City in conjunction with construction projects are solicited under a distinctly different solicitation process and shall not be purchased under the terms, conditions and awards rendered under this solicitation, unless such purchases are determined to be in the best interest of the City.

1.56. NOTICE REGARDING "CURES" - Proposals submitted with irregularities, deficiencies, and/or technicalities that deviate from the minimum qualifications and submission requirements of Request for Qualifications (RFQ), Request for Proposals (RFP), invitation to bid (ITB), invitation for bids (IFB), invitation to quote (ITQ), Requests for Letters of Interest (RFLI) and Request for Sponsorships (RFS) shall result in a non-responsive determination. any solicitation issued after May 6, 2019, shall comply with APM 2-19. APM 2-19 is attached hereto. only minor irregularities, deficiencies, and technicalities may be allowed to be timely cured by the proposer at the sole discretion of the city. material irregularities, deficiencies, and technicalities cannot be cured by

the proposer, and are not waivable by the city.

PROPOSALS SUBMITTED WITH IRREGULARITIES, DEFICIENCIES, AND/OR TECHNICALITIES THAT DEVIATE FROM THE MINIMUM QUALIFICATIONS AND SUBMISSION REQUIREMENTS OF THIS RFP/Q SHALL RESULT IN A NON-RESPONSIVE DETERMINATION. The City will not give consideration to the curing of any Proposals that fail to meet the minimum qualifications and submission requirements of this RFP/Q. Proposer understands that non-responsive Proposals will not be evaluated and, therefore, will be eliminated from the Evaluation/Selection Process

1.57. OCCUPATIONAL LICENSE - Any person, firm, corporation or joint venture, with a business location in the City of Miami and is submitting a Response under this Formal Solicitation shall meet the City's Occupational License Tax requirements in accordance with Chapter 31.1, Article I of the City of Miami Charter. Others with a location outside the City of Miami shall meet their local Occupational License Tax requirements. A copy of the license must be submitted with the response; however, the City may at its sole option and in its best interest allow the Proposer to supply the license to the City during the evaluation period, but prior to award.

1.58. ONE PROPOSAL - Only one (1) Response from an individual, firm, partnership, corporation or joint venture will be considered in response to this Formal Solicitation.

1.59. OWNERSHIP OF DOCUMENTS - It is understood by and between the parties that any documents, records, files, or any other matter whatsoever which is given by the City to the successful Proposer pursuant to this formal solicitation shall at all times remain the property of the City and shall not be used by the Proposer for any other purposes whatsoever without the written consent of the City.

1.60. PARTIAL INVALIDITY - If any provision of this Contract or the application thereof to any person or circumstance shall to any extent be held invalid, then the remainder of this Contract or the application of such provision to persons or circumstances other than those as to which it is held invalid shall not be affected thereby, and each provision of this Contract shall be valid and enforced to the fullest extent permitted by law.

1.61. PERFORMANCE/PAYMENT BOND- A Contractor may be required to furnish a Performance/Payment Bond as part of the requirements of this Contract, in an amount equal to one hundred percent (100%) of the contract price.

1.62. PREPARATION OF RESPONSES (HARDCOPY FORMAT) - Proposers are expected to examine the specifications, required delivery, drawings, and all special and general conditions. All bid/proposed amounts, if required, shall be either typewritten or entered into the space provided with ink. Failure to do so will be at the Proposer's risk.

A.Each Proposer shall furnish the information required in the Formal Solicitation. The Proposer shall sign the Response and print in ink or type the name of the Proposer, address, and telephone number on the face page and on each continuation sheet thereof on which he/she makes an entry, where required.

B.If so required, the unit price for each unit offered shall be shown, and such price shall include packaging, handling and shipping, and F.O.B. Miami delivery inside City premises unless otherwise specified. Proposer shall include in the response all taxes, insurance, social security, workmen's compensation, and any other benefits normally paid by the Proposer to its employees. If applicable, a unit price shall be entered in the "Unit Price" column for each item. Based upon estimated quantity, an extended price shall be entered in the "Extended Price" column for each item offered. In case of a discrepancy between the unit price and extended price, the unit price will be presumed correct.

C.The Proposer must state a definite time, if required, in calendar days for delivery of goods and/or services.

D.The Proposer should retain a copy of all response documents for future reference.

E.All responses, as described, must be fully completed and typed or printed in ink and must be signed in ink with the firm's name and by an officer or employee having authority to bind the company or firm by his/her signature. Bids/Proposals having any erasures or corrections must be initialed in ink by person signing the response or the response may be rejected.

F.Responses are to remain valid for at least 180 days. Upon award of a contract, the content of the Successful Proposer's response may be included as part of the contract, at the City's discretion.

G.The City of Miami's Response Forms shall be used at all times. Use of any other forms will result in the rejection of the response. **RESPONSES WILL BE SUBMITTED AS FOLLOWS: ONEORIGINAL HARDCOPY AND SEVEN (7) COPIES INELECTRONIC FORMAT (FLASH DRIVE). NO ON-LINE SUBMITTALS WILL BE ACCEPTED. ANY REQUIRED ATTACHMENTS PROVIDED BY THE CITY MUST BE RETURNED TO THE CITY OR YOUR RESPONSE SHALL BE DEEMED NON-RESPONSIVE.**

1.63.PRICE ADJUSTMENTS - Any price decrease effectuated during the contract period either by reason of market change or on the part of the contractor to other customers shall be passed on to the City of Miami.

1.64. PRODUCT SUBSTITUTES - In the event a particular good (that has been awarded and approved) becomes unavailable during the term of the Contract, the Contractor awarded that item may arrange with the City's authorized representative(s) to supply a substitute product at the awarded price or lower, provided that a sample is approved in advance of delivery and that the new product meets or exceeds all quality requirements.

1.65. CONFLICT OF INTEREST, AND UNETHICAL BUSINESS PRACTICE PROHIBITIONS - Contractor represents and warrants to the City that it has not employed or retained any person or company employed by the City to solicit or secure this Contract and that it has not offered to pay, paid, or agreed to pay any person any fee, commission, percentage, brokerage fee, or gift of any kind contingent upon or in connection with, the award of this Contract.

1.66. PROMPT PAYMENT -Proposers may offer a cash discount for prompt payment; however, discounts shall not be considered in determining the lowest net cost for response evaluation purposes.

Proposers are required to provide their prompt payment terms in the space provided on the Formal Solicitation. If no prompt payment discount is being offered, the Proposer must enter zero (0) for the percentage discount to indicate no discount. If the Proposer fails to enter a percentage, it is understood and agreed that the terms shall be 2% 20 days, effective after receipt of invoice or final acceptance by the City, whichever is later.

When the City is entitled to a cash discount, the period of computation will commence on the date of delivery, or receipt of a correctly completed invoice, whichever is later. If an adjustment in payment is necessary due to damage, the cash discount period shall commence on the date final approval for payment is authorized. If a discount is part of the contract, but the invoice does not reflect the existence of a cash discount, the City is entitled to a cash discount with the period commencing on the date it is determined by the City that a cash discount applies.

Price discounts off the original prices quoted on the Price Sheet will be accepted from successful Proposers during the term of the contract.

1.67. PROPERTY - Property owned by the City of Miami is the responsibility of the City of Miami. Such property furnished to a Contractor for repair, modification, study, etc., shall remain the property of the City of Miami. Damages to such property occurring while in the possession of the Contractor shall be the responsibility of the

Contractor. Damages occurring to such property while in route to the City of Miami shall be the responsibility of the Contractor. In the event that such property is destroyed or declared a total loss, the Contractor shall be responsible for replacement value of the property at the current market value, less depreciation of the property, if any.

1.68. PROVISIONS BINDING - Except as otherwise expressly provided in the resulting Contract, all covenants, conditions and provisions of the resulting Contract shall be binding upon and shall inure to the benefit of the parties hereto and their respective heirs, legal representatives, successors and assigns.

1.69. PUBLIC ENTITY CRIMES - A person or affiliate who has been placed on the convicted vendor list, following a conviction for a public entity crime may not:

A. Submit a Bid to provide any goods or services to a public entity.

B. Submit a Bid on a contract with a public entity for the construction or repair of a public building or public work.

C. Submit responses on leases of real property to a public entity.

D. Be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity.

E. Transact business with any public entity in excess of the threshold amount provided in Section 287.017, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

1.70. PUBLIC RECORDS - Proposer understands that the public shall have access, at all reasonable times, to all documents and information pertaining to City contracts, subject to the provisions of Chapter 119, Florida Statutes, and City Code, Section 18, Article III, and agrees to allow access by the City and the public, to all documents subject to disclosure under applicable law. Successful Proposer shall additionally comply with the provisions of Section 119.0701, Florida Statutes, titled "Contracts; public records".

Proposer shall additionally comply with Section 119.0701, Florida Statutes, including without limitation:

A. Keep and maintain public records that ordinarily and necessarily would be required by the City to perform this service.

B. Provide the public with access to public records on the same terms and conditions as the City would at the cost provided by Chapter 119, Florida Statutes, or as otherwise provided by law.

C. Ensure that public records that are exempt or confidential and exempt from disclosure are not disclosed except as authorized by law.

D. Meet all requirements for retaining public records and transfer, at no cost, to the City all public records in its possession upon termination of this Agreement and destroy any duplicate public records that are exempt or confidential and exempt from disclosure requirements.

E. All electronically stored public records must be provided to the City in a format compatible with the City's information technology systems. **IF THE CONSULTANT HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONSULTANT'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE DIVISION OF PUBLIC RECORDS AT (305) 416-1800, VIA EMAIL AT PUBLICRECORDS@MIAMIGOV.COM, OR REGULAR MAIL AT CITY OF MIAMI OFFICE OF THE CITY ATTORNEY, 444 SW 2ND AVENUE, 9TH FL, MIAMI, FL 33130. THE CONSULTANT MAY ALSO CONTACT THE RECORDS CUSTODIAN AT THE CITY OF MIAMI DEPARTMENT WHO IS ADMINISTERING THIS CONTRACT.**

1.71. QUALITY OF GOODS, MATERIALS, SUPPLIES, PRODUCTS, AND EQUIPMENT - All materials used in the manufacturing or construction of supplies, materials, or equipment covered by this solicitation shall be new. The items bid/proposed must be of the latest make or model, of the best quality, and of the highest grade of workmanship, unless as otherwise specified in this Solicitation.

1.72. QUALITY OF WORK/SERVICES - The work/services performed must be of the highest quality and workmanship. Materials furnished to complete the service shall be new and of the highest quality except as otherwise specified in this Solicitation.

1.73. REMEDIES PRIOR TO AWARD (Sec. 18-106) - If prior to Contract award it is determined that a formal solicitation or proposed award is in violation of law, then the solicitation or proposed award shall be cancelled by the City Commission, the City Manager or the Chief Procurement Officer, as may be applicable, or revised to comply with the law.

1.74. RESOLUTION OF CONTRACT DISPUTES (Sec. 18-105)

A. Authority to resolve Contract disputes. The City Manager, after obtaining the approval of the City Attorney, shall have the authority to resolve disputes between the Proposer and the City which arise under, or by virtue of, a Contract between them; provided that, in cases involving an amount greater than $25,000, the City Commission must approve the City Manager's decision. Such authority extends, without limitation, to disputes based upon breach of Contract, mistake, misrepresentation, or lack of complete performance, and shall be invoked by a Contractual Party by submission of a protest to the City Manager.

B. Contract dispute decisions. If a dispute is not resolved by mutual consent, the City Manager shall promptly render a written report stating the reasons for the action taken by the City Commission, or the City Manager, which shall be final and conclusive. A copy of the decision shall be immediately provided to the protesting party, along with a notice of such party's right to seek judicial relief, provided that the protesting party shall not be entitled to such judicial relief without first having followed the procedure set forth in this Section.

1.75. RESOLUTION OF PROTESTED SOLICITATIONS AND AWARDS (SECTION 18-104):

Right to protest.

The following procedures shall be used for resolution of protested solicitations and awards except for purchases of goods, supplies, equipment, and services, the estimated cost of which does not exceed $25,000.00. Protests thereon shall be governed by the administrative policies and procedures of purchasing.

(1) Protest of solicitation.

a. Any prospective proposer who perceives itself aggrieved in connection with the solicitation of a contract may protest to the chief procurement officer. A written notice of intent to file a protest shall be filed with the chief procurement officer within three days after the request for proposals, request for qualifications or request for letters of interest is published in a newspaper of general circulation. A notice of intent to file a protest is considered filed when received by the chief procurement officer; or

b. Any prospective bidder who intends to contest bid specifications or a bid solicitation may protest to the chief procurement officer. A written notice of intent to file a protest shall be filed with the chief procurement officer within three days after the bid solicitation is published in a newspaper of general circulation. A notice of intent to file a protest is considered filed when received by the chief procurement officer.

(2) Protest of award.

a. Any actual proposer who perceives itself aggrieved in connection with the recommended award of contract may protest to the chief procurement officer. A written notice of intent to file a protest shall be filed with the chief procurement officer within two days after receipt by the proposer of the notice of the city manager's recommendation for award of contract. The receipt by proposer of such notice shall be confirmed by the city by

facsimile or electronic mail or U.S. mail, return receipt requested. A notice of intent to file a protest is considered filed when received by the chief procurement officer; or

b. Any actual responsive and responsible bidder whose bid is lower than that of the recommended bidder may protest to the chief procurement officer. A written notice of intent to file a protest shall be filed with the chief procurement officer within two days after receipt by the bidder of the notice of the city's determination of non-responsiveness or non-responsibility. The receipt by bidder of such notice shall be confirmed by the city by facsimile or electronic mail or U.S. mail, return receipt requested. A notice of intent to file a protest is considered filed when received by the chief procurement officer.

c. A written protest based on any of the foregoing must be submitted to the chief procurement officer within five days after the date the notice of protest was filed. A written protest is considered filed when received by the chief procurement officer.

The written protest may not challenge the relative weight of the evaluation criteria or the formula for assigning points in making an award determination.

The written protest shall state with particularity the specific facts and law upon which the protest of the solicitation or the award is based and shall include all pertinent documents and evidence and shall be accompanied by the required filing fee as provided in subsection (f). This shall form the basis for review of the written protest and no facts, grounds, documentation or evidence not contained in the protester's submission to the chief procurement officer at the time of filing the protest shall be permitted in the consideration of the written protest.

No time will be added to the above limits for service by mail. In computing any period of time prescribed or allowed by this section, the day of the act, event or default from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included unless it is a Saturday, Sunday or legal holiday in which event the period shall run until the end of the next day which is neither a Saturday, Sunday or legal holiday. Intermediate Saturdays, Sundays and legal holidays shall be excluded in the computation of the time for filing.

Authority to resolve protests; hearing officer(s).

Hearing officers appointed by the city shall have authority to resolve protests filed under this chapter of the City Code. The city manager shall appoint a hearing officer, from a separate list of potential hearing officers pre-approved by the city commission, to resolve protests filed in accordance with this section, no later than five working days following the filing of a bid protest. The hearing officer shall have the authority to settle and resolve any written protest. The hearing officer shall submit said decision to the protesting party and to the other persons specified within ten days after he/she holds a hearing under the protest.

(1) Hearing officer. The hearing officer may be a special master as defined in chapter 2, article X, section 2-811 of the City Code, or a lawyer in good standing with the Florida Bar for a minimum of ten years with a preference given to a lawyer who has served as an appellate or trial court judge. The hearing officer may be appointed from alternative sources (e.g. expert consulting agreements, piggyback contracts, etc.) where the city commission adopts a recommendation of the city attorney that such action is necessary to achieve fairness in the proceedings. The engagement of hearing officers is excluded from the procurement ordinance as legal services. The hearing officers appointed in the pre-qualified group should be scheduled to hear protests on a rotational basis.

(2) Right of protest. Any actual bidder or proposer who has standing under Florida law dissatisfied and aggrieved with the decision of the city regarding the protest of a solicitation or the protest of an award as set forth above in this section may request a protest hearing. Such a written request for a protest hearing must be initiated with a notice of intent to protest followed by an actual protest as provided in subsection 18-104(a). The notice of intent to protest and the actual protest must each be timely received by the chief procurement officer and must comply with all requirements set forth in subsection 18-104(a). Failure to submit the required notice of intent to protest and the actual protest within the specified timeframes will result in an administrative dismissal of the protest.

(3) Hearing date. Within 30 days of receipt of the notice of protest, the chief procurement officer shall schedule a hearing before a hearing officer, at which time the person protesting shall be given the opportunity to demonstrate why the decision of the city relative to the solicitation or the award, which may include a recommendation for award by the city manager to the city commission, as applicable, should be overturned. The party recommended for award, if it is a protest of award, shall have a right to intervene and be heard.

(4) Hearing procedure. The procedure for any such hearing conducted under this article shall be as follows:

a. The city shall cause to be served by certified mail a notice of hearing stating the time, date, and place of the hearing. The notice of hearing shall be sent by certified mail, return receipt requested, to the mailing address of the protester.

b. The party, any intervenor, and the city shall each have the right to be represented by counsel, to call and examine witnesses, to introduce evidence, to examine opposing or rebuttal witnesses on any relevant matter related to the protest even though the matter was not covered in the direct examination, and to impeach any witness regardless of which party first called him/her to testify. The hearing officer may extend the deadline for completion of the protest hearing for good cause shown, but such an extension shall not exceed an additional five business days. The hearing officer shall consider the written protest and supporting documents and evidence appended thereto, supporting documents or evidence from any intervenor, and the decision or recommendation as to the solicitation or award being protested, as applicable. The protesting party, and any intervenor, must file all pertinent documents supporting his/her protest or motion to intervene at least five business days before the hearing, as applicable. The hearing officer shall allow a maximum of two hours for the protest presentation and a maximum of two hours for the city response. When there is an intervenor, a maximum of two hours will be added for the intervenor. In the event of

multiple protests for the same project, the hearing officer shall allocate time as necessary to ensure that the hearing shall not exceed a total of one day.

c. The hearing officer shall consider the evidence presented at the hearing. In any hearing before the hearing officer, irrelevant, immaterial, repetitious, scandalous, or frivolous evidence shall be excluded. All other evidence of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs shall be admissible whether or not such evidence would be admissible in trial in the courts of Florida. The hearing officer may also require written summaries, proffers, affidavits, and other documents the hearing officer determines to be necessary to conclude the hearing and issue a final order within the time limits set forth by this section.

d. The hearing officer shall determine whether procedural due process has been afforded, whether the essential requirements of law have been observed, and whether the decision was arbitrary, capricious, an abuse of discretion, or unsupported by substantial evidence as a whole. Substantial evidence means such relevant evidence as a reasonable mind might accept as adequate to support a conclusion.

e. Within ten days from the date of the hearing, the hearing officer shall complete and submit to the City Manager, the City Attorney, any intervenor, the Chief Procurement Officer, and the person requesting said hearing a final order consisting of his/her findings of fact and conclusions of law as to the denial or granting of the protest, as applicable.

f. The decisions of the hearing officer are final in terms of city decisions relative to the protest.

Any appeal from the decision of the hearing officer shall be in accordance with the Florida Rules of Appellate Procedure.

Compliance with filing requirements.

Failure of a party to timely file either the notice of intent to file a protest or the written protest, together with the required filing fee as provided in subsection (f), with the chief procurement officer within the time provided in subsection (a), above, shall constitute a forfeiture of such party's right to file a protest pursuant to this section. The protesting party shall not be entitled to seek judicial relief without first having followed the procedure set forth in this section.

Stay of procurements during protests.

Upon receipt of a written protest filed pursuant to the requirements of this section, the city shall not proceed further with the solicitation or with the award of the contract until the protest is resolved by the chief procurement officer or the city commission as provided in subsection (b) above, unless the city manager makes a written determination that the solicitation process or the contract award must be continued without delay in order to avoid an immediate and serious danger to the public health, safety or welfare.

Costs.

All costs accruing from a protest shall be assumed by the protestor.

Filing fee.

The written protest must be accompanied by a filing fee in the form of a money order or cashier's check payable to the city in an amount equal to one percent of the amount of the bid or proposed contract, or $5,000.00, whichever is less, which filing fee shall guarantee the payment of all costs which may be adjudged against the protestor in any administrative or court proceeding. If a protest is upheld by the chief procurement officer and/or the city commission, as applicable, the filing fee shall be refunded to the protestor less any costs assessed under subsection (e) above. If the protest is denied, the filing fee shall be forfeited to the city in lieu of payment of costs for the administrative proceedings as prescribed by subsection (e) above. (Ord. No. 12271, § 2, 8-22-02; Ord. No. 13629, § 2, 9-8-16).

1.76. SAMPLES - Samples of items, when required, must be submitted within the time specified at no expense to the City. If not destroyed by testing, Proposer(s) will be notified to remove samples, at their expense, within 30 days after notification. Failure to remove the samples will result in the samples becoming the property of the City.

1.77. SELLING, TRANSFERRING OR ASSIGNING RESPONSIBILITIES - Proposer shall not sell, assign, transfer or subcontract at any time during the term of the Contract, or any part of its operations, or assign any portion of the performance required by this contract, except under and by virtue of written permission granted by the City through the proper officials, which may be withheld or conditioned, in the City's sole discretion.

1.78. SERVICE AND WARRANTY - When specified, the Proposer shall define all warranty, service and replacements that will be provided. Proposer must explain on the Response to what extent warranty and service facilities are available. A copy of the manufacturer's warranty, if applicable, should be submitted with your response.

1.79. SILENCE OF SPECIFICATIONS - The apparent silence of these specifications and any supplemental specification as to any detail or the omission from it of detailed description concerning any point shall be regarded as meaning that only the best commercial practices are to prevail and that only materials of first quality and correct type, size and design are to be used. All workmanship and services are to be first quality. All interpretations of these specifications shall be made upon the basis of this statement.

If your firm has a current contract with the State of Florida, Department of General Services, to supply the items on this solicitation, the Proposer shall quote not more than the contract price; failure to comply with this request will result in disqualification of proposal.

1.80. SUBMISSION AND RECEIPT OF RESPONSES - Responses shall be submitted in hardcopy format to the City Clerk, City Hall, 3500 Pan American Drive, Miami, Florida 33133-5504, at or before, the specified closing date and time as designated in the RFP, RFQ, or RFLI. **NO EXCEPTIONS.** Proposers are welcome to attend the solicitation closing; however, no award will be made at that time.

A.Hardcopy responses shall be enclosed in a sealed envelope, box package. The face of the envelope, box or package must show the hour and date specified for receipt of responses, the solicitation number and title, and the name and return address of the Proposer. Hardcopy responses not submitted on the requisite Response Forms may be rejected. Hardcopy responses received at any other location than the specified shall be deemed non-responsive.

BAYSHORE DR. (3RD TRAFFIC LIGHT), TURN LEFT, 1 BLOCK TURN RIGHT ON PAN AMERICAN DR. CITY HALL IS AT THE END OF PAN AMERICAN DR. PARKING IS ON RIGHT.

B.Facsimile responses will not be considered.

C.Failure to follow these procedures is cause for rejection of proposal.

D.The responsibility for obtaining and submitting a response on or before the close date is solely and strictly the responsibility of Proposer. The City of Miami is not responsible for delays caused by the United States mail delivery or caused by any other occurrence. Responses received after the solicitation closing date and time will be returned unopened and will not be considered for award.

E. Late responses will be rejected.

F.All responses are subject to the conditions specified herein. Those which do not comply with these conditions are subject to rejection.

G.Modification of responses already submitted will be considered only if received at the City before the time and date set for closing of solicitation responses. All modifications must be submitted via the Oracle System or in writing. Once a solicitation closes (closed date and/or time expires), the City will not consider any subsequent submission which alters the responses.

H.If hardcopy responses are submitted at the same time for different solicitations, each response must be placed in a separate envelope, box, or package and each envelope, box or package must contain the information previously stated in 1.82.A.

1.81. TAXES - The City of Miami is exempt from any taxes imposed by the State and/or Federal Government. Exemption certificates will be provided upon request. Notwithstanding, Proposers should be aware of the fact that all materials and supplies which are purchased by the Proposer for the completion of the contract is subject to the Florida State Sales Tax in accordance with Section 212.08, Florida Statutes, as amended and all amendments thereto and shall be paid solely by the Proposer.

1.82. TERMINATION -The City Manager on behalf of the City of Miami reserves the right to terminate this contract by written notice to the contractor effective the date specified in the notice should any of the following apply:

A.The contractor is determined by the City to be in breach of any of the terms and conditions of the contract.

B.The City has determined that such termination will be in the best interest of the City to terminate the contract for its own convenience;

C.Funds are not available to cover the cost of the goods and/or services. The City's obligation is contingent upon the availability of appropriate funds.

1.83. TERMS OF PAYMENT - Payment will be made by the City after the goods and/or services awarded to a Proposer have been received, inspected, and found to comply with award specifications, free of damage or defect, and properly invoiced. No advance payments of any kind will be made by the City of Miami.

Payment shall be made after delivery, within 45 days of receipt of an invoice and authorized inspection and acceptance of the goods/services and pursuant to Section 218.74, Florida Statutes and other applicable law.

1.84. TIMELY DELIVERY - Time will be of the essence for any orders placed as a result of this solicitation. The City reserves the right to cancel such orders, or any part thereof, without obligation, if delivery is not made within the time(s) specified on their Response. Deliveries are to be made during regular City business hours unless otherwise specified in the Special Conditions.

1.85. TITLE - Title to the goods or equipment shall not pass to the City until after the City has accepted the goods/equipment or used the goods, whichever comes first.

1.86. TRADE SECRETS EXECUTION TO PUBLIC RECORDS DISCLOSURE- All Responses submitted to

the City are subject to public disclosure pursuant to Chapter 119, Florida Statutes. An exception may be made for "trade secrets."

If the Response contains information that constitutes a "trade secret", all material that qualifies for exemption from Chapter 119 must be submitted in a separate envelope, clearly identified as "TRADE SECRETS EXCEPTION," with your firm's name and the Solicitation number and title marked on the outside.

Please be aware that the designation of an item as a trade secret by you may be challenged in court by any person.

By your designation of material in your Response as a "trade secret" you agree to indemnify and hold harmless the City for any award to a plaintiff for damages, costs or attorney's fees and for costs and attorney's fees incurred by the City by reason of any legal action challenging your claim.

1.87. UNAUTHORIZED WORK OR DELIVERY OF GOODS- Neither the qualified Proposer(s) nor any of his/her employees shall perform any work or deliver any goods unless a change order or purchase order is issued and received by the Contractor. The qualified Proposer(s) shall not be paid for any work performed or goods delivered outside the scope of the contract or any work performed by an employee not otherwise previously authorized.

1.88. USE OF NAME - The City is not engaged in research for advertising, sales promotion, or other publicity purposes. No advertising, sales promotion or other publicity materials containing information obtained from this Solicitation are to be mentioned, or imply the name of the City, without prior express written permission of the City Manager or the City Commission.

1.89. VARIATIONS OF SPECIFICATIONS - For purposes of solicitation evaluation, Proposers must indicate any variances from the solicitation specifications and/or conditions, no matter how slight. If variations are not stated on their Response, it will be assumed that the product fully complies with the City's specifications.

2. Special Conditions

2.1. PURPOSE

The purpose of this Solicitation is to establish a contract, for pavement resurfacing and roadway repair services, as specified herein, from a source(s), fully compliant with the terms, conditions and stipulations of the Solicitation

2.2. DEADLINE FOR RECEIPT OF REQUEST FOR ADDITIONAL INFORMATION/CLARIFICATION

Any questions or clarifications concerning this solicitation shall be submitted via the BidSync Electronic Bidding System (BidSync), with a copy filed with the Office of the City Clerk via email at Clerks@miamigov.com, pursuant to Section 1.20. Cone of Silence. The solicitation title and number shall be referenced on all correspondence. All questions must be received no later than September 24, 2020 at 2:00 PM. All responses to questions will be sent to all prospective bidders in the form of an addendum. NO QUESTIONS WILL BE RECEIVED VERBALLY OR AFTER SAID DEADLINE.

2.3. SUBMISSION AND RECEIPT OF RESPONSE

Electronic Bid submittals to this IFB shall be submitted through the BidSync Electronic Bidding System ("BidSync") until the date and time as indicated in the Solicitation. The responsibility for submitting a Bid on/or before the stated closing time and date is solely and strictly the responsibility of the Bidder. The City will in no way be responsible for delays caused by technical difficulties or caused by any other occurrence. Electronic Bid submissions may require the uploading of electronic attachments. The submission of attachments containing embedded documents or proprietary file extensions is prohibited. All documents should be attached as individual files and labeled. Any Bids received and time stamped through BidSync, prior to the Bid submittal deadline, shall be accepted as a timely submittal and anything thereafter will be rejected. Additionally, BidSync will not allow for the electronic Bid submittal after the closing date and time has lapsed. Bids will be opened promptly at the time and date specified.

All expenses involved with the preparation and submission of Bids to the City, or any work performed in connection therewith, shall be borne by the Bidder(s). Accordingly, Bidder(s):

1. Must register, free of charge, with BidSync Electronic Bidding System ("BidSync") to establish an account in order to have access to view and/or respond to any solicitations issued by the City of Miami's Procurement Department ("City").
2. Shall submit all Bids electronically. Hard copy Bid submittals will not be accepted. **NO EXCEPTIONS.**
3. Must submit the Certification Statement and associated solicitation documents which define requirements of items and/or services to be purchased and must be completed and submitted as outlined within the solicitation via BidSync. The use of any other forms and/or the modification of City forms will result in the rejection of the Bidder's Bid submittal.
4. Shall ensure that the Certification Statement is fully completed and provided with your Bid. Failure to comply with these requirements may cause the Bid to be rejected.
5. Must ensure that an n authorized agent of the Bidder's firm signs the Certification Statement and submits it electronically. **FAILURE TO SIGN THE CERTIFICATION STATEMENT SHALL DEEM THE BID NON-RESPONSIVE.**

6. May be considered non-responsive if Bids do not conform to the terms and conditions of this solicitation.

This clause supersedes General Terms and Conditions Section 1.62, Preparation of Bids (Hardcopy) and 1.80, Submission and Receipt of Bids, in their entirety.

2.4. PRE-BID CONFERENCE

A Virtual Voluntary pre-bid conference will be held on September 18, 2020 at 10:00 AM, via **this link or via phone (786) 530-7005; Conference ID: 685822220#**. A discussion of the requirements of the Solicitation will occur at that time.

All questions and answers affecting the scope of work/specifications of the IFB will be included in an addendum, that will be distributed through BidSync, following the Pre-Bid Conference to all the attendees. Because the City considers the Pre-Bid Conference to be critical to understanding the Solicitation requirements, attendance is highly recommended.

It is the Bidder's responsibility, prior to submitting a bid, to acquaint himself/herself thoroughly, regarding any and all conditions and/or requirements that may in any manner affect the work to be performed. No allowances will be made because of lack of knowledge of these conditions.

2.5. BIDDERS MINIMUM REQUIREMENTS

Bids will be considered only from firms that are regularly engaged in the business of providing the services as described in this bid; and that have adequate financial support, equipment and personnel to ensure that they can satisfactorily provide the goods and/or services if awarded a contract under the terms and conditions herein stated. The minimum qualifications for this bid are that the Successful Bidder shall, as of Bid Due Date:

1. Not have any member, officer, or stockholder that is in arrears or is in default of any debt or contract involving the City, is a defaulter surety otherwise, upon any obligation to the City, and/or has failed to perform faithfully on any previous contract with the City.

2. Have no record of pending lawsuit or criminal activities, and have never been declared bankrupt within the last three (3) years.

3. Have adequate financial support, equipment, and organization to ensure that they can satisfactorily provide the goods and/or services if awarded a Contract under the terms and conditions herein stated.

4. Have a current certified license as a General Contractor from the State of Florida Construction Industry License Board for the class of work to be performed, **OR** the appropriate Certificate of Competency or the State Contractor's

Certificate of Registration as issued by Broward or Miami-Dade County Code, which authorizes the Successful Bidder to perform the proposed work. License/Certifications shall be provided with the bid response.

5. Have a satisfactory record of performance for at least three (3) years.

6. Be registered as an entity with the Florida State Department, Division of Corporations, for a minimum of the last three (3) consecutive years, authorizing said entity to do business within the State of Florida.

***NOTE: Holder of all licenses must be an employee of the Successful Bidder. Licenses and certifications shall be provided in the bid response.**

If any or all work required in conjunction with this bid is performed by a subcontractor(s), an applicable Certificate of Competency issued to the subcontractor(s) shall be submitted with the Bidder's proposal.

2.6. METHOD OF AWARD

This Solicitation is divided into two (2) Groups: Group 1 - Federally Funded Projects; and Group 2 - Non-Federally Funded Projects. Bidders can bid on one Group or both Groups, using the applicable Bid Price Sheet(s).

Award of this contract will be made to the lowest responsible and responsive bidder(s), who bid on all items in the aggregate, meeting Specifications. The City shall select up to three (3) vendor(s), with the lowest deemed the "primary vendor" and the next lowest the "secondary vendor", and so on, in the order of lowest prices provided to the City. Should the "primary vendor" not be able to provide the item at the time needed, the City has the option to select the next lowest "secondary vendor" to fulfill the order and so forth.

2.7. TERM OF CONTRACT

The Contract shall commence upon the date of notice of award and shall be effective for three (3) years with the option to renew for two (2) additional two (2) year periods, subject to the availability of funds for succeeding fiscal years.

Continuation of the contract beyond the initial period is a City prerogative; not a right of the Bidder. This prerogative will be exercised only when such continuation is clearly in the best interest of the City.

2.8. CONDITIONS FOR RENEWAL

Each renewal of this contract is subject to the following:

(1) Continued satisfactory performance compliance with the specifications, terms and conditions established herein.

(2) Availability of funds.

2.9. ESCALATION CLAUSE

The City acknowledges the fluctuating nature of prices for items specified. Accordingly an escalator/de-escalator clause will be accepted only under the following condition.

The Successful Bidder(s) will be allowed to increase/decrease their contractual prices annually to cover future drastic fuel price changes. The market changes will be determined utilizing the Consumer Price Index for All Urban Consumers (CPI-U), U.S. City Average, Miami-Ft. Lauderdale, FL., Gasoline (Unleaded Regular), and Index Base Period between 2017 through 2020. The escalation using the CPI will be determined by the percent change in the level of the CPI between the reference period and a subsequent time period. This will be calculated by first determining the index point change between the two periods and then the percent change. The following example illustrates the computation of percent change:

CPI for current period (2018)	**136.0**
Less CPI for previous period (2017)	**129.9**
Equals index point change	**6.1**
Divided by previous period CPI	**129.9**
Equals	**0.047**
Result multiplied by 100	**0.047 x 100**
Equals percent change	**4.7**

The Procurement Department may, in its sole discretion, make an equitable adjustment in the contract terms and/or pricing if pricing or availability of supply is affected by extreme or unforeseen volatility in the marketplace, that is, by circumstances that satisfy all the following criteria: (1) the volatility is due to circumstances beyond the Successful Bidder(s) control, (2) the volatility affects the marketplace or industry, not just the particular contract source of supply, (3) the effect on pricing or availability of supply is substantial, and (4) the volatility so affects the Successful Bidder(s) that continued performance of the contract would result in a substantial loss. Successful Bidder(s) might have to supply documentation to justify any requested percentage increase in cost to the City of Miami.

2.10. SPECIFICATION EXCEPTION

Specifications are based on the most current information available. Bidder shall notify the City of Miami Procurement Department, in writing, no less than ten (10) days prior to solicitation closing date of any change in the manufacturers' specifications which conflict with the specifications. For hard copy bid submittals, bidders must explain any deviation from the specifications in writing as a footnote on the applicable specification page and enclose a copy of the manufacturer's specifications data detailing the changed item(s) with their submission. For electronic bid submittals, bidders must explain in the Header Section or by an Attachment and, if applicable, enclose a scanned copy of the manufacturer's specifications data detailing the changed item(s) with their submission. Additionally, bidders must indicate any options requiring the addition of other options, as well as those which are included as a part of another option. Failure of bidders to comply with these provisions will result in bidders being held responsible for all costs required to bring the item(s) in compliance with contract specifications.

2.11. NON-APPROPRIATION OF FUNDS

In the event no funds or insufficient funds are appropriated and budgeted or are otherwise unavailable in any fiscal period for payments due under this contract, then the City, upon written notice to the Successful Bidder(s)/Proposer(s) of such occurrence, shall have the unqualified right to terminate the contract without any penalty or expense to the City. No guarantee, warranty or representation is made that any project(s) will be awarded to any firm(s).

2.12. INSURANCE REQUIREMENTS

The Successful Bidder(s) shall furnish to City of Miami, c/o Procurement Department, 444 SW 2nd Avenue, 6th Floor, Miami, Florida 33130, Certificate(s) of Insurance which indicate that insurance coverage has been obtained which meets the requirements as outlined below:

I. Commercial General Liability

A. Limits of Liability

Bodily Injury and Property Damage Liability

Each Occurrence	$1,000,000
General Aggregate Limit	$ 2,000,000
Products/Completed Operations	$ 1,000,000
Personal and Advertising Injury	$1,000,000

B. Endorsements Required

City of Miami listed as an additional insured

Contingent and Contractual Liability

Premises and Operations Liability

Explosion, Collapse and Underground Hazard

Primary Insurance Clause Endorsement

II. Business Automobile Liability

A. Limits of Liability

Bodily Injury and Property Damage Liability

Combined Single Limit

Any Auto

Including Hired, Borrowed or Non-Owned Autos

Any One Accident $ 1,000,000

B. Endorsements Required

City of Miami listed as an additional insured

III. Worker's Compensation

Limits of Liability
Statutory-State of Florida
Waiver of subrogation

A. Employer's Liability
Limits of Liability
$1,000,000 for bodily injury caused by an accident, each accident.
$1,000,000 for bodily injury caused by disease, each employee
$1,000,000 for bodily injury caused by disease, policy limit

IV. Umbrella Liability

A. Limits of Liability
Bodily Injury and Property Damage Liability

Each Occurrence	$ 2,000,000
Aggregate	$ 2,000,000

City of Miami listed as an additional insured. Coverage is excess follow form over the general liability and auto policies.

V. Owners and Contractors Protective Liability

Each Occurrence	$1,000,000
Policy Aggregate	$1,000,000

City of Miami listed as the named insured

The above policies shall provide the City of Miami with written notice of cancellation or material change from the insurer not less than (30) days prior to any such cancellation or material change, or in accordance to policy provisions.

BINDERS ARE UNACCEPTABLE.

The insurance coverage required shall include those classifications, as listed in standard liability insurance manuals, which most nearly reflect the operations of the bidder.

All insurance policies required above shall be issued by companies authorized to do business under the laws of the

State of Florida, with the following qualifications:

The Company must be rated no less than "A" as to management, and no less than "Class V" as to financial strength, by the latest edition of Best's Insurance Guide, published by A.M. Best Company, Oldwick, New Jersey, or its equivalent. All policies and/or certificates of insurance are subject to review and verification by Risk Management prior to insurance approval.

Certificates will indicate no modification or change in insurance shall be made without thirty (30) days written advance notice to the certificate holder.

NOTE: CITY BID NUMBER AND/OR TITLE OF BID MUST APPEAR ON EACH CERTIFICATE.

Compliance with the foregoing requirements shall not relieve the bidder of their liability and obligation under this section or under any other section of this Agreement.

If insurance certificates are scheduled to expire during the contractual period, the Bidder shall be responsible for submitting new or renewed insurance certificates to the City at a minimum of ten (10) calendar days in advance of such expiration.

In the event that expired certificates are not replaced with new or renewed certificates which cover the contractual period, the City shall:

- Suspend the contract until such time as the new or renewed certificates are received by the City in the manner prescribed in the Invitation For Bid.
- The City may, at its sole discretion, terminate this contract for cause and seek re-procurement damages from the Successful Bidder in conjunction with the General and Special Terms and Conditions of the Solicitation.

The Successful Bidder shall be responsible for assuring that the insurance certificates required in conjunction with this Section remain in force for the duration of the contractual period; including any and all option terms that may be granted to the Successful Bidder. **See Attachment A - Insurance Addendum.**

2.13. BID BOND

All bids must be accompanied by a Bid Bond in the amount of 5% of the total bid submitted, to be in the form of a Cashier's Check or Money Order made payable to the City of Miami; a bond written by a surety company authorized to do business in the State of Florida and shall comply with State Statute 287.0935. The bond, from all unsuccessful bidders, if in the form of a Cashier's Check, will be returned after bid award. Prospective Bidders may either (1) utilize the BidSnyc "Surety 2000" platform to submit bid bonds or (2) mail in their original bid bond to the City. If option #2 is utilized, Bidder shall submit a copy of the bid bond with their electronic bid submission.

2.14. REFERENCES

Each bid must be accompanied by a list of three (3) references, by completing Attachment B - Reference Submittal Form. NO BID WILL BE CONSIDERED WITHOUT THIS LIST. These references must be from contracts within

the last three (3) years and for services as described in this solicitation.

2.15. CURES

Please refer to Attachment C - APM Regarding Cures and **Section 1.56, Notice Regarding "Cures"** of the General Terms and Conditions of this Solicitation.

2.16. TIE BIDS

Whenever two or more Bids which are equal with respect to price, quality and service are received by the City for the procurement of commodities or contractual services, a Bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie Bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

(1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the action that will be taken against employees for violations of such prohibition.

(2) Inform employees about the dangers of drug abuse in the workplace, the business' policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

(3) Give each employee engaged in providing the commodities or contractual services that are under Bid a copy of the statement specified in subsection (1).

(4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under Bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

(5) Impose a sanction on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.

(6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

2.17. PROJECT MANAGER

Upon award, Successful Bidder shall report and work directly with the City Engineer assigned, or designee, who shall be designated as the Project Manager(s) for the City.

2.18. SUBCONTRACTOR(S)

Bidder must list any or all subcontractor(s) that may be utilized to assist in the performance of the work specified herein on Attachment D - Subcontractors, if applicable. Any subcontractor(s) listed must meet the same requirements and submit the same information listed under the Bidder's Minimum Qualifications section. All information required shall be included in the solicitation response. If Bidder does not include any subcontractor(s) as part of its bid submittal, it will be construed that bidder will be able to handle the entire workload by itself and will not be allowed to subcontract any of the work unless it request in writing the hiring of subcontractor(s) with the

aforementioned requirements attached to its request within seventy two (72) hours of considering hiring subcontractor(s). The City will grant or deny such request in writing within forty-eight (48) hours of receiving said request.

2.19. CONTINGENCY

Items so entitled on the Bid document shall be the cash allowance sum per contract year, and in the amount indicated. These shall be included in the Bid to provide funds for payment for items of work not foreseen at the time of bidding. Payment from these Bid Items will be made only as directed by the Project Manager, or designee. The Successful Bidder is not obligated to contingency funds and should not expect to receive them unless used for work not foreseen at the time of bidding.

2.20. RESPONSE TIME

A twenty-four (24) hour response time is required. Failure to respond to any assigned project within the specified time will result in the successful vendor paying any and all costs associated with the repairs performed by a secondary vendor.

2.21. COMPLETED WORK

The City shall be notified by the Successful Bidder upon completion of work. The City shall inspect and approve completed work before authorizing payment. Work not satisfactorily completed shall be redone by the Successful Bidder at no additional charge to the City.

2.22. EMERGENCY/DISASTER PERFORMANCE

In the event of a hurricane or other emergency or disaster situation, the Successful Bidder(s) shall provide the City with services defined within the scope of work of this solicitation at the price contained within the Successful Bidder(s)' bid response. Further, the Successful Bidder(s) shall perform for the City on a priority basis during such times of emergency.

2.23. METHOD OF PAYMENT

Payment will be made within forty-five (45) calendar days, in accordance with Florida Statutes Sections 218.73 and 218.74 of the Prompt Payment Act for services rendered the previous month, upon submission of properly certified/approved invoices. All such information shall be provided to the City Project Manager, or designee.

The City will pay the contract price minus any liquidated damages and/or other damages to the Successful Bidder upon completion and acceptance. Damages caused by the Successful Bidder's employees shall be estimated by the City Project Manager, or designee and computed actual costs and repairs shall be deducted from the Successful Bidders total monthly billing.

Each invoice shall include total cost as well as, proof of payment to subcontractors and suppliers with corresponding release of liens forms and affidavits.

2.24. LIQUIDATED DAMAGES

Failure to complete the project in accordance with the specifications and to the satisfaction of the City within the time stated, shall result in liquidated damages being assessed. The Successful Bidder shall be subject to an assessment of liquidated damages in the amount of $100.00 for each and every calendar day the work remains incomplete (not to exceed the total amount of the contract), as compensation due to the City for loss of use and for additional costs incurred by the City due to such incompletion of the work. The City shall have the right to deduct said liquidated damages from any amount due or that may become due to the Successful Bidder under this agreement or to invoice the Successful Bidder for such damages if the costs incurred exceed the amount due to the Successful Bidder.

2.25. CONTRACTOR TO BE REPRESENTED

The Successful Bidder, at all times, must either be personally present at the worksite or be represented at the worksite by a responsible agent or agents designated by the Successful Bidder in written notice to the City prior to the beginning of work. Such notification shall include pertinent data such as addresses, phone numbers, etc., where said agent or agents may be contacted at any time of the day or night. The agent or agents shall be clothed with full authority to act for the Successful Bidder in all cases, and to carry out any instructions relative to the work may be given by the City.

2.26. USE OF PREMISES

The Successful Bidder shall confine their equipment, apparatus, the storage of materials, and the operation of their workmen to the limits indicated by law, ordinances, permits, or direction of the Project Manager, or designee, and shall not unreasonably encumber the premises with his/her materials. The Successful Bidder shall take all measures necessary to protect their own materials.

2.27. DAMAGES TO PUBLIC/PRIVATE PROPERTY

The Successful Bidder shall carry out the work with such care and methods as not to result in damage to public or private property adjacent to the work. Should any public or private property be damaged or destroyed, the Successful Bidder, at their expense, shall repair or make restoration as is practical and acceptable to the City and/or owners of destroyed or damaged property promptly within a reasonable length of time. (Not to exceed one month from date damage was done.)

2.28. PUBLIC CONVENIENCE AND SAFETY

The Successful Bidder shall conduct their work so as to interfere as little as possible with private business or public travel. The Successful Bidder shall, at their own expense, whenever necessary or required, maintain barricades, maintain lights, and take such other precautions as may be necessary to protect life and property, and the Successful Bidder shall be liable for all damages occasioned in any way by their actions or neglect or that of their agents or employees.

The Successful Bidder shall meet the following noise abatement performance standards for all construction equipment. The operation or permitting the operation of any tool or equipment is prohibited:

1. Between the hours of 6:00 PM and 8:00 AM the following day on weekdays, or at any time on Sundays or holidays, such that the sound therefrom creates a noise disturbance across and at a residential district boundary or within a noise sensitive zone, except for emergency work of public service utilities or by special permission issued pursuant to subsection (c) of City of Miami Ordinance Section 36-6, Construction Equipment.
2. At any other time, such that the sound level at or across a real property boundary exceeds a reading of 0.79 weighted average dBA for the daily period of operation. Such sound levels shall be measured with a sound level meter manufactured according to standards prescribed by the American National Standards Institute.

2.29. SAFETY MEASURES

Successful Bidder shall take all necessary precautions for the safety of employees, and shall erect and properly maintain at all times all necessary safeguards for the protection of the employees and the public. Danger signs warning against hazards created by their operation and work in progress must be posted.

All employees of Successful Bidder shall be expected to wear safety eyewear, appropriate clothing, and hearing protection when and wherever applicable. The Successful Bidder shall use only equipment that is fully operational and in safe operating order. Successful Bidder shall be especially careful when servicing property when pedestrians and/or vehicles are in close proximity - work shall cease until it is safe to proceed.

2.30. ENVIRONMENTAL REGULATIONS

The City reserves the right to consider a Bidder's history of citations and/or violations of environmental regulations in investigating a Bidder's responsibility, and further reserves the right to declare a Bidder non-responsible if the history of violations warrant such determination in the opinion of the City.

2.31. ADDITIONS/DELETIONS OF SERVICES/ITEMS/SUPPLIERS

Although this Solicitation identifies specific services/items to be serviced, it is hereby agreed and understood that any service/item/supplier may be added/deleted to/from this contract at the option of the City. When an addition to the contract is required, the Successful Bidder(s) under this contract shall be invited to submit price quotes for these new services/items. If these quotes are comparable with market prices offered for similar services/items, they shall be added to the contract whichever is in the best interest of the City and an amendment and a separate purchase order shall be issued by the City. If these quotes are not comparable with market prices offered, they shall be quoted by additional suppliers and an amendment and separate purchase order shall be issued by the City.

2.32. ADDITIONAL CONTRACTOR(S) OR SUBCONTRACTOR(S)

There are no implied or express guarantee that all Successful Bidders under this contract will receive work assignments during any given catastrophic events such as tornadoes, hurricanes, severe storms or any other public emergency. However, the City reserves the right to assign work to multiple Successful Bidders at any given point in time, add Contractor(s) who were not part of the initial award to the contract or direct Successful Bidder(s) to hire Subcontractor(s), which may or may not be part of this bid contract, to expedite the clean-up efforts of debris to restore normalcy and order to the lives of City residents, businesses, and general public in an expeditious manner.

2.33. FAILURE TO PERFORM

Should it not be possible to reach the Successful Bidder or supervisor and/or should remedial action not be taken within forty-eight (48) hours of any failure to perform according to specifications, the City reserves the right to declare the Successful Bidder in default of the contract or make appropriate reductions in the contract payment.

2.34. TERMINATION

A. FOR DEFAULT

If Successful Bidder defaults in its performance under this Contract and does not cure the default within 30 days after written notice of default, the City Manager may terminate this Contract, in whole or in part, upon written notice without penalty to the City of Miami. In such event the Successful Bidder shall be liable for damages including the excess cost of procuring similar supplies or services: provided that if, (1) it is determined for any reason that the Successful Bidder was not in default or (2) the Successful Bidder's failure to perform is without their or their Subcontractor's control, fault or negligence, the termination will be deemed to be a termination for the convenience of the City of Miami.

B. FOR CONVENIENCE

The City Manager may terminate this Contract, in whole or in part, upon 30 days prior written notice when it is in the best interest of the City of Miami. If this Contract is for supplies, products, equipment, or software, and so terminated for the convenience by the City of Miami the Successful Bidder will be compensated in accordance with an agreed upon adjustment of cost. To the extent that this Contract is for services and so terminated, the City of Miami shall be liable only for payment in accordance with the payment provisions of the Contract for those services rendered prior to termination.

2.35. ADDITIONAL TERMS AND CONDITIONS

No additional terms and conditions included as part of your solicitation response shall be evaluated or considered, and any and all such additional terms and conditions shall have no force or effect and are inapplicable to this solicitation. If submitted either purposely, through intent or design, or inadvertently, appearing separately in transmittal letters, specifications, literature, price lists or warranties, it is understood and agreed that the General Conditions and Special Conditions in this solicitation are the only conditions applicable to this solicitation and that the Bidder's authorized signature affixed to the Bidder's/Proposer's acknowledgment form attests to this.

2.36. FEDERALLY FUNDED PROJECTS

2.36.a) INTRODUCTION

This section applies to all projects funded with federal dollars. Section 2.1 also applies to this Group. Bidders must use the applicable Federal Funded Bid Price Sheet (Attachment H) for this bid when pricing for Group 1.

2.36.b) LOCAL PREFERENCE

Local Preference does not apply to responses on the Federally Funded Bid Price Sheet for this IFB.

2.36.c) DAVIS-BACON ACT

Federally assisted construction contracts must adhere to Davis-Bacon Act wages and benefits rate schedules. Each Bidder shall use the Federal Wages reflected in Wage General Decision Number - FL20200178, in developing its bid for this project. The selected bidder/contractor shall be required to provide certified payroll records documenting the work performed on this project. **See Attachment E - Davis Bacon - General Decision Number for Wage Rates.**

Wage General Decision Number- FL20200178 can be found in the Attachment Section under Attachment E.

2.36.d) COMPLIANCE WITH COPELAND "ANTI-KICKBACK" ACT

1. The Contractor shall comply with 18 U.S.C. § 874, 40 U.S.C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into this contract.

2. The Contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as the FEMA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The Contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses.

3. A breach of the contract clauses above may be grounds for termination of the contact, and for debarment as a Contractor and subcontractor as provided in 29 C.F.R. § 5.12.

2.36.e) COMPLIANCE WITH THE CONTRACT WORK HOURS & SAFETY STANDARDS ACT

1. Overtime Requirements: No Contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty (40) hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one half time the basic rate of pay for all hours worked in excess of forty (40) hours in such workweek.

2. Violation; liability for unpaid wages; liquidated damages: In the event of any violation of the clause set forth in paragraph (1) of this section, the Contractor and any subcontractor responsible therefore shall be liable for the unpaid wages. In addition, such Contractor and subcontractor shall be liable to the United States (in case of the work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (1) of this section, in the sum of $10 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty (40) hours without payment of the overtime wages required by the clause set forth in paragraph (1) of this section.

3. Withholding for unpaid wages and liquidated damages: The City of Miami shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the Contractor or subcontractor under any such contract or any other Federal contract with the same Contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the Contractor, such sums as may be determined to be necessary to satisfy any liabilities of such Contractor or subcontractor for unpaid wages and liquidated damages as

provided in the clause set forth in paragraph (2) of this section.

4. The Contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraph (1) through (4) of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontract. The Contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraph (1) through (4) of this section.

2.36.f) PARTS AT PASS-THROUGH COST (FOR REPAIRS OUTSIDE THE SCOPE OF WORK)

All cost for parts required for repair jobs and not otherwise included in the scope of work shall be billed at the Contractor's actual cost, and will be passed on to the City without markup or any additional fees. The Contractor shall submit purchase receipt of parts along with the labor invoice for payment.

The Contractor shall be responsible for sourcing all parts necessary to complete the work requirements of each job specification. Replacement parts furnished must be of the same manufacturer or an equal product. All equipment and materials shall be commercial quality and grade, and be from a regular product line. Prototype, obsolete, and residential quality/grade equipment/materials shall not be specified or installed in the facilities.

2.36.g) EQUAL EMPLOYMENT OPPORTUNITY

During the performance of this contract, the Contractor agrees as follows:

1. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and the employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

2. The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.

3. The Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the Contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

4. The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

5. The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

6. In the event of the Contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions as may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

7. The Contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or order of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

2.36.h) CLEAN AIR ACT

1. The Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act, as amended, 42 U.S.C. § 7401 et seq.

2. The Contractor agrees to report each violation to the City of Miami and understands and agrees that the City of Miami will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.

3. The Contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with Federal assistance provided by FEMA.

2.36.i) FEDERAL WATER POLLUTION CONTROL ACT

1. The Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Federal Water Pollution Control Act, as amended, 33 U.S.C.1251 et seq.

2. The Contractor agrees to report each violation to the City of Miami and understands and agrees that the City of Miami will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.

3. The Contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with Federal assistance provided by FEMA.

2.36.j) NO OBLIGATION BY FEDERAL GOVERNMENT

The Federal Government is not a party to this contract and is not subject to any obligation or liabilities to the non-Federal entity, Contractor, or any other party pertaining to any matter resulting from the contract.

2.36.k) PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS OR RELATED ACTS

The Contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the Contractor's actions pertaining to this contract.

2.36.l) BYRD ANTI-LOBBYING AMENDMENT, 31.U.S.C. § 1352 (AS AMENDED)

Bidders who bid for an award of $100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer, or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Each tier shall also disclose any lobbying with non-Federal funds that take place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient.

Please refer to Attachment F - Certification Regarding Lobbying. **It is MANDATORY for the Bidder to return this form signed along with their bid reponse.**

2.36.m) PROCUREMENT OF RECOVERED MATERIALS

1. In the performance of this contract, the Contractor shall make maximum use of products containing recovered materials that are EPA-designated items unless the product cannot be acquired;

a. Competitively within a timeframe providing for compliance with the contract performance schedule;
b. Meeting contract performance requirements; or
c. At a reasonable price.

2. Information about this requirement, along with the list of EPA-designate items, is available at EPA's Comprehensive Procurement Guidelines web site, https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program.

2.36.n) DHS SEAL, LOGO, AND FLAGS

The Contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval.

2.36.o) COMPLIANCE WITH FEDERAL LAW, REGULATIONS, AND EXECUTIVE ORDERS

This is an acknowledgement that FEMA financial assistance will be used to fund this contract only. The Contractor will comply with all applicable federal law, regulations, executive orders, FEMA policies, procedures, and directives.

2.36.p) ACCESS TO RECORDS

1. The Contractor agrees to provide the City of Miami, the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to any books, documents, papers, and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.

2. The Contractor agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.

3. The Contractor agrees to provide the FEMA Administrator or his authorized representatives' access to construction or other work sites pertaining to the work being completed under the contract.

2.36.q) SUSPENSION AND DEBARMENT (IN ADDITION TO GENERAL TERM AND CONDITIONS, SECTION 1.25)

(1) This Contract is a covered transaction for purposes of 2 C.F.R. pt. 180 and 2 C.F.R. pt. 3000. As such the Contractor is required to verify that none of the Contractor, its principals (defined at 2 C.F.R. § 180.995), or its affiliates (defined in 2 C.F.R. § 180.905) are excluded (defined at 2 C.F.R. § 180.940) or disqualified (defined at 2 C.F.R. § 180.935).

(2) The Contractor must comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C and must include a requirement to comply with these regulations in any lower tier covered transaction it enters too.

(3) This certification is a material representation of fact relied upon by the City of Miami. If it is later determined that the Contractor did not comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C, in addition to remedies available to the State of Florida, and the City of Miami, the Federal Government may pursue available remedies, including but not limited to suspension and/or debarment.

(4) The Contractor agrees to comply with the requirements of 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C while this offer is valid and throughout the period of any Contract that may arise from this offer. The Contractor further agrees to include a provision requiring such compliance in its lower tier covered transactions.

2.37. NON-FEDERALLY FUNDED PROJECTS

2.37.a) INTRODUCTION

This section applies to all projects that are non-federally funded. Section 2.1 also applies to this Group. Bidders must use the applicable Bid Price Sheet (Attachment H) for this bid when pricing for Group 2.

2.37.b) LIVING WAGE ORDINANCE

The City of Miami Living Wage Ordinance is applicable to this service contract. Please refer to Section 1.38 of the General Terms and Conditions for further information and guidance on how to comply with this ordinance.

2.37.c) PERFORMANCE BOND

Within ten (10) working days following notice of award by the City, the Successful Bidder shall furnish to the City of Miami, a Performance Bond in the total amount of the Cost to the City for the period of the contract (to be determined at the time of award). The Performance Bond can be in the form of a Cashier's Check, made payable to the City of Miami; a bond written by a surety company authorized to do business in the State of Florida and shall comply with State Statute 287.0935; or an Irrevocable Letter of Credit. If the latter is chosen, it must be written on a bank located in Miami-Dade County, be in the amount of the contract and should clearly and expressly state that it cannot be revoked until express written approval has been given by the City of Miami. The City, to draw on same, would merely have to give written notice to the bank with a copy to the successful contractor.

2.37.d) LOCAL PREFERENCE

Attachment G - Local Office Preference applies to Group 2, Non-Federally Funded Projects.

3. Specifications

3.1. SPECIFICATIONS/SCOPE OF WORK

BIDDERS ARE NOT REQUIRED TO ENTER A UNIT PRICE IN THE LINE ITEM LISTED IN THE ACTUAL IFB WHEN SUBMITTING VIA HARDCOPY RESPONSE. BIDDERS SHALL SUBMIT THEIR BID PRICES UTILIZING ONE OR BOTH TABS ON ATTACHMENT H - BID PRICE SHEET.

INTRODUCTION

The City of Miami, herein referred to as the City, is soliciting response from experienced firms to provide pavement resurfacing and roadway repair services throughout the City. The Bidder must bid on all items to be considered for award of this solicitation.

SERVICES COVERED

The Successful Bidder shall furnish all labor, machinery, tools, modes of transportation, debris disposal, supplies, equipment, materials, water, diesel fuel and services necessary to perform the complete pavement resurfacing and roadway repair services anticipated as work to be performed under this contract. Complete pavement/repair service includes, but is not limited to the following:

1. Milling and resurfacing (includes controlled/variable milling to re-establish roadway longitudinal and cross slopes);
2. Installation of asphalt overlay, chip seal, fog seal, and/or micro-surfacing;
3. Removal and/or replacement of existing asphalt, lime rock, and subgrade;
4. Re-grading/reworking and compaction of lime rock road base and stabilized subgrade;
5. Widening existing streets;
6. Resurfacing of asphaltic pathways (pedestrian, bicycle, etc.);
7. Temporary utility repairs (hot mix asphalt patches);
8. Clearing, grubbing, root removal and excavation of shoulder areas;
9. Asphalt build-up removal;
10. Non-destructive pavement marking removal;
11. Thermoplastic and paint pavement markings (including all standard symbols and FDOT-approved, preformed, thermoplastic green & white bicycle lane markings);
12. Reflective pavement markers (RPMs);
13. Reflective roadway/highway delineators;
14. Repairs, removal, replacement, and extensions of concrete roadway panels, sidewalks, curb and gutter, and pedestrian ADA ramps; and
15. Adjustments to or minor repairs of utility structure manhole tops, inlet frames/grates, valve boxes, etc. within the public right-of-way.

ASSIGNMENT OF WORK

Work will be assigned to the Successful Bidder through the issuance of a work order or “task order” as written and

approved by the Department of Resilience and Public Works (RPW) and agreed upon by the Successful Bidder. Each task order will clearly define the limits and scope of work along with a required timeline for starting and completing work under that task order. Work shall be completed within the agreed-upon timeframe under each task order to avoid incurring liquidated damages or being defaulted. Task orders may or may not be accompanied by a set of engineered construction drawings; as such, the Successful Bidder may be required to work with RPW staff to fully define a task order's scope and may have to adjust their work in the field during construction, as directed by RPW staff.

REGULATIONS

The Successful Bidder shall be familiar with and follow all City of Miami RPW Design and Construction Standards, City Codes and RPW Bulletins, as well as Miami-Dade County Department of Transportation and Public Works and the State of Florida Department of Transportation standards for roadway design, construction, and permitting.

All contractors are required to follow City, County, and State requirements for pollution prevention – including submission of SWPP Plans and installation and maintenance of stormwater system protective BMPs for each project/task order. 10% retainage will be withheld on partial payments for each task order, until all work is inspected and accepted as complete by RPW Project Manager.

PERMITS

The Successful Bidder shall submit for and obtain all required local, state, and federal permits, as applicable, (e.g. Excavation, Special Events/Police, Right-of-Way Closures, NPDES, etc.) prior to mobilizing and beginning construction activities on any assigned work orders/task orders.

OVERTIME WORK HOURS

For the purpose of this contract, overtime work hours are defined as:

1. Monday thru Saturday – 6pm to 8am.
2. Sunday – at any time during the day or night.
3. City observed holidays at anytime during the day or night.

Successful Bidder(s) shall only work overtime hours, per the permitting requirements or as directed by the City. Typically, the services being conducted during these hours are milling, paving, striping, and minor concrete curb/sidewalk work.

ATTACHMENT A

INSURANCE ADDENDUM
INSURANCE DEFINITIONS, REQUIREMENTS AND CONDITIONS

The VENDOR/CONTRACTOR agrees to provide and maintain throughout the life of this contract and at Vendor/Contractor's expense insurance coverage outlined herewith as applicable insuring all operations related to the contract and any extensions thereof.

Workers Compensation and Employers Liability

Statutory and subject to the Laws of the State of Florida. This coverage protects against lawsuits stemming from workplace accidents. It provides for medical care to injured employees, along with compensation for lost income.

Commercial General Liability

It protects against accidents and injuries that occur on company property or the property of a customer. It compensates an injured person or owner of property for injuries and property damages, and the cost of defending lawsuits, including legal settlements or investigations. This policy also covers claims resulting from products exposures, libel, slander, copyright infringement and other personal and advertisement injuries.

Commercial Automobile Liability

It protects against liability, no fault, medical payments, uninsured and underinsured motorists claims, collision and other than collision physical damage. In addition, this policy affords coverage on autos that are hired or borrowed or non-owned for use in the business. The non-owned can be autos owned by employees or members of their households.

Non Owned Auto exposures can be endorsed or added under the Commercial General Liability Policy.

Professional/Errors and Omissions Liability

Used by many professionals such as engineers, lawyers, accountants, stock brokers, financial advisers, insurance agents, court reports, dentists, nurses and teachers. It protects against the financial effects of liability lawsuits filed by clients. It basically protects professionals who cause harm to a client due to incompetence, errors or negligence.

Umbrella Liability

It protects against liability and losses after primary insurance benefits have been exhausted. This supplemental coverage kicks in only after the underlined liability policies have paid their maximum benefits.

Environmental Liability

It protects against the financial costs of claims of injury or damage due to pollution, and other costs of cleaning up pollutants. These policies are designed to cover both property and liability risks.

Directors and Officers Liability

This coverage protects against claims from stockholders, employees and clients that are also aimed individually at directors and officers. These claims typically stem from errors in judgement, breaches of duty and wrongful acts in connection with company business.

Cyber Liability

It protects against costs of the theft, destruction or unauthorized use of electronic data through computer viruses or network intrusions. It also adds protection to a business against such costs if a business fails to safeguard another party's electronic data. Companies sharing data outside their internal network benefit from this coverage

Commercial Property

It protects against claims or damages to the insured's buildings, business personal property and personal property of others. It can also provide for loss of business income coverage or extra expenses incurred because of physical loss by a covered peril to the insured's property.

Commercial Crime

It protects against loss of money, securities and other property because of a variety of criminal acts such as employee theft or embezzlement, burglary, robbery, forgery, computer fraud, kidnapping and extortion. Crime insurance also covers money and securities against damage or destruction by almost any cause of loss, not just crime.

Builders Risk

It protects against damage to or destruction of buildings or other structures during their construction. Any party with a financial interest in a construction, remodeling, or repair project benefits from this coverage.

Surety Bonds

Surety bonds are three party contracts. The principal, the party that undertakes the obligation, pays for the issuance of a bond by a surety company. The bond provides capital to guarantee the obligation will be performed. The obligee is the party that receives the benefit of the bond If the obligation is improperly performed.

Valuable Papers

It pays for the cost to reconstruct damaged or destroyed valuable papers and records. Typically is defined to include almost all forms of printed documents or records with the exception of money or securities, and data and media which is usually excluded.

Additional Requirements

The Vendor/Contractor must furnish the City of Miami, Department of Procurement, and Risk Management located at 444 S.W. 2nd Avenue Miami, Florida 33130, original Certificates of insurance to be in force on the date of this Contract, and Renewal Certificates of insurance thereafter. All policies indicated on the certificate must be in compliance with all Contract requirements. The failure of the City

to obtain the applicable or corresponding certificates from Contractor is not a waiver by the City of any requirements for the Vendor/Contractor.

The Vendor/Contractor must furnish Certificates insurance listing the City of Miami as an additional insured. All insurance certificates must be signed, dated and reference the City contract number.

The insurance must provide for sixty (30) days prior written notice to be given to the City in the event coverage is substantially changed, canceled, or non-renewed.

Any deductibles or self-insured retentions on referenced insurance coverages must be borne by Vendor/Contractor. The Vendor/Contractor further agrees to have insurers waive their rights of subrogation against the City of Miami, its employees, elected officials, agents, or representatives.

The coverages and limits furnished by Vendor/Contractor in no way limit the Vendor/Contractor's liabilities and responsibilities specified within the Contract or law.

Any insurance or self-insurance programs maintained by the City of Miami shall not contribute with insurance provided by the Vendor/Contractor under the Contract.

The required insurance to be carried is not limited by any limitations expressed in the indemnification language in this Contract or any limitation placed on the indemnity in this Contract given as a matter of law.

If the Vendor/Contractor is a joint venture or limited liability company, the insurance policies must name the joint venture or Limited Liability Company and each of its separate constituent entities as named insureds.

The Vendor/Contractor must require all subcontractors to provide the insurance required herein. All subcontractors are subject to the same insurance requirements of the Vendor/Contractor unless otherwise specified in this Contract.

If the Vendor/Contractor or subcontractor desire additional coverages, the party desiring the additional coverages is responsible for the acquisition and cost. Notwithstanding any provision in the Contract to the contrary, the City of Miami Risk Management Department maintains and reserves the right to modify, delete, alter or change these requirements.

CITY OF MIAMI

ADMINISTRATIVE POLICY

REVISIONS

REVISED SECTION	DATE OF REVISION
Created	3/26/19

SUBJECT: ELIMINATING THE PROCESS OF CURING IRREGULARITIES IN DOCUMENTS SUBMITTED IN RESPONSE TO REQUEST FOR QUALIFICATIONS (RFQ), REQUEST FOR PROPOSALS (RFP), REQUESTS FOR LETTERS OF INTEREST (RFLI), INVITATION FOR BIDS (IFB), INVITATION TO BID (ITB), INVITATION TO QUOTE (ITQ), AND REQUEST FOR SPONSORSHIP (RFS) EFFECTIVE MAY 6, 2019

PURPOSE:

To improve the procurement solicitation process in order to provide internal and external customers with a more efficient and effective procurement of goods and services for the City of Miami. This APM establishes guidelines that eliminate the process of curing irregularities in proposals and bids submitted in response to RFQs, RFPs, RFLI's IFBs, ITBs, ITQs and RFS.

BACKGROUND:

Currently, the Department of Procurement ("Procurement") allows Proposers and Bidders to cure certain deficiencies, deviations, irregularities, omissions, and/or technicalities in proposals and bids submitted to the City in response to RFQs, RFPs, RFLIs, IFBs, ITBs, ITQs and RFS.

In collaboration with the Department of Innovation and Technology ("DoIt"), Procurement has identified the process of curing as the cause of significant delays in formal solicitation process. When proposals and bids require a cure, Procurement sends out a "Notice to Cure" to Proposers and Bidders who are then given additional time to correct, complete, and re-submit the required documents. The process of curing is time intensive and delays the procurement of necessary goods and services for the City; it prolongs the due diligence review period and it stalls and delays the evaluation and selection process, resulting in the extension of time between the issuance of an RFP, RFQ, RFLI, IFB, ITB, ITQ, or RFS solicitation and its award date.

Eliminating the process of curing will streamline and improve the overall procurement solicitation process while making it more efficient by removing a source of delay, and more effective by concentrating due diligence reviews only on complete and responsive proposals and bids. Additionally, it is not a common procurement industry practice to allow cures. Other local public agencies such as Miami-Dade County and the Miami-Dade County Public School System do not presently allow cures in such similar instances.

GUIDELINES:

Procurement will only review and evaluate proposals and bids that have been deemed responsive. **Responsive bids and proposals responses are defined by our Procurement Code.**[1] Prospective Proposers and Bidders should understand that non-responsive proposals or bids will not be reviewed and will be eliminated from the evaluation and selection process.

The City will not consider the curing of any proposal or bid that fail to meet the minimum qualifications or submission requirements of an RFQ, RFP, RFLI, IFB, ITB, ITQ, or RFS as applicable. Material deficiencies, deviations, irregularities, omissions, and/or technicalities are not waivable.

Proposals and bids submitted with deficiencies, irregularities, omissions, and/or technicalities that deviate from the minimum qualifications and/or submission requirements for RFQs, RFPs, RFLIs, IFBs, ITBs, ITQs and RFS shall result in a non-responsive determination. The following list includes, but is not limited to, proposal and bid deficiencies, deviations, irregularities, omissions, and/or technicalities that shall result in a non-responsive determination for any solicitation issued on or after May 6, 2019:

If a proposal or bid is missing forms, or contains unnotarized forms, unsigned forms, incorrect forms, or forms signed by any individual, other than the Proposer or Bidder, Proposer's or Bidder's team members, and/or individuals attesting to the stated project experience, the Proposer or Bidder **will not** be given time to cure the proposal or bid, and the City shall deem such proposal or bid non-responsive. The City, at its sole discretion, reserves the right to waive minor deviations not listed above. Such minor deficiencies, deviations, irregularities, omissions, or technicalities may be timely cured by the Proposer or Bidder, at the sole discretion of the City. Material (i.e. substantial or notable) deficiencies, deviations, irregularities, omissions, or technical issues cannot be cured by the Proposer or Bidder and are not waivable by the City.

For illustrative guidance please see below an excerpt from State of Florida procurement instructions which discuss the difference in plain language between material and minor variances.

Responsive bidder, proposer, offeror, or *respondent* means a business which has submitted a bid, offer, proposal, quotation or response which conforms in all material respects to the solicitation. Sec. 18-73, City Code.

(Excerpt from 2012 WL 1155290 (Fla.Div.Admin.Hrgs.)

Mandatory Responsiveness Requirements: Terms, conditions or requirements that must be met by the proposer to be responsive to this RFP. The responsiveness requirements are **mandatory**. Failure to meet the responsiveness requirements will cause rejection of a proposal. Any proposal rejected for failure to meet mandatory responsiveness requirements will not be evaluated.

1.15 Material Deviations: The Department has established certain requirements with respect to proposals to be submitted by Proposers. The use of *shall, must* or *will* (except to indicate simple futurity) in this RFP indicates a requirement or condition which may not be waived by the Department except where any **deviation** therefore is not **material**. A **deviation** is **material** if, in the Department's sole discretion, the deficient response is not in substantial accord with this RFP's requirements, provides an advantage to one Proposer over other Proposers, or has a potentially significant effect on the quantity or quality of items or services proposed, or on the cost to the Department. **Material deviations** cannot be waived and shall be the basis for rejection of a response. Because this is an RFP, the Department will apply this definition liberally in reviewing responses in regard to service delivery.

1.16 Minor Irregularity: A variation from the RFP terms and conditions which does not affect the price proposed or gives the proposer an advantage or benefit not enjoyed by the other proposers or does not adversely impact the interests of the Department.

HIGHWAY CONSTRUCTION PROJECTS

Note: Under Executive Order (EO) 13658, an hourly minimum wage of $10.80 for calendar year 2020 applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least $10.80 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in calendar year 2020. If this contract is covered by the EO and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must pay workers in that classification at least the wage rate determined through the conformance process set forth in 29 CFR 5.5(a)(1)(ii) (or the EO minimum wage rate, if it is higher than the conformed wage rate). The EO minimum wage rate will be adjusted annually. Please note that this EO applies to the above-mentioned types of contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but it does not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60). Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

==========

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year.

Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the

interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION
"

CERTIFICATION REGARDING LOBBYING

The undersigned certifies, to the best of his/her knowledge, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officers or employee of Congress, or an employee or a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form, LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that ll subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31, U.S.C. § 1352 (as amended by the Lobbying Disclosure Act of 1995). Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The Contractor, _____, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31, U.S.C. § 3801 et seq., apply to this certification and disclosure, if any.

CITY OF MIAMI LOCAL OFFICE CERTIFICATION

(City Code, Chapter 18, Article III, Section 18-73)

Solicitation Type and Number: _____ (i.e. IFQ/IFB/RFP/RFQ/RFLI No. 123456)

Solicitation Title: _____

_____ (Bidder/Proposer) hereby certifies compliance with the *Local Office* requirements stated under Chapter 18/Article III, Section 18-73, of the Code of the City of Miami, Florida, as amended.

Local office means a business within the city which meets all of the following criteria:

(1) Has had a staffed and fixed office or distribution point, operating within a permanent structure with a verifiable street address that is located within the corporate limits of the city, for a minimum of twelve (12) months immediately preceding the date bids or proposals were received for the purchase or contract at issue; for purposes of this section, "staffed" shall mean verifiable, full-time, on-site employment at the local office for a minimum of forty (40) hours per calendar week, whether as a duly authorized employee, officer, principal or owner of the local business; a post office box shall not be sufficient to constitute a local office within the city;

(2) If the business is located in the permanent structure pursuant to a lease, such lease must be in writing, for a term of no less than twelve (12) months, been in effect for no less than the twelve (12) months immediately preceding the date bids or proposals were received, and be available for review and approval by the chief procurement officer or its designee; for recently-executed leases that have been in effect for any period less than the twelve (12) months immediately preceding the date bids or proposals were received, a prior fully-executed lease within the corporate limits of the city that documents, in writing, continuous business residence within the corporate limits of the city for a term of no less than the twelve (12) months immediately preceding the date bids or proposals were received shall be acceptable to satisfy the requirements of this section, and shall be available for review and approval by the chief procurement officer or its designee; further requiring that historical, cleared rent checks or other rent payment documentation in writing that documents local office tenancy shall be available for review and approval by the chief procurement officer or its designee;

(3) Has had, for a minimum of twelve (12) months immediately preceding the date bids or proposals were received for the purchase or contract at issue, a current business tax receipt issued by both the city and Miami-Dade County, if applicable; and

(4) Has had, for a minimum of twelve (12) months immediately preceding the date bids or proposals were received for the purchase or contract at issue, any license or certificate of competency and certificate of use required by either the city or Miami-Dade County that authorizes the performance of said business operations; and

(5) Has certified in writing its compliance with the foregoing at the time of submitting its bid or proposal to be eligible for consideration under this section; provided, however, that the burden of proof to provide all supporting documentation in support of this local office certification is borne by the business applicant submitting a bid or proposal.

PLEASE PROVIDE THE FOLLOWING INFORMATION:

Bidder/Proposer Local Office Address: _____

Does Bidder/Proposer conduct verifiable, full-time, on-site employment at the local office for a minimum of forty (40) hours per calendar week?	☐ YES ☐ NO
If Bidder/Proposer's Local Office tenancy is pursuant to a lease, has Bidder/Proposer enclosed a copy of the lease?	☐ YES ☐ NO ☐ N/A
Has Bidder/Proposer enclosed a copy of the Business Tax Receipt (BTR) issued by the City of Miami and Miami-Dade County?	City of Miami: ☐ YES ☐ NO ☐ Exempt Cite Exemption: _____ _____ Miami-Dade County: ☑ YES ☑ NO ☐ Exempt Cite Exemption: _____ _____
Has Bidder/Proposer enclosed a copy of the license, certificate of competency and certificate of use that authorizes the performance of Bidder/Proposer's business operations?	☐ YES ☐ NO

Bidder/Proposer's signature below certifies compliance with the *Local Office* requirements stated under Chapter 18/Article III, Section 18-73, of the Code of the City of Miami, Florida, as amended.

CITY OF MIAMI, FLORIDA

INTER-OFFICE MEMORANDUM

TO: Arthur Noriega V
City Manager

DATE: October 23, 2020

SUBJECT: Recommendation of Award for Pavement Resurfacing Services

FROM: Yadissa A. Calderon for
Annie Perez, CPPO, Director
Department of Procurement

REFERENCES: Invitation for Bid ("IFB") No. 1115382

ENCLOSURES: Bid Tabulation

RECOMMENDATION:

Based on the findings below, the Department of Procurement ("Procurement") hereby recommends award ofIFB No. 1115382 to H&R Paving, Inc. ("H&R Paving") the apparent responsive and responsible Bidder, for the provision of pavement resurfacing services for the Department of Resilience and Public Works ("Public Works"), on an as needed basis. The warded vendor, contract terms, and amount are shown below.

Contract Number/Title: IFB No. 1115382, Pavement Resurfacing Services

Contract Amount: The estimated contract amount is approximately $200,181.50 annually for Group 1 – Non-Federally Funded Projects and $200,186.48 annually for Group – 2 Federally Funded Projects (approximately $1,401,270.50 for Group 1; and $1,401,305.36 for Group 2 for all seven (7) years).

Contract Term: Initial term for a period of three (3) years, with the option to renew for two (2) additional two (2) year periods.

Recommended Vendors: H&R Paving, Inc.

BACKGROUND:

On September 11, 2020, Procurement on behalf of Public Works issued IFB No. 1115382, Pavement Resurfacing Services, under full and open competition. On October 9, 2020 at bid closing three (3) bids were received. The bids were evaluated and tabulated following the guidelines published in the bid. Two (2) bids were found to be non-responsive. H&R was the responsive and responsible Bidder.

Consequently, approval of this recommendation to award is requested. Your signature below will indicate approval of this recommendation.

Approved: _____ Date: 10/29/20

GROUP 1 - NON-FEDERALLY FUNDED PROJECTS					H&R Paving		
Line Item	Item Description	Unit	Quantity		Unit Cost	BAFO	Total
1	**MOBILIZATION, ROADWAY COMPLETE** - Mobilization cost for task orders consisting of complete roadway/right-of-way work. Typically consists of many, multiple line items of work and may include all trades required to execute all line items of work within this contract. Most "Roadway Complete" task orders will mainly consist of milling & resurfacing/overlay/etc. with striping, utility adjustments, curb & gutter, minor sidewalk and swale work, and ADA ramps (1 mobilization per task order).	LS	1		$ 5,000.00	N/A	$ 5,000.00
2	**MOBILIZATION, ASPHALT** - Mobilization cost for task orders mainly consiting of milling & resurfacing/overlay/etc. with associated utility adjustments and striping work only (1 mobilization per task order).	LS	1		$ 1.00	N/A	$ 1.00
3	**MOBILIZATION, PATCHING** - Mobilization cost for task orders mainly consisting of utility trench and/or pothole patching requests and/or requests for roadway base soil condition investigations (1 mobilization per task order - 1 block of trench or 10 potholes per task order typ.).	LS	1		$ 1.00	N/A	$ 1.00
4	**MOBILIZATION, SIDEWALKS/CURBING** - Mobilization cost for task orders mainly consisting of concrete sidewalks, ADA ramps, and/or curb & gutter work only, includes associated minor asphalt patching where necessary (1 mobilization per task order).	LS	1		$ 1,500.00	N/A	$ 1,500.00
5	**MOBILIZATION, STRIPING** - Mobilization cost for task orders mainly consisting of paint/thermoplastic striping, messages, symbols, and/or bike/bus lane coating work only (1 mobilization per task order).	LS	1		$ 300.00	N/A	$ 300.00
6	**MOBILIZATION, ASPHALT STAMPING/PAINTING** - Mobilization cost for task orders mainly consisting of thermal stamping and/or colorized coating of specialty asphalt treatment areas (1 mobilization per task	LS	1		$ 1.00	N/A	$ 1.00
7	**RE-MOBILIZATION** - For use only if paving equipment and/or sidewalk/conctete crews already de-mobilized from site, to address additional milling & resurfacing and/or ADA ramps as requested by Public Works Staff (1 mobilization per task order amendment)	LS	1		$ 1.00	N/A	$ 1.00
8	**NIGHTTIME/SUNDAY WORK ADD-ON** - This is a lump sum, cost-per-day, add-on, to be paid when a contractor is required to work, per permitting requirements or as directed by Public Works Staff, on Sundays or at night. This pay item is to help compensate for increased costs associated with overtime labor and enhanced MOT requirements in order to carry out work during non-standard working hours. Typical work being conducted under this add-on will mainly consist of milling, paving, striping, and minor	EA/DAY	1		$ 5,000.00	N/A	$ 5,000.00
9	**ROADWAY BASE SOIL ASSESSMENT, CONDITION A** - Saw cut and remove an average of 2" thick existing asphalt to expose and evaluate the condition of the base. If base is found suitable to the City of Miami's Public Works Staff, clean loose material, recompact, and replace removed asphalt with Type SP-9.5 hot mix asphaltic concrete up to the level of the surrounding surface.	SF	1		$ 3.00	N/A	$ 3.00
10	**ROADWAY BASE SOIL ASSESSMENT, CONDITION B** - Saw cut and remove an average of 2" thick existing asphalt to expose and evaluate the condition of the base. If base is found unsuitable to the City of Miami's Public Works Staff, remove base material and replace with a minimum of 8" of compacted limerock (LBR 100) and 2" of Type SP-9.5 hot mix asphaltic concrete, or 6" of SP-9.5 hot mix asphaltic concrete, up to the level of the surrounding surface.	SF	1		$ 3.00	N/A	$ 3.00
11	**BARRICADES CONES/DRUMS** - Temporary, the first 50 cones and/or drums are considered incidental to all required work under each task order and not compensated for, drums incl. lights when required, includes installation, maintenance, and removal.	EA/DAY	1		$ 0.50	$ 0.45	$ 0.45
12	**BARRICADES TYPE II** - Temporary, 2'-3', with flashing lights when required, includes installation, maintenance, and removal.	EA/DAY	1		$ 0.50	$ 0.45	$ 0.45

13	**BARRICADES TYPE III** - Temporary, 6'-8', with flashing lights when required, includes installation, maintenance, and removal.	EA/DAY	1		$ 0.50	$ 0.45	$ 0.45
14	**WORK ZONE SIGNAGE** - Includes all message and detour signage required per approved MOT plans, the first 10 signs are considered incidental to all required work under each task order and not compensated for, includes installation, maintenance, and removal.	EA/DAY	1		$ 100.00	N/A	$ 100.00
15	**FLASHING ARROW BOARD** - Temporary, multi-mode, includes installation, maintenance, and removal.	EA/DAY	1		$ 10.00	N/A	$ 10.00
16	**VARIABLE MESSAGE SIGN (VMS)** - Message text to be as approved by City Staff or as required by FDOT and County permitting, includes installation, maintenance, and removal.	EA/DAY	1		$ 25.00	N/A	$ 25.00
17	**RE-GRADE EXISTING SWALE** - Includes removal and disposal of excess material if necessary.	SY	1		$ 50.00	N/A	$ 50.00
18	**BAHIA GRASS SOD** - Includes watering for establishment period.	SF	1		$ 5.00	N/A	$ 5.00
19	**ST AUGUSTINE FLORATAM GRASS SOD** - Includes watering for establishment period.	SF	1		$ 5.00	N/A	$ 5.00
20	**ASPHALT REMOVAL 0-2"** - Removal and disposal of asphalt averaging 2" thick or less, includes sawcutting edges of existing asphalt to remain.	SY	1		$ 25.00	N/A	$ 25.00
21	**ASPHALT REMOVAL 2"-4"** - Removal and disposal of asphalt averaging over 2" up to 4" thick, includes sawcutting edges of existing asphalt to remain.	SY	1		$ 25.00	N/A	$ 25.00
22	**ASPHALT REMOVAL >4"** - Removal and disposal of asphalt over 4" thick, includes sawcutting edges of existing asphalt to remain.	SY	1		$ 25.00	N/A	$ 25.00
23	**CONCRETE REMOVAL 0-6"** - Removal and disposal of concrete pads, sidewalks, or roadway pavement averaging 6" thick or less, includes sawcutting edges of existing pad/sidewalk/road section to remain.	SF	1		$ 2.79	N/A	$ 2.79
24	**CONCRETE REMOVAL 6"-12" -** Removal and disposal of concrete pads, sidewalks, or roadway pavement averaging over 6" up to 12" thick, includes sawcutting edges of existing pad/sidewalk/road section to	SF	1		$ 5.00	N/A	$ 5.00
25	**EXCAVATION** - Excavation and removal of excess soils as shown on design plans or directed by Public Works Staff.	CY	1		$ 30.00	N/A	$ 30.00
26	**STABILIZED SUBGRADE** - F&I Type "B" stabilized backfill to the thickness shown on design plans or directed by Public Works Staff, installed and compacted in lifts per City Standards (LBR 40 min. - compaction and testing required and included).	CY	1		$ 20.00	N/A	$ 20.00
27	**LIMEROCK BASE** - F&I limerock base course to the thickness shown on design plans or as directed by Public Works Staff, installed and compacted in lifts per City Standards (LBR 100 - compaction and testing required and included).	CY	1		$ 30.00	N/A	$ 30.00
28	**MILL AND DISPOSE EXISTING ASPHALT** - 1" average thickness, includes sawcutting edges of existing asphalt surfaces to remain.	SY	1		$ 5.00	N/A	$ 5.00
29	**MILL AND DISPOSE EXISTING ASPHALT, ADD-ON** - Additive pricing for each 1/4" of additional thickness of milling (to be used when milling more than 1" average thickness).	SY	1		$ 1.00	N/A	$ 1.00
30	**1" SUPERPAVE ASPHALT, TYPE SP-9.**5 - Traffic C, includes tack coat where necessary.	SY	1		$ 7.00	N/A	$ 7.00
31	**1.5" SUPERPAVE ASPHALT, TYPE SP-9.5 or SP-12.5-** Traffic C, includes tack coat where necessary.	SY	1		$ 10.41	N/A	$ 10.41
32	**2" SUPERPAVE ASPHALT, TYPE SP-9.5 or SP-12.5 -** Traffic C, includes tack coat where necessary.	SY	1		$ 14.00	N/A	$ 14.00
33	**1" SUPERPAVE ASPHALT FRICTION COURSE, TYPE FC-9.5** - Traffic C, PG 76-22, includes tack coat where necessary.	SY	1		$ 8.00	N/A	$ 8.00
34	**1.5" SUPERPAVE ASPHALT FRICTION COURSE, TYPE FC-9.5 or FC-12.5 -** Traffic C, PG 76-22, includes tack coat where necessary.	SY	1		$ 12.00	N/A	$ 12.00
35	**2" SUPERPAVE ASPHALT FRICTION COURSE, TYPE FC-9.5 or FC-12.5 -** Traffic C, PG 76-22, includes tack coat where necessary.	SY	1		$ 16.00	N/A	$ 16.00

36	**POTHOLE REPAIRS** - Placement of crushed and compacted limerock and hot mix asphalt to patch potholes, 10 sq.ft. max surface area, and no deeper than 1.5' deep (asphalt to be a minimum of 2" thick, Type SP-9.5, compacted hot mix).	SF	1		$ 5.00	N/A	$ 5.00
37	**CRACK SEAL** - Sealing of asphalt roadway cracks less than 2" wide by application of a bituminous asphalt sealant specifically designed for crack sealing.	LF	1		$ 5.00	N/A	$ 5.00
38	**UTILITY ADJUSTMENT, STORMWATER INLET** - Raise or lower stormwater inlet frame and grate, includes brick and concrete morter as necessary.	EA	1		$ 250.00	N/A	$ 250.00
39	**UTILITY ADJUSTMENT, MANHOLE** - Raise or lower utility manhole frame/rim and cover, includes brick and concrete morter as necessary.	EA	1		$ 500.00	N/A	$ 500.00
40	**UTILITY ADJUSTMENT, VALVE BOX** - Raise or lower utility valve boxes, includes flowable fill or cast-in-place concrete ring as necessary.	EA	1		$ 300.00	N/A	$ 300.00
41	**REMOVE/DISPOSE/REPLACE DAMAGED MANHOLE/INLET FRAME, MD-COUNTY** - Removal and disposal of damaged drainage inlet frame and grate or utility manhole frame and lid, includes coordinating with and picking up new frames/grates/lids from Miami-Dade Water and Sewer Department, also includes re-	EA	1		$ 500.00	N/A	$ 500.00
42	**REMOVE/DISPOSE/REPLACE DAMAGED VALVE COVER, MD-COUNTY** - Removal and disposal of damaged water or sewer valve box, includes coordinating with and picking up new frames/grates/lids from Miami-Dade Water and Sewer Department, also includes re-installation.	EA	1		$ 500.00	N/A	$ 500.00
43	**REPAIR CONCRETE MANHOLE/INLET** - Repair of damaged concrete utility manhole or drainage inlet	EA	1		$ 1,000.00	N/A	$ 1,000.00
44	**CONCRETE CURB AND GUTTER REMOVAL** - Removal and disposal of all types of existing concrete curbing and curb & gutter (existing limerock pad to remain if new curbing is being installed).	LF	1		$ 15.00	N/A	$ 15.00
45	**CONCRETE CURB, NON-REINFORCED** - Type "B," "D," "A," and all other standard curb types without gutter (limerock pad to be paid under separate line item, if necessary).	LF	1		$ 25.00	N/A	$ 25.00
46	**CONCRETE CURB, REINFORCED** - Steel reinforced Type "B," "D," "A," and all other standard reinforced curb types without gutter (limerock pad to be paid under separate line item, if necessary).	LF	1		$ 36.00	N/A	$ 36.00

Director's Approval: _____

CITY OF MIAMI, FLORIDA

INTER-OFFICE MEMORANDUM

TO: Arthur Noriega V
City Manager

DATE: November 23, 2020

SUBJECT: Recommendation of Award for Pavement Resurfacing Services

FROM: Annie Perez, CPPO, Director
Department of Procurement

REFERENCES: IFB No. 1115382

ENCLOSURES: Bid Tabulation; Award Recommendation Dated 10/29/20; Rescission of Award Memo dated 10/29/20; Best and Final Offer Letter ("BAFO")

RECOMMENDATION:

Based on the findings below, the Procurement Department ("Procurement") hereby recommends the award of Invitation for Bid ("IFB") No. 1115382 to H&R Paving, Inc. ("H&R Paving") the apparent responsive and responsible Bidder, for the provision of pavement resurfacing services for the Department of Resilience and Public Works ("Public Works"), on an as needed basis. The awarded vendor, contract terms, and amount are shown below.

Contract Number/Title: IFB No. 1115382, Pavement Resurfacing Services

Contract Amount: The estimated contract amount is approximately $200,176.35 annually for Group 1 – Non-Federally Funded Projects and $200,181.33 annually for Group – 2 Federally Funded Projects (approximately $1,401,234.45 and $1,401,269.31 respectively for all seven (7) years).

Contract Term: Initial term of three (3) years, with the option to renew for two (2) additional two (2) year periods.

Recommended Vendors: H&R Paving, Inc. ("H&R Paving")

BACKGROUND:

On September 11, 2020, Procurement issued IFB No. 1115382 for the provision of Pavement Resurfacing Services, under full and open competition. On October 9, 2020 at bid closing three (3) bids were received. The bids were evaluated following the guidelines published in the soliciation. Two (2) bids were found to be non-responsive. H&R was the responsive and responsible Bidder. On October 29, 2020,an award was recommended and approved (please see attached), however after further discussion with Public Works, on November 16, 2020, a BAFO letter (please see attached) was issued to H&R to request additional savings on their original bid pricing submittal. H&R returned the BAFO providing a savings of $36.05 for each group over the course of the contract. Public Works has approved the BAFO.

Consequently, approval of this recommendation to award is requested. Your signature below will indicate approval of this recommendation.

AGENDA ITEM SUMMARY FORM

File ID: #8453

Date: 01/07/2021

Requesting Department: Department of Resilience and Public Works

Commission Meeting Date: 03/11/2021

Sponsored By:

District Impacted: All

Type: Resolution

Subject: Accept Bid - H&R Paving, Inc.

Purpose of Item:

The nature of this item is to authorize a resolution of the Miami City Commission, accepting the bid received on October 9, 2020 pursuant to IFB 1115382 from the lowest responsive and responsible bidder, H&R Paving, Inc. ("H&R Paving") for the provision of pavement resurfacing services, on and as-needed basis, for the Department of Resilience and Public Works (“Public Works”), on an as needed basis, for an initial term of three (3) years, with the option to renew for two (2) additional two (2) year periods, allocating funds from Public Works' Account No. 40-B73102E and other funding sources, subject to the availability of funds and budget approval at the time of need; authorizing the City Manager to negotiate and execute all other documents, including any amendments, renewals, and extensions, subject to allocations, appropriations and prior budgetary approvals, and in compliance with all applicable provisions of the Code of the City of Miami, Florida, as amended, ("City Code"), including, the City of Miami's Procurement Ordinance, Anti-Deficiency Act, and Financial Integrity Principles, all as set forth in Chapter 18 of the City Code, in a form acceptable to the City Attorney, and in compliance with all applicable laws, rules, and regulations, as may be deemed necessary for said purpose.

Background of Item:

On September 11, 2020, the Department of Procurement (“Procurement”), on behalf of Public Works issued IFB No. 1115382, Pavement Resurfacing Services, on an as-needed basis, under full and open competition to obtain the services of an experienced and qualified Bidder for the purpose of providing pavement resurfacing and roadway repair services. On October 9, 2020, three (3) bids were received. Two (2) vendors were deemed non-responsive, Procurement is recommending award to H&R Paving, which met all requirements, per the bid specifications, and is the apparent and responsive and responsible bidder. The estimated contract amount is approximately $200,176.35 annually for Group 1 - Non-Federally Funded Projects; and $200,181.33 annually for Group 2 - Federally Funded Projects (approximately $1,401,234.45 for Group 1 and $1,401,269.31 for Group 2 for all seven (7) years.

Budget Impact Analysis

Item is an Expenditure
Item has NO budget impact
Item is NOT funded by Bonds

Total Fiscal Impact:
$200,176.35 annually Group 1; $200,181.33 annually Group 2; See background notes.

File Number: 8453 **Final Action Date:3/11/2021**

A RESOLUTION OF THE MIAMI CITY COMMISSION ACCEPTING THE BID RECEIVED ON OCTOBER 9, 2020 PURSUANT TO INVITATION FOR BID NO. 1115382 FROM THE LOWEST RESPONSIVE AND RESPONSIBLE BIDDER, H&R PAVING, INC., A FLORIDA PROFIT CORPORATION, FOR THE PROVISION OF PAVEMENT RESURFACING AND ROADWAY REPAIR SERVICES, ON AN AS-NEEDED BASIS, FOR THE CITY OF MIAMI'S DEPARTMENT OF RESILIENCE AND PUBLIC WORKS FOR AN INITIAL TERM OF THREE (3) YEARS WITH THE OPTION TO RENEW FOR TWO (2) ADDITIONAL TWO (2) YEAR PERIODS; ALLOCATING FUNDS FROM ACCOUNT NO. 40-B73102E AND SUCH OTHER LEGALLY AVAILABLE FUNDING SOURCES, SUBJECT TO THE AVAILABILITY OF FUNDS AND BUDGETARY APPROVAL AT THE TIME OF NEED; AUTHORIZING THE CITY MANAGER TO NEGOTIATE AND EXECUTE ANY AND ALL OTHER DOCUMENTS, INCLUDING ANY AMENDMENTS, RENEWALS, AND EXTENSIONS, SUBJECT TO ALL ALLOCATIONS, APPROPRIATIONS, PRIOR BUDGETARY APPROVALS, COMPLIANCE WITH ALL APPLICABLE PROVISIONS OF THE CODE OF THE CITY OF MIAMI, FLORIDA, AS AMENDED ("CITY CODE"), INCLUDING THE CITY'S PROCUREMENT ORDINANCE, ANTI-DEFICIENCY ACT, AND FINANCIAL INTEGRITY PRINCIPLES, ALL AS SET FORTH IN CHAPTER 18 OF THE CITY CODE, IN FORMS ACCEPTABLE TO THE CITY ATTORNEY, AND IN COMPLIANCE WITH ALL APPLICABLE LAWS, RULES, AND REGULATIONS, AS MAY BE DEEMED NECESSARY FOR SAID PURPOSE.

WHEREAS, the City of Miami's ("City") Department of Resilience and Public Works ("RPW") has a continued need for pavement resurfacing and roadway repair services; and

WHEREAS, on September 11, 2020, pursuant to the City's Procurement Code, on behalf of RPW, the City's Department of Procurement ("Procurement") advertised and issued online Invitation for Bid ("IFB") No. 1115382 for the provision of pavement resurfacing and roadway repair services on an as needed basis; and

WHEREAS, on October 9, 2020, three (3) bids were received in response to this IFB, with the lowest responsive and responsible bid submitted by H&R Paving, Inc., a Florida profit corporation ("H&R Paving");

NOW, THEREFORE, BE IT RESOLVED BY THE COMMISSION OF THE CITY OF MIAMI, FLORIDA:

Section 1. The recitals and findings contained in the Preamble to this Resolution are adopted by reference and incorporated as if fully set forth in this Section.

Section 2. The bid received on October 9, 2020 pursuant to IFB No. 1115382 from the lowest responsive and responsible Bidder, H&R Paving, for the provision of pavement resurfacing and roadway repair services on an as-needed basis for RPW for an initial term of

three (3) years with the option to renew for two (2) additional two (2) year periods is hereby accepted.

Section 3. Funds shall be allocated from Account No. 40-B73102E and such other legally available funding sources, subject to the availability of funds and budgetary approval at the time of need.

Section 4. The City Manager is authorized[1] to negotiate and execute any and all other documents, including any amendments, renewals, and extensions, subject to all allocations, appropriations, prior budgetary approvals, compliance with all applicable provisions of the Code of the City of Miami, Florida, as amended ("City Code"), including the City's Procurement Ordinance, Anti-Deficiency Act, and Financial Integrity Principles, all as set forth in Chapter 18 of the City Code, in forms acceptable to the City Attorney, and in compliance with all applicable laws, rules, and regulations, as may be deemed necessary for said purpose.

Section 5. This Resolution shall become effective immediately upon its adoption.

APPROVED AS TO FORM AND CORRECTNESS:

Victoria Mendez, City Attorney 2/24/2021

[1] The herein authorization is further subject to compliance with all legal requirements that may be imposed, including but not limited to those prescribed by applicable City Charter and City Code provisions.

A RESOLUTION OF THE MIAMI CITY COMMISSION, ACCEPTING THE BID RECEIVED ON OCTOBER 9, 2020 PURSUANT TO INVITATION FOR BID (“IFB”) 1115382 FROM THE LOWEST RESPONSIVE AND RESPONSIBLE BIDDER, H&R PAVING, INC. ("H&R PAVING") FOR THE PROVISION OF PAVEMENT RESURFACING SERVICES, ON AN AS-NEEDED BASIS, FOR THE DEPARTMENT OF RESILIENCE AND PUBLIC WORKS (“RPW”), FOR AN INITIAL CONTRACT TERM OF THREE (3) YEARS, WITH THE OPTION TO RENEW FOR TWO (2) ADDITIONAL TWO (2) YEAR PERIODS, ALLOCATING FUNDS FROM ACCOUNT NO. 40-B73102E AND OTHER FUNDING SOURCES, SUBJECT TO THE AVAILABILITY OF FUNDS AND BUDGET APPROVAL AT THE TIME OF NEED; AUTHORIZING THE CITY MANAGER TO NEGOTIATE AND EXECUTE ALL OTHER DOCUMENTS, INCLUDING ANY AMENDMENTS, RENEWALS, AND EXTENSIONS, SUBJECT TO ALLOCATIONS, APPROPRIATIONS AND PRIOR BUDGETARY APPROVALS, AND IN COMPLIANCE WITH ALL APPLICABLE PROVISIONS OF THE CODE OF THE CITY OF MIAMI, FLORIDA, AS AMENDED, ("CITY CODE"), INCLUDING, THE CITY OF MIAMI'S PROCUREMENT ORDINANCE, ANTI-DEFICIENCY ACT, AND FINANCIAL INTEGRITY PRINCIPLES, ALL AS SET FORTH IN CHAPTER 18 OF THE CITY CODE, IN A FORM ACCEPTABLE TO THE CITY ATTORNEY, AND IN COMPLIANCE WITH ALL APPLICABLE LAWS, RULES, AND REGULATIONS, AS MAY BE DEEMED NECESSARY FOR SAID PURPOSE.

..Body

BE IT RESOLVED BY THE COMMISSION OF THE CITY OF MIAMI, FLORIDA:

WHEREAS, RPW has a continued need for pavement resurfacing and roadway repair services, on an as needed basis.; and

WHEREAS, on September 11, 2020, the Department of Procurement (“Procurement”) on behalf of RPW, issued IFB No. 1185386, for the provision of pavement resurfacing and roadway repair services, on an as-needed basis. As required by the Procurement Code, the IFB was advertised and issued on-line.

NOW, THEREFORE, BE IT RESOLVED BY THE COMMISSION OF THE CITY OF MIAMI, FLORIDA:

Section 1. The recitals and findings contained in the Preamble to this Resolution are adopted by reference and incorporated as if fully set forth in this Section.

Section 2. The bid received October 9, 2020 pursuant to IFB 1115382 from, the lowest responsive and responsible Bidder, H&R Paving, for the provision of pavement resurfacing and roadway repair services on an as-needed basis for an initial contract term of three (3) years, with the option to renew for two (2) additional two (2) year periods. allocating funds from RPW’s’ Account No. 0001.208000.534000.0000.00000 and other funding sources, subject to the availability of funds and budget approval at the time of need, is accepted.

Section 3. he City Manager{1} is authorized to negotiate and execute all other documents, including any amendments, renewals, and extensions, subject to allocations, appropriations and prior budgetary approvals, and in compliance with all applicable provisions of the City Code, as amended, including, the City of Miami's Procurement Ordinance, Anti-Deficiency Act, and Financial Integrity Principles, all as set forth in Chapter 18 of the City Code, in a form acceptable to the City Attorney, and in compliance with all applicable laws, rules, and regulations, as may be deemed necessary for said purpose.

Section 4. This Resolution shall become effective immediately upon its adoption and signature of the Mayor. {2}

APPROVED AS TO FORM AND CORRECTNESS:

_____
VICTORIA MÉNDEZ
CITY ATTORNEY

..Footnotes

{1} The herein authorization is further subject to compliance with all requirements that may be imposed by the City Attorney, including but not limited to those prescribed by applicable City Charter and Code provisions.

{2} This Resolution shall become effective as specified herein unless vetoed by the Mayor within ten (10) days from the date it was passed and adopted. If the Mayor vetoes this Resolution, it shall become effective immediately upon override of the veto by the City Commission or upon the effective date stated herein, whichever is later.

Sponsored by: Interim City Manager

RESOLUTION NO. 24-XXXX

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, AUTHORIZING THE INTERIM CITY MANAGER TO ENTER INTO A PUBLIC TRANSPORTATION GRANT AGREEMENT WITH THE FLORIDA DEPARTMENT OF TRANSPORTATION, ATTACHED HERETO AS EXHIBIT "A"; AUTHORIZING CITY FUNDING TO SUPPORT A 50% GRANT MATCHING REQUIREMENT FOR AN AMOUNT UP TO THREE HUNDRED, FORTY-NINE THOUSAND FOUR HUNDRED SEVENTY-SIX DOLLARS ($349,476.00) TO SERVICE A SOUTHERN ROUTE SHUTTLE BUS FOR RESIDENTS OF THE CITY AND ADJACENT AREAS; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FOR AN EFFECTIVE DATE

WHEREAS, the City of Opa-Locka ("City") applied for and has received a Florida Department of Transportation (FDOT) grant requiring a 50% match amount with available funding up to Three Hundred, Forty-Nine Thousand Four Hundred Seventy-Six Dollars ($349,476.00), which is effective from the contract execution date through June 30, 2025; and

WHEREAS, the FDOT grant is based on a cost amount of $698,952, with the FDOT grant funding up to 50% of this amount; and

WHEREAS, the purpose of the match grant is to fund a Southern Route Bus Shuttle for the provision of service to residents of the City, and adjacent areas as described in the Agreement attached hereto as Exhibit "A"; and

WHEREAS, the City of Opa-Locka will be responsible for securing a third party vendor for service delivery for a route complementary to the existing MDT Metrobus Service; and

WHEREAS, the City currently has one community bus route operated by Limousines of South Florida, covering a route between the Opa-Locka Tri Rail Station on Ali Baba and Walgreens on NW 27th Avenue; and

WHEREAS, the FY 2024 adopted budget People's Transportation Plan funded $700,000 for two bus routes, including using a grant with a 50% match requirement for the new southern route and $800,000 to be used as part of the funding of a Cairo Lane project. The annual funding received each year from the CITT for this fund requires from 20% to 100% to be used for buses or other forms of transit, and the remainder, if any, to be used for roadway improvements; and

WHEREAS, as a financial consideration, City staff has determined that the $700,000 allocated for the two bus routes will fund the northern route for the full year, however, the southern route would be funded for only a portion of FY 2024. If in FY 25, a full year of operation for the southern route is more expensive than currently estimated, a portion of CITT funding that would be otherwise used for roadway improvement would be reallocated in assist in funding the southern route; and

WHEREAS, the City Commission finds it to be in the best interests of the City and its residents to enter into a public funding grant agreement with the Florida Department of Transportation and authorize City funding to support a 50% match requirement for an amount up to Three Hundred Forty-Nine Thousand, Four Hundred Seventy-Six Dollars ($349,476.00) to service a southern route shuttle bus for residents of the city and adjacent areas.

NOW THEREFORE, BE IT RESOLVED THAT THE CITY COMMISSION OF THE CITY OF OPA LOCKA, FLORIDA:

Section 1. Adoptions of Representations. The foregoing "Whereas" clauses are hereby ratified and confirmed as being true, and the same are hereby made a specific part of this Resolution.

Section 2. Authorizing Execution of Agreement. The City Commission of the City of Opa-Locka, Florida hereby authorizes the Interim City Manager to enter into a public funding grant agreement with the Florida Department of Transportation and authorize City funding to support a 50% match requirement for an amount up to Three Hundred Forty-Nine Thousand, Four Hundred Seventy-Six Dollars ($349,476.00) to service a southern route bus shuttle for residents of the city and adjacent areas.

Section 3. Effective Date. This Resolution shall take effect immediately upon adoption, and is subject to the approval of the Governor of the State of Florida or his designee.

PASSED and **ADOPTED** this _____ day of _____, 2024.

Short Title:

Acceptance of Florida Department of Transportation for Opa-locka Community Bus Route (South Corridor)

Staff Summary:

Issue: The City has received a Florida Department of Transportation (FDOT) grant for up to $349,476 for one year of a second community bus route within the City which requires the City to match one-half of the annual cost of this program.

Background: The City currently has one community bus route, operated by Limousines of South Florida, which covers a route between the Opa-locka Tri Rail Station on Ali Baba and Walgreens on NW 27th Avenue. This program is funded through a County surtax for transportation programs, administered by the County Citizens' Independent Transportation Trust (CITT). This program fully funds the operation of this bus route, approximately $210,000, with the City incurring no expense other than staff time in addressing the administrative requirements of the program.

The City previously had a second southern route that connected the Tri Rail Station, Miami Dade College North Campus, and other public destinations within the City. This route had also been funded by grants but was terminated several years ago when these grants became no longer available.

Current Activity: The City applied for and has received a FDOT grant for up to $349,476 to reactivate the dormant southern route. This grant can be used to cover one-half of the cost of operating this route. The City is required to fund the other half of this program. CITT staff has indicated that the City won't receive additional CITT funding if the City chooses to operate a second bus route.

Financial Impact: The FY 24 Adopted Budget, People's Transportation Plan, funded $700,000 for two bus routes, including using a grant with a 50% match for the new southern route and $800,000 to be used as part of the funding of the Cairo Lane project. The annual funding received each year from the CITT for this fund requires from 20% to 100% be used for buses or other forms of transit and the remainder, if any, to be used for roadway improvement.

The $700,000 allocated for two bus routes will be sufficient for funding the northern route for the full year and for funding the southern route for the portion of FY 24 it would be operational. If in FY 25 a full year of operation for the southern route is more expensive than currently estimated, a portion of the CITT funding that would otherwise be used for roadway improvement will be reallocated to assist in funding the second route.

Proposed Action:

Staff recommends the City Commission authorize the Interim City Manager to accept the FDOT grant of up to $349.476 as a 50% match for a City southern bus route.

THIS PUBLIC TRANSPORTATION GRANT AGREEMENT ("Agreement") is entered into _____, by and between the State of Florida, Department of Transportation, ("Department"), and City of Opa Locka, ("Agency"). The Department and the Agency are sometimes referred to in this Agreement as a "Party" and collectively as the "Parties."

NOW, THEREFORE, in consideration of the mutual benefits to be derived from joint participation on the Project, the Parties agree to the following:

1. **Authority.** The Agency, by Resolution or other form of official authorization, a copy of which is attached as **Exhibit "D", Agency Resolution** and made a part of this Agreement, has authorized its officers to execute this Agreement on its behalf. The Department has the authority pursuant to Section(s) 341.051, Florida Statutes, to enter into this Agreement.

2. **Purpose of Agreement.** The purpose of this Agreement is to provide for the Department's participation in City of Opa-Locka will provide South Route shuttle bus service to residents of the City and adjacent areas, as further described in **Exhibit "A", Project Description and Responsibilities**, attached and incorporated into this Agreement ("Project"), to provide Department financial assistance to the Agency, state the terms and conditions upon which Department funds will be provided, and to set forth the manner in which the Project will be undertaken and completed.

3. **Program Area.** For identification purposes only, this Agreement is implemented as part of the Department program area selected below (select all programs that apply):

   _ **Aviation**
   _ **Seaports**
   X **Transit**
   _ **Intermodal**
   _ **Rail Crossing Closure**
   _ **Match to Direct Federal Funding** (Aviation or Transit)
   (Note: Section 15 and Exhibit G do not apply to federally matched funding)
   _ **Other**

4. **Exhibits.** The following Exhibits are attached and incorporated into this Agreement:

   X Exhibit A: Project Description and Responsibilities
   X Exhibit B: Schedule of Financial Assistance
   _ *Exhibit B1: Deferred Reimbursement Financial Provisions
   _ *Exhibit B2: Advance Payment Financial Provisions
   _ *Exhibit B3: Alternative Advanced Pay (Transit Bus Program)
   _ *Exhibit C: Terms and Conditions of Construction
   X Exhibit D: Agency Resolution
   X Exhibit E: Program Specific Terms and Conditions
   X Exhibit F: Contract Payment Requirements
   X *Exhibit G: Audit Requirements for Awards of State Financial Assistance

__ *Exhibit H: Audit Requirements for Awards of Federal Financial Assistance
__ *Exhibit I: Certification of Disbursement of Payment to Vehicle and/or Equipment Vendor
__ *Additional Exhibit(s):

*Indicates that the Exhibit is only attached and incorporated if applicable box is selected.

5. **Time.** Unless specified otherwise, all references to "days" within this Agreement refer to calendar days.

6. **Term of Agreement.** This Agreement shall commence upon full execution by both Parties ("Effective Date") and continue through June 30, 2025. If the Agency does not complete the Project within this time period, this Agreement will expire unless an extension of the time period is requested by the Agency and granted in writing by the Department prior to the expiration of this Agreement. Expiration of this Agreement will be considered termination of the Project. The cost of any work performed prior to the Effective Date or after the expiration date of this Agreement will not be reimbursed by the Department.

   a. __ If this box is checked the following provision applies:

   Unless terminated earlier, work on the Project shall commence no later than the __ day of __, or within __ days of the issuance of the Notice to Proceed for the construction phase of the Project (if the Project involves construction), whichever date is earlier. The Department shall have the option to immediately terminate this Agreement should the Agency fail to meet the above-required dates.

7. **Amendments, Extensions, and Assignment.** This Agreement may be amended or extended upon mutual written agreement of the Parties. This Agreement shall not be renewed. This Agreement shall not be assigned, transferred, or otherwise encumbered by the Agency under any circumstances without the prior written consent of the Department.

8. **Termination or Suspension of Project.** The Department may, by written notice to the Agency, suspend any or all of the Department's obligations under this Agreement for the Agency's failure to comply with applicable law or the terms of this Agreement until such time as the event or condition resulting in such suspension has ceased or been corrected.

   a. Notwithstanding any other provision of this Agreement, if the Department intends to terminate the Agreement, the Department shall notify the Agency of such termination in writing at least thirty (30) days prior to the termination of the Agreement, with instructions to the effective date of termination or specify the stage of work at which the Agreement is to be terminated.

   b. The Parties to this Agreement may terminate this Agreement when its continuation would not produce beneficial results commensurate with the further expenditure of funds. In this event, the Parties shall agree upon the termination conditions.

   c. If the Agreement is terminated before performance is completed, the Agency shall be paid only for that work satisfactorily performed for which costs can be substantiated. Such payment, however, may not exceed the equivalent percentage of the Department's maximum financial assistance. If any portion of the Project is located on the Department's right-of-way, then all work in progress on the Department right-of-way will become the property of the Department and will be turned over promptly by the Agency.

   d. In the event the Agency fails to perform or honor the requirements and provisions of this Agreement, the Agency shall promptly refund in full to the Department within thirty (30) days of the termination of the Agreement any funds that were determined by the Department to have been expended in violation of the Agreement.

   e. The Department reserves the right to unilaterally cancel this Agreement for failure by the Agency to comply with the Public Records provisions of Chapter 119, Florida Statutes.

9. Project Cost:

a. The estimated total cost of the Project is $698,952. This amount is based upon **Exhibit "B", Schedule of Financial Assistance**. The timeline for deliverables and distribution of estimated amounts between deliverables within a grant phase, as outlined in **Exhibit "B", Schedule of Financial Assistance**, may be modified by mutual written agreement of the Parties and does not require execution of an **Amendment to the Public Transportation Grant Agreement**. The timeline for deliverables and distribution of estimated amounts between grant phases requires an amendment executed by both Parties in the same form as this Agreement.

b. The Department agrees to participate in the Project cost up to the maximum amount of $349,476 and, the Department's participation in the Project shall not exceed 50.00% of the total eligible cost of the Project, and as more fully described in **Exhibit "B", Schedule of Financial Assistance**. The Agency agrees to bear all expenses in excess of the amount of the Department's participation and any cost overruns or deficits involved.

10. Compensation and Payment:

a. Eligible Cost. The Department shall reimburse the Agency for allowable costs incurred as described in **Exhibit "A", Project Description and Responsibilities**, and as set forth in **Exhibit "B", Schedule of Financial Assistance**.

b. Deliverables. The Agency shall provide quantifiable, measurable, and verifiable units of deliverables. Each deliverable must specify the required minimum level of service to be performed and the criteria for evaluating successful completion. The Project and the quantifiable, measurable, and verifiable units of deliverables are described more fully in **Exhibit "A", Project Description and Responsibilities**. Modifications to the deliverables in **Exhibit "A", Project Description and Responsibilities** requires a formal written amendment.

c. Invoicing. Invoices shall be submitted no more often than monthly by the Agency in detail sufficient for a proper pre-audit and post-audit, based on the quantifiable, measurable, and verifiable deliverables as established in **Exhibit "A", Project Description and Responsibilities**. Deliverables and costs incurred must be received and approved by the Department prior to reimbursement. Requests for reimbursement by the Agency shall include an invoice, progress report, and supporting documentation for the deliverables being billed that are acceptable to the Department. The Agency shall use the format for the invoice and progress report that is approved by the Department.

d. Supporting Documentation. Supporting documentation must establish that the deliverables were received and accepted in writing by the Agency and must also establish that the required minimum standards or level of service to be performed based on the criteria for evaluating successful completion as specified in **Exhibit "A", Project Description and Responsibilities** has been met. All costs invoiced shall be supported by properly executed payrolls, time records, invoices, contracts, or vouchers evidencing in proper detail the nature and propriety of charges as described in **Exhibit "F", Contract Payment Requirements**.

e. Travel Expenses. The selected provision below is controlling regarding travel expenses:

X Travel expenses are NOT eligible for reimbursement under this Agreement.

_ Travel expenses ARE eligible for reimbursement under this Agreement. Bills for travel expenses specifically authorized in this Agreement shall be submitted on the Department's Contractor Travel Form No. 300-000-06 and will be paid in accordance with Section 112.061,

Florida Statutes, and the most current version of the Department's Disbursement Handbook for Employees and Managers.

f. **Financial Consequences.** Payment shall be made only after receipt and approval of deliverables and costs incurred unless advance payments are authorized by the Chief Financial Officer of the State of Florida under Chapters 215 and 216, Florida Statutes, or the Department's Comptroller under Section 334.044(29), Florida Statutes. If the Department determines that the performance of the Agency is unsatisfactory, the Department shall notify the Agency of the deficiency to be corrected, which correction shall be made within a time-frame to be specified by the Department. The Agency shall, within thirty (30) days after notice from the Department, provide the Department with a corrective action plan describing how the Agency will address all issues of contract non-performance, unacceptable performance, failure to meet the minimum performance levels, deliverable deficiencies, or contract non-compliance. If the corrective action plan is unacceptable to the Department, the Agency will not be reimbursed. If the deficiency is subsequently resolved, the Agency may bill the Department for the amount that was previously not reimbursed during the next billing period. If the Agency is unable to resolve the deficiency, the funds shall be forfeited at the end of the Agreement's term.

g. **Invoice Processing.** An Agency receiving financial assistance from the Department should be aware of the following time frames. Inspection or verification and approval of deliverables shall take no longer than 20 days from the Department's receipt of the invoice. The Department has 20 days to deliver a request for payment (voucher) to the Department of Financial Services. The 20 days are measured from the latter of the date the invoice is received or the deliverables are received, inspected or verified, and approved.

   If a payment is not available within 40 days, a separate interest penalty at a rate as established pursuant to Section 55.03(1), Florida Statutes, will be due and payable, in addition to the invoice amount, to the Agency. Interest penalties of less than one (1) dollar will not be enforced unless the Agency requests payment. Invoices that have to be returned to an Agency because of Agency preparation errors will result in a delay in the payment. The invoice payment requirements do not start until a properly completed invoice is provided to the Department.

   A Vendor Ombudsman has been established within the Department of Financial Services. The duties of this individual include acting as an advocate for Agency who may be experiencing problems in obtaining timely payment(s) from a state agency. The Vendor Ombudsman may be contacted at (850) 413-5516.

h. **Records Retention.** The Agency shall maintain an accounting system or separate accounts to ensure funds and projects are tracked separately. Records of costs incurred under the terms of this Agreement shall be maintained and made available upon request to the Department at all times during the period of this Agreement and for five years after final payment is made. Copies of these records shall be furnished to the Department upon request. Records of costs incurred include the Agency's general accounting records and the Project records, together with supporting documents and records, of the Contractor and all subcontractors performing work on the Project, and all other records of the Contractor and subcontractors considered necessary by the Department for a proper audit of costs.

i. **Progress Reports.** Upon request, the Agency agrees to provide progress reports to the Department in the standard format used by the Department and at intervals established by the Department. The Department will be entitled at all times to be advised, at its request, as to the status of the Project and of details thereof.

j. **Submission of Other Documents.** The Agency shall submit to the Department such data, reports, records, contracts, and other documents relating to the Project as the Department

may require as listed in **Exhibit "E", Program Specific Terms and Conditions** attached to and incorporated into this Agreement.

k. **Offsets for Claims.** If, after Project completion, any claim is made by the Department resulting from an audit or for work or services performed pursuant to this Agreement, the Department may offset such amount from payments due for work or services done under any agreement that it has with the Agency owing such amount if, upon written demand, payment of the amount is not made within 60 days to the Department. Offsetting any amount pursuant to this paragraph shall not be considered a breach of contract by the Department.

l. **Final Invoice.** The Agency must submit the final invoice on the Project to the Department within 120 days after the completion of the Project. Invoices submitted after the 120-day time period may not be paid.

m. **Department's Performance and Payment Contingent Upon Annual Appropriation by the Legislature.** The Department's performance and obligation to pay under this Agreement is contingent upon an annual appropriation by the Legislature. If the Department's funding for this Project is in multiple fiscal years, a notice of availability of funds from the Department's project manager must be received prior to costs being incurred by the Agency. See **Exhibit "B", Schedule of Financial Assistance** for funding levels by fiscal year. Project costs utilizing any fiscal year funds are not eligible for reimbursement if incurred prior to funds approval being received. The Department will notify the Agency, in writing, when funds are available.

n. **Limits on Contracts Exceeding $25,000 and Term more than 1 Year.** In the event this Agreement is in excess of $25,000 and has a term for a period of more than one year, the provisions of Section 339.135(6)(a), Florida Statutes, are hereby incorporated:

> "The Department, during any fiscal year, shall not expend money, incur any liability, or enter into any contract which, by its terms, involves the expenditure of money in excess of the amounts budgeted as available for expenditure during such fiscal year. Any contract, verbal or written, made in violation of this subsection is null and void, and no money may be paid on such contract. The Department shall require a statement from the comptroller of the Department that funds are available prior to entering into any such contract or other binding commitment of funds. Nothing herein contained shall prevent the making of contracts for periods exceeding 1 year, but any contract so made shall be executory only for the value of the services to be rendered or agreed to be paid for in succeeding fiscal years; and this paragraph shall be incorporated verbatim in all contracts of the Department which are for an amount in excess of $25,000 and which have a term for a period of more than 1 year."

o. **Agency Obligation to Refund Department.** Any Project funds made available by the Department pursuant to this Agreement that are determined by the Department to have been expended by the Agency in violation of this Agreement or any other applicable law or regulation shall be promptly refunded in full to the Department. Acceptance by the Department of any documentation or certifications, mandatory or otherwise permitted, that the Agency files shall not constitute a waiver of the Department's rights as the funding agency to verify all information at a later date by audit or investigation.

p. **Non-Eligible Costs.** In determining the amount of the payment, the Department will exclude all Project costs incurred by the Agency prior to the execution of this Agreement, costs incurred after the expiration of the Agreement, costs that are not provided for in **Exhibit "A", Project Description and Responsibilities**, and as set forth in **Exhibit "B", Schedule of Financial Assistance**, costs agreed to be borne by the Agency or its contractors and subcontractors for

not meeting the Project commencement and final invoice time lines, and costs attributable to goods or services received under a contract or other arrangement that has not been approved in writing by the Department. Specific unallowable costs may be listed in **Exhibit "A", Project Description and Responsibilities.**

11. **General Requirements.** The Agency shall complete the Project with all practical dispatch in a sound, economical, and efficient manner, and in accordance with the provisions in this Agreement and all applicable laws.

    a. **Necessary Permits Certification.** The Agency shall certify to the Department that the Agency's design consultant and/or construction contractor has secured the necessary permits.

    b. **Right-of-Way Certification.** If the Project involves construction, then the Agency shall provide to the Department certification and a copy of appropriate documentation substantiating that all required right-of-way necessary for the Project has been obtained. Certification is required prior to authorization for advertisement for or solicitation of bids for construction of the Project, even if no right-of-way is required.

    c. **Notification Requirements When Performing Construction on Department's Right-of-Way.** In the event the cost of the Project is greater than $250,000.00, and the Project involves construction on the Department's right-of-way, the Agency shall provide the Department with written notification of either its intent to:

        i. Require the construction work of the Project that is on the Department's right-of-way to be performed by a Department prequalified contractor, or

        ii. Construct the Project utilizing existing Agency employees, if the Agency can complete said Project within the time frame set forth in this Agreement.

    d. __ If this box is checked, then the Agency is permitted to utilize its own forces and the following provision applies: **Use of Agency Workforce.** In the event the Agency proceeds with any phase of the Project utilizing its own forces, the Agency will only be reimbursed for direct costs (this excludes general overhead).

    e. __ If this box is checked, then the Agency is permitted to utilize **Indirect Costs: Reimbursement for Indirect Program Expenses** (select one):

        i. __ Agency has selected to seek reimbursement from the Department for actual indirect expenses (no rate).

        ii. __ Agency has selected to apply a de minimus rate of 10% to modified total direct costs. Note: The de minimus rate is available only to entities that have never had a negotiated indirect cost rate. When selected, the de minimus rate must be used consistently for all federal awards until such time the agency chooses to negotiate a rate. A cost policy statement and de minimis certification form must be submitted to the Department for review and approval.

        iii. __ Agency has selected to apply a state or federally approved indirect cost rate. A federally approved rate agreement or indirect cost allocation plan (ICAP) must be submitted annually.

    f. **Agency Compliance with Laws, Rules, and Regulations, Guidelines, and Standards.** The Agency shall comply and require its contractors and subcontractors to comply with all terms and conditions of this Agreement and all federal, state, and local laws and regulations applicable to this Project.

g. **Claims and Requests for Additional Work.** The Agency shall have the sole responsibility for resolving claims and requests for additional work for the Project. The Agency will make best efforts to obtain the Department's input in its decisions. The Department is not obligated to reimburse for claims or requests for additional work.

12. Contracts of the Agency:

a. **Approval of Third Party Contracts.** The Department specifically reserves the right to review and approve any and all third party contracts with respect to the Project before the Agency executes or obligates itself in any manner requiring the disbursement of Department funds, including consultant and purchase of commodities contracts, or amendments thereto. If the Department chooses to review and approve third party contracts for this Project and the Agency fails to obtain such approval, that shall be sufficient cause for nonpayment by the Department. The Department specifically reserves unto itself the right to review the qualifications of any consultant or contractor and to approve or disapprove the employment of the same. If Federal Transit Administration (FTA) funds are used in the Project, the Department must exercise the right to third party contract review.

b. **Procurement of Commodities or Contractual Services.** It is understood and agreed by the Parties hereto that participation by the Department in a project with the Agency, where said project involves the purchase of commodities or contractual services where purchases or costs exceed the Threshold Amount for CATEGORY TWO per Section 287.017, Florida Statutes, is contingent on the Agency complying in full with the provisions of Section 287.057, Florida Statutes. The Agency's Authorized Official shall certify to the Department that the Agency's purchase of commodities or contractual services has been accomplished in compliance with Section 287.057, Florida Statutes. It shall be the sole responsibility of the Agency to ensure that any obligations made in accordance with this Section comply with the current threshold limits. Contracts, purchase orders, task orders, construction change orders, or any other agreement that would result in exceeding the current budget contained in **Exhibit "B", Schedule of Financial Assistance**, or that is not consistent with the Project description and scope of services contained in **Exhibit "A", Project Description and Responsibilities** must be approved by the Department prior to Agency execution. Failure to obtain such approval, and subsequent execution of an amendment to the Agreement if required, shall be sufficient cause for nonpayment by the Department, in accordance with this Agreement.

c. **Consultants' Competitive Negotiation Act.** It is understood and agreed by the Parties to this Agreement that participation by the Department in a project with the Agency, where said project involves a consultant contract for professional services, is contingent on the Agency's full compliance with provisions of Section 287.055, Florida Statutes, Consultants' Competitive Negotiation Act. In all cases, the Agency's Authorized Official shall certify to the Department that selection has been accomplished in compliance with the Consultants' Competitive Negotiation Act.

d. **Disadvantaged Business Enterprise (DBE) Policy and Obligation.** It is the policy of the Department that DBEs, as defined in 49 C.F.R. Part 26, as amended, shall have the opportunity to participate in the performance of contracts financed in whole or in part with Department funds under this Agreement. The DBE requirements of applicable federal and state laws and regulations apply to this Agreement. The Agency and its contractors agree to ensure that DBEs have the opportunity to participate in the performance of this Agreement. In this regard, all recipients and contractors shall take all necessary and reasonable steps in accordance with applicable federal and state laws and regulations to ensure that the DBEs have the opportunity to compete for and perform contracts. The Agency and its contractors and subcontractors shall not discriminate on the basis of race, color, national origin or sex in the award and performance of contracts, entered pursuant to this Agreement.

13. **Maintenance Obligations.** In the event the Project includes construction or the acquisition of commodities then the following provisions are incorporated into this Agreement:

    a. The Agency agrees to accept all future maintenance and other attendant costs occurring after completion of the Project for all improvements constructed or commodities acquired as part of the Project. The terms of this provision shall survive the termination of this Agreement.

14. **Sale, Transfer, or Disposal of Department-funded Property:**

    a. The Agency will not sell or otherwise transfer or dispose of any part of its title or other interests in real property, facilities, or equipment funded in any part by the Department under this Agreement without prior written approval by the Department.

    b. If a sale, transfer, or disposal by the Agency of all or a portion of Department-funded real property, facilities, or equipment is approved by the Department, the following provisions will apply:

        i. The Agency shall reimburse the Department a proportional amount of the proceeds of the sale of any Department-funded property.

        ii. The proportional amount shall be determined on the basis of the ratio of the Department funding of the development or acquisition of the property multiplied against the sale amount, and shall be remitted to the Department within ninety (90) days of closing of sale.

        iii. Sale of property developed or acquired with Department funds shall be at market value as determined by appraisal or public bidding process, and the contract and process for sale must be approved in advance by the Department.

        iv. If any portion of the proceeds from the sale to the Agency are non-cash considerations, reimbursement to the Department shall include a proportional amount based on the value of the non-cash considerations.

    c. The terms of provisions "a" and "b" above shall survive the termination of this Agreement.

        i. The terms shall remain in full force and effect throughout the useful life of facilities developed, equipment acquired, or Project items installed within a facility, but shall not exceed twenty (20) years from the effective date of this Agreement.

        ii. There shall be no limit on the duration of the terms with respect to real property acquired with Department funds.

15. **Single Audit.** The administration of Federal or State resources awarded through the Department to the Agency by this Agreement may be subject to audits and/or monitoring by the Department. The following requirements do not limit the authority of the Department to conduct or arrange for the conduct of additional audits or evaluations of Federal awards or State financial assistance or limit the authority of any state agency inspector general, the State of Florida Auditor General, or any other state official. The Agency shall comply with all audit and audit reporting requirements as specified below.

    Federal Funded:

    a. In addition to reviews of audits conducted in accordance with 2 CFR Part 200, Subpart F – Audit Requirements, monitoring procedures may include but not be limited to on-site visits by Department staff and/or other procedures, including reviewing any required performance and financial reports, following up, ensuring corrective action, and issuing management decisions on weaknesses found through audits when those findings pertain to Federal awards provided

through the Department by this Agreement. By entering into this Agreement, the Agency agrees to comply and cooperate fully with any monitoring procedures/processes deemed appropriate by the Department. The Agency further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Department, State of Florida Chief Financial Officer (CFO), or State of Florida Auditor General.

b. The Agency, a non-Federal entity as defined by 2 CFR Part 200, Subpart F – Audit Requirements, as a subrecipient of a Federal award awarded by the Department through this Agreement, is subject to the following requirements:

i. In the event the Agency expends a total amount of Federal awards equal to or in excess of the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, the Agency must have a Federal single or program-specific audit conducted for such fiscal year in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements. **Exhibit "H", Audit Requirements for Awards of Federal Financial Assistance**, to this Agreement provides the required Federal award identification information needed by the Agency to further comply with the requirements of 2 CFR Part 200, Subpart F – Audit Requirements. In determining Federal awards expended in a fiscal year, the Agency must consider all sources of Federal awards based on when the activity related to the Federal award occurs, including the Federal award provided through the Department by this Agreement. The determination of amounts of Federal awards expended should be in accordance with the guidelines established by 2 CFR Part 200, Subpart F – Audit Requirements. An audit conducted by the State of Florida Auditor General in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements, will meet the requirements of this part.

ii. In connection with the audit requirements, the Agency shall fulfill the requirements relative to the auditee responsibilities as provided in 2 CFR Part 200, Subpart F – Audit Requirements.

iii. In the event the Agency expends less than the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, in Federal awards, the Agency is exempt from Federal audit requirements for that fiscal year. However, the Agency must provide a single audit exemption statement to the Department at FDOTSingleAudit@dot.state.fl.us no later than nine months after the end of the Agency's audit period for each applicable audit year. In the event the Agency expends less than the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, in Federal awards in a fiscal year and elects to have an audit conducted in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements, the cost of the audit must be paid from non-Federal resources (*i.e.*, the cost of such an audit must be paid from the Agency's resources obtained from other than Federal entities).

iv. The Agency must electronically submit to the Federal Audit Clearinghouse (FAC) at https://harvester.census.gov/facweb/ the audit reporting package as required by 2 CFR Part 200, Subpart F – Audit Requirements, within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period. The FAC is the repository of record for audits required by 2 CFR Part 200, Subpart F – Audit Requirements. However, the Department requires a copy of the audit reporting package also be submitted to FDOTSingleAudit@dot.state.fl.us within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period as required by 2 CFR Part 200, Subpart F – Audit Requirements.

v. Within six months of acceptance of the audit report by the FAC, the Department will review the Agency's audit reporting package, including corrective action plans and

management letters, to the extent necessary to determine whether timely and appropriate action on all deficiencies has been taken pertaining to the Federal award provided through the Department by this Agreement. If the Agency fails to have an audit conducted in accordance with 2 CFR Part 200, Subpart F – Audit Requirements, the Department may impose additional conditions to remedy noncompliance. If the Department determines that noncompliance cannot be remedied by imposing additional conditions, the Department may take appropriate actions to enforce compliance, which actions may include but not be limited to the following:

1. Temporarily withhold cash payments pending correction of the deficiency by the Agency or more severe enforcement action by the Department;
2. Disallow (deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance;
3. Wholly or partly suspend or terminate the Federal award;
4. Initiate suspension or debarment proceedings as authorized under 2 C.F.R. Part 180 and Federal awarding agency regulations (or in the case of the Department, recommend such a proceeding be initiated by the Federal awarding agency);
5. Withhold further Federal awards for the Project or program;
6. Take other remedies that may be legally available.

vi. As a condition of receiving this Federal award, the Agency shall permit the Department or its designee, the CFO, or State of Florida Auditor General access to the Agency's records, including financial statements, the independent auditor's working papers, and project records as necessary. Records related to unresolved audit findings, appeals, or litigation shall be retained until the action is complete or the dispute is resolved.

vii. The Department's contact information for requirements under this part is as follows:

Office of Comptroller, MS 24
605 Suwannee Street
Tallahassee, Florida 32399-0450
FDOTSingleAudit@dot.state.fl.us

State Funded:

a. In addition to reviews of audits conducted in accordance with Section 215.97, Florida Statutes, monitoring procedures to monitor the Agency's use of state financial assistance may include but not be limited to on-site visits by Department staff and/or other procedures, including reviewing any required performance and financial reports, following up, ensuring corrective action, and issuing management decisions on weaknesses found through audits when those findings pertain to state financial assistance awarded through the Department by this Agreement. By entering into this Agreement, the Agency agrees to comply and cooperate fully with any monitoring procedures/processes deemed appropriate by the Department. The Agency further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Department, the Department of Financial Services (DFS), or State of Florida Auditor General.

b. The Agency, a "nonstate entity" as defined by Section 215.97, Florida Statutes, as a recipient of state financial assistance awarded by the Department through this Agreement, is subject to the following requirements:

i. In the event the Agency meets the audit threshold requirements established by Section 215.97, Florida Statutes, the Agency must have a State single or project-specific audit conducted for such fiscal year in accordance with Section 215.97, Florida Statutes; applicable rules of the Department of Financial Services; and

Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. **Exhibit "G", Audit Requirements for Awards of State Financial Assistance,** to this Agreement indicates state financial assistance awarded through the Department by this Agreement needed by the Agency to further comply with the requirements of Section 215.97, Florida Statutes. In determining the state financial assistance expended in a fiscal year, the Agency shall consider all sources of state financial assistance, including state financial assistance received from the Department by this Agreement, other state agencies, and other nonstate entities. State financial assistance does not include Federal direct or pass-through awards and resources received by a nonstate entity for Federal program matching requirements.

ii. In connection with the audit requirements, the Agency shall ensure that the audit complies with the requirements of Section 215.97(8), Florida Statutes. This includes submission of a financial reporting package as defined by Section 215.97(2)(e), Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.

iii. In the event the Agency does not meet the audit threshold requirements established by Section 215.97, Florida Statutes, the Agency is exempt for such fiscal year from the state single audit requirements of Section 215.97, Florida Statutes. However, the Agency must provide a single audit exemption statement to the Department at FDOTSingleAudit@dot.state.fl.us no later than nine months after the end of the Agency's audit period for each applicable audit year. In the event the Agency does not meet the audit threshold requirements established by Section 215.97, Florida Statutes, in a fiscal year and elects to have an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, the cost of the audit must be paid from the Agency's resources (*i.e.*, the cost of such an audit must be paid from the Agency's resources obtained from other than State entities).

iv. In accordance with Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, copies of financial reporting packages required by this Agreement shall be submitted to:

Florida Department of Transportation
Office of Comptroller, MS 24
605 Suwannee Street
Tallahassee, Florida 32399-0405
FDOTSingleAudit@dot.state.fl.us

And

State of Florida Auditor General
Local Government Audits/342
111 West Madison Street, Room 401
Tallahassee, FL 32399-1450
Email: flaudgen_localgovt@aud.state.fl.us

v. Any copies of financial reporting packages, reports, or other information required to be submitted to the Department shall be submitted timely in accordance with Section 215.97, Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, as applicable.

vi. The Agency, when submitting financial reporting packages to the Department for audits done in accordance with Chapters 10.550 (local governmental entities) or

10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, should indicate the date the reporting package was delivered to the Agency in correspondence accompanying the reporting package.

vii. Upon receipt, and within six months, the Department will review the Agency's financial reporting package, including corrective action plans and management letters, to the extent necessary to determine whether timely and appropriate corrective action on all deficiencies has been taken pertaining to the state financial assistance provided through the Department by this Agreement. If the Agency fails to have an audit conducted consistent with Section 215.97, Florida Statutes, the Department may take appropriate corrective action to enforce compliance.

viii. As a condition of receiving state financial assistance, the Agency shall permit the Department or its designee, DFS, or the Auditor General access to the Agency's records, including financial statements, the independent auditor's working papers, and project records as necessary. Records related to unresolved audit findings, appeals, or litigation shall be retained until the action is complete or the dispute is resolved.

c. The Agency shall retain sufficient records demonstrating its compliance with the terms of this Agreement for a period of five years from the date the audit report is issued and shall allow the Department or its designee, DFS, or State of Florida Auditor General access to such records upon request. The Agency shall ensure that the audit working papers are made available to the Department or its designee, DFS, or State of Florida Auditor General upon request for a period of five years from the date the audit report is issued, unless extended in writing by the Department.

16. **Notices and Approvals.** Notices and approvals referenced in this Agreement must be obtained in writing from the Parties' respective Administrators or their designees.

17. **Restrictions, Prohibitions, Controls and Labor Provisions:**

a. **Convicted Vendor List.** A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity; may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statutes, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

b. **Discriminatory Vendor List.** In accordance with Section 287.134, Florida Statutes, an entity or affiliate who has been placed on the Discriminatory Vendor List, kept by the Florida Department of Management Services, may not submit a bid on a contract to provide goods or services to a public entity; may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity.

c. **Non-Responsible Contractors.** An entity or affiliate who has had its Certificate of Qualification suspended, revoked, denied, or have further been determined by the Department to be a non-responsible contractor, may not submit a bid or perform work for the construction or repair of a public building or public work on a contract with the Agency.

d. **Prohibition on Using Funds for Lobbying.** No funds received pursuant to this Agreement may be expended for lobbying the Florida Legislature, judicial branch, or any state agency, in accordance with Section 216.347, Florida Statutes.

e. **Unauthorized Aliens.** The Department shall consider the employment by any contractor of unauthorized aliens a violation of Section 274A(e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation will be cause for unilateral cancellation of this Agreement.

f. **Procurement of Construction Services.** If the Project is procured pursuant to Chapter 255, Florida Statutes, for construction services and at the time of the competitive solicitation for the Project, 50 percent or more of the cost of the Project is to be paid from state-appropriated funds, then the Agency must comply with the requirements of Section 255.0991, Florida Statutes.

g. **E-Verify.** The Agency shall:

   i. Utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Agency during the term of the contract; and

   ii. Expressly require any subcontractors performing work or providing services pursuant to the state contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

h. **Executive Order 20-44.** Pursuant to Governor's Executive Order 20-44, if the Agency is required by the Internal Revenue Code to file IRS Form 990 and is named in statute with which the Department must form a sole-source, public-private agreement; or through contract or other agreement with the State, annually receives 50% or more of its budget from the State or from a combination of State and Federal funds, Recipient shall submit an Annual Report to the Department, including the most recent IRS Form 990, detailing the total compensation for each member of the Agency executive leadership team. Total compensation shall include salary, bonuses, cashed-in leave, cash equivalents, severance pay, retirement benefits, deferred compensation, real-property gifts, and any other payout. The Agency shall inform the Department of any changes in total executive compensation during the period between the filing of Annual Reports within 60 days of any change taking effect. All compensation reports shall detail the percentage of executive leadership compensation received directly from all State and/or Federal allocations to the Agency. Annual Reports shall be in the form approved by the Department and shall be submitted to the Department at fdotsingleaudit@dot.state.fl.us within 180 days following the end of each tax year of the Agency receiving Department funding.

i. **Design Services and Construction Engineering and Inspection Services.** If the Project is wholly or partially funded by the Department and administered by a local governmental entity, except for a seaport listed in Section 311.09, Florida Statutes, or an airport as defined in Section 332.004, Florida Statutes, the entity performing design and construction engineering and inspection services may not be the same entity.

18. Indemnification and Insurance:

a. It is specifically agreed between the Parties executing this Agreement that it is not intended by any of the provisions of any part of this Agreement to create in the public or any member thereof, a third party beneficiary under this Agreement, or to authorize anyone not a party to this Agreement to maintain a suit for personal injuries or property damage pursuant to the terms or provisions of this Agreement. The Agency guarantees the payment of all just claims for materials, supplies, tools, or labor and other just claims against the Agency or any

subcontractor, in connection with this Agreement. Additionally, the Agency shall indemnify, defend, and hold harmless the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses, and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the Agency and persons employed or utilized by the Agency in the performance of this Agreement. This indemnification shall survive the termination of this Agreement. Additionally, the Agency agrees to include the following indemnification in all contracts with contractors/subcontractors and consultants/subconsultants who perform work in connection with this Agreement:

"To the fullest extent permitted by law, the Agency's contractor/consultant shall indemnify, defend, and hold harmless the Agency and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement."

b. The Agency shall provide Workers' Compensation Insurance in accordance with Florida's Workers' Compensation law for all employees. If subletting any of the work, ensure that the subcontractor(s) and subconsultant(s) have Workers' Compensation Insurance for their employees in accordance with Florida's Workers' Compensation law. If using "leased employees" or employees obtained through professional employer organizations ("PEO's"), ensure that such employees are covered by Workers' Compensation Insurance through the PEO's or other leasing entities. Ensure that any equipment rental agreements that include operators or other personnel who are employees of independent contractors, sole proprietorships, or partners are covered by insurance required under Florida's Workers' Compensation law.

c. If the Agency elects to self-perform the Project, then the Agency may self-insure. If the Agency elects to hire a contractor or consultant to perform the Project, then the Agency shall carry, or cause its contractor or consultant to carry, Commercial General Liability insurance providing continuous coverage for all work or operations performed under this Agreement. Such insurance shall be no more restrictive than that provided by the latest occurrence form edition of the standard Commercial General Liability Coverage Form (ISO Form CG 00 01) as filed for use in the State of Florida. The Agency shall cause, or cause its contractor or consultant to cause, the Department to be made an Additional Insured as to such insurance. Such coverage shall be on an "occurrence" basis and shall include Products/Completed Operations coverage. The coverage afforded to the Department as an Additional Insured shall be primary as to any other available insurance and shall not be more restrictive than the coverage afforded to the Named Insured. The limits of coverage shall not be less than $1,000,000 for each occurrence and not less than a $5,000,000 annual general aggregate, inclusive of amounts provided by an umbrella or excess policy. The limits of coverage described herein shall apply fully to the work or operations performed under the Agreement, and may not be shared with or diminished by claims unrelated to the Agreement. The policy/ies and coverage described herein may be subject to a deductible and such deductibles shall be paid by the Named Insured. No policy/ies or coverage described herein may contain or be subject to a Retention or a Self-Insured Retention unless the Agency is a state agency or subdivision of the State of Florida that elects to self-perform the Project. Prior to the execution of the Agreement, and at all renewal periods which occur prior to final acceptance of the work, the Department shall be provided with an ACORD Certificate of Liability Insurance reflecting the coverage described herein. The Department shall be notified in writing within ten days of any cancellation, notice of cancellation, lapse, renewal, or proposed change to any policy or coverage described herein. The Department's approval or failure to disapprove any policy/ies,

coverage, or ACORD Certificates shall not relieve or excuse any obligation to procure and maintain the insurance required herein, nor serve as a waiver of any rights or defenses the Department may have.

d. When the Agreement includes the construction of a railroad grade crossing, railroad overpass or underpass structure, or any other work or operations within the limits of the railroad right-of-way, including any encroachments thereon from work or operations in the vicinity of the railroad right-of-way, the Agency shall, or cause its contractor to, in addition to the insurance coverage required above, procure and maintain Railroad Protective Liability Coverage (ISO Form CG 00 35) where the railroad is the Named Insured and where the limits are not less than $2,000,000 combined single limit for bodily injury and/or property damage per occurrence, and with an annual aggregate limit of not less than $6,000,000. The railroad shall also be added along with the Department as an Additional Insured on the policy/ies procured pursuant to the paragraph above. Prior to the execution of the Agreement, and at all renewal periods which occur prior to final acceptance of the work, both the Department and the railroad shall be provided with an ACORD Certificate of Liability Insurance reflecting the coverage described herein. The insurance described herein shall be maintained through final acceptance of the work. Both the Department and the railroad shall be notified in writing within ten days of any cancellation, notice of cancellation, renewal, or proposed change to any policy or coverage described herein. The Department's approval or failure to disapprove any policy/ies, coverage, or ACORD Certificates shall not relieve or excuse any obligation to procure and maintain the insurance required herein, nor serve as a waiver of any rights the Department may have.

e. When the Agreement involves work on or in the vicinity of utility-owned property or facilities, the utility shall be added along with the Department as an Additional Insured on the Commercial General Liability policy/ies procured above.

19. Miscellaneous:

a. **Environmental Regulations.** The Agency will be solely responsible for compliance with all applicable environmental regulations and for any liability arising from non-compliance with these regulations, and will reimburse the Department for any loss incurred in connection therewith.

b. **Non-Admission of Liability.** In no event shall the making by the Department of any payment to the Agency constitute or be construed as a waiver by the Department of any breach of covenant or any default which may then exist on the part of the Agency and the making of such payment by the Department, while any such breach or default shall exist, shall in no way impair or prejudice any right or remedy available to the Department with respect to such breach or default.

c. **Severability.** If any provision of this Agreement is held invalid, the remainder of this Agreement shall not be affected. In such an instance, the remainder would then continue to conform to the terms and requirements of applicable law.

d. **Agency not an agent of Department.** The Agency and the Department agree that the Agency, its employees, contractors, subcontractors, consultants, and subconsultants are not agents of the Department as a result of this Agreement.

e. **Bonus or Commission.** By execution of the Agreement, the Agency represents that it has not paid and, also agrees not to pay, any bonus or commission for the purpose of obtaining an approval of its application for the financing hereunder.

f. **Non-Contravention of State Law.** Nothing in the Agreement shall require the Agency to observe or enforce compliance with any provision or perform any act or do any other thing in

contravention of any applicable state law. If any of the provisions of the Agreement violate any applicable state law, the Agency will at once notify the Department in writing so that appropriate changes and modifications may be made by the Department and the Agency to the end that the Agency may proceed as soon as possible with the Project.

g. **Execution of Agreement.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which shall constitute the same Agreement. A facsimile or electronic transmission of this Agreement with a signature on behalf of a party will be legal and binding on such party.

h. **Federal Award Identification Number (FAIN).** If the FAIN is not available prior to execution of the Agreement, the Department may unilaterally add the FAIN to the Agreement without approval of the Agency and without an amendment to the Agreement. If this occurs, an updated Agreement that includes the FAIN will be provided to the Agency and uploaded to the Department of Financial Services' Florida Accountability Contract Tracking System (FACTS).

i. **Inspector General Cooperation.** The Agency agrees to comply with Section 20.055(5), Florida Statutes, and to incorporate in all subcontracts the obligation to comply with Section 20.055(5), Florida Statutes.

j. **Law, Forum, and Venue.** This Agreement shall be governed by and construed in accordance with the laws of the State of Florida. In the event of a conflict between any portion of the contract and Florida law, the laws of Florida shall prevail. The Agency agrees to waive forum and venue and that the Department shall determine the forum and venue in which any dispute under this Agreement is decided.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year written above.

EXHIBIT A

Project Description and Responsibilities

A. Project Description (description of Agency's project to provide context, description of project components funded via this Agreement (if not the entire project)): The City of Opa-Locka will provide shuttle bus service, via a third-party vendor, to residents of the city and adjacent area for the South Route.

This route is complementary to the existing MDT Metrobus service.

B. Project Location (limits, city, county, map): City of Opa Locka/Opa-Locka, FL/Miami-Dade

C. Project Scope (allowable costs: describe project components, improvement type/service type, approximate timeline, project schedule, project size): "Service Development Projects specifically include projects involving the use of new technologies, services, routes, or vehicle frequencies; the purchase of special transportation services, and other such techniques for increasing service to the riding public as are applicable to specific localities and transit user groups. Projects involving the application of new technologies or methods for improving operations, maintenance, and marketing in public transit systems can be funded through the Service Development program. Eligible capital costs are any costs that would be defined as capital costs by the Federal Transit Administration. Examples would include, but not be limited to: the acquisition of buses for fleet and service expansions; transfer facilities; intermodal terminals and park and ride facilities; and passenger amenities, such as passenger shelters and bus stop signs. Eligible net operating costs are all operating costs of a project; less any federal funds, fares, or other sources of income to the project."

D. Deliverable(s): The City of Opa-Locka will provide shuttle bus service, via a third-party vendor, to residents of the city and adjacent area for the South Route.

The project scope identifies the ultimate project deliverables. Deliverables for requisition, payment and invoice purposes will be the incremental progress made toward completion of project scope elements. Supporting documentation will be quantifiable, measurable, and verifiable, to allow for a determination of the amount of incremental progress that has been made, and provide evidence that the payment requested is commensurate with the accomplished incremental progress and costs incurred by the Agency.

E. Unallowable Costs (including but not limited to): N/A

F. Transit Operating Grant Requirements (Transit Only):

Transit Operating Grants billed as an operational subsidy will require an expenditure detail report from the Agency that matches the invoice period. The expenditure detail, along with the progress report, will be the required deliverables for Transit Operating Grants. Operating grants may be issued for a term not to exceed three years from execution. The original grant agreement will include funding for year one. Funding for years two and three will be added by amendment as long as the grantee has submitted all invoices on schedule and the project deliverables for the year have been met.

EXHIBIT B

Schedule of Financial Assistance
TRANSIT OPERATING ONLY

FUNDS AWARDED TO THE AGENCY PURSUANT TO THIS AGREEMENT CONSIST OF THE FOLLOWING:

A. Fund Type and Fiscal Year:

Financial Project Number	Fund Type	FLAIR Category	State Fiscal Year	Object Code	CSFA/ CFDA Number	CSFA/CFDA Title or Funding Source Description	Funding Amount
452157-1-84-01	DPTO	088774	2024	751000	55.012	Public Transit Service Development Program	$349,476.00
		Total Financial Assistance					$349,476.00

B. Operations Phase - Estimate of Project Costs by Budget Category:

Budget Categories *Operations (Transit Only)* *	State	Local	Federal	Total
Salaries	$0	$0	$0	$0
Fringe Benefits	$0	$0	$0	$0
Contractual Services	$349,476	$349,476	$0	$698,952
Travel	$0	$0	$0	$0
Other Direct Costs	$0	$0	$0	$0
Indirect Costs	$0	$0	$0	$0
Totals	***$349,476***	***$349,476***	***$0***	***$698,952***

* Budget category amounts are estimates and can be shifted between items without amendment (because they are all within the Operations Phase).

C. Cost Reimbursement

The Agency will submit invoices for cost reimbursement on a:

___ Monthly
_X_ Quarterly
___ Other:

basis upon the approval of the deliverables including the expenditure detail provided by the Agency.

Scope Code and/or Activity Line Item (ALI) (Transit Only)	30.09.01

BUDGET/COST ANALYSIS CERTIFICATION AS REQUIRED BY SECTION 216.3475, FLORIDA STATUTES:

I certify that the cost for each line item budget category has been evaluated and determined to be allowable, reasonable, and necessary as required by Section 216.3475, Florida Statutes. Documentation is on file evidencing the methodology used and the conclusions reached.

EXHIBIT D

AGENCY RESOLUTION

PLEASE SEE ATTACHED

EXHIBIT E
PROGRAM SPECIFIC TERMS AND CONDITIONS – TRANSIT

(Service Development)

1. **Conformance with Enabling Legislation.** This Agreement is in conformance with Section 341.051, F.S.

2. **Bus Transit System.** In accordance with Section 341.061, F.S., and Rule Chapter 14-90, Florida Administrative Code, the Agency shall submit and the Department shall have on file, an annual safety certification that the Agency has adopted and is complying with its adopted System Safety Program Plan pursuant to Rule Chapter 14-90, F.A.C., and has performed annual safety inspections of all buses operated.

3. **Transit Vehicle Inventory Management.** The agency will follow the Department's Transit Vehicle Inventory Management Procedure (725-030-025), which outlines the requirements for continuing management control, inventory transfer and disposal actions. This procedure pertains ONLY to capital procurements of rolling stock using the FTA Section 5310, Section 5311, Section 5316, and Section 5317 programs as the funding source, or where the Department participates in 50% or more of the public transit vehicle's purchase price. This may include vehicles purchased under the State Transit Block Grant Program, State Transit Corridor Program, State Transit Service Development Program, or other applicable Department programs.

4. **Progress Reports.** The Agency will submit Semi-Annual Progress Reports on monthly ridership data. Reports are due no later than January 30th for the period ending December 31st and July 30th for the period ending June 30th.

5. **Project Goals and Service Data.** The Agency must report on work efforts and provide a detailed, side-by-side comparison of the project goals and actual service data.

6. **Submittal of Proposed Timeline.** The Agency will submit a Proposed Time Line for Service Development Activities prior to the commencement of the project.

7. **Final Report.** At any time when it becomes necessary to terminate the project or at the end of the two years, a Final Report will be submitted by the Agency. This report will accompany the Final Invoice for reimbursement. The Final Report will include the following:

   a) An evaluation of the attainment of the goals and objectives.

   b) The reasons any of the goals were not met.

   c) The benefit accrued by the Agency.

   d) A statement of the Agency's intent to continue with the service demonstrated.

-- End of Exhibit E --

EXHIBIT F

Contract Payment Requirements
Florida Department of Financial Services, Reference Guide for State Expenditures
Cost Reimbursement Contracts

Invoices for cost reimbursement contracts must be supported by an itemized listing of expenditures by category (salary, travel, expenses, etc.). Supporting documentation shall be submitted for each amount for which reimbursement is being claimed indicating that the item has been paid. Documentation for each amount for which reimbursement is being claimed must indicate that the item has been paid. Check numbers may be provided in lieu of copies of actual checks. Each piece of documentation should clearly reflect the dates of service. Only expenditures for categories in the approved agreement budget may be reimbursed. These expenditures must be allowable (pursuant to law) and directly related to the services being provided.

Listed below are types and examples of supporting documentation for cost reimbursement agreements:

(1) Salaries: A payroll register or similar documentation should be submitted. The payroll register should show gross salary charges, fringe benefits, other deductions and net pay. If an individual for whom reimbursement is being claimed is paid by the hour, a document reflecting the hours worked times the rate of pay will be acceptable.

(2) Fringe Benefits: Fringe Benefits should be supported by invoices showing the amount paid on behalf of the employee (e.g., insurance premiums paid). If the contract specifically states that fringe benefits will be based on a specified percentage rather than the actual cost of fringe benefits, then the calculation for the fringe benefits amount must be shown.

Exception: Governmental entities are not required to provide check numbers or copies of checks for fringe benefits.

(3) Travel: Reimbursement for travel must be in accordance with Section 112.061, Florida Statutes, which includes submission of the claim on the approved State travel voucher or electronic means.

(4) Other direct costs: Reimbursement will be made based on paid invoices/receipts. If nonexpendable property is purchased using State funds, the contract should include a provision for the transfer of the property to the State when services are terminated. Documentation must be provided to show compliance with Department of Management Services Rule 60A-1.017, Florida Administrative Code, regarding the requirements for contracts which include services and that provide for the contractor to purchase tangible personal property as defined in Section 273.02, Florida Statutes, for subsequent transfer to the State.

(5) In-house charges: Charges which may be of an internal nature (e.g., postage, copies, etc.) may be reimbursed on a usage log which shows the units times the rate being charged. The rates must be reasonable.

(6) Indirect costs: If the contract specifies that indirect costs will be paid based on a specified rate, then the calculation should be shown.

Contracts between state agencies, and/or contracts between universities may submit alternative documentation to substantiate the reimbursement request that may be in the form of FLAIR reports or other detailed reports.

RESOLUTION NO. 24-

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA, ACCEPTING THE PROPOSAL OF SAFA CONSTRUCTION, LLC FOR THE SESAME STREET CULVERT REPLACEMENT WITHIN THE CITY, PURSUANT TO RFP NO. 23-1016200 AND FURTHER AUTHORIZING THE INTERIM CITY MANAGER TO ENTER INTO AN AGREEMENT WITH SAFA CONSTRUCTION, LLC FOR SAID SERVICES, IN AN AMOUNT NOT TO EXCEED ONE MILLION, TWO HUNDRED THOUSAND DOLLARS ($1,200,000.00) AND IN THE FORM ATTACHED HERETO AS EXHIBIT "A"; FURTHER AUTHORIZING A PROJECT CONTINGENCY BUDGET, IN A TOTAL AMOUNT NOT TO EXCEED TWENTY-FIVE THOUSAND DOLLARS ($25,000.00); PROVIDING FOR ADOPTION OF REPRESENTATIONS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, on September 18, 2023, the City of Opa-Locka ("City") published Request for Proposals (RFP) No. 23-1016200 to obtain services for the Sesame Street Culvert Replacement, within the City; and

WHEREAS, one (1) sealed proposal was received by the City Clerk's Office and certified by the City Clerk on October 16, 2023; and

WHEREAS, Safa Construction, LLC has proposed One Million, Two Hundred Thousand Dollars ($1,200,000.00) for the project and the City Commission desires to accept the proposal and further enter into an agreement with Safa Construction, LLC in the contract form attached as Exhibit "A"; and

WHEREAS, the Interim City Manager recommends the establishment of a twenty-five thousand dollars ($25,000.00) continency budget for unexpected minor issues which may arise. Any additional amount shall be approved by the City Commission as an amendment to the contract agreement; and

WHEREAS, the City Commission finds that acceptance of Safa Construction, LLC proposal for Sesame Street Culvert Replacement is in the best interests of the City of Opa-Locka and its residents.

NOW, THEREFORE, BE IT DULY RESOLVED BY THE CITY COMMISSION OF THE CITY OF OPA- LOCKA, FLORIDA:

SECTION 1. The recitals to the preamble herein are incorporated by reference.

SECTION 2. The City Commission of the City of Opa-Locka, Florida hereby accepts the proposal of Safa Construction, LLC relating to Request for Proposals (RFP) 23-1016200, for the Sesame Street Culvert Replacement within the City, and hereby authorizes the Interim City Manager, or other authorized person, to enter into the agreement, attached hereto as Exhibit "A", in an amount not to exceed One Million, Two Hundred Thousand Dollars ($1,200,000.00); further authorizing a project contingency budget, in a total amount not to exceed Twenty-Five Thousand Dollars ($25,000.00).

SECTION 3. Sections of this Resolution may be renumbered or re-lettered and corrections of typographical errors which do not affect the intent may be authorized by the City Manager following review by the City Attorney and without need of public hearing, by filing a corrected copy of same with the City.

SECTION 4. This Resolution shall take effect upon adoption and is subject to the approval of the Governor or Governor's Designee.

Short Title:

A resolution authorizing the Interim City Manager to accept the proposal of Safa Construction, LLC. for the Sesame Street Culvert Replacement pursuant to RFP No. 23-1016200 and further authorizing the Interim City Manager to enter into an agreement with Safa Construction, LLC for said services.

Staff Summary:

The City is seeking the replacement of the Sesame Street Culvert. On September 18, 2023, the City issued Request for Proposals (RFP) 23-1016200. The City Clerk certified one (1) proposal document on October 17, 2023, from Safa Construction, LLC. Safa Construction, LLC. is a leader in all functions of Heavy Civil

Construction. It encompasses Project Management, Contract Administration, Accounting, Planning, Design, Processing, Specs Review, Field Supervision, and Operations.

Financial Impact: The available budget for this project is $1,300,000. The winning bid is $1,200.000. Staff recommends the establishment of a $25,000 continency for unexpected minor issues which may arise. Any additional issues exceeding that amount would be returned to the City Commission for approval.

Account	Description	Available	Project	Remaining Balance
44-541840	Sesame Street Culvert	$1,300,000	$1,200,000	$100,000
	Contingency		$25,000	($25,000)
Total			$1,225,000	$75,000

Proposed Action:

Staff recommends the City Commission approve the recommendation for Safa Financial Consultants, LLC and authorize the Interim City Manager to enter into an agreement with said company for an amount of $1,200,000 for the Sesame Street Culvert and further authorize establishment of a $25,000 contingency for minor issues which may arise.

Darvin William JD, MBA, MPH

Interim City Manager, City of Opa-Locka

780 Fisherman Street

Opa-Locka, FL 33054

Subject: Revised price proposal for Sesame Street Culvert Replacement between NW 135th St. & Atlantic Ave (RFP NO: 23-1016200)

Dear Darvin,

I hope this letter finds you in good health and high spirits. I am writing to formally submit a revised price proposal for the Sesame Street Culvert Replacement between NW 135th St. & Atlantic Ave (RFP NO: 23-1016200) bid, which was previously tendered to your office on September 17,2023. I appreciate the opportunity to participate in this bid, and after careful consideration and further evaluation, I believe that the revised proposal will better align with the needs and expectations of our esteemed city.

Upon a thorough review of the project requirements, as well as discussions with city officials (Microsoft Teams meeting-Tuesday, October 31, 2023, 9:30 AM-10:00 AM) and with my team, and careful analysis of our cost estimates, I have identified several areas where we can offer a more competitive and cost-effective proposal without compromising the quality or integrity of our work. Our commitment to delivering value to the city remains unwavering, and we believe that the revisions we have made will better reflect our dedication to your community.

To facilitate a clear understanding of the changes we have made, we have prepared a detailed item-by-item comparison between the original and revised price proposals. The following table illustrates the differences:

SAFA CONSTRUCTION, LLC

SAFA CONSTRUCTION, LLC
Phone: (954) 326-8295
Email: md.rahman@safaconstruction.net

Comparison table :

Item No	Description	Original Proposal ($)	Revised Proposal ($)	Comments
1	Mobilization (LS)	20,000.00	20,000.00	No Change
2	Material Cost-Pipe	26,000.00	26,000.00	No Change
3	Labor & Equipment Cost-Pipe	104,000.00	104,000.00	No Change
4	Material Cost-Guardrail	7,500.00	7,500.00	No Change
5	Labor Cost-Guardrail	15,000.00	15,000.00	No Change

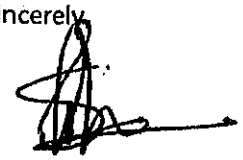
SAFA CONSTRUCTION, LLC

SAFA CONSTRUCTION, LLC
Phone: (954) 326-8295
Email: md.rahman@safaconstruction.net

Note for revisions in our proposal:

1) In the original bid, there was no separate line item for Bonding cost, so bonding cost was included in line item number 16, and in the revised price proposal bonding cost is shown separately in item number 26-A for clarification.
2) During the re-site visit to the construction site, we identified that unsuitable material in the canal would not be that much.
3) We feel that we do not police guard during construction. I have been working with the city past 10 years, I never felt that I needed a police guard to work in the city. So, the cost is deleted.
4) This is the city's project within its own city limit. So, the city can handle this issue internally as it was done for other projects.
5) Unforeseen conditions are unpredictable and non-measurable. The city can keep the cost for this line item internally as it was for other standard projects.

In this comparison table, we have outlined the specific items, their descriptions, the original pricing, the revised pricing, and the cost savings achieved in the revised proposal. We believe this breakdown provides transparency and demonstrates our commitment to offering the best value for the city.



We are confident that the revised proposal reflects our dedication to delivering a competitive and cost-effective solution for the city. Our team remains fully committed to collaborating closely with your office to ensure the successful execution of this project, should our proposal be accepted.

If you have any questions or require further clarification regarding the itemized comparison or any other aspects of the proposal, please feel free to contact me directly at (954) 326-8295 or via email at md.rahman@safaconstruction.net . We are eager to engage in discussions and provide any additional information or documentation as needed.

We would like to express our sincere gratitude for your consideration of our proposal and for your dedication to selecting the best value for the city. We are enthusiastic about the opportunity to contribute to the continued growth and development of our community and look forward to the possibility of working closely with your office to realize this vision.

Thank you for your time and attention, and I eagerly await your response.

Sincerely,

MD Shahinur Rahman, CGC, PMP, MS, PE (CA, FL)

OPA-LOCKA-G-01.DWG			G-01

GENERAL NOTES:

I. APPLICABLE CODES

A. GENERAL

1. EXISTING UNDERGROUND UTILITIES SHOWN ON THE DRAWINGS HAS BEEN SHOWN BASED UPON THE DATA AVAILABLE TO DESIGNER. THE ENGINEER AND THE OWNER DO NOT GUARANTEE THE ACCURACY AND COMPLETENESS OF THIS DATA. THE CONTRACTOR IS REQUIRED TO MAKE ANY OTHER'S NECESSARY EXPLORATIONS TO ASCERTAIN EXACT LOCATIONS OF EXISTING STRUCTURES WORK SHALL BE DONE PRIOR TO EXCAVATION TO AVOID DAMAGE OF THE CONSTRUCTION SHALL HAVE ALL REASONABLE EFFORTS TO IDENTIFY LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, IF IT DOES DAMAGE CONTRACTOR WITH UTILITY COMPANIES AND CONSTRUCTION OR OTHER SUCH ACTIVITIES NOTIFICATION AND WHERE AND SHALL BEAR ALL COSTS FOR THE WORK.
2. ALL WORK SHALL BE INSPECTED BY AND APPROVED BY THE CONSTRUCTION ENGINEER PRIOR START OF WORK.
3. THE FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) STANDARD PLANS, NOTES PREFACE TO FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) STANDARD PLANS FOR ROAD AND BRIDGE CONSTRUCTION AND FDOT DESIGN STANDARDS LATEST EDITION.
4. ALL WORK WITHIN FDOT RIGHT-OF-WAY SHALL CONFORM TO THE LATEST STANDARDS, SERIES, REGULATIONS AND SPECIFICATIONS OF THE STATE, COUNTY, STATE, AND FEDERAL CODES AND ARE APPLICABLE.
5. SEE CONSTRUCTION PLANS BY REQUIRED TO COMPLY WITH FEDERAL, STATE, COUNTY, AND CITY LAWS, CODES, ORDINANCES AND REGULATIONS.
6. IN THE EVENT OF A CONFLICT BETWEEN THE GENERAL NOTES AND CONSTRUCTION SPECIFICATIONS IN THESE PLANS AND THE CONTRACT AGREEMENTS AND SPECIFICATIONS IN THE CONTRACTOR'S FAVOR. THE CONSTRUCTION SHALL SUBMIT WRITTEN REQUEST FOR CLARIFICATION TO THE ENGINEER
7. ALL HANDICAP ACCESSIBLE ACCESS TO CONFORM WITH THE REQUIREMENTS OF THE AMERICANS WITH DISABILITIES ACT AND LOCAL, STATE, AND FEDERAL CODES. LATEST EDITIONS.
8. THE CONTRACTOR IS REQUIRED TO OBTAIN ALL APPLICABLE CONSTRUCTION PERMITS PRIOR TO START OF CONSTRUCTION. THE CONTRACTOR SHALL ARRANGE FOR AND PROCURE ALL PERMITS AND LICENSES AND ALL APPLICABLE CHARGES SHALL BE PAID FOR AS A FEES, AND SHALL ALL PURPOSES NECESSARY TO COMPLETE THE PROJECT.
9. SHOP DIMENSIONS AND ELEVATIONS ARE TO BE EDGE OF PAVEMENT AND FINISH GRADE UNLESS NOTED OTHERWISE.
10. IF UNFAMILIAR GAS, WATER, AND SEWER SERVICE LATERALS ARE ENCOUNTERED DURING EXCAVATION, THE SECTION IN WHICH CONNECTIONS ARE BE REPAIRED AND THE STUB FOR THE SEE CONNECTED TO THE MAIN AND BE CAPPED, PLUGGED OR OTHERWISE SECURED.
11. CONSTRUCTION SHALL MAINTAIN ACCESS TO ALL PROPERTIES AND RESIDENTIAL LOCATIONS BY NORMAL MEANS AND METHODS I.E. TEMPORARY STEEL PLATES, DIMENSIONS, ETC. ALL ASSOCIATED COST TO BE INCLUDED IN W.O.T
12. ITEMS BE CORRECT WITH ACTUAL CONDITIONS EXISTING CURBS AND GUTTERS, DRIVEWAYS, DRAINAGE STRUCTURES PAVEMENT AND BASE AND LIMITED EXCAVATIONS ARE TO BE PERFORMED BY CONTRACTOR AND DISPOSED OF IN A LEGAL AND PROPER MANNER AWAY FROM THE JOB SITE AT THE CONTRACTOR'S EXPENSE UNLESS THE ITEMS ARE TO BE REUSED ON THE PROJECT
13. EXCESS MATERIAL REMOVED BY THE CONTRACTOR WILL BE DISPOSED OF IN AREAS PROVIDED BY THE CONTRACTOR
14. THE INFORMATION PROVIDED IN SEVERAL PLANS ARE TO ASSIST THE CONTRACTOR IN ASSESSING THE NATURE AND EXTENT OF THE LAND DISTURBANCE BUT MAY BE INCOMPLETE DURING THE COURSE OF THE CONSTRUCTION, ADDITIONAL EXCAVATIONS, OR SOIL BORINGS BEYOND THOSE INDICATED IN THE PLANS MAY BE NECESSARY DURING THE COURSE OF CONSTRUCTION. THE CONTRACTOR SHALL BE PREPARED TO PERFORM SUCH ADDITIONAL WORK AS MAY BE DEEMED NECESSARY BY THE ENGINEER AT THEIR OWN CONSIDERATION REGARDING THE ACTUAL CONDITIONS THAT MAY BE ENCOUNTERED AND UPON WHICH THEY WILL NOT BE BASED IT IS ALL THE CONTRACTOR'S RESPONSIBILITY TO INVESTIGATE SITE CONDITIONS, INCLUDING BOTH THE SURFACE AND SUBSURFACE CONDITIONS AND BASE THEIR PRICING ACCORDINGLY. THE UNDERSIGNED, REPORT'S AVAILABILITY TO THE CONTRACTOR FOR REVIEW.
15. CONTRACTOR SHALL PROVIDE ALL SAFETY EQUIPMENT, SHORING, SHEETING OR OTHER PROTECTIVE SYSTEMS NECESSARY TO PROTECT WORKMEN, EMPLOYEES, STRUCTURES OR PROPERTY, DURING EXCAVATION OF TRENCH, MATERIAL OR CAVING, THE FAILURE OF ANY SUCH, OR FOR ANY AREA, OR FOR ANY REASON DURING CONSTRUCTION, SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR AND PROCESS AT NO ADDITIONAL COST TO THE OWNER
17. ANY DIFFERENCES OR DISCREPANCIES OR QUESTIONS ON THE DRAWINGS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER OF RECORD IMMEDIATELY.
18. THE AMOUNT OF EACH OF THE MATERIALS PROVIDED IS THE ESTIMATED AMOUNT REQUIRED TO COMPLETE THE JOB. THESE QUANTITIES ARE ESTIMATED ONLY AND IT IS THE CONTRACTOR'S RESPONSIBILITY TO COMPLETE ALL WORK IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. ADDITIONAL MATERIALS BE REQUIRED ONLY WHEN AUTHORIZED BY THE ENGINEER'S CHANGE ORDERS AS DETERMINED IN THE AGREEMENTS AND CONTRACT DOCUMENTS.
19. THE CONTRACTOR IS RESPONSIBLE FOR THE PROTECTION OF ALL UTILITIES SHOWN HEREIN IN PLACE.
20. ALL HAND EXCAVATED AND GREEN CUT LINES PERFORMED NEEDED ON THE DRAWINGS.
21. SEE SPECIFICATIONS FOR ALL TRAFFIC CONTROL, SIGNAGE, BARRICADES, FLAGMEN, VEHICLES, ETC. WITH THE CONSTRUCTION OF THIS PROJECT AND ALL ASSOCIATED COSTS SHALL BE INCLUDED IN THE BID.
22. THE CONTRACTOR SHALL NOT ENCROACH ON ANY PRIVATE PROPERTY, NOR PERFORM, WORK ON ANY PROPERTY WITHOUT OBTAINING WRITTEN AUTHORIZATION FROM THE OWNER.
23. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE, REMOVAL OR MODIFICATION ACCIDENTALLY OR PLANNED TO EXISTING OBJECTS, STRUCTURES, PRIVATE OR PUBLIC, WITHIN THE PROJECT LIMITS. THE COSTS TO REPLACE, REMOVE OR MODIFY IRRIGATION PIPES, SPRINKLER HEADS OR OTHER IRRIGATION EQUIPMENT SHALL BE CONSIDERED INCIDENTAL TO LAND SHALL BE INCLUDED IN THE PRICE BID FOR RELATED WORK. ALL COSTS DUE TO DAMAGE SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR
24. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF ALL EXISTING IMPROVEMENTS WITHIN THE LIMITS OF CONSTRUCTION, INCLUDING, BUT NOT LIMITED TO, ALL EXISTING PAVEMENT, CURBS, DRIVES, PAVED AREAS, SIDEWALKS, ETC. WHETHER OR NOT SHOWN ON THE PLANS, DAMAGED AS A RESULT OF THE CONTRACTOR'S OPERATIONS SHALL BE REPAIRED OR REPLACED BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER OR ANY SUBCONTRACTOR. CONSTRUCTION SHALL REPAINT ANY CURBING, TO SIDEWALK, DRIVEWAY, ETC. PRIOR TO DISCONNECTION OF ANY EXISTING IRRIGATION SYSTEM.
25. CONTRACTOR IS RESPONSIBLE FOR REVIEWING AND UNDERSTANDING ALL SWPPP OR OTHER PERMITS AFFECTING CONSTRUCTION, REPAIR OR REPLACE ALL DISTURBED AREAS, INCLUDING, EMPLOYEES OR OTHER OF ANY SUBCONTRACTOR TO BE RESPONSIBLE FOR ANY ADDITIONAL COSTS INCURRED BY THE ENGINEER OF RECORD TO THAT EXTENT.
26. ALL NEW STRUCTURES, EXISTING MANHOLES, VALVE AND BOX COVERS, DRAINAGE GRATES, GUARDRAIL, CURBS, UTILITY VAULTS, BOXES, MONITORING WELLS, ETC. TO MATCH PROPOSED GRADES.
27. ALL INSTALLATIONS WHERE DRAINAGE GRATES ARE PROVIDED SHALL MEET THE REQUIREMENTS WITH THE MIAMI-DADE COUNTY PUBLIC WORKS CONSTRUCTION & ENGINEERING DIVISION MANUAL OF STANDARDS.
28. THE CITY OF OPA-LOCKA SHALL MAINTAIN A COPY OF ALL PERMITTED REQUIRED AS-BUILTS, AND SHOP DRAWINGS OF THE PROJECT

B. CONSTRUCTION SAFETY

1. ALL CONSTRUCTION SHALL BE DONE IN A SAFE MANNER SPECIFICALLY THE RULES AND REGULATIONS OF THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA) AND THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES (MUTCD).
2. C. PERSON, SAFETY OFF
3. CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLIANCE WITH THE STATE OF FLORIDA TRENCH SAFETY ACT
4. WHERE EXCAVATING TO A DEPTH IN EXCESS OF FIVE FEET (5') ARE REQUIRED, THE CONTRACTOR SHALL INCLUDE THE FOLLOWING INFORMATION IN THE SAFETY PLAN:
   2.1 A REFERENCE TO THE TRENCH SAFETY STANDARDS THAT WILL BE IN EFFECT DURING THE PERIOD OF CONSTRUCTION FOR THE PROJECT.
   2.2 THE NAME OF THE COMPETENT PERSON RESPONSIBLE FOR TRENCH SAFETY WITHIN THAT SHOW
   2.3 CONTRACTOR WILL COMPLY WITH THE APPLICABLE TRENCH SAFETY STANDARDS.
   2.4 ENGINEER'S COST ESTIMATE FOR THE COST OF TRENCH SAFETY MEASURES EXCAVATION STANDARDS. THE COST OF EACH TRENCH SAFETY MEASURE SUITABLE FOR THE TRENCH OR EXCAVATION SHALL BE SUBMITTED. THE INFORMATION LISTED IN ITEM 2 TO THE ENGINEER PRIOR TO BEGINNING OF
5. SURVEY DATA
6. ALL ELEVATIONS ON THE PLANS, OR REFERENCED IN THE SPECIFICATIONS, ARE BASED ON NATIONAL GEODETIC VERTICAL DATUM (NGVD) OF 1929.
7. ALL EXISTING CONTROL POINTS AND/OR REFERENCE MARKERS SHALL BE RAISED TO FINAL GRADE. THESE POINTS AND REFERENCE MARKERS SHALL OF LOCATED AND NOTED ON THE AS-BUILTS.
8. THE LOCATION OF EXISTING ABOVE AND BELOW GROUND UTILITIES, STRUCTURES, SHELL AND OTHER OBSTRUCTIONS ABOVE GROUND FEATURES SHOWN ON THE PLANS WERE TAKEN FROM THE UNLESS PLANS OR PREPARED BY:
   BELLO & BELLO LAND SURVEYING
   12705 SW 132 AVENUE, SUITE 202
   MIAMI, FLORIDA 33186
   (305)-251-5227
   CONTACT: DONATO BELLO, PSM

II. PRECONSTRUCTION RESPONSIBILITIES

A. GENERAL

1. UPON RECEIPT OF THE NOTICE TO PROCEED, THE CONTRACTOR SHALL CONTACT THE ENGINEER OF RECORD AND ARRANGE A PRE-CONSTRUCTION CONFERENCE TO INCLUDE ALL INVOLVED GOVERNMENTAL AGENCIES, UTILITY COMPANIES, AND THE CONSTRUCTION ENGINEER OF RECORD. THE CONTRACTOR SHALL ATTEND THE CONFERENCE AFTER ISSUANCE OF THE CONTRACTOR "NOTICE TO PROCEED" BUT BEFORE THE ACTUAL CONSTRUCTION TO BE ESTABLISHED AT A TIME AND PLACE SET BY THE ENGINEER OF RECORD.
2. THE CONTRACTOR SHALL CONFIRM A SUNSHINE CERTIFICATION NUMBER AT LEAST 48 HOURS PRIOR TO BEGINNING ANY EXCAVATION.
3. PRIOR TO BEGINNING EXCAVATION, THE CONTRACTOR SHALL NOTIFY THE SITE, LOCATION, ELEVATION, AND WHEREABOUTS OF ALL EXISTING UTILITIES WITHIN THE AREA OF CONSTRUCTION.
4. EXISTING UTILITY LOCATIONS SHOWN ON THESE PLANS ARE APPROXIMATE. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF EXISTING UTILITIES SHOWN OR FOR ANY EXISTING UTILITIES NOT SHOWN.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO ANY EXISTING UTILITIES FOR WHICH IT FAILS TO REQUEST LOCATIONS FROM THE UTILITY OWNER. THE CONTRACTOR IS RESPONSIBLE AS WELL FOR DAMAGE TO ANY EXISTING UTILITIES WHICH ARE PROPERLY LOCATED.
6. IF, UPON EXCAVATION, AN EXISTING UTILITY IS FOUND TO BE IN CONFLICT WITH THE PROPOSED CONSTRUCTION, UP TO BE OF A SIZE OF MATERIAL DIFFERENT FROM THAT SHOWN ON THE PLANS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER.
7. EXISTING UTILITIES SHALL BE MAINTAINED IN SERVICE DURING CONSTRUCTION UNLESS OTHERWISE APPROVED BY THE UTILITY OWNER
8. THE CONTRACTOR SHALL COORDINATE WITH UTILITIES TO ARRANGE RELOCATION AND TEMPORARY SUPPORT OF UTILITY FEATURE ETC. AS NECESSARY TO COMPLETE THE WORK.
9. THE UTILITY COMPANIES SHALL BE NOTIFIED BY THE CONTRACTOR, TWO (2) BUSINESS DAYS IN ADVANCE OF ANY EXCAVATION INVOLVING THEIR FACILITIES SO THAT A COMPANY REPRESENTATIVE CAN BE PRESENT
10. THE CONTRACTOR IS TO USE CAUTION WHEN WORKING IN OR AROUND AREAS OF OVERHEAD TRANSMISSION LINES OR UNDERGROUND UTILITIES

III. INSPECTIONS

A. GENERAL

1. THE CONTRACTOR SHALL GIVE THE ENGINEER OF RECORD A MINIMUM OF TWO (2) BUSINESS DAYS ADVANCE NOTICE PRIOR TO BEGINNING OR COMPLETING THE CONSTRUCTION OF THE FOLLOWING ITEMS SO THE ENGINEER OF RECORD CAN PERFORM FIELD OBSERVATIONS OF THE FOLLOWING ITEMS.
   1.1 STORM DRAINAGE
   1.2 SUBGRADE, SUBBASE AND BASE APPROVED DENSITIES PRIOR TO PLACEMENT OF SURFACE
   1.3 LIMEROCK BASE, SUBBASE AND BASE APPROVED DENSITIES AND AS-BUILTS PRIOR TO THE PLACEMENT OF ASPHALTIC
   1.4 ASPHALTIC CONCRETE
   1.5 CONCRETE
   1.6 STRIPING
2. ALL INSPECTIONS WILL BE MADE BY THE COUNTY AND THE CITY OF OPA-LOCKA (PLUMBING AND ELECTRICAL). THE ENGINEER OF RECORD WILL MAKE ONLY CONSTRUCTION OBSERVATION SERVICES
3. IF THE CONTRACTOR FAILS TO NOTIFY THE ENGINEER OF RECORD PRIOR TO COMPLETING THE ABOVE, THE ENGINEER RESERVES THE RIGHT NOT TO ISSUE ANY CERTIFICATIONS OR FINAL INSPECTIONS

IV. SHOP DRAWINGS

A. GENERAL

1. PRIOR TO THEIR CONSTRUCTION OR INSTALLATION, SHOP DRAWINGS SHALL BE SUBMITTED TO AND REVIEWED BY THE ENGINEER OF RECORD FOR BEHAVIOR SPACE AND OTHER ASSESSMENTS

V. TEMPORARY FACILITIES

A. TEMPORARY UTILITIES

1. IF SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO ARRANGE OR SUPPLY TEMPORARY WATER SERVICE, SANITARY FACILITIES, AND ELECTRICITY TO ITS EMPLOYEES AND SUBCONTRACTORS FOR THEIR USE DURING CONSTRUCTION

B. TRAFFIC REGULATION

1. MAINTENANCE OF TRAFFIC IN THE PUBLIC RIGHT-OF-WAY SHALL BE IN ACCORDANCE WITH THE MUTCD. A MAINTENANCE OF TRAFFIC PLAN MUST BE APPROVED BY THE GOVERNMENTAL ENGINEERING DIVISION HAVING JURISDICTION FOR THE SECTION OF ROADWAY BEFORE STARTING WORK IN THE PUBLIC RIGHT-OF-WAY.
2. ALL OPEN TRENCHES AND VOIDS CONFORMS TO REGULATIONS OF WALKWAYS SHALL BE IMMEDIATELY BARRED AND BARRICADED TO PROTECT THE SAFETY OF BOTH MOTORISTS AND PEDESTRIAN TRAFFIC.
3. NO TRENCHES OR HOLES NEAR ROADWAYS, ROADWAYS OR OTHER SHOULDERS ARE TO BE LEFT OPEN DURING NIGHTTIME HOURS WITHOUT CONNECTED PERMISSION OF THE CITY

C. TEMPORARY FACILITIES

1. THE CONTRACTORS ON-SITE EQUIPMENT, STOCKPILED MATERIAL, AND SUPPLIES SHALL BE KEPT IN A SECURE, FENCED AND LOCKED LOCATION WHEN THE CONTRACTOR IS NOT SUPERVISING THE STAGING OR LAY DOWN AREAS.
2. MATERIAL AND EQUIPMENT STORAGE SHALL NOT BE CONDUCTED ON ADJOINING PRIVATE PROPERTY OR PUBLIC RIGHT-OF-WAY WITHOUT WRITTEN PERMISSION FROM THE PROPERTY OWNER.
3. CONTRACTOR SHALL CONSTRUCT AND MAINTAIN TEMPORARY ACCESS ROADS AS REQUIRED FOR CONSTRUCTION PROJECT STAGES AT ALL TIMES TO PROVIDE THE SAME NORMAL ACCESS FACILITIES AS WAS PROVIDED PRIOR TO CONSTRUCTION. ALL COSTS ASSOCIATED WITH THE CONSTRUCTION AND MAINTAINING EXISTING TO BE INCLUDED IN W.O.T. BID ITEM
4. CONTRACTOR SHALL SUBMIT LAYDOWN AREA LOCATIONS FOR SELECTION AND REVIEW OF ANY PROPOSED STAGING AREAS ASSOCIATED WITH THIS PROJECT WITH THE CITY OF OPA-LOCKA

VI PROJECT CLOSEOUT

A. CLEANING UP

1. DURING CONSTRUCTION, THE PROJECT SITE AND ALL ADJACENT AREAS SHALL BE MAINTAINED IN A NEAT AND CLEAN MANNER, DOWN DEBRIS, CLEAN UP, THE PROJECT SITE SHALL BE LEFT CLEAN OF ALL SURPLUS MATERIAL OF WASTE OR DEBRIS AREAS SHALL BE SWEPT BROOM CLEAN
2. THE CONTRACTOR SHALL RESTORE, OR REPLACE, WHEN AND AS DIRECTED BY THE ENGINEER OR THOSE OF ITS SUBCONTRACTORS, ANY PROPERTY DAMAGED OR DESTROYED BY THE CONTRACTOR OR ANY OF THE EXISTING CONDITION IMMEDIATELY PRIOR TO THE BEGINNING OF OPERATIONS. IN THIS END, THE CONTRACTOR SHALL DO ALL WORK AND MAKE ALL PAYMENTS NECESSARY TO RESTORE ALL PROPERTY TO A CONDITION EQUAL TO OR BETTER THAN THAT EXISTING BEFORE THE WORK WAS BEGUN.
3. WATER SOURCES OR STREAMS WHICH HAVE BEEN OR FLOWED INTO OR BEEN MADE IN WATER COURSES, DITCHES, OR OTHER DRAINAGE FACILITIES SHALL BE KEPT FREE OF DEBRIS BY THE CONTRACTOR'S SUPERVISION. SUCH MATERIAL OR DEBRIS SHALL BE REMOVED AND DISPOSED OF IN A LEGAL MANNER AT DISPOSAL OF THE WORK, AND AT NO ADDITIONAL EXPENSE TO THE OWNER.
4. UPON COMPLETION OF THE PROPOSED CULVERT INSTALLATION WORK, THE CONSTRUCTION SHALL CLEAN THE NEW STRUCTURE, REMOVE ALL POLLUTED CONTROL DEVICES FROM THE NEW SYSTEM AND CLEAN THE DOWNSTREAM AREAS AND DRAINAGE STRUCTURES NO ADDITIONAL COST TO THE OWNER

B. PROJECT RECORD DOCUMENTS

1. THE CONSTRUCTION SHALL MAINTAIN ACCURATE AND COMPLETE RECORDS OF WORK HAVE COMPLETED
2. PRIOR TO THE PLACEMENT OF ANY ASPHALT OR CONCRETE PAVEMENT, THE CONTRACTOR SHALL SUBMIT TO THE ENGINEER "AS-BUILT PLANS (PRINTED AND SIGNED BY A FLORIDA CERTIFIED PROFESSIONAL LAND SURVEYOR) SHOWING THE LOCATION AND ITS NEW APPURTENANCE IMPROVEMENTS. PRIOR OPERATIONS SHALL NOT COMMENCE UNTIL THE ENGINEER HAS APPROVED THE "AS-BUILTS."
3. ALL REQUIRED DENSITY AND LBR TEST RESULTS FOR SUB-GRADE SHALL BE PROVIDED TO THE ENGINEER PRIOR TO PLACING ASPHALT
4. ALL "AS-BUILT" INFORMATION SUBMITTED TO THE ENGINEER SHALL BE AUTHORIZABLE ACCURATE, CLEAR AND LEGIBLE. TO SATISFY BE CHANGED BACK TO THE SATISFACTION INCLUDES A TRUE REPRESENTATION OF THE IMPROVEMENTS CONSTRUCTED
5. UPON COMPLETION OF CONSTRUCTION, THE CONTRACTOR SHALL SUBMIT TO THE ENGINEER OF RECORD COMPLETE SETS OF "AS-BUILT" CONSTRUCTION DRAWINGS SIGNED AND SEALED BY A FLORIDA LICENSED PROFESSIONAL LAND SURVEYOR FOR REVIEW AND APPROVAL. THESE DRAWINGS SHALL BE MARKED TO SHOW "AS-BUILT" CONSTRUCTION CHANGES AND EMBOSSED LOCATIONS AND ELEVATIONS OF ALL IMPROVEMENTS AND SHALL BE SIGNED AND SEALED BY A REGISTERED LAND SURVEYOR
6. THE COST OF SIGNED AND SEALED AS-BUILTS AND CAD FILES SHALL BE INCLUDED IN THE COST OF THE CHANGE BID

VII. EARTHWORK

A. GENERAL

1. NONE OF THE EXISTING MATERIAL IS TO BE INCORPORATED IN THE EMBANKMENT.
2. ALL SAND BORROW PLACED SHALL HAVE A MINIMUM LBR VALUE OF 40 AND SHALL BE COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180
3. ALL LIMEROCK IS ASSUMED NOT TO HAVE BEEN COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180
4. A 4" LAYER OF BERMUDA SHALL BE PLACED OVER ALL AREAS TO BE SODDED
5. DAMAGED TO DAMAGED SOD SHALL BE REPLACED WITH SAME SOD THAT AS EXISTING AND SHALL BE INCLUDED IN THE CONTRACT PRICE AND NO EXTRA COMPENSATION SHALL BE ALLOWED
6. ASSURANCE OF THE PROJECT
7. ALL DISTURBED AREAS FOLLOWING EXISTING DRAINAGE SWALES OR LAKES, APPROPRIATE SILT/TURBIDITY CONTROL COST TO BE INCLUDED IN THE BID
8. ALL EXCAVATED OR OTHER UNSUITABLE MATERIAL UNDER THOSE AREAS TO BE PAVED SHALL BE REMOVED TO A DEPTH OF 24 INCHES BELOW FINISHED GRADE AND FOR SHRUBS FEET BEYOND THE PERIMETER OF THE PLANTS
9. SUITABLE BACKFILL SHALL BE MINIMUM NON ROCK MATERIALS COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180 UNDER ALL PAVED AREAS OR PERIMETER OF PLANTS
10. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
11. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
12. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
13. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
14. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
15. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
16. ALL EXCAVATION TO BE EARTH MATERIAL SHALL FREE FROM ROCK, LIMEROCK OR OTHER UNSUITABLE MATERIAL
17. GRADING ADJACENT TO ROADWAY/PAVEMENT WHERE SIDEWALK/BIKE FLOWS FROM PAVEMENT TO GROUND SHALL BE GRADED TWO TO FIVE INCHES LOWER THAN THE EDGE OF PAVEMENT TO ALLOW FOR THE PLACEMENT OF SOD.
18. ALL AREAS TO BE CONSTRUCTED UPON WITH STRUCTURES, PAVEMENT, DRAINAGE, WATER MAINS, CURBING, SIDEWALK, FLOORING, ETC., SHALL BE CLEARED AND GRUBBED PRIOR TO CONSTRUCTION. THIS SHALL CONSIST OF THE COMPLETE REMOVAL OF AND DISPOSAL OF ALL STUMPS, BRUSH, TIMBER, ROOTS, DEBRIS, ORGANIC MATERIAL AND ALL OTHER OBJECTIONABLE MATERIAL ON OR UNDERGROUND, SURFACE OF THE EXISTING GROUND TO A DEPTH OF 9 INCHES ALL WORK SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS
19. ALL PROPOSED GRADES SHOWN IN PLAN ARE FINISHED GRADES

VIII. PAVING

A. GENERAL

1. ALL UNDERGROUND UTILITIES SHALL BE COMPLETED PRIOR TO THE CONSTRUCTION OF THE LIMEROCK BASE AND PRIOR TO THE PLACEMENT OF THE PAVEMENT ALL WORK IN EXISTING PAVEMENT SHALL BE SAW-CUT EDGES PRIOR TO RELAYING ASPHALT ALL EXISTING PAVEMENT, DRIVEWAY AND SIDEWALK THAT IS AFFECTED AND TOP PART OF THE CONSTRUCTION PROCESS SHALL BE PROPERLY RESTORED AT THE CONTRACTOR'S EXPENSE

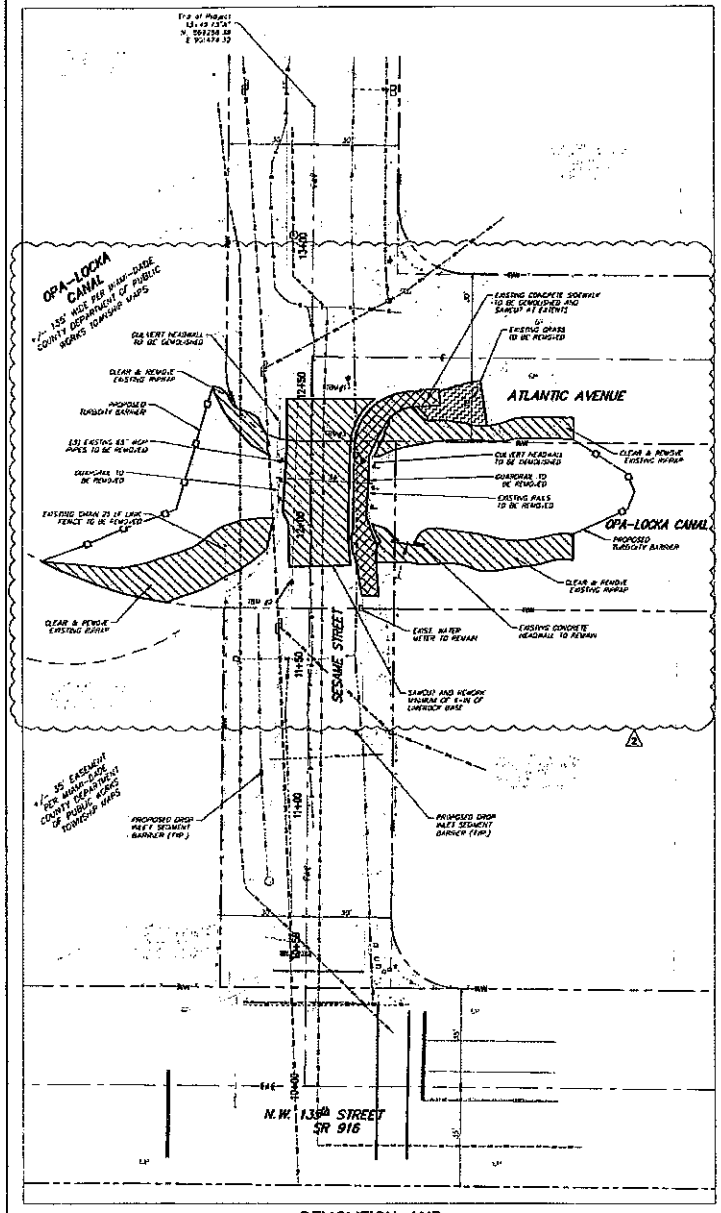
B. MATERIALS

1. LIMEROCK BASE MATERIAL SHALL HAVE A MINIMUM OF 70% CARBONATES (CALCIUM AND MAGNESIUM) WITH A MINIMUM LBR OF 100.
2. PRIME COAT SHALL BE APPLIED AT THE RATE OF 0.25 GAL/SQ YD AND TACK COAT SHALL MEET FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) STANDARDS.
3. SURFACE COURSE SHALL BE EQUAL TO FDOT TYPE SP-9.5 OR SP-12.5 ASPHALTIC CONCRETE

C. INSTALLATION

1. LIMEROCK BASE MATERIAL SHALL BE 12" THICK AND COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180
2. LIMEROCK BASE OR BITUMINOUS SHALL BE PLACED IN MAXIMUM 6" LIFTS. BASES GREATER THAN 6" OF LIMEROCK SHALL BE PLACED IN TWO OR MORE EQUAL LIFTS. LIMEROCK BASE SHALL BE COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180
3. ASPHALTIC CONCRETE SHALL BE 1" FDOT TYPE SP-9.5 (TRAFFICAL AND 1" SP-12.5 FOR LIFT MATCHING EXISTING GRADES AT LANES OF TRAVEL)
4. PRIME COAT SHALL BE APPLIED ON ALL LIMEROCK BASES IN ACCORDANCE WITH FDOT STANDARDS
5. TACK COAT SHALL BE PLACED AS REQUIRED IN ACCORDANCE WITH FDOT STANDARDS
6. BASE COURSE CONSTRUCTION SHALL NOT BE STARTED UNTIL ALL UNDERGROUND CONSTRUCTION IN THE AREA HAS BEEN COMPLETED AND APPROVED
7. PAVEMENT SAW-CUTS SHALL BE CLEAN AND SQUARED UNTIL
   7.1 A MINIMUM OF 2 FEET OF EXISTING TO DETERMINE IF THERE IS ANY REMAINING WORK THAT MUST BE DONE BEFORE PAVING
   7.2 ALL LANDSCAPING WORK SHALL WORK CHASE SHARPLY TO THE FINAL GRADES COMPLETE
   7.3 ALL UNDERGROUND WORK AND INSTALLATIONS HAVE BEEN ACCEPTED AND A FINISHED ROAD SURFACE HAS BEEN SUBMITTED TO AND ACCEPTED BY THE HIGHWAY CONSTRUCTION & ENGINEERING DIVISION.

D. TESTING



1. ALL SUB-GRADE, EMBANKMENT AND ASPHALT TESTS REQUIRED SHALL BE TAKEN AT THE DIRECTION OF THE ENGINEER AND NEW CERTIFICATION/TESTS PERFORMED
2. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL COST AND TIME THAT MUST START FROM ANY MISSED OR CHANGE STRUCTURE INSTALLED IN PAVED AREAS

SIGNING AND MARKINGS

1. ALL PAVEMENT MARKING AND SIGNAGE SHALL CONFORM TO THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES (MUTCD), MIAMI-DADE COUNTY TRAFFIC ENGINEERING DIVISION, & FDOT.
2. ALL PAVEMENT MARKINGS SHALL BE APPLIED AFTER FINAL ASPHALT RESURFACING HAS BEEN COMPLETED. CONTRACTOR SHALL MAINTAIN TRAFFICE DURING PERIOD PLACE TEMPORARY/PLASTIC PAVEMENT MARKINGS.
3. ALL PERMANENT YELLOW PAVEMENT MARKINGS SHALL BE PROVIDED AT 90 MILS THICKNESS ON EPOXY BASE OF DURABLE PREMIXED BEADS.
4. ALL DIRECTIONAL ARROW/WORD REFLECTIVE PAVEMENT MARKERS SHALL BE PROVIDED AT 7 INTERVALS AT ALL INTERSECTIONS.
5. BI-DIRECTIONAL WHITE/YELLOW REFLECTIVE PAVEMENT MARKERS SHALL BE PROVIDED AT 20' INTERVALS ALONG SOLID WHITE LINES PLACED ON EDGE OF PAVEMENT OR SAME LANE LINES).
6. RESTRICTIVE PAVEMENT MARKINGS SHALL BE GLASS BEADED MARKINGS MANUFACTURED IN ACCORDANCE WITH FDOT STANDARD SPECIFICATIONS 706 AND INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDED PROCEDURES.
7. ALL SIGNING SHALL BE EMBOSSED USING TYPE III SHEETING, AS PER MIAMI-DADE COUNTY TRAFFIC ENGINEERING DIVISION STANDARDS AND/OR SPECIFICATIONS.
8. ALL PAVEMENT MARKINGS AND SIGNING DISTURBED DURING CONSTRUCTION SHALL BE RESTORED TO MIAMI-DADE COUNTY TRAFFIC ENGINEERING DIVISION.
9. EXISTING SURFACING SHALL BE REMOVED BY SHEET BLASTING ONLY.
10. SEE SIGNING AND PAVING PLANS FOR ADDITIONAL INFORMATION.
11. ALL EXISTING SIGNALIZATION EQUIPMENT TO REMAIN IS ASSUMED TO BE IN GOOD WORKING ORDER UNLESS OTHERWISE NOTED. ANY DAMAGE OR MALFUNCTIONS OCCURRING DURING CONSTRUCTION SHALL BE REPAIRED TO THE SIGNAL EQUIPMENT SHALL BE REPAIRED BY THE CONTRACTOR AT THE CONTRACTOR'S EXPENSE

MAINTENANCE OF TRAFFIC

1. ROUTE DETOURS, WHERE REQUIRED, SHALL BE IN ACCORDANCE WITH THE PROJECT TRAFFIC PLANS, THE CURRENT EDITION OF THE FDOT STANDARD PLANS FOR ROAD AND BRIDGE CONSTRUCTION, THE STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD) AS APPROVED LOCALLY.
2. THE CONTRACTOR SHALL IMMEDIATELY REPAIR ANY DEFICIENCIES THAT DEVELOP WITHIN PROJECT LIMITS AND ALL MAINTAIN A SURFACE OF COLD MIX ON THE PROJECT SITE, AS DIRECTED BY THE ENGINEER. THESE REPAIRS ARE TO BE PERFORMED AT NO EXPENSE TO THE OWNER. ALL WORK, MATERIALS AND METHODS SHALL BE INCLUDED AS PART OF THE OVERALL BID.
3. REQUEST FOR PROPOSED LANE CLOSURES OR TEMPORARY DETOURS SHALL BE SUBMITTED FOR REVIEW AND APPROVAL WHERE NECESSARY MAINTENANCE AGREED TO CLOSURE OR DETOUR.
4. AT THE DISCRETION OF THE ENGINEER, IF A LANE CLOSURE CAUSES EXCESSIVE CONGESTION OR DELAYS, THE CONTRACTOR SHALL BE DIRECTED TO REOPEN THE CLOSED LANE(S) UNTIL SUCH TIME THAT TRAFFIC FLOW HAS RETURNED TO AN ACCEPTABLE LEVEL.
5. NO VEHICLE SHALL DRIVE SHALL NOT BE ALLOWED BY THE CONT

DEMOLITION AND EROSION CONTROL PLAN
SCALE: 1" = 20'

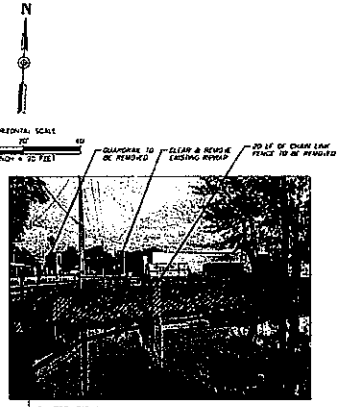


PHOTO 1

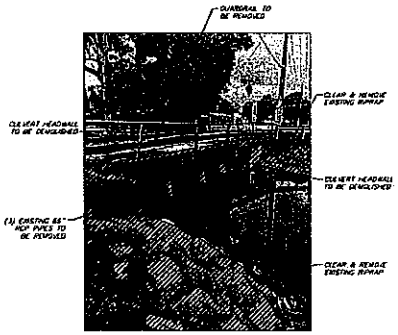

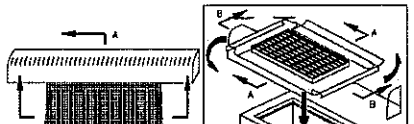

PHOTO 2

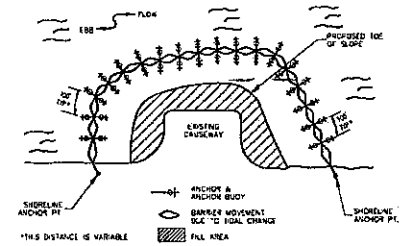

PHOTO 3

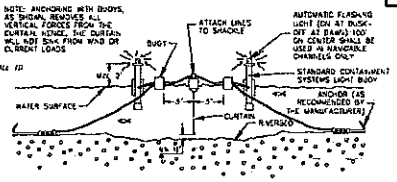

NOTE:
1. CONTRACTOR SHALL PERFORM DAILY INSPECTIONS TO ENSURE GEO-TEXTILE FABRIC IS NOT RIPPED OR BROKEN. CONTRACTOR SHALL INSPECT AFTER RAIN STORM EVENTS.

PROPOSED DROP INLET SEDIMENT BARRIER

LEGEND

- EXISTING RIGHT OF WAY LINE
- EXISTING EDGE OF PAVEMENT LINE
- EXISTING SANITARY SEWER PIPE
- EXISTING FORCE MAIN PIPE
- EXISTING WATER MAIN PIPE
- EXISTING STORM DRAIN PIPE
- EXISTING OVERHEAD WIRE
- EXISTING CHAIN LINK FENCE
- EXISTING GUARDRAIL
- EXISTING SIGN
- EXISTING GRADE
- EXISTING POWER POLE
- EXISTING CONCRETE UTILITY POLE
- EXISTING SANITARY SEWER MANHOLE
- EXISTING STORM CATCH BASIN
- EXISTING WATER METER
- EXISTING RIP RAP
- EXISTING CONCRETE TO BE REMOVED
- EXISTING CULVERT & RIPRAP TO BE REMOVED
- EXISTING GRASS TO BE REMOVED
- PROPOSED TURBIDITY BARRIER

NOTES

1. ALL AREAS DAMAGED BY CONTRACTOR, INCLUDING BUT NOT LIMITED TO SIDEWALKS PAVEMENT MARKINGS, ASPHALT, AND DRIVEWAYS SHALL BE RESTORED TO ITS ORIGINAL CONDITION AT THE CONTRACTORS EXPENSE.
2. ALL ASPHALT TO BE REMOVED SHALL BE SAW CUT ADJACENT TO PROPOSED IMPROVEMENTS.
3. THE CONTRACTOR SHALL MAINTAIN FLOW WITHIN THE CANAL DURING CONSTRUCTION. THE EXISTING CULVERT PIPES. THE CONSTRUCTION SEQUENCE SHALL BE PERFORMED DIGERLY AS TO MINIMIZE WATERWAY IMPACTS.
4. THE DEMOLITION WORK WITHIN THE CANAL SHALL TAKE PLACE ONLY AFTER EROSION CONTROL MEASURES HAVE BEEN INSTALLED AND IN WORKING ORDER.
5. ALL EXISTING SIGNS IMPACTED BY CONSTRUCTION SHALL BE PROVIDED, AS NECESSARY, AT CONTRACTORS EXPENSE.
6. ALL EXISTING TREES SHALL BE MAINTAINED AND PROTECTED SO AS TO MINIMIZE IMPACTS. UNLESS TREE MITIGATION/REMOVAL IS REQUIRED, IT SHALL BE COORDINATED BY THE CONTRACTOR TO OBTAIN NECESSARY PERMITS.
7. IF BYPASS PUMPING IS REQUIRED, THE CONTRACTOR IS RESPONSIBLE FOR ITS DESIGN / SELECTION AND SPECIFICATION. BYPASS PUMPING PLAN SHALL SHALL BE SUBMITTED TO THE EOR FOR APPROVAL DURING SHOP DRAWINGS REVIEW.
8. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OR THE INCOMPLETENESS OF THIS DATA. THE CONTRACTOR IS REQUIRED TO VERIFY AND CLEARLY DELINEATE LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO COMPLY, LOCATE AND SHOW EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT EXCAVATION) COORDINATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL BEAR ALL COSTS FOR THIS WORK.

THIS ITEM HAS BEEN DIGITALLY SIGNED AND SEALED BY RONALDO RIVERA, PE. ON 6/2/23.
PRINTED COPIES OF THIS DOCUMENT ARE NOT CONSIDERED SIGNED AND SEALED AND THE SIGNATURE MUST BE VERIFIED ON ANY ELECTRONIC COPIES.

A. DEMOLITION NOTES

1. THE CONTRACTOR IS ENCOURAGED TO PHOTOGRAPH AND/OR VIDEO THE SITE AS WELL AS MAKE ONE PLANS AND SPECIFICATIONS AVAILABLE TO SUBCONTRACTORS. CONTRACTOR WILL NOT BE RESPONSIBLE FOR CLAIMS FOR ADDITIONAL COMPENSATION FOR CONDITIONS KNOWN TO EXIST AT THE TIME OF THIS DEMOLITION PLAN.
2. THE DEMOLITION PLAN IS BASED ON AVAILABLE UTILITY INFORMATION AND MAY OR MAY NOT BE ALL INCLUSIVE. CONTRACTOR SHALL BE RESPONSIBLE TO NOTIFY UTILITY COMPANIES FOR THE LOCATION OF THEIR UTILITIES PRIOR TO THE START OF DEMOLITION. ANY DAMAGE RESULTING FROM THE DEMOLITION WORK SHALL BE REPAIRED OR REPLACED AT THE CONTRACTOR'S EXPENSE.
3. CONTRACTOR IS REQUIRED TO OBTAIN ALL DEMOLITION PERMITS AND PAY ALL ASSOCIATED FEES.
4. ALL FIXTURES & EQUIPMENT OR ITEMS FROM WHICH ARE NEEDED TO BE SALVAGED AND TO BE REMOVED FROM THE SITE BEFORE DEMOLITION OF COMPLEX IF THE SITE SHALL BE DELIVERED IN A CONDITION SUITABLE FOR REDEVELOPMENT.
5. CONTRACTOR IS RESPONSIBLE FOR CONTROLLING AIRBORNE DUST AND POLLUTANTS BY USING WATER SPRINKLING OR OTHER SUITABLE MEANS OF CONTROL.
6. CONTRACTOR TO USE CARE IN REMOVING DEBRIS FROM THE SITE TO ENSURE THE SAFETY OF THE PUBLIC WHILE YOU ARE ON SITE. DEBRIS MONITORED FOR SIGNS OF HAZARDS, PROVIDE OPEN DUMPING MACHINES, SECURE THE MACHINES AND BARRICADES TO BE CLEARED AND REMOVED AT THE END OF THE PROJECT FOR SAFETY.
7. ALL ASPHALT TO BE REMOVED SHALL BE SAW CUT CLEANLY TO REMAINING IMPROVEMENTS.
8. ALL SITE PLAN LIGHTING TO BE REMOVED AS NEEDED.
9. CONTRACTOR TO MAINTAIN ENTRANCE ROAD FOR CIVIL DURING AND AFTER CONSTRUCTION. FURTHERMORE, CONTRACTOR TO MAINTAIN ENTRANCE ROAD FOR CIVIL DURING AND AFTER CONSTRUCTION.
10. ALL TRENCHES LEFT OPEN AT THE END OF EACH WORKING DAY SHALL BE BARRICADED AND ADEQUATE TOP EARTH DIMENSION TO BE MAINTAINED. ALL TOP SOILS, EXCESS MATERIALS, AND DEBRIS SHALL BE REMOVED FROM THE SITE.
11. CONTRACTOR TO MAINTAIN PEDESTRIAN TRAFFIC FLOW DURING REMOVAL/RECONSTRUCTION OF SIDEWALKS.

B. BEST MANAGEMENT PRACTICES (BMPS)

1. THIS PLAN HAS BEEN PREPARED TO ENSURE COMPLIANCE WITH APPROPRIATE CONDITIONS OF THE NPDES – DADE COUNTY STORM DEVELOPMENT REGULATIONS, THE RULES OF THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION (FDEP), CHAPTER 17-25, F.A.C., THE SOUTH FLORIDA WATER MANAGEMENT DISTRICT (SFWMD), CHAPTER 40E-1, F.A.C. AND THE MIAMI-DADE COUNTY PROTECTION AGENCY (DERM) DOCUMENT NO. CPA 6622/P-/87-308 (DECEMBER 1987). THE PLAN ADDRESSES THE FOLLOWING:
   A. ON-SITE LOSS OF SOIL DURING CONSTRUCTION BY STORMWATER RUNOFF AND/OR WIND EROSION, INCLUDING PROTECTING TOPSOIL BY LOCATING IT FOR REUSE.
   B. SEDIMENTATION (DEPOSITION OF SOILS).
   C. PREVENT POLLUTING THE AIR WITH DUST AND PARTICULATE MATTER. THE APPROPRIATE TECHNIQUES OR METHODS CONSIDERED UNDER EACH EROSION PREVENTION AND SEDIMENTATION CONTROL MEASURE THAT THE CONTRACTOR SHOULD BE EMPLOYED IN AS NO EFFECTIVE IS A CROSS-REFERENCE TO A SECTION OR FIGURE REPRESENTING THE TECHNIQUE. IT SHOULD BE NOTED THAT THE MEASURES DEPICTED ON THIS PLAN ARE ONLY SUGGESTED EXAMPLES OF CONTROLLING SOIL EROSION AND POLLUTION AND SHOULD BE MODIFIED AS NECESSARY OR DESIRED IN ACCORDANCE WITH THE CURRENT FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITTING. CONTRACTOR SHALL PREPARE REQUIRED NOTICE OF INTENT (NOI) DOCUMENTATION AND OBTAIN PERMIT PRIOR TO COMMENCEMENT OF CONSTRUCTION. IT IS THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO COMPLETE THE REQUIRED NOI'S AND OBTAIN THE NPDES PERMIT. ALL COSTS ASSOCIATED WITH SUCH PERMIT SHALL BE DEEMED INCIDENTAL TO THE PROJECT LUMP SUM COST.

C. GENERAL EROSION CONTROL NOTES

1. THE STORM WATER POLLUTION PREVENTION PLAN (SWPPP) IS COMPRISED OF THESE EROSION CONTROL DRAWINGS, THE STANDARD DETAILS, THE ANSI/EPA PERMIT (TO BE OBTAINED BY CONTRACTOR) AND ALL SUBSEQUENT REPORTS AND RELATED DOCUMENTS.
2. ALL CONTRACTORS AND SUBCONTRACTORS MUST ADHERE WITH STORM WATER POLLUTION PREVENTION PLAN. CERTIFICATE & COPY OF THIS DRAWING SAME ONE STATE OF FLORIDA NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM GENERAL PERMIT (NPDES PERMIT) AND EROSION TRAINING WITH THEIR EMPLOYEES.
3. CONTRACTOR SHALL OBTAIN AND MAINTAIN ALL SITE CONDITIONS AND CONSTRUCTION ACTIVITIES REQUIRED.
4. CONTRACTOR SHALL IMPLEMENT BEST MANAGEMENT PRACTICES (BMP) IN ALL CONSTRUCTION ACTIVITIES INCLUDING BUT NOT LIMITED TO THE FOLLOWING:
   A. FUEL SPILLS AND LEAKS PREVENTION
   B. PREVENTATIVE VEHICLE AND EQUIPMENT WASHING AND STEAM CLEANING
   C. VEHICLE AND EQUIPMENT MAINTENANCE AND REPAIR
   D. PROPER DISPOSAL/HANDLING/RECYCLING OF MATERIALS
   E. PROPER STANDARDS TO ENSURE STORAGE OF RAW MATERIALS, PRODUCTS, AND BY-PRODUCTS
   F. SOLID WASTE MANAGEMENT
   G. HAZARDOUS WASTE MANAGEMENT
   H. CONCRETE WASTE MANAGEMENT
   I. SANDBLASTING WASTE MANAGEMENT
   J. STRUCTURAL CONSTRUCTION AND PAINTING
   K. SPILL PREVENTION AND CONTROL
   L. CONTAMINATED SOIL MANAGEMENT
   M. SANITARY/SEPTIC WASTE MANAGEMENT
   N. SOIL EROSION CONTROL
   O. STORM WATER QUALITY MANAGEMENT
5. ADDITIONAL BEST MANAGEMENT PRACTICES SHALL BE IMPLEMENTED AS DICTATED BY CONDITIONS AT NO ADDITIONAL COST TO THE OWNER THROUGHOUT ALL PHASES OF CONSTRUCTION.
6. BEST MANAGEMENT PRACTICES (BMPS) AND TECHNIQUES SHALL CONFORM TO FEDERAL, STATE, OR LOCAL REQUIREMENTS OR MANUAL OF PRACTICES, WHICHEVER CONSTRUCTION SHALL IMPLEMENT ADDITIONAL BMPS THAT ARE REQUIRED BY REGULATORY AGENCY OR OWNER.
7. CONTRACTOR SHALL OBTAIN AND PAY ALL STATE, WATER, CONTRACTOR SHALL MAINTAIN ALL PERMITS FOR ANY CONSTRUCTION DEWATERING ACTIVITIES AND IN NO CASE IS WATER ALLOWED TO LEAVE THE SITE WITHOUT THESE PERMITS.
8. CONTRACTOR SHALL MINIMIZE CLEARING TO THE MINIMUM EXTENT PRACTICAL OR AS REQUIRED BY THE GENERAL PERMIT.
9. CONTRACTOR SHALL BEGIN CLEARING AND GRUBBING ONLY AFTER ALL PHASES OF THE EROSION AND SEDIMENT CONTROL PLAN (SWPPP) MEASURES, CLEARING AND GRUBBING FOR THE REMAINING PORTIONS OF THE PROJECT SITE SHALL COMMENCE ONLY AFTER PERIMETER CONTROLS ARE IN PLACE. PERIMETER CONTROLS SHALL BE KEPT IN MAINTAINED UNTIL SOD AREAS HAVE BEEN STABILIZED AND SHALL BE REMOVED ONCE FINAL STABILIZATION IS COMPLETE.
10. GENERAL EROSION CONTROL BMPS SHALL BE EMPLOYED TO MINIMIZE SOIL EROSION AND POTENTIAL CANAL POLLUTANTS CAUSE ONE SPILL. THE VARIOUS TECHNIQUES OR DEVICES MAY BE USE AND MAY BE SPECIFIED, THEY SHOULD BE EMPLOYED AS SOON AS POSSIBLE DURING CONSTRUCTION.
11. ON-SITE & OFF-SITE SOIL STOCKPILES AND BORROW AREAS SHALL BE PROTECTED FROM EROSION AND SEDIMENTATION THROUGH IMPLEMENTATION OF BEST MANAGEMENT PRACTICES. STOCKPILES AND BORROW AREA LOCATIONS SHALL BE NOTED ON THE SITE MAP AND PERMITTED IN ACCORDANCE WITH GENERAL PERMIT REQUIREMENTS.
12. SURFACE WATER QUALITY SHALL BE MAINTAINED BY IMPLEMENTING THE FOLLOWING BMPS IN THE CONSTRUCTION PLANNING AND EXECUTION OF ALL EARTHWORK:
   A. NO PUMPING OF WATER SHALL TAKE PLACE UNLESS WATER IS FIRST DISCHARGED THROUGH A SEDIMENT CONTROL DEVICE.
   B. STORMWATER INLETS SHALL BE PROTECTED DURING CONSTRUCTION. PROTECTION MEASURES SHALL BE EMPLOYED AS SOON AS PRACTICAL DURING THE VARIOUS STAGES OF INLET CONSTRUCTION. SILT BARRIERS SHALL REMAIN IN PLACE UNTIL SURROUNDING AREA IS STABILIZED.
   C. WHERE NEEDED A TEMPORARY SEDIMENT TRAP SHALL BE FABRICATED TO RETAIN SEDIMENT-LADEN WATER FROM DISTURBED AREAS.
   D. SILT BARRIERS, SHALL BE PLACED WHEN ACCUMULATED AROUND THE BARRIERS, AND ANY FILL USED TO ANCHOR THE BARRIERS SHALL BE REMOVED IMMEDIATELY AFTER THE SOD OR MAINTENANCE WORK AROUND THE BARRIERS IS COMPLETE.
   E. BARRIERS OF BARRIER OR RETENTION/DETENTION BASINS SHALL BE CONSTRUCTED INTO STEEPER THAN 3H:1V FROM TOP OF BANK TO TWO FEET BELOW NORMAL WATER LEVEL, AS APPLICABLE.
   F. SOD SHALL BE PLACED FOR A 10-FOOT WIDE STRIP HORIZONTAL ALL DRAINS AND AROUND ALL INLETS. SOD SHALL BE PLACED WITHIN 24 HOURS OF BARRIERS AND INLETS.
   G. WHERE NECESSARY TO PREVENT EROSION FROM SWIFT FLOW ACROSS BARE GROUND FROM ENTERING A BANK OF WATER, A TEMPORARY SEDIMENT TRAP SHALL BE CONSTRUCTED.
13. SILT FENCE BARRIER SHOULD BE USED FOR STORM DRAIN INLET PROTECTION BEFORE FINAL STABILIZATION.
14. TEMPORARY, TURBIDITY BARRIERS SHALL BE INSTALLED TO CONTROL TURBIDITY WHICH MAY BE CAUSED BY CONSTRUCTION AND INSTALLATION OF DRAINAGE OUTFALL PIPE AND STRUCTURES.
15. EXISTING DRAINAGE FLOW PATTERNS AND POSITIVE DRAINAGE TO EXISTING OUTFALLS SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION.
16. ALL SILT FENCE BARRIERS UNDER THIS PROJECT SHALL REMAIN IN PLACE UNTIL FINAL STABILIZATION.

D. STORM WATER EROSION CONTROL PRACTICES

1. CONTRACTORS OR SUBCONTRACTORS WILL BE RESPONSIBLE FOR REMOVING SEDIMENTS FROM RETENTION PONDS AND SEDIMENTS THAT MAY HAVE COLLECTED IN THE STORM SEWER DRAINAGE SYSTEMS IN CONNECTION WITH THE CONSTRUCTION OF THIS SITE.
2. WITH THE EXCEPTION OF THE INITIAL PREVENTED CONDITION DURING THE GRADING PHASE TO MINIMIZE RUNOFF VELOCITIES AND EROSION.
3. DUE TO THE CLOSE PROXIMITY DURING THE DEVELOPMENT OF THE SITE, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ASSISTING THE EROSION CONTROL MEASURES (CONSTANT SOON LEAVES, ETC.) TO PREVENT EROSION.
4. WHERE PRACTICAL, STORMWATER SHALL BE CONVEYED BY SWALES.
5. EROSION CONTROL MEASURES SHALL BE EMPLOYED TO MINIMIZE TURBIDITY OF SURFACE WATERS LOCATED DOWNSTREAM OF ANY CONSTRUCTION ACTIVITY. SINCE THE VARIOUS MEASURES REQUIRED WILL BE SITE SPECIFIC, THEY SHALL BE EMPLOYED AS NEEDED AS DIRECTED BY THE ENGINEER.
6. IN GENERAL, EROSION SHALL BE CONTROLLED AT THE EARLIEST PRACTICAL, DOWNHILL LOCATIONS.
   A. STORMWATER INLETS SHALL BE PROTECTED DURING CONSTRUCTION. PROTECTION MEASURES SHALL BE EMPLOYED AS SOON AS PRACTICAL DURING THE VARIOUS STAGES OF INLET CONSTRUCTION. SILT BARRIERS SHALL REMAIN IN PLACE UNTIL SURROUNDING AREA IS STABILIZED.
   B. WHERE NEEDED A TEMPORARY SEDIMENT TRAP SHALL BE FABRICATED TO RETAIN SEDIMENT-LADEN WATER FROM DISTURBED AREAS.
   C. SILT BARRIERS, SHALL BE PLACED WHEN ACCUMULATED AROUND THE BARRIERS, AND ANY FILL USED TO ANCHOR THE BARRIERS SHALL BE REMOVED IMMEDIATELY AFTER THE SOD OR MAINTENANCE WORK AROUND THE BARRIERS IS COMPLETE.
   D. BARRIERS OF BARRIER OR RETENTION/DETENTION BASINS SHALL BE CONSTRUCTED INTO STEEPER THAN 3H:1V FROM TOP OF BANK TO TWO FEET BELOW NORMAL WATER LEVEL, AS APPLICABLE.
   E. SOD SHALL BE PLACED FOR A 10-FOOT WIDE STRIP HORIZONTAL ALL DRAINS AND AROUND ALL INLETS. SOD SHALL BE PLACED WITHIN 24 HOURS OF BARRIERS AND INLETS.
   F. WHERE NECESSARY TO PREVENT EROSION FROM SWIFT FLOW ACROSS BARE GROUND FROM ENTERING A BANK OF WATER, A TEMPORARY SEDIMENT TRAP SHALL BE CONSTRUCTED.
7. SILT FENCE BARRIER SHOULD BE USED FOR STORM DRAIN INLET PROTECTION BEFORE FINAL STABILIZATION.
8. TEMPORARY, TURBIDITY BARRIERS SHALL BE INSTALLED TO CONTROL TURBIDITY WHICH MAY BE CAUSED BY CONSTRUCTION AND INSTALLATION OF DRAINAGE OUTFALL PIPE AND STRUCTURES.
9. EXISTING DRAINAGE FLOW PATTERNS AND POSITIVE DRAINAGE TO EXISTING OUTFALLS SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION.
10. ALL SILT FENCE BARRIERS UNDER THIS PROJECT SHALL REMAIN IN PLACE UNTIL FINAL STABILIZATION.

E. WIND EROSION CONTROL PRACTICES

1. WIND EROSION SHALL BE CONTROLLED BY EMPLOYING THE FOLLOWING MEASURES AS NECESSARY AND APPROPRIATE:
   A. BARE EARTH AREAS SHALL BE WATERED DURING CONSTRUCTION AS NECESSARY TO MINIMIZE THE TRANSPORT OF FUGITIVE DUST. IT MAY BE NECESSARY TO LIMIT CONSTRUCTION VEHICLE SPEED IF BARE EARTH HAS NOT BEEN SUFFICIENTLY WATERED OR HAS BECOME DRY. DUST SHALL NOT BE ALLOWED TO LEAVE THE SITE UNDER CONSTRUCTION.
   B. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY HAS PERMANENTLY STOPPED SHALL BE PERMANENTLY SEEDED OVER PERMANENT STABILIZATION PROVIDES FOR DETAILS. THESE AREAS SHALL BE SEEDED NO LATER THAN 14 DAYS AFTER THE LAST CONSTRUCTION ACTIVITY OCCURRED IN THESE AREAS. REFER TO THE GRADING PLAN AND/OR LANDSCAPE PLAN. CLEARED SITE DEVELOPMENT AREAS NOT CONTINUALLY SCHEDULED FOR CONSTRUCTION ACTIVITIES SHALL BE STABILIZED WITH MULCH OR OTHER ACCEPTABLE AND PERIODICALLY WATERED IMMEDIATELY TO STABILIZE THE TEMPORARY UNDERCUTTING (SEE TEMPORARY STABILIZATION PRACTICES FOR DETAILS).
   C. AT ANY TIME BOTH CUTTING AND FILLING ARE CONSTRUCTION THAT WATERING AND/OR REVEGETATION ARE NOT EFFECTIVE IN CONTROLLING WIND EROSION, ANOTHER TEMPORARY STABILIZATION METHOD SHALL BE EMPLOYED AS NECESSARY (SEE SOIL CONTROL). SHALL BE EMPLOYED. SHALL BE USED TO PREVENT ERECTION OF DUST CONTROL DEVICES A 4'—11' SECURITY FILTER CLOTH SHALL BE INSTALLED AROUND THE ENTIRE LENGTH OF THE EXTERIOR FENCE LINE, STREET AND LOT.
2. ALL DUST ON THE SITE SHALL BE CONTROLLED. THE USE OF WATER USE AND OTHER PETROLEUM BASED OIL TYPE SOLVENTS FOR DUST SUPPRESSION OPERATIONS IS PROHIBITED.

F. STABILIZATION PRACTICES

1. SHALL BE IN ACCORDANCE WITH BMP DOCUMENT NO 82-87/ 3000(A).
2. DISTURBED PORTIONS OF SITE WHERE CONSTRUCTION ACTIVITY TEMPORARILY CEASE FOR AT LEAST 21 DAYS, SHALL BE STABILIZED WITH TEMPORARY SEED AND MULCH NO LATER THAN 14 DAYS FROM THE LAST CONSTRUCTION ACTIVITY IN THAT AREA.
3. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY PERMANENTLY CEASE SHALL BE STABILIZED WITH SOD NO LATER THAN 14 DAYS AFTER THE LAST CONSTRUCTION ACTIVITY.

G. STRUCTURAL PRACTICES

1. SHALL BE IN ACCORDANCE WITH BMP DOCUMENT NO 82-87/ 3000(A).

H. WASTE DISPOSAL

1. WASTE MATERIALS — ALL WASTE MATERIALS SHALL BE COLLECTED AND STORED IN A METAL DUMPSTER OR A RECEPTACLE OR IN ACCORDANCE WITH ALL LOCAL AND STATE LAWS. ALL TRASH AND CONSTRUCTION DEBRIS FROM THE SITE SHALL BE DEPOSITED IN THE DUMPSTER. NO DUMPSTER SHALL BE OVERLOADED SO THAT LOCAL ORDINANCES OR ANY OF THE DUMPSTER CONTENTS ARE EXPOSED. ONCE A WEEK AND THE SAME DAYS TO ANY ENTERPRISE LANDFILL NO CONSTRUCTION WASTE MATERIALS SHALL BE BURIED ON SITE. ALL PERSONNEL SHALL ORGANIZE TRAINING FOR THE EMPLOYEES IN THE PROPER PRACTICES WHEN DEALING WITH WASTE MATERIALS. A SUPERINTENDENT SHALL BE RESPONSIBLE FOR POSTING AND ENFORCING WASTE MATERIAL MANAGEMENT.
2. HAZARDOUS WASTE — HAZARDOUS WASTE MATERIALS SHALL BE DISPOSED OF IN ACCORDANCE WITH ALL LOCAL AND STATE LAWS OR AS DIRECTED BY THE MANUFACTURER. THE SUPERINTENDENT SHALL ORGANIZE TRAINING SESSIONS FOR EMPLOYEES IN THE PROPER PROCEDURES WHEN DEALING WITH HAZARDOUS WASTE MATERIALS. EVERY PRECAUTIONARY MEASURE SHALL BE TAKEN TO PREVENT ACCIDENTAL SPILLAGE. ALL PROCEDURES SHALL BE FOLLOWED ON THE SITE. THE PERSON WHO MANAGES THE SITE SHALL BE THE ONE WHO IS RESPONSIBLE FOR THE ENFORCEMENT.
3. SANITARY WASTE — ALL SANITARY WASTE SHALL BE COLLECTED AND DISPOSED OF IN ACCORDANCE WITH ALL LOCAL AND STATE LAWS. THE SUPERINTENDENT SHALL ARRANGE FOR REGULAR SERVICE WITH A LOCAL UTILITY FOR COLLECTION OF THE SANITARY WASTE AT LEAST THREE TIMES A WEEK OR AS NEEDED.
4. RUBBISH, TRASH, GARBAGE, LITTER, OR OTHER SUCH MATERIALS SHALL NOT BE DEPOSITED ON OR INTO THE WATERS OF THE STATE OR ONTO LANDS IN SUCH MANNER THAT THEY MAY BE CARRIED INTO THE WATERS OF THE STATE BY WIND OR WATER. ALL SOLID WASTE SHALL BE CONTAINED AND DISPOSED OF OR STORED AND SECURED IN APPROVED CONTAINERS. MATERIALS SHALL BE PREVENTED FROM BECOMING POLLUTANTS BY THE ACTION OF WIND OR STORM WATER DISCHARGE INTO DRAINAGE SYSTEMS OR WATERS OF THE STATE.

I. OFFSITE TRACKING

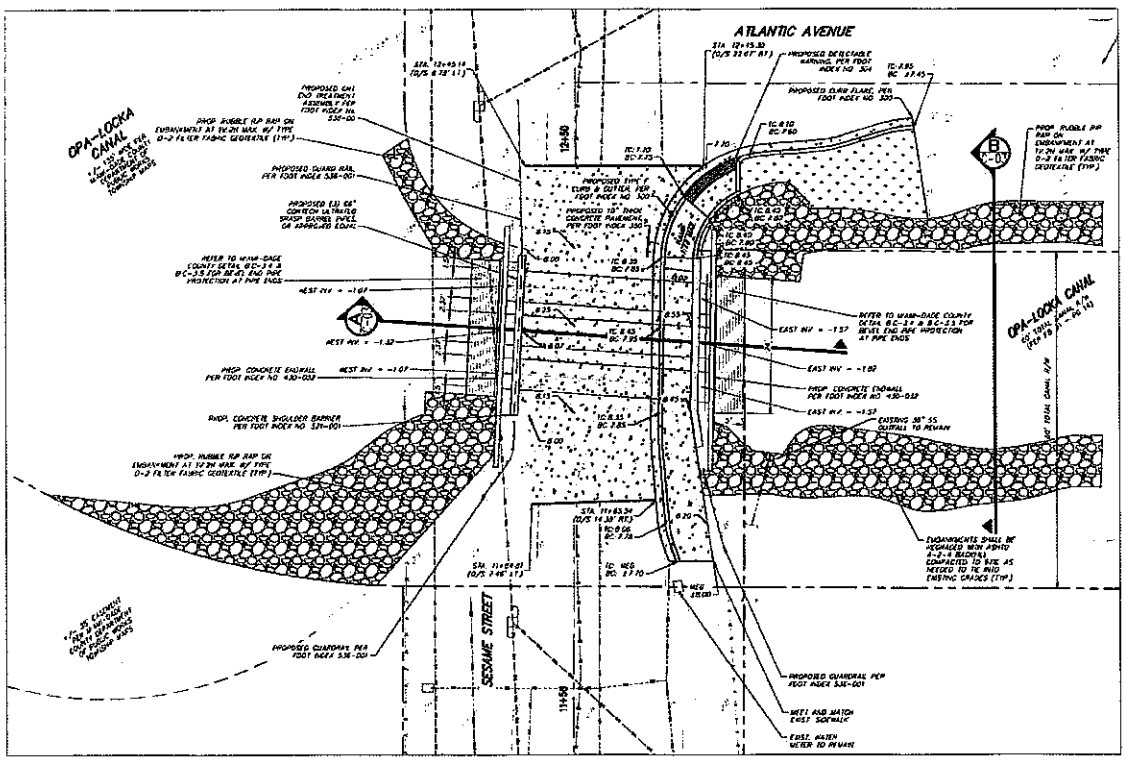
1. STABILIZED CONSTRUCTION ENTRANCE SHALL BE PROVIDED TO REDUCE SEDIMENT TRACKING OFFSITE. THE MAJOR ROAD CONNECTED TO THE PROJECT SHALL BE CLEANED DAILY OR AS NEEDED, AND EXCESS MUD, DIRT OR ROCK REMOVED FROM CONSTRUCTION STARTS. ALL TRUCKS LEAVING WORKSPACE ENTIRE SHALL BE COVERED WITH A TARPAULIN.
2. GENERAL CONSTRUCTION SHALL DEVOTE ON PLAN THE TEMPORARY PARKING AND STORAGE AREA WHICH SHALL ALSO BE USED AS THE EQUIPMENT MAINTENANCE AND CLEANING AREA, EMPLOYEE PARKING AREA, AND AREA FOR LOCATION PORTABLE FACILITIES, OFFICE TRAILERS, AND TOILET FACILITIES. NO OFF CONSTRUCTION EQUIPMENT PARKING AND MAINTENANCE AREAS SHALL BE DESIGNED TO PREVENT OIL, GREASE, AND LUBRICANTS FROM ENTERING SITE DRAINAGE FEATURES INCLUDING STORMWATER COLLECTION AND BREAKWATER STRUCTURES. CONDITIONS SHALL PROVIDE SHOULD SHALL NOT EXIST OR SILT SCREENS, BRUSH, AND SEDIMENT SUMPS. WORK SHOP AREAS AS REQUIRED TO CONTAIN SPILLS OF OIL, GREASE OR LUBRICANTS. CONTRACTORS SHALL NOT USE DETERGENTS AND SHALL USE ABSORBENT MATERIALS ON ANY SPILLS AS SOON AS POSSIBLE AFTER DISCOVERY.
3. ALL SITE MAINTENANCE, CONCRETE TRUCK, ASPHALT CLEANING, EQUIPMENT CLEANING, ETC. SHALL BE DEFINED AND DESIGNED TO CONTAIN ANY WASTE GENERATED AND NOT ALLOW DISCHARGE OF HAZARDOUS MATERIALS OR WASTE INTO THE GROUND OR INTO ANY WATERS OF THE STATE.
4. AT THE END OF EACH WORKING DAY, ALL CONSTRUCTION ENTRANCES ARE NOT SUFFICIENT TO REMOVE MUD FROM TIRES. ADDITIONAL MEASURES MAY BE REQUIRED, SUCH AS WASHING THE TIRES BEFORE THE VEHICLE ENTERS A PUBLIC ROAD, IF WASHING IS USED, PROVISIONS MUST BE MADE TO INTERCEPT AND TREAT WASH WATER AND SILT BEFORE IT IS DISCHARGED OFF THE SITE.
5. ALL INTERNAL PAVED, GRADED, DRIVING, MUDDED, OR TRACKED FROM VEHICLES ONTO ROADWAYS OR INTO STORM DRAINS MUST BE REMOVED IMMEDIATELY.

J. MAINTENANCE

1. ALL MEASURES STATED ON THIS EROSION AND SEDIMENT CONTROL PLAN, AND IN THE STORM WATER POLLUTION PREVENTION PLAN, SHALL BE MAINTAINED IN FULLY FUNCTIONAL CONDITION UNTIL NO LONGER REQUIRED FOR A COMPLETED PHASE OF WORK OR FINAL STABILIZATION OF THE SITE. ALL PERTINENT DOCUMENTATION CONTAINING RECORDS SHALL BE OVERSEEN BY A QUALIFIED PERSON AT LEAST ONCE EVERY SEVEN CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A 0.5" RAINFALL EVENT, AND CLEANED AND REPAIRED IN ACCORDANCE WITH THE FOLLOWING:
   A. RILES PROTECTION DEVICES AND BARRIERS SHALL BE REPAIRED OR REPLACED IF THEY SHOW SIGNS OF UNDERMINING OR DETERIORATION.
   B. ALL SEEDED AREAS SHALL BE CHECKED REGULARLY TO SEE THAT A GOOD STAND IS MAINTAINED. AREAS SHOWING BARE SPOTS, WASHOUTS, AND RILLS SHALL BE REPAIRED AS NEEDED.
   C. THE EXPOSED FACE OF BARRIER DEVICES SHALL BE INSPECTED PERIODICALLY FOR HEIGHT OF SEDIMENT AND EVIDENCE OF UNDERMINING. SEDIMENT DEPOSITS SHALL BE REMOVED WHEN THEY REACH A DEPTH OF 1/2 THE HEIGHT OF THE CONTROL DEVICE.
   D. THE CONSTRUCTION ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOW OF MUD ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE CONSTRUCTION ENTRANCE AS CONDITIONS DEMAND.
   E. THE TEMPORARY PARKING AND STORAGE AREA SHALL BE KEPT IN GOOD CONDITION (SUITABLE FOR PARKING AND STORAGE). THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE TEMPORARY PARKING AS CONDITIONS DEMAND.
   F. DIRECT STRUCTURES IN THE STORMWATER SYSTEM SHALL BE MAINTAINED IN OPERATIONAL CONDITIONS AT ALL TIMES. THE SEDIMENT REMOVED FROM THESE STRUCTURES SHALL BE DISPOSED IN SUCH A MANNER THAT IT WILL NOT BE SUBJECT TO FURTHER EROSION AND TRANSPORTATION. SEDIMENT REMOVED FROM STORAGE AREAS SHALL BE REMOVED AND STABILIZED AT THE TIME WHEN THE DESIGN CAPACITY HAS BEEN REDUCED BY 50% AND AFTER CONSTRUCTION IS COMPLETED.
   G. ALL MAINTENANCE OPERATIONS SHALL BE DONE IN A TIMELY MANNER BUT IN NO CASE LATER THAN SEVEN CALENDAR DAYS FOLLOWING THE INSPECTION/EROSION GAPES SHALL BE INSPECTED MONTHLY AND FOLLOWING 25.01 OR MORE INCH RAINFALL.
   H. A MAINTENANCE REPORT SHALL BE COMPLETED DAILY AFTER EACH INSPECTION OF THE SEDIMENT AND EROSION CONTROL MEASURES. THE REPORTS SHALL BE FILED IN AN ORGANIZED MANNER AND RETAINED ON-SITE DURING CONSTRUCTION. AFTER CONSTRUCTION IS COMPLETED, THE REPORTS SHALL BE KEPT FOR AT LEAST THREE YEARS. THE REPORTS SHALL BE AVAILABLE FOR ANY AGENCY THAT HAS JURISDICTION OVER EROSION CONTROL.
   I. ALL REPAIRS MUST BE MADE WITHIN 24 HOURS OF REPORT.
   J. THE SUPERINTENDENT SHALL ORGANIZE THE TRAINING FOR INSPECTION PROCEDURES AND PROPER EROSION CONTROL METHODS. THE SUPERINTENDENT SHALL COMPLETE ADDITIONS AND REPORTS.
   K. SEDIMENTS SHALL BE REMOVED TO THEIR ORIGINAL CONDITIONS IF DAMAGED. SEDIMENT SHALL BE REMOVED FROM ONE SILT FENCE BEFORE IT REACHES ONE-HALF THE HEIGHT OF THE SILT FENCE.
2. THE EROSION CONTROL MEASURES INSTALLED BY THE CONTRACTOR SHALL BE ACCEPTABLY MAINTAINED BY THE CONTRACTOR DURING THE CONSTRUCTION PERIOD.

K. SPILL PREVENTION AND CONTROL

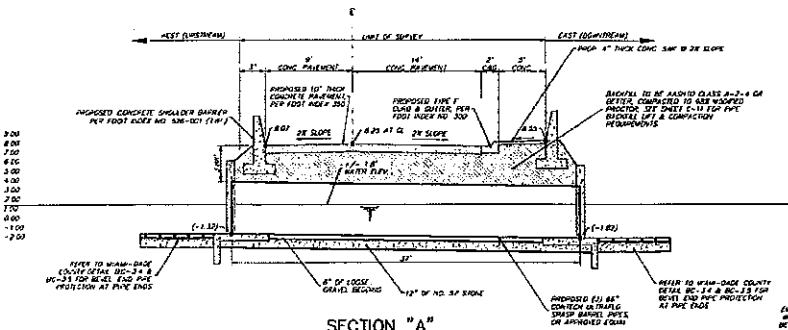
THE FOLLOWING ARE THE MATERIAL MANAGEMENT PRACTICES THAT WILL BE USED TO REDUCE THE RISK OF SPILLS OR OTHER ACCIDENTAL EXPOSURE OF MATERIALS AND SUBSTANCES TO STORM WATER RUNOFF.



1. GOOD HOUSEKEEPING
   A. SUPERINTENDENT SHALL INSPECT PROJECT AREA DAILY FOR PROPER STORAGE, USE, AND DISPOSAL OF CONSTRUCTION MATERIALS.
   B. STORE ONLY ENOUGH MATERIAL ON SITE FOR PROJECT COMPLETION.
   C. ALL SUBSTANCES SHOULD BE USED BEFORE DISPOSAL OF CONTAINER.
   D. ALL CONSTRUCTION MATERIALS STORED SHALL BE ORGANIZED AND IN THE PROPER CONTAINER AND IF POSSIBLE, STORED UNDER A ROOF OR WATERPROOF COVER.
   E. PRODUCTS SHALL NOT BE MIXED UNLESS DIRECTED BY THE MANUFACTURER. I. ALL PRODUCTS SHALL BE USED AND DISPOSED OF ACCORDING TO THE MANUFACTURER'S RECOMMENDATIONS.
   F. PRODUCTS WILL BE KEPT IN THEIR ORIGINAL CONTAINERS WITH THE ORIGINAL MANUFACTURER'S LABEL.
2. HAZARDOUS PRODUCTS
   A. MATERIALS SHOULD BE KEPT IN ORIGINAL CONTAINERS WITH ORIGINAL LABELS. ORIGINAL CONTAINERS CANNOT BE DAMAGED OR ORIGINAL CONTAINERS CANNOT BE LOST. LABELS AND PRODUCT INFORMATION SHOULD BE SAVED.
   B. PROPER DISPOSAL PROCEDURES SHALL ALWAYS BE FOLLOWED IN ACCORDANCE WITH MANUFACTURER AND LOCAL/STATE REGULATIONS.
3. PRODUCT SPECIFIC PRACTICES
   A. PETROLEUM PRODUCTS MUST BE STORED IN PROPER CONTAINERS AND CLEARLY LABELED. REMOTE CONTAINING PETROLEUM DERIVATIVE SHALL BE PERIODICALLY INSPECTED FOR LEAKS. PRECAUTIONS SHALL BE TAKEN TO AVOID LEAKAGE OF PETROLEUM PRODUCTS ON SITE.
   B. THE MINIMUM AMOUNT OF FERTILIZER SHALL BE USED AND MIXED ONTO THE SOIL IN ORDER TO LIMIT EXPOSURE TO STORM WATER. FERTILIZER STORED ON SITE SHALL BE STORED IN A COVERED AREA. ANY UNUSABLE USED BAGS OF FERTILIZER SHALL BE TRANSFERRED TO A STABLE PLASTIC BAG TO AVOID SPILLS.
   C. PAINT CONTAINERS SHALL BE SEALED AND STORED WHEN NOT IN USE. EXCESS PAINT MUST BE DISPOSED OF IN AN APPROVED MANNER.
   D. EXCESS PAINT WILL NOT BE DISCHARGED TO THE STORM SEWER SYSTEM BUT WILL BE PROPERLY DISPOSED OF ACCORDING TO MANUFACTURER'S INSTRUCTIONS OR STATE AND LOCAL REGULATIONS.
   E. CONCRETE TRUCKS SHALL NOT BE ALLOWED TO WASH OUT OR DISCHARGE SURPLUS CONCRETE OR WASH DOWN BY WATER ON THE SITE.

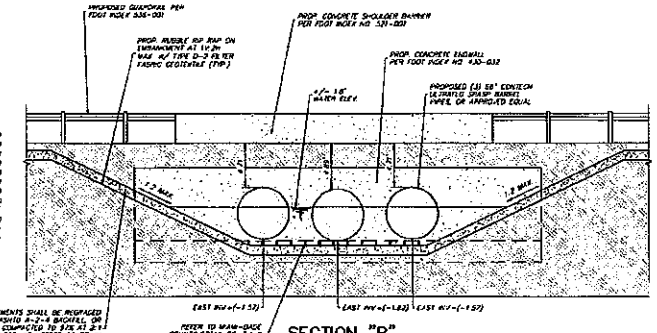
H. SPILL CLEAN UP

1. IN ADDITION TO GOOD HOUSEKEEPING AND MATERIAL MANAGEMENT PRACTICES DISCUSSED ABOVE, THE FOLLOWING PRACTICES SHALL BE FOLLOWED FOR SPILL PREVENTION AND CLEANUP:
   A. SPILL CLEANUP INFORMATION SHALL BE KEPT CLOSE TO SITE TO INFORM EMPLOYEES ABOUT CLEANUP PROCEDURES AND RESOURCES.
   B. USE TO CLEAN—UP EQUIPMENT MUST BE AVAILABLE FOR ANY MATERIAL BEING USED ON SITE. THIS SHALL INCLUDE A SUFFICIENT STOCK PILE OF SAND, SAWDUST, LIQUID ABSORBENT, GOGGLES, AND BRUSH CONTAINERS.
   C. SUFFICIENT OIL AND GREASE ABSORBING MATERIALS AND FLOATION BOOMS SHALL BE MAINTAINED ONSITE AND READILY AVAILABLE TO CONTAIN AND CLEAN—UP FUEL OR CHEMICAL SPILLS AND LEAKS.
   D. ALL SPILLS SHALL BE CLEANED UP AS SOON AS POSSIBLE.
   E. WHEN CLEANING A SPILL, ONE MAY SHOULD BE USED. AVAILABLE AND THE EMPLOYEE SHALL WEAR PROPER PROTECTIVE CLOTHING TO PREVENT INJURY.
   F. SPILL SHALL NOT BE PERMITTED TO BE THE PROPER AUTHORITY REGARDLESS OF THE SIZE OF THE SPILL.
   G. AFTER A SPILL, THE PREVENTION PLAN SHALL BE REVIEWED AND CHANGED TO PREVENT FURTHER SPILLS. SHALL BE MODIFIED TO ADDRESS THE CAUSE OF THE SPILL. MEASURES TO THE EFFECTIVE AND HOW TO CLEAN THE SPILL OF ANY SPILL.
   H. THE SUPERINTENDENT SHALL BE THE SPILL PREVENTION AND CLEANUP COORDINATOR AND IS RESPONSIBLE FOR THE DAY TO DAY SITE OPERATIONS. HE SUPERINTENDENT ALSO GUARANTEE THE SPILL PREVENTION PLAN AND SHALL BE RESPONSIBLE FOR REVIEWING THE EMPLOYEES ABOUT SPILL PREVENTION AND CLEANUP PROCEDURES.



L. SEQUENCE OF CONSTRUCTION

1. SEQUENCING FOR THE INSTALLATION OF THE FOLLOWING (MAJOR TRAILER, PARKING, LAY DOWN, STORM—WATER, WELL, ETC.) SHALL BE CONSIDERED TO MAINTAIN FUEL AND MATERIAL STORAGE DRAINAGES. SOLID WASTE DISPOSAL AND SANITARY FACILITIES SHALL BE CONSISTENTLY SEARCH SHOWN ON THE SITE MAPS AND NOTE ANY CHANGES IN LOCATION AS THEY OCCUR. RESPONSIBILITY OF THE CONTRACTOR SHALL BE:
   A. CONSTRUCT STABILIZED CONSTRUCTION ENTRANCE, AND INSTAL



PROPOSED SITE PLAN

- PROPOSED CONCRETE
- PROPOSED DETECTABLE WARNING
- PROPOSED SOD
- PROPOSED SAND CEMENT RIP RAP
- PROPOSED CHAIN LINK FENCE
- PROPOSED GUARD RAIL
- TOP OF CURB/BOTTOM OF CURB
- PROPOSED SPOT ELEVATION

NOTES

1. CONTRACTOR TO MAINTAIN DRAINAGE FLOW WITHIN THE CANAL DURING AND AFTER CONSTRUCTION.
2. SAW CUTTING OF THE EXISTING SIDEWALK SHALL BE MADE ONLY AT THE NEAREST JOINTS.
3. ALL SIDEWALKS SHALL BE 4" THICK, EXCEPT AT DRIVEWAY APPROACHES WHERE IT SHALL BE 6" THICK.
4. NO EXISTING TREES SHALL BE REMOVED UNLESS OTHERWISE STATED.
5. ALL PROPOSED SIDEWALK SLOPES SHALL HAVE A 2% CROSS SLOPE AND SR LONGITUDINAL SLOPE, MAXIMUM.
6. ALL SIDEWALK RAMPS AND DETECTABLE WARNINGS SHALL CONFORM TO FDOT STANDARDS.
7. ALL ASPHALT TO BE REMOVED SHALL BE SAW TO ADJACENT TO PROPOSED IMPROVEMENTS.
8. ALL UTILITIES CROSSINGS THROUGH THE CULVERT ARE ASSUMED TO BE PASSING UNDERNEATH. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO CONFIRM, IDENTIFY, PRESERVE, AND MAINTAIN THEM THROUGHOUT WHILE PERFORMING CONSTRUCTION.
9. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OR THE NON-EXISTENCE OF THIS DATA. THE CONTRACTOR IS REQUIRED TO MAKE AND CONFIRM ELEVATION LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO IDENTIFY, LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT DIGGING) COORDINATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL REPAIR ALL CUTS FOR THIS WORK.

* ALL SPACES ON PLANS REFER TO THE NATIONAL GEODETIC VERTICAL DATUM (NGVD-1929)

THIS ITEM HAS BEEN DIGITALLY SIGNED AND SEALED BY REINALDO RIVERA, PE. ON 9/8/23.

PRINTED COPIES OF THIS DOCUMENT ARE NOT CONSIDERED SIGNED AND SEALED AND THE SIGNATURE MUST BE VERIFIED ON ANY ELECTRONIC COPIES.

2. ALL SIDEWALKS SHALL BE 4" THICK, EXCEPT AT DRIVEWAY APPROACHES WHERE IT SHALL BE 6" THICK.
3. NO EXISTING USES SHALL BE REMOVED UNLESS OTHERWISE STATED
4. ALL PROPOSED SIDEWALK SLOPES SHALL HAVE A 2% CROSS SLOPE AND 3% LONGITUDINAL SLOPE, MAXIMUM
5. ALL SIDEWALK RAMPS AND DETECTABLE WARNINGS SHALL CONFORM TO FDOT STANDARDS.
6. ALL ASPHALT TO BE REMOVED SHALL BE SAW CUT ADJACENT TO PROPOSED IMPROVEMENTS.
7. ALL UTILITIES CROSSINGS THROUGH THE CULVERT ARE ASSUMED TO BE PASSING UNDERNEATH. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO CONFIRM, IDENTIFY, PRESERVE, AND MAINTAIN THEIR INTEGRITY WHILE PERFORMING CONSTRUCTION
8. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OF THE INCLUDED DATA. THE CONTRACTOR IS REQUIRED TO MARK AND CLEARLY DELINEATE LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO ACCURATELY LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT DIGGING) COORDINATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL BEAR ALL COSTS FOR THIS WORK

BID SET

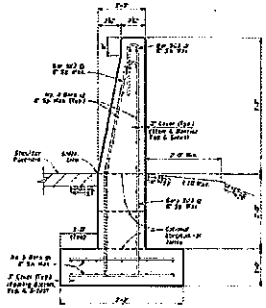
GENERAL NOTES:



1. Use Class III concrete.
2. Reinforcing steel is either Grade 40 or 60.
3. Endwalls may be cast in place or precast concrete. Contractor has option of using precast endwalls unless noted as cast-in-place on the Summary of Pay Items.
4. Dimension 'A' applies when skew is zero degrees.
5. Dimensions, thickness, and reinforcing are for round and elliptical concrete pipe and for round and elliptical corrugated metal pipe. Reinforcing for arch pipe may vary.
6. For skews other than zero degrees (skew other than 0 to 5 degrees, inclusive, from the square to the flow line), add 2 inches to dimension 'B' for each 15 degrees of skew.
7. For pipe sizes, shapes and pipe material not shown, dimensions and reinforcing are similar to the next smaller pipe shown.
8. Dimensions shown are for minimum required pipe cover.

DOWEL DETAILS

NOTES:

1. Install 4 inch SEPARATOR STRIP for 36" SHAPE SINGLE SLOPE or other type of the Authority Approved Barrier wherever shown throughout the Project limits as shown on the Plans.
2. MEDIAN USAGE. For additional notes & Sheet 13 of Sheet 14.
3. EXPANSION JOINTS. See the Typical Notes on Sheet 1 for details of joint types. Joint width may vary with angle of skew adjacent to the joint and at the Contractor's option shall be 3/4 inch or 1 inch for all skews.

   For the typical expansion joint for curbing and barrier wall, the Contractor may at his option use the joint material for the expansion joint in the curbing. The Contractor shall submit to the Engineer of Record for approval the joint material he proposes to use. Approval shall be required before any joint material will be installed.

   For the typical expansion joint for traffic railing, use a 1/2" thick Sponge Rubber Pad, conforming to ASTM D1752, Type II, Grade 2, or equal.
4. TRAFFIC RAILING CONSTRUCTION. Construct Traffic Railing in accordance with Sheet 13 of Sheet 14.
5. BARRIER TRANSITION CONSTRUCTION. For all Barrier Transitions shown on Sheet 13 of Sheet 14, the Contractor has the option of using either Concrete or Steel Railing.
6. PIPE CULVERT, SLOPE PAVEMENT AND END TREATMENT. Construct Pipe Culvert, Slope Pavement, Barrier Wall Transition and End Treatment in accordance with the details shown on Sheet 15 of Sheet 14.

Joanna Flores, CMC City
Clerk

CITY OF OPA-LOCKA
REQUEST FOR PROPOSALS RFP NO: 23-1016200
SESAME STREET CULVERT REPLACEMENT

PROPOSAL GUIDELINES

1-1. Introduction: The City of Opa-locka seeks proposals for SESAME STREET CULVERT REPLACEMENT. The City is soliciting bids on behalf of the City Manager's Office for SESAME STREET CULVERT REPLACEMENT under the laws of the State of Florida. These services must be efficient and economical, adhere to industry standards and best practices, and utilize the latest nonproprietary technology. The Contract will be awarded to the highest ranked Proposer, as described in the Evaluation Procedures Section below.

1-2. Proposal Submission and Withdrawal: The City of Opa-locka will be accepting proposals by mail, however it is Proposer's responsibility to submit Proposer's proposal by the due date. In addition, proposals may be submitted via www.demandstar.com (e-bid). The City must receive all proposals by 2:00 p.m. on tba, 2023. The address to submit sealed proposals is listed below:

CITY OF OPA-LOCKA Office of the City Clerk
780 Fisherman Street, 4th Floor Opa-locka,
Florida 33054

To facilitate processing, please clearly mark the outside of the proposal package as follows: RFP NO. 23-1016200 – SESAME STREET CULVERT REPLACEMENT. This package shall also include the Proposer's return address.

Proposers may withdraw their proposals by notifying the City in writing at any time prior to the deadline for proposal submittal. After the deadline, the proposal will constitute an irrevocable offer, for a period of 90 days. Once opened, proposals become a record of the City and will not be returned to the Proposer.

The City cautions Proposers to assure actual delivery of mailed or hand-delivered proposals directly to the City Clerk's Office at 780 Fisherman Street, 4th Floor, Opa-locka, Florida 33054 prior to the deadline set for receiving proposals. Telephone confirmation of timely receipt of the proposal may be made by calling (305) 688-4611 before proposal closing time. Any proposal received after the established deadline will not be considered and will be returned unopened to the Proposer(s).

1-3. Number of Copies: Proposers shall submit an original and six (6) copies (a total of 7) plus one copy on USB flash drive in PDF format of the proposal in a sealed, opaque package marked as noted above. The Proposer will be responsible for timely delivery, whether by personal delivery, US Mail or any other delivery medium.

1-4. Development Costs: Neither the City nor its representatives shall be liable for any expenses incurred in connection with preparation of a response to this Request for Proposal. Proposers should prepare their proposals

simply and economically, providing a straightforward and concise description of the Proposer's ability to meet the requirements of the RFP.

1-5. Inquiries: The City Clerk will receive written requests for clarification concerning the meaning or interpretations of the RFP, until eight (8) days prior to the submittal date. City personnel are authorized only to direct the attention of prospective Proposers to various portions of the RFP so that they may read and interpret such for themselves. No employee of the City is authorized to interpret any portion of this RFP or give information as to the requirements of the RFP in addition to what is contained in the written RFP document.

1-6. Addendum: The City may record its response to inquiries and any supplemental instructions in the form of written addenda. The City may mail written addenda up to three (3) calendar days before the date fixed for receiving the proposals. Proposers shall contact the City to ascertain whether any addenda have been issued. Failure to do so could result in an unresponsive proposal. Any oral explanation given before the RFP opening will not be binding.

All Proposers are expected to carefully examine the proposal documents. Any ambiguities or inconsistencies should be brought to the attention of the City's Purchasing Agent through written communication prior to the opening of the proposals.

1-7. Contract Awards: The City anticipates entering into an Agreement with the Proposer who submits the proposal judged by the City to be most advantageous. The Proposer understands that this RFP does not constitute an offer or an Agreement with the Proposer. An offer or Agreement shall not be deemed to exist and is not binding until proposals are reviewed, accepted by appointed staff, the best proposal has been identified, approved by the appropriate level of authority within the City and executed by all parties. The City anticipates that the final Agreement will be in substantial conformance with this sample Agreement; nevertheless, Proposers are advised that any Agreement may result from the RFP may deviate from the Sample Agreement. The City reserves the right to reject all proposals, to abandon the project and/or to solicit and re- advertise for other proposals.

1-8. Contractual Agreement: This RFP and Consultant/Contractor proposal shall be included and incorporated in the final award. The order of contractual precedence will be the Contract or Agreement document, original Terms and Conditions, and Proposer response. Any and all legal action necessary to enforce the award will be held in Miami-Dade County and the contractual obligations will be interpreted according to the laws of Florida. Any additional contract or agreement requested for consideration by the Proposer must be attached and enclosed as part of the proposal.

1-9. Selection Process: The proposals will be evaluated and assigned points. The firm with the highest number of points will be ranked first; however, nothing herein will prevent the City from assigning work to any firm deemed responsive and responsible.

The City reserves the right to further negotiate any proposal, including price, with the highest rated Proposer. If an agreement cannot be reached with the highest rated Proposer, the City reserves the right to negotiate and recommend award to the next highest Proposer or subsequent Proposers until an agreement is reached.

1-10. Public Records: Upon award recommendation or ten (10) days after opening, whichever occurs first, proposals become "public records" and shall be subject to public disclosure consistent with Chapter 119 Florida Statutes. Proposers must invoke the exemptions to disclosure provided by law in the response to the RFP, and must identify the data or other materials to be protected, and must state the reasons why such exclusion from public disclosure is necessary. Document files may be examined, during normal working hours.

1-11. News Releases: The Proposer shall obtain the prior approval of the City Manager's Office for all news releases or other publicity pertaining to this RFP or the service, study or project to which it relates.

1-12. Insurance: The awarded Proposer(s) shall maintain insurance coverage reflecting at least the minimum amounts and conditions specified herein. In the event the Proposer is a governmental entity or a self-insured organization, different insurance requirements may apply. Misrepresentation of any material fact, whether intentional or not, regarding the Proposers' insurance coverage, policies or capabilities may be grounds for rejection of the proposal and rescission of any ensuing Agreement.

1. Evidence of General Liability coverage with limits not less than $1,000,000 per Occurrence/ $2,000,000 Aggregate (Including Policy Number and Policy Period);

2. Evidence of Auto Liability coverage with limits not less than $1,000,000 per Occurrence/$1,000,000 Aggregate (Including Policy Number and Policy Period);

3. Evidence of Workers' Compensation coverage with statutory limits and Employer's Liability coverage with limits not less than $100,000 (Including Policy Number and Policy Period);

4. The City listed as an additional insured (this may be specifically limited to the specific job(s) the contractor will be performing);

5. Minimum 30-day written notice of cancellation.

1-13. Licenses: Proposers, both corporate and individual, must be fully licensed and certified in the State of Florida at the time of RFP submittal. The proposal of any Proposer who is not fully licensed and certified shall be rejected.

1-14. Public Entity Crimes: Award will not be made to any person or affiliate identified on the Department of Management Services' "Convicted Vendor List". This list is defined as consisting of persons and affiliates who are disqualified from public contracting and purchasing processes because they have been found guilty of a public entity crime. No public entity shall award any contract to or transact any business in excess of the threshold amount provided in Section 287.017 Florida Statutes for Category Two (currently $25,000) with any person or affiliated on the "Convicted Vendor List" for a period of thirty-six (36) months from the date that person or affiliate was placed on the "Convicted Vendor List" unless that person or affiliate has been removed from the list. By signing and submitting the RFP proposal forms, Proposer attests that they have not been placed on the "Convicted Vendor List".

1-15. Code Of Ethics: If any Proposer violates or is a party to a violation of the code of ethics of the City of Opalocka or the State of Florida with respect to this proposal, such Proposer may be disqualified from performing the work described in this proposal or from furnishing the goods or services for which the proposal is submitted and shall be further disqualified from submitting any future proposals for work, goods or services for the City of Opalocka.

1-16. Drug-Free Workplace: Preference shall be given to businesses with Drug-Free Workplace (DFW) programs. Whenever two or more proposals which are equal with respect to price, quality, and service are received by the City for the procurement of commodities or contractual services, a proposal received from a business that completes the attached DFW form certifying that it is a DFW shall be given preference in the award process.

1-17. Permits and Taxes: The Proposer shall procure all permits, pay all charges, fees, and taxes, and give all notices necessary and incidental to the due and lawful execution of the work.

1-18. Protests: Protests of the plans, specifications, and other requirements of the request for proposal and bids must be received in writing by the City Clerk's Office at least ten (10) working days prior to the scheduled bid opening. A detailed explanation of the reason for the protest must be included. Protests of the award or intended

award of the bid or contract must be in writing and received in the City Clerk's Office within seven (7) working days of the notice of award. A detailed explanation of the protest must be included.

1-19. Termination for Convenience: A contract may be terminated in whole or in part by the City at any time and for any reason in accordance with this clause whenever the City shall determine that such termination is in the best interest of the City. Any such termination shall be affected by the delivery to the contractor at least five (5) working days before the effective date of a Notice of Termination specifying the extent to which performance shall be terminated and the date upon which termination becomes effective. An equitable adjustment in the contract price shall be made for the completed service, but no amount shall be allowed for anticipated profit on unperformed services.

PHASE 1: 1st Evaluation Committee Meeting (Open to the Public).	TBA
Award Letter Recommendation	TBA
Post Award	TBA

GENERAL CONDITIONS

1.0 PERFORMANCE OF WORK: The Contractor shall supply all labor, transportation, materials, machinery, tools, apparatus, and equipment necessary for the entire proper and substantial completion of his work, and be accountable for the safe, proper and reasonable construction, maintenance and use of the same during construction, and shall remove all construction equipment upon completion, and shall perform all work in the best and most workmanlike manner. Special care shall be taken by the Contractor in placing and removing stockpiles of material, and in the work in general to avoid unnecessary injury to either public property or other areas adjacent to the work.

2.0 CONCURRENT WORK: Work may be performed concurrently by the utilities in the City or the City's Contractor in the right-of-way and it shall be the responsibility of the Contractor to coordinate his work with the utility companies, the City and the City's Contractors.

3.0 USE OF PUBLIC STREETS: Construction shall be performed in such a manner as to provide a minimum of inconvenience to the residents of the area. Any other excavated material spilled from trucks shall be removed by the Contractor and the streets shall be cleaned twice daily to the satisfaction of the Public Works Director.

4.0 EXISTING UTILITIES AND STRUCTURES: It will be the Contractor's responsibility to exercise all caution in the vicinity of any utility. The Contractor shall be fully responsible for, and make good all damages to buildings, telephone or other cables, sewers, water pipes, pavement, driveways, walls, sprinkler systems, survey markers, or other structures which may be encountered whether or not shown on the plans. The Contractor shall have a utility check performed prior to any construction.

4.1 The locations of existing utilities have been prepared using the best information available however, the information is not guaranteed. The Contractor shall be responsible for determining the location, character and depth of all utilities. The Contractor shall be responsible for and make good all damages to all pavement structures and utilities which may be encountered whether or not shown on the plans. The cost of restoration shall be included in the unit price stated in the proposal for the related work. No extras for restoration will be allowed.

4.2 The Contractor shall protect from damage all utilities, structures, surface and subsurface structures at or near the site of the work and shall repair or restore any damage to such facilities, except utilities, resulting from failure to comply with the requirements of this contract or the failure to exercise reasonable care in the performance of the work. If the Contractor fails or refuses to repair any such damage promptly, the City may have the necessary work performed and charge the cost thereof to The Contractor.

4.3 At points where The Contractor's operations are adjacent to utility facilities, which if damaged, might result in expense, loss, disruption of service or other undue inconvenience to the public or to the Owner, work shall not be commenced until all arrangements necessary for the protection thereof have been made by the Contractor. The Contractor shall be solely and

directly responsible to the Owner and operators of such utilities for any damage, injury, expense, loss, inconvenience, or delay caused by The Contractor's operations.

4.4 The Contractor shall not repair or attempt to repair utility damage but shall immediately contact the utility owner. The Contractor shall obtain the name, address, and telephone number of each utility company to contact. The Contractor shall submit to the Engineer these said names and addresses.

4.5 The Contractor shall comply with the Florida Building Code and City Code regarding precautions to be taken in the protection of existing vegetation, structure, utilities, and improvements.

4.6 The Contractor shall maintain access to fire hydrants and alarm boxes throughout the prosecution of the work. Hydrants and fire alarm boxes shall be kept clear and kept visible at all times unless approved otherwise. If visibility cannot be maintained, The Contractor shall provide clearly visible signs showing the location of the fire hydrant and fire alarm boxes.

4.7 The Contractor shall comply with the requirements of the Clean Air Act and the Federal Water Pollution Control Act as well as other requirements specified in those regulations and guidelines listed thereunder.

5.0 EXISTING LANDSCAPING: The Contractor shall be fully responsible for maintaining in good condition, existing trees, grass and shrubs situated within the designated right-of-way, project site or on private property adjacent to the work.

6.0 EXISTING SIGNS AND UTILITY CASTINGS: All existing signs and utility castings shall be preserved and shall remain the property of the City of Opa-Locka. Those not reused shall be delivered to the Opa-Locka Public Works Yard at 12950 NW 42 Ave in Opa-Locka, FL 33054.

7.0 STOCK PILING MATERIALS: Contractor shall not stockpile materials at the project site unless approved in writing by the Engineer.

8.0 PERMITS: The Contractor shall obtain all required occupational licenses and permits, etc., and pay all required fees. Permits issued by the City will be issued without charge to the Contractor.

9.0 EXTRAS: Bills for extras will be allowed only when work is ordered in writing and approved by the Public Works Director. No money will be allowed for extra work unless approved in writing, beforehand, by the Public Works Director.

10.0 CLEANING UP: The Contractor will be required to leave the work and adjacent areas free of any accumulated rubbish or surplus materials on a daily basis, unless

otherwise directed by the Public Works Director. In the event of failure or undue delay on the part of the Contractor, the City may employ such equipment and labor as may

be necessary, and charge such costs against the Contractor and deduct the amount from the monies due the Contractor for work performed.

11.0 RESTORATION: The Contractor shall complete all restoration as the work is completed but in no event later than five (5) working days.

12.0 TESTING: The Engineer or other person designated by the Public Works Director to supervise the work shall have the right at any time to have tests made on any material used on the job. All expenses for tests shall be borne by the City of Opa-Locka, except the cost of re-testing materials which failed to meet the specifications and waiting time due to Contractor failure to be ready for tests when scheduled. The cost and scheduling of such re-testing shall be the responsibility of the Contractor. All re-testing shall be done by the testing laboratory which test the failed samples. The Contractor will inform the City of his source of materials with sufficient time to secure the necessary samples and perform the necessary tests. The Contractor shall request and receive inspections of specific phases of work as required elsewhere in these specifications. The Contractor shall provide current modified proctor test results for all fill material used on the job.

13.0 PAYMENT: Payment will be made in full compensation for all work performed, materials, labor, tools and equipment furnished, and incidental expenses necessary to complete the work. Payment shall be made on 90% of the monthly estimate and upon the presentation of partial releases of lien. Final payment shall be made upon presentation of a completion statement, receipt of the final releases of lien, receipt of as-built drawings and after final acceptance by the City.

14.0 ACCEPTANCE: Acceptance by the City shall not relieve the Contractor of the responsibility of correcting any defective part of the work resulting from either workmanship or materials or replacing or repairing damaged property resulting from any phase of the Contractor's work.

15.0 GUARANTEE: The Contractor shall guarantee all materials and workmanship for a period of one year from the date of **acceptance** by the City.

16.0 LINE AND GRADE: Where required as determined by the Engineer, the City will establish a base line and reference elevations. All additional lines and grades required for completion of the work shall be furnished at the Contractor's expense.

17.0 TRAFFIC MAINTENANCE: The Contractor shall provide all temporary signing, striping, detouring, barricading, signals, competent flagmen, etc. required in accordance with the minimum requirements of the latest Manual of Uniform Traffic

Control Devices, whenever and wherever needed for pursuance of the project, and/or

as directed by the Engineer. The Contractor shall also coordinate these operations with the City of Opa-Locka Public Works Department. The Contractor shall supply the Engineer with a traffic maintenance plan.

18.0 PROTECTION OF WORK: It shall be the Contractors' responsibility to protect the public and workmen from ongoing construction hazards.

19.0 UNIFORMED POLICE: The Contractor shall be responsible for obtaining the services of the uniformed police officers as needed or as directed by the Engineer. The Contractor shall be reimbursed for the direct, actual expenses for such uniformed police officers.

20.0 INSPECTION: Inspection will be required during all phases of construction, and it shall be the Contractor's responsibility to contact the Engineer or its representative when any work is being performed. The Contractor shall also be responsible for coordinating all inspections of work performed by Subcontractors. Failure to contact the Engineer/Architect or its representatives to obtain the required inspections shall be sufficient cause for rejection.

21.0 LICENSES: The Contractor and all Subcontractors shall submit at the time of bidding, copies of all licenses held by the Company that pertain to the type of work to be performed under this contract. Failure to submit copies of licenses is grounds for rejection of the bid.

22.0 CONTACT PERSON: The Contractor shall provide the Engineer with a local (Miami Dade County) telephone number where the Contractor can be contacted 24 hours a day for the duration of the project.

23.0 UTILITY COORDINATION: The City will not be liable for any delay or added expense the Contractor experiences due to the actions of others, nor shall the City be held responsible for any damages which may be incurred, due to the actions of the Contractor or representative.

24.0 EXAMINATION OF PREMISES: Before submitting proposals for his work, each bidder will be held to have examined the premises and satisfied himself as to the existing conditions under which he will be obligated to work, including all conditions which will in any way affect the work under this contract.

25.0 NON-EXCLUSIVE CONTRACT: Nothing in this contract shall prevent the City from employing other contractors to perform the same or similar work. This can include other contractors working concurrently on the same location.

GC-4

THE CITY OF OPA-LOCKA OPA-LOCKA,

FLORIDA

SPECIAL CONDITIONS

1.0 SCOPE OF WORK:

1.1 SESAME STREET CULVERT REPLACEMENT: The work generally consists of but is not necessarily limited to the following: the selling, delivering and installing of Contractor furnished materials and equipment necessary for the complete replacement of a culvert within along Sesame Street between NW 135th Street and Atlantic Avenue. Replacement includes 66-inch Aluminized Steel piping with new curb and gutters, sidewalk, guardrail, and pavement resurfacing with all appurtenant for miscellaneous items and work for a completed project.

2.0 COMPLETE PROJECT REQUIRED: The specifications describe the various items or classes of work required enumerating or defining the extent of same where necessary to clarify the drawings, but failure to list any items shall not relieve the Contractor from furnishing, installing and performing such work where shown on the drawings, required by any part of the specifications or necessary for the satisfactory completion of the project.

3.0 WORK SCHEDULE: The Contractor shall submit schedules which show the order in which the Contractor proposes to carry out the work with dates for starting various parts of the work and estimated completion dates. The progress schedule s shall be furnished to the Engineer prior to the pre-construction meeting date which will be established by the City.

4.0 PRE-CONSTRUCTION MEETING: After the contract has been awarded and signed, but prior to commencement of work, a pre-construction meeting shall be held. The meeting shall be attended by authorized representatives of the City and Contractor. The purpose of this meeting will be to review the Contractor's submitted progress schedule, clarify jurisdiction and to acquaint all parties present with the authorized representative to be notified. The Contractor will be notified in writing as to the date and place of the meeting.

5.0 AS-BUILT INFORMATION: As work progresses, the Contractor must record all information pertaining to changes and deviations from the contract drawings with special attention to all underground installations. At completion of the job, the Contractor shall submit a complete set of reproducible as-built drawings to the City. Additionally, the Contractor shall maintain a field book with all deviations recorded.

The completed as-built sketches and field books shall become the property of the City. As-built information must be supplied with each pay request. Failure to provide as-built information is cause to reject pay request.

6.0 LIQUIDATED DAMAGES: Should the Contractor, or in the case of default, the surety, fail to fully complete the work within the time stipulated in the proposal, the minimum

sum of five hundred dollars ($500.00) per day shall be deducted from any money due the Contractor not as a penalty but as liquidated damages.

7.0 APPROVAL OF MATERIALS:

7.1 Whenever in these plans and/or specifications a certain brand of materials is specified, it is done for establishing the level of quality, capacity and the characteristics desired. Materials or products specified by the name of manufacturer or the brand or trade name or catalog reference shall be the basis of the bid.

7.2 The Contractor shall make written request for the use of alternate materials within ten (10) days after the Contract is signed, and before ordering any materials requiring approval. If the Contractor makes no request for approval of alternate materials within ten (10) days of the signing of the Contract, it shall be assumed that he intends to furnish the items specified.

7.3 The use of materials other than that specified without the written approval of the Engineer shall be sufficient reason for rejection of the work.

8.0 USE OF PUBLIC STREETS: Construction in the right-of-way or streets shall be performed in such a manner as to provide a minimum of inconvenience to the residents of the area. Access to all residents' homes shall be maintained at all times. A minimum of one traffic lane shall be open at all times.

9.0 STRIPING:

9.1 Temporary striping shall be placed within 48-hours of completion of each course of asphalt unless another course is placed within 48-hours. The cost of temporary striping shall be included in the unit cost of permanent thermoplastic striping.

9.2 Permanent thermoplastic striping shall be placed within 30 days of completing final paving unless otherwise approved by the Engineer.

10.0 RESTORATION OF SURVEY MARKERS: When existing survey markers are removed or destroyed as a result of the construction, it shall be the responsibility of the contractor to replace them using a registered licensed surveyor.

11.0 PROJECT LAYOUT: The Contractor shall layout the proposed work and contact all utilities to verify utility locations. If changes are required, due to conflict or design, the Engineer will make the final determination.

12.0 WORKING HOURS: The normal City working hours are Monday through Friday 8:00 a.m. until 5:00 p.m.

13.0 FINANCIAL STATEMENT: As part of the Contractor's submittal, he/she shall include a certified financial statement detailing the company's financial status over the previous two years.

14.0 NOTICE TO PROCEED: A single notice to proceed will be issued for this project. Upon receipt of the notice to proceed, the contractor shall commence work upon the site(s) within 10 working days and continue such work in an expeditious manner to a conclusion acceptable to the Engineer. No more than 7 consecutive days without construction activity will be allowed unless approved by the Engineer.

15.0 ENVIRONMENTAL PROTECTION:

General Requirements – The Contractor shall provide and maintain environmental protection during the life of the Contract. Environmental protection shall be provided to correct conditions that develop during the conductance of the work, or that are required to control pollution that develops during the development of project. The Contractor's operations shall comply with all Federal, State and local regulations pertaining to water, air, solid waste, and noise pollution.

Protection of Natural Resources – It is intended that the natural resources within the site and outside the limits of permanent work performed under this Contract be preserved in their existing condition or be restored to an equivalent or improved condition upon completion of the work. The Contractor shall confine his work activities to areas defined by the Contract Documents. All work under this contract shall be performed in such a manner that any adverse environmental impacts are reduced to a level that is acceptable to the City. At all times special measures shall be taken to prevent oily or hazardous substances from entering the ground, drainage areas, or local bodies of water.

Control and Disposal of Wastes – The Contractor shall transport and dispose of all waste in a manner that complies with Federal, State, and local requirements. The Contractor shall provide the Engineer with a copy of any state and/or local permits or licenses which reflect such agency's approval and compliance with applicable solid waste disposal regulations. The permits or licenses which reflect such agency's approval and compliance with applicable solid waste disposal regulations. The permits or licenses and the location of the disposal area shall be provided prior to transporting any waste material. Fueling and lubricating of equipment and motor vehicles shall be conducted in a manner that affords the

maximum protection against spills and evaporation. Lubricants and waste oil shall be disposed of in accordance with approved procedures meeting Federal, State and local regulations.

Preservation of Water Courses – The Contractor shall maintain the working area free of excess debris and litter. Furthermore, the Contractor shall take all necessary precautions to protect the Canal waterway in a manner that complies with Federal, State, and local requirements.

The maximum use of low-noise emission products as certified by the Environmental Protection Agency shall be made when available.

16.0 SAFETY: The Contractor shall be responsible for the safety of the Contractor's employees. The Contractor shall abide by all Federal, State, County, and City safety requirements and regulations. The Contractor is responsible to furnish the Contractor's employees with all required safety equipment. The Contractor is required to comply with all applicable OSHA regulations including, Right to Know, Confined Space Entry, Airborne Blood Pathogens.

The Contractor is fully responsible to furnish safety equipment to all of the Contractor's employees on the Owner's job site, including but not limited to safety glasses, gloves, vests, hard hats, braces or any other required safety item. The Contractor is required to make certain that each employee is wearing the proper safety clothing including shoes.

17.0 CONFINED SPACE ENTRY PERMIT: The Contractor must comply with all the provisions contained in OSHA 1910.146 and shall show proof of compliance with the first project invoice. No payment shall be made until such proof is presented and approved by the City.

TECHNICAL SPECIFICATIONS

DIVISION 1 – GENERAL REQUIREMENTS

01010 SUMMARY OF WORK

PART 1 – GENERAL 1.0.1

SCOPE OF WORK

A. This section describes the project in general and provides an overview of the extent of the work to be performed under this Contract. Detailed requirements and extent of work is stated in the applicable Specification sections and shown on the Contract Drawings. The Contractor shall, except as otherwise specifically stated herein or in any applicable parts of the Contract Documents, provide and pay for all labor, materials, equipment, tools, construction equipment, and other facilities and services necessary for proper execution, testing, and completion of the work under this Contract.

1.0.2 DEFINED TERMS

A. As-Built Drawings: As-built drawings reflect field changes and construction modifications to the conformed Bid Documents.

B. Contract Documents: Shall mean all those documents named in the contract.

C. Contractor: Contractor shall mean any person engaged to supply labor, materials or equipment for use in the fulfillment of the project.

D. Construction Drawings: Shall mean the drawings, plans, or reproduction thereof which show scope, character, location, dimensions, and other details of the work to be performed under the Contract Documents.

E. Engineer: Shall mean the City Engineer of the City of Opa-Locka, Public Works Department, or City's designee.

F. Project: Shall mean and include all construction, for which the Contractor is responsible under the contract documents

G. Regulations: Shall mean laws, ordinances, statutes, and lawful order issued by authorities having jurisdiction, and rules, conventions, and agreements within the construction industry that control performance of the work.

H. The City: Shall mean the City of Opa-Locka, Florida.

I. Work: Shall mean all labor, permits, bonds, equipment, materials and incidentals required.

1.0.3 SPECIFICATIONS

A. The specifications included in these Contract Documents establish the minimum performance and quality requirements for materials and equipment together with the minimum standards for quality of workmanship and appearance. Generally, there has been no attempt to separate the Specification sections into groups for the work of separate Subcontractors, or for work to be performed by the various trades. Should there be any question as to the interpretation of any Specification section or part of Specification section, such question should be directed to the Engineer prior to the submittal of a proposal for the work under this Contract.

B. The Sesame Street Culvert Replacement work shown on the drawings is intended to be comprehensive and descriptive, not an exact and complete representation of the actual finished work. Pipeline replacement shall include all accessories and components required to provide a complete and satisfactory system as specified, even though some items may not be specifically shown on the drawings.

C. It is the intent of the City to obtain a complete functional, and satisfactory installation under this Contract, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the plans or stated herein.

D. The Contractor shall also supply all sheeting, shoring, bracing and all other labor, material or equipment required to preclude damage to, or loss of functionality of, any existing facility or system.

1.0.4 REASONABLY IMPLIED PARTS OF THE WORK

A. Any part of the work which is not mentioned in the specifications but is shown on the drawings, or any part not shown on the drawings but described in the specifications, or any part not shown on the drawings nor described in the specifications, but which is necessary or normally required as a part of such work, or is necessary or required to make each installation satisfactorily and legally operable, shall be performed by the Contractor as incidental work, without extra cost to the City, as if fully described in the specifications and shown on the drawings, and the expense thereof shall be included in the applicable unit prices or lump sum bid for the Work.

1.0.5 DESCRIPTION OF WORK

A. The project includes the in-kind replacement of the existing culvert with design amendments to ensure adequate conveyance capacity, pedestrian and vehicular transit safety, and proper scour protection. The project would involve the demolition of the existing culvert structure, excavation for new structures, sloped backfill for culvert installation, new concrete pipe culvert, embankment saddle slope stabilization with riprap, new top slab, asphalt pavement restoration, pavement markings, reconstructed sidewalk, and new guard rails.

B. The project is located along Sesame Street, between the intersections with Atlantic Avenue and NW 135th Street, Opa-Locka, Florida 33054.

C. It is the intent of the City to obtain a complete and working installation under this Project and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

1.0.6 PROJECT BACKGROUND

During a recent milling and resurfacing project, it was discovered by the City's contractor that the culvert was in poor condition and would not withstand the work underway. After an assessment, it was recommended to replace the existing culvert structure with a new culvert that will be designed for current system demands and will provide a permanent installation, that maintains safe pedestrian and vehicular traffic, and a provides a prolonged service life. As a result of the damages discovered, Sesame Street is currently closed to traffic, and will remain closed until its replacement is finalized.

1.0.7 WORK COVERED BY CONTRACT DOCUMENTS

A. Following receipt of Notice to Proceed with the work, the Contractor shall notify the Engineer at least ten (10) days before he/she is ready to start actual construction, to allow the City time to make arrangements for inspection of the work.

B. Work under the Contract shall be scheduled and performed in such a manner as to result in the least possible disruption to the operation of the existing facilities. Any control modifications to the existing facilities shall not be made without first obtaining written permission form the Engineer and the City.

C. Critical events in the sequence of construction are specified herein. The outline sequence of construction does not include all items necessary to complete the work but is intended to identify the sequence of critical events necessary to minimize disruption to the ongoing operation. The sequence of construction is a precedence requirement and does not attempt to schedule the Contractor's work. It is intended

only to indicate which activities must precede other activities in order to minimize interference and disruptions.

D. The existing facilities shall be maintained in an operable condition by the Contractor during construction, as indicated in the sequence of construction. All work by the Contractor that disrupts the normal operations shall be shown on the Construction Schedule and specifically scheduled with the City's staff. The schedule notification shall consist of a written notice defining the work to be accomplished, the function that will be interrupted, the duration of the interruption, and the mitigation effort to be performed by the Contractor to maintain systems capacity continuously. The written notice shall be submitted to the City fourteen (14) days in advance of the proposed work and the City will respond to the Contractor in writing within seven (7) days of receipt of the notice regarding the acceptability of the proposed plan.

1.0.8 SEQUENCE OF CONSTRUCTION

A. The general sequence of construction shall be as follows, but **a detailed sequence of construction shall be submitted by the Contractor and approved by the Engineer before any work is started**. The City reserves the right to make changes to the sequence as necessary to facilitate the work or to minimize conflict with operations and no extra compensation will be allowed.

B. CAPITALIZED ITEMS INDICATE WORK OR FUNCTIONS TO BE PERFORMED BY CITY FORCES. All other items shall be performed by the Contractor with special emphasis on the fact that numerous standard and miscellaneous construction phases are not mentioned specifically but shall be performed by the Contractor as required for a complete Project.

Note: For simplicity, the Sequence of Construction below will not detail the following items. **These shall be the responsibility of the Contractor and no extra compensation will be allowed.**

1. Contractor's field verification of all information provided in the Plans and to determine the type, location, elevation and extent of any utilities which may not have been shown on the Plans.

2. Notify "Sunshine State One-Call of Florida Inc., 811," forty-eight (48) hours prior to any excavation. Locate all utilities along the route of the Project.

3. Contractor's operations involving removal of the existing Culvert shall include:

a. Excavate existing Culvert pipes and provide proper flow diversion between the Canal.

4. Installation of new Culvert system, including: piping, mitered end section, backfilling, rip rap placement, and concrete pavement.

5. Construction of concrete curb and gutter, sidewalk, handicap access ramp, and guardrails.

6. Milling and resurfacing of pavement extents.

7. Contractor's PSM shall reestablish the design baseline, vertical control points and reference points, and establish proposed pipeline location in accordance with Section 02314 "Excavation, Backfill and Fill for Structural Facilities and Utility Systems - Construction Methods."

8. After items 6 and 7 are completed, the Contractor shall meet with the City Inspector at the Project site and perform a pre-construction walk-through along the entire route of the Project to identify possible problems or conflicts with the proposed pipeline location.

9. The general sequence of work shall be as follows:

1) Phase I – Mobilization

Step – 1 Initiate mobilization. The Contractor shall set up storage, staging and parking areas, temporary environmental controls and tree protection devices in the project site. Obtain permits, develop and submit construction schedule and start shop drawing submittal. Contractor shall allow access to the other facilities within the project area, including adjacent businesses and homes at all times during construction.

Step – 2 Call for locates (Sunshine 811) and document all location marks in the field.

Step – 3 Contractor shall include the necessary provisions to safeguard the existing utilities noted within the project area. Furthermore, the Contractor shall be advised that the utilities shown on plans are based on best available information and shall take all necessary precautions to confirm, identify, preserve, and maintain the integrity while performing construction.

Step – 4 Contractor shall **immediately** open a dialog with all existing utilities in the project area. Contractor shall notify Engineer of any utility relocation requirements and costs. Utility relocations shall be reimbursed under a dedicated allowance account. Failure to properly coordinate any required utility relocations may result in delays for which the Contractor may be liable for.

Step – 5 Verify locations, elevations, dimensions, manufacturer of pipes, equipment, etc., before ordering materials to complete the work in accordance with the Contract Documents, Shop Drawings and field conditions.

Step – 6 Upon approval of shop drawings, order long lead items so that materials may be delivered in a timely fashion without delays to construction.

2) Phase II – Demolition of Existing Culvert and Appurtenances NOTE: Refer to Drawings, Sheets C-01 and C-02

Step – 1 Installation of all Erosion Control measures within the Canal.

Step – 2 Removal of existing concrete pavement, concrete headwall, and culvert piping.

Step – 3 Prepare temporary bypass system, if necessary, to divert Canal flows from East to West and vice versa. After successful flow diversion and authorization by the City; the Contractor shall proceed with the installation of the removal of the existing Culvert piping.

3) Phase III – New Culvert Installation

Step – 1 Prepare bedding material to lay stone base for new piping.

NOTE: The Contractor shall provide appropriate shoring to conduct the stone bedding and 66-inch SRASP pipe installation in dry conditions.

Step – 2 Secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations.

Step – 3 The Contractor shall secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations and up to elevation established on plans. Embankment slopes shall be established.

Step – 4 Install concrete headwall at pipe ends.

Step – 5 Install geotextile matting and, sand-cement and Rubble Stone embankment stabilization.

Step – 6 Lay new concrete curb and gutter and sidewalk.

Step – 7 Install new guardrail.

Step – 8 Install new concrete shoulder barrier

4) Phase IV – Final Sitework and Project Closeout

Step – 1 Form and pour the 8" thick concrete pavement surface above Culvert piping.

Step – 2 Lay new concrete curb and gutter and sidewalk.

Step – 3 Mill and resurface top 1" surface course of roadway.

Step – 4 Paint roadway pavement markings and remove temporary construction signage.

Step – 5 Demobilization and related closeout activities shall be in accordance with section 01700 "Project Closeout".

Step – 6 Complete all remaining miscellaneous and appurtenant work, including restoration of damaged survey control points, landscape restoration and final inspection and cleanup.

C. The Contractor's equipment must be in first class operating condition, including proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment. The Contractor shall provide a temporary electric service for his electric equipment as specified herein below, and shall pay all cost thereof, including all charges for electricity used during the entire course of the project until its acceptance by the City. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

END OF SECTION

01011 SITE CONDITIONS

PART 1 – GENERAL

1.0.1. SITE INVESTIGATION

A. The Contractor acknowledges that he has satisfied them as to the nature and location of the work, the general and local conditions, particularly those bearing upon availability of transportation: disposal, handling and storage of materials; availability of labor, water, electric power, roads; disposal of water from construction; uncertainties of weather; the conformation and conditions of the ground; the type of equipment and facilities needed preliminary to and during the prosecution of work and all other matters which can in any way affect the work or the cost thereof under this contract.

B. The Contractor further acknowledges that he has satisfied himself as to the character, quality, and quantity of surface materials to be encountered from inspecting the site and from evaluating information derived from exploratory work that may have been done by the City included with these contract documents. Any failure by the Contractor to acquaint the City or them with all the available information will not relieve them from the responsibility for properly estimating the difficult or cost thereof under this Contract.

C. The Contractor acknowledges that by personal field observation or other means satisfactory to himself, performed prior to the bid, he has included in the prices bid all costs for dealing with all construction problems create by observable above or on grade features on or adjacent to the site of the site of the work whether or not these features are shown on the plans or described in the specifications. In instances where the observable features indicate subsurface conditions which may affect the project work, as for example, a pavement patch or catch basin gratings indicating respectively a utility or storm sewer not shown on the plans, the Contractor acknowledges that he has made timely, diligent, inquiry of the Engineer or by other means fully satisfied themselves prior to the bid as to the nature of, and costs created by, the subsurface condition and included all costs therefore in the prices bid.

1.0.2. SITE CONDITIONS

A. All information obtained by the City regarding the site conditions, topography, subsurface information, groundwater contamination, groundwater elevations, existing construction of site facilities as applicate, and similar data will be made available for inspection at the office of the Engineer upon request. Such information is offered as advisory information only. Neither the Engineer nor the City assumes any responsibility for the completeness of, or for the Contractor's interpretation of, such advisory information. Prior to bidding and after written approval from the City, bidder

shall make his own investigations to satisfy themselves with site conditions at their own cost.

B. Surface investigations, including test borings, have been made to indicate subsurface conditions at locations in the project.

C. Prospective bidders are advised, at their own expense, to make such subsurface investigation, by boring or test hole excavation, as may be desirable. However, such work shall be scheduled by appointment with the Engineer if for a City site or by notification to the City and property permitted if in the public right of way.

1.0.3. DIFFERING SUBSURFACE CONDITIONS

A. In the event Subsurface or latent physical conditions are found materially different from those indicated in these documents and differing materially from those ordinarily encountered and generally recognized as inherent in the character of work covered in these project documents, promptly, and before such conditions are disturbed, notify the Engineer in writing of such changed conditions.

B. The Engineer will investigate such conditions promptly and following this investigation, the Contractor shall proceed with the work, unless otherwise instructed by the Engineer. If the Engineer finds that such conditions do so materially differ as to cause an increase or decrease in cost and time considered reasonable by the Engineer, the City will make the final decision regarding any adjustment in cost or time for completion.

C. In the event that site conditions differ from those expected by the Contractor, the Contractor shall proceed to complete the work as contemplated by the plan and specifications on his own cost and expense. If in the discretion of the Engineer, the difference in site conditions renders completion of the work as described by the plans and specifications impossible, the Engineer may alter the work, whereupon the Contractor shall be compensated for any extra work pursuant to "Extra Work and Payment therefore" of the special conditions; the Engineer shall no alter the work where the site conditions render the work more difficult or costly to perform, if such work is otherwise still possible as described in the contract documents.

1.0.4. EXISTING UTILITIES AND LOCATION SERVICES

A. Known utilities and structures adjacent to or encountered in the work are shown on the drawings. The locations shown are taken from existing records and the best information available from the existing plans; However, it is expected that there may be some discrepancies and omissions in the locations and quantities of utilities and structures shown. Those shown are for the convenience of the Contractor only, and no responsibility is assumed by either the Engineer or the City for their accuracy or completeness.

B. **No request for additional compensation or Contract time (except for a noncompensable time extension at the sole discretion of the Engineer, whose decision shall be final) resulting from encountering utilities or structures not shown, or differing in location or elevation from that shown, will be considered. The Contractor shall explore sufficiently ahead of the work to allow time for any necessary adjustments without delay to the progress of the installation. Costs due to delays occasioned by encountering underground utilities or structures which could have or should have been discovered by timely exploration ahead of the work shall rest solely with the Contractor.**

C. Prior to proceeding with excavation, the Contractor shall contact all utility companies and all other users of the right of way in the area to aid in locating their underground services. It shall be the Contractor's responsibility to contact utility companies at least three (3) normal working days before starting construction. The Contractor shall proceed with caution in the excavation and preparation so that the exact location of underground utilities may be determined.

D. It is the responsibility of the Contractor to ensure that all utility or other existing facilities, the stability of which may be endangered by the close proximity of excavation, are temporarily held in position while work proceeds in the vicinity of the facilities and that the utility or other companies concerned be given reasonable advance notice of any such excavation by the Contractor.

E. The Contractor shall take all reasonable precautions against damage to existing utilities. However, in the event of a break in an existing water main, gas main, sewer or underground cable, the Contractor shall immediately notify the responsible official of the organization operating the interrupted utility. The Contractor shall lend all possible assistance in restoring services and shall assume all cost, charges, or claims connected with the interruption and repair of such services, as determined by the City.

1.0.5. CONTRACTOR'S RESPONSIBILITY FOR UTILITY PROPERTIES AND SERVICE

A. Where the Contractor's operation could cause damage or inconvenience to railway, telephone, fiber optic, television, electrical power, oil, gas, water, sewer, irrigation system, or any other utility, public or private, the Contractor shall make all arrangements necessary for the protection of these utilities and services.

B. Notify all utility companies that are affected by the construction operation at least fortyeight (48) hours in advance. Under no circumstance expose any utility without first obtaining permission from the appropriate agency. Once permission has been granted, locate, expose, and provide temporary support for all existing underground utilities and utility poles where necessary. **Absolutely no extra compensation will be allowed for construction problems created by utility poles of whatever size, overhead electric, telephone or other lines whether shown on the plans or not. The Contractor is solely responsible for discovering such items in the field prior to bidding and including all costs for such work in the prices bid.**

C. The Contractor and his Subcontractor shall be solely and directly responsible to the Owners and operators of such properties for any damage, injury, expense, loss, inconvenience, delay, suits, actions, or claims of any character brought because of any injuries or damage which may result from the construction operations under this contract.

D. Neither the City nor its officers or agents shall be responsible to the Contractor for damages as a result of the Contractors failure to protect utilities encountered in the work.

E. In the event of interruption to domestic water, sewer, storm drain, or other utility services as a result of accidental breakage due to construction operations, promptly notify the proper authority. Cooperate with said authority in restoration of service as promptly as possible and bear all costs of repair. In no event shall interruption of any utility service be allowed unless granted by the Owner of the utility.

F. In the event water service lines that interfere with construction are encountered, the Contractor may, by obtaining prior approval of the water utility, cut the service, dig through, and restore the service with similar and equal materials at the Contractor's expense and as approved by the Engineer.

G. Replace, with material approved by the Engineer, at Contractor's expense, any and all other laterals, existing utilities or structures removed or damaged during construction, unless otherwise provided for in these Contract Documents and as approved by the Engineer.

1.0.6. INTERFERING STRUCTURES

A. Take necessary precautions to prevent damage to existing structures whether on the surface, above ground, or underground. An attempt has been made to show major structures on the plans. While the information has been compiled from the best available sources, its completeness and accuracy cannot be guaranteed, and is presented as a guide. The Contractor is solely responsible for field verification of all information provided and to determine the type, location, elevation and extent of any utilities which may not have been shown on the plans.

1.0.7. FIELD RELOCATION

A. During the process of construction, it is expected that minor relocations of the work may be necessary. Such relocations shall be made only by the direction of the Engineer at the Contractor's expense. If existing structures are encountered that will prevent construction as shown, notify the Engineer before continuing with the work in order that the Engineer may make such field revisions as necessary to avoid conflict with the existing structures. If the Contractor fails to notify the Engineer when an existing structure is encountered, and proceeds with the work despite this interference the Contractor does so at his own risk.

B. Representatives of utility companies, the railroad companies, the traffic and transportation authorities, etc., shall be notified in accordance with the provisions set forth in the relevant sections of the specifications and the permitting documents.

01015 INDEX OF DRAWINGS

PART 1 – GENERAL 1.0.1.

PLANS BY THE CITY

A. Plans dated November 2022 and any subsequent revision, thereto, introduced by Addenda prior to bid, showing this work, are hereby made a part of the Contract Documents, and are **listed** as follows:

OPA-LOCKA CULVERT REPLACEMENT

Sheet No.	Drawing No.	Title
GENERAL		
G-01		TITLE SHEET, LOCATION AND LIST OF DRAWINGS
G-02		ABBREVIATION, SYMBOLS, GENERAL NOTES AND LEGENDS CIVIL
C-01		DEMOLITION AND EROSION CONTROL PLAN
C-02		DEMOLITION AND EROSION CONTROL NOTES AND DETAILS
C-03		PROPOSED SITE PLAN & GRADING PLAN
C-04		PAVEMENT RESTORATION PLAN
C-05		PAVEMENT MARKING AND SIGNAGE
C-06		MOT PLAN
C-07		MOT DETAILS
C-08		STANDARD DETAILS
C-09		STANDARD DETAILS
C-10		STANDARD DETAILS
C-11		STANDARD DETAILS
S-1		PIPE CULVERT STRUCTURAL DETAILS
S-2		PIPE CULVERT STRUCTURAL DETAILS

B. **Due to the possibility of typing errors or omissions, the above list shall not be considered as necessarily complete, nor shall the County/FDOT Standard Details which may be included elsewhere herein be considered as forming a complete listing of all County/FDOT Standard Details which may apply to this Project. Perform all work shown on all sheets of the Plans, as specified herein or necessary for a complete functional installation and no extra compensation will be made due to the omission or incorrect listing of a Drawing in this Section. All County/FDOT Standard Details are incorporated in these Contract Documents by reference and all work shall be performed in accordance with all applicable County/FDOT Standard Details.**

01016 SAFETY REQUIREMENTS, HURRICANES PREPAREDNESS AND PROTECTION OF PROPERTY

PART 1 – GENERAL

1.0.1. CONTRACTOR'S RESPONSIBILTY FOR SAFETY

A. Conduct whatever work is necessary for safety and be solely and completely responsible for conditions of the job site, including safety of all persons (including employees) and property during the contract period. This requirement shall apply continuously and not be limited to normal working hours.

B. The Contractor shall be in compliance with all applicable provisions of the Occupational Safety and health Act of 1970. The Contractor's Manual of Safety Practices, dealing with the firm's policies on field safety procedures for employees shall be submitted to the Engineer for his review before "Notice to proceeded" will be issued.

C. Neither the professional activities of the design professional, nor the presence of the design Professional nor his or her employees and subconsultants at a construction site, shall relieve the Contractor and any other entity of their obligations, duties and responsibilities including but not limited to, construction means, methods, sequence techniques or procedures necessary for performing, superintending, or coordinating all portions of the work of construction in accordance with the project documents and any health and safety precautions required by any regulatory agencies.

1.0.2. FEDERAL STATE AND LOCAL SAFETY REQUIEREMENTS

A. Safety provisions shall conform to the federal and state Departments of labor Occupational Safety and Health Act (OSHA), and all other applicable federal, State, County, and local laws, ordinances, codes, the requirements set forth herein, and any regulations that may be specified in other parts of these project Documents. Where any of these are in conflict, the more stringent requirements shall be followed. Contractor's failure to thoroughly familiarize with the safety provisions shall not relieve him/her from compliance with the obligations and penalties set forth therein.

B. All excavations made in the earth shall be performed in compliance with the State of Florida Trench Safety Act, OSHA 29 CFR 1926 Subpart P (Chapter 90-96, Laws of Florida). The Contractor shall appoint a *competent person*, in accordance with subpart P, who shall be present at the jobsite. A "competent person" shall mean one who is capable of identifying existing and predictable hazards in the surroundings, or working conditions which are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt corrective measures to eliminate them.

C. The Contractor shall be familiar with the "Underground facility Damage" Prevention and safety Act" Florida Statute 556. The Contractor shall contact the Sunshine State One Call of Florida, at 01-800-432-4770 or by submitting an internet ticket entry via www.sunshine811.com) at least 48 hours prior the excavation. Failure to familiarize himself with the safety provisions shall not relieve him/her from compliance with the obligations and penalties set forth therein.

D. Conduct operations in such a manner utilizing warning devices, such as traffic cones, barricades and warning lights that traffic, pedestrian and City personnel are given adequate warning of hazards of the worksite as may be deemed necessary by the City, Engineer of Record, and governing agency having jurisdiction over the work or political subdivision.

E. The Contractor shall be in compliance with all applicable provisions of the OSHA Code of Federal Regulations (CFR), including, but not limited to, the following:

1. 29 CFR Part 1910 Subpart D - Walking-Working Surfaces
2. 29 CFR Part 1910 Subpart G - Occupational Health and Environmental Control
3. 29 CFR Part 1910 Subpart H - Hazardous Materials
4. 29 CFR Part 1910 Subpart I - Personal Protective Equipment
5. 29 CFR Part 1910 Subpart J - General Environmental Controls
6. 29 CFR Part 1910 Subpart N - Materials Handling and Storage
7. 29 CFR Part 1910 Subpart P - Hand and Portable Powered Tools and Other Hand-Held Equipment
8. 29 CFR Part 1910 Subpart Q - Welding, Cutting and Brazing
9. 29 CFR Part 1910 Subpart S – Electrical
10. 29 CFR Part 1910 Subpart T - Commercial Diving Operations
11. 29 CFR Part 1910 Subpart Z - Toxic and Hazardous Substances
12. 29 CFR Part 1926 Subpart E - Personal Protective and Life Saving Equipment
13. 29 CFR Part 1926 Subpart H - Materials Handling, Storage, Use, and Disposal
14. 29 CFR Part 1926 Subpart I - Tools - Hand and Power
15. 29 CFR Part 1926 Subpart J - Welding and Cutting

16. 29 CFR Part 1926 Subpart K – Electrical

17. 29 CFR Part 1926 Subpart L – Scaffolds

18. 29 CFR Part 1926 Subpart M - Fall Protection

19. 29 CFR Part 1926 Subpart P – Excavations

20. 29 CFR Part 1926 Subpart Q - Concrete and Masonry Construction

21. 29 CFR Part 1926 Subpart S - Underground Construction, Caissons, Cofferdams, and Compressed Air

22. 29 CFR Part 1926 Subpart Z - Toxic and Hazardous Substances

23. 29 CFR Part 1926 Subpart AA - Confined Spaces in Construction

24. 29 CFR Part 1926 Subpart CC - Cranes and Derricks in Construction

F. In addition, the Contractor shall adhere to any other applicable Federal, State and Local Safety and Health Regulations involving General industry and/or Construction Standards not mentioned in the Specifications.

G. For trench excavations in excess of five (5) feet in depth, the Contractor shall comply with the provisions of Florida Statutes Chapter 553, Part III, "Trench Safety Act," the "Trench Safety Act" section of the Quotation, and Section 6.01 "Excavation."

H. The Contractor shall comply with the provisions of Florida Statutes Chapter 556, "Underground Facility Damage Prevention and Safety Act." The Contractor shall contact Sunshine 811 by calling 811 or 1-800-432-4770, or by submitting an internet ticket entry via www.sunshine811.com, at least forty-eight (48) hours prior to any excavation. Failure to familiarize himself with the aforementioned safety provisions shall not relieve him from compliance with the obligations and the penalties set forth herein.

I. All open excavations made in the earth shall be performed in compliance with OSHA 29 CFR Part 1926 Subpart P - Excavations, and Florida Statutes Chapter 553, Part III, "Trench Safety Act." The Contractor shall appoint a "competent person," in accordance with Subpart P, who shall be present at the job site. A "competent person" shall mean one who is capable of identifying existing and predictable hazards in the surroundings, or working conditions which are unsanitary, hazardous, or dangerous to

employees, and who has authorization to take prompt corrective measures to eliminate them.

1.0.3. SAFE ACCESS BY FEDERAL, STATE, AND LOCAL GOVERNMENT OFFICIALS

A. The Contractor shall at all time provide proper facilities for safe access to the work by authorized government officials.

1.0.4. CONSTRUCTION SAFETY PROGRAM

A. Develop and maintain for the duration of the project, a safety program that will effectively incorporate and implement all required safety provisions. The Contractor's Manual of Safety practices outlining the firms policies on field safety procedures for employees shall be submitted to the Engineer for review before "Notice to Proceeded" will be issued. The Contractor shall appoint an employee who is qualified and authorized to supervise and enforce compliance with the safety program.

B. Certain products specified in these specifications contain warnings by the manufacturers that under certain conditions, if instructions for use are not followed, a hazardous condition may exist. It is the Contractor's responsibility to instruct his workmen in the safe use of the product, or any product substitution.

C. The duty of the Engineer to conduct construction review of the Contractor's performance is not intended to include a review or approval of the adequacy of the Contractor's Safety Supervisor, the safety program, or any safety measures taken in, on, or near the construction site.

1.0.5. SAFETY EQUIPMENT

A. As part of the safety program, maintain at an office or other well-known place at the jobsite, safety equipment applicable to the work as prescribed by the governing safety authorities, all articles necessary for giving first-aid to the injured, and stablish the procedure for the immediate relocation to a hospital or a doctor's care of any person who may be injured on the jobsite.

B. Perform all necessary work to protect all personnel and the general public from hazard, including, but not limited to, surface irregularities or unramped grade changes, and trenches or excavations. Furnish barricades, lanterns, and proper signs to safeguard all persons and work.

C. There shall be no oil dripping from equipment or oil spills.

D. The material shall be stored and handled in a proper and safe manner and upon its use, immediately dispose of the containers, cans, rags, and remnants of the material in a manner approved by the City of Environmental Resources Management at the Contractor's sole cost. The Contractor is not allowed to store empty containers at the site. In case of any violation, the Engineer will report such violation to DERM, and the Contractor shall be subject to all penalties and fines as required by State and County regulations.

E. The performance of all work and all completed construction, particularly with respect to ladders, platforms, structure openings, scaffolding, shoring, logging, machinery guards and the like, shall be in accordance with the applicable governing safety authorities.

F. During construction, construct and at all times maintain satisfactory and substantial temporary chain link fencing, solid fencing, railings, barricades or steel plates, as applicable, at all openings, obstructions, or other hazards. All such barriers shall have adequate warning lights as necessary, or required, for safety.

1.0.6. STORAGE OF HAZARDOUS MATERIALS

A. The material shall be stored and handled in a proper and safe manner and upon its use, immediately dispose of the containers, cans, rags and remnants of the material in a manner approved by the Department of Environmental Resources Management (DERM) at the Contractor's sole cost. The Contractor is not allowed to store empty containers at the site. In case of any violation, the Engineer will report such violation to DERM and the Contractor shall be subject to all penalties and fines as required by State and County regulations.

B. The Contractor is hereby cautioned that he cannot store any environmentally hazardous materials such as solvents, greases, lubricants or any other type of chemical substances at the Pump Station site. The Contractor shall be allowed to keep only such materials at the site for immediate use.

1.0.7. ACCIDENT REPORTS

A. If death, serious injuries, or series damage are caused, report the accident immediately by telephone or messenger to the Engineer. In addition, the Contractor must promptly report in writing to the Engineer and the City all accidents whatsoever arising out of, or in connection with, the performance of the work whether on, or adjacent to, the site, giving full details and statements of witnesses.

B. If a claim is made by anyone against the Contractor or any Subcontractor on account of any accident, promptly report the facts in writing to the Engineer and the City, giving full details of the claim.

1.0.8. FIRE PREVENTION AND PROTECTION

A. Perform all work in fire-safe manner. Furnish and maintain on the site adequate firefighting equipment capable of extinguishing incipient fires. Comply with applicable federal, local, and state fire-prevention regulations. Where these regulations do not apply, applicable parts of the National Fire Prevention Standard for Safeguarding Building Construction Operations (NFPA No. 241) shall be followed.

1.0.9. HURRICANE PREPAREDNESS

A. During such periods of time as are designated by the United States Weather Bureau as being a hurricane alert, the Contractor shall perform all precautions as necessary to safeguard the work and property, including the removal of all small equipment and materials from the site, lashing all other equipment and materials to each other and to rigid construction, and any other safety measures as may be directed by the Engineer.

B. During the hurricane season, which runs from June 1st to November 30th, it may become necessary to suspend work due to an impending storm until the proper working conditions prevail. In the event of a tropical storm or hurricane, it is the Contractor's responsibility to secure the jobsite in anticipation of the storm.

C. Fifteen (15) days prior to beginning of construction, the Contractor shall submit to the City or designee a Hurricane Preparedness Plan. The plan shall outline the necessary measures that the Contractor proposes to perform in the event of a tropical storm or hurricane in order to protect all work, materials, and equipment from exposure and properly safeguard all components of the project.

D. Prior to the Start of Work: The Contractor shall submit for approval, a plan of action for the specific actions to be taken on this specific project during a hurricane warning. The Contractor shall ensure operation of the by-pass system, if applicable, during the storm event. Backup power shall be included in case of power failure from FPL, as needed.

E. Upon notification of Hurricane Watch:

1. Formal notification to all Contractors to prepare and submit for approval a Plan of Action for the specific actions to be taken on their particular projects.

F. Upon notification of a Hurricane Warning:

1. Formal notification to the Contractors to implement their approved plan of action to protect the project and the public.

2. For pipeline construction projects within the public right-of-ways, the Contractor will be notified by the Construction Manager Office to suspend his construction operations. The Contractor will backfill all open trenches, remove all construction equipment and materials from the right-of-way, remove unnecessary traffic barricades and signs, secure remaining barricades by "half burial" or "double sandbags".

G. Post Disaster Work: In the event of a disaster declaration by the local or state governing authorities, the City may choose to obtain the services of the Contractor to perform work made an imminent priority for the disaster event. The compensation for the additional work caused by the disaster shall be negotiated between the Engineer and the Contractor with written approval provided by both parties prior to mobilization at the designed location or locations. The value of the work performed shall be up to the original contract with contingencies and dedicated allowances.

1.0.10. JOINT SURVEY TO ESTABLISH AUTHENCITY OF POSSIBLE DAMAGE CLAIMS

A. The Contractor shall maintain vertical and horizontal survey control points on all structures and improvements, located in the vicinity of the work prior to beginning work, and shall periodically check the points for movements with copies provided to the Engineer, of the survey notes for each survey and a copy of the layout of the survey control points.

B. After the contract is awarded and before commencement of work, the Contractor shall perform a thorough examination of existing buildings, structures and other improvements in the vicinity of the work, as applicable, which might be damaged by his operations.

1. Examinations of existing structures, buildings, and other improvements in the vicinity of the work shall be done by the Contractor. The scope of the examination shall include cracks in the structures, settlement, leakage, and similar conditions. The City assumes no responsibility for pre-existing conditions of the structure.

2. Records in triplicate of all observations shall be prepared by the Contractor, photographs shall be taken by the Contractor signed and dated, with descriptive information and in the manner specified above. One signed copy of every

document and photograph will kept on file in the office of the Engineer. Video recording also required.

3. The above records are intended to be used as indisputable evidence in ascertaining the extent of any damage which may occur as a result of the Contractor's operations and are for the protection of the Contractor and the City, and will be a means of determining whether and to what extent damage, resulting from the Contractor's operations, occurred during the Contract work.

C. In order to protect himself from being held liable for any existing damaged pavement, including detour routes, the Contractor is advised to notify in writing the authority having jurisdiction over the street where such detective pavement exist prior to proceeding with any work in the vicinity. Preconstruction videos and digital pictures shall be taken with date stamps of the entire area of work. A copy of all such notices shall be forwarded to the City.

1.0.11. TRAFFIC – GENERAL

A. Traffic safety and traffic control devices shall be employed on all private and public construction work withing the public right-of-way. Such measures shall be established and provided in conformance with the following regulations and in conformance with the Miami-Dade County Public Works Manual.

B. For construction within the City's public right-of-way, the Contractor shall submit two sets of construction plans for review to the City of Opa-Locka Public Works Department.

C. All traffic control and warning devices so specified shall, unless otherwise specified by the City be furnished, installed according to the Miami-Dade County Public Works Manual, Part I, Standard Details traffic control and safety by an Uniformed Police Officer, when specified, shall by furnished by the Contractor.

D. The Contractor shall take necessary precautions to ensure complete protection to public health, welfare, and safety. Adequate protection and warning devices shall be placed at locations surrounding work areas to prevent injuries to public properties. Particular emphasis must be placed on safety devices for vehicular traffic. Any work areas that may create a hazard at night shall be well lighted form sunset to sunrise with lamps or lanterns visible from all approaches. All maintenance of traffic signals must be approved by the City.

1.0.12. TRAFFIC SAFETY AND ACCESS TO PROPERTY

A. Comply with all rules and regulations of the City, state, and County authorities regarding closing or restricting the use of public streets or highways. No public or

private roads shall be closed, except by express permission of the City and the controlling authority. Conduct the work to assure the least possible obstruction to traffic and normal commercial pursuits. Protect all obstructions within traveled roadways by installing approved barricades, signs, and lights where necessary for the safety of the public. The convenience of the general public and residents and the protection of persons and property are of prime importance and shall be provided for in an adequate and satisfactory manner.

B. Where traffic will pass over backfilled trenches before they are paved, the top of the trench shall be maintained with temporary asphalt that will allow normal vehicular traffic to pass over. Temporary access driveways must be provided where required. Access to businesses, schools, and homes along the route of the work shall always be provided by the Contractor.

C. Supply flagmen and guards or Police when they are required by regulation, when deemed necessary for safety, or required by the Engineer. Flagmen and Guards shall be furnished with approved orange wearing apparel and other regulation traffic control devices.

D. The Contractor shall be responsible for the maintenance of public streets, detour of traffic (including furnishing and maintaining regulatory and informative signs along the detour route) traffic control and other provisions, throughout the project as required by the City.

E. Traffic shall be maintained according to corresponding typical traffic control details. No streets shall be completely blocked nor blocked more than one-half at any time, keeping the other half open for traffic without specific approval.

1.0.13. TRAFFIC CONTROL AND USE OF PUBLIC STREETS

A. The Contractor shall be responsible for traffic control as specified hereinafter. Any reference to the City, its departments, or its published regulations, permits and data, shall be synonymous and interchangeable with other recognized governing bodies over particular areas of streets or their departments, published regulations, permits, or data. Abide by all applicable laws, regulations and codes thereof, pertaining to maintenance of public streets, detour of traffic, traffic control and other provisions as may be required for this project.

B. The Contractor shall be fully responsible for the maintenance of public streets, detour of traffic (including furnishing and maintaining regulatory and informative signs along the detour route), traffic control and other provisions, throughout the project as required by the City of Opa-Locka Public Works Department. Traffic shall be maintained according to corresponding typical traffic control details as outlined in the

Miami Dade County Public Works Manual. No street shall be completely blocked nor blocked more than one-half at any time, keeping the other half open for traffic without specific approval.

C. If required by the Traffic Division, employ the required number of uniformed off-duty policemen to maintain and regulate the flow of traffic through the construction area. The number of men required and the number of hours on duty necessary for the maintenance and regulation of the traffic flow shall be subject to their approval. If required for traffic control permits or agencies, the Contractor shall work odd or night hours, as required for traffic control reasons, and the cost of such work shall be considered as incidental to construction.

D. The Contractor shall provide all barricades and/or flashing warning lights necessary to warn motorist of the construction throughout the project.

E. Excavated or other material stored adjacent to or partially upon a roadway pavement shall be adequately marked for traffic safety at all times. Provide necessary access to all adjacent property during construction.

F. The contractor shall be responsible for the provision, installation and maintenance of all traffic control and safety devices, in accordance with specifications outlined in the Miami Dade County Public Works Manual. In addition, provide for the resetting of all traffic control and information signing removed during the construction period.

G. Where excavations are to be made in the vicinity of signalized intersections, attention is directed to the fact that vehicle loop detectors may have been embedded in the pavement. Verify these locations by inspecting the site of the work and by contacting the Sunshine 811, at 1-800-432-4770, (or by submitting an internet ticket entry via www.sunshine811.com). Any loop detector which is damaged, whether shown on the plans or not, shall be repaired or replaced to the satisfaction of the Traffic Division.

H. Notify the Traffic Division 24 hours in advance of the construction date, and 48 hours in advance of construction within any signalized intersection.

I. Temporary pavement will be required over all cuts in pavement areas, and also where traffic is to be routed over swale or median areas. When the temporary pavement for routing traffic is no longer necessary, it shall be removed, and the swale or median area restored to their previous condition.

1.0.14. WORKING IN CONFINED SPACES

A. Where a Contractor needs to work in a confined space, the Contractor must comply with the General Industry, OSHA Confined Space Standard, 29 CFR 1910.146 or the equivalent Confined Space Standard in CFR 1926, Safety and Health Regulations for Construction Standards.

PART 2 PRODUCTS NOT

USED

PART 3 EXECUTION

END OF SECTION

01018 ENVIRONMENTAL CONTAMINATION

PART 1 – GENERAL

1.0.1. ENVIRONMENTAL CONSIDERATINOS

A. For any work conducted in a contaminated area within the project boundaries where hazardous materials or hydrocarbons have been encountered, were previously known to exist, or is suspected by the Contractor or the City Inspector, the Contractor must comply with all applicable requirements of OSHA, EPA, FDEP and Miami-Dade County Regulatory and Environmental Resources Department.

1.0.2. SPECIALIZED CONSTRUCTION AREA

A. Specialized construction areas are defined as areas where contaminants are discovered and require construction by personnel qualified by training and equipped with personal protective equipment for such work.

B. Work in specialized construction areas shall be carried out by personnel qualified by training and equipped for such activities. These personnel shall be either subcontractors with licensing and certification as specialists in this type of construction

or the Contractor's own personnel who have taken and been certified as having passed the required training course(s). Licensing and certifications shall be submitted to the City for verification and shall in all cases be satisfactory to both the City and other authorities with jurisdiction. The Field Health and Safety Technician furnished by the Certified Industrial Hygienist or Environmental Engineer shall be present on the site during all construction in specialized construction areas unless the nature of the work is non-hazardous such that either the Site Specific Health and Safety Plan or the Certified Industrial Hygienist or Environmental Engineer authorizes his absence.

C. Disposal of any contaminated soils and/or groundwater must comply with all applicable federal, state and local requirements.

PART 2 – PRODUCTS

2.0.1. The Engineer of Record shall consult with the City regarding its requirement for material type (including pipe, fitting, gasket, valve interior coating, and the like) to be installed in contaminated areas. **PART 3 – EXECUTION** 3.0.1. INSTALLATION REQUIREMENTS

A. The requirements of this Section shall be closely adhered to in all cases where proposed mains are to be installed in an area of hydrocarbon contamination. These requirements and those imposed by Miami-Dade County Regulatory and Environmental Resources Department or any other agency having jurisdiction an addition to, and take precedence over the City's standard specifications and standard details for ductile iron mains.

B. Contaminated backfill cannot be placed back into an existing trench. Contaminated fill shall be replaced with clean fill, hauled offsite and legally disposed of at a location which can handle the material.

C. The City may require gasketed joints be protected by encasing the entire joint with a hydrocarbon impermeable material. In this case, all joint gaskets shall be protected including those on pipe, fittings, valves, fire hydrants and specialty items.

END OF SECTION

01025 MEASUREMENT AND PAYMENT

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Payment for the various items in the Schedule of Payment items, as further specified herein, shall include all compensation to be received by the Contractor for furnishing all tools, equipment, supplies, and manufactured articles, and for all labor, operations, taxes, materials, commissions, transportation and handling, bonds, permit fees, insurance, overhead and profit, and incidentals appurtenant to the items of work being described, as necessary to complete the various items of the work, all in accordance with the requirements of the Contract Documents, including all appurtenances thereto, and including all costs of compliance with the regulations of public agencies having jurisdiction, including Safety and Health Requirements of the Occupational Safety and Health Administration of the U.S. Department of Labor (OSHA). Such compensation shall also include payment for any loss or damages arising directly or indirectly from the work.

B. The Contractor's attention is called to the fact that the quotations for the various items of work are intended to establish a total price for completing the work in its entirety. Should the Contractor feel that the cost for any item of work has not been established by the Schedule of Payment items or this Section, it shall include the cost for that

work in some other applicable bid item, so that its proposal for the project does reflect its total price for completing the work in its entirety.

1.0.2. SUBMITTALS

A. Informational:

1. Schedule of Values: Submit schedule on City's form.

2. Application for Payment.

3. Final Application for Payment.

B. Submittals shall be in accordance with Section 01300 "Submittals" and the City's standards.

1.0.3. SCHEDULE OF VALUES

A. Prepare a schedule of values for the work.

B. Unit Price Work: Reflect unit price quantity and price breakdown from conformed Bid Form.

C. Lump Sum Work:

1. Reflect schedule of values format included in conformed Bid Form.

2. List Bonds and insurance premiums, mobilization, demobilization, facility startup, and contract closeout separately.

D. An unbalanced or front-end loaded schedule will not be acceptable.

E. Summation of the complete schedule of values representing all the work shall equal the Contract Price.

F. The Contractor shall submit a Schedule of Values for review with the return of the executed Agreement to the Owner. The schedule shall contain the installed value of the component parts of work for the purpose of making progress payments during the construction period.

G. The schedule shall be given in sufficient detail for proper identification of work accomplished. The Schedule of Values shall directly correlate to each activity outlined in the construction progress schedule and the construction network analysis (specified in the section entitled "Submittals") to accurately relate construction progress to the requested payment. Each item shall include its proportional share of all costs including the Contractor's overhead, contingencies and profit. The sum of all scheduled items shall equal the total value of the Contract.

H. If the Contractor anticipates the need for payment for materials stored on the project site or off-site in bonded warehouse, it shall also submit a separate list covering the cost of materials, delivered and unloaded with taxes paid. This list shall also include the installed value of the item with coded reference to the work items in the Schedule of Values. Payment for stored materials shall comply with requirements of General Conditions.

1.0.4. APPLICATION FOR PAYMENT

A. Transmittal Summary Form: Attach one Summary Form with each detailed Application for Payment and include Request for Payment of Materials and Equipment on Hand as applicable. Execute certification by authorized officer of Contractor.

B. Use detailed Application for Payment Form provided by the City.

C. Include accepted schedule of values for each portion of work and the unit price breakdown for the work to be paid on unit price basis, and a listing of Owner-selected equipment, if applicable, and allowances, as appropriate.

D. Preparation:
   1. Round values to nearest dollar.

   2. List each Change Order and Written Amendment executed prior to date of submission as separate line item. Totals to equal those shown on the Transmittal Summary Form.

   3. Submit Application for Payment, including a Transmittal Summary Form and detailed Application for Payment Form, a listing of materials on hand as applicable, and such supporting data as may be requested by Owner.

1.0.5. MEASUREMENT—GENERAL

A. Weighing, measuring, and metering devices used to measure quantity of materials for work shall be suitable for purpose intended and conform to tolerances and specifications as specified in National Institute of Standards and Technology, Handbook 44.

B. Whenever pay quantities of material are determined by weight, material shall be weighed on scales furnished by Contractor and certified accurate by state agency responsible. Weight or load slip shall be obtained from weigher and delivered to the City or City's representative at point of delivery of material.

C. If material is shipped by rail, car weights will be accepted provided that actual weight of material only will be paid for and not minimum car weight used for assessing freight tariff, and provided further that car weights will not be acceptable for material to be passed through mixing plants.

D. Vehicles used to haul material being paid for by weight shall be weighed empty daily and at such additional times as required by the City. Each vehicle shall bear a plainly legible identification mark.

E. Materials that are specified for measurement by the cubic yard measured in the vehicle shall be hauled in vehicles of such type and size that actual contents may be readily and accurately determined. Unless all vehicles are of uniform capacity, each vehicle must bear a plainly legible identification mark indicating its water level capacity. Vehicles shall be loaded to at least their water level capacity. Loads hauled in vehicles not meeting above requirements or loads of a quantity less than the capacity of the vehicle, measured after being leveled off as above provided, will be subject to rejection, and no compensation will be allowed for such material.

F. Where measurement of quantities depends on elevation of existing ground, elevations obtained during construction will be compared with those shown on drawings. Variations of 1 foot or less will be ignored, and profiles shown on drawings will be used for determining quantities.

G. Units of measure shown on Bid Form shall be as follows, unless specified otherwise. All methods of measurement shall be approved by the City.

Item	**Method of Measurement**
AC	Acre – Field Measure
CY	Cubic Yard – Field Measure within limits specified or shown, or measured in vehicle by volume, as specified
EA	Each – Field Count
GAL	Gallon – Field Measure
HR	Hour

LB	Pound(s) – Weight Measure by Scale
LF	Linear Foot – Field Measure
LS	Lump Sum – Unit is one; no measurement will be made
SF	Square Foot
SY	Square Yard
TON	Ton – Weight Measure by Scale (2,000)

1.0.6. MEASUREMENT AND PAYMENT

A. General:

1. Payment for all the work completed under this Project shall be made in accordance with the provisions of the "Special Conditions" on the basis of the specific provisions of this section of the Specifications.

2. The Contractor will be paid each month the value of the work completed during the preceding month (less retainage) and the invoiced cost including applicable sales taxes and shipping value (less retainage) of materials not already used, but which have been furnished by the Contractor under the Specifications, provided that such materials have been delivered, properly stored and inspected by the Engineer and that payment therefore has been satisfactorily certified by the Contractor to the Engineer. Remaining cost for materials (less retainage) will be paid at the same time as installation. Any payment for materials which are not used will be withheld from the final payment.

3. The Contractor shall receive and accept the compensation as provided in the Quotation, the ITB and "Invoices and Payments" of the "Special Conditions" as full payment for furnishing all labor, materials, tools and equipment, for performing all operations necessary to complete the work under this Contract, and also in full payment for all loss or damages arising from the nature of the Work, or from the action of the elements or from unforeseen difficulties which may be encountered during the prosecution of the work until the final acceptance by the City.

4. The cost breakdown (or Schedule of Values) referred to herein is defined in "Schedule of Values" of the "Special Conditions." The cost breakdown (Schedule of Values) approved by the Engineer will be used as the basis for making progress payments and for determining the cost of extra work which is the same or similar (as determined by the Engineer) to that defined in the "Schedule of Values."

5. The prices stated in the Quotation includes full compensation for overhead and profit, all costs and expenses for taxes, labor, equipment, furnishing and repairing small tools and ordinary equipment, mobilization, home office expenses and

general supervision, materials, commissions, transportation charges and expenses, patent fees and royalties, bond, insurance, labor for handling materials during inspection, together with any and all other costs and expenses for performing and completing the work as shown on the Plans and specified herein. In addition, the Contractor shall include the actual cost of social security taxes, unemployment insurance, worker's compensation, fringe benefits, inclusive of life and health insurance, union dues, pension, pension plans, vacations, and insurance and contractor's public liability and property damage insurance involved in the work based on the actual wages paid to such labor and all other general costs and profits, prorated to each item.

6. Unless otherwise specifically stated elsewhere herein, the Contractor shall include in the prices bid all materials, electrical supply, fuel, lubricants, temporary equipment, temporary wiring, temporary piping and fittings, pumps, gages, and all other items of whatever nature required to completely test, balance, disinfect if required, and put into fully operational condition all equipment and/or systems supplied by either the City or the Contractor and installed as a part of this Project. Further, any test materials supplied by the Contractor shall be completely satisfactory to the City. Any decision as to whether a particular material is suitable for test purposes shall be at the sole discretion of the Engineer whose decision shall be final. Any material considered not suitable shall be immediately replaced by the Contractor with suitable material and no extra compensation will be allowed."

7. It is the intent of the City to obtain a complete and working installation under this Contract, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

8. For purposes of determining the monthly payments to be made to the Contractor for work accomplished, the value of the work completed shall be determined in the following manner:

    a. Demolition, installation of pipe culvert shall constitute seventy-five percent **(75%)** of the price bid for these Quotation Items.

    b. Submittal of the PSM's daily progress reports and/or field book notes and monthly as-builts of the work that has been performed to date (all documents subject to approval and acceptance by the City) shall constitute ten percent **(10%)** of the price bid for these Quotation Items.

    c. Completion of all sitework restoration, shall constitute five percent **(5%)** of the price bid for these Quotation Items.

d. Submittal of the final as-builts to the satisfaction of the Engineer, completion of all surface repairs, restoration of public or private facilities, appurtenances, and all other work not provided for under other Quotation Items shall constitute the remaining ten percent **(10%)** of the price bid for these Quotation Items.

B. Price Bid:

1. The price bid for each item shall be stated in both words and figures in the appropriate places in the Quotation form. All blank spaces for bid prices must be filled in with ink, or with a typewriter. The Bidder is further directed that any and all alterations, changes, corrections and modifications, made to the Quotation forms prior to submission of bids, must be initialed by the Bidder. Non-compliance by the Bidder of this directive may be grounds for rejection of his bid.

2. In the event that there is a discrepancy between the price written in words and the price written in numbers, the price written in words shall govern except where the number of units multiplied by the unit price shown in numbers equals the total price for that bid item. In such case the unit price shown in numbers shall govern over the unit price shown in words.

3. Where an error is made in the calculation of the total bid price of an item, the unit price shall govern.

4. If the bidder makes an error in his addition of the total bid prices of the applicable items in the Quotation, the correct sum of its applicable bid item totals shall be the Total Bid.

5. It has been determined that the City is not exempt from the payment of Florida State Sales Tax under this Contract. All items of materials, equipment and supplies furnished by the Contractor and remaining a part of the completed Project are subject to this Tax. The Bidder shall include a sufficient amount of money to pay for this Tax in his bid price. Sufficient money to pay the Tax for all miscellaneous materials and minor items shown on the Plans, specified herein, or necessary for the work, and which will remain a part of the completed Project, shall also be included in the price or prices bid, and no other compensation will be provided.

C. Quotation Items:

It is intended that all work required to complete this Project will be included in the various bid items as follows:

Item No. 1

For performing preparatory work and operations in mobilizing for beginning the work of the Project, including preparation and acceptance of Maintenance of Traffic Plan (MOT), but excluding materials and permit costs, both of which are paid under other payment items, shall include, but not be limited to; preparation, submission and acceptance of the MOT, first by the City and if acceptable to the City, submission to and acceptance by all other governing authorities; supply, submission and correction of all "Pre-Approved Product Lists" and/or shop drawings; ordering the said equipment and materials in a timely fashion; those operations necessary for the movement of personnel, equipment, supplies and incidentals to the Project site and for the establishment of temporary offices, buildings, safety equipment and first aid supplies, sanitary and other facilities; the cost of reestablishing the design baseline, vertical control points and reference points, and establishing proposed pipeline location; the cost of MOT and permit preparation/submission/acceptance; the costs of bonds, required insurance and other preconstruction expense but excluding the actual cost of permits, which are paid under a separate dedicated allowance account and excluding the cost of materials which are paid under another bid item(s).

Not inclusive of the costs incurred in the provision of traffic control and the costs incurred in the provision of off-duty police officers that are to be paid for under separate Bid Items.

The mobilization item will be paid in the following manner:

Contracts with a contract duration of up to and including one hundred twenty (120) calendar days will be paid in two (2) separate payments, each equal to fifty (50) percent of the amount bid for this item.

Contracts with a contract duration of over one hundred twenty (120) calendar days will be paid in four (4) separate payments, each equal to twenty-five (25) percent of the amount bid for this item.

The two or four payments will be made with the first two or four payment draws and is conditioned upon progress satisfactory to the Engineer being made pursuant to the accepted Project.

The total amount of the partial payments may not exceed ten (10) percent of the original Subtotal of the bid items. Any remaining amount will be paid upon completion of all work on the Contract. Retainage, as specified in the "General Covenants and Conditions" and any Special Provisions will apply to these payments.

Since this item is bid as an aggregate sum, payment will be in accordance with the cost breakdown as approved by the Engineer and measured as required by and satisfactory to the Engineer.

Item No. 2

For furnishing and delivering to the City Ultraflo SRASP Barrell Pipe for culverts, or approved equal, of the nominal sizes specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer, which payment shall be full compensation for furnishing Ultraflo SRASP Barrell Pipe, and joint materials; corporation stops pipe bedding; backfill materials; temporary pavement materials; transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Item No. 3

For installing Ultraflo SRASP Barrell Pipe for culverts, or approved equal, of the nominal sizes specified in these bid items will be paid for at the unit price bid times the number of linear feet installed and accepted by the Engineer. The price per foot for installing the pipe shall be full compensation for the completed pipeline, ready for service, and shall include, but not be limited to; exploratory excavation; excavation; sheeting and shoring if necessary; complying with the Florida Statutes "Trench Safety Act"; transporting and unloading the pipe and all other materials not specified in other bid items from delivery trucks at the job site (excavation side) and placing them into position in the trench; installing Ultraflo SRASP Barrell Pipe, installing joint materials; installing joint; removal and disposal of excess or unsuitable fill material, where required; maintaining access to residences and businesses along the route of the main; protecting existing utilities along the route of the culvert; making temporary paving repairs; complying with work hour restrictions; satisfying all requirements of the Project permits; preparation and submittal of PSM's daily progress reports and/or field notes and monthly as-builts of the work that has been performed to date; moving and replacing utilities, fences, trees, landscaping, shrubs, mail boxes, sprinkler systems, shoulders, asphalt paths, curb & gutter, asphalt and plain concrete driveways, traffic separators and all other similar items, to original locations and to equal or better than original conditions; and all other appurtenant and miscellaneous items and work (not included in another bid item) including final cleanup for a complete, satisfactory and functional installation.

Items No. 4

For furnishing and delivering General Guardrail per FDOT index No. 536 with mechanical appurtenances required as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer, which payment shall be full compensation for furnishing General Guardrail per FDOT index No. 536; transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Items No. 5

For installing General Guardrail per FDOT index No. 536 with mechanical appurtenances required as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer, which payment shall be full compensation for furnishing General Guardrail per FDOT index No. 400; transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Items No. 6

For demolishing and removal of the existing Culvert with headwalls as indicated in the plans, will be paid for from the aggregate sum amount established by the Contractor for this purpose. Such amount represents the amount the Contractor feels is necessary to completely demolish the existing concrete stair and chain-link fence and dispose of the debris generated. Asphalt restoration is included in a separate item.

Since this item is bid as an aggregate sum, no other special provisions for measurement will be necessary.

Item No. 7

For excavating of existing backfill material at existing Culvert location, will be paid for at the unit price bid times the number of cubic yards removed to the satisfaction of the Engineer, and includes removal of unsuitable material, loading, hauling, legal disposal off-site and tipping fees.

Item No. 8

For providing bypass pumping, as needed, to ensure Canal flow is uninterrupted throughout construction, will be paid for from the aggregate sum amount established by the Contractor for this purpose. Such amount represents the

amount the Contractor feels is necessary to completely ensure Canal flow is uninterrupted throughout construction.

Since this item is bid as an aggregate sum, no other special provisions for measurement will be necessary.

Item No. 9

For furnishing and delivering all necessary Turbidity Barriers for erosion control measures specified on plans, as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer for this purpose, which payment shall be full compensation for furnishing and installing all necessary Turbidity Barriers for erosion control measures specified on plans, transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Item No. 10

For furnishing and delivering all necessary Drop Inlet Sediment Protections for erosion control measures specified on plans, as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer for this purpose, which payment shall be full compensation for furnishing and installing all necessary Drop Inlet Sediment Protections for erosion control measures specified on plans, transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Item No. 11

For selling and delivering concrete for the installation of 8-inch thick Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, will be paid for at the unit price bid times the number of cubic yards of concrete placed. The price shall be full compensation for furnishing concrete for the installation of 8-inch thick Concrete Pavement (min. 3,000 psi at 28-day), transportation and handling costs delivered ditchside. This bid item shall be used only at locations approved by the Engineer or indicated in the Plans where the minimum cover over the main cannot be obtained.

Item No. 12

For constructing 8-inch Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, will be paid for at the unit price bid times the number of cubic yards

of concrete placed. The price shall be full compensation for all work including furnishing all labor, equipment, and materials required for constructing the 8-inch Concrete Pavement. This bid item shall be used only at locations approved by the Engineer or indicated in the Plans where the minimum cover over the main cannot be obtained.

Item No. 13

For constructing concrete 4-inch-thick sidewalk and ramp curbing to match existing per FDOT index No. 310, will be paid for at the unit price bid times the number of square feet of such sidewalk required, installed and accepted by the Engineer, and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete installation.

Item No. 14

For constructing concrete curb and gutter restoration to match existing as per FDOT index No. 300, will be paid for at the unit price bid times the number of square feet of such curb and gutter required and placed as measured along the curb, installed where directed by the Engineer, and the price bid shall be full compensation for furnishing all labor and equipment for a complete installation.

Item No. 15 - Contingent Item

For furnishing and installing additional suitable backfill material, will be paid for at the unit price bid times the number of cubic yards of additional trench backfill furnished and installed as directed by the Engineer in the field and includes removal of unsuitable material, loading, hauling, legal disposal off-site and tipping fees. The additional trench backfill shall be measured along the main within the limits of the trench as defined by the County's Standard Details appended hereto. The use of additional trench backfill shall be paid for only when and where approved by the Engineer prior to installation.

Item No. 16

For furnishing and installing rubble (Broken Stone), including necessary geotextile filter fabric, at Culvert embankment for the rip-rap installation as per FDOT Standard Specifications Manual Section No. 530, will be paid for at the unit price bid times the number of tons of such rip-rap required as directed by the Engineer in the field and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete installation.

Item No. 17

For furnishing and installing sand-cement bags at Culvert embankment for the riprap installation as per FDOT index No. 530, will be paid for at the unit price bid times the number of Cubic Yards of such rip-rap required as directed by the

Engineer in the field and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete installation.

Item No. 18

For furnishing and constructing concrete endwalls at Culvert pipe barrels per FDOT index No. 430-032, will be paid for at the unit price bid times the number of cubic yards of concrete placed. The price shall be full compensation for all work including furnishing all labor, equipment, and materials required for constructing the concrete enwall at Culvert pipe.

Item No. 19

For furnishing and constructing concrete shoulder barrier as per FDOT index No. 521-001, will be paid for at the unit price bid times the number of linear feet of shoulder barrier installed, as indicated in plans. The price shall be full compensation for all work including furnishing all labor, equipment, and materials required for constructing the concrete shoulder barrier.

Item No. 20

For cold milling roadway surface course for permanent pavement repairs (nominal 1 inch thick), will be paid for at the unit price bid times the number of square yards of such surface course milled and required as measured along the curb within the limits defined by details on the Plans and/or the City's Public Works Manual appended hereto and as approved by the Engineer. Greater widths are at the Contractor's option and expense. The price bid shall be full compensation for furnishing all materials, labor and equipment required for milling of surfaces indicated. Asphalt cold milling shall be performed using an automated pavement planer capable of maintaining an accurate depth. Cold milling equipment shall meet the approval of the Engineer and the governing agency having jurisdiction at the location of the pavement milling operation. The Engineer's word as to the acceptability of the equipment shall be final.

Item No. 21

For constructing **Type "V"** permanent pavement repairs for roadway (nominal 1 inch thick machine-laid asphaltic concrete friction surface overlay) will be paid for at the unit price bid times the number of square yards of overlay, installed where directed by and to the satisfaction of the Engineer, which price shall be full compensation for furnishing all labor, material, and equipment for a complete installation; and shall include asphalt pavement driveways in roadways, as required and directed by the Engineer. After the pavement has been milled and the existing pavement removed, a tack coat shall be applied as specified above. The latest applicable standard for the friction course from the governing authority shall be used. Temporary pavement markings for roadways shall be included in this bid item.

Item No. 22

For replacing pavement markings damaged, removed or obliterated by Contractor's operation, will be paid for from the unit price bid times the number of pavement markings for this purpose. Such amounts represent the amount the contractor feels is necessary to comply with the governing agency's requirements. Any portion of this fund, remaining after the work has been paid for will remain with the Contractor. Conversely, no requests for additional reimbursement will be approved. Reflective Pavement Markers shall also be furnished and installed under this item and there will be no additional compensation paid for this work.

Since this item is bid as an aggregate sum, no other special provisions for measurement will be necessary.

Item No. 23 - Contingent Item

For restoring sodded areas, will be paid at the unit price bid times the number of square yards of sod placed, and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete restoration.

Item No. 24

For furnishing traffic control, will be paid for from the aggregate sum amount established by the Contractor for this purpose. Such amount represents the amount the Contractor feels is necessary to provide sufficient flagmen, signs, barricades, and similar items and work for directing traffic and maintaining safety during all times of work and other times as directed by the Engineer, FDOT, the municipalities' Public Works Department and any other governing authority. Any portion of this fund remaining after all authorized payments have been made will remain with the Contractor. Conversely, no requests for additional payments will be approved.

Payment to the Contractor under this item will be by monthly percentage corresponding to the percentage of the Project's work items completed and paid for each month, as approved by the Engineer.

Item No. 25 - Contingent Item

For sheeting and shoring ordered left in place by the Engineer, will be paid for at the unit price bid per square foot, measured from tip to cut-off times the horizontal length, regardless of thickness, times the number of linear feet of sheeting and shoring left in place as accepted by the Engineer. Payment shall be full compensation for cutting off and for all salvage and potential reuse value of the material. Sheeting and shoring left in place without the Engineer's approval will be at the Contractor's expense.

Item No. 26- Contingent Item
For removal, transport, and legal disposal of unsuitable backfill materials, including tipping fees, will be paid for at the unit price bid times the number of cubic yards removed and legally disposed of, as measured by the truckload to the satisfaction of the Engineer.

Item No. 27 – SUBTOTAL
Sum of Item Nos. 1 through 27.

Item No. 28 - Dedicated Allowance
This item establishes a fund for reimbursement of the cost of providing off-duty police officers as required for this project. Payment shall only reimburse the Contractor for the cost of the off-duty police officers for hours on duty at the work site; no overhead, travel time or other additional costs will be allowed. Any portion of this fund remaining after all authorized payments have been made will be withheld from contract payment and will remain with the City.

Item No. 29 - Dedicated Allowance
This item establishes a fund for reimbursement of the cost of all required construction permits and fees, if authorized by the Engineer. Payment shall reimburse the Contractor for only the cost of the construction permit and fee. Any question or whether a construction permit or fee is required shall be decided by the Engineer whose word shall be final. Any portion of this fund remaining after all authorized payments have been made will be withheld from Project payments and will remain with the City.

Item No. 30 - Contingency Allowance
For unforeseen conditions, minor construction changes and Quantity Adjustments, additional work not covered by other items, if ordered by the Engineer.

This account is for all labor, materials, equipment and services necessary for modification or extra work required to complete the Project due to unforeseen conditions, unforeseen conflicts between existing elements of work and the proposed work; for minor changes required to resolve any unforeseen conditions, Revised Regulations, Technological and Products Development, Operational Changes, Schedule Requirements, Program Interface, Emergencies and other Miscellaneous Costs; and for adjustments to estimated quantities shown on the unit prices of the Quotation to conform to actual quantities installed; and associated time related to this work only if ordered by the Engineer.

Payment to the Contractor under the Contingency Allowance will only be made for work ordered in writing by the Engineer, in accordance with Section 13 "Extra Work and Payment Therefore" of the "General Covenants and Conditions." Any portion

of these accounts remaining after all authorized payments have been made will be withheld from Contract payments and will remain with the City.

A non-compensable time extension shall be included in the Contingency Allowance work when approved by the Engineer.

Item No. 31 - TOTAL BID

Sum of Item Nos. 27, 28, 29 and 30.

Note:

Since Item Nos. 15, 23, 25 and 26 are Contingent Items, and because of the nature of the Dedicated Allowance, Item Nos. 28 and 29, and the Contingency Allowance, Item No. 30, they may or may not be used at the option of the City. Any overrun or under run provisions contained within the Project Documents shall not be applicable to these items.

1.0.7. NONPAYMENT FOR REJECTED OR UNUSED PRODUCTS

A. Payment will not be made for following:

1. Loading, hauling, and disposing of rejected material.

2. Quantities of material wasted or disposed of in manner not called for under Contract Documents.

3. Rejected loads of material, including material rejected after it has been placed by reason of failure of Contractor to conform to provisions of Contract Documents.

4. Material not unloaded from transporting vehicle.

5. Defective work not accepted by Owner. Material remaining on hand after completion of work.

1.0.8. PARTIAL PAYMENT FOR STORED MATERIALS AND EQUIPMENT

A. Partial Payment: No partial payments will be made for materials and equipment delivered or stored unless shop drawings or preliminary operation and maintenance manuals are acceptable to the Engineer.

B. Final Payment: Will be made only for products incorporated in work; remaining products, for which partial payments have been made, shall revert to Contractor

unless otherwise agreed, and partial payments made for those items will be deducted from final payment.

1.0.9. ALLOWANCES

A. The allowances shall be used only at the discretion of and as ordered by the Owner for such items as unforeseen conditions, unforeseeable conflicts between existing elements of work and the proposed work, unit price items exceed estimated quantities, and any associated work requested by the Owner including all labor, materials, and services for modifications or extra work to complete the project that was anticipated, but not specifically included in this Contract.

B. Any portion of these allowances that remain after all authorized payments have been made will be withheld from contract payments and will remain with the Owner.

01031 GRADES, LINES AND LEVELS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The work of this Section comprises the establishing of grades, lines and levels.

1.0.2. RELATED WORK

A. Section 01720 "Project Record Documents"

PART 2 – PRODUCTS

2.0.1. MATERIALS

A. Furnish all stakes, templates and other materials necessary for establishing and maintaining of the lines and grades necessary for control and construction of the work and all incidental labor necessary for the prosecution of the work. **PART 3 – EXECUTION**

3.0.1. LAYOUT OF THE WORK

A. GENERAL

1. The Engineer of Record, through retaining the services of a Professional Land Surveyor and Mapper, who is licensed in the State of Florida, shall furnish the Contractor with horizontal and vertical controls which shall be utilized as specified elsewhere herein to layout the work. The Professional Land Surveyor and Mapper, who is licensed in the State of Florida hired by the Contractor, shall verify all controls provided by the Engineer of Record and it shall be the responsibility of the Contractor to preserve same.

2. The Contractor shall retain the services of a Professional Land Surveyor and Mapper, who is licensed in the State of Florida who, shall furnish and set stakes, establishing line and grade and shall solely be responsible for the layout of the work as well as the recording of all as-built dimensions and elevations. The Contractor shall furnish all additional stakes, templates, and other materials for marking and maintaining survey points and lines given, and shall be responsible for their preservation. Should any of the horizontal and vertical control points set by the Engineer of Record be destroyed or disturbed, they shall be reset by the Contractor's Florida Registered Land Surveyor and Mapper, at the Contractor's expense. All control points previously set by the Engineer of Record shall be verified by the Contractor's surveyor.

B. LAYOUT

As provided in Subsection 3.01-A, above, the Contractor through the services of his Florida Registered Land Surveyor and Mapper, shall establish the line and bench mark and other reference points for the pipeline or structure, as follows:

1. Structures: Will consist of baselines, stakes at building corners, centers and centerlines, auxiliary lines and two bench marks from which to establish the

elevations. The Engineer of Record shall set a minimum of three horizontal and vertical control points which shall thereafter be maintained by the Contractor, without further help from the Engineer of Record, for use in establishing and checking the lines and grades as shown on the contract drawings.

2. Pipelines: Will consist of baselines, construction lines, centerlines, auxiliary lines and bench marks from which to establish the elevations. The Engineer of Record shall set horizontal and vertical control points at the beginning and end of the work and at a minimum distance of 1,400 ft. in between. When the total distance is less than 1,400 ft. control points shall be set at the beginning and end of the work.

3. The Contractor shall use this information to construct the structures and pipelines to the lines and grades shown on the project drawings and shall supply all equipment and personnel necessary to accomplish this end.

4. For pipelines, this will consist of establishing all points of bend (but not necessarily bevel pipe unless in close proximity to other facilities), valves, tees, crosses and other stations not more than 100 feet apart along the proposed centerline of the pipe, or along a stationed offset line as shown on the plans, marked by a nail in a metal cap if in pavement, with the station painted nearby or by a nail in the top of a wooden stake driven flush with the ground with the station marked on the flag stake nearby, if not in pavement.

5. The Contractor shall supply the City Inspector with a copy of the Florida Registered Land Surveyor and Mapper's layout of the work immediately upon its availability to his own forces.

6. The Contractor shall make his equipment and men available to the Inspector for spot checking the accuracy of the pipe laying. The Inspector shall require the Contractor to correct pipe alignment when necessary.

C. RECORD DRAWINGS:

1. During the entire construction operation, the Contractor shall retain the services of a State of Florida Registered Land Surveyor and Mapper who shall maintain records of the installation, including all deviations from the plans and specifications by obtaining "as-built" dimensions and elevations.

2. The Surveyor shall prepare Record As-Built Drawings showing correctly and accurately all changes and deviations made during construction, including approved construction variances, to reflect the work as it was actually constructed.

3. Refer to Sections 01720 and 01725 for City's criteria for developing project record documents and record As-Built drawings.

D. HORIZONTAL AND VERTICAL CONTROL FOR DESIGN

The following shall apply when establishing horizontal and vertical controls for design. They shall also be used for the development of construction drawings.

1. Survey stationing shall proceed from south to north and/or from west to east.

2. Baseline or centerline shall be tied to section corners, or to monument lines or to right of-way lines.

3. Points along the survey line shall be referenced to perpetuate the alignment. Whenever possible, the reference points shall be established at right angles to the survey line and at intervals no longer than 1,400 feet. Reference points shall be shown on construction plans.

4. Centerline of side streets shall be established and set by nail and disc. Station and angle turned shall be given and shown on the plans.

5. All curve data (horizontal) shall be shown on plans. Point of curvature and point of tangency shall be set in the field, reference P.C. and P.T. or P.I.

6. Easement lines shall be tied to baseline or centerline. Give station and angle turned.

7. Set centerline or baseline stations every 100 feet on the ground using iron rods in unpaved areas or P.K. nails on asphalt.

8. All vertical control and elevations shall be referenced to North American Vertical Datum of 1988 (NAVD 1988).

9. Temporary bench marks (T.B.M.) and bench marks shall be established throughout the project at approximately 1,000 feet intervals. Show information on plans.

10. Centerline shall be tied to baseline if different from each other.

11. Tie proposed pipe to centerline or baseline, not to right-of-way line. Right-of-way line shall be tied to centerline or baseline.

12. All survey information shall be shown on the plans.

13. All point of intersections and deflection angles shall also be shown. Angle can be submitted by bearings.

END OF SECTION

01070 ABBREVIATIONS

PART 1 - GENERAL

1.0.1. SCOPE OF WORK

A. Comply wherever in these specifications' references are made to the standards, specifications, or other published data of the various national, regional, or local organizations, such organizations may be referred to by their acronym or abbreviation only. As a guide to the user of these specifications, the following acronyms or abbreviations which may appear in these specifications shall have the meanings indicated herein.

B. It is the intent of the City to obtain a complete functional, and satisfactory installation under this Contract, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

1.0.2. ABBREVIATIONS AND ACRONYMS

A. The Contractor is also alerted that various "Standards" are used herein for reference and criteria, and that he should obtain copies for his general use and protection. Abbreviated titles are used throughout these Specifications and although most of them are widely known, their complete titles are given below in order to avoid any misunderstanding.

AASHTO	American Association of State Highway and Transportation Officials
ACI	American Concrete Institute
AISI	American Iron and Steel Institute
ANSI	American National Standards Institute, Inc.
ASME	American Society of Mechanical Engineers
ASTM	American Society for Testing and Materials
AWWA	American Water Works Association

FAC	Florida Administrative Code
FBC	Florida Building Code
FDOH	Florida Department of Health in Miami-Dade County
FDOT	State of Florida Department of Transportation
MDDTPW	Miami-Dade Department of Transportation and Public Works
NSF	NSF International
OSHA	Occupational Safety and Health Administration

B. The above list shall not be considered complete, as there are other "Standards" used; however, in most cases complete titles have been given.

C. Wherever "Standards" are indicated herein for reference, the referenced portion shall have the same force and effect as if it were included, herein, in its entirety, latest revision if the date of publication is not shown.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

END OF SECTION

01090 REFERENCE STANDARDS

PART 1 – GENERAL

1.0.1. REFERENCE STANDARDS

A. Comply with the requirements of standard with date as specified herein. Standards without dates shall be understood as the Standard current at the time of bid. In case of conflict between the referenced standards, the one having the more stringent requirements shall govern.

B. In case of conflict between the referenced standards and the Project Documents, the Project Documents shall govern.

C. When no reference is made to a code, standard, or specification, the standard specifications of the ASTM, the ANSI, the ASME, the IEEE, or the NEMA shall govern.

1.0.2. QUALITY ASSURANCE

A. Application: When a standard is specified by reference, comply with requirements and recommendations stated in that standard, except when requirements are modified by the Contract Documents or applicable codes establish stricter standards.

1.0.3 ABREVIATIONS

A. Abbreviated titles for other governing standards are used throughout these specifications and although most of them are widely known, their complete titles are given below to avoid misunderstanding.

1. AA: Aluminum Association.

2. AAMA: Architectural Aluminum Manufacturer's Association.

3. AASHTO: American Association of the State Highway and Transportation Officials.

4. ACI: American Concrete Institute.

5. ACPA: American Concrete Pipe Association
6. AI: Asphalt Institute
7. AIA: American Institute of Architects AISC American Institute of Steel Construction
8. AISI: American Iron and Steel Institute
9. AITC: American Institute of Timber Construction
10. ANSI: American National Standards Institute, Inc.
11. API: American Petroleum Institute
12. ASCE: American Society of Civil Engineers
13. ASME: American Society of Mechanical Engineers
14. ASMM: Architectural Sheet Metal Manual
15. ASSE: American Society of Sanitary Engineers
16. ASTM: American Society for Testing and Materials
17. AWS: American Welding Society
18. AWWA: American Water Works Association
19. BHMA: Builders Hardware Manufacturer's Association
20. CIPRA: Cast Iron Pipe Research Association
21. CLFMI: Chain Link Fence Manufacturers Institute
22. CMA: Concrete Masonry Association
23. DIPRA: Ductile Iron Pipe Research Association
24. ETL: Environmental Test Laboratories

25. FDEP: Florida Department of Environmental Protection

26. FDOT: Florida Department of Transportation

27. IEEE: Institute of Electrical and Electronics Engineers

28. NBS: National Bureau of Standards

29. NEC: National Electrical Code

30. NEMA: National Electrical Manufacturer's Association

31. NFPA: National Fire Protection Association

32. OSHA: Occupational Safety and Health Administration

33. SSPC: Steel Structures Painting Council

34. SSPWC: Standard Specifications for Public Works Construction

35. SFWMD: South Florida Water Management District

36. UL Underwriters Laboratories, Inc.

END OF SECTION

01100 SPECIAL PROJECT REQUIREMENTS

PART 1 – GENERAL

1.0.1. RESPONSIBILITY OF THE CONTRACTOR

A. The Contractor shall have at all times as his agent on the site of the work a competent superintendent capable of reading and thoroughly understanding the plans and specifications.

B. The Contractor shall be responsible for the good condition of the work or materials until formal release from his obligations under the guidelines of this project. The Contractor shall store materials and shall be responsible for and shall maintain partly or wholly finished work during the continuance of the Contract. The Contractor shall place sufficient lights and danger signals on or near the work from sunset to sunrise; shall erect suitable railings or other protective devices about unfinished work, open trenches, embankments, or other obstructions; shall provide all necessary watchmen on the work by day or by night for the safety of the public and shall take all necessary precautions for preventing accidents or injuries to persons or property in or about the work.

C. The Contractor shall be responsible for the coordination, location, and relocation of utilities, including but not limited to utility light poles, cables, fiber optic lines, water

mains and services, sewer mains and services, electrical, telephone and television cables, signals and signal poles, fences, guard rails, piping, culverts, conduits and drains that interfere with the positioning of the work as set out on the drawings. The cost of all such coordination and relocations shall be included in the bid for the project and shall not result in any additional cost to the City.

D. Prior to proceeding with trench excavation, the Contractor shall contact all utility companies and all other users of the right-of-way in the area to aid in locating their underground services. It shall be the Contractor's responsibility to contact utility companies at least three NORMAL WORKING DAYs before starting construction. The Contractor shall proceed with caution in the excavation and preparation of the trench so that the exact location of underground utilities may be determined.

E. Wherever piping systems or utilities such as water, wastewater, air, chemical, electrical or other service lines must be crossed, deflection of the pipe within recommended limits and cover shall be used to satisfactorily clear the obstruction unless otherwise indicated on the drawings. Approximate locations of known installations in the vicinity of new work must be verified in the field by the Contractor, who shall uncover them carefully, prior to commencement of the work.

F. The Contractor shall be familiar with all codes and regulations of the Federal Government, the State of Florida, Miami Dade County, the City of Opa-Locka and any municipal corporations applicable to every aspect of the project. The Contractor shall provide all materials and shall perform all work necessary to fully comply with all provisions and requirements of applicable codes and regulations whether specifically indicated in the plans and specifications or not. It is the intent of the City to obtain a finished project in full compliance with all requirements of any agencies having jurisdiction over any portion of the work involved in the project. The Inspector will not recommend acceptance of the work until all requirements and provisions of pertinent codes and regulations have been satisfactorily fulfilled.

G. Changing the grade of the proposed main by rising deflections, or the alignment by horizontal deflections, will not be considered as extra work, or extra cost, to the Contractor, and in some cases a credit to the City may be warranted.

H. Any Conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the Engineer.

1.0.2. LAND FOR CONSTRUCTION PURPOSES

A. The Contractor shall limit operations, temporary facilities and storage of equipment and materials to on-site areas to be designed by the Engineer.

B. Should the Contractor require additional space he/she shall make his own arrangements for storage of materials and equipment in locations off the construction site. For the allocated space, submit to the Engineer for approval, proposed plan and layout for all temporary facilities, offices, storage facilities, temporary water service and distribution, and temporary power service and distribution. Prior to commencing any new construction remove, relocate and protect where necessary all existing underground and above ground facilities, pipelines, utility systems, plantings and all other existing installations. All of these existing features shall be restored to their initial or better than initial conditions.

1.0.3. PRE – CONSTRUCTION CONFERENCE

A. After the Award of Contract and prior to the issuance of the "Notice to Proceed," a preconstruction conference will be held with the Contractor, the City, various utility companies and others who are interested in the Project for the purpose of coordinating the work. The time and place of meeting will be set by the Engineer.

B. In some cases the preconstruction conference may be held after the start work date stated in the written "Notice to Proceed." This may be due to difficulty with coordination of all parties concerned, or other similar reasons.

C. Such delays in holding the preconstruction meeting will not relieve the Contractor of any responsibilities hereunder, and will not be an acceptable reason for him to request additional work completion time beyond that provided since he can be obtaining permits, mobilizing his equipment and forces, ordering materials, performing minor work, or other work if approved by the Engineer, during the interim period.

D. Prior to the preconstruction conference, the Contractor shall prepare the construction schedule as described in Section 01120 - Sequence of Construction and General Information and Section 01200 - Project Meetings, "Project Scheduling" and provide copies of the same to others in attendance.

E. The construction schedule shall include the place of beginning, the proposed order of progression, together with the estimated times for beginning and completing the various items of work. In addition, the Contractor shall prepare on electronic media, a critical path method (CPM) with emphasis made to "construction time and completion."

F. The Engineer will discuss requirements of such matters as project supervision and inspections, progress schedules and reports, Contract Change Orders, insurance, safety, and other items pertinent to the Project.

G. All parties to this conference should be prepared to discuss any problems anticipated with the execution of the work under this Contract.

1.0.4 SAFETY REQUIREMENTS

A. The Contractor shall comply with the Department of Labor Safety & Health Regulations for construction promulgated under the Occupational Safety & Health Act of 1970, (PL 91-596).

B. Comply with all applicable provisions of the Occupational Safety and Health Act (OSHA). The Contractor's Manual of Safety Practices, dealing with the firm's policies on field safety procedures for employees shall be submitted to the Engineer for review before Notice to proceed will be issued.

C. Conduct operations in such a manner, utilizing warning devices, such as traffic cones, barricades and warning lights, that traffic and pedestrians are given adequate warning of hazard of the work site as may be deemed necessary by the City and/or the Engineer.

D. Certain products specified in these specifications contain warnings by the manufacturer that under certain conditions, if instructions for use of the product are no followed, a hazardous condition may develop. It is the Contractor's responsibility to instruct its workmen in the safe use of the product, or any product substitution.

E. For trench excavations in excess of five feet in depth, the Contractor shall comply with the provisions of the State of Florida "Trench Safety Act".

F. The contactor shall be familiar with the "Underground Facility Damage Prevention and safety Act", Florida Statute 556. The Contractor shall contact the Sunshine State One Call Center of Florida.

G. Do not store any environmentally hazardous materials such as solvent, greases, lubricants or any other type of chemical substances at the work sit. The Contractor is permitted to keep such materials at the site as are for immediate use only. Do not store any empty container at the site.

1.0.5 PIPE AND EXISTING UTILITIES

A. The underground utilities, structures and other facilities shown on the plans are located according to the best information available but may vary by several feet from both the position and elevation shown. The Contractor shall explore far enough in advance of his main trench to determine the exact location and condition of such utilities, structures or facilities so that, before the pipe is installed, the Engineer may change the line or grade of the pipe, should that become necessary to avoid a conflict.

B. In all cases where the main is deflected either horizontally or vertically, and the Engineer requires additional work and items such as paving and similar items for which a pay item was established in the quotation, then such additional work and items will be paid for at the prices bid. Wider trench widths may be paid with the approval of the Engineer.

C. The Contractor shall determine the locations of recent additions to the systems not shown on the plans. Extreme caution shall be exercised to eliminate any possibility of any damage to utilities resulting from his activities. The location of all overhead utilities shall be verified, and the Engineer notified of any conflict which might occur. The Contractor shall be responsible for determining which poles will need shoring during excavation and shall provide such shoring and support as is required.

1.0.6 MATERIALS AND EQUIPMENT FURNISHED BY THE CITY

A. No material or equipment will be furnished by the City under this Contract. All material, labor and equipment necessary for completion of the work shall be furnished and installed by the Contractor, whether or not shown on the Plans or specifically mentioned in the Specifications.

1.0.7 WATER USED IN CONSTRUCTION

A. The City will furnish water at a charge for all construction activities unless otherwise specifically made an exception in the project specifications or specifically made an exception by the Engineer in writing.

B. Consumption for the following activities shall be determined by City personnel who shall be provided with a minimum of seventy-two (72) hour advance notification. Failure of the Contractor to provide advance notification and/or have City personnel on site to witness and verify consumption for the following activities could result in his being fined and/or a citation being issued against him in accordance with the Rules and Regulations of the City's Tampering Section.

1. Pigging:

2. Flushing, only if and when approved by the Engineer:

3. Chlorination, if applicable:

4. To fill mains being pressure tested, excluding make-up water during test: and

5. When and where directed or approved by the Engineer.

Water for construction activities listed above will be furnished from adjacent Cityowned water mains or the most convenient water source. In instances where no City-owned source of water is available, the Contractor shall make his own arrangements with the municipality or other controlling authority and include the cost of all water required during construction in his overall construction cost. No reimbursement will be made.

C. Water used in construction for purposes other than those listed above, including makeup water pumped into the pipe during hydrostatic testing, will be furnished by the City at a charge. This water will be supplied from the most convenient source through the existing piping. However, all water used must be metered through a City meter. The Contractor will be billed by the City based on water usage recorded by the floating meter.

D. When the project is occurring in the City of Opa-Locka, the Contractor shall present to the City, the Fire Department Permit during application with the New Business Office.

E. All piping, fittings, valves and equipment, including pumps and power, required for handling the water shall be furnished by the Contractor. Care shall be exercised in the use of the water and provision shall be made to protect the water supply for contamination and indiscriminate use by unauthorized persons. The Contractor shall use only potable water unless otherwise specifically called out elsewhere herein and then only in the case of sewage force mains, reclaimed water mains or raw water mains.

F. Under no circumstance shall the Contractor utilize a water source, including existing piping, until such source or piping has been approved for use by the City.

1.0.8 MATERIALS AND EQUIPMENT FURNISHED BY THE CONTRACTOR

The general requirements specified herein shall apply to all items of materials and equipment in addition to the Specifications for individual items appearing in the following sections:

A. All materials and equipment furnished by the Contractor for use in the work shall be new and of recent domestic manufacture, and shall be the products of reliable manufacturers who, unless otherwise specified, have been regularly engaged in the manufacture of such material and equipment for at least five (5) years. All components shall, wherever possible, be standard stock articles of well-known domestic manufacturers. Where the plans and specifications designate the product of a particular manufacturer, the product specified has been found suitable for the intended use, but, unless otherwise provided, articles or products of similar characteristics may be offered for the approval of the Engineer. A minimum of six copies (more if so

required herein) of complete descriptive data shall be furnished regarding all articles furnished by the Contractor. The descriptive data shall consist of dimension drawings, catalog references and other information necessary to clearly identify each article. When substitutions are permitted, the Contractor shall make all necessary changes in adjacent or connected structures and equipment at his expense and shall be solely responsible for all cost and time required by any difference in construction methods, fabrication or assembly required and no additional time will be allowed. Any repermitting together with all costs and work associated therewith shall be performed by the Contractor and no additional compensation will be allowed.

B. Where contemplated changes, substitutions or appurtenant work require engineering design, in the opinion of the Engineer, the Contractor shall have such design services performed at his expense. Said engineering design services shall be of an extent satisfactory to the Engineer whose word shall be final and shall be performed by a Registered Professional Engineer licensed to practice in the State of Florida.
C. All water system components shall be in full compliance with NSF/ANSI 61, "Drinking Water System Components - Health Effects," latest revision.

D. The Contractor shall also supply certification that all materials supplied that will come into contact with drinking water conform or will conform with NSF/ANSI 61.

E. The Contractor shall care for and protect against loss or damage all material and equipment to be incorporated in the construction, whether furnished by him/her or by the City, for the duration of the Contract, and shall repair or replace any lost or damaged items. The Contractor shall be relieved of such responsibility only upon final acceptance of all of the work by the Engineer.

F. No material shall be stored so that it is in direct contact with the ground. All metal shall be thoroughly cleaned before being placed in the work. Storage and protection measures shall be subject to approval of the Engineer whose decision shall be final. The Contractor shall immediately protect materials by different methods, materials or to a greater extent if so, directed by the Engineer in the field.

G. Unless otherwise specified or noted on the plans, all steel bolts, nuts, washers, eye bolts, tie rods and all other miscellaneous ferrous metal items shall be American made stainless steel.

H. The Contractor shall have available sufficient tools and equipment to properly perform his work in all areas of the system, including easements or other areas with limited or restricted access or clearances. The Contractor is specifically advised that work in easement may require specialized equipment to satisfactorily perform the work and the capability to accomplish these installations is a requirement of these specifications.

I. Any salvageable pipe, fitting, or other miscellaneous material or equipment, removed during construction and not reused in the work shall be cleaned, hauled to and stored by the Contractor at his expense, where directed by the Engineer, and shall remain the property of the City. All other material and equipment shall be disposed of by the Contractor at his own expense.

J. To ensure satisfactory and successful final painting of materials and equipment to be furnished, it is essential that the paints applied in the shop and in the field be mutually compatible. To this end, the Contractor shall require that the shop paints be applied to materials and equipment be compatible with the paints he proposes to use in the field or shall determine what shop paints have been used and select field paints compatible therewith, all as approved by the Engineer.

K. The Contractor shall furnish the City, with one set of any special tools required for servicing for each type of equipment actually furnished. These tools shall be delivered to the office of the City's Construction Manager, City of Opa-Locka Public Works. A letter of transmittal shall be provided, containing a list of all items being provided.

L. All other material required to complete this project shall be furnished and installed by the Contractor, whether or not shown on the plans or specifically mentioned in the specifications.

M. The Contractor shall procure extended manufacturer's warranties on equipment furnished by him. These warranties shall be kept in force and extended such that the City will be provided a manufacturer's warranty with at least one year to run beyond the date of final acceptance of the project. A copy of the warranty with these provisions clearly stated or with an attached letter of certification from the manufacturer to this effect shall be delivered with the equipment and no payment or partial payment for said equipment will be made until such warranty/certification is delivered to the Engineer.

1. The warranty shall specifically cover the case where the equipment warranted has been replaced by a newer model. In such instance the warranty shall either provide spare parts and service to repair or replace in its entirety the original model, or in lieu of this; provide a complete new model unit to replace the warranted and failing equipment. Should the failing equipment be replaced by a new model, the Contractor shall be responsible for making all necessary changes to adjacent and/or connected equipment at no extra cost to the City and to the satisfaction of the Engineer whose decision shall be final.

2. As a part of final inspection, the Contractor shall deliver to the City in a form satisfactory to the Engineer, either warranties or certifications of warranty

extensions showing the warranties to be in effect at least one year beyond the planned date of final acceptance.

3. All costs for procuring, maintaining and extending these warranties shall remain with the Contractor, even in cases where the contract construction time for completion has been extended. These costs shall be included in the Contractor's bid price and no further compensation will be allowed.

4. In instances, where the City puts an item of equipment into full productive service prior to final acceptance, the warranty shall still be extended to at least one year past final acceptance. However, the City will reimburse the Contractor for the prorated cost of the extended warranty from the time when the equipment was placed in full productive service to the date of final acceptance based upon the manufacturer's invoice to the Contractor for this cost. Only the warranty cost will be reimbursed, no overhead or other costs will be allowed.

N. Extended Warranties:

1. The Contractor shall procure extended manufacturer's warrantees on equipment furnished by him. These warrantees shall be kept in force and extended such that the City will be provided a manufacturer's warrantee with at least one (1) year to run beyond the date of final acceptance of the Project. A copy of the warrantee with these provisions clearly stated or with an attached letter of certification from the manufacturer to this effect shall be delivered with the equipment and no payment or partial payment for said equipment will be made until such warrantee/certification is delivered to the Engineer.

2. The warrantee shall specifically cover the case where the equipment warranted has been replaced by a newer model. In such instance the warrantee shall either provide spare parts and service to repair or replace in its entirety the original model, or in lieu of this; provide a complete new model unit to replace the warranted and failing equipment. Should the failing equipment be replaced by a new model, the Contractor shall be responsible for making all necessary changes to adjacent and/or connected equipment at no extra cost to the City and to the satisfaction of the Engineer whose decision shall be final.

3. As a part of final inspection, the Contractor shall deliver to the City in a form satisfactory to the Engineer, either warrantees or certifications of warrantee extensions showing the warrantees to be in effect at least one (1) year beyond the planned date of final acceptance.

4. All costs for procuring, maintaining and extending these warrantees shall remain with the Contractor, even in cases where the Contract construction time for completion has been extended. These costs shall be included in the Contractor's bid price and no further compensation will be allowed.

5. In instances where the City puts an item of equipment into full productive service prior to final acceptance, the warrantee shall still be extended to at least one (1) year past final acceptance. However, the City will reimburse the Contractor for the prorated cost of the extended warrantee from the time when the equipment was placed in full productive service to the date of final acceptance based upon the manufacturer's invoice to the Contractor for this cost. Only the warrantee cost will be reimbursed, no overhead or other costs will be allowed.

END OF SECTION

01120 SEQUENCE OF CONSTRUCTION

PART 1 – GENERAL 1.0.1

SCOPE OF WORK

A. The sequence of construction has been divided into phases and steps representing major work areas, all of this in order to facilitate to the Contractor the execution of the project and minimize conflicts with operations. The general sequence of construction shall be as described in this Section, but also the City reserves the right to make changes on it.

B. Coordinate sequence of construction with progress schedule to ensure timely performance of the work and project completion within the specified construction time.

C. Special Instructions: It is the intent of the City to construct this project with as little disturbance and annoyance to the pump station's neighbors as possible.

D. The Contractor's equipment must be in first class operating condition, including proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment. The Contractor shall provide a temporary electric service for his electric equipment as specified herein below, and shall pay all cost thereof, including all charges for electricity used during the entire course of the project until its acceptance by the City.

E. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City.

F. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

1.0.2 GENERAL

A. Following receipt of "Notice to Proceed" with the work, the Contractor shall notify the Engineer at least five (5) days before he is ready to start actual construction, to allow the City time to make arrangements for inspection of the work.

B. Contractor's PSM shall reestablish the design baseline, vertical control points and reference points, and establish proposed culvert location in accordance with Section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems", Construction Methods.

C. The Contractor's equipment must be in first class operating condition, including safety features, proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment.

D. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City.

E. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

F. All items shall be performed by the Contractor with special emphasis on the fact that numerous standard and miscellaneous construction phases are not mentioned specifically but shall be performed by the Contractor as required for a completed Project.

G. Water in the trench shall be kept below the level of the pipe to prevent the entry of debris and contaminants into the pipe.

   1. In instances where Section 02220 – Excavation, General, "Alternate Method of Construction" is approved by the Engineer and used for the Project: During construction, the Contractor shall install a temporary plug, or other means approved by the Engineer, on the open end of the pipe in order to prevent debris and trench water backwash from entering the pipe during trench excavation ahead of the installed pipe. The plug shall remain in place until the following length of pipe is ready to be installed. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

H. No separate payment shall be made for the cost of labor and materials required for the removal of nightcaps, plugs, bulkheads or external blocking and bracing of adjacent mains, for the supplying of water for cleaning and testing, nor for the

interconnecting work to adjacent mains unless listed separately in the Quotation, and the cost of this work shall be included in other applicable items of work.

I. The Contractor is advised that, if the work of this project includes work in the public right of way, that work may be shut down by the roadway governing authority during the period from the beginning of the Thanksgiving holiday through the end of the New Year holiday or some portion(s) of that period. Unless otherwise specifically called out herein, or granted by the Engineer in writing, no extension of Project time will be allowed due to such a shutdown. If any extension of time is allowed, it will be of a noncompensable nature. All costs of such a shutdown including any demobilization/remobilization costs shall be the sole responsibility of the Contractor and no extra compensation will be allowed. Upon ending of any such shutdown, the Contractor shall immediately resume construction operations unless otherwise ordered by the Engineer in writing.

J. The Contractor shall fully comply with any special working hours, and with all other requirements of the Permits, at no additional cost to the City. Working hours noted in permits or the specifications are subject to change. In the event that changed working hours effects the work of the Contractor, the Contractor's sole remedy shall be a noncompensable time extension. Said extension to be full compensation for all direct and indirect costs, including but not limited to loss of efficiency, loss of opportunity, increased bond or insurance premiums, or home office or extended overhead, incurred by the Contractor as a result of such change, and no additional compensation shall be considered. Night work may be required as a part of the construction.

K. New or altered potable water mains, including services, that will be under City control and have an inside diameter of three inches or larger shall be disinfected and bacteriologically evaluated in accordance with FAC Rule 62-555.340. Note that the above requirements are minimum, and the City may require more stringent procedures and routinely requires all services of whatever size be tested and disinfected along with the main. These more stringent or extensive requirements shall be performed by the Contractor and no extra compensation will be allowed.

L. All pipe and fittings installed under this project shall be color coded or marked as required by FAC Rule 62-555.320(21)(b)3, using blue as a predominant color to differentiate drinking water from reclaimed or other water and green as the predominant color for sanitary sewage facilities. Underground metal or concrete pipe shall have colored stripes applied to the pipe wall. Pipe striped during manufacturing of the pipe shall have continuous stripes that run parallel to the axis of the pipe, that are located at no greater than 90-degree intervals around the pipe, and that will remain intact during and after installation of the pipe. If tape or paint is used to stripe pipe during installation of the pipe, the tape or paint shall be applied in a continuous line that runs parallel to the axis of the pipe and that is located along the top of the pipe;

for pipes with an internal diameter of 24 inches or greater, tape or paint shall be applied in continuous lines along each side of the pipe as well as along the top of the pipe. Striping shall be continuous and run the full length of the pipe. Aboveground pipe shall be painted shall be color coded or marked like underground pipe.

M. The Contractor shall take steps to provide accessibility for local traffic. The construction in this area shall proceed as quickly as possible and paving shall follow immediately to reduce inconvenience to residents in this area of the project.

N. The Contractor shall take pictures of the work site, in accordance with Section 01380 "Construction Photographs," prior to the start of any construction.

O. The Contractor is advised that, during the construction of the Project, the Construction Manager may require the Contractor to adjust the location of the proposed valves. This relocation(s) shall be performed at no additional cost to the City.

P. Locations of solid sleeves are for general information only. Exact location of solid sleeves shall be determined in the field by the Engineer. Prior to installation of solid sleeves, the pipe and fittings shall be hosed and kept clean, then swabbed with disinfectant as necessary for water main installation. Water in trench shall be kept below the pipe invert.

1.0.3 EXISTING WATER MAINS AND FORCE MAINS

A. The existing mains in the project area shall remain in service until the new mains are placed in service. Connections and disconnections together with cut, plug and abandonment work shall be coordinated through the City's Construction Manager. In all instances, the City's Construction Manager shall, beginning with the Preconstruction Meeting, coordinate with the Operations Division to pre-determine the notification lead times required for various operations.

1.0.4 SEQUENCE OF WORK

A. The general sequence of construction shall be as follows, but **a detailed sequence of construction shall be submitted by the Contractor and approved by the Engineer before any work is started**. The City reserves the right to make changes to the sequence as necessary to facilitate the work or to minimize conflict with operations and no extra compensation will be allowed.

B. CAPITALIZED ITEMS INDICATE WORK OR FUNCTIONS TO BE PERFORMED BY CITY FORCES. All other items shall be performed by the Contractor with special emphasis on the fact that numerous standard and miscellaneous construction phases

are not mentioned specifically but shall be performed by the Contractor as required for a complete Project.

Note: For simplicity, the Sequence of Construction below will not detail the following items. **These shall be the responsibility of the Contractor and no extra compensation will be allowed.**

1. Contractor's field verification of all information provided in the Plans and to determine the type, location, elevation, and extent of any utilities which may not have been shown on the Plans.

2. Notify "Sunshine State One-Call of Florida Inc., 811," forty-eight (48) hours prior to any excavation. Locate all utilities along the route of the Project.

3. Contractor's operations involving removal of the existing Culvert shall include:

   a. Excavate existing Culvert pipes and provide proper flow diversion between the Canal.

4. Installation of new Culvert system, including piping, mitered end section, backfilling, rip rap placement, and concrete pavement.

5. Construction of concrete curb and gutter, sidewalk, handicap access ramp, and guardrails.

6. Milling and resurfacing of pavement extents.

7. Contractor's PSM shall reestablish the design baseline, vertical control points and reference points, and establish proposed pipeline location in accordance with Section 02314 "Excavation, Backfill and Fill for Structural Facilities and Utility Systems - Construction Methods."

8. After items 6 and 7 are completed, the Contractor shall meet with the City Inspector at the Project site and perform a pre-construction walk-through along the entire route of the Project to identify possible problems or conflicts with the proposed pipeline location.

9. The general sequence of work shall be as follows:

1) Phase I – Mobilization

Step – 1 Initiate mobilization. The Contractor shall set up storage, staging and parking areas, temporary environmental controls and tree protection devices in the project site. Obtain permits, develop and submit construction schedule and start shop drawing submittal. Contractor shall allow access to the other facilities within the project area, including adjacent businesses and homes at all times during construction.

Step – 2 Call for locates (Sunshine 811) and document all location marks in the field.

Step – 3 Contractor shall include the necessary provisions to safeguard the existing utilities noted within the project area. Furthermore, the Contractor shall be advised that the utilities shown on plans are based on best available information and shall take all necessary precautions to confirm, identify, preserve, and maintain the integrity while performing construction.

Step – 4 Contractor shall **immediately** open a dialog with all existing utilities in the project area. Contractor shall notify Engineer of any utility relocation requirements and costs. Utility relocations shall be reimbursed under a dedicated allowance account. Failure to properly coordinate any required utility relocations may result in delays for which the Contractor may be liable for.

Step – 5 Verify locations, elevations, dimensions, manufacturer of pipes, equipment, etc., before ordering materials to complete the work in accordance with the Contract Documents, Shop Drawings and field conditions.

Step – 6 Upon approval of shop drawings, order long lead items so that materials may be delivered in a timely fashion without delays to construction.

2) Phase II – Demolition of Existing Culvert and Appurtenances NOTE: Refer to Drawings, Sheets C-01 and C-02

Step – 1 Installation of all Erosion Control measures within the Canal.

Step – 2 Removal of existing concrete pavement, concrete headwall, and culvert piping.

Step – 3 Prepare temporary bypass system, if necessary, to divert Canal flows from East to West and vice versa. After successful flow diversion and authorization by the City; the Contractor shall proceed with the installation of the removal of the existing Culvert piping.

3) Phase III – New Culvert Installation

Step – 1 Prepare bedding material to lay stone base for new piping.

NOTE: The Contractor shall provide appropriate shoring to conduct the stone bedding and 66-inch SRASP pipe installation in dry conditions.

Step – 2 Secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations.

Step – 3 The Contractor shall secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations and up to elevation established on plans. Embankment slopes shall be established.

Step – 4 Install concrete headwall at pipe ends.

Step – 5 Install geotextile matting and, sand-cement and Rubble Stone embankment stabilization.

Step – 6 Lay new concrete curb and gutter and sidewalk.

Step – 7 Install new guardrail.

Step – 8 Install new concrete shoulder barrier

4) Phase IV – Final Sitework and Project Closeout

Step – 1 Form and pour the 8" thick concrete pavement surface above Culvert piping.

Step – 2 Lay new concrete curb and gutter and sidewalk.

Step – 3 Mill and resurface top 1" surface course of roadway.

Step – 4 Paint roadway pavement markings and remove temporary construction signage.

Step – 5 Demobilization and related closeout activities shall be in accordance with section 01700 "Project Closeout".

Step – 6 Complete all remaining miscellaneous and appurtenant work, including restoration of damaged survey control points, landscape restoration and final inspection and cleanup.

C. The Contractor's equipment must be in first class operating condition, including proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment. The Contractor shall provide a temporary electric service for his electric equipment as specified herein below, and shall pay all cost thereof, including all charges for electricity used during the entire course of the project until its acceptance by the City. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

PART 2 PRODUCTS

END OF SECTION

01200 PROJECT MEETINGS

PART 1 – GENERAL 1.0.1.

PROJECT SCHEDULES

A. General: Develop and submit for approval by the City a construction progress schedule and phasing plan demonstrating complete fulfillment of all Contract requirements including all activities of Subcontractors, equipment vendors and suppliers. Unless otherwise directed by the Engineer, the construction progress schedule shall be computer developed and maintained using Microsoft Project software as manufactured by Microsoft Corporation, Primavera, or equal. The Contractor shall prepare a network plan utilizing CPM (Critical Path Method). The City reserves the right to request progress schedule on magnetic media.

B. Submittal: The progress schedule shall be plotted on 11-inch by 17-inch paper and shall be reviewed and updated monthly, depicting progress through the last day of the current month and scheduled progress through completion. Six up to date copies of the schedule shall be submitted along with the application for monthly progress payments for the same period.

1. Immediately after award of contract, submit for review the progress schedule describing the activities to be accomplished and their dependency relationships, showing starting and completion dates for each activity in terms of the number of days after receipt of Notice to Proceed. All completion dates shown shall be within the period specified for contract completion.

2. After receipt and initial review, the Engineer will meet with the Contractor for joint review, correction or adjustment of the proposed plan and schedule. Within five (5) calendar days after the joint review, the Contractor shall revise the schedule in accordance with agreements reached during the joint review and shall submit two copies of the revised schedule. After the Contractor has received both the Notice to Proceed and the approved copy of the schedule, he shall immediately add calendar dates in lieu of the number of days from the date of Notice to Proceed and shall furnish two copies of the revised schedule to the Engineer.

C. Schedule Requirements:

1. Show the sequence and interdependence of activities required for complete performance. In preparing the schedule, break up the work into activities of a duration of no longer than fifteen working days each, except as to non-construction activities (such as procurement of materials, delivery of equipment and concrete curing) and any other activities for which the Engineer may approve the showing of longer duration. The schedule shall show the activities for actual construction work for each trade category of the project. The Contractor is to include a schedule of submittals of shop drawings, equipment schedules, coordination drawings, templates, fabrication, delivery and the like, and review and approval of shop drawings. Activities related to a specific physical area of the project shall be grouped on the schedule for ease of understanding and simplification. Activity

duration (i.e. the single best estimate, considering the scope of the activity, and the resources planned for the activity) shall be shown on each activity on the diagram. To the extent that the schedule or any revised schedule shows anything not jointly agreed upon or fails to show anything jointly agreed upon, it shall not be deemed to have been approved by the Engineer. Failure to include any element of work required for the performance of this Contract shall not excuse the Contractor from completing all work required within any applicable completion date, notwithstanding the City's approval of the schedule.

2. Include a cost estimate for each activity which cumulatively equals the total Contract cost. Estimated overhead and profit shall be prorated throughout all activities. The partial payments as defined under the General Conditions will be based on these approved activity costs.

3. With each request for a partial payment, submit a copy of the approved schedule marked to show the activities completed and partially completed, for which payment is requested.

4. The Contractor is advised that, if the work of this project includes work in the public right of way, that work may be shut down by the roadway governing authority during the period from the beginning of the Thanksgiving holiday through the end of the New Year holiday or some portion(s) of that period. Unless otherwise specifically called out herein, or granted by the Engineer In writing, no extension of Project will be allowed due to such a shutdown. If any extension of time is allowed, it will be a non-compensable nature. All costs of such a shutdown including any demobilization/re-mobilization costs shall be the sole responsibility of the Contractor and no extra compensation will be allowed. Upon ending of any such shutdown, the Contractor shall immediately resume construction operations unless otherwise ordered by the Engineer in writing.

5. The Contractor shall fully comply with any special working hours, and with all other requirements of the Permits, at no additional cost to the City. Working hours noted in permits or the specifications are subject to change. In the event that changed working hours affects the work of the Contractor, the Contractor's sole remedy shall be a non-compensable time extension. Said extension to be full compensation for all direct and indirect costs, including but not limited to loss of efficiency, loss of opportunity, increased bond or insurance premiums, or home office or extended overhead, incurred by the Contractor as a result of such change, and no additional compensation shall be considered. Night work may be required as a part of the construction.

1.0.2. PROGRESS MEETINGS

A. General progress meetings will be held once each week at which every entity then involved in the planning, coordination and performance of work shall be discussed. The progress of each element of current work shall be discussed as to whether it is ahead of schedule, on time or behind time in relation to the updated progress schedule. For each meeting, the Contractor shall prepare a detailed three (3) week "look ahead" schedule in addition to, showing the progress schedule of the previous week. Methods to expedite behind-time work shall be determined, and commitments secured for bringing back to the scheduled date for the entities involved. Everything of significance which could affect the progress of the work, including schedule revisions, shall be discussed to ensure that current and subsequent work will be completed within the Contract time. Within three days after each meeting, copies of the minutes of the meeting, including a brief summary of progress of the work since the previous meeting, shall be distributed to each present or who should have been present. Whenever revisions to the progress schedule have been made or recognized at the progress meeting, a copy of the revised schedule shall accompany the minutes distributed.

B. Each computer-generated construction progress schedule and report shall include the following minimum items:

1. Activity Numbers.
2. Duration Estimate.
3. Activity Description.
4. Early Start Date (Calendar Dated).
5. Early Finish Date (Calendar Dated).
6. Latest Allowable Start Date (Calendar Dated).
7. Latest Allowable Finish Date (Calendar Dated).
8. Status (whether critical).
9. Estimated Cost of The Activity.
10. Total Float and Free Float.

C. In addition, each construction progress schedule, network analysis and report shall be prefaced with the following summary data:

1. Contract Name and Number.

2. Contractor's Name.

3. Contract Duration.

4. Contract Schedule.

5. The Effective or Starting Date of The Schedule (the date indicated in the Noticeto-Proceed).

D. The workday to calendar date correlation shall be based on an 8-hour day and 40hour week with adequate allowance for holidays, adverse weather and all other special requirements of the work. Normal work hours are Monday thru Friday, 7:30 am to 4:30 pm.

E. If the Contractor desires to make changes in the method of operating which affects the construction progress schedule and related items, he/she shall notify the Engineer in writing stating what changes are proposed and the reason for the change. If the Engineer accepts these changes, in writing, the Contractor shall revise and submit, without additional cost to the City, all of the affected portions of the construction progress schedule, and associated reports. The construction progress schedule and related items shall be adjusted by the Contractor only after prior acceptance, in writing by the Engineer. Adjustments may consist of changing portions of the activity sequence, activity durations, division of activities, or other adjustments as may be required. The addition of extraneous, non-work activities and activities which add restraints to the construction progress schedule shall not be accepted.

F. Except where earlier completions are specified, schedule dates which show completion of all work prior to the contract completion date shall, in no event, be the basis for claim for delay against the City by the Contractor.

G. Construction progress schedules and related items which contain activities showing negative float or which extend beyond the contract completion date will not be accepted by the Engineer. Whenever it becomes apparent from the current construction progress schedule and associated reports that delays to the critical path have resulted and the contract completion date will not be met, or when so directed by the Engineer, the Contractor shall take some or all of the following actions at no additional cost to the City. They shall submit to the Engineer for approval, a written statement of the steps they intend to take to remove or arrest the delay to the critical path in the current construction progress schedule.

1. Increase construction manpower in such quantities and crafts as will substantially eliminate the backlog of work.

2. Increase the number of working hours per shift, shifts per day, working days per week, the amount of construction equipment, or any combination of the foregoing, sufficiently to substantially eliminate the backlog of work.

3. Reschedule activities to achieve maximum practical concurrence of accomplishment of activities and comply with the revised schedule.

H. If when so requested by the Engineer, the Contractor should fail to submit a written statement of the steps they intend to take or should fail to take such steps as reviewed and accepted in writing by the Engineer, the Engineer may direct the Contractor to increase the level of effort in manpower (trades), equipment and work schedule (overtime, weekend and holiday work, etc.) to be employed by the Contractor in order to remove or arrest the delay to the critical path in the current construction progress schedule, and the Contractor shall promptly provide such level of effort at no additional cost to the City.

I. If the completion of any activity, whether or not critical, falls more than 100 percent behind its previously scheduled and accepted duration, the Contractor shall submit for approval a schedule adjustment showing each such activity divided into two activities reflecting completed versus uncompleted work.

J. Shop drawings which are not approved on the first submittal or within the time scheduled, and equipment which does not pass the specified tests and certifications shall be immediately rescheduled.

K. The contract time will be adjusted only in accordance with the General Requirement and other portions of the Contract Documents as may be applicable. If the Engineer finds that the Contractor is entitled to any extension of the contract completion date, the Engineer's determination as to the total number of days extension shall be based upon the current construction progress schedule and on all data relevant to the extension. Such data shall be included in the next updating of the schedule and related items. Actual delays in activities which, according to the construction progress schedule, do not affect any contract completion date will not be the basis for a change therein.

L. From time to time it may be necessary for the contract schedule of completion time to be adjusted by the City in accordance with the General Requirements and other portions of the Contract Documents as may be applicable. Under such conditions, the Engineer will direct the Contractor to reschedule the work or contract completion time

to reflect the changed conditions, and the Contractor shall revise the construction progress schedule and related items accordingly, at no additional cost to the City.

M. Available float time may be used by the City through the City's Engineer.

N. The City controls the float time and, therefore, without obligation to extend either the overall completion date or any intermediate completion dates the City may initiate changes that absorb float time only. City initiated changes that affect the critical path on the network diagram shall be the sole grounds for extending the completion dates. Contractor-initiated changes that encroach on the float time may be accomplished only with the City's concurrence. Such changes, however, shall give way to City-initiated changes competing for the same float time.

O. To the extent that the construction project schedule, or associated report or any revision thereof shows anything not jointly agreed upon or fails to shown anything jointly agreed upon, it shall not be deemed to have been accepted by the Engineer. Failure to include on a schedule any element of work required for the performance of this Contract shall not excuse the Contractor from completing all work required within any applicable completion date, notwithstanding the review of the schedule by the Engineer

P. Review and acceptance of the construction progress schedule, and related reports, by the Engineer is advisory only and shall not relieve the Contractor of the responsibility for accomplishing the work within the contract completion date. Omissions and errors in the construction progress schedule, and related reports shall not excuse performance less than that required by the Contract and in no way make the Engineer an insurer of the Contractor's success or liable for time or cost overruns flowing from any shortcomings in the construction progress schedule, and related reports.

Q. The Contractor shall present and discuss the proposed schedule at the preconstruction conference.

R. The construction progress schedule shall be based upon the precedence diagramming method of scheduling and shall be prepared in the form of a horizontal bar chart showing in detail the proposed sequence of the work and identifying all construction activities included but not limited to yard piping, all structures and treatment units and all related work specified herein to be performed under the Contract. The schedule shall be time scaled, identifying the first day of each week, with the estimated date of starting and completion of each stage of the work in order to complete the project within the contract time. The project critical path shall be clearly identified.

1.0.3. DAILY REPORTS

A. Prepare and submit to the Engineer at regular intervals not exceeding weekly intervals, a daily report recording information concerning events at the site. The daily reports shall contain the following and any other significant information:

1. General weather conditions, rain, high/low temperatures.
2. List of Subcontractors on site.
3. List of separate Contractors at the site, if any.
4. Meetings and significant decisions.
5. Stoppages, delays, shortages, losses.
6. Emergency procedures, field orders.
7. Orders/requests by governing authorities.
8. Other events or activities.
9. Partial completions.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION NOT

USED

END OF SECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Submittals covered by these requirements include manufacturers' information, shop drawings, test procedures, test results, samples, requests for substitutions, and miscellaneous work-related submittals. Submittals shall also include, but not be limited to, all mechanical, materials, reinforcing steel, fabricated items, and piping and conduit details. The Contractor shall furnish all drawings, specifications, descriptive data, certificates, samples, tests, methods, schedules, and manufacturer's installation and other instructions as specifically required in the contract documents to demonstrate fully that the materials and equipment to be furnished and the methods of work comply with the provisions and intent of the contract documents.

B. The Contractor shall submit copies of all permit applications, permit submittals, permit comments and permit approvals.

C. Within 10 calendar days after Notice to Proceed, Contractor shall submit a complete list of all anticipated submittals including shop drawings, submittals, and product data with an anticipated delivery date to the Engineer and review and approval times. This shall be reviewed during the Project Kickoff Meeting and shall be continuously updated and reviewed during Project Progress Meetings.

1.0.2. CONTRACTOR'S RESPONSIBILITY

A. The Contractor shall be responsible for the accuracy and completeness of the information contained in each submittal and shall assure that the material, equipment or method of work shall be as described in the submittal. The Contractor shall verify that all features of all products conform to the specified requirements. Submittal documents shall be clearly edited to indicate only those items, models, or series of equipment, which are being submitted for review. All extraneous materials shall be crossed out or otherwise obliterated. The Contractor shall ensure that there is no conflict with other submittals and notify the Engineer in each case where his submittal may affect the work of another Contractor or the Owner. The Contractor shall coordinate submittals among its Subcontractors and suppliers including those submittals complying with unit responsibility requirements.

B. Record Drawings: Refer to Section 01720 "Project Record Drawings".

C. As-Built Record Drawings: Refer to Section 01725 "As-Built Record Drawings".

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION NOT

USED

END OF SECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Before proceeding with the erection of the construction plan, including the setting or placing thereof, and the erection of other temporary structures, the Contractor shall furnish the Engineer with such information and plans as the City may require.

B. Shop Drawings (including Pre-Approved Product List submittals) shall be submitted prior to any project construction activity. In a timely fashion, well before the contemplated ordering for fabrication of special order or long-lead items or construction use of any standard element of the work, the Contractor shall furnish Shop Drawings for the review and approval of the City.

C. It is the Contractor's sole responsibility, upon the first occasion of submittal of a particular element of the work, to submit Shop Drawings of an element which match and fulfill the requirements and intent of the plans and specifications. Any delays or costs caused, either directly or indirectly, by non-timely submissions; submission of items differing significantly from the intent of the plans and/or specifications; repeated submission of, or argument over, rejected elements or changes required for acceptance; arguments with the criteria or requirements of the plans or specifications; or any other such similar activities shall be at the expense of the Contractor.

D. It is the intent of the Contract Documents that the Contractor shall, in the first instance, submit Shop Drawings of elements which meet or exceed the requirements of the Contract Documents and fit with the other elements of the work and the existing conditions. Delays or the inability to obtain shop drawing approval may subject the Contractor to costs for liquidated or actual damages as specified in the Contract.

1.0.2. DESCRIPTION OF WORK

A. It is the intent of the Contract Documents that the Contractor shall, in the first instance, submit Shop Drawings of elements which meet or exceed the requirements of the Contract Documents and fit with the other elements of the work and the existing conditions. Delays or the inability to obtain shop drawing approval may subject the Contractor to costs for liquidated or actual damages as specified in the Contract.

B. After award of the project, the Contractor may begin providing submittals for approval. Submit to the Engineer a complete list of preliminary data on items for which Shop

Drawings are to be submitted. Included in this list shall be the names of all proposed manufacturers furnishing specified items. Review of this list by the Engineer shall in no way expressed or implied relieve the Contractor from submitting complete Shop Drawings and providing materials, equipment, etc., fully in accordance with the specifications. This procedure is required in order to expedite final review of Shop Drawings.

C. Maintain an accurate updated Shop Drawing submittal log which shall include the following items:

1. Submittal Description and Number Assigned.
2. Specification Section.
3. Plans Sheet Number.
4. Date to Engineer.
5. Date Returned to Contractor (from Engineer).
6. Status of Submittal (Approved, Approved as Noted, Rejected/Resubmit).
7. Date of Resubmittal and Return (as Applicable).
8. Date Material Release (for Fabrication).
9. Projected Date of Fabrication.
10. Projected Date of Delivery to site.
11. Status of O & M Manuals Submittal.

1.0.3. CONTRACTOR'S RESPONSIBILITY

A. Furnish the Engineer with a schedule of Shop Drawings submittals, fixing the respective dates for the submission of Shop Drawings, the beginning of manufacture, testing and installation of materials, supplies and equipment. This schedule shall indicate those that are critical to the progress schedule.

B. Submit to the Engineer all plans and schedules sufficiently in advance of construction requirements to provide maximum time for checking and appropriate action from the time the Engineer receive them.

C. It is the duty of the Contractor to check and approve all plans, data and samples prepared by or for him/her before submitting them to the Engineer for review. Each and every copy of the plans and data shall bear Contractor's stamp showing that they have been checked and approved. Shop Drawings submitted to the Engineer without the Contractor's stamp and approval shall be returned to the Contractor for conformance with this requirement before Engineer's review. ***Shop Drawings shall indicate any deviations in the submittal from requirements of the Project Documents and the Contractor shall state the reason why a deviation is required.***

D. All submittals shall be accompanied by a submittal registry and transmittal letter containing the following information:

1. Date.

2. Project Title and Number.

3. Contractor's name and address.

4. The number of each Shop Drawing, Data, and Sample submitted.

5. Notification of Deviations from Project Documents.

6. Submittal Log Number conforming to and referring to Specification Section Number.

7. Contractor signature or of its authorized representative.

E. Submit seven copies of Shop Drawings and of descriptive or product data submittals necessary to complement Shop Drawing. The Engineer will retain five sets.

F. After receiving approval by the Engineer, the Contractor shall be responsible for submitting the Shop Drawings to the City. Shop Drawings of all premanufactured items and all other Shop Drawings are required to obtain approval prior to manufacturing or installing the submitted items. The Contractor shall also be responsible for contesting any interpretations by the City that considers non-acceptable. The Contractor shall include in the bid prices, all costs for permits, fees and expenses associated with the submittals, including resubmittals (if any) of Shop Drawings to the City.

G. Do not begin any of the work covered by a drawing, data, or a sample returned as "Rejected/Resubmit" until a revision or correction thereof has been reviewed and returned to the Contractor, by the Engineer, with approval or approval "As Noted". Be responsible for and bear all costs of damages which may result from the ordering of any material or from proceeding with any part of work prior to receiving Engineer's approval or approval "As Noted" of the necessary Shop Drawings.

H. Be fully responsible for observing the need for and for making any changes in the arrangement of piping, connections, wiring, manner of installation, etc., which may be required by the materials/equipment the Contractor proposes to supply, both as they pertain to the Contractor's own work, work of others, or of other Divisions herein or Trades and clearly show such changes on the Shop Drawings.

I. When substitutions in materials or equipment are allowed, the Contractor shall make all necessary changes in adjacent or connected structures and equipment at his expense. Where contemplated changes, substitutions or appurtenant work require engineering design, in the opinion of the Engineer, the Contractor shall have such design services performed at his expense.

J. When substitutions in materials or equipment are allowed, the Contractor shall be solely responsible for all costs and time required by any differences in construction methods, fabrication or assembly required and no additional time will be allowed.

K. Determine and verify:

1. Field measurements.

2. Field construction criteria.

3. Catalog numbers and similar data.

4. Conformance with specifications.

5. That installation and maintenance clearances are sufficient particularly when equipment or arrangement changes have been made.

1.0.4. ENGINEER'S REVIEW OF SHOP DRAWINGS

A. Engineer's review of plans, data and samples, submitted by the Contractor will cover only general conformity to the drawing and specifications. The Engineer's review will not constitute an approval of dimensions, quantities, and details of the material,

equipment, device, or item shown. The review of plans and schedules will be general, and shall not be construed:

1. As permitting any departure from the Contract requirements.

2. As relieving the Contractor of responsibility for any errors, including detail, dimensions, and materials.

3. As approving departures from details furnished by the Engineer, except as otherwise provided herein.

B. Variations:

1. If the plans or schedules, as submitted, describe variations per paragraph 1.03 C, and show a departure from the Contract requirements which Engineer finds to be in the interest of the City and to be so minor as not to involve a change in Contract price or time for performance, the Engineer may return the reviewed plans without noting an exception.

2. If the plans or schedules, as submitted, describe variations and show a departure from the Contract requirements which the Engineer finds to be minor enough to be corrected by redlining the submittal, the Engineer will mark and return the submittal marked "Approved as Noted." The redlined corrections shall be as binding on the Contractor as would be a resubmission embodying the same corrections.

C. When reviewed by the Engineer, each of the Shop Drawings shall be stamped and dated to indicate it had been reviewed. Shop Drawings stamped "Revise and Resubmit" and with required corrections shown will be returned to the Contractor for correction and resubmittal.

D. If the Contractor considers any correction indicated on the Shop Drawings to constitute a change to the project plans or specifications, the Contractor shall give written notice thereof to the Engineer who will render a decision which shall be final. After the decision has been made, the Contractor shall without delay, provide the corrections to the plans.

E. When the Shop Drawings have been approved by the Engineer, the Contractor shall carry out the construction in accordance therewith and shall make no further changes therein except upon written instructions from the Engineer.

F. No partial submittals will be reviewed. Submittals not complete will be returned to the Contractor for resubmittal.

1.0.5. SHOP DRAWINGS

A. Shop drawings shall be of such character that they may be used as fabrication drawings. Prior to submission, the Contractor shall thoroughly check such drawings, satisfying himself that they meet the requirements of the Plans and Specifications and that they are coordinated with the arrangements set forth on other shop drawings, and shall place on them the Project Number, the date and his signature and stamp of approval. Where items for which shop drawings are submitted are to meet special conditions listed in the detailed Specifications, the conditions shall be so noted on the drawing. Where there is a deviation from the Specifications, the Contractor shall note it and state the reason why a deviation is required. Two copies will be returned to the Contractor with the Engineer's mark of approval thereon, or will be marked to indicate changes necessary to effect compliance with the Specifications and the remaining copies will be retained by the City. When shop drawings are approved by the Engineer, they shall be as binding as any of the Contract Documents. Any errors or omissions on the shop drawings shall not relieve the Contractor of his responsibility.
   He shall correct such errors, or omissions, including any necessary additions or alterations to construction, at his expense upon notification by the Engineer.

B. Shop drawings submitted without the required approval as specified above shall be returned without review and no extension of time will be granted for any delays caused by such improper submission.

C. The approval of shop drawings and data will be general, and shall mean that upon examination of the shop drawings, no variations from the Contract requirements have been discovered, and approval will not relieve the Contractor of his responsibilities as defined under the Contract.

D. When used in the Project Documents, the term "Shop Drawings" shall be considered to mean Contractor's plans for materials and equipment which become an integral part of the project. These Shop Drawings shall be complete and detailed. Shop Drawings shall consist of fabrication, erection and setting drawings and schedule drawings, manufacturer's scale drawings, and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature, and performance/test data shall be considered only as supportive to required Shop Drawings as defined above.

E. Manufacturer's catalog sheets, brochures, diagrams, illustrations and other standard descriptive data shall be clearly marked to identify pertinent materials, product or models. Information which is not applicable to the work shall be deleted by striking or cross hatching.

F. If plans show variations from Contract requirements because of standard shop practice or for other reasons, describe such variations in the letter of transmittal. If no explanation of these variations is provided, the Contractor shall not be relieved of the responsibility for executing the work in accordance with the Contract, even though such plans have been reviewed and approved.

G. For all mechanical and electrical equipment furnished, provide a list including the equipment name, address of and telephone number of the manufacturer's representative and service company so that service and/or spare parts can be readily obtained.

H. All manufacturers or equipment suppliers who propose to furnish equipment or products shall submit an installation list to the Engineer along with the required Shop Drawings. The installation list shall include at least five installations where identical equipment has been installed and has been in operation for a period of at least five years, unless otherwise specified. Manufacturers and/or equipment which fails to meet the specified experience period will be considered if the manufacturer or supplier provides a bond or cash deposit which will guarantee replacement of the equipment or process in the event of failure or unsatisfactory service.

I. Only the Engineer will utilize the color "red" in marking Shop Drawing submittals.

1.0.6. REQUIRED INFORMATION

A. Submit, as applicable, the following for all prefabricated or manufactured structural, mechanical, electrical, plumbing, process system, and equipment work:

1. Shop Drawings or equipment drawings, including dimensions, size and location of connections to other work, and weight of equipment.

2. Catalog information and cuts.

3. Installation or placing plans for equipment, drives, and bases.

4. Supporting calculations, signed and sealed by a Florida Registered Engineer when required, for equipment and associated supports, or hangers required or specified to be designed by equipment manufacturers.

5. Signed and sealed calculations and plans by in-house Florida Registered Professional Engineer for structural systems, indicating compliance to the structural design criteria specified in the plans.

6. Complete manufacturer's specifications, including materials description and paint system.

7. Performance data and pump curves.

8. Suggested spare parts with current price information.

9. List of special tools required for testing, checking, parts replacement, and maintenance. (Special tools are those which have been specially designed or adapted for use on parts of the equipment, and are not customarily and routinely carried by maintenance mechanics)

10. List of special tools furnished with the equipment

11. List of materials and supplies required for the equipment prior to, and during startup

12. List of materials or supplies furnished with the equipment

13. Special handling instructions

14. Requirements for storage and protection prior to installation

15. Requirements for routine maintenance required prior to equipment startup

16. List of all requested exceptions to the Project Documents

1.0.7. SUBMITTAL REQUIRED FOR FOREIGN MANUFACTURED ITEMS

A. In addition to the submittal requirements stated above, suppliers of foreign manufactured items shall submit the names and addresses of companies within the United States that maintain technical service representatives and a complete inventory of spare parts and accessories for each foreign-made item proposed for incorporation into the work. Failure to prove these capabilities shall be cause for rejection of the foreign manufactured items.

B. Foreign manufactured equipment and materials shall in all cases be clearly and permanently marked with the manufacturer's name and country of origin of the item. The name of the U.S. importing/supplying firm is not acceptable. Shop Drawing submittals of foreign-made items shall be accompanied by written information to include name and location (i.e. country, City, and street address) of the manufacturer. This requirement shall also apply to the foreign made elements of items assembled in this country from parts wholly or partially manufactured overseas.

1. The words, "Permanently Marked" as used in this paragraph shall mean; die stamped, cast-in, welded, or otherwise marked such that the removal of the marking by any mechanical or chemical means will result in obvious permanent damage to the surface marked. These markings shall be on surfaces which are not hidden by assembly.

C. Where specified elsewhere herein or at the sole discretion of the Engineer, whose word shall be final, supply verification of quality, suitability or other aspects, as directed by the Engineer, from a Professional Engineer licensed to practice in the State of Florida or the state where the supplying U.S. firm is located. The verification shall be signed, sealed, and dated. All costs for this verification shall be at the sole expense of the Contractor and no extra compensation will be allowed. Verification by foreignbased engineers, firms, manufacturers, etc. will not be acceptable.

1.0.8. SAMPLES

A. Furnish for the approval of the Engineer, samples required by the Project Documents or required by the Engineer. Samples shall be delivered to the Engineer as specified or directed. The Contractor shall prepay all shipping charges on samples. Materials or equipment for which samples are required shall not be used in work until approved by the Engineer.

B. Samples shall be of sufficient size and quantity to clearly illustrate:

1. Functional characteristics of the product, with integrally related parts and attachment devices.

2. Full range of color, texture and pattern.

3. A minimum of two samples of each Item shall be submitted.

C. Each sample shall have a label indicating:

1. Name of Project.

2. Material or Equipment Represented.

3. Name of Producer and Brand (if any) Location in Project.

D. Prepare a transmittal letter in triplicate for each shipment of samples containing the information specified herein in Paragraph 1.05 A. Enclose a copy of this letter with the

shipment and send a copy of this letter to the Engineer. Approval of a sample shall be only for the characteristics or use specified and shall not be construed to change or modify any Contract requirements.

E. Approved samples of the hardware in good condition will be marked for identification and may be used in the work. Materials and equipment incorporated in work shall match the approved samples.

1.0.9. SUSTITUTION

A. Changes in products, materials, equipment, and methods of construction required by the Contract Documents, which are proposed by the Contractor after award of the Contract, are considered to be requests for substitutions. Where the plans and/or specifications designate the products of a particular manufacturer, the product specified has been found suitable for the intended use. Articles or products of similar characteristics may be offered for the approval of the Engineer, whose decision shall be final. Copies of complete descriptive data shall be furnished regarding all materials furnished by the Contractor, consisting of Dimension drawings, catalog references, product data, cost, and other information necessary to clearly identify and evaluate each article.

B. When substitutions are permitted, the Contractor shall make all necessary changes in adjacent, connected, or other structures and equipment at his expense. the Contractor shall make all necessary changes in adjacent or connected structures and equipment at his expense. Where contemplated changes, substitutions or appurtenant work require engineering design, in the opinion of the Engineer, the Contractor shall have such design services performed at his expense. Said engineering design services shall be of an extent satisfactory to the Engineer whose word shall be final and shall be performed by a Registered Professional Engineer licensed to practice in the State of Florida.

C. Where there is a deviation from the Specifications, the Contractor shall note it and state the reasons why a deviation is required.

D. Where engineer-recommended changes, substitutions or appurtenant work require engineering design, the Contractor shall have such design services performed. Those engineering design services shall be of an extent satisfactory to the Engineer, whose decision shall be final.

E. The approval of Pre-Approved product sheets, shop drawings and data will be general and shall mean that upon examination of the drawings, no variations from the approved project drawings and project requirements have been discovered, and approval will not relieve the Contractor of his responsibilities as defined above. The

City's review will not constitute an approval of dimensions, quantities and details of the material, equipment or item shown.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01380 CONSTRUCTION PHOTOGRAPHS AND VIDEO PHOTOGRAPHY

PART 1 – GENERAL 1.0.1

DESCRIPTION OF WORK

A. This section specifies the taking and submission of construction photographs and audio-video photography.

B. Prior to the delivery of any equipment, materials or supplies to the site of any work, or to the beginning of any of the construction work, the Contractor shall provide preconstruction photography as specified herein for the purpose of establishing the surface conditions existing in all of the areas to be affected by the construction of the Project.

C. Pre-Construction Photographs: The Contractor shall video/photograph the entire project site during normal working hours including all concrete and asphalt pavements, curb and gutter, fencing, landscaping to remain, structures to be demolished, and existing structures that are to be modified. All videos and photographs shall be date and time stamped and a digital copy submitted on a flash drive/memory stick or media acceptable to the City prior to beginning construction activities. The video/photographs shall clearly identify existing site and structural conditions.

D. Ground photography shall consist of photographs and color video taping of surface features taken along the entire length of the Project and including all work, intersecting roadways and properties that will be impacted by the water service conversions.

E. The purpose of the color audio-video taping of the project is to provide the necessary information for restoration of surface features after completion of the Project. The Contractor shall be responsible for repairing any damage or defect not documented as existing prior to construction.

1.0.2 QUALITY ASSURANCE

A. Photographs shall be clean, sharp and clearly show details. Out-of-focus photographs will not be acceptable.

B. Digital photographs which are poorly lit or lack definition will not be acceptable

1.0.3 SUBMITTALS

A. Submit one (1) final digital file of each construction photograph and one (1) flash drive/memory stick or acceptable media with the video as follows:

1. Within fourteen (14) days of receiving Notice to Proceed

2. Number photographs in sequence beginning with the numeral one

PART 2 – PRODUCTS 2.0.1

SIZE AND QUALITY

A. Digital pictures and videos shall be compatible with City's software, color, 3½-inches by 5-inches.

B. Digital pictures and videos shall be compatible with City's software.

2.0.2 IDENTIFICATION

A. Each photograph shall be stamped with the following information stamped or typed on the back of the print:

CITY OF OPA-LOCKA WORKS DEPARTMENT
Contract No. _____
1-91

CONTRACTOR: _____

Photograph No. _____ Date: _____ Time: _____

Description: _____

_____

_____

2.0.3 QUANTITY

A. A minimum of twelve (12) photographs shall be taken prior to construction and twelve more each month until completion of the Work.

B. In the instance of a pipeline installation, take a minimum of one photograph each 200 feet or fraction thereof along the entire route of the main initially. During construction a minimum of one photograph every two hundred feet or fraction thereof of that portion of the main constructed during the month until completion.

C. The number of photographs required shall be at the sole discretion of the Engineer whose decision shall be final.

D. An increase in the number of photographs above the minimums shall not be cause for an increase in cost and no extra compensation will be allowed.

2.0.4 VIDEO PHOTOGRAPHY

A. Color audio-video shall be submitted on a flash drive/memory stick or acceptable media.

PART 3 – EXECUTION

3.0.1 INITIAL AND CONSTRUCTION PHOTOGRAPHY

A. Take pre-construction photographs of the entire site or route of the main after receiving the Notice to Proceed and prior to disturbing the site in any manner. Coordinate with the Engineer as to the vantage points and number of photographs required in Paragraph 2.0.3.

B. Photography During Construction: Coordinate with the Engineer as to the actual number and location of views to be photographed and the day and time of photographing.

C. Photographic equipment utilized shall be of sufficient quality to produce pictures capable of being enlarged without loss of definition or sharpness.

3.0.2 PHOTOGRAPHY DURING CONSTRUCTION

a. Coordinate with the Engineer as to the actual number and location of views to be photographed and the day and time of photographing.

3.0.3 VIDEO PHOTOGRAPHY

A. Coverage of Taping: Such coverage shall include, but not be limited to, all existing driveways, sidewalks, curbs, streets, signs, landscaping, trees, catch basins, fences, visible utilities and all buildings located within the work zone of the Project. Of particular concern are any existing faults, fractures, defects or other features. Audio description shall be made simultaneously with and support the video coverage.

B. Streets: shall be recorded by audio-video tape for the full width of the right-of-way, except where specifically noted otherwise by the Engineer.

C. Front, Side and Rear Yard Areas: shall be recorded by audio-video tape of properties impacted by the water service conversions.

3.0.4 LOCATION INFORMATION

A. All flash drives/memory sticks or other acceptable media shall be properly identified by number, location and project name in a manner acceptable to the Engineer.

B. A record of the contents of each flash drive/memory stick or acceptable media shall be supplied on a run sheet identifying each segment in the tape by location, i.e., street viewing side, traveling direction, engineering stationing, and all referenced by tape counter numbers.

C. All video recordings shall begin with the date and time of recording, the project name, the sheet numbers of engineering stationing as shown on the plans, the name of the street, area or building being taped, the direction of travel and the viewing side. Houses and buildings shall be identified visually by house or building address, when possible, in such manner that the progress of the taping and the proposed system may be located by reference to the houses and buildings.

3.0.5 SITE RECORDING CONDITIONS

A. All audio-video taping shall be done during times of good visibility. No outside taping shall be done during periods of visible precipitation or when the ground area is covered with leaves or debris, unless otherwise authorized by the Engineer.

B. In order to produce the proper detail and perspective, adequate auxiliary lighting will be required to fill in shadow areas caused by trees, utility poles, road signs and other such objects, as well as other conditions requiring artificial illumination.

C. The average rate of speed in the general direction of travel of the conveyance used during taping shall not exceed 60 feet per minute. Planning rates and zoom-out rates shall be controlled sufficiently so that playback will produce adequate clarity of the object being viewed.

END OF SECTION

01400 QUALITY CONTROL

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The intent of this section is to emphasize the City interest in quality products being designed and installed within the time and cost considerations of the project. The Contractor shall have primary responsibility for providing Quality Control (QC) for project during both design and construction phases. Quality Control includes, but is not limited to, such functions as:

1. Assuring only latest revisions of design and other documents used for construction (e.g., Shop Drawings, catalog cuts, schedules) are being used by project staff.

2. Inspection of materials and equipment delivered to the site.

3. Inspection and maintenance of materials and equipment in storage.

4. In progress and Final Inspection of the constructed product.

5. Manufacturer's Certification of Installation for service intended.

6. Reporting on work in progress daily.

B. The Contractor shall have a QC System and sufficient QC staff, in place in the design team office and on the jobsite always that work is underway.

C. The Contractor is responsible for controlling the quality of the work, including that portion of the work performed by Engineer of Record, the Cogeneration system manufacturer and on-site Subcontractors. The Contractor is also responsible for assuring that suppliers and manufacturers providing materials and products to be incorporated into the work satisfy the specified quality, provide required documentation, and provide those services as specified within the technical portions of the specifications.

D. The Contractor shall develop and submit a Quality Control Plan which identifies the reporting structure of the QC organization, defines the procedures to be implemented by the Contractor to assure the specified quality is achieved, and details the daily reporting protocol. Within 20 calendar days of the Notice to Proceed (NTP), the Contractor shall submit their proposed Quality Control Plan. The Engineer will schedule a review meeting of the outline within one week of receipt of the plan outline. Final submission of the quality control plan shall be made no later than 10 calendar days following the review meeting.

E. The Contractor and Engineer will coordinate materials testing for cast-in-place concrete, earthwork, and paving.

1.0.2. MATERIALS AND EQUIPMENT

A. The Contractor shall maintain control over procurement sources to ensure that materials and equipment conform to specified requirements.

B. The Contractor shall comply with manufacturer's instructions regarding all facets of materials and/or equipment movement, storage, installation, testing, startup, and operation.

C. The Contractor shall prepare, complete, and maintain all equipment, pipe, and testing logs that document the dates and disposition of each specific test conducted. The logs will be comprised of a summary sheet that is corroborated by individual test report

forms that document the specific tests. The individual test report form will be provided by the Engineer.

1.0.3. MANUFACTURER'S TECHNICAL REPRESENTATIVE

A. When specified in the technical specification sections, the Contractor shall arrange for and provide technical representation directly from the manufacturers of respective equipment items or components.

B. If, in the opinion of the Engineer, the Manufacturer's Representative fails to satisfy the terms of this Specification section, the Engineer may direct the Contractor to replace the Representative with a different representative, and those hours expended by the disapproved representative will not be counted against the service hours specified for the system/unit/component.

PART 2 – PRODUCTS 2.0.1.

QUALITY CONTROL PLAN

A. The Quality Control Plan shall be a formal document prepared under the direction of the Contractor. The Plan will be the basis by which the Engineer will monitor the QC effort associated with executing the work.

B. The Plan shall address the Quality Control Organization and the roles each member of the organization plays in satisfying the quality requirements of the work.

C. Included within the plan will be basic guidelines associated with the checking and monitoring of work as it progresses and how the guidelines will be used by Contractor's supervisors and representatives to provide the required quality.

D. The process for notification of quality concerns shall be included in the Plan.

2.0.2. REPORTS

A. Monthly Quality Control Summary that addresses the following:

1. Certification by Contractor that all work not specifically cited by a NonConformance Report satisfies the requirements of the Contract Documents.

2. Summary table identifying all non-conformance notices and their respective current status.

B. Certificate of Proper Installation shall address installation of equipment items.

PART 3 – EXECUTION 3.0.1.

QUALITY CONTROL

A. Quality control is the responsibility of the Contractor, and the Contractor shall maintain control over construction and installation processes to assure compliance with specified requirements.

B. Means and methods of construction and installation processes are the responsibility of the Contractor, and at no time is it the intent of the Engineer to supersede or void that responsibility. In the event there is a degree of uncertainty that the process observed or planned will accomplish the required quality, the Engineer will refer to the Quality Control Plan and initiate discussion with the person primarily responsible for the process or installation in question.

C. Prepare and submit weekly Quality Control activity reports to the Engineer.

D. Monthly Quality Control Summaries are to be prepared and submitted to the Engineer with the Contractor's Partial Payment request for the respective period.

END OF SECTION

01510 TEMPORARY UTILITIES

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Provide temporary facilities required, which may include, but not limited to, the following:

1. Contractor's field office, telephone and storage sheds.

2. Temporary water service.

3. Temporary sanitary service.

4. Temporary electrical service.

B. For additional requirements on Temporary Facilities refer to Section 01100 "Special Project Requirements".

C. Requirements of Regulatory Agencies:

1. Obtain and pay for permits as required by governing authorities.

2. Comply with federal, state and local codes and regulations.

1.0.2. TEMPORARY ELECTRICITY

A. The City will not furnish electric power for this project. All electrical driven equipment, including electrical welders, shall be served by the temporary electrical service to be provided by the Contractor.

B. The Contractor shall supply extension cords, ground fault circuit interrupters, and safety equipment necessary to protect his workmen and plant personnel.

C. The Contractor shall obtain a power source for temporary electricity from electrical generators or other approved means. Furnish, install and maintain temporary electric power service for construction needs throughout construction site as necessary.

1. Power centers for miscellaneous tools and equipment used in construction work.

2. Power for construction equipment.

3. Power for testing and checking equipment.

4. Power for welding units and for other equipment having special power requirements.

D. Capacity:

1. Adequate electrical service distribution for construction use by all trades and Field Offices during construction period.

2. Notify FPL if unusually heavy loads, such as welding, pumps, high service temporary pump, and other special power requirements, will be connected.

E. Maintain strict supervision of use of temporary services.

1. Enforce conformance with applicable standards.

2. Enforce safe practices.

3. Prevent abuse of services.

1.0.3. TEMPORARY SANITARY FACILITIES

A. Furnish, install and maintain temporary sanitary facilities for use throughout construction period.

1. Enclosed toilet facilities for construction personnel.

2. General employee washing facilities.

B. Toilet Facilities: Fixed or portable chemical toilets shall be provided wherever needed for the use of Contractor's employees. Toilets at construction sites shall conform to the requirements of Subpart D, Section 1926.51 of the OSHA Standards for Construction.

C. Minimum number of fixtures:

1. Toilets and Urinals:

For less than 20 employees: 1 toilet.
For 20 or more employees: 1 toilet and 1 urinal per 40 workers.

2. Washing Facilities: Adequate for number of employees, for type of work requiring washing facilities.

D. Maintain strict supervision of use of facilities:

1. Enforce conformance with applicable standards.

2. Maintain service and clean facilities.

3. Enforce proper use of sanitary facilities.

E. Cost of Installation and Operation:

1. Pay costs of temporary sanitary facilities, including costs of installation, maintenance and removal.

2. Costs of Water: As specified in Temporary Water.

3. Pay service charges for use of portable units.

F. Facility Locations:

1. Within the project site.

2. At Field Offices

3. Toilet and washing facilities:

Secluded from public observation.
Convenient for use of personnel in relation to work stations.

4. Obtain acceptance of the Engineer for all locations.

G. Enclosure for Toilet Facilities:

1. Weatherproof, sight proof, sturdy temporary enclosures.

2. Insect proof screening, adequate natural ventilation.

H. Sewer Connection: The Contractor shall coordinate with the City's Public Works Department for obtaining sewer connection and shall pay permit and sewer usage charges.

PART 2 – PRODUCTS 2.0.1.

MATERIALS

A. General: Materials may be new or used, but must be adequate for purpose required, must be sanitary and must not violate requirements of applicable codes. Materials in contact with potable water must be AWWA/NSF 61 listed.

2.0.2. ELECTRICITY

A. Provide required facilities, including transformers, conductors, poles, conduits, raceways, breakers, fuses and switches.

B. Provide appropriate enclosures for environment in which used, in compliance with NEMA standards.

2.0.3. DRINKING WATER FACILITIES

A. Portable Containers

1. Tightly closed and equipped with dispensing tap.

2. Clearly label contents.

3. Do not use for other purposes.

4. Provide single service disposable cups, with sanitary container for unused cups, and receptacles for used cups.

2.0.4. SANITARY FACILITIES

A. Toilet Facilities:

1. Portable toilets; either:

a. Chemical toilets.

b. Reticulating toilets.

c. Combustion toilets.

2. Toilet Tissue: Provide at each toilet, on suitable dispenser.

PART 3 – EXECUTION 3.0.1.

GENERAL

A. Obtain Engineer's approval of planned installations.

B. Install work in a neat and orderly manner.

C. Make structurally sound throughout.

D. Maintain to provide continuous service.

E. Modify and extend service as work progress requires.

3.0.2. TEMPORARY WATER

A. Locate piping and outlets.

1. Provide service convenient to work stations.

B. Avoid interference with:

1. Traffic and work areas.

2. Materials handling equipment.

3. Storage areas.

C. Do not run piping on floor or on ground.

D. When necessary to maintain pressure, provide temporary pumps, tanks and compressors.

3.0.3. TEMPORARY ELECTRICITY

A. Service and distribution may be overhead or underground.

B. Locate to avoid interference with:

1. Traffic and work areas.

2. Cranes.

3. Material handling equipment.

4. Storage areas.

C. Do not run branch circuits on floor or on ground.

D. Wire all safety devices required for operation of equipment.

E. Check operation of safety devices.

3.0.4. TEMPORARY SANITARY FACILITIES

A. Portable Toilets:

1. Erect securely and anchor to prevent dislocation.

2. Service as often as necessary to prevent accumulation of wastes and creation of unsanitary conditions.

B. Washing Facilities: Provide faucet

3.0.5. REMOVAL

A. Completely remove temporary materials and equipment upon completion of construction.

B. Clean and repair damage caused by installation and restore to specified or original condition.

END OF SECTION

01530 PROTECTION OF EXISTING FACILITIES

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The Contractor shall exercise extreme care and protect all existing structures and utilities, when working in proximity so as not to disturb the structures. Repair or replacement of any property and/or structures damaged during the construction of this project shall be the sole responsibility of the Contractor. Costs involved in the replacement or repair will not be reimbursed by the City. The Contractor shall be responsible for coordinating his work with the work to be done by FPL or their Contractor.

B. Protection of Property Remaining in Place:

1. Property obstructions which are to remain in place, such as buildings, poles, walls, posts, bridges, etc., are to be carefully protected from damage and are not to be displaced. Any damage to such obstructions noted to remain in place shall be repaired by the Contractor at no additional cost to the City or Owner.

2. Should structures be encountered which interfere with the work, the City or designee shall be consulted immediately in order for a decision to be made on the relocation of the work so it will clear the obstruction, if the obstruction cannot be relocated.

C. The underground utilities, structures and other facilities shown on the plans are located according to the best information available but may vary by several feet from both the position and elevation shown. The Contractor shall explore far enough in advance of his main trench to determine the exact location and condition of such utilities, structures or facilities so that, before the pipe is installed, the Engineer may change the line or grade of the pipe, should that become necessary to avoid a conflict.

1.0.2. GENERAL CONSIDERATIONS

A. All cost for changing the grade of the proposed main downward two feet-six inches or less in order to clear obstructions located differently than shown on the plans, or to

clear obstructions not shown on the plans but the location of which could have become known or should have become known by proper observation of field conditions or the proper exploratory procedure, shall be included in the prices bid under the various items of the Proposal and no additional compensation will be allowed.

B. Additional cost, if any, for changing the grade of the proposed main downward more than two feet-six inches, for the same reasons, will be paid for as "Extra Work" in accordance with "Extra Work and Payment Therefore" of the Special Conditions.

C. Changing the grade of the proposed main by rising deflections, or the alignment by horizontal deflections, will not be considered as extra work, or extra cost, to the Contractor, and in some cases a credit to the City may be warranted.

D. Where the Quotation contains Items for installing main in specific depth ranges, the main shall be paid for at the actual depth range installed. However, the provisions of paragraphs one and two of this Section shall apply and any depth increase caused by a lack of timely and sufficient exploration by the Contractor shall be at his expense. In such instance, the main shall be paid for as if installed at the invert elevations originally shown on the Plans.

E. In all cases where the main is deflected either horizontally or vertically, and the Engineer requires additional work and items such as paving, air release valve assemblies, and similar items for which a pay item was established in the Proposal, then such additional work and items will be paid for at the prices bid.

F. The Contractor shall determine the locations of recent additions to the systems not shown on the plans. Extreme caution shall be exercised to eliminate any possibility of any damage to utilities resulting from his activities. The location of all overhead utilities shall be verified, and the Engineer notified of any conflict which might occur. The Contractor shall be responsible for determining which poles will need shoring during excavation and shall provide such shoring and support as is required.

G. Where it is necessary to temporarily interrupt house or building services, the Contractor shall notify the house or building owner or occupant, both before the interruption and again immediately before service is resumed. Before disconnecting any pipes or cables, the Contractor shall obtain permission from the Owner, or shall make suitable arrangements for their disconnection by the Owner. The Contractor shall be responsible for any damage to any such pipes, conduits or cables, and shall restore them to service promptly as soon as the work has progressed past the point involved.

H. Various drainage culverts and drainage ditches may be encountered along the route of the work. Any culverts which are disturbed, damaged or removed shall be repaired,

restored or reinstalled. The Contractor shall document any existing damage to the drainage systems, or if it needs cleaning, prior to doing any work in the vicinity, so he will not be held responsible. Drainage ditches shall be restored to the original cross sections existing prior to construction of this work. Ditches shall be left clean and free of all excavated materials or other materials deposited in them as a result of this construction. All existing headwalls, removed or damaged as a result of this construction, shall be restored as directed by the Engineer, and the work shall be considered an incidental item and the cost included in the other items of the quotation.

I. All existing drainage structures and piping shall be considered clean at the start of construction. The Contractor shall check to verify that this is so. The Contractor should notify the governing agency of any damaged or dirty structures or piping to avoid repair or cleaning at his expense. Copies of such notices shall be sent to the Engineer.

1.0.3. RELOCATION OF EXISTING UTILITIES

A. The relocation of existing utilities, as noted on the plans, or for the convenience of the Contractor shall be the responsibility of the Contractor. This work shall be completed by either the forces of the existing utility or the Contractor's forces at the discretion of the responsible utility. If the work is to be performed by the Contractor, all work shall be done in accordance with the utility company's requirements. Under no circumstances shall the Contractor be authorized extra payment for this work, and all cost for the relocation shall be the responsibility of the Contractor.

B. The Contractor shall also be responsible for the coordination of all existing utility relocations with the appropriate utilities. Where temporary supports or protective encasements are required during the construction, the Contractor shall be responsible for this work at no additional cost.

C. Any conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the Engineer. There shall be no additional payment for adjustments in grades or location resulting from locations of existing utilities.

D. Various storm sewer lines and inlets and slab-covered drainage ditches that conflict with the proposed construction may require adjustment, relocation or removal and reinstallation. This work shall be performed as directed by the Engineer, and the work shall be considered an incidental item and the cost included in the items listed in the quotation.

E. Representatives of utility companies, the railroad companies, the traffic and transportation authorities, etc., shall be notified in accordance with the provisions set forth in the relevant sections of the Specifications and the permitting documents.

F. Notify all utility companies that are affected by the construction operation at least fortyeight (48) hours in advance. Under no circumstance expose any utility without first obtaining permission from the appropriate agency. Once permission has been granted, locate, expose and provide temporary support for all existing underground utilities and utility poles where necessary.

G. Absolutely no extra compensation will be allowed for construction problems created by utility poles of whatever size, overhead electric, telephone or other lines, whether shown on the Plans or not. The Contractor is solely responsible for discovering such items in the field prior to bidding and including all costs for such work in the prices bid.

1.0.4. PROTECTION OF UTILITIES TO REMAIN IN PLACE

A. The work area may have existing utilities, such as, but not limited to irrigation, phone, electrical, water, sewer, storm sewer, and gas lines. It shall be the responsibility of the Contractor to verify the location of all such utilities, structures, etc. by hand excavation or other appropriate measures before performing any work that could result in damage or injury to persons, utilities, structures, or property. The Contractor shall make a thorough search of the site for utilities before work is commenced in any particular location. The Contractor shall take special consideration to protect the existing water main, force main and power line along the project location to avoid service disruptions.

B. During construction, the Contractor shall protect the existing and proposed water main and force main using steel plates, as indicated in the drawings, until site work is completed and final grade is achieved. The Contractor shall be responsible for the repair of any damages caused to these pipes during construction at no additional costs to the City.

C. The Contractor shall take immediate steps to repair, replace, or restore all services to any utilities or other facilities which are disrupted at the fault of the Contractor. Further, the Contractor shall engage any additional outside repairs on a continuous "around the clock" basis until services are restored. The Contractor shall also provide and operate any supplemental temporary services to maintain uninterrupted use of the facilities. All costs involved in the repairs and restoring of disrupted service resulting from negligence on the part of the Contractor shall be borne by the Contractor and shall be fully responsible for any and all claims resulting from the damage.

D. Should utilities be encountered which interfere with the work, the City or designee shall be consulted immediately in order for a decision to be made on the relocation of the work so it will clear the obstruction, if the obstruction cannot be relocated.

E. Prior to the start of construction, the contractor shall comply with F.S. 553.851 for the protection of underground gas lines.

F. When power poles are adjacent to any proposed utility, the Contractor shall provide proper shoring or other suitable support during construction. The shoring and support methods shall be approved by the utility company engineering department. The cost of shoring will be included in the overall project cost.

G. The Contractor shall not purposefully disrupt or disconnect any type of utility whatsoever without first obtaining the written permission of the City. Requests for disconnection must be in writing and received by the City at least 72 hours prior to the time of the requested interruption.

1.0.5. PROTECTION OF TREES REMAINING IN PLACE

A. Construction can potentially damage the existing trees confined within the construction zone. Besides their aesthetic value, some trees are valuable and may be environmentally protected. Mangroves and mangrove associated species (as defined by Miami-Dade County Code of Ordinances) are the jurisdiction of MiamiDade County and would fall under the Miami-Dade County Code of Ordinances, Chapter 24, Division II.

B. Trees can be an important part of the ecological environment of the surrounding area. Measures should be in place to protect trees whenever necessary, including conservation of the canopy.

C. Where directed by the City, desirable trees within the roadway area shall be trimmed, protected, and left standing. Branches of trees extending over the area occupied by the roadway shall be trimmed as directed, to give clear height of 14 feet over vehicular areas and 8 feet over pedestrian areas.

D. When pruning cuts or root pruning to existing trees is shown in the Plans, work is to be supervised on site by an International Society of Arboriculture (ISA) or American Society of Consulting Arborists (ASCA) Certified Arborist and performed in accordance with American National Standards Institute (ANSI).

E. All trees found within a FDOT designated road shall comply with the appropriate FDOT index for tree protection barriers. All other tree protection shall be in accordance with the

F. For all areas both inside and outside the earthwork area, the Contractor shall not deface, injury, or destroy trees, nor remove or cut them without prior approval via a tree removal permit from the City of Opa-Locka Any accidental damage to a tree shall immediately be reported to the City of Opa-Locka for evaluation for public safety and possible new and additional permit requirements/work. An after-the-fact tree removal permit may be required.

G. The Contractor shall understand all ANSI tree care standards prior to the start of earthwork. All necessary permitted above and below ground tree work shall follow the appropriate ANSI standards for tree care.

H. Tree relocation, when required, shall be in accordance with CITY CODE

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The Contractor shall furnish all material, labor, tools, equipment, plant, appliances and services necessary to complete all demolition, modification and relocation work required in the drawings and specified herein. Examine the various drawings, visit the site and determine the extent of work affected therein and all conditions under which he is required to perform the various operations.

B. The Work specifically covered under this Section consists of the removal and disposal of existing structure, appurtenances, concrete pavement, concrete sidewalk, slope pavement, ditch pavement, curb and curb and gutter. The items to be removed shall be: (1) those items shown in the Plans to be removed; (2) those found within the limits of the area to be cleared and grubbed and directed by the City or designee to be removed; (3) those items which it is necessary to remove in order to construct new structures, utilities, and other appurtenances or obstructions which may be designated in the plans.

C. Demolition shall be constructed in such a way as to leave no obstructions to any proposed new structures or to any waterways. Pilings shall be pulled or shall be cut off or broken off at least 2 feet below the finish grade line. (In the event that the Plans indicate channel excavation to be done by others, the finish ground line shall be considered as the limits of such excavation.) For material which are to remain the property of the City or are to be salvaged for utilization in temporary structures, the removal shall be in such way as to avoid damage to such materials, and all bolts, nails, etc., shall be entirely removed from timbers to be so salvaged; also such salvaged structural steel members shall be marked for identification, as directed. Retaining walls and drainage structures are specifically not included in the Work covered under this Section.

1.0.2. GENERAL CONSIDERATIONS

A. Demolition, modification, removal and relocation work shall be coordinated with the City, shall be performed in an agreed upon sequence to minimize down time at the site.

B. Promptly remove all demolished materials and debris from the site. No demolished materials shall be kept at the plant site for more than 24 hours.

C. Demolition shall result in the complete removal and disposal of existing structures and appurtenances from the site as indicated on drawings and the cleanup after completion of the demolition work.

D. The cutting and removal of existing work necessary for modifications and installation of new work shall be made with a minimum of damage to the work that is to remain. Any damage done to existing facilities which are to remain shall be repaired at the Contractor's expense to the satisfaction of the City.

E. Surfaces of seals visible in the completed work shall be made to match as nearly as possible the adjacent surfaces.

F. Non-shrink grout shall be used for setting wall casting, sleeves, leveling pump bases, doweling anchors into existing concrete and elsewhere as required.

G. Follow other specific instructions for the modification work given in other sections of these specifications and/or as shown on the drawings.

H. Verify exact location, material, alignment, joint, etc. of existing piping and structure prior to making the modifications and connections called out in the drawings. The verifications shall be performed with adequate time to correct any potential alignment or other problems prior to the actual time of connection.

I. Dismantle and remove all existing equipment, piping and other appurtenances required for the completion of the work. Where called for or required, cut existing pipeline for the purpose of making connections thereto. Anchor bolts for equipment and structural steel removal shall be cut off one inch below the concrete surface. Surface shall be properly repaired and finished.

J. Where necessary or required for the purpose of making connections, cut existing pipelines in a manner to provide an approved joint. Where required, weld beads, flanges or provide the specified couplings, all as required.

K. Site shall be left in a clean condition satisfactory to the Engineer, free from demolished materials, rubbish or debris. Site shall be graded to meet adjacent contours and provide flow for surface drainage.

L. Restore items intended to remain that have been damaged by demolition work.

M. Items intended to remain that have been damaged by demolition work shall be restored to original or better condition.

N. All interrupted utility services shall be returned to service, and temporary services disconnected, unless otherwise specified. **PART 2 – PRODUCTS**

2.0.1. STRUCTURES TO BE REMOVED

A. The work specifically covered under this Section consists of the removal and disposal of the material from existing structures.

B. The structures to be removed shall be:

1. Those structures, or portions of structures, shown in the plans to be removed.

2. Those found within the limits of the area to be cleared and grubbed, and directed by the Engineer to be removed.

3. Those structures, or portions of structures, which it is necessary to remove in order to construct new structures, utilities and other appurtenances or obstructions which may be designated in the plans. **PART 3 – EXECUTION**

3.0.1. METHOD OF REMOVAL

A. The structures shall be removed in such a way as to leave no obstructions to any proposed new structures or to any waterways.

B. For material which are to remain the property of the City or are to be salvaged for utilization in temporary structures, the removal shall be in such way as to avoid damage to such materials, and all bolts, nails, etc., shall be entirely removed from timbers to be so salvaged; also such salvaged structural steel members shall be marked for identification, as directed.

3.0.2. REMOVAL OF EXISTING PAVEMENT

A. The work specified in this Section consists of removing and disposing of existing concrete pavement, concrete sidewalk, slope pavement, ditch pavement, curb and curb and gutter, where shown in the plans or directed by the Engineer to be removed or where required to be removed because of the construction operations.

B. Retaining walls and drainage structures are specifically not included in the work covered under this Division.

END OF SECTION

01550 SITE ACCESS AND STORAGE

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The culvert replacement work is to be performed along Sesame Street, between the intersections with Atlantic Avenue and NW 135th Street, Opa-Locka, Florida 33054. The project's owner is the City of Opa-Locka.

1.0.2. EXISTING UTILITIES

A. Protection of, and relocation of existing utilities, structures and other facilities shall be in accordance with Specification *"01530 - Protection of Existing Facilities"*.

B. The relocation of existing utilities, as noted on the plans, or for the convenience of the Contractor, shall be the responsibility of the Contractor. This work shall be completed by either the forces of the existing utility or the Contractor's forces at the discretion of the responsible utility. If the work is to be performed by the Contractor, all work shall be done in accordance with the utility company's requirements. The Contractor shall also be responsible for the coordination of all existing utility relocations with the appropriate utilities. Where temporary supports or protective encasements are required during the construction, the Contractor shall be responsible for this work at no additional cost. Under no circumstances shall the Contractor be authorized extra payment for this work, and all cost for the relocation shall be the responsibility of the Contractor.

C. Any conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the Engineer.

1.0.3. SITE ACCESS AND STORAGE

A. The City reserves the right to enter upon, and to use, any and all portions of the work performed hereunder (or under its other Contracts), whether completed or not, as may be required.

B. Highway Limitations: The Contractor shall make its own investigation of the condition of available public and private roads and of clearances, restrictions, bridge load limits,

and other limitations affecting transportation and ingress and egress to the site of the work. It shall be the Contractor's responsibility to construct and maintain any haul roads required for its construction operations.

C. Temporary Crossings: Continuous, unobstructed, safe, and adequate pedestrian and vehicular access shall be provided to fire hydrants, parking lots, Vehicular access to all production facilities shall be maintained except when necessary construction precludes such access for reasonable periods of time.

D. Street Use: Nothing herein shall be construed to entitle the Contractor to the exclusive use of any public street, alleyway, or parking area during the performance of the work hereunder and it shall conduct its operations to not interfere unnecessarily with the City or any other authorized work of utility companies or other agencies in such streets, alleyways, or parking areas. No street shall be closed plant operations without first obtaining permission of the Engineer and the City. Where excavation is being performed in any streets, one lane shall always be kept open to traffic, unless otherwise indicated. Toe boards shall be provided to retain excavated material if required by the Engineer or the City. Fire hydrants on or adjacent to the work shall be kept accessible to fire-fighting equipment. Temporary provisions shall be made by the Contractor to assure the use of sidewalks and the proper functioning of gutters, storm drain inlets, and other drainage facilities.

E. Additional Facilities: Access to other facilities within the project site shall be allowed by the Contractor for City's staff conduct their operation and maintenance activities. Continuous, unobstructed, safe and adequate pedestrian and vehicular for the City's staff to access facilities within the project site such as the electrical building, emergency generator, water tanks and Pump Station 23 is required.

1.0.4. CONTRACTOR WORK AND STORAGE AREA

A. The Contractor may utilize private warehouse and/or office space as a storage area and/or construction field offices.

B. The Contractor shall submit to the Engineer for approval, a proposed plan and layout for all field offices, temporary facilities, and parking both for on the project site and on any additional lands obtained by the Contractor for its use during construction of the project. Prior to commencing any preparation remove, relocate and protect where necessary all existing underground and above ground facilities, pipelines, sprinkler systems, sod and all other existing installations. All these installations shall be restored to their initial conditions.

C. The Contractor shall construct and use a separate storage area for hazardous materials used in constructing the work.

1. For the purpose of this paragraph, hazardous materials to be stored in the separate area are products labeled with any of the following terms: Warning, Caution, Poisonous, Toxic, Flammable, Corrosive, Reactive, or Explosive. In addition, whether or not so labeled, the following materials shall be stored in the separate area: diesel fuel, gasoline, new and used motor oil, hydraulic fluid, cement, paints and paint thinners, 2 part epoxy coatings, sealants, asphaltic products, glues, solvents, wood preservatives, sand blast materials, and spill absorbent.

2. Hazardous materials shall be stored in groupings according to the Material Safety Data Sheets.

3. Contractor shall develop and submit to the Engineer a plan for storing and disposing of the materials above.

4. Contractor shall obtain and submit to the Engineer a single EPA number for wastes generated at the site.

5. The separate storage area shall meet the requirements of authorities having jurisdiction over the storage of hazardous materials.

6. Hazardous materials that are delivered in containers shall be stored in the original containers until use. Hazardous materials delivered in bulk shall be stored in containers which meet the requirements of authorities having jurisdiction.

1.0.5. PARKING

A. The Contractor shall be responsible for making its own arrangements for parking of its direct employees, Subcontractors, vendors, etc. as may be necessary either on site or offsite.

B. Traffic and parking areas shall be maintained in good conditions, free of excavated material, construction equipment, mud, and construction materials. The Contractor shall repair breaks, potholes, low areas which collect standing water, and other deficiencies.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01560 TEMPORARY ENVIRONMENTAL CONTROLS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. For any work conducted in a contaminated area within the project boundaries where hazardous materials or hydrocarbons have been encountered, were previously known to exist, or is suspected by the Contractor or the City Inspector, the Contractor must comply with all applicable requirements of OSHA, EPA, FDEP, Miami-Dade County Regulatory and the City.

B. All work defined by this Division, including work less than one (1) acre in size, that has the potential to impact the City's Municipal Separate Storm Water System (MS4), and/or adjacent properties, is required to employ sediment and erosion control measures that are in accordance with Florida Storm Water Erosion and Sedimentation Control Inspector's Manual, latest revision, and in accordance with Miami-Dade County Department of Environmental Resources Management.

C. All construction activity that results in the disturbance of equal to or greater than one (1) acre is required to obtain coverage under the Florida Department of Environmental Protection's Generic Permit for Storm Water Discharge from Large and Small Construction Activities (CGP).

1.0.2. SPECIALIZED CONSTRUCTION AREA

A. Specialized construction areas are defined as areas where contaminants are discovered and require construction by personnel qualified by training and equipped with personal protective equipment for such work.

B. Work in specialized construction areas shall be carried out by personnel qualified by training and equipped for such activities. These personnel shall be either Subcontractors with licensing and certification as specialists in this type of construction or the Contractor's own personnel who have taken and been certified as having

passed the required training course(s). Licensing and certifications shall be submitted to the City for verification and shall in all cases be satisfactory to both, the City and other authorities with jurisdiction.

1.0.3. DUST ABATEMENT

A. All permittees, contractors, owners, operators, or other persons involved in construction activities shall refer to applicable sections of Local, State, and Federal regulations on dust control for additional guidance, including but not limited to the Miami-Dade County Code of Ordinances.

B. All persons involved in construction activities shall take measures to control dust from operations and prevent spillage of excavated materials on public roads.

C. All persons involved in construction activities shall remove spillage of excavated materials, debris, and dust from public roads by methods approved by the City or designee.

D. All persons involved in construction activities shall provide temporary dust-proof partitions where required to protect unaltered portions of existing structures and facilities and as directed by the City or designee. Temporary partitions shall be provided where demolition work is required to protect equipment and material and shall consist of plastic sheeting (6 mil).

E. All persons involved in construction activities shall apply water at locations, quantities, and frequencies required by the City or designee to control dust for nuisance prevention to the City and properties in the vicinity of the site. The frequency of watering will be determined by weather conditions and the erodibility of the soil. If additives in the water are used to increase its dust suppression properties, the chemical should have no adverse environmental impact on adjacent water bodies.

F. The Contractor shall prevent its operation from producing dust in amounts damaging to property or causing a nuisance to persons occupying buildings in the vicinity of the project Site. The Contractor shall employ measures to prevent fugitive dust. The Contractor shall be responsible for any damage resulting from dust originating from its operations.

G. Storage Piles: Enclose, cover, water (as needed), or apply non-toxic soil binders according to manufacturer's specifications on material piles (i.e. gravel, sand, dirt) with a silt content of 5 percent or greater.

H. Active Areas of Site: Water active construction areas and unpaved roads as needed and as requested by Engineer to prevent the propagation of dust.

I. Inactive Areas of Site: Apply non-toxic soil stabilizers according to manufacturer's specifications to inactive construction areas, or water as needed to maintain adequate dust control.

J. Vehicle Loads: Cover or maintain at least 2-feet of freeboard vertical distance between the top of the load and the top of the trailer sides on trucks hauling dirt, sand, soil, or other loose materials off of the site.

K. Roads: When there is visible track-out onto a paved public road, install wheel washers where the vehicles exit and enter onto the paved roads and wash the undercarriage of trucks and any equipment leaving the site on each trip. Sweep the paved street at the end of each shift with a water spray pick-up broom-type street sweeper as necessary or as directed.

L. Vehicle Speeds: Maintain vehicle speeds to 10 mph or less.

M. Additional dust control BMPs include but are not limited to the following.

1. Prevention of dust generation is preferable to applying dust suppression measures. Ensure in the project schedule that the area of cleared land is minimized during the drier months of the year, when dust generation is at its greatest.

2. The soil shall be maintained in a sufficiently damp condition to prevent loose grains of soil from becoming dislodged. The soil shall be completely crusted over by application of water or completely covered with clean gravel or treated with an approved dust suppressant.

3. Ensure that smooth surfaces are deep ripped and left rough and cloddy to reduce the wind velocity at the soil surface.

4. Construct wind fences if appropriate for the site. As a contingency measure, in areas that do not have access to a water supply, water stored on-site should never be less than fifty percent of disturbed land surface. Wherever watering is used to suppress dust, ensure it does not create contaminated runoff that will contaminate surface waters.

5. Use barriers where required to prevent the migration of sawdust or particulates from sanding or surface preparation activities during construction.

1.0.4. SEDIMENTATION ABATEMENT

A. The Contractor shall be responsible for collecting, storing, hauling, and disposing of spoil, silt, and waste materials in compliance with applicable federal, state, and local rules and regulations and the Contract Documents.

B. Install and maintain erosion and sediment control measures, such as swales, grade stabilization structures, berms, dikes, waterways, filter fabric fences, and sediment basins.

C. Filter fabric barrier systems, if used, shall be installed in such a manner that surface runoff will percolate through the system in sheet flow fashion and allow sediment to be retained and accumulated.

D. Remove and dispose of sediment deposits at the designated spoil area. If a spoil area is not indicated, dispose of sediment off-site at a location not in or adjacent to a stream or floodplain. Sediment to be placed at the spoil area should be spread evenly, compacted, and stabilized. Sediment shall not be allowed to flush into a stream or drainage way.

E. Maintain erosion and sediment control measures until final acceptance or until requested by the Engineer to remove it.

1.0.5. RUBBISH CONTROL

A. During the progress of the work, the Contractor shall keep the site and other areas for which it is responsible in a neat and clean condition and free from any accumulation of rubbish. The Contractor shall dispose of rubbish and waste materials of any nature and shall establish regular intervals of collection and disposal of such materials and waste. The Contractor shall also keep its haul roads free from dirt, rubbish, and unnecessary obstructions resulting from its operations. Disposal of rubbish and surplus materials shall be off the site in accordance with local codes and ordinances governing locations and methods of disposal and in conformance with applicable safety laws and the requirements of Part 1926 of the OSHA Safety and Health Standards for Construction.

B. It is important to maintain the construction site in a neat and satisfactory condition during the during construction and after construction has been completed. B. During construction, the Contractor shall regularly clean up all rubbish, surplus materials, and the adjacent areas affected. Unneeded construction equipment should be removed and all damages repaired so that the public and property owners will be inconvenienced as little as possible.

C. Any material or debris that has washed or flowed into or been placed in existing watercourses, ditches, gutters, drains, pipes structures, or elsewhere during the course of the Contractor's operations must be entirely removed and satisfactorily disposed of during the progress of the work, and the ditches, channels, drains, pipes, structures, and work, etc., should, upon completion of the Work, be left in a clean and neat condition.

D. The Contractor shall perform the cleanup work on a regular basis and as frequently as ordered by the City or designee. Basic site restoration in a particular area shall be accomplished immediately following the installation or completion of the required facilities in that area. Furthermore, such work shall also be accomplished, when ordered by the City or designee, if partially completed facilities must remain incomplete for some time period due to unforeseen circumstances.

E. Upon failure of the Contractor to perform periodic clean up and basic restoration of the site to the City or designee's satisfaction, the City or designee may, upon five (5) days prior written notice to the Contractor, employ such labor and equipment as it deems necessary for the purpose, and all costs resulting there from shall be charged to the Contractor and deducted from amounts of money that it may be due.

F. On or before the completion of the Work, the Contractor shall tear down and remove all temporary buildings and structures; remove all temporary works, tools, and machinery or other construction equipment; remove, acceptably disinfect, and cover all organic matter and material containing organic matter in, under, and around houses and other buildings; remove all rubbish from any grounds which has been occupied; and leave roads and all parts of the premises and adjacent property affected by work operations in a neat and satisfactory condition.

G. Upon completion of the Work, the Contractor shall remove from the sites of the subsurface explorations all plant, machinery, tools, equipment, temporary work, and surplus materials; remove all rubbish from any grounds which has been occupied; and leave the roads and all parts of the premises and adjacent property affected by work operations in a neat and satisfactory condition.

H. The Contractor shall thoroughly clean all materials and equipment installed, and, upon completion of the Work, deliver it undamaged and in fresh and new-appearing condition. All mechanical equipment should be left fully charged with lubricant and ready for operation.

I. The Contractor shall restore or replace, when and as directed by the City or designee, any public or private property damaged by work, equipment, or employees, to a condition at least equal to that existing immediately prior to the beginning of

operations. To this end, perform as required all necessary highway or driveway, walkway, and landscaping work. Suitable materials, equipment, and methods should be used for such restoration. The restoration of existing property or structures should be done as promptly as practicable as work progresses and should not be left until the end of the contract period.

1.0.6. SANITATION

A. Toilet Facilities: Fixed or portable chemical toilets shall be provided wherever needed for the use of employees. Toilets shall conform to the requirements of Part 1926 of the OSHA Standards for Construction.

B. Sanitary and Other Organic Wastes: The Contractor shall establish a regular daily collection of sanitary and organic wastes. Wastes and refuse from sanitary facilities provided by the Contractor or organic material wastes from any other source related to the Contractor's operations shall be disposed of away from the site in a manner satisfactory to the Engineer and in accordance with Laws and Regulations pertaining thereto.

1.0.7. CHEMICALS

A. Chemicals used on the work or furnished for facility operation, whether defoliant, soil sterilant, herbicide, pesticide, disinfectant, polymer, reactant, or of other classification, shall show approval of either the U.S. Environmental Protection Agency or the U.S. Department of Agriculture. Use of such chemicals and disposal of residues shall be in strict accordance with the printed instructions of the manufacturer.

1.0.8. ADDITIONAL ENVIRONMENTAL CONSIDERATIONS – AFFECTED SOIL

A. Excavation of affected soil shall be accomplished as described in Section 02220 "Excavation – General".

B. Affected soil must be placed on an impermeable barrier when temporarily stockpiled. All stockpile leachate or runoff must be collected for disposal in accordance with applicable federal, state, and local regulations. Soils designated for removal and disposal shall be prepared for shipment, transported, and disposed of in accordance with the requirements of this Section.

C. Affected soils shall be processed at a state licensed facility. These soils shall be transported and disposed of in accordance with federal, state, and local regulations. The Owner shall be responsible for all soil analyses required for transportation and disposal.

D. The Owner shall be responsible for testing soil which has been incinerated to certify the treated soil meets applicable federal, state, and local regulations for final disposal.

E. Free Petroleum Product

1. Some free petroleum products which may be partly or entirely diesel fuel or gasoline may be encountered during excavation or removal of affected soil. The Contractor shall remove free petroleum product, if necessary, when a separate floating phase greater than 0.10-inch thick is present as required by health and safety considerations. The free petroleum product shall be removed by skimming, pumping to an oil/water separator, or other approved methods. The Contractor shall take reasonable precautions to ensure that solids are not entrained in the pumping process.

2. Free petroleum products shall be transported and disposed by the Owner in accordance with federal, state, and local regulations. The Owner is responsible for any laboratory analyses required for disposal of the free petroleum products.

F. Transport and Disposal

1. Transport Regulations: The Owner shall be responsible for the loading, labeling, placarding, marking, weighing, and transport of all waste materials in accordance with the Florida Department of Transportation Regulations, and U.S. Department of Transportation Regulations. The Owner shall use only transporters that are licensed and competent to haul these wastes.

END OF SECTION

01581 PROJECT SIGNS

PART 1 – GENERAL 1.0.1

SCOPE OF WORK

A. Project Signs

1. City's Responsibility: To supply, erect and remove signs.

2. Contractor Responsibility: To maintain signs and restore site.

PART 2 – PRODUCTS 2.0.1

PROJECT SIGNS

A. The City will supply signs for this Project. These signs will be produced, installed, and at the end of construction, removed by City's forces. During the construction period, the Contractor shall maintain the signs in good condition, satisfactory to the Engineer. Should the signs be defaced, damaged or destroyed, the Contractor shall be responsible for their repair or replacement to the satisfaction of the Engineer and no extra compensation will be allowed.

PART 3 – EXECUTION 3.0.1

MAINTENANCE

A. Maintain signs and supports and repair all damages to the satisfaction of the Engineer.

B. Restore site to original condition upon completion of Project.

END OF SECTION

01600 MATERIALS AND EQUIPMENT SHIPPING, HANDLING, STORAGE AND PROTECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. This shall include both the City and Contractor supplied material and equipment.

B. The Contractor is to inform all Subcontractors, suppliers, and manufactures of the requirements herein specified and shall include expenses for the following services in his costs for compliance with the requirements hereinafter specified.

1.0.2. PREPARATION FOR SHIPMENT

A. When practical, equipment shall be factory-assembled. The equipment parts and assemblies that are shipped unassembled shall be furnished with assembly plan and instructions. The separate parts and assemblies shall be factory matchmarked or tagged in a manner to facilitate assembly. All assemblies are to be made by the Contractor at no additional cost to the City.

B. Machined and unpainted parts subject to damage by the elements shall be protected with an application of a strippable protective coating, or other approved protective method.

C. Equipment shall be packaged or crated in a manner that will provide protection from damage during shipping, handling, and storage.

D. The outside of the package or crate shall be adequately marked or tagged to indicate its contents by name and equipment number, if applicable; approximate weight; state any special precautions for handling; and indicate the recommended requirements for storage prior to installation.

1.0.3. PACKING AND DELIVERY OF SPARE PARTS AND SPECIAL TOOLS

A. Properly mark to identify the associated equipment by name, equipment, and part number. Parts shall be packaged in a manner for protection against damage from the elements during shipping, handling, and storage. Ship in boxes that are marked to indicate the contents. Delivery of spare parts and special tools shall be made prior to the time associated equipment is scheduled for the initial test run.

1.0.4. SHIPMENT

A. All equipment and material shall be shipped with freight and shipping paid FOB jobsite.

B. The Contractor shall request a 7-day advance Notice of Shipment from manufacturers, and, upon receipt of such notice, provide the Engineer with a copy of the current

delivery information concerning equipment items and material items of critical importance to the project schedule.

C. Schedule delivery to reduce long term on-site storage prior to installation and/or operation. Under no circumstances shall equipment be delivered to the site more than one month prior to installation without written authorization from the Engineer.

D. Coordinate delivery with installation to ensure minimum holding time for items that are hazardous, flammable, easily damaged or sensitive to deterioration.

1.0.5. RECEIVING

A. The Contractor shall unload and record the receipt of all equipment and materials at the jobsite.

B. All costs for receiving, inspection, handling, storage, insurance, inventory control, and equipment maintenance for both for both the Contractor-supplied and the Citysupplied materials and equipment shall be included in the prices bid and no extra compensation will be allowed.

1.0.6. INSPECTION

A. Immediately upon receipt of equipment and materials at the jobsite, the Contractor shall inspect for completeness and any evidence of damage during shipment. Should there appear to be any shortage or damage, the Engineer shall be immediately notified; and the Contractor shall be fully responsible for informing the manufacturers and the transportation company of the extent of the shortage or damage. If the item or items require replacing or supplying missing parts, the Contractor shall take the necessary measures to expedite the replacement or supply of the missing parts.

1.0.7. HANDLING

A. Equipment and materials received for installation on this project shall be handled in accordance with the manufacturer's recommendations, and in a manner that will prevent damage.

B. Pipes shall always be handled with great care to avoid damage. In loading and unloading, they shall be lifted with cranes or hoists or slid or rolled on skidways in such

a manner as to avoid shock. Under no circumstances shall this material be dropped or allowed to roll or slide against obstructions. No cables, lifting arms, hooks or other devices shall be inserted into the pipe or fitting. All lifting, pulling or pushing mechanisms shall be applied to the exterior of the pipe. Pipe and other material shall be distributed along the right-of-way in advance of installation only to the extent approved by the Engineer. Pipe shall be stored on blocking or timber. It shall not be stored on rocks, boulders, or other supports which in the opinion of the Engineer are unsuitable. Such materials shall be so placed as to keep obstruction to traffic to a minimum.

1.0.8. STORAGE AND PROTECTION

A. Equipment and materials shall be stored prior to installation as recommended by the manufacturer. Generally, materials such as pipe shall be stored off the ground in approved storage yards or along the line of the proposed pipeline as approved by the Engineer. Items subject to the damage by the elements, vandalism, or theft shall be stored in secure buildings.

B. Store and protect products in accordance with the manufacturer's instructions, with seals and labels intact and legible. Storage instructions shall be studied by the Contractor and he shall review them with the Engineer. Instructions shall be carefully followed and a written record of this kept by the Contractor. Arrange storage to permit access for inspection.

C. Store loose granular materials on solid flat surfaces in a well-drained area. Prevent mixing with foreign matter.

D. Cement and lime shall be stored under a roof and off the ground and shall be kept completely dry at all times. All structural, miscellaneous and reinforcing steel shall be stored off the ground or otherwise to prevent accumulations of dirt or grease, and in a position to prevent accumulations of standing water and to minimize rusting. Beams shall be stored, the webs vertical. Precast concrete shall be handled and stored in a manner to prevent accumulations of dirt, standing water, staining, chipping or cracking. brick, block and similar masonry products shall be handled and stored in a manner to reduce breakage, cracking and spalling to a minimum.

E. All bolts, nuts, gaskets and other joint materials for use in pipelines shall be stored under cover.

F. Gaskets shall be stored in their original packing bags or containers, and care shall be exercised to keep them away from heat, light, oil gasoline or other petroleum products. Gaskets shall be kept clean at all times and not handled with greasy or dirty hands.

G. Plastic pipe and other elastomeric products shall be stored under cover to preclude damage by ultraviolet radiation even if the product has UV inhibitors in its compound.

1.0.9. INSURANCE

A. The Contractor's insurance shall adequately cover the value of materials delivered but not yet incorporated into the work. The Contractor and the City shall be named as coinsured insofar as their respective interests may appear. Proof of this coverage must be submitted to the Engineer at the time request for progress or partial payments.

1.0.10. INVENTORY CONTROL

A. Equipment and materials shall be stored in a manner to provide easy access for inspection and inventory control. The Contractor shall keep a running account of all materials in storage to facilitate inspection and to estimate progress payments for materials delivered but not installed in the work.

1.0.11. EQUIPMENT MAINTENANCE PRIOR TO THE CITYACCEPTANCE

A. Provide the required or manufacturer's recommended maintenance during storage, during the installation, and until such time as the City accepts the equipment for fulltime operation.

1.0.12. SALVABLE EQUIPMENT

A. Any salvable pipe, or other miscellaneous material or equipment removed during construction and not reused in the work shall be cleaned, hauled, and stored by the Contractor at his own expense, where directed by the Engineer, and shall remain the property of the City. All other material shall be disposed of by the Contractor at his own expense.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01700 PROJECT CLOSEOUT

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Work Included: This section outlines the procedure to be followed in closing all contracts.

1.0.2. RELATED SECTION

A. Section 01340 "Shop Drawings, Product Data, and Samples".

B. Section 01720 "Project Record Documents".

C. City of Opa-Locka General Covenants and Conditions.

1.0.3. FINAL INSPECTIONS

A. The City will not issue preliminary punch lists. After final cleaning and upon written notice from the Contractor that he has inspected the work and it is a 100% completed, the Engineer will make a preliminary inspection with the City and the Contractor present. Upon completion of this preliminary inspection, the Engineer will submit to the Contractor a written final punch list of any which this inspection reveals as defective or incomplete work.

B. Upon receiving written notice from the Engineer, the Contractor shall immediately undertake the work required to remedy the defects and complete the work to the satisfaction of the City.

C. Each item in the punch list shall have a time duration agreed upon by both parties which shall not exceed 10 calendar days. Punchlist items may be eliminated individually from the list when approved by the Engineer.

D. Should the Engineer find all work satisfactory at the time of the inspection, the Contractor will be allowed to make application for final payment in accordance with the provisions of the General Covenants and Conditions.

1. If the Contractor fails to complete any item of work within a time period equal to 100% of the agreed upon duration of time for all individual items, the Engineer will notify the Contractor in writing specifying the conditions pertaining thereto and

directing the Contractor to comply with his directive. If the Contractor has not corrected such condition within 5 days of such notice, it shall be sufficient grounds for the Engineer to order the subject items discontinued and have them completely remedied in a timely manner at the expense of the Contractor.

2. No final estimate shall be issued by the Engineer until the Engineer has assured himself that the punch list has been 100% finished and all other related documents are submitted.

1.0.4. FINAL SUBMITTALS

A. The Contractor shall submit all closeout documents required by the Contract Documents, including but not limited to the following.

1. Warranties and guarantees

2. Test reports, including but not limited to:

   a. Concrete test results certified by a licensed testing laboratory

3. Inspection and acceptance records

4. Operating and maintenance manuals

5. Project record documents

6. Permit closeout documentation

1.0.5. FINAL PAYMENT APPLICATION

A. Final payment application must include:

1. Final releases of liens from all subcontractors and suppliers

2. Final release from Contractor

3. Final consent of surety bond

4. The Contractor must obtain final Greenspace Management approval for installed landscaping

5. Upon receipt of Final Payment, the Contractor shall execute the Form of Final Receipt, if applicable

1.0.1. GUARANTEES, BONDS, AND AFFIDAVITS

A. No Contract will be finalized until all guarantees, bonds, certificates, licenses, roofing warranty, C.O. and affidavits required for work or equipment as specified are satisfactorily filed with the Engineer.
B. The Contractor shall comply with the Public Records Laws of the State of Florida.

1.0.2. ACCESSORY ITEMS

A. All Contractors furnishing and/or installing equipment and spare parts on this project shall provide to the City, upon acceptance of the equipment, all special accessories required to place each item of equipment in full operation.

PART 2 – PRODUCTS

END OF SECTION

01710 CLEANING

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. This Section specifies the maintenance of the work site in a clean, orderly, hazard free condition.

1.0.2. QUALITY ASSURANCE

A. Conduct cleaning and disposal operations in accordance with local ordinances and anti-pollution laws. Rubbish, volatile wastes, and other construction wastes shall be neither burned nor buried on the work site, and shall not be disposed of into storm drains, sanitary drains, streams or other waterways.

B. Final cleaning shall be accomplished either by workmen experienced in cleaning operations or by professional cleaners.

PART 2 – PRODUCTS

1.0.1. ON SITE WASTE CONTAINERS

A. Provide on-site waste containers for collection of waste materials, debris and rubbish. See Section 01100 "Special Project Requirements", Subsection 1.0.4. regarding Safety Requirements for environmentally hazardous materials.

1.0.2. CLEANING MATERIALS

A. Cleaning materials shall be as recommended by the manufacturer of the surface to be cleaned.

PART 3 – EXECUTION 1.0.3.

SAFETY REQUIREMENT

A. Maintain work site in accordance with local ordinances and anti-pollution laws applicable to work site cleanliness and in a neat, orderly and hazard-free condition until final acceptance of the work. Catwalks, accessible underground structures, work site sidewalks and walkways adjacent to the work site shall be kept free from hazards caused by construction activities.

B. Store volatile wastes including rags in covered metal containers and remove from work site daily.

C. Prevent accumulations of wastes which create hazardous conditions.
D. Artificially ventilate spaces which are not naturally ventilated when volatile or noxious substances are present in those spaces.

1.0.4. CLEANING DURING CONSTRUCTION

A. The Contractor shall at all times during the execution of this Contract keep the work site free and clear of all rubbish and debris. As soon as the work is completed, the accumulated rubbish or surplus materials shall be promptly removed. The Contractor shall also restore in an acceptable manner all property, both public and private, which has been displaced or damaged during the prosecution of the work and shall leave the site and vicinity unobstructed and in a neat and presentable condition.

B. In the event of delay exceeding two (2) days after written notice is given to the Contractor by the Engineer to remove such rubbish or materials or to restore displaced or damaged property, the Engineer may employ such labor and equipment as he may deem necessary for the purpose, and the cost of such work, together with the cost of supervision, shall be charged to the Contractor and shall be deducted from any monies due him. The Project shall not be considered as having been completed until all rubbish and surplus materials have been removed and disposed of properly.

C. Perform cleaning every workday for duration of the work. Structures, grounds, and areas of the work site, access roads and adjacent public and private properties shall be maintained free from accumulations of waste materials and rubbish caused by construction operations on the work site. Place waste materials and rubbish in on site containers or as otherwise approved. Unneeded construction equipment shall be removed and all damaged repaired so that the public and property owners will be inconvenienced as little as possible.

D. Remove or secure loose material on open decks and on other exposed surfaces at end of each day's work or more often to maintain work site in hazard-free condition.

E. Prevent dislodgement of materials due to wind and other forces. Wet down dry materials and rubbish to lay dust and prevent blowing dust. Cover or wet excavated material leaving and arriving at the site to prevent blowing dust. Clean the public access roads to the site of any material falling from the haul trucks.

F. Empty on-site waste containers whenever necessary so that trash overflow does not occur. Legally dispose of contents at either public or private dumping areas.

G. Control the handling of materials, debris and rubbish; do not drop or throw from heights.

H. Immediately remove spillages of construction-related materials from hauling routes.

1.0.5. FINAL CLEANING

A. In addition to the cleaning performed above, in preparation for final inspection, remove grease, dust, dirt, rust stain from surfaces. Remove labels, fingerprints and other foreign materials from exposed exterior finished surfaces. Flush down all valve boxes, and areas leaving such surfaces clean of all sand, etc.

B. In preparation for final acceptance or occupancy, conduct final inspection and cleaning of exposed exterior surfaces, and of concealed spaces.

C. Maintain cleaning operations until project has been finally accepted.

END OF SECTION

01711 FINAL ACCEPTANCE

PART 1 – GENERAL

1.0.1. FINAL CLEANUP

A. At the completion of work and immediately prior to final inspection, cleaning of the entire project shall be accomplished according to the following provisions:

1. All temporary utility drops, fencing, and water supply outlets shall be removed.

2. All plant gate identification signs, barricades, tools, rubbish collection receptacles and other such items shall be removed by the Contractor.

3. All remaining earthen stockpiles of excess excavated material shall be graded to provide gentle slopes to prevent erosion as directed by the Engineer.

1.0.2. FINAL INSPECTION

A. Following final cleanup, the Contractor shall request an inspection by the Engineer, and Engineer of Record. If the Engineer accepts the work as being complete, then Final Acceptance shall be given to the Contractor in accordance with Contract.

1.0.3. FINAL ACCEPTANCE

A. Following successful final inspection, the Engineer shall approve the work as being complete and provide final acceptance of the work in accordance with the Contract.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01720 PROJECT RECORD DOCUMENTS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The Contractor is responsible for maintaining one record copy of:

1. Record Drawings. Record Drawings as used herein shall mean a drawing that reflects construction or design changes.

2. Record Specifications.

3. Addenda.

4. Change Orders and other modifications of the Contract.

5. Engineer's written orders or instructions.

6. Approved Shop Drawings (including product data and samples).

7. Field test records.

8. Construction photographs.

9. As-built dimensions and elevations as recorded on a daily basis by the Contractor's Professional Surveyor and Mapper (PSM) licensed to practice in the State of Florida.

10. Field Book. Survey Field notes taken by the PSM's survey crew (copy provided to the Engineer on a monthly basis)

11. The records listed above are always to be made available for the Engineer's review for all projects.

B. Vertical Datum: Nationwide, surveys and as-builts are in the process of conversion to NAVD 88 from the NGVD 1929. The City will accept NAVD 88 datum with a conversion factor on each page. The Florida Department of Transportation is using the NAVD 88 datum. Projects within FDOT roadway limits shall either use NAVD 88 datum or provide a conversion factor on each page if the NGVD 1929 datum is used. For projects using City of Miami datum provide a conversion factor on each page to the NAVD 88 datum.

1.0.2. MAINTENANCE OF DOCUMENTS AND SAMPLES

A. Maintain documents in a clean dry, legible, condition and in good order. Do not use record documents for construction purposes.

1.0.3. REQUIRED MEASUREMENTS

A. Set-up and Verification: The Contractor's PSM is required to recover the design baseline and verify the elevations and coordinates on a regular basis as needed.

B. The Contractor is required to have a level instrument setup next to the construction site in order to control the vertical alignment of the pipe installation prior to trench backfilling. The level shall be setup daily for use by the surveyor, Contractor's foreman and City Engineer/Inspector. Any underground construction work that does not have a level properly setup will be stopped by the City Engineer/Inspector.

C. The Contractor is required to have the PSM's survey crew record the field information on a daily basis when there is underground pipe installation. The survey crew shall be on-site as needed to record and verify the information before it is covered. Any underground construction work that does not have the information recorded by a survey crew will be stopped by the City Engineer/Inspector. The Engineer/Inspector has the authority to order re-excavation of work that was covered without accurate survey measurements.

D. Field Book Information: The PSM is required to have his crews make daily visits to the Project site during underground pipe installation work to perform field measurements of the Contractor's daily installations. This information shall be recorded in field books. Copies of the field notes are required to be provided to the Construction Manager on a monthly basis. The PSM's field notes shall be submitted to the City along with partial as-built plans (signed and sealed) on a monthly basis as a condition of payment.

1.0.4. RECORDS

A. During the life of the Contract the Contractor shall retain the services of a PSM who shall maintain daily records of the installation, including all deviations from Plans and Specifications and for the purposes of preparing and submitting to the City an asbuilt/record survey in compliance with:

1. Florida Statutes Chapter 472.027.

2. Florida Administrative Code Chapter 5J-17.050, 5J-17.051 and 5J-17.052.

3. As further required by these Contract Documents.

B. Measure and Record all information for all projects concurrently with constructions progress.

1. The services of the PSM for the Project shall be retained by the Contractor prior to the issuance of the "Notice to Proceed." A letter from the PSM shall be provided at the Preconstruction Meeting indicating that the Contractor has secured his services to perform all survey work for the duration of the project and prepare final as-builts plans.

C. Redline Drawings:

1. The Contractor shall maintain full size (22-inches by 34-inches) redline drawings to reflect the "record" items of work as the work progresses.

2. At a minimum, the redline drawings shall be reviewed on the 20th working day of every third month, or more often, as deemed necessary by Consultant, after the month in which the final Notice-to Proceed is given as well as on completion of Work. Failure to maintain the redline drawings up-to-date shall be grounds for withholding monthly progress payments until such time as the redline drawings are brought up-to-date.

3. Redline drawings shall be accessible to the City or designee at all times during construction period.

4. The cost of maintaining record changes, and preparation of the as-built record drawings shall be included in the unit prices bid for the affected items.

D. Label each document "PROJECT RECORD" in neat large printed letters.

1. Do not conceal any work until as-built information is recorded by the Contractor's surveyor and, if so required, by the City surveyor.

2. All locations for future connections or tie-ins shall be left unburied and uncovered until the Contractor's PSM measures and records the as-built information.

   a. All as-built and inspector information is to be made available to the Engineer daily for inclusion in the City records.

3. Restrained pipe, end line valves, thrust blocks shall be left uncovered for the last complete length. In line valves and tees shall be left exposed for one length on both sides plus the face end. Measure and record the elevation, horizontal and vertical alignment, and inclination for these items.

4. For all projects, the Contractor's PSM shall maintain exact and extensive records of any deviations from the plans or specifications. These records shall be satisfactory to the Engineer, who's decision shall be final, and enough to allow the production of accurate as-built plans which correctly and completely portray the work as constructed.

5. For all projects, the Contractor's PSM shall record data as follows during the entirety of construction:

   a. For facility (e.g. a water or sewage plant, pumping station, or similar site if so, designated by City) projects, record as-built dimensions and elevations every twenty-five feet or portion thereof along the pipeline and at every abrupt change in direction of the new line.

   b. For pipeline projects, constructed in the public right-of-way dimensions and elevations every one-hundred feet or portion thereof along the pipeline and at every horizontal and vertical change in direction.

   c. In all cases record locations and elevations for each valve, fitting, service line, fire hydrant, water sampling point, utility poles adjacent to the proposed line, overhead wires crossing the ditch line (approximate height above grade) and other appurtenances along the pipeline.

   d. The identity, dimensions, location and elevation of any existing utility crossing the proposed line and so immediately adjacent to the new line as to be exposed by the excavation shall also be recorded. Locate, excavate expose and record the same data for any utility shown in the plans whose proximity to the proposed pipeline could affect the certification requirements of the new installation. Note that in instances of a very wide ditch due to ground conditions the recording of data for adjacent, paralleling, utilities shall only be required for lines which come within three (3) feet of the outside of the pipe being installed unless otherwise ordered by the Engineer who's decision shall be final.

   e. Without exception, for all thrust blocks, the top elevation, outer dimensions, thickness of the block, length and location of any sheet piling, if used, shall be recorded by the Contractor's PSM.

   f. Specific locations and elevation of equipment, the buildings and miscellaneous items installed inside them shall be recorded as applicable and as required by the Engineer.

   g. Without exception, where the substitution of another piece of equipment for that shown on the plans has been allowed, the footprint, clearance and elevation dimensions shall be recorded by the Contractor's PSM and these changes shall be accurately and thoroughly portrayed on the as-built plans.

   h. The Contractor's Licensed PSM shall prepare from the field data, as-built record drawings showing correctly, completely and accurately the installation, embracing all changes and deviations made during construction, including all construction variances, to reflect the work as it was constructed.

   i. Record Drawings shall be prepared as specified hereinafter.

1) Record Drawings shall be prepared as specified herein.

2) Record Drawings and five (5) copies shall be signed and sealed by the PSM and shall be submitted to the City for the Engineer's review within ten (10) calendar days following the completion date of successful pressure testing of all mains and appurtenances under this Contract.

j. If the Engineer determines that the drawings are not acceptable, they will be returned to the Contractor with a cover letter noting the deficiencies and/or reasons for the disapproval. Contractor shall have ten (10) calendar days to correct all exceptions taken by the Engineer and resubmit as-built record drawings to the Engineer for final acceptance.

1.0.5. DRAWINGS

A. During the life of the Contract, maintain records of all deviations from the plans and specifications and prepare therefrom As-Built Record Drawings showing correctly and accurately all changes and deviations made during construction to reflect the work as it was actually constructed. It is the responsibility of the Contractor to check the AsBuilt Record Drawings for errors and omissions prior to submittal to the City and certify in writing that the As-Built Record Drawings are correct and accurate, including the actual location of all piping including building exposed and internal piping, electrical/signal conduits in or below the concrete floor, Indicate the size, depth and voltage in each conduit.

B. Legibly Mark to Record Actual Construction: All data as previously specified for all installations by the Contractor's . For on-site structures and facilities work the Contractor's Florida Registered Land Surveyor shall record:

1. Depths of various elements of foundation in relation to datum plane.

2. All exposed and underground piping and ductwork with elevations and dimensions and locations of valves, pull boxes, etc. Changes in location, Horizontal and vertical locations of underground utilities and appurtenances, measured from permanent reference points, plant survey grids, property lines and similar.

3. Location of internal utilities and appurtenance concealed in the construction shall be referenced to visible and accessible features of the structure. Air conditioning ducts with locations of dampers, access doors, fans and other items needing periodic maintenance.

4. Field changes in dimensions, locations and details.

5. Changes made by Engineer's written instructions or by Change Order.

6. Details not on original plans.

7. Equipment and piping relocations.

8. Major architectural and structural changes in structures, including tanks.

9. Architectural schedule changes according to Contractor's record and shop drawings.

10. Record drawings shall be prepared as specified hereinafter.

C. Specifications and Addenda: Legibly mark each section to record the following:

1. Manufacturer, trade name, catalog number and supplier of each product and item of equipment installed.

2. Changes made by Engineer's written instructions or by Change Order.

D. Approved Shop Drawings: Provide record copies for system diagrams and drawings together with each element of process equipment, piping, electrical system and instrumentation system.

1.0.6. SUBMITTALS

A. Accompany submittal with transmittal letter in duplicate, containing:

1. Date

2. Project title and number

3. Contractor's name, address and phone number

4. Title and number of each Record Document

5. Contractor signature or of its authorized representative.

B. Record Drawings with five blue line copies which have been signed and sealed by the surveyor shall be submitted to the City for the Engineer's review. Drawings shall conform to recognized standards of drafting and the minimum technical standards as set forth by the Board of Professional Surveyors and Mappers, shall be neat, legible and on 24-inch by 36-inch Mylar. These materials shall be submitted to the City for the Engineer's review as a prerequisite for payment during the course of construction as previously specified and final, complete sets of documents within ten calendar days following the completion date of successful testing of all mains, equipment and

appurtenances under this Contract. Final payment will not be made until the set of asbuilt record drawings and five sets of blue-line prints have been approved and accepted by the Engineer.

C. In cases where a portion of a pipeline system or parts of a process system are put into service, the above conditions shall apply for the in-service portion and monthly payments shall be withheld until the as-built drawings are accepted by the Engineer.

D. As-Built Record Drawings, as prepared by the Contractor's Florida Registered Land Surveyor and submitted by the Contractor, shall comply with following criteria and standards, and as specified in Section 01725 "As-built Drawings":

1. Title block must show the Contract or Project Title (as applicable); Contract number; City project number (if applicable); Contractor's name; Engineer of Record's name; Surveyor's name and address; date; location; and where appropriate to the work, size and type (i.e. water main, sanitary gravity main, sanitary force main) of main.

   a. Baselines or centerlines must be tied to section corners, monument line and right-of-way lines.

   b. Pipeline must be tied to baseline or centerline with stations and offsets.

   c. Baselines or centerlines must show bearings or deflection angles, or delta, radius, chord and arc length for curves.

   d. Show all horizontal curve data, including point of curvature (PC) and point of tangency (PT) stations or radial bearing.

   e. Stationing must be the same as shown on construction drawings and must be tied to Section corners, centerline intersections and all other pertinent control points within the project. All such pertinent points shall have their stationing shown and where there is dual stationing for a point, both stations shall be called out.

   f. Identify all streets by name or number and show stationing at all intersecting streets.

   g. Refer to vertical datum plane and identify the location, elevation and source supplying the benchmark used.

   h. Tie easement lines to survey baseline or platted centerline and rights-of-way.

   i. Show horizontal and vertical locations of all pipes, deflections, or any significant change of direction.

j. Elevations of natural ground or pavement over the pipeline must be shown at each position where the pipe elevation is shown and at intervening high and low points.

k. Show all invert and bottom elevations of culvert piping. Show all invert and bottom elevations together with pipe size, and where it can be determined, pipe material, for existing structures having pipes which cross the culvert being constructed.

l. Locations and elevations together with diameter and material of all pipes.

m. Coordinate values used inside plants shall be the local, City established coordinate systems referenced to the property boundary.

E. Update of Construction Documents:

1. All "proposed" information shall be removed from as-builts, leaving only "as-built" information reflected in drawing.

2. Upon completion of the Work, the Contractor shall furnish the Consultant the asbuilt record drawings. Pay request quantities must match as-builts record drawings. The completed as-built record drawings shall be delivered to the Consultant at least 48 hours prior to final inspection of the work. The final inspection will not be conducted unless the as-built record drawings are in the possession of the Consultant.

3. The City reserves the right to have a Registered PSM perform spot checks of asbuilt information provided by the Contractor. The City shall pay the costs of such survey work when the work is performed by a City of Opa-Locka Contractor. Should any spot checks indicate that any portion of the installation does not comply with the Contract Documents, a recheck shall be performed by another (or third) Registered PSM or agreed to by both the City and Contractor at the Contractor's expense. If the recheck confirms the first check, that portion of the work shall be removed and replaced or modified at no additional cost to the City until satisfactory compliance is attained.

F. Certification: The Contractor shall certify on as-built record drawings all other actual constructed details and information as may be required by the City including but not limited to:

1. Pipeline must be identified by type of pipe material and manufacturer.

2. Types and sizes of sheeting and piling together with measured and complete; location, dimensional and elevation data on any pile caps, tie backs, anchors, whalers or other appurtenant structures left in place.

26.0 Digital Records: The City reserves the right to require submittal of as-built drawings in AutoCAD format and in PDF format. The AutoCAD file shall be compatible with the City's system and capable of being uploaded without external reference files. Graphical information contained on electronic media shall be the same as provided on plan sheets. Digital Records shall be delivered to the office of the City Engineer, Engineering Division, Opa-Locka Public Works Department at 12950 NW 42 Ave in OpaLocka, FL 33054.

G. . A letter of transmittal shall be provided, containing a list of all files and data being provided.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION 01725 AS-BUILT DRAWINGS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. This section shall serve to set out guidelines for as-built drawings submitted to City of Opa-Locka.

B. To ensure that as-built drawings may serve their intended purposes now and in the future, they should be prepared with consideration for quality. The City of Opa-Locka Public Works Department will consider the following elements during as-built during review to ensure the quality of the as-built drawings.

C. The Contractor is required to have a survey crew record the field information on as necessary when there is underground pipe installation. The Florida Licensed Professional Surveyor and Mapper shall be responsible for providing measurements accurate to the standard of practice established in Chapter 5J-17.050 to 5J-17.052 of the Florida Administrative Code, pursuant to Section 427.027, Florida Statutes. The approved final record as-built shall be used as part of the City of Opa-Locka's GIS and Record System.

D. The Contractor's PSM shall maintain exact and extensive records of any deviations from the design plan set.

E. As-built drawings shall be prepared in a professional manner consistent with common engineering standards for layout, lettering, and line-work.

F. As-built information shall be portrayed in a manner that is readily understandable by someone not familiar with the specific job.

G. Preparer shall endeavor to present as-built information clearly without "cluttering" the drawing.

H. As-built drawings shall include all disciplines in the Bid Set drawings.

1.0.2. CRITERIA FOR AS-BUILTS

A. Horizontal: All horizontal control and locations shall be tied to the Florida State Plane Coordinate System, East Zone (NAD 83/2011).

B. Vertical Datum: All vertical control and elevations shall be referenced to North American Vertical Datum of 1988 (NAVD 1988).

1.0.3. AS-BUILT REVIEW PROCESS

A. SUBMITTAL PACKAGE

The following shall be submitted as one package in order to be accepted for initial review by the Inspections Unit.

1. Initial submittal (prior to performing field testing) shall include the following: 1 set of signed and sealed as-built (DWFX file), signed and sealed field book information, DWFX file of the as-built and the City Minimum Requirements As-built Plan Submittal.

2. Final submittal shall consist of corrected As-Built Documents in digital format (AutoCAD and DWFX files) and the following sets of signed and sealed as-builts sets:

   Five (5) sets.
   Signed and Sealed Copy of Field Book Information.
   As-builts signed and sealed by the Florida Licensed Professional Surveyor and Mapper and/or Engineer of Record must comply with format requirements.

B. CITY PROCESSING.

1. The City will require Ten (10) business days to perform the as-built review.

2. As-builts will be initially checked by the responsible Field Inspector to verify that they are an accurate representation of the work as installed and that the job as shown is complete and in accordance with the permitted plans.

3. Following the Field Inspector's review, as-builts will be reviewed in depth by the AsBuilt Reviewer to ensure compliance with these standards. The Reviewer will also check the complete package which includes the Bill of Materials.

C. PUNCH LIST

1. Punch List items may be generated from the City initial review. Successive reviews are solely for the purpose of ensuring that original punch list items are completely and correctly done to obtain a final As-built acceptable to the City.

2. Successive punch list items may only be added to correct a problem resulting from submitter's efforts to comply with the original punch list. No new original punch list item(s) may be added. Submitter shall be required to make these successive changes.

3. In the case of an oversight on the part of the As-built Reviewer, punch list items may be added to the list or requested of the submitter after the valid time for such items. The City requires that all corrections be made as a condition of accepting the final as-builts.

4. Marking of the drawings shall be kept current and shall be done at the time the material and equipment are installed. Annotations to the Contract Documents shall be made with an erasable colored pencil conforming to the following color code:

Additions - Red
Deletions - Green
Comments - Blue Dimensions
- Graphite*

*Legibly mark to record actual depths, horizontal and vertical location of all above and below grade structures, underground pipes, valves, raceways, cables, and appurtenances referenced to permanent surface improvements.

1.0.4. AS-BUILTS SUBMITTAL REQUIREMENTS

A. GENERAL REQUIREMENTS

1. Prior to final acceptance, two (2) copies of as-built drawings certified by a Florida Registered Land Surveyor shall be provided to the City for approval, acceptance and certification by the "Engineer of Record", together with a copy of digital media producing such As-Builts.

2. At minimum, the As-Built must show Station numbers and horizontal offsets from the Base Line and Right-of-Way lines on a Plan scaled 1"=20 ft. for all fittings, valves and changes in horizontal alignment, and a profile with a vertical scale of not less than 1" = 2 ft. with elevations at all horizontal and vertical changes in alignments and grade profile elevations at approximately 50 ft.

3. As-Built plans and profiles must also show all abandoned pipes and plugs that were modified within the project limits and actual elevation/description of all other utilities crossing or encountered in the vicinity of the new water mains. The paper size of the drawings shall be 22"X 34".

4. Any deviations from the design plans must be approved by the City.

B. QUALITY OF AS-BUILTS

To ensure that as-builts may serve their intended purposes now and in the future, they should be prepared with consideration for quality. The As-built Reviewer will consider the following elements to ensure the quality of as-builts.

1. Accuracy: The Contractor is required to have a survey crew record the field information on as necessary when there is underground pipe installation. The Florida Licensed Professional Surveyor and Mapper shall be responsible for providing measurements accurate to the standard of practice of the Florida Administrative Code. The approved final record as-built shall be used as part of the City GIS and Record System.

2. Field Changes: The Contractor's PSM shall maintain exact and extensive records of any deviations from the design plan set.

3. Appearance: As-builts shall be prepared in a professional manner consistent with common engineering standards for layout, lettering and line-work.

4. "Understandability": As-built information shall be portrayed in a manner that is readily understandable by someone not familiar with the specific job.

5. Clarity: Preparer shall endeavor to present as-built information clearly without "cluttering" the drawing.

1.0.5. AS-BUILT CONTENT REQUIREMENTS – ALL DRAWINGS

A. All drawings submitted to the City of Opa-Locka Public Works Department shall include at a minimum the following, where applicable.

1. Centerlines, right-of-way lines, right-of-way dimensions, street widths and names, with matching plat, if applicable, subdivision name, phaseline, and number. (Phasing to be nearest valve and manhole in limits of phase area).

2. Baselines, monuments, monument lines, lot lines, parcel lines.

3. All involved lots and blocks shown and correctly designated (to match plat).

4. All control lines identified (i.e., centerline, section line, etc.). Identify all streets by name or number and show stationing at all intersecting streets.

5. Baseline shall be tied to centerlines, boundary lines, section corners, or to monument lines or to right-of-way lines. Baselines must show bearings or deflection angles, or delta, radius, chord, and arc length for curves.

6. Pipeline installation shall be tied to a baseline that easily identified on the existing or proposed right-of-way. Baseline shall not be on top of the main except for gravity sewers installed on centerlines.

7. Show all existing water, sewer and/or stormwater mains as a broken line (i.e., dashed). Show proposed utility as dark solid line. Also, identify respective utility pipe, size, and material type. Existing or proposed mains 20-inches in diameter and greater, shall be shown as two lines (i.e., double line) of the line type as stated.

8. Show all horizontal and vertical curve data, including point of curvature (PC) and point of tangency (PT) stations or radial bearing.

9. Easements:

    a. Easements type and size shall be clearly shown with size and tied to centerline. The easements shall be separate for water, sewer, force main, and pump stations.

    b. Existing Official Record Book (ORB) or other record information must be shown.

    c. Easement lines shall be tied to the centerline of the main.

10. Separate profile for each segment and utility type (water, sanitary sewer, stormwater, etc.).

11. Every utility (water, sewer, sewer laterals, water services, gas, electric, stormwater, telecommunication, duct banks, etc.) encountered and/or crossing drainage, water, or sanitary sewer facilities (whether it is a conflict or has sufficient clearances) shall be located, both horizontally and vertically. The clearance between the facilities

horizontal and vertical, shall be noted. For instance, if a 2inch gas main crosses over the top of a 6-inch potable water main, the bottom elevation of the gas main shall be noted and the top of the water main shall be noted. The difference between the two facilities will be the clearance between the two facilities. Parallel mains shall note the clearance between the outside of the mains. It shall be the Contractor's responsibility to note these crossings on a daily basis and ensure that this information is reflected on the As-Built Drawing plan set. Crossings will not require state plane coordinates.

12. All utilities shall be stationed and all facilities labeled. Drawings shall show stations for all services. Lengths and distances for service runs shall also be given.

13. Clearly show and label what is new and what is existing at the tie-in points.

14. Show all outlets, stub-outs, sewer lateral, water service and any other relevant information. Identify the size, material, length, direction, and elevation (top of pipe for water, sewer, and stormwater and force mains, invert gravity sewer and stormwater mains).

15. Elevations of natural ground or pavement over pipelines shall be shown at each position where the pipe elevation is shown at least every 100 feet.

16. Manhole rim and valve box manhole rim elevations shall be shown.

17. Show all invert and bottom elevations in manholes and valve vaults or boxes. Show all invert and bottom elevations together with pipe size, and where it can be determined, pipe material, for existing structures having pipes which cross the pipeline being constructed.

18. Locations, elevations, and size of all casings shall be shown.

19. Locations and top and bottom elevation of all sheeting, including sheeting left in place, shall be shown.

20. Provide State Plane Coordinate values for all visible features such as valves, manholes, maintenance access structures, fire hydrants, water meters, cleanouts, and backflow preventers. Also provide State Plane Coordinate values for existing valves and manholes at points of connection or closest to the point of connection and the point of connection itself.

21. Lines that are abandoned in place shall be located during construction and clearly identified (dashed and bold line type) on the drawings to include cut and plug locations and pipe material.

1.0.6. AS-BUILT CONTENT REQUIREMENTS – PAVING, GRADING, AND DRAINAGE DRAWINGS

A. Paving, grading, and drainage drawings shall include at a minimum the following, where applicable.

1. All existing and proposed utilities in the public right-of-way shall be shown on the paving, grading, and drainage plans. All utilities shall be identified and located by dimension, horizontally and by elevation, and their materials of construction shall be noted to the extent determinable without excavation.

2. Cross-section(s) and/or typical section(s) of proposed road and drainage construction, shall show dimensions, materials, and purposes of all existing (to remain) facilities as well as all proposed facilities within the right-of-way.

3. Pavement marking and signing drawings shall include sign locations.

B. All rock elevations for parking lot, roadways, and swale areas shall include at a minimum the following.

1. Rock elevations at all high and low points, and at enough intermediate points to confirm slope consistency and every 50 feet for roadways.

2. Rock elevations shall be taken at all locations where there is a finish grade elevation shown on the design plans.

3. All catch basin and manhole rim elevations shall be shown.

4. Elevations around medians will also be required.

5. Elevations shall be taken on all paved and unpaved swales prior to placement of asphalt and/or topsoil/sod, at enough intermediate points to confirm slope consistency and conformance to the plan details.

C. Retention area elevations shall be taken at the bottom of the retention area and at the top of bank. If there are contours indicated on the design plans, then they shall be asbuilt as well.

1.0.7. AS-BUILT SURVEY

A. An as-built survey will be required upon completion of all construction projects that lay within City-owned properties, including, but not limited to, City rights-of-way, easements, parcels, and submerged lands, etc. All improvements, including but not limited to, landscaping will be required.

B. As-built surveys shall be prepared in accordance with FAC Chapter 5J-17.051 and all applicable Standards of Practice.

C. When performing as-built surveys, the surveyor and mapper shall obtain field measurements of vertical or horizontal dimensions of constructed improvements so that the constructed facility can be delineated in such a way that the location of the construction may be compared with the construction plans.

D. As-built survey maps shall clearly show by symbols, notations, or delineations, those constructed improvements located by the survey.

E. The vertical and horizontal accuracy of the measurements made shall be such that it may be determined whether the improvements were constructed consistent with planned locations.

F. The Surveyor shall be responsible for the location, establishing or replacement of Vertical and Horizontal Survey Control Points.

G. Complete topographic and boundary survey for the project shall be signed and sealed by the Florida Licensed Professional Surveyor and Mapper as part of the as-built plans. All information required of a boundary survey shall be contained on the as-built plans to include the legal description of the site, easements and rights-of-way abutting the site and location of all surface facilities recorded by a PSM. All utilities within the property shall be properly shown, along with their associated elevation and clearance.

1.0.8. CERTIFICATION

A. All as-built drawings are to be certified to the City of Opa-Locka Public Works Department and all sheets are to be signed and sealed as previously outlined.

B. As-builts shall include a signed, sealed, and dated certification statement by the responsible Florida Licensed Professional Surveyor and Mapper that all measurements were recorded under his direction and are accurate.

C. Any civil drawings that are not surveyed shall also be included in the set and shall be signed and sealed by the Engineer of Record.

D. As-builts that contain electrical, mechanical, or structural work shall also be signed and sealed by the Engineer of Record to indicate that the work was constructed as designed.

E. It is the responsibility of the Contractor to check the as-builts for errors and omissions prior to submittal to the City and certify in writing that the as-builts are correct and accurate, including the actual location of all piping including building exposed and internal piping, electrical/signal conduits in or below the concrete floor, indicate the size, depth, and voltage in each conduit.

PART 2 – PRODUCTS

END OF SECTION

01730 OPERATING AND MAINTENANCE INSTRUCTIONS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. Prepare Operating and Maintenance (O & M) Manual covering all equipment and systems provided under this project.

B. Instruct the City's personnel in the operation of equipment and maintenance provided under this project.

C. This Section covers the services of the manufacturer's representatives and special coordinating services required of the Contractor that shall apply during construction, facilities startup, and training of the City's personnel for facilities operation.

D. The Contractor shall inform all Subcontractors and manufacturers of the requirements herein and include the following services in his costs for the work. Where a minimum amount of time is stated in the Technical Specifications for manufacturer's services, any additional time required to perform the specified services shall be at no additional cost to the City.

1.0.2. SUBMITTALS

A. Not later than 30 days after the start of Construction, submit for review and approval by the Engineer two copies of a preliminary draft of the O&M manual, showing the proposed format and an outline of the contents.

B. Throughout construction, prepare O&M sections for equipment and systems when such equipment and systems, and shop drawings and technical data therefor, are approved. Within 30 days following receipt of the Engineer's approval of the final shop drawing submittal, submit, in duplicate, draft of complete O&M Manual for review and approval of Engineer.

C. Within 30 days after receipt of Engineer's review comments, make required revisions and submit in final form two copies of the O & M Manual for final approval.

D. The Contractor shall inform all Subcontractors and manufacturers of the requirements herein and include the following services in his costs for the work. Where a minimum amount of time is stated in the Technical Specifications for manufacturer's services, any additional time required to perform the specified services shall be at no additional cost to the City.

1.0.3. FORM, FORMAT AND SUBMITTALS CONTENTS

A. Operating and maintenance manuals will be used for use by the City personnel in the operation and maintenance of the various systems.

B. The City shall be furnished with one set of any special tools required for servicing for each type of equipment actually furnished. These tools shall be provided to the Pump Station Maintenance Division.

C. Prepare data in the form of an instructional manual for use by the City personnel.

D. Format:

1. Size: 8½ in. x 11 in.

2. Paper: 20-pound minimum, white, for typed pages.

3. Text: Manufacturer's printed data or neatly typewritten.

4. Drawings:

   a. Provide reinforced punched binder tab, bind in with text.

   b. Fold larger drawings to the size of the text paper.

5. Provide fly-leaf for each separate product, or each piece of operating equipment.

   a. Provide typed description of product, and major component parts of equipment.

   b. Provide indexed tabs.

6. Cover: Identify each volume with typed or printed title "OPERATING AND MAINTENANCE INSTRUCTIONS". List:

   a. Title of Project.

   b. Identify of separate structure as applicable.

   c. Identity of general subject matter covered in the manual.

E. Binders

1. Commercial quality three-ring binders with durable and cleanable plastic covers.

2. Maximum ring size: As required (Minimum 1½-inches).

F. Content of Manual

1. Neatly typewritten table of contents, arranged in a systematic order.

    a. Contractor, name of responsible principal, address and telephone number.

    b. A list of each product required to be included, indexed to the content of the volume.

    c. List, with each product, the name, address and telephone number of:

        1) Subcontractor or installer.

        2) Maintenance Contractor, as appropriate.

        3) Identify the area of responsibility of each.

        4) Local source of supply for parts and replacement.

        5) Identify each product by product name and other identifying symbols as set forth in Contract Documents.

G. Product Data:

1. Include only those sheets which are pertinent to the specific product.

2. Annotate each sheet to:

    a. Clearly identify the specific product or part Installed.

    b. Clearly identify the data applicable in the installation.

    c. Delete references to inapplicable information.

H. Drawings:

1. Supplement product data with drawings as necessary to clearly illustrate:

    a. Relations of component part of equipment and system.

    b. Control wiring, schematic wiring, and flow diagram.

2. Coordinate drawings with information in Project Record Documents to assure correct illustration of completed installation.

3. Do not use Project Record Documents as maintenance drawings. I. Written text, as required to supplement product data for the particular installation:

1. Organize in a consistent format under separate headings for different procedures.

2. Provide a logical sequence of instructions for each procedure.

J. Copy of each warranty, bond and service contract issued.

1. Provide information sheet for City's personnel, give:

a. Proper procedures in the event of failure.

b. Instances which might affect the validity of warranties or bonds.

1.0.4. MANUAL FOR EQUIPMENT AND SYSTEMS

A. Content, for each unit of equipment and system, as appropriate:

1. Description of unit and component parts.

a. Function, normal operating characteristics, and limiting conditions.

b. Performance curves, engineering data and tests.

c. Complete nomenclature and commercial number of all replaceable parts.

2. Operating Procedures:

a. Start-up, break-in, routine and normal operating instructions.

b. Regulation, control, stopping, shut-down, and emergency instructions.

c. Special operating instructions.

3. Maintenance Procedures:

a. Routine operations.

b. Guide to "trouble shooting".

c. Disassembly, repair, and reassembly.

d. Alignment, adjusting, and checking.

4. Servicing and lubrication schedule:

a. List of lubricants required.

5. Manufacturer's printed operating and maintenance instructions.

6. Description of sequence of operation by control manufacturer.

7. Original manufacturer's parts list, illustration, as drawings and diagrams required for maintenance.

a. Predicted life of parts subject to wear.

b. Items recommended to be stocked as spare parts.

8. List of original manufacturer's spare parts, manufacturer's current prices, and recommended quantities to be maintained in storage.

9. Other data as required under pertinent sections of specifications.

B. Content, for each electric and electronic system, as appropriate:

1. Description of system and component parts

a. Function, normal operating characteristics, and limiting conditions.

b. Performance curves, engineering data and test.

2. Switchgear, transformers, and motor control centers.

a. Coordination summary.

b. Relay settings.

c. High voltage switch instructions.

d. High voltage cable termination and splice instructions.

3. Operating procedures:

a. Routine and normal operating instructions.

b. Special operating instructions.

4. Maintenance procedures:

a. Routine operations.

b. Guide to "trouble-shooting".

c. Disassembly, repair and reassembly.

d. Adjust and checking.

C. Prepare and include additional data when the need for such data becomes apparent during instruction of City's personnel.

D. Additional requirements for operating and maintenance data: The respective sections of Specification.

1.0.5. SUBMITTAL OF MANUALS

A. Two draft copies of the complete operating and maintenance manual shall be submitted for review by the Engineer within 30 calendar days after approval of all shop drawings. One copy will be return to the Contractor within 30 days after receipt by the Engineer.

1.0.6. POSTED OPERATING INSTRUCTIONS

A. General: Operating instructions and diagrams shall be prepared for posting near the equipment. Posted operating instructions shall be photographic or equal non-fading reproductions framed under glass encased in non-discoloring plastic and shall be mounted in location directed. Copies of the posted operating instructions shall also use with the operating and maintenance manuals as a basis in training employees in the operation and maintenance of systems and related equipment installed.

B. Contents: Posted operating instructions shall consist of simplified, consolidated equipment, control and power diagrams graphically representing the entire system and actual equipment installed, including concise written instructions on how to start and stop systems, what settings and conditions are to be observed and what control adjustments are to be made or maintained by the operation.

1.0.7. MANUFACTURES'S NAMEPLATES

A. Each major component of equipment to have manufacturer's name, address, model number and rating on a plate securely affixed in a conspicuous place. Nameplate of a distributing agent will not be acceptable in lieu of manufacturer's nameplate.

B. Nameplate shall be die-stamped, engraved, or etched to guarantee long term legibility.

1.0.8. GUARANTY/WARRANTY

A. The Contractor shall guarantee that all new equipment has the capacity specified and that it will operate without excess noise or vibration.

B. Contractor shall furnish a written guarantee covering all workmanship and materials for a period of one (1) year, from the date of acceptance. This shall include an agreement to repair or replace, at his expense, all defects that may appear in that time, which in the opinion of the Engineer, are due to defective workmanship or materials.

C. Copies of factory warranties on all equipment furnished shall be submitted with the above described, written guarantee period, and included in maintenance manuals.

1.0.9. OPERATING AND MAINTENANCE RESPONSIBILITY

A. Contractor shall provide all required service and maintenance on all equipment installed under this contract for one (1) year following final acceptance or the beginning of beneficial use by the City. The starting date of one (1) year service period shall be determined by the City. Included in the service and maintenance to be provided during this one (1) year period, shall be the following:

1. All required lubrication, adjusting belt tensions, eliminating excessive noise and vibration.

2. Correcting all electrical and mechanical faults, recording all permanent installed gauge meter and temperature readings.

3. General service items, including the answering of service calls.

B. Service during construction:

1. General: Competent and experienced technical representatives shall represent the manufacturers of all equipment and systems as many days as may be necessary to resolve assembly or installation problems at the worksite which are attributable to, or associated with, the equipment furnished. This requirement applies to manufacturers of all equipment furnished, whether or not specifically set forth in the Technical Specifications.

2. Manufacturer's Certificate of Proper Installation: Where called for in the Technical Specifications, the manufacturer's representative shall provide a certificate stating that the equipment or system has been installed in accordance with the manufacturer's recommendation and has been inspected by a manufacturer's authorized representative, that it has been serviced with the proper initial lubricants, that applicable safety equipment has been properly installed, and that the proper electrical and mechanical connections have been made.

C. Functional testing assistance:

1. Where functional (or run) testing is called for on the Technical Specifications, the manufacturer's representative shall assist with the initial test, which shall include checking for proper rotation, alignment, speed, excessive vibration, and noisy operation. Initial equipment and system adjustment and calibrations shall be performed in the presence of and with the assistance of the manufacturer's representative. The previously specified Manufacturer's Certificate of Proper Installation shall include the statement that proper adjustment has been made and that the equipment or system is ready for plant startup and operation.

2. The Contractor, as applicable to the equipment furnished, shall state in writing that all necessary hydraulic structures, piping systems, and valves have been successfully tested; that all necessary equipment systems and subsystems have been checked for proper installation, started, and successfully tested to indicate that they are all operational; that the systems and subsystems are capable of performing their intended functions; and that the facilities are ready for startup and intended operation.

3. Training of Owner's Personnel:
   Where called for in the specifications, the manufacturer's representative shall provide detailed instructions to the City personnel for operation and maintenance of the specified equipment. These training services shall include pre-startup classroom and onsite equipment instruction and/or post-startup classroom and onsite equipment instruction, as stated in the specifications.

PART 2 – PRODUCTS NOT USED

PART 3 – EXECUTION NOT USED

END OF SECTION

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. Where the City has obtained various permits for this Project, copies will be appended at the rear of the Specifications.

B. The Contractor shall familiarize himself with, and comply with, all requirements of these permits and their issuing authorities. All other necessary permits shall be obtained by the Contractor.

C. The Contractor's particular attention is called to any special conditions of the permits relating to construction procedures, excavation and backfill requirements, open trench restrictions, asphalt concrete pavement restoration, turbidity controls, and all other general and special conditions. In the event any of the conditions of the permits are in conflict with the requirements of these Specifications, the more stringent conditions of the permits shall take precedence.

D. Any deviations from the Plans, Specifications or permits appended thereto, must first be approved by the Engineer even if approval for the change has been given by the permitting agency.

E. The Contractor shall assume throughout the life of the Contract all obligations and responsibilities imposed on the City as permittee of the aforementioned permits. All expenses necessary for compliance with the regulations and requirements of each permitting agency and its permit shall be borne by the Contractor and shall be included in his overall bid price.

F. The cost of any fees such as impact fees, inspection fees, etc. and the cost paid for all required permits shall be borne by the City. The Contractor shall pay the required fees, obtain the permit(s) and then upon submission of proof of cost to the City, be reimbursed for said cost out of the Permit Fee Dedicated Allowance Item. This shall apply only to required permits and fees. Permits obtained or fees paid for the advantage of the Contractor or non-required permits obtained for whatever reason shall not be reimbursed. The necessity or non-necessity of a permit or fee shall be determined by the Engineer whose word shall be final. As specified in the paragraph above, all costs of compliance with the permit(s) shall be borne by the Contractor and included in his bid price.

G. All surveying required by the Project permits shall be done by the Contractor's Registered Professional Surveyor and Mapper (PSM) licensed to practice in the State of Florida.

END OF SECTION

01750 MAINTENANCE OF TRAFFIC AND PUBLIC STREETS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The Contractor shall be responsible for providing the Engineer with Maintenance of Traffic (M.O.T.) plans for lane closures and/or detours for approval. These M.O.T. plans shall be produced by an individual employed by the Contractor and certified as "Work Zone Traffic Safety Supervisor" by the American Traffic Safety Service Association, ATSSA.

B. The Contractor shall be responsible for the maintenance of public streets and traffic control for the duration of the project. The cost of Traffic Control including the cost of any required off duty police officers shall be included under the appropriate bid item in the Proposal. If no bid item for this is included, said costs shall be included in other appropriate items of the bid and no extra compensation will be allowed.

1.0.2. REGULATIONS

A. As used herein, any reference to City of Opa-Locka, or its published regulations, permits and data, shall be synonymous and interchangeable with other recognized governing bodies over areas or streets, or their departments, published regulations, permits or data. The Contractor shall abide by all applicable laws, regulations, and codes thereof pertaining to maintenance of public streets, detour of traffic, traffic control and other provisions as may be required for this project.

1.0.3. MAINTENANCE OF TRAFFIC (M.O.T.)

A. The Contractor shall be fully responsible for the maintenance of public streets, detour of traffic (including furnishing and maintaining regulatory and informative signs along the detour route), traffic control, and other provisions throughout the Project as required by the City of Opa-Locka, Miami-Dade County Department of Transportation and Public Works (MDCDTPW) Traffic Division, Florida Department of Transportation (FDOT), or other governing agency. Traffic shall be maintained according to corresponding typical traffic control details as outlined in the MDCDTPW Manual. No street shall be completely blocked, nor blocked more than one-half at any time, keeping the other one-half open for traffic, without specific approval. Hard closures require approval from the City of Opa-Locka Transportation Department

B. An off-duty City of Opa-Locka police officer is required. Off-Duty Office phone number is (305) 681-1033.

C. The Contractor shall provide all barricades with warning lights, necessary arrow boards and signs, to warn motorists of the work throughout the project. Adequate approved devices shall be erected and maintained by the Contractor to detour traffic.

D. Excavated or other material stored adjacent to or partially upon a roadway pavement shall be adequately marked for traffic safety at all times.

E. The Contractor shall provide necessary access to all adjacent property during construction.

F. The Contractor shall be responsible for the provision, installation and maintenance of all traffic control and safety devices, in accordance with specifications outlined in the MDCDTPW Manual. In addition, the Contractor shall be responsible for the resetting of all traffic control and information signing removed during the construction period.

G. Where excavations are to be made in the vicinity of signalized intersections, the Contractor is alerted that vehicle loop detectors may have been embedded in the pavement. Every effort has been made to show the approximate locations on the plans; however, the Contractor shall verify these locations by inspecting the site of the work and by contacting the Traffic Division. Any loop detector which is damaged by the Contractor, whether shown on the plans or not, shall be repaired or replaced by the Contractor, at his expense, and to the satisfaction of the Traffic Division.

H. **The Contractor shall notify the Traffic Division twenty-four (24) hours in advance of the construction date, and forty-eight (48) hours in advance of construction within any signalized intersection.**

I. Temporary pavement will be required over all cuts in pavement areas, and also where traffic is to be routed over swale or median areas. When the temporary pavement for routing traffic is no longer necessary, it shall be removed, and the swale or median areas restored to their previous condition.

J. Pavement markings damaged during construction shall be remarked, as required by the Traffic Division.

PART 2 – PRODUCTS

2.0.1. MAINTENANCE OF TRAFFIC PLANS

A. For construction within the City public right-of-way, the Contractor shall submit two sets of maintenance of traffic (MOT) plans for review to the City of Opa-Locka Public Works Department and the agency having jurisdiction.

B. MOT plans should be designed and developed by a certified MOT Specialist when normal traffic flow will be impacted causing unexpected or confusing situations in unclear travel path for motorist/pedestrians when entering non advanced warning work zones. MOT work zone traffic controls separate and protect workers, pedestrians and motorists delineating areas closed to traffic.

C. MOT plans must be designed in accordance with the requirements of the agency having jurisdiction.

D. MOT plans must be site-specific.

E. MOT plans will be reviewed and approved by the agency having jurisdiction.

F. MOT plans shall be in color. **PART 3 – EXECUTION**

NOT USED

END OF SECTION

DIVISION 2 – SITE WORK

02210 SITE GRADING

PART – 1 GENERAL

1.0.1. SCOPE OF WORK

A. The Contractor shall perform grading work within the limits, elevations and grades indicated on the plans and as specified herein.

1.0.2. RELATED WORK

A. Section 01031 "Grades, Lines and Levels".

B. Section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems".

C. Section 02510 "Asphaltic Concrete Pavement".

1.0.3. QUALITY CONTROL

A. The site shall be graded to the required elevations. Spot elevations are shown on the plans and the finished surfaces shall be uniformly sloped between these locations.

B. Suitable excavated material shall be used in the formation of embankments. The Contractor shall provide all additional fill material required to complete the embankments.

1.0.4. EXISTING CONDITIONS

A. Known underground, surface, and aerial utility lines and buried objects are based on best available data and indicated on the plans. Contractor shall verify all locations.

1.0.5. PROTECTION

A. Protect trees, shrubs, and lawns and other features remaining as part of final landscaping.

B. Protect bench marks, existing structures, fences, roads, sidewalks, paving, and curbs against damage from equipment and vehicular traffic.

C. Protect aerial, surface, or underground utility lines or appurtenance which are to remain.

PART 2 – PRODUCTS

2.0.1. FILL

A. Unless otherwise noted, suitable fill material shall be non-cohesive, non-plastic, granular mixture of local sand and lime rock, shall be free from vegetation, organic material or muck and shall contain not more than 8 percent material by weight which passes the No. 200 sieve. Broken concrete shall not be used in the fill. Fill material containing lime rock shall have sufficient sand to fill the voids in the lime rock, and no individual rocks or pieces of hard material that will not pass a 6-inch diameter ring shall be used in the fill; except that the upper 4-inches of all backfill or fills shall not contain any rock or hard material that will not pass a 3-inch diameter ring. All fill material shall be provided by the Contractor from any excess suitable on-site material or from off site sources, all subject to review and acceptance by the Engineer prior to use. The Contractor shall be responsible for determining the volume of material required for the site.

PART 3 – EXECUTION 3.0.1.

PREPARATION

A. Establish and identify required lines, levels, contours, and datums.

B. Maintain benchmarks, monuments, and other reference points. Re-establish if disturbed or destroyed at no cost to the City.

C. Before start of grading, establish the location and extent of utilities in the work areas. Notify utilities to remove and relocate lines which are in the way of construction.

D. Maintain, protect, reroute, or extend as required existing utilities to remain which pass through the work area.

3.0.2. REMOVAL OF TOPSOIL

A. Topsoil of horticultural value shall be stripped from areas of construction under this contract and stockpiled in area designated by Engineer. Said material shall be stockpiled separately from fill material.

B. Do not permit topsoil to be mixed with subsoil.

C. Do not strip topsoil when wet.

D. Do not drive heavy equipment over stockpiled topsoil.

3.0.3. ROUGH GRADING

A. Rough grade site to required levels, profiles, contours, and elevations ready for finish grading and surface treatment. Maintain the following:

1. Sodded areas: 4 ½-inches below finished grade elevation

2. Seeded areas: 6-inches below finished grade

3. Paved areas: 21½-inches below finished grade elevations

4. Shrub beds: 24-inches below finished grade elevations

5. Flower beds: 18-inches below finished grade elevations

6. Concrete sidewalks: 6-inches below finished grade elevations

B. Prior to placing fill material over undisturbed subsoil, scarify surface to depth of 6inches.

3.0.4. GRADING AND COMPACTION

A. Fill material shall be placed in lifts not to exceed 8-inches and compacted to a density of not less than 95 percent of maximum density at optimum moisture as determined by ASTM D 1557. Fill material shall be within plus or minus 2 percentage points of optimum moisture content. The minimum density acceptable at any location within the pavement subgrade shall be as specified in Section 02745 "Asphaltic Concrete Pavement".

3.0.5. FINE GRADING

A. After structures, bases and pavements are completed and the yard piping trenches backfilled, the disturbed areas of the site shall be fine graded. All construction debris, regardless of size, shall be removed. The completed surface shall be shaped and sloped to drain away from the structures. The completed surface shall be within 0.1 foot of the elevations shown on the plans, unless otherwise accepted by the Engineer. Minor adjustments to line and grade may be required as the work progresses in order to satisfy field conditions.

3.0.6. SURPLUS MATERIAL

A. Remove surplus materials from site.

B. Dispose of surplus material at no cost to the City.

END OF SECTION

02220 EXCAVATION – GENERAL

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The work specified in this section consists of the removal of protruding objects as required to prepare the area of the proposed construction, and the removal and disposal of all product and debris which are not required to be salvaged or nor required to complete the construction.

1.0.2. RELATED WORK

A. Section 02230 "Clearing and Grubbing".

B. Section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems".

PART 2 – PRODUCTS

NOT USED

PART 3 - EXECUTION

3.0.1. REGULAR EXCAVATION

A. Regular Excavation shall include roadway excavation and borrow excavation, as defined for each.

B. Roadway Excavation shall consist of the excavation and the utilization or satisfactory disposal, of all materials necessary for the construction of the roadway, side ditches, etc., within the limits of the roadway right of way as show in the plans.

3.0.2. BORROW EXCAVATION

A. Borrow Excavation shall consist of the excavation and satisfactory utilization of material from authorized borrow pits. It shall include only material that is suitable for the construction of roadway embankments or of other work of constructing embankment covered by the contract and unsuitable material in borrow areas furnished by the City, which must be excavated as determined by the Engineer, in order to obtain the suitable material.

3.0.3. LATERAL DITCH EXCAVATION

A. Lateral ditches shall include inlet and outlet ditches to structures and roadway, changes in channels of streams, and ditches parallel to the roadway right of way, as shown in the plans. Unless otherwise shown in the plans all excavation in that portion of lateral ditches beyond the limits of the roadway right of way, including the sections where dressing is required as provided in 120-11.1, shall be classified as Lateral Ditch Excavation.

3.0.4. SUBSOIL EXCAVATION

A. Where muck, rock, clay or other material within the limits of the roadway is unsuitable in its original position, the Contractor shall excavate such material to the cross sections shown in the plans or indicated by the Engineer, and shall backfill with suitable material, which shall be shaped to conform to the required cross sections. Where the removal of plastic soils below the finished earthwork grade is required, a construction tolerance from the lines shown in the plans as the removal limits, of plus or minus 0.2 foot in depth and plus or minus six inches (each side) in width will be allowed.

3.0.5. TRENCH EXCAVATION

A. General

1. Design, Provide, and maintain shoring, sheeting and bracing as necessary to support the side of excavations and to prevent detrimental settlement and lateral movement of existing facilities, adjacent property, and completed work.

B. Trench Excavation Plan: Prepare Trench Excavation Plan addressing the following topics:

1. Details or shoring, sloping, or other provisions for worker protection from hazards of caving ground.

2. Design assumptions and calculations.

3. Methods and sequencing of installing excavation support.

4. Proposed locations of stockpiled excavated material.

5. Minimum lateral distance from the crest of slopes for vehicles and stockpiled excavated materials.

6. Anticipated difficulties and proposed resolutions.

C. Removal of Excavation Support

1. Remove excavation support in a manner that will maintain support as excavation is backfilled or leave voids of backfill.

2. Do not begin to remove excavation support until support can be removed without damage to existing facilities, completed work, or adjacent property.

D. Trenches

1. For trench exceeding 5 feet in depth, provide adequate safety system meeting requirements of applicable state and local construction safety order, and federal requirements.

3.0.6. DEWATERING SYSTEMS

A. Any water which accumulates in the excavations for structures shall be removed promptly by means satisfactory to the Engineer of Record in such a manner as to not create a nuisance to adjacent property or public thoroughfare. Pumps and engines for dewatering systems shall be operated with mufflers and at a minimum noise level suitable to a residential area. The Contractor shall be responsible for any nuisance created due to the disposal of the water from his drainage system.
B. Where applicable, the Contractor shall be required to obtain all necessary permits approving the location and proposed method of disposal before discharging water from any excavation into any portion of the public right-of-way or into any existing drainage structure or facility.

3.0.7. STOCKPILING EXCAVATED MATERIAL

C. Stockpile excavated material that is suitable for use as fill or backfill until material is needed.

D. Post signs indicating proposed use of material stockpiled. Post signs that are readable from all directions of approach to each stockpile. Signs should be clearly worded and readable by equipment operators from their normal seated position.

E. Confine stockpiles to within easements, right-of-way, and approved work areas. Do not obstruct road or streets.

F. Do not stockpile excavated material adjacent to trenches and other excavations unless excavation side-slopes and excavation support systems are designed, constructed, and maintained for stockpile loads.

G. Do not stockpile excavated materials near or over existing facilities, adjacent property, or completed work, if weight of stockpiled material could induce excessive settlement.

H. Disposal of Spoil

3.0.8. DISPOSAL OF SURPLUS AND UNSUITABLE MATERIAL

A. Ownership of Excavated Materials

2. Owner of all suitable excavated material shall remain in the City until the final job requirements for fill or backfill materials have been fulfilled. Unless otherwise provided by the plans or special provisions, any surplus materials then remaining and not needed for job requirements shall become the property of the Contractor and are to be disposed of by him/her, outside the right of way, to the satisfaction of the Engineer.

3. In urban or other areas where temporary storage of apparent excess suitable materials within the right of way may be impracticable, the Contractor may stockpile the materials outside the right of way in areas provided by him/her. Until stock materials are needed in the job or are declared surplus. With the written approval of the Engineer, the Contractor may dispose of such apparent excess material with the

stipulation that he shall replace any portion of the disposed material required to fulfill the actual job requirements, with equally suitable material, at his own expenses.

4. No extra compensation will be allowed for any re-handling involved under the provisions of this Sub-article.

B. General Requirements for Disposal: Excavated muck or other materials unsuitable for the roadway construction shall be disposed of as shown in the plans or, if the plans do not indicate the disposal, the materials shall become the property of the Contractor and shall be disposed of by him/her outside the right of way.

C. Disposal of Muck on Side Slopes: As an exception to the provisions of 120-5.2 when approved by the Engineer, in rural undeveloped areas muck (A-8 material) may be placed on the slopes, or may be stored alongside the roadway, provided there shall be a clear distance of at least six feet between the roadway grading limits and the muck, and the muck shall be so dressed as to present a reasonably neat appearance. In addition, disposal of this material by placing on the slopes may also be permitted in developed areas where, in the opinion of the Engineer, this will result in an esthetically pleasing appearance and will have no detrimental effect on the adjacent developments. Where muck or other unsuitable material is permitted to be disposed of inside the right of way limits, such material shall not be placed such as to impede the inflow or outfall of any channel or of side ditches. The Engineer shall determine the limits adjacent to channels within which such materials shall no be placed.

D. Disposal of Paving Materials: Unless otherwise indicated in the plans, paving materials excavated in the removal of existing pavements, such as paving brick, asphalt block, concrete slab, lime-rock, sidewalk, curb and gutter, etc., shall become the property of the Contractor and shall be disposed of by him/her outside the right of way. If the materials are to remain the property of the City, they shall be placed in neat piles as directed.

E. Disposal Areas: Where the plans or specifications require the Contractor to dispose of excavated materials outside the right of way, and the disposal area is not indicated in the contract documents, the Contractor shall furnish the disposal area without additional compensation. Areas provided by the Contractor for disposal of removed paving materials shall be out of sight of the project and at least 300 feet from the nearest roadway right of way line of any State-maintained road. The 300-foot limitation will not apply, however, if the materials are buried.

1.0.10 USE OF PUBLIC STREETS

A. Ownership of use of public streets and alleys shall be such as to provide a minimum of inconvenience to the public and to other traffic. Any earth or other excavated material spilled from trucks shall immediately be removed by the Contractor and the streets cleaned to the satisfaction of the governing authority.

B. The City has not made any attempt to define the equipment to be used in transporting the excavated material since this may vary, however, the Contractor shall abide by the following general requirements:

1. Transport vehicles must be of the type(s) approved for this application by the political jurisdictions involved. General requirements are that the vehicles have watertight bodies that they be properly equipped and fitted with seals and covers to prohibit material spillage or draining, and that they be cleaned as often as is necessary to prevent deposit of material on roadways. Vehicles must be loaded within all legal weight limits and operated safely within all traffic and speed regulations.

2. Access to businesses, schools and homes along the route of the work must be provided by the Contractor at all times.

3. Where traffic will pass over backfilled trenches before they are paved, the top of the trench shall be maintained with temporary asphalt that will allow normal vehicular traffic to pass over.

END OF SECTION

02230 CLEARING AND GRUBBING

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Unless otherwise shown in the plans, Standard Clearing and Grubbing shall be done within the following areas:

1. All areas where excavation is to be done, including borrow pits, lateral ditches, right of way ditches, etc.

2. All areas where roadway embankments will be constructed.

3. All areas where structures will be constructed, including pipe culverts and other pipelines.

4. Any other areas specifically called for on the plans to be cleared and grubbed.

1.0.2. DEFINITIONS

A. Clearing shall consist of the cutting, removal and satisfactory disposal of all trees, stumps, brush, shrubs, rubbish and any other objectional material within the designated areas.

B. Grubbing shall consist of the removal and disposal of all stumps larger than 1-1/2 inches in diameter and other objectional material to a depth of at least 12 inches below the ground surface.

1.0.3. QUALITY ASSURANCE

A. In the course of the work, it may become to remove trees if they interfere with the work. Dade County and various municipalities have ordinances regulating the removal, relocation and pruning of trees in the public right-of-way, these ordinances shall be strictly adhered to. The Contractor shall obtain a permit from Dade County and/or other regulatory agencies having jurisdiction over the work area before removing, relocating and/or pruning any tree. The Contractor shall comply with all requirements and conditions of the permit.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

3.0.1. CLEARING AND GRUBBING

A. The Contractor shall remove and replace, where required all existing shrubbery, trees, grass, sprinklers, fences, signs, mailboxes, structures, roadways, sidewalks, curbs and similar items or structures in the way of all excavation necessary for the construction of the project.

B. Where pavements or sidewalks are cut, they shall be cut by means of a mechanical pavement saw to form true and straight edges. Where such cutting is for the purpose of pipeline installation, saw cutting shall be either parallel or at right angles with the centerline of the pipe.

C. To protect himself from being held liable for any existing damaged pavement, including detour routes, the Contractor is advised to notify in writing the authority having jurisdiction, prior to proceeding with any work in the vicinity.

3.0.2. DEPTHS OF REMOVAL OF ROOTS, STUMPS AND OTHER DEBRIS

A. In all areas where excavation is to be done and where the excavated material is to be used in the construction of roadway embankment or roadway base or pavement; also in all areas where roadway embankment will be constructed; roots and other debris shall be removed to a depth of at least one foot below the ground surface. The surface shall then be plowed to a depth of at least six inches and all roots thereby exposed shall be removed to a depth of at least one foot. All stumps within the roadway right of way shall be completely removed and disposed of by the Contractor.

B. Where excavation is done within the roadway area and where excavation for structures is done, all roots, etc., protruding trough or appearing on the surface of the completed excavation shall be removed to a depth of at least one foot below the excavation surface.

C. In borrow pits, material pits and lateral ditches, all stumps, roots, etc., protruding through or appearing on the surface of the completed exaction shall be removed or cut off below the finished excavation surface.

D. In borrow and material pits no clearing or grubbing shall be done to within three feet inside the right of way line.

E. Within all other areas where Standard Clearing and Grubbing is to be done, roots and other debris, projecting through or appearing on the surface of the original ground, shall be removed to a depth of one foot below the surface, but no plowing and harrowing will be required in these areas.

3.0.3. TREES TO REMAIN

A. As an exception to the above provisions, where so directed by the Engineer, desirable trees within the roadway and project site area shall be trimmed, protected and left standing. Branches of trees extending over the area occupied by the roadway shall be trimmed as directed, to give a clear height of 16 feet above the roadway.

3.0.4. BOULDERS

A. Any boulders encountered in the roadway excavation, or found on the surface of the ground, shall be removed and placed in neat piles inside the right of way and adjacent to the right of way line.

3.0.5. SELECTIVE CLEARING AND RUBBING

A. Selective Clearing and Grubbing shall consist of removing and disposing of all vegetation, obstructions, etc., as provided above except that, where the Contractor so elects roots, etc., may be cut off flush with the ground surface. Stumps shall be completely removed and disposed of by the Contractor. Undergrowth shall be entirely removed except in specific areas designated by the Engineer to remain for aesthetic

purposes. Desirable trees shall be trimmed, protected and left standing, with the exception of such trees as the Engineer may designate to be removed in order to facilitate right of way maintenance. Undesirable or damage trees (as so designated by the Engineer), shall be removed. Selective Clearing and Grubbing shall be done only in areas so designated in the plans.

3.0.6. PROTECTION OF ADJACENT AREAS

A. The Contractor shall protect areas shown on the drawings or designated by the Engineer of Record to remain protected from damage by construction operations by erecting suitable barriers of other acceptable means.

B. Property obstructions which are to remain in place, such as buildings, sewers, drains, water or gas pipes, conduits, poles, walls, posts, bridges, etc., are to be carefully protected from damage and are not to be displaced.

3.0.7. DISPOSAL

A. All roots, vegetation and other refuse removed from the site during clearing and/or grubbing operations shall be legally disposed of by the Contractor. Where required, the Contractor shall obtain a permit from Miami-Dade County and/or other regulatory agencies having jurisdiction over the work area before burning any material on the site.

END OF SECTION

02314 EXCAVATION, BACKFILL AND FILL FOR STRUCTURAL FACILITY AND UTILITY SYSTEMS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The work included under this Section consists of furnishing material and equipment, and performing all labor necessary for excavating, backfilling, filling and compaction of areas to be occupied by facilities or utility systems to be constructed.

B. Plan For Excavation: Prior to commencing the excavation, the Contractor shall submit a plan of his proposed operations to the Engineer of Record for approval. The Contractor shall consider, and his plan for excavation shall reflect, existing utilities that are to remain, the equipment and methods to be employed in the excavation.

1.0.2. QUALITY ASSURANCE

A. All excavations shall conform with South Florida Building Codes, the State of Florida Trench Safety Act, OSHA requirements and the provisions herein. Excavations shall be executed in accordance with all applicable requirements of Section 01016, including notification of Sunshine State One-Call Center (1-800-432-4770) 48 hours prior to any excavation.

B. Work shall be performed in accordance with Contract Documents, Drawings, and/or City of Opa-Locka Public Works Manual Specifications and Standard Details, in a neat and accurate manner. It is the intent of the City to obtain a complete and working installation according to these Specifications, and any items of labor, equipment, or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the project plans or stated herein.

C. Asphalt Acceptance Standards: The following minimum defects identified by the City or designee must be covered by warranty (but not limited to):

1. Sunken pavement patches greater than or equal to one-quarter (¼) inch (measured by a twelve (12) foot straight edge).

2. Surface raveling or oxidation due to deficiencies with the asphalt material.

3. Poor workmanship.

4. Inadequate compaction per Standards and Specifications.

PART 2 – PRODUCTS 2.0.1.

BACKFILL MATERIAL

A. Except where a 1:10 cement/sand or flowable fill concrete mix is required, granular soil backfill materials shall be utilized. Suitable backfill material shall be clean, shall not be expansive nor have high organic content, shall be free of clay, marl, unstable materials, debris, lumps and clods, and shall meet the following requirements.

1. Maximum Liquid Limit shall not exceed 12 as determined by ASTM D4318.

2. Maximum Plasticity Index shall not exceed 35 as determined by ASTM D4318.

3. Not more than 10 percent of weight shall be finer than 74-micron (No. 200) U.S. Standard Sieve.

B. Backfill material containing limerock shall have sufficient sand to fill the voids in the limerock. No stones or rocks larger than 6-inches in diameter will be permitted in any backfill.

C. Debris, broken paving, or broken concrete shall not be used.

D. Material for backfill may be material resulting from excavation, only if it meets the above mentioned requirements, or if suitable in the opinion of the City or designee. If sufficient suitable backfill material, including select backfill material, is not available from the site, additional material shall be furnished.

2.0.2. SELECT BACKFILL

A. Select backfill material specified herein shall meet all the general requirements for backfill material set forth in 2.01, and in addition, shall be free of any rocks or stones larger than 2 inches in diameter. Select backfill material may be material resulting from trench excavation, if suitable in the opinion of the City or designee, carefully selected to comply with these requirements.

1. Trenches remaining open to facilitate the repair of existing underground utilities damaged by the Contractor during excavation shall not be deemed a portion of the allowable 600 feet of open trench, unless otherwise decided by the Engineer, at his discretion.

2. **Backfilling and compaction shall be kept up with the rate of pipe laying. Backfill consisting of the specified material shall be placed and properly compacted, to the degree specified hereinafter. Unless otherwise ordered or approved by the Engineer, in writing, no temporary fill, refill, or uncompacted fill shall be installed. Under no circumstances shall backfill material other than that specified or an approved equal be installed. Backfill shall be placed and compacted immediately after installation of piping.**

3. Where existing paving is damaged or removed, temporary paving, as specified hereinafter shall be placed the same day as the ditch backfill and compaction and it shall be replaced with permanent paving within thirty (30) days, to the limits shown in the City's Standard Details or directed by the Engineer.

4. Backfillling and compaction of trenches will not be allowed until the work has been inspected by the Engineer, and the Engineer indicates that backfilling and compaction may proceed. Any work covered up or concealed without the

knowledge or consent of the Engineer may be required to be uncovered or exposed at no cost to the City.

5. The Contractor shall backfill and compact all trenches and other excavations made in the process of installing the pipe. The cost of all backfilling and compaction shall be included in the price bid under the various Items. The Contractor shall maintain the surface of the backfill free from major irregularities and potholes. Backfill to a point at least one (1) foot above the pipe shall be select backfill material not exceeding two (2) inches in diameter. Above this point, backfill shall be of material not exceeding six (6) inches in diameter.

6. Backfilling and compacting of material under and around the pipe and to one (1) foot above the crown shall be in layers not exceeding six (6) inches in thickness. Each layer shall be thoroughly compacted to at least 98 percent of maximum density as determined by AASHTO Standard No T-180-74, "Moisture-Density Relations of Soils using a 10-lb. (4.54 Kg.) Rammer and an 18 in. (457 mm) Drop." The material in the ditch may be compacted by either hand tamper or a mechanized power tamper, provided the results obtained meet the continued approval of the Engineer.

7. Backfilling and compacting of material lying above a point one (1) foot above the crown of the pipe and below the pavement base or the surface of the ground if out of pavement shall be accomplished in layers not exceeding six (6) inches in thickness. Each layer shall be thoroughly compacted with a powered hand tamper or a mechanized power tamper to at least 98 percent of maximum density as determined by AASHTO Specification T-180-74 or such greater density as may be required by the governing authority over the area in which the work is performed.

8. A testing laboratory, designated by the City, will make periodic field tests to determine the density being obtained in each lift, or layer, of the backfill. The City will pay the cost for each test that indicates that the density obtained in the backfill meets or exceeds the specified percentage. Contractor shall pay the cost for each test that indicates that the density obtained in the backfill is insufficient and does not meet the specified percentage. When compacted backfill fails to meet the specified percentage of maximum density as shown by test results, it shall be reworked and recompacted in a manner approved by the Engineer, and then retested. The reworking, recompacting and retesting of the backfill shall be repeated as many times as may be necessary to obtain compacted backfill with density meeting or exceeding the specified percentage as indicated by test results. The Contractor shall exercise proper care to ensure that no pipe will be broken or displaced through the use of the type of mechanical compacting equipment he selects. Water shall be added as required to obtain optimum moisture to facilitate compaction, but ponding or inundation of backfill will not be permitted. These ponding limitations shall not prohibit backfill in a wet trench up to the level of the

natural water table if the "Alternate Method of Construction" is utilized. See Section 02220 "Excavation – General".

9. Backfill and compaction shall be kept up with the rate of pipe laying. The backfill up to the spring line of the pipe shall be placed and compacted as soon as practical after the laying of the pipe.

10. On parts of the line where ground water level may be high enough to float the pipe, the placing of the backfill and the rate of pumping the trench shall be so controlled as to prevent the pipe from floating or moving from the line and grade shown on the Plans.

11. In the event that sufficient suitable material is not available at any point to properly backfill the trench, the Contractor shall transport suitable material from points of the line where such material is available or shall otherwise furnish suitable material at no additional cost to the City.

12. Suitable material in excess of all backfill requirements shall be removed from the work and disposed of by the Contractor. The cost for removal shall be included in the overall Project cost bid.

13. Where cuts have been made through unpaved, stabilized rock roadways, driveways and parkways, surface restoration shall consist of 3 inches of compacted limerock overlaid by 3 inches of gravel or graded and washed rock with a maximum diameter of 1/2-inch except as otherwise directed by the Engineer. The rock shall be installed over the entire width of the disturbed area and shall closely match the existing rock at each location. Several grades of rock may be required to attain this end, but it is not anticipated that more than one grade will have to be used at any one location. The cost for replacement of gravel or rock stabilized driveways and roadways shall be included in the overall Project cost bid unless a specific Bid Item is established in the Quotation.

14. Backfill material shall consist of the suitable excavated material being stored for this purpose. Backfill material placed within one (1) foot of piping and appurtenances shall not contain any stones or rocks larger than two (2) inches in diameter, and no stones or rocks larger than 6 inches in diameter will be permitted in any backfill. Backfill material containing mangrove muck or other unsuitable materials shall not be used.

15. During the backfilling operation, care shall be taken to preserve the alignment and gradient of the installed pipe.

2.0.3. SUITABLE BACKFILL

A. Suitable backfill material shall be clean and free from all organic material, clay, marl or unstable materials, debris, lumps, broken paving, or other deleterious material. No rocks or stones larger than 3½ inches in diameter shall be allowed in any suitable backfill. Material for backfill may be material resulting from excavation, if suitable in the opinion of the City or designee.

2.0.4. STRUCTURAL FILL

A. Structural fill shall consist of an inorganic, non-plastic, granular soil containing less than 10% material passing the No. 200 mesh sieve (relatively clean sand or crushed limerock with a 2 inches max. particle size) with a Unified Soil Classification of GP, GW, SP, SPGM, SW-SM or SP-SM.

2.0.5. UNSUITABLE FILL AND BACKFILL MATERIAL

A. Unsuitable fill and unsuitable backfill material shall be all material not meeting the definition of Structural Fill, Suitable Backfill, or Select Fill and cannot be amended or blended in the field to meet the standard of one of these fills. Unsuitable Fill material may contain deleterious material including but are not limited to: cherty or other extremely hard pieces, lumps, balls or pockets of sand or clay size material, organic matter, muck, loose sand, loose free shells, corals or skeletal remain of other marine invertebrates retained on the No. 4 sieve, or water sensitive clay minerals.

2.0.6. BEDDING MATERIAL

A. Pipe bedding material shall be accordance with the Culvert Pipe Manufacturer's Standard Details, firstly, and FDOT if not specified.

B. Bedding may be select backfill material, as specified above, if approved by the City or designee.

C. No. 57 stone may be used for bedding of piping (except for copper pipe) and/or manholes as shown on the Standard Details.

D. Sand for bedding shall be dry screened. Sand shall be graded sand with 100% passing a ⅜ inch sieve and not more than 5% passing a No. 200 sieve.

E. Limerock screenings, sand or other fine material shall not be used for bedding.

F. All pipe bedding material shall be new, unless otherwise approved by the City or designee. Existing pipe bedding material may not be used.

2.0.7. NO 57. STONE

A. No 57 stone shall be crushed stone (or drain field limerock). Crushed stone shall consist of hard, durable, sub-angular particles of proper size and gradation, and shall be free from organic material, wood, trash, sand, loam, clay, excess fines, and other deleterious materials. The stone shall conform to the requirements of ASTM C 33, Size No. 57 (3/4- inch rock) and be graded within the following limits:

Sieve size	Percent Finer by Weight
1-½ inch	100
1 inch	95 to 100
½ inch	25 to 60
No. 4	0 to 10
No. 8	0 to 5

2.0.8. BALLAST ROCK

A. Ballast rock shall be composed of hard, durable, sound pieces having a specific gravity of not less than 2.65. It shall be crushed rock conforming to the following gradation:

Sieve size	Percent Finer by Weight
1-½ inch	100
¾ inch	30 to 75
½ inch	15 to 55
¼ inch	0 to 5
No. 8	0 to 5

2.0.9. SEPARATOR GEOTEXTILE

A. If required by Geotechnical Report, roadways shall be demucked or stabilized with a separator geotextile in accordance with the Geotechnical Report.

B. Laboratory analysis shall be completed, and all material to be used in the construction of the road shall be approved by the City or designee prior to placement.

C. Separator geotextile shall be made from woven fabric, meeting the physical requirements of FDOT Specifications Section 985 and placed as per manufacturer's Specifications or as directed by the City or designee. At a minimum, separator geotextile shall have 1 foot overlap, and upslope segments must overlap on top of down slope segments.

D. Follow the manufacturer's recommendations regarding protection from direct sunlight. At the time of installation, the City or designee will reject the material if it has defects, tears, punctures, flaws, deterioration, or other damage. However, if approved by the City or designee, the Contractor may repair torn or punctured sections by placing a patch over the damaged area following manufacturer's recommendation. The Contractor shall replace or repair any rejected geosynthetic at no additional expense to the City.

E. Repair existing or newly installed separator geotextile by a patch consisting of the same material as the reinforcement separator geotextile over the damaged area. Overlap the undamaged reinforcement separator geosynthetic with the patch a minimum of 5 feet in all directions. Replacement of existing separator geotextile material shall be of similar or better quality and shall meet the requirements as provided in FDOT Specifications, Section 985.

2.0.10. STEEL – REINFORCING

A. Bar reinforcement for concrete structures shall conform to the requirements of ASTM A615, "Deformed and Plain Billet-Steel Bars for Concrete Reinforcement," Grade 60, Deformed, except that Steel manufactured by the Bessemer Process will not be accepted. Wire mesh reinforcing for concrete structures shall be welded wire fabric meeting the requirements of ASTM A185 "Steel Welded Wire Fabric, Plain, for Concrete Reinforcement."

B. The Contractor shall furnish the Engineer with the manufacturer's test certificates showing the Steel to meet the above requirements, in addition to which the Engineer may take representative samples from the material on the job and have them tested by an independent testing laboratory.

C. Completely detailed shop drawings and bending schedules shall be submitted by the Contractor for the approval of the Engineer. Such approval shall be obtained before the bars are cut and bent.

2.0.11. STEEL – SHEET PILING

A. Steel sheet piling shall conform to the requirements of ASTM A572 "High-Strength Low-Alloy Columbium-Vanadium Steels of Structural Quality," (AASHTO No. M223) or ASTM A328 "Steel Sheet Piling."

B. The Contractor will be responsible for design and selection. Structural plans for the sheet steel piling installation and the calculations for the required Section Modulus and the Sheet Piling Designation shall be prepared by a registered professional engineer licensed to practice in the State of Florida. Sealed plans shall be submitted to the Engineer for approval prior to installation of the piling system.

C. Structural steel shall meet the requirements of ASTM A36 "Structural Steel."

D. Whenever shoring is required, locate the system to clear permanent construction and to permit forming and finishing of concrete surfaces. Provide shoring system adequately anchored and braced to resist earth and hydrostatic pressures. Shoring system adequately anchored and braced to resist earth on which the support or stability of existing structures is dependent must be left in place at completion of work. Maintain bracing until structural elements are supported by other bracing or until permanent construction is able to withstand lateral earth and hydrostatic pressures.

PART 3 – EXECUTION 3.0.1.

PREPARATION

A. The Contractor shall remove and replace, where required, all existing shrubbery, trees, grass, sprinklers, fences, signs, mail boxes, guard rails, structures, roadways, sidewalks, curbs and similar items or structures in the way of the culvert and shall make all excavation necessary for the construction of the culvert, to the lines and grades shown on the Plans. Weeded areas shall be restored as specified in Section 02900 "Landscaping", Care of Trees, Shrubs and Grass. Where pavements or sidewalks are cut, they shall be cut by means of a mechanical pavement saw to form true and straight edges which shall in general be either parallel or at right angles with the centerline of the culvert. Unless specific bid items are provided in the Quotation form, the cost of removing and replacing any plantings or existing structures shall be included in the price bid. In order to protect himself from being held liable for any existing damaged pavement, including detour routes, the Contractor is advised to notify in writing the authority having jurisdiction over the street where such defective pavement exists prior to proceeding with any work in the vicinity. A copy of all such notices shall be forwarded to the Engineer.

B. Clearing: The construction site shall be cleared of all obstructions and vegetation, including large roots and undergrowth, within 5 feet of the lines of excavation, in accordance with Section 02230 "Clearing and Grubbing". All debris created by this clearing operation shall be hauled from the site and disposed of by the Contractor.

1. All cleared materials shall be promptly removed from the work area and disposed of in an area provided by the Contractor, at no additional cost to the City. Accumulation of debris or stockpiling along the route of the work will not be allowed.

C. Removals: Complete all removals within the lines of excavation prior to beginning excavation. Where required, all existing shrubbery, trees, grass, sprinklers, fences signs, mailboxes, structures, sidewalks, curbs, utility poles, or structures subject to

damage resulting from the excavation should be transplanted, relocated, braced, shored, or otherwise protected and preserved.

3.0.2. EXCAVATION

A. Excavation shall be conducted in accordance with FDOT Specifications, Section 120.

B. Where rock, clay, or other material within the limits of the roadway is unsuitable in its original position, the Contractor shall excavate such material to the cross sections shown in the Plans or indicated by the City or designee, and shall backfill with suitable material, which shall be shaped to conform to the required cross sections. Where the removal of plastic soils below the finished earthwork grade is required, a construction tolerance from the lines shown in the Plans as the removal limits as defined by the Geotechnical Engineer of plus or minus 0.2 feet in depth and plus or minus six (6) inches each side in width will be allowed.

C. The Contractor shall perform all excavation of every description and of whatever substances encountered, to the dimensions and depths shown on the approved plans, but in all cases as required for construction, and as specified herein. All excavations shall be made by open cut. All existing utilities such as pipes, poles, and structures shall be carefully located, supported, and protected from injury; in case of damage, they shall be restored at the Contractor's expense.

D. When the walls of the excavations are to be kept vertical and in order to protect the safety of workmen, the general public, this or other work or structures, or excavation walls, or pipe installation including materials encountered in the excavation which have a tendency to slough or flow into the excavation, undermine the banks, weaken the overlying strata, or are otherwise rendered unstable by the excavation operation shall be retained by steel sheeting, stabilization, grouting or approved methods. Said methods shall comply with the Trench Safety Act (TSA). Sheeting and shoring or other approved method shall be designed by a Professional Engineer licensed to practice in the State of Florida.

E. For structures, the Contractor shall maintain the bottom of the excavation firm and dry and maintain an elevation of the water one (1) foot below the concrete to be placed, by use of pumps, tremie or other acceptable method.

F. Pipe trench excavation shall be in accordance with the appropriate Standard Detail in the Miami-Dade County Public Works Manual or FDOT.

G. The Contractor shall excavate pipe trenches to a minimum of 6 inches below the outside bottom of the proposed pipe barrel to provide for the installation of the bedding material.

H. Not more than 100 feet of trench shall be opened ahead of pipe laying operations at one time unless a greater length of open trench is approved by the Engineer.

I. If, in the opinion of the Engineer, the soil at that depth is unsatisfactory as foundation material because it contains marl, muck, organic matter, or other unsuitable material, the excavation shall be continued two (2) feet deeper, except if a suitable foundation material is exposed at a lesser depth, further excavation will not be required. The cost of this extra excavation, and backfilling with select backfill material, shall be included in the price for pipe laying and no additional payment will be made for this work.

J. If the soil is still unsuitable after the additional excavation as prescribed above, and the Engineer authorizes "Overcut," the trench bottom shall be excavated further in one (1) foot increments and paid for as "Trench Overcut." See below 3.0.6. "Trench Overcut.

K. Trench widths, when measured at a point 12 inches above the top of the pipe, shall provide a 12 inch maximum clearance on each side, between the outside of the pipe barrel and the face of the excavation, or sheeting if used. Minimum trench width shall provide at least 6 inch clearance on each side, between the outside of the pipe barrel and the face of the excavation, or sheeting if used.

For excavations five (5) feet deep or less, sheeting and shoring shall be installed where necessary to control trench width, protect the workmen and the general public, and prevent damage to this or adjacent work, or structures. When an excavation is in excess of five (5) feet deep, the Contractor shall comply with the provisions of Florida Statutes Chapter 553, Part III, "Trench Safety Act." Method(s) of compliance used shall protect the workmen and the general public, prevent damage to this or adjacent work, structures, utilities, pavements, sidewalks, curbs, gutters and similar improvements both public and private, and provide for proper maintenance of traffic. The trench width may vary to accomplish this and to comply with the provisions of Florida Statutes Chapter 553, Part III, "Trench Safety Act," but only from a point one (1) foot above the top of the pipe.

L. For trench exceeding 5 feet in depth, provide adequate safety system meeting requirements of applicable Local, State, and Federal requirements.

M. In areas where trench widths are not limited by right-of-way or easement widths, property line restrictions, existing adjacent improvements including pavements, structures, and other utilities, and maintenance of traffic, the trench sides may be sloped to a suitable angle of repose of the excavated material.

N. In areas where trench widths are not limited by site constraints the trench sides may be sloped to a stable angle of repose of the excavated material but only from a point one foot above the crown of the pipe. A substantially and safely constructed

movable shield, "box" or "mule" may be used in place of sheeting when the trench is opened immediately ahead of the shield and closed immediately behind the shield as pipe laying proceeds inside the shield.

O. Ladders or steps shall be provided for and used by workmen to enter and leave trenches.

P. Excavated material shall be stored and disposed of in such a manner that they will not interfere unduly with traffic on public streets and sidewalks. In congested areas, such materials, cannot be stored adjacent to the trench nor used immediately as backfill, shall be removed to convenient places of storage. If any material is creating a public hazard or other unsafe condition, it shall be removed immediately to a storage area.

Q. Materials suitable for use as backfill be hauled to and used in areas where not enough suitable material is available from the excavation. Suitable material in excess of backfill requirements shall be used on the site as directed by the City or designee, or removed at the Contractor's expense. Any pockets of organic matter, concrete or other unsuitable material encountered in excavating shall be removed and replaced with material satisfactory to the City.

R. The excavation of walls for forms will not be permitted.

S. The trench wall shall be kept at a stable angle of repose to maintain trench widths within the limits hereinafter specified or shown on the Plans.

T. The trench, when in rock, shall be excavated to a width within the limits of the top of the pipe and the trench bottom so as to provide a clearance on each side of the pipe barrel, measured to the face of the excavation, of 12 inches. Rock or removal in the excavation shall be considered a part of the excavation and as such no additional payment shall be made therefore. Where excavation is in silt, the width of trench bottom shall be pipe O.D. plus two (2) feet with the trench walls being kept at a stable angle of repose. All pipe trenches shall be excavated to a level at least 12 inches below the outside bottom of the proposed pipe barrel.

U. Where wood sheeting or certain designs of steel sheeting are used, the City may require that the sheeting be cut off at a level two (2) feet above the top of the installed pipe and that portion below that level be left in place. If ordered left in place, sheeting and shoring shall be paid for under the appropriate Quotation Item.

V. If interlocking steel sheeting is used, the City may permit its complete removal in lieu of the cut-off, providing removal can be accomplished without disturbing the bedding, pipe or pipe alignment. Any damage to the pipe bedding, pipe or pipe alignment shall be cause for rejection of the affected portion of the work.

W. A substantially and safely constructed moveable shield or box, as approved by the Engineer, may be used in place of sheeting when the trench is opened immediately behind the shield as pipe laying proceeds inside the shield. All construction in conjunction with using such a shield must be as approved by the Engineer, including excavation, installation of pipe and backfilling and compaction.

X. The Contractor shall perform all excavation of every description and of whatever substances encountered, to the dimensions and depth shown on the Plans, or as directed by the Engineer. All excavations shall be made by open cut. Any existing utilities such as pipes, cables, etc., shall be carefully supported and protected from damage, and in case of damage, they shall be restored at no cost to the City.

Y. Excavation for other piping and appurtenances shall be sufficient to leave at least 12 inches clear between their outer surfaces and the embankment or sheeting that may be used to protect them.

Z. Provide excavation support as necessary to support sides of excavations and prevent detrimental settlement and lateral movement of existing facilities, adjacent property, and completed Work.

AA. Remove excavation support in a manner that will maintain support as excavation is backfilled or leave voids of backfill. Do not begin to remove excavation support until support can be removed without damage to existing facilities, completed Work, or adjacent property.

BB. Materials removed from the trenches shall be stored and disposed of in such a manner that they will not interfere unduly with traffic on public streets and sidewalks and they shall not be placed on private property. In congested areas, such materials as cannot be stored adjacent to the trench or used immediately as backfill shall be removed to convenient places of storage. If any material is creating a public hazard or other unsafe condition, in the opinion of the Engineer, it shall be removed immediately by the Contractor to a storage area.

CC. The Contractor shall temporarily store excavated material suitable for backfill in full compliance with the provisions of the permits. All mud, silt, debris and other material unsuitable for backfilling the trench shall be removed and legally disposed of offsite by the Contractor. The Contractor shall make his own arrangements regarding stock piling of excavated suitable material and storage and assembly space to properly and safely carry out the construction. Any agreements entered into by the Contractor and property owners shall hold the City harmless. Storage of excavated material shall not cause environmental problems and shall be performed at no additional cost to the City.

DD. Excavation for structures:

1. Clear, as stated above, all existing items or structures in the way of the proposed pipeline or structures and excavate as necessary to the depths and dimensions shown on the plans, but in all cases as necessary for satisfactory installation.

2. Where pavements or sidewalks are cut, they shall be cut by means of a mechanical pavement saw to form true and straight edges which shall, in general, be either parallel or at right angles.

3. In order to protect himself from being held liable for any existing damaged pavement, including detour routes, the Contractor is advised to notify in writing the authority having jurisdiction over the street where such defective pavement exists prior to proceeding with any work in the vicinity. A copy of all such notices shall be forwarded to the City.

4. Where interlocking steel sheeting is used, the City may require that the sheeting be cut off at a level two (2) feet above the top of the installed pipe and that portion below the level be left in place.

5. Excavation for manholes and other piping appurtenances shall be sufficient to leave at least two (2) feet clear between their outer surfaces and the embankment or sheeting.

6. If, in the opinion of the Engineer of Record or the City, the soil at that depth is unsatisfactory as foundation material because it contains marl, muck, organic matter, or other unsuitable material, the excavation shall be continued two (2) feet deeper, except if a suitable foundation material is exposed at a lesser depth, further excavation will not be required.

7. When the pipe to be installed in a trench requires the pipe installers to work under and around the pipe, the Contractor may request the City that he be allowed to exceed the 12" maximum clearance, specifying the clear distance desired.

8. The ends of existing mains shall be temporarily capped or plugged to keep them clean and the ends of all mains shall be temporarily anchored to keep the joints from blowing apart from internal pressure until the new mains can be reconnected to them.

9. In addition to specific construction methods specified, the general requirements in subsequent subsections, below, shall apply to the work of this project.

3.0.3. TRENCH STABILIZATION

A. No claim for extras or additional payment will be considered for cost incurred in the stabilization of trench bottoms which are rendered soft or unstable as a result of

construction methods, such as improper or inadequate sheeting, or other causes. In no event shall pipe be installed when such conditions exist and the Contractor shall correct such conditions so as to provide proper bedding or foundations for the proposed installation at no additional cost to the City.

3.0.4. SHEETING AND SHORING

A. Contractor shall be solely responsible for the design, installation, and maintenance of shoring, sheeting, and bracing as necessary to support the sides of excavations and to prevent detrimental settlement and lateral movement of existing facilities, adjacent property, and completed Work. Design of shoring or other excavation support shall be provided by a Professional Engineer licensed in the State of Florida. Prior to trench excavation, a Trench Excavation Plan shall be prepared and shall address the following topics.

1. Details of shoring, sloping, or other provisions for worker protection from hazards of caving ground.

2. Design assumptions and calculations.

3. Methods and sequencing of installing excavation support.

4. Proposed locations of stockpiled excavated material.

5. Minimum lateral distance from the crest of slopes for vehicles and stockpiled excavated materials.

6. Anticipated difficulties and proposed resolutions

B. Sheeting and shoring shall be installed where necessary to control trench width, protect the workmen and the general public, and prevent damage to this or adjacent work, or structures.

C. For excavations five (5) feet deep or less, sheeting and shoring shall be installed where necessary to control trench width, protect the workmen and the general public, and prevent damage to this or adjacent work, or structures. When an excavation is in excess of five (5) feet deep, the Contractor shall comply with the provisions of Florida Statutes Chapter 553, Part III, "Trench Safety Act." Method(s) of compliance used shall protect the workmen and the general public, prevent damage to this or adjacent work, structures, utilities, pavements, sidewalks, curbs, gutters and similar improvements both public and private, and provide for proper maintenance of traffic. The trench width may vary to accomplish this and to comply with the provisions of Florida Statutes Chapter 553, Part III, "Trench Safety Act," but only from a point one (1) foot above the top of the pipe.

D. Trench widths, when measured at a point 12 inches above the top of the pipe, shall provide a 12-inch maximum clearance on each side, between the outside of the pipe barrel and the face of the excavation, or sheeting if used. Minimum trench width shall provide at least 6-inches clearance on each side, between the outside of the pipe barrel and the face of the excavation, or sheeting if used.

E. Where wood sheeting or certain designs of steel sheeting are used, the City may require that the sheeting be cut of at a level two (2) feet above the top of the installed pipe and that portion below that level be left in place. If ordered left in place, sheeting and shoring shall be paid for under the appropriate Quotation Item.

F. If interlocking steel sheeting is used, the City may permit its complete removal in lieu of the cut-off, providing removal can be accomplished without disturbing the bedding, pipe or pipe alignment. Any damage to the pipe bedding, pipe or pipe alignment shall be cause for rejection of the affected portion of the work.

G. In areas where trench widths are not limited by right-of-way and/or easement widths, property line restrictions, existing adjacent improvements, including pavements, structures and other utilities, and maintenance of traffic, the trench sides may be sloped to a suitable angle of repose of the excavated material, but only from a point one (1) foot above the crown of the pipe.

3.0.5. MOVABLE SHIELD (MULE)

A. A substantially and safely constructed moveable shield or box, as approved by the Engineer, may be used in place of sheeting except where it is specifically called out on the Plans or in the Specifications to install sheeting. When using a shield, the trench is opened immediately ahead of the shield as pipe laying proceeds inside the shield. All construction in conjunction with using such a shield must be as approved by the Engineer, including excavation, installation of pipe, and backfilling and compaction. When a moveable shield or box is used, the installed pipe shall be secured to prevent it from moving when the box is moved.

3.0.6. TRENCH OVERCUT

A. Trench overcut provisions herein shall be used only under direct authorization by the Engineer.

B. If, after excavating the trench to a depth of 2 feet 6 inches below the outside bottom elevation of the proposed pipe barrel, and the soil at that depth is still unsatisfactory as foundation material because it contains marl, muck, organic matter, or other unsuitable material, and the Engineer authorizes overcut, the pipe trench shall be excavated further in one (1) foot increments until either a suitable foundation material is found, or the Contractor is directed by the Engineer to stop trench overcut operation

and begin backfilling. In no case will trench overcut be more than 6 feet in depth, i.e., to a point 8 feet 6 inches below the bottom of the pipe.

C. Selected backfill, as defined in 2.0.1. "Materials" shall then be compacted in 6-inch layers up to the bottom of the proposed 6 inches of pipe bedding.

3.0.7. DEWATERING

A. It is a basic requirement of these Specifications that excavation shall be free from water before pipe or structures are installed. The Contractor shall refer to 3.0.12. "Alternate Method of Construction" below.

3.0.8. TRENCH RESTORATION

A. Trench restoration shall be per the applicable of Miami Dade County Standard Details, firstly, and FDOT if not specified.

B. Mill and resurface minimum 1 inch in accordance with the restoration limits in Part 1 or as directed by the City of Opa-Locka Public Works Department. Prior to placing pavement, City Public Works inspection is required. If milled section crosses a pedestrian path or temporary pedestrian path/detour, an asphalt apron must be provided at transitions with all adjacent surfaces within the pedestrian crossing.

C. Where cuts have been made through unpaved, stabilized rock roadways, driveways and parkways, surface restoration shall consist of 3 inches of compacted limerock overlaid by 3 inches of gravel or graded and washed rock with a maximum diameter of ½ inch, except as otherwise directed by the City or designee. The rock shall be installed over the entire width of the disturbed area and shall closely match the existing rock at each location. Several grades of rock may be required to attain this end, but it is not anticipated that more than one grade will have to be used at any one location.

3.0.9. TEMPORARY PAVEMENT

A. Temporary paving will be required along the entire route where the original paved surface is removed. Unless otherwise approved by the City or designee, temporary paving shall be placed the same day the trench is backfilled. The trench shall be backfilled up to a level 1 inch below the existing pavement surface and a temporary, cold mixed sand/asphalt pavement shall be constructed up to the level of the existing pavement surface. The liquid asphalt shall be Grade RC-70, conforming to the requirements of FDOT Specifications, Section 916-2. The sand shall conform to the requirements of FDOT Specifications, Section 902 for fine aggregate.

B. The cold mix is to be installed one block at a time, not crossing any intersection, or a maximum of 1,200 feet shall be completed before the Contractor may move forward

with This excavation Work. Backfill, compaction and temporary paving is to keep pace with the pipe installation. Written permission must be obtained from the City of OpaLocka Public Works Department to allow lengths greater than 1,200 feet. At the sole discretion of the City of Opa-Locka Public Works Department, the allowable limits in the permit may be reduced due to unforeseen right-of-way conditions.

C. The temporary pavement shall be maintained by the Contractor in a condition satisfactory to the City or designee until its removal. Removal shall include any surplus backfill material. Replacement of the temporary pavement with permanent pavement shall be made within 30 days. In replacing the temporary paving with permanent pavement, all Work shall be completed in sections compatible with specified traffic maintenance procedures.

D. The Contractor may elect to install a suitable temporary hot mix asphaltic pavement to be left in-place, in lieu of cold mix, when the hot mix asphalt is left in-place and installed over properly compacted limerock base course. This temporary pavement shall be incorporated into the specified permanent pavement restoration as part of paving restoration.

E. Sand seal on the limerock base course will not be permitted in lieu of temporary paving.

F. Unless otherwise approved by the City or designee, temporary paving shall be placed within twenty-four (24) hours following the completion of backfilling.

G. If temporary asphalt is utilized, it shall be removed prior to placement of final asphalt surface.

H. Temporary restoration requires field approval by City of Opa-Locka Public Works Department Field Inspector

3.0.10. STOCKPILED MATERIALS

A. Stockpile excavated material that is suitable for use as fill or backfill until material is needed.

B. Material suitable for backfill and not needed for backfill at the structure shall be stockpiled and later moved where needed.

C. Materials shall be stored and in such a manner that will not interfere unduly with City operations, traffic at the site, traffic on public roadways, or sidewalks and shall not be placed on private property. In congested areas, such materials that cannot be stored adjacent to the trench or used immediately as backfill shall be removed to other convenient places of storage acceptable to the City or designee at the Contractor's expense.

D. Post signs indicating proposed use of material stockpiled. Post signs that are readable from all directions of approach to each stockpile. Signs should be clearly worded and readable by equipment operators from their normal seated position.

E. Confine stockpiles to within easements, right-of-way, and approved Work areas. Do not obstruct road or streets.

F. Do not stockpile excavated material adjacent to trenches and other excavations unless excavation side-slopes and excavation support systems are designed, constructed, and maintained for stockpile loads.

G. Do not stockpile excavated materials near or over existing facilities, adjacent property, or completed Work if weight of stockpiled material could induce excessive settlement.

H. Do not place stockpiles within 50 feet of inlets, streams, wetlands, bodies of water, etc. unless permitted by the City or designee.

I. Stockpile side slopes shall be no steeper than 3 horizontal : 1 vertical unless approved by the City or designee. Top of stockpile shall have a minimum slope of no less than 5% to promote positive drainage.

J. Provide perimeter erosion control measures around stockpiles, located no closer than 5- feet from toe of slope, and stabilized stockpile surface with temporary seeding or other measures if stockpile will remain inactive for more than seven (7) days.

3.0.11. BACKFILL

A. Place and compact granular bedding and fill over pipelines and conduits. Density tests for determination of the specified compaction shall be made by a testing laboratory approved by the City or designee. Testing of compacted fill materials is required in accordance with these Specifications. If results of tests taken during the progress of the Work indicate compacted materials do not meet specified requirements, such defective Work will be removed, replaced, and re-tested as directed by the City or designee and at the Contractor's sole expense. Compacted fill is to be tested before proceeding with the placement of surface materials.

B. Backfilling of pipe trenches will not be allowed until the Work has been approved by the City or designee, pressure tested if required, and the City or designee indicates that backfilling may proceed. Any Work which is covered or concealed without the knowledge and consent of the City or designee shall be uncovered or exposed for inspection. Partial backfill may be made to help restrain the pipe during pressure testing, if previously authorized by the City or designee.

C. The Contractor shall backfill all trenches and other excavations made in the process of installing the culvert. The Contractor shall maintain the surface of the backfill free from major irregularities and potholes.

D. The Contractor shall maintain trenches free of debris, wood, rocks over 2 inches in diameter, and water.

E. Backfill shall be in accordance with the Culvert Pipe Manufacturer's Standard Details, firstly, and FDOT if not specified. Material shall be placed in maximum 6-inch layers. Each layer shall be thoroughly compacted to at least 98% of maximum density as defined by AASHTO Specifications T-180. The material in the ditch may be compacted by either hand tamper or a mechanized power tamper, provided the results meet the requirements and are approved by the City or designee. Care shall be taken to preserve the alignment and gradient of the installed pipes.

F. A testing laboratory will make periodic field tests to determine the density being obtained in each lift of backfill. Testing shall be performed at a minimum frequency of one test every 10 feet. When compacted backfill fails to meet the specified percentage of maximum density as shown by test results, it shall be reworked and recompacted, and then retested. The reworking, recompacting, and retesting of the backfill shall be repeated as many times as may be necessary to obtain compacted backfill with density meeting or exceeding the specified percentage as indicated by test results.

G. The Contractor shall exercise proper care to ensure no pipe will be broken or displaced by use of mechanical compacting equipment. Water shall be added as required to obtain optimum moisture content to facilitate compaction but ponding or inundation of backfill will not be permitted.

H. In the event sufficient suitable material is not available at any point to properly backfill the trench, the Contractor shall transport suitable material from points of the line where such material is available or shall otherwise furnish suitable material.

3.0.12. ALTERNATE METHOD OF CONSTRUCTION

A. A combination of conditions in the substrata, water table, method of disposal or regulatory agency requirements may be encountered during the course of the work which makes dewatering impossible, or possible only through the use of unusual methods, the cost of which is excessive. When such conditions are encountered, but only after all reasonable means to dewater the excavation have been employed without success, the Contractor may request permission to employ the following Alternate Method of Construction. The concurrence of the Engineer shall be obtained in writing and shall limit the use of the Alternate Method of Construction to such specific portions of the work as the Engineer shall determine.

B. The requirements set forth in other Sections of these Specifications shall establish the required standards of construction quality for this work. Use of the Alternate Method

of Construction described hereinafter shall in no way be construed as relieving the Contractor of his basic responsibility for satisfactory completion of the work.

C. Under no conditions will any additional or increased payments be made to the Contractor for excavation, backfill, sheeting or any cost incurred for work or materials, or any other costs incurred as a result of the use of this alternate method of construction. The unit prices established in the Quotation shall be full payment for the various items of work.

D. Subject to all of the requirements stated herein, including written approval of the Engineer, construction will be permitted in accordance with the following specifications. All requirements of these Specifications shall apply to this construction unless otherwise specifically modified herein.

1. Removal of Water: The installation of pipe and appurtenances under water will be permitted and the dry-trench requirements of Section 6.06 "Removal of Water" will be waived.

2. Excavation: Excavation shall be performed in accordance with 3.0.2. "Excavation."

3. Pipe Bedding:

   a. Pipe bedding shall be placed from 6 inches below the outside bottom of the proposed pipe barrel up to the level of the lower one-third of the pipe barrel for pressure mains.

   b. The bedding material shall be pea rock, or drainfield limerock. Limerock screenings, sand or other fine organic material shall not be used.

   c. The bedding material shall be tamped and graded to provide a proper bedding for the pipe and shall then be shaped to receive the pipe. Bedding shall be provided under the branch of all fittings to furnish adequate support and bearing under the fittings.

4. Backfill:

   b. After the pipe is installed, backfilling shall proceed in accordance with the provisions of 2.0.1. "Materials"

   c. Select backfill material shall be used to backfill around the pipe and to a level one (1) foot above the crown of the pipe.

d. Under no circumstances will material other than select backfill or specified pipe bedding material be considered satisfactory for this purpose.

E. If the Alternate Method of Construction is used, all backfill material, including specified pipe bedding material, shall be carefully lifted into the trench and not released to fall freely therein until the bucket or container is at or just above water level. Under no circumstances will backfill material be dumped or pushed into trenches containing water. Below existing water level, and to a point not more than 18 inches above the water level the backfill material shall be carefully placed in uniform layers, of equal depth on each side of the pipe. From a point not more than 18 inches above the water level, and below the pavement base or the surface of the ground, if out of paved areas, backfill material shall be placed and compacted for normal backfilling as provided in 2.0.1. "Materials" for compacted backfill.

END OF SECTION

02371 RIP-RAP

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. Construct riprap composed of sand-cement or rubble (consisting of broken stone or broken concrete) as shown in the Standard Plans and in the Plans.

PART 2 – PRODUCTS 2.0.1.

FILTER FABRIC

A. Use products listed on the FDOT's APL.

B. Schedule work so that covering the fabric with the specified material does not exceed the manufacturer's recommendations for exposure to ultraviolet light or five days, whichever is less. If the Engineer determines the exposure time was exceeded, the Contractor shall replace the fabric at no expense to the City.

C. Place the filter fabric (fabric) at locations as shown in the Plans, in accordance with the manufacturer's directions. Place the fabric on areas with a uniform slope that are reasonably smooth, free from mounds, windrows, and any debris or projections which might damage the fabric.

D. Loosely lay the material. Do not stretch the material. Replace or repair any fabric damaged or displaced before or during placement of overlying layers. Repair in accordance with the manufacturer's instructions.

E. The Contractor may sew the seams to reduce overlaps as specified in 985-3. Follow the manufacturer's instructions for all seams and overlaps.

2.0.2. PREPACKAGED SAND-CEMENT BAGS

A. Evenly proportioned sand and cement in the ratio of five cubic feet of sand to 94 pounds of cement. Material proportioned by mass shall use a sand density of 85 pounds per cubic foot.

B. Sealed package of 80 pounds of sand-cement in a bag.

C. Bag made of scrim-reinforced paper capable of holding the sand-cement without leakage.

D. Sand meets requirements of Section 902-3.3

E. Type I/II cement meets requirements of Section 921.

F. Prepackaged Sand-Cement Bags shall be one of the products listed on the FDOT's Approved Product List. Manufacturers seeking evaluation of their product shall submit an application in accordance with Section 6. Include with the submittal a product data sheet, safety data sheet, product label, and a self-certified statement the product meets the requirements of this Section.

2.0.3. RUBBLE

A. Rubble (Bank and Shore Protection):

1. Provide sound, hard, durable rubble, free of open or incipient cracks, soft seams, or other structural defects, consisting of broken stone with a bulk specific gravity of at least 2.20. Ensure that stones are rough and angular.

2. For this application, use broken stone meeting the following gradation and thickness requirements:

Weight Maximum Pounds	Weight 50% Pounds	Weight Minimum Pounds	Minimum Blanket Thickness in Feet

670	290	60	2.5
Ensure that at least 97% of the material by weight is smaller than Weight Maximum pounds]. Ensure that at least 50% of the material by weight is greater than Weight 50% pounds]. Ensure that at least 85% of the material by weight is greater than Weight Minimum pounds.			

B. Rubble (Ditch Lining):

1. Use sound, hard, durable rubble, free of open or incipient cracks, soft seams, or other structural defects, consisting of broken stone or broken concrete with a bulk specific gravity of at least 1.90. Ensure that stones or broken concrete are rough and angular.

2. Use broken stone or broken concrete meeting the following gradation and thickness requirements:

Weight Maximum Pounds	Weight 50% Pounds	Weight Minimum Pounds	Minimum Blanket Thickness in Feet
75	30	4	1.5
Ensure that at least 97% of the material by weight is smaller than Weight Maximum pounds]. Ensure that at least 50% of the material by weight is greater than Weight 50% pounds]. Ensure that at least 90% of the material by weight is greater than Weight Minimum pounds.			

C. Physical Requirements of Broken Stone and Broken Concrete:

1. Use broken stone and broken concrete meeting the following physical requirements:

Absorption (FM 1-T 85)	Maximum 5%
Los Angeles Abrasion (ASTM C535)	Maximum loss 45%*
Soundness (Sodium Sulphate) (AASHTO T 104)	Maximum loss 12%** (after five cycles)
Flat and elongated pieces	Materials with least dimension less than one third of greatest dimension not exceeding 10% by weight.
Dirt and Fines	Materials less than 1/2 inch in maximum dimension accumulated from interledge layers, blasting or handling operations not exceeding 5% by weight.

Drop Test***(EM 1110-2-2302)	No new cracks developed, or no existing crack widened additional 0.1 inch, or final largest dimension greater than or equal to 90% original largest dimension of dropped piece.

* Ensure that granite does not have a loss greater than 55% and that broken concrete does not have a loss greater than 45%.

** The Engineer may accept rubble exceeding the soundness loss limitation if performance history shows that the material will be acceptable for the intended use. The Engineer will waive the soundness specification for rubble riprap (broken stone) when project documents indicate it will be placed in or adjacent to water or soil with a sulfate content less than 150 parts per million and a pH greater than 5.0. Soundness is not required for broken concrete.

*** The Engineer will waive the Drop Test unless required to ensure structural integrity. Provide all equipment, labor and testing at no expense to the City. EM refers to the US Army Corps of Engineer's Specification Engineering Method.

PART 3 – EXECUTION 3.0.1.

GEOTEXTILE FABRIC

A. Overlap adjacent strips of fabric a minimum of 24 inches, and anchor them with securing pins (as recommended by the manufacturer) inserted through both strips of fabric along a line through the midpoint of the overlap and to the extent necessary to prevent displacement of the fabric.

B. Place the fabric so that the upstream (upper) strip of fabric overlaps the downstream (lower) strip.

C. Stagger vertical laps a minimum of 5 feet. Use full rolls of fabric whenever possible in order to reduce the number of vertical laps.

D. Do not drop bedding stone or riprap from heights greater than 3 feet onto the fabric.

3.0.2 SAND-CEMENT BAGS

A. Place the bags with their ends all in the same direction. Lay the bags with broken joints, in a regular pattern. Ram or pack the bags against each other so as to form a close and molded contact. Remove and replace bags ripped or torn in placing with sound, unbroken bags. Then, thoroughly saturate all bags with water.
B. Immediately after watering, fill all openings between bags with dry grout composed of onepart Portland cement and five parts sand.
C. Use sand-cement bags for the toe walls if required. Fill the entire trench excavated for the toe walls with sand-cement bags.

3.0.3. RUBBLE

A. Dump rubble in place forming a compact layer conforming to the neat lines and thickness specified in the Plans. Ensure that rubble does not segregate so that smaller pieces evenly fill the voids between the larger pieces.

02510 ASPHALTIC CONCRETE PAVEMENT

PART 1 – GENERAL

1.0.2. SCOPE OF WORK

A. Construct asphaltic concrete pavement in accordance with the lines, grades and typical sections as indicated on the drawings, specified herein and as required for a complete installation.

B. Replace and / or repair all existing asphaltic concrete pavement areas impacted by Contractor operations, including trenching for new utilities, as well as damage that may result from Contractor operations during the progress of the work.

C. Temporary asphalt / trench repairs shall be installed within 1 week of excavation and backfill work on plant roadways impacted by construction.

1.0.3. SUBMITTALS

A. The Contractor shall submit its proposed formulae for the asphaltic concrete paving for review in accordance with the Section 01300 "Submittals".

1.0.4. QUALITY CONTROL

A. Work shall be performed in accordance with Contract Documents, Drawings, and/or City of Opa-Locka Public Works Manual Specifications and Standard Details, in a neat and accurate manner. It is the intent of the City to obtain a complete and working installation according to these Specifications, and any items of labor, equipment, or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the project plans or stated herein.

B. Asphalt Acceptance Standards: The following minimum defects identified by the City or designee must be covered by warranty (but not limited to):

1. Sunken pavement patches greater than or equal to one-quarter (¼) inch (measured by a twelve (12) foot straight edge).

2. Surface raveling or oxidation due to deficiencies with the asphalt material.

3. Poor workmanship.

4. Inadequate compaction per Standards and Specifications.

1.0.5. RESTORATION LIMITS

A. At a minimum, sidewalk, curb, gutter, and roadway restoration shall be in accordance with the requirements of the agencies having jurisdiction including but not limited to City of Opa-Locka, Miami-Dade County, and FDOT.

B. The Contractor is responsible to restore the full lane width of two-lane roads when a trench is longitudinally cut within a lane. If the cut is in between two lanes, the Contractor is responsible to restore both lanes. If the cut impacts multiple lanes, all lanes impacted shall be restored. When a perpendicular cut is made crossing the pavement, a minimum of 25 feet width on each side of the cut, or to the intersection, must be restored by milling and resurfacing. For new developments, the Contractor shall restore the pavement from property line to property line.

C. At a minimum, the width of all asphalt repairs within the Work area shall extend at least 12 inches beyond the limit of the damage. Where the line for repaving for trenches extends 12-inches into the edge of the existing paving, repaving shall be to this edge only. Damage by the Contractor to the pavement beyond 12-inches into the edge of the existing paving will require the full lane be repaved.

D. The edge of the pavement shall be cut to a true edge with a saw or other acceptable method so as to provide a clean edge to abut the repair. The line of the repair shall be uniform with no irregularities. Repair of damage by the Contractor beyond the Work area shall be approved by the City or designee prior to commencing the Work.

E. Any base course or surface course beyond the restoration limits, damaged as a result of the Contractor's operation, shall be restored in accordance with the applicable requirements of these Specifications, to the satisfaction of the City or designee.

F. Permanent pavement repair shall be with edges straight and parallel and patches rectangular in plan. Replace any paving, beyond the limits shown in the details and as called for in the Specifications, as required. Where trenches are located out of the

existing pavement and damage occurs to the pavement, that pavement shall also be replaced by the Contractor.

G. Five Year Moratorium Directive from City: If the road is under Moratorium, the Contractor is to restore the entire roadway width.

H. Final asphalt application requires milling and resurfacing full travel lanes or as directed by City of Opa-Locka Public Works Department Field Inspector.

PART 2 – PRODUCTS 2.0.12.

MATERIALS

A. Subbase: Limit gradation of the material within the limits of the area being stabilized to 97% passing 3½-inch sieve. Soil shall be clean, non-deleterious material. Subbase material supporting the roadway and shoulders shall have a minimum LBR of 40. The stabilized subbase shall be 12 inches, placed in maximum compacted lift thickness of 8- inches, and compacted to 98% of maximum dry density as per AASHTO T-180.

B. Limerock Base Course

1. The material used in limerock base courses shall be material classified as either Miami Oolite Formation or Ocala Formation at the Contractor's option having a minimum of 70% calcium carbonate or magnesium carbonate; however, only one formation may be used on any contract.

2. Limerock base course shall have a minimum LBR of 100. Limerock base shall be twice the thickness of the existing adjacent base and shall be minimum of 12inches thick and a maximum of 18-inch thick, placed in 6-inch lifts. Base material shall be compacted to a density of not less than 98% of maximum dry density as per AASHTO T-180 under all paved areas.

3. The limerock material shall contain no more than 0.5% of organic material or objectionable matter and shall show no significant tendency to air slake or undergo any chemical under exposure to weather.

4. The maximum percentage of water sensitive clay material shall be three percent (3%).

5. At least 97% (by weight) of the material shall pass a 3½-inch sieve, and the material shall be graded uniformly down to dust. The fine material shall consist entirely of dust of fracture. All crushing or breaking up which might be necessary

in order to meet such size requirements shall be done before the material is placed on the road.

6. The limerock material shall be uniform in quality and shall not contain cherty or other extremely hard pieces, lumps, balls or pockets of sand or clay size material in sufficient quantity as to be detrimental to prevent proper bonding, finishing, or strength of the limerock base.

7. Limerock material shall be non-plastic, and the liquid limit shall not exceed 35.

C. Asphaltic Concrete

1. Bituminous Material: Asphalt cement, Viscosity Grade AC-20 or AC-30, shall conform with the requirements of FDOT Specifications, Section 916-1.

2. Coarse Aggregate: Coarse aggregate, stone or slag shall conform to the requirements of the FDOT Specifications, Section 901.

3. Fine aggregate: Fine aggregate shall conform to the requirements of FDOT Specifications, Section 902.3.

4. Mineral Filler: Mineral filler shall conform to the requirements of FDOT Specifications, Section 917-1 and 917-2.

5. Prime Coat: Unless otherwise indicated, the material used for the prime coat shall be cutback asphalt, Grade RC-70 or RC-250, and shall conform with the requirements specified in AASHTO Destination M 81. Unless otherwise indicated, the use of wither RC-70 or RC-250 shall be at the Contractor's option.

6. Tack Coat: The material used for the tack coat shall be Emulsified Asphalt, Grade RS-2 and shall conform with the requirements specified in AASHTO Designation M 140.

7. Where Type S Asphalt Concrete is specified in the Contract Documents, if approved by the City or designee, the equivalent fine Type SP Asphalt Concrete mixture (Traffic Level C) meeting the requirements of FDOT Specifications Section 334 may be selected as an alternate at no additional cost to the City or Owner. The equivalent mixes are as follows:

Type S-I.....Type SP-12.5 Type
S-II.....Type SP-19.0 Type
S-III.....Type SP-9.5

2.0.13. TEXTURED PAVEMENT

A. "StreetBond SP150E Coating Material" refers to a high-performance premium coating material consisting of epoxy modified acrylic polymers blended with sand and aggregate, and specially formulated by GAF, Inc. (Tel. 1-800-766-3411), for application on asphalt surfaces to provide a durable, long lasting color and texture to the asphalt surface.

B. "StreetBond Colorant" is a highly concentrated, high quality, UV stable pigment blend designated to be added to StreetBond SP150E coating system to provide color to the coating. The colors to be used shall be shown on the Drawings. The same StreetBond Colorant shall be used in each SP150E coating layer to the asphalt surface. One pint of colorant shall be used with one pail of StreetBond coating material.

C. Use only patterned/textures pavement products listed on the Qualified Products List (QPL). Meet manufacturer's Specifications for all pattern/texture templates, coating, and coloring material. Use only material that is delivered to the job site in sealed containers bearing the manufacture's original labels. Material coating used to achieve the pattern/texture and/or color shall produce an adherent, weather resistant, skid resistant surface capable of resisting deformation to traffic. Paint and thermoplastic material must meet the requirements of this Specifications and FDOT Specifications Section 971, except that the requirements for Color and Retroreflectivity do not apply.

D. Manufacturers seeking approval for inclusion on the QPL must submit application and certifications in accordance with FDOT Specifications Section 6 along with the following documentation:

1. Manufacturer's Specifications and procedures for materials and installation.

2. Manufacturer's certification with supporting test data and results that the patterned/textured pavement installed in accordance with the manufacturer's Specifications and procedures has been tested in accordance with the ASTM E274, Skid Resistance of Paved Surfaces using a standard ribbed full-scale tire at a speed of 40 mph (FN40R) and has a minimum FN40R value of 35.

PART 3 – EXECUTION

3.0.1. INSTALLATION OF ASPHALT

A. General

1. Pavement markings removed or obliterated by the Contractor's operations shall be promptly replaced, in kind, to the satisfaction of the City of Opa-Locka Department of Public Works, Traffic Engineering Division or designee.

2. At least three density determinations shall be made on each day's final compaction operations on each course, and the density determinations shall be made at more frequent intervals if deemed necessary by the City or designee.

B. Subbase: Roadway subbase shall be stabilized to the minimum depth shown on the Drawings to a LBR not less than 40. Stabilizing shall be type C as defined in Section 160 of the FDOT specifications. Stabilization may require the addition and thorough mixing in of crushed limerock, coarse limerock screenings, or any other stabilizing material acceptable to the City or designee. The stabilizing material shall be applied in such quantity that, after mixing and blending, the subbase will have a LBR not less than 40. Stabilizing material shall be mixed or blended in the subbase material by plowing, scarifying, disking, harrowing, blading, and mixing with rotary tillers until the mixed materials are of uniform bearing ratio throughout the width and depth of the layer being processed. The minimum acceptable density at any location will be 98% of maximum dry density as determined by AASHTO T-180.

C. Limerock Base: The limerock base shall be constructed in accordance with Section 200 of the FDOT Specifications, to the thickness and width indicated on the Drawings. Pavement base shall be constructed in maximum 6-inch lifts.

D. After spreading of the base material is completed, the entire surface shall be scarified and shaped so as to produce the exact grade and cross section after compaction. For double course base, this scarifying shall extend a depth sufficient to penetrate slightly the surface of the first course. The maximum depth of each lift shall be 6-inches.

E. When the material does not have the proper moisture content to ensure the required density, wetting or drying shall be required. If the material is deficient in moisture, water will be added and uniformly mixed in by disking the base course to its full depth. If the material contains an excess of moisture, it shall be allowed to dry before being compacted. Wetting and drying operations shall involve manipulation of the entire width and depth of the base as a unit. As soon as proper conditions of moisture are attained, the material shall be compacted to an average density not less than 98% of maximum dry density as determined by AASHTO T-180. Where the base is being constructed in more than one course, the density shall be obtained in each lift of the base.

F. During final compacting operations, if blading of any areas is necessary to obtain the true grade and cross section, the compacting operations for such areas shall be completed prior to making the density determination on the finished base.

G. Unless otherwise directed by the City or designee, the surface shall be "hard-planed" with a blade grader immediately prior to the application of the prime coat to remove the thin glaze or cemented surface and to allow free penetration of the prime material. The materials planed from the base shall be removed from the base area.

H. If cracks or checks appear in the base, either before or after priming, which in the opinion of the City or designee, would impair the structural efficiency of the base course, the Contractor shall remove such cracks or checks by re-clarifying, reshaping, adding base material where necessary and re-compacting, at no additional cost to the City or Owner.

I. Mixing Base and Subbase: If at any time the subbase material shall become mixed with the base course material, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the subbase and replace the materials removed with clean base material, which shall be shaped and compacted as specified above.

J. Prime Coat: The prime coat shall be applied at a rate of 0.15 gallons per square yard and the work performed in accordance with Section 300 of the FDOT Specifications.

K. Asphaltic Concrete: The spreading, compacting, and jointing the wearing surface shall be in accordance with Sections 330 and 333 of the FDOT Specifications to the thickness indicated on the Drawings.

L. Tack Coat: Apply tack coat at a rate between 0.02 and 0.10 gallons per square yard and perform the Work in accordance with Section 300 of the FDOT Specifications.

M. Connections with Existing Facilities Where the bituminous pavement is to be connected with an existing roadway surface or other facility, the Contractor shall modify the existing roadway profile in such a manner as to produce a smooth riding connection to the existing facility. Where it is necessary to remove existing asphalt surfaces to provide proper meet lines and riding surfaces, the Contractor shall saw cut the existing surface so that there will be sufficient depth to provide a minimum of 1inch of asphalt concrete, and the waste material shall be disposed of to the satisfaction of the City or designee. Prior to placing the asphalt concrete, these areas shall be tacked. Meet lines shall be straight and the edges vertical. The edges of meet line cuts shall be painted with liquid asphalt or emulsified asphalt prior to placing asphalt concrete. After placing the asphalt concrete, the meet line shall be sealed by painting with a liquid asphalt or emulsified asphalt and immediately covered with clean, dry sand.

N. Surface Tolerance

1. Tests for conformity with the specified grade shall be made immediately after initial compression. Any variation shall be immediately corrected by the removal or addition of materials and by continuous rolling. The completed surface of the pavement shall be of uniform texture, smooth, uniform as to grade, and free from defects of all kinds.

2. The completed surface shall not vary more than 1/8 inch from the lower edge of a 12-foot straightedge placed on the surface along the centerline or across the trench.

3. After completion of the final rolling, the smoothness and grade of the surface shall again be tested by the Contractor.

4. When deviations in excess of the above tolerances are found, the pavement surface shall be corrected as stated in Section 330-12.4 of the FDOT Specifications.

5. All areas in which the surface of the completed pavement deviates more than twice the allowable tolerances described above shall be removed and replaced to the satisfaction of the City or designee.

O. Weather Conditions: Asphalt shall not be applied to wet material. Asphalt shall not be applied during rainfall or any imminent storms that might adversely affect the construction. The Engineer will determine when surfaces and materials are dry enough to proceed with construction. Asphalt concrete shall not be placed during heavy rainfall or when the surface upon which it is to be placed is wet.

P. Protection of Structures and Adjustment of Appurtenances

1. Provide whatever protective coverings may be necessary to protect the exposed portions of bridges, culverts, curbs, gutters, posts, guard fences, road signs, and any other structures from splashing oil and asphalt from the paving operations. Remove any oil, asphalt, dirt, or any other undesirable matter that may come upon these structures by reason of the paving operations.

2. Where water valve boxes, manholes, catch basins, or other underground utility appurtenances are within the area to be surfaced, the Contractor shall adjust the covers of these improvements to conform to the proposed surface elevations.

3. In this effort, the Contractor shall be responsible for ensuring that appurtenances are brought to proper grade to conform to the finished surface elevations and any delays experienced from such obstructions will be considered as incidental to the paving operation. No additional payment will be made. Protect all covers during asphalt application.

Q. Pavement Warranty: Settlement of replaced pavement over trenches within the warranty period shall be considered the result of improper or inadequate compaction of the subbase or base materials. The Contractor shall promptly repair all pavement deficiencies noted during the warranty period at the Contractor's sole expense.

R. The pressure distributor used for placing the tack or prime coat shall be equipped with pneumatic tires having sufficient width of rubber in contact with the road surface to avoid breaking the bond of or forming a rut in the surface. The distance between the centers of openings of the outside nozzles of the spray bar shall be equal to the width of the application required, within an allowable variation of 2-inches. The outside nozzle at each end of the spray bar shall have an area of opening of not less than 25 percent, nor more than 75 percent in excess of the other nozzles which shall have uniform openings. When the application covers less than the full width, the normal opening of the end nozzle at the conjunction line may remain the same as those of the interior nozzles.

S. Application Temperatures: For asphalt cement Viscosity Grade AC-5, the application temperature shall be between 300 degree and 350 degree F; for emulsified asphalt, between 100 degrees and 170 degrees F; and for cut-back asphalt, between 175 degree and 275 degree F.310-9.3 Uniformity of Distribution: Special precautions shall be observed to assure that an even and uniform distribution of bituminous material will be obtained, and the distributor shall be so adjusted and operated as to maintain uniform, even distribution of the type of material being applied. Excessive deposits of bituminous material upon the road surface caused by stopping or starting the distributor, by leakage or otherwise, shall be immediately removed.

T. When the prime or tack coat is applied adjacent to curb and gutter, or any other concrete or special pavement surface (except where they are to be covered with a bituminous wearing course) such concrete surfaces shall be protected by heavy paper or other protective material while the prime or tack coat is being applied. Any bituminous material deposited on such concrete surfaces shall be removed immediately.

U. No bituminous material shall be applied when the air temperature is less than 50 degree in the shade, or when the weather conditions or the condition of the existing surface is unsuitable. In no case shall bituminous material be applied while rain is falling or when there is water on the surface to be covered.

V. After the base has been finished, the full width of surface shall be swept with a power broom supplemented with hand brooms and mechanical blowers prior to the application of the prime coat. Care shall be taken to remove all loose dust, dirt and objectionable matter. If deemed necessary, the base shall be lightly sprinkled with water immediately in advance of the prime coat. The prim coat shall be applied to the full width of the base.

W. The temperature of the prime material shall be such as to insure uniform distribution. The material shall be applied with a pressure distributor as specified above. The amount to be applied shall be sufficient to coat the surface thoroughly and uniformly without any excess to form pools or to flow off the base. For lime rock base, the rate of application shall not be less than 0.10 gallons per square yard.

X. The roadway may be opened for use following the application of the prime material, and a light uniform application of clean sand shall be applied and rolled. The sand shall be non-plastic, shall be free from silt rock particles and shall not contain any sticks, vegetation, grass, roots or organic matter. After the sand covering has been applied, the surface will be opened to traffic.

Y. Asphalt Densities: The in place density of each course of asphalt mix construction, with the exceptions of patching courses, leveling and intermediate course less than one-inch thick or a specified spread rate less than 100 pounds per square yard, overbuild courses where the minimum thickness is less than one-inch, and opengraded friction course, shall be determined by the use of the Nuclear Density Backscatter Methods as specified by FM 1-T238 (method B). The required density of a completed course shall be at least 98 percent of the average density of the control strip.

3.0.2. INSTALLATION OF TEXTURED PAVEMENT

A. Applications of textured pavement include the following. Imprinting patterns into existing or new pavement and covering with a surface coating(s) of paint or thermoplastic. Imprinting patterns into existing or new pavement and inlaying the imprint with performed thermoplastic material. Colored, preprinted, preformed texturized thermoplastic material that is applied over existing pavement. Colored thermoplastic material that can be imprinted and texturized during or after application to existing pavement.

B. Patterns are defined as visible surface markings. Imprinted textures are defined as palpable surface markings.

C. Use the location, pattern/texture type (brick, stone, etc.) and coating color as specified in the Plans. Joint openings shall not exceed ½ inch in width.

D. Apply a patterned and/or textured treatment to asphalt or concrete in accordance with manufacturer's recommendations.

E. For application requiring removal and replacement of existing pavement, meet the requirements of FDOT Specifications Section 350 for cement concrete pavement; the requirements of Section 334 for Superpave asphalt or Section 337 for FC 9.5 and FC 12.5 asphalt.

F. Protect treated surfaces from traffic and environmental effect until the area is completely coated/imprinted and any coating have dried or cured according to the manufacturer's instructions. Complete all utility, traffic loop detector, and other items requiring a cut and installation under the finished surface, prior to pattern installation.

For asphalt roadways, apply patterned/textured pavement a minimum of 14 days after placement of the adjacent pavement. Upon completion of the installation, the City or designee will check the area at random location(s) for geometric accuracy, as specified in the plans. If any of the chosen areas have an imprint width and depth that is less than the manufacturer's specifications, correct the entire textured area, at no additional cost to the City. Supply the specified pattern and color sample for the Engineer's use to visually determine that the material matches the color specified in the plans. For any continuous or abutting areas, i.e., all treated areas of an intersection, color material must be from the same lot/batch. Provide certification that the textured pavement was installed in accordance with the manufacturer's requirements.

G. Textured pavement on crosswalks and travel lanes are to be tested for skid resistance in accordance with ASTM E303.

3.0.3. TEMPORARY TRENCH REPAIR OR STABILIZATION

A. Following trenching and backfill within active plant roadways, but prior to final asphalt replacement at substantial completion, the Contractor shall install temporary trench repair, consisting of compacted base course and temporary asphalt.

B. Temporary trench repair shall include the preparation of the subgrade, the placing and compacting of the lime rock base, the priming of the base, the placing and maintaining of the surface treatment, all as specified herein.

C. The width of trench repairs shall extend at least 12 inches each side beyond the limits of the asphalt impacted by excavation. The edge of the pavement to be left in place shall be cut to a true edge with a saw or other approved method so as to provide a clean edge to abut the repair. The line of the repair shall be reasonably uniform with no unnecessary irregularities.

3.0.4. PAVEMENT MARKINGS

A. All existing markings (i.e., lanes, edge of pavement, parking stalls, etc.) impacted by the Contractor during construction shall be replaced with new painted items in accordance with the requirements of Section 971 of the FDOT Specifications.

3.0.5. CONNECTIONS WITH EXISTING FACILITIES

A. Where the bituminous pavement is to be connected with an existing roadway surface or other facility, the Contractor shall modify the existing roadway profile in such a manner as to produce a smooth riding connection to the existing facility.

B. Where it is necessary to remove existing asphalt surfaces to provide proper meet lines and riding surfaces, the Contractor shall saw cut the existing surface so that there will be sufficient depth to provide a minimum of 1-inch of asphalt concrete, and the waste

material shall be disposed of to the satisfaction of the Engineer. Prior to placing the asphalt concrete, these areas shall be tacked. Meet lines shall be straight and the edges vertical. The edges of meet line cuts shall be painted with liquid asphalt or emulsified asphalt prior to placing asphalt concrete. After placing the asphalt concrete, the meet line shall be sealed by painting with a liquid asphalt or emulsified asphalt and immediately covered with clean, dry sand.

3.0.6. SURFACE TOLERANCE

A. Tests for conformity with the specified grade shall be made immediately after initial compression. Any variation shall be immediately corrected by the removal or addition of materials and by continuous rolling.

B. The completed surface of the pavement shall be of uniform texture, smooth, uniform as to grade, and free from defects of all kinds. The completed surface shall not vary more than 1/8 inch from the lower edge of a 12-foot straightedge placed on the surface along the centerline or across the trench.

C. After completion of the final rolling, the smoothness and grade of the surface shall again be tested by the Contractor.

D. When deviations in excess of the above tolerances are found, the pavement surface shall be corrected as stated in Section 330-12.4 of the FDOT Specifications.

E. All areas in which the surface of the completed pavement deviates more than twice the allowable tolerances described above shall be removed and replaced to the satisfaction of the Engineer.

3.0.7. WEATHER CONDITIONS

A. Asphalt shall not be applied to wet material. Asphalt shall not be applied during rainfall or any imminent storms that might adversely affect the construction. The Engineer will determine when surfaces and materials are dry enough to proceed with construction. Asphalt concrete shall not be placed during heavy rainfall or when the surface upon which it is to be placed is wet.

3.0.8. PROTECTION OF STRUCTURES AND ADJUSTMENT OF APPURTENANCES

A. Provide whatever protective coverings may be necessary to protect the exposed portions of bridges, culverts, curbs, gutters, posts, guard fences, road signs, and any other structures from splashing oil and asphalt from the paving operations. Remove any oil, asphalt, dirt, or any other undesirable matter that may come upon these structures by reason of the paving operations.

B. Where water valve boxes, catch basins, or other underground utility appurtenances are within the area to be surfaced, the Contractor shall adjust the covers of these improvements to conform to the proposed surface elevations.

C. In this effort, the Contractor shall be responsible for ensuring that appurtenances are brought to proper grade to conform to the finished surface elevations and any delays experienced from such obstructions will be considered as incidental to the paving operation. No additional payment will be made. Protect all covers during asphalt application.

3.0.9. PAVEMENT WARRANTY

A. Settlement of replaced pavement over trenches within the warranty period shall be considered the result of improper or inadequate compaction of the sub-base or base materials. The Contractor shall promptly repair all pavement deficiencies noted during the warranty period at the Contractor's sole expense.

3.0.10. INSTALLATION OF TEXTURED PAVEMENT

H. Applications of textured pavement include the following.

22. Imprinting patterns into existing or new pavement and covering with a surface coating(s) of paint or thermoplastic.

23. Imprinting patterns into existing or new pavement and inlaying the imprint with performed thermoplastic material.

24. Colored, preprinted, preformed texturized thermoplastic material that is applied over existing pavement.

25. Colored thermoplastic material that can be imprinted and texturized during or after application to existing pavement.

I. Patterns are defined as visible surface markings. Imprinted textures are defined as palpable surface markings.

J. Use the location, pattern/texture type (brick, stone, etc.) and coating color as specified in the Plans. Joint openings shall not exceed ½ inch in width.

K. Apply a patterned and/or textured treatment to asphalt or concrete in accordance with manufacturer's recommendations.

L. For application requiring removal and replacement of existing pavement, meet the requirements of FDOT Specifications Section 350 for cement concrete pavement; the

requirements of Section 334 for Superpave asphalt or Section 337 for FC 9.5 and FC 12.5 asphalt.

M. Protect treated surfaces from traffic and environmental effect until the area is completely coated/imprinted and any coating have dried or cured according to the manufacturer's instructions. Complete all utility, traffic loop detector, and other items requiring a cut and installation under the finished surface, prior to pattern installation. For asphalt roadways, apply patterned/textured pavement a minimum of 14 days after placement of the adjacent pavement. Upon completion of the installation, the City or designee will check the area at random location(s) for geometric accuracy, as specified in the plans. If any of the chosen areas have an imprint width and depth that is less than the manufacturer's specifications, correct the entire textured area, at no additional cost to the City. Supply the specified pattern and color sample for the Engineer's use to visually determine that the material matches the color specified in the plans. For any continuous or abutting areas, i.e., all treated areas of an intersection, color material must be from the same lot/batch. Provide certification that the textured pavement was installed in accordance with the manufacturer's requirements.

N. Textured pavement on crosswalks and travel lanes are to be tested for skid resistance in accordance with ASTM E303.

END OF SECTION

02526 CONCRETE PAVEMENT, CURB AND WALKWAYS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. Concrete pavement, curbs and sidewalk shall be constructed to the lines and grades and dimensions required for a complete installation as shown on the drawings and specified herein.

1.0.2. SUBMITTALS

A. Shop drawings for reinforcing, joint material and mix designs shall be submitted for review in accordance with the Section 01300 "Submittals".

PART 2 – PRODUCTS

2.0.2. MATERIALS

A. All roadways are to be de-mucked or stabilized with geotextile material in accordance with the geotechnical report and City requirements.

B. Laboratory analysis shall be complete, and the material approved by the Engineer prior to placement.

B. Geotextile material: Woven fabric to be structurally prepared and placed as per manufactures written specification.

C. Sub-grade: limited to maximum six (6") diameter clean non deleterious material Sub grade to be proof-rolled. Subgrade material supporting the roadway and shoulders shall have a minimum lime rock bearing (LBR) of 40. The stabilized subgrade shall be twelve (12) inches compacted to 98% of maximum dry density as per AASHTO-T-180.

D. Lime rock: The material used in lime rock base courses shall be material classified as either Miami Oolite Formation or Ocala Formation at the Contractor's option having a minimum percentage of calcium or magnesium of 60; however, only one formation may be used on any contract. Lime rock base course shall have a minimum bearing ratio (LBR) of 100 and shall be minimum of eight (8) inches thick. Base material shall be compacted to a density of not less than 98% of maximum dry density as determined by AASHTO-T180 under all paved areas.

1. Composition:

    a. The lime rock material shall contain not more that 0.5 percent of organic material or objectionable matter and shall show no significant tendency to air slake or undergo any chemical under exposure to weather.

    b. Lime rock material shall contain not less than 70 percent of carbonates of calcium and magnesium. The maximum percentage of water sensitive clay material shall be three (3).

2. Gradation: At least 97 percent (by weight) of the material shall pass a 3 1/2-inch sieve and the material shall be graded uniformly down to dust. The fine material shall consist entirely of dust of fracture. All crushing or breaking up which might be necessary in order to meet such size requirements shall be done before the material is placed on the road.

3. Quality:

a. The lime rock material shall be uniform in quality and shall not contain cherty or other extremely hard pieces or lumps, balls or pockets of sand or clay size material in sufficient as to be detrimental to prevent proper bonding, finishing or strength of the lime rock base. Lime rock material shall be nonplastic, and the liquid limit shall not exceed 35.

b. Lime rock material shall have an average LBR value of not less than 100.

E. Sidewalks:

1. The replacement of gray concrete sidewalks throughout the City shall be with the Miami-Dade County's sidewalk color standard, unless otherwise specified by any applicable City land use board, in accordance with Resolution 2019-30800.

2. The Public Works Director has the authority to determine on a street-by-street basis if replacement of sidewalks to Miami-Dade County's sidewalk color standard is appropriate.

2.0.1. CONCRETE

A. Concrete shall be composed of cement, fine aggregate, coarse aggregate, and water, so proportioned and mixed as to produce a plastic workable mixture in accordance with all requirements under this section suitable to the specific conditions of placement.

B. Cement:

1. The cement shall be a standard brand of Portland cement manufactured within the continental limits of the United States. It shall meet the requirements of ASTM C150 "Portland Cement" and shall be Type II.

2. Only one brand of cement shall be used in any individual structure unless approved by the Engineer. Cement which has become damaged, partially set, and lumpy or caked shall not be used the entire contents of the sack or container which contains such cement will be rejected. No salvage or reclaimed cement shall be used.

3. Different types of cement shall not be mixed nor shall they be used alternately except when authorized in writing by the City or their designee. Different brands of cement or the same brand from different mills may be used alternately. A resubmittal will be required if different cements are proposed during the Project.
4. Slump shall not exceed six inches (6").

5. Concrete for underground work shall be acid resistant cement and shall maintain a minimum compressive strength of 4000 psi in 28 days.

6. The total alkalies in the cement (calculated as the percentage of NA2O plus 0.658 times the percentage of K2O) shall not exceed 0.40%.

7. The proposed Portland Cement shall not contain more than 8% tricalcium aluminate and more than 12% tetracalcium aluminoferrite.

8. Cement shall be stored in a suitable weather-tight building so as to prevent deterioration or contamination. Cement which has become caked, partially hydrated, or otherwise damaged will be rejected. The Contractor shall provide suitable means for storing and protecting the cement against dampness. Bags of cement which for any reason may become partially set, or which contain lumps of caked cement, shall be rejected. In no instance shall any portion of a bag of damaged cement, or a bag containing lumps of caked cement, be used. Cement salvaged from discarded or used sacks shall not be used. Different brands of cement, even if tested and approved, shall not be mixed during use, nor used alternately in any section of the work without written permission of the Engineer.

C. Aggregates:

1. Fine Aggregate (Sand) in the various concrete mixes shall consist of natural or manufactured siliceous sand, clean and free from deleterious substances, and graded within the limits of ASTM C33.

2. Coarse Aggregate: Coarse aggregate shall consist of gravel, broken stone or local limerock. Coarse aggregate shall be size #57 or #67 as graded within the limits given in ASTM C33 unless otherwise specified. It shall be free from adherent coatings.

3. Aggregates shall be tested for gradation by sieve analysis tests in conformance with ASTM C136.

4. When tested for soundness in accordance with ASTM C88, the loss resulting after five cycles shall not exceed 10 percent for fine or coarse aggregate when using either magnesium sulfate or sodium sulfate.

5. When tested in accordance with "Potential Reactivity of Aggregates (Chemical Method)" (ASTM C289), the ratio of silica released to reduction in alkalinity shall not exceed 1.0. F. When tested in accordance with "Organic Impurities in Sands for Concrete" (ASTM C40), the fine aggregate shall produce a color in the supernatant liquid no darker than the reference standard color solution.

6. When tested in accordance with "Resistance to Abrasion of Small size Coarse Aggregate by Use of the Los Angeles Machine" (ASTM C131), the coarse aggregate shall show a loss not exceeding 42 percent after 500 revolutions, or

10.5 percent after 100 revolutions

D. Water: Water shall be taken from a potable water supply and shall be fresh, clean and free from injurious amounts of oil, acid, alkali or organic matter.

E. Admixtures:

26. Air entraining agent shall be added to all concrete unless noted otherwise. The agent shall provide entrained air in the concrete in accordance with ASTM C260.

27. The following admixtures are required or used for water reduction, slump increase, and/or adjustment of initial set. Admixtures permitted shall confirm to the requirements of ASTM C494. Admixtures shall be non-toxic after 30 days and shall be compatible with and made by the same manufacturer as the air-entraining admixtures.

a. Water reducing admixture shall conform to ASTM C494, Type A and shall contain no more than 0.05% chloride ions. Acceptable products are "Eucon Series" by the Euclid Chemical Company, "Master Pozzolith Series" by BASF, and "Plastocrete Series" by Sika Corporation.

b. High range water reducer shall be sulfonated polymer conforming to ASTM C494, Type F or G. The high range water reducer shall be added to the concrete at either the batch plant or at the job site and may be used in conjunction with a water reducing admixture. The high range water reducer shall be accurately measured and pressure injected into the mixer as a single dose by an experienced technician. A standby system shall be provided and tested prior to each day's operation of the job site system. Concrete shall be mixed at mixing speed for a minimum of 100 mixer revolutions after the addition of the high range water reducer. Acceptable products are "Eucon 37" or Plastol 5000 by the Euclid Chemical Company, "Master Rheobuild 1000 or Master Glenium Series" by BASF, and "Daracem 100 or Advaflow Series" by W.R. Grace. High range water reducer shall be mandatory for class A1 concrete intended for placement in walls.

c. A non-chloride, non-corrosive accelerating admixture may be used where specifically approved by the City or their designee. The admixture shall conform to ASTM C494, Type C or E, and shall not contain more chloride ions than are present in municipal drinking water. The admixture manufacturer must have longterm noncorrosive test data from an independent testing laboratory (of at least a year's duration) using an acceptable accelerated corrosion test method such as that using electrical potential measures. Acceptable products are "Accelguard 80/90 or NCA" by the Euclid Chemical Company and "Daraset" by W.R. Grace.

d. A water reducing retarding admixture may be used where specifically approved by the Engineer. The admixture shall conform to ASTM C494, Type D and shall not

contain more than 0.05% chloride ions. Acceptable products are "Eucon NR or Eucon Retarder 100" by the Euclid Chemical Company, "Pozzolith Retarder" by BASF, and "Plastiment" by Sika Corporation.

28. Admixtures containing calcium chloride, thiocyanate or more than 0.05 chloride ions are not permitted

F. Membrane Curing Compound: Membrane curing compound shall conform to the requirements of AASHTO Designation M 148, Type 1-clear, or type 2-white pigmented.

G. Expansion Joint Filler:

1. Preformed expansion joint filler shall be of the nonextruding and resilient bituminous type and conform to the requirements of AASHTO Designation M 213.

2. Expansion joint filler shall be gray neoprene sponge rubber that conforms to AASHTO Designation M 153, Type I.

H. Reinforcing and Welded Wire Fabric: Reinforcing and welded wire fabric shall be 6"X6" – 10/10 steel bars to be used in curb & gutter and wire mesh in sidewalk.

2.0.2. CONCRETE PAVERS

A. Concrete pavers shall Miami-Dade County's color standard approved equal. Use of other colors to complement project design theme and/or match existing pavers' configuration require shall only be used with written approval from the City of OpaLocka Beach Public Works Department.

B. All concrete pavers shall have a skid resistant finish.

C. Provide products supplied by a member of the Interlocking Concrete Pavement Institute (ICPI) as called for in the Drawings and/or as specified herein.

D. Concrete pavers shall conform to the requirements of ASTM C936.

E. Concrete pavers shall have an average compressive strength of 8,000 psi with no individual unit under 7,200 psi.

F. Average absorption of 5% with no unit greater than 7% when tested in accordance with ASTM C140.

2.0.3. TEXTURED PAVEMENT

A. "Street Bond SP150E Coating Material" refers to a high performance premium coating material consisting of epoxy modified acrylic polymers blended with sand and aggregate, and specially formulated by Integrated Paving Concept, Inc. (Tel. 800-6885652), for application on asphalt surfaces to provide a durable, long lasting color and texture to the asphalt surface.

B. "Street Bond Colorant" is a highly concentrated, high quality, UV stable pigment blend designated to be added to Street Bond SP150E coating system to provide color to the coating. The colors to be used shall be shown on the drawings. The same Street Bond Colorant shall be used in each SP150E coating layer to the asphalt surface. One pint of colorant shall be used with one pail of Street Bond coating material.

C. Use only patterned/textures pavement products listed on the Qualified Products List (QPL). Meet manufacturer's Specifications for all pattern/texture templates, coating, and coloring material. Use only material that is delivered to the job site in sealed containers bearing the manufacture's original labels. Material coating used to achieve the pattern/texture and/or color shall produce an adherent, weather resistant, skid resistant surface capable of resisting deformation to traffic. Paint and thermoplastic material must meet the requirements of this Specifications and FDOT Specifications Section 971, except that the requirements for Color and Retroreflectivity do not apply.

D. Manufacturers seeking approval for inclusion on the QPL must submit application and certifications in accordance with Section 6 along with the following documentation:

1. Manufacturer's specifications and procedures for materials and installation.

2. Manufacturer's certification with supporting test data and results that the patterned/textured pavement installed in accordance with the manufacturer's specifications and procedures has been tested in accordance with the ASTM E274, Skid Resistance of Paved Surfaces using a standard ribbed full scale tire at a speed of 40 mph (FN40R), and has a minimum FN40R value of 35.

PART 3 – EXECUTION

3.0.1. INSTALLATION OF ROADWAY MATERIALS

A. Subgrade: The work shall consist of bringing the bottom of the excavations and the top of the embankments of the roadways between the outer limits of the roadway to a surface conforming to the lines, grades, and cross sections shown on the plans, of uniform required density, ready to receive the base or paving course. The final elevation of the subgrade shall be within 0.1 foot of the required elevation.

1. All submerged stumps, roots, and other unsuitable matter encountered in the preparation of the subgrade shall be removed and replaced with a suitable material.

2. The material in the top 12" of subgrade shall have a minimum CBR of 25 when compacted to 95% of maximum density as determined by AASHTO Specification T 180-74. In areas such a condition does not exist, the top 12" of subgrade shall be stabilized as described below:

3. Stabilizing Material: Where stabilized subgrade and shoulders are required, the subgrade and shoulder material shall have a minimum California Bearing Ratio Material Value not less than 25. If the in place subgrade or shoulder material has a CBR value less than 25, a suitable stabilizing material shall be added. Such stabilizing material shall be crushed lime rock, coarse lime rock screenings, or any other stabilizing material approved by the Engineer.

4. Suitable stabilizing materials obtained from an existing base or pavement which is to be replaced or abandoned may be used providing that such material contain no fragments larger than 3 ½ inches in diameter.

5. The entire subgrade, including 2 feet beyond the edge of the proposed pavement, shall be thoroughly plowed, scarified, and mixed to a depth of not less than 6 inches below grade. All pot holes and other irregularities shall be filled with suitable material or trimmed down as the case may be, prior to compacting. If the area is cut to grade in natural lime rock, the top 6 inches shall be thoroughly plowed, scarified, and mixed. This plowed, scarified, and mixed layer shall be compacted to not less than 95 percent of the maximum density as determined by AASHTO Specifications T 180-74 prior to the placement of the base course.

6. After the subgrade has been prepared as specified above, the Contractor shall maintain it free from ruts, depressions, and damage resulting from the hauling and handling of any material, equipment, tools, etc. Ditches or drains shall be constructed and maintained along the completed subgrade section. Just before the base course is laid, the subgrade shall be tested as to, elevation and density.

B. Transporting Lime rock: The lime rock shall be transported to the point where it is to be used, over rock previously placed if practicable, and dumped on the end of the preceding spread. No hauling over the subgrade or dumping on the subgrade shall be done

C. Spreading Lime rock:

1. When using new material, the lime rock shall be spread uniformly, and all segregated areas of fine or coarse rock shall be removed and replaced with wellgrade rock.

2. When the specified compacted thickness of the base is greater than 6-inches, the base shall be constructed in two courses. The thickness of the first course shall be approximately one-half the total thickness of the finished base, or enough additional to bear the weight of the construction equipment without disturbing the subgrade.

3. When using the existing base material, the Contractor shall expose the existing base material to the final base grade shown on the drawings. The Contractor shall then proceed with scarifying the top 6 inches of the base and reworking and compacting the material to achieve the required cross-section.

4. Minimum longitudinal slope shall be 0.3% for all roadways. For roadways with gutters, the longitudinal slope may be reduced upon approval by the Public Works Department.

D. Compacting and Finishing Base:

1. General:

a. For single course base, after spreading is completed, the entire surface shall be scarified and then shaped so as to produce the required grade and cross section after compacting.

b. For multi lift base course, the first course shall be four (4) inches thick compacted cleaned of foreign material, bladed and brought to a surface cross section approximately parallel to that of the finished base. Prior to the spreading of any material for the upper course, the density test for the lower course shall be made and the Engineer shall have determined that the required compacting has been obtained. After the spreading of material for the second course is completed, its surface shall be finished and shaped so as to produce the required grade and cross section after compacting and free of scab and laminations.

2. Moisture Content: When the material does not have the proper moisture content to insure the required density, wetting or drying will be required. If the material is deficient in moisture, water shall be added and uniformly mixed in by discing the base course to its full depth. If the material contains an excess of moisture, such excess shall be reduced or removed until the required moisture content is attained before being compacted. Wetting or drying operations shall involve manipulation of the entire width and depth of the base as a unit.

3. Density Requirements: As soon as proper conditions of moisture are attained, the material shall be compacted to a density of not less than 98 percent of the

maximum density as determined by AASHTO Designation T-180 as described below:

a. During final compacting operations, if blading of any areas is necessary to obtain the true grade and cross section, the compacting operations for such areas shall be completed prior to making the density determinations on the finished base.

b. At least three density determinations shall be made at the completion of each course, also the density determinations shall be made at new/replaced every utility crossings and also at every 7,000 square feet of roadways or at more frequent intervals if deemed necessary by the Engineer.

4. Correction of Defects:

a. If at any time the subgrade material should become mixed with the base course material, the Contractor shall dig out and remove the mixture, reshape and compact the subgrade and replace the materials removed with clean base material, which shall be shaped and compacted as specified above.

b. If cracks or checks appear in the base, either before or after priming, which in the opinion of the Engineer would impair the structural efficiency of the base course, the Contractor shall remove such cracks or check by re-scarifying, reshaping, adding base material where necessary and recompacting.

E. Testing Surface: The finished surface of the base course shall be checked with a templet cut to required crown and cross section and with a 10-foot straightedge laid parallel to the centerline of the road. All irregularities greater than 1/4-inch shall be corrected by scarifying and removing or adding lime rock as may be required, after which the entire area shall be recompacted as specified herein before.

F. Thickness Determinations:

The thickness of the compacted lime rock base shall be measured at intervals of not more than 200-feet. Measurements shall be taken at various points on the cross sections prior to the application of the prime coat.

2. The measurements shall be taken in holes through the base of not less than 3inches in diameter. Where the compacted base is deficient by more than 1/2-inch from the thickness called for on the drawings, the Contractor shall correct such areas by scarifying and adding lime rock. The base shall be scarified and rock added for a distance of 100-feet in each direction from the edge of the deficient area. The affected areas shall then be brought to the required state of compaction and to the required thickness and cross section.

G. Priming and Maintaining:

1. The prime coat shall be applied only when the base meets the specified density requirements and the moisture content in the top half of the base does not exceed 90 percent of the optimum moisture content of the base material. At the time of priming, the base shall be firm and unyielding.

2. The Contractor will be responsible for assuring that the true crown and grade are maintained with no rutting or other distortion and that the base meets all the requirements at the time the surface course is applied.

3.0.2. INSTALLATION OF CONCRETE

A. The concrete shall be placed on stabilizing or compacted subgrade to such depth that, when it is consolidated and finished, the slab thickness required by the drawings will be obtained at all points and surface will at no point be below the grade specified for the finished surface, after application of the allowable tolerance. The concrete shall be deposited on the stabilized subgrade in a manner which will require as little rehandling as possible. Placing of the concrete shall be continuous between transverse joints, without the use of intermediate bulkheads.

B. Steel reinforcement is called for on the drawings shall be placed at mid slab depth and the fabric shall be maintained at this location during the placing and finishing operations.

C. Concrete shall be thoroughly consolidated against and along the faces of all forms, and along the full length and on both sides of all joint assemblies, by means of hand operated, vibrators. Vibrators shall not be permitted to come in contact with joint assembly, the subgrade or a side form. Vibration at any one location shall not continue so long as to produce puddling or the accumulation of excessive grout on the surface. In no case shall the vibrator be operated longer than 15 seconds in any one location.

1.

D. Coloring of concrete shall be done by dry-mixing the compound and broadcasting over the fresh-poured concrete after it has been struck off.

E. Striking off, Consolidating and Finishing Concrete:

1. Immediately after the placing, the concrete shall be struck off, consolidated and finished, to produce a finished pavement conforming to the cross section, width and surface finish required by the drawings and specifications. The sequence of operations shall be as follows: strike-off; vibratory consolidation; screeding; floating; removal of laitance; straight edging; and final surface finish. Strike-off, consolidation and finishing shall be accomplished in a manner such as to avoid damage to, or misalignment of, joint assemblies, dowels and other embedded items.

F. Straight edging and Surface Correction:

1. After floating has been completed and the excess water removed, but while the concrete is still in a plastic state, the surface of the concrete shall be tested for trueness with an accurate 10-foot straightedge. The straightedge shall be furnished by the Contractor. The straightedge shall be held in successive positions parallel to the road center line, in contact with the surface, and the whole area tested from one side of the slab to the other as necessary. The advance along the road shall be in successive stages of not more than one-half the length of the straightedge. Any depressions shall be immediately filled with freshly mixed concrete and struck-off, consolidated and refinished. High areas shall be cut down and refinished. Straightedge testing and surface correction shall continue until the entire surface appears to conform to the required grade and cross section.

2. As soon as the concrete has hardened sufficiently to be walked on, straight edging shall again be done. All surface irregularities exceeding ¼-inch in a 10-foot shall be corrected by grinding as directed by the Engineer.

G. Final Finish: As soon as the water sheen has disappeared from the surface of the pavement and just before the concrete becomes non-plastic, a light broom finish shall be given to the surface.

H. Edging:

1. After the final finish has been applied, but before the concrete has become nonplastic, the edge of the pavement along each side of the strip being placed, on each side of transverse and longitudinal contraction joints and construction joints and along structure extending into the pavement, shall be carefully rounded to a ¼-inch radius except as otherwise indicated. A well-defined and continuous radius shall be produced and a smooth, dense mortar finish obtained. All concrete shall be completely removed from the top of the joint filler.

2. All joints shall be checked with a straightedge before the concrete has become non-plastic and, if one side of the joint is higher than the other or the entire joints is higher or lower than the adjacent slabs, corrections shall be made as necessary.

I. Joints:

Transverse Construction Joints: Transverse construction joints shall be constructed at the end of all pours and at other locations where the paving operations are stopped for as long as 30 minutes. Construction joints, however, shall not be placed within ten feet of any other transverse joint or of either end of a section of pavement. If sufficient concrete has not been placed to form a slab at least ten feet long, the excess concrete, back to the last preceding joint, shall be removed. The joints shall be formed by placing a wood or metal bulkhead accurately and securely in place, in a plane perpendicular to the profile and center line of the pavement.

2. Transverse & Longitudinal Contraction Joints: Construction joints shall be constructed at the interval indicated in the plans and shall consist of planes of weakness created by an edging tool. The cut in the fresh concrete shall be perpendicular to the surface of the pavement, shall extend to a depth of 1/3 of its thickness (1 ½" for 4" pavement) and shall have tooled edges as described above.

3. Expansion Joints: ½" Expansion Joints shall be formed by placing performed joint filler around all structures and foundations where pavement abuts curbs and gutters and at intervals not to exceed 100'.

4. Cleaning and Sealing Joints: Joints which are to be sealed, shall be filled with joint sealing material before the pavement is opened to traffic and as soon after completion of the curing period as is feasible. Just prior to sealing, each joint shall be thoroughly cleaned of all foreign material (including any membrane curing compound) and the joint faces shall be clean and surface-dry when the sealer is applied.

a. The sealing material shall be applied to each joint to conform to the details shown on the drawings and in accordance with the manufacture's recommendation. The pouring shall be done in such manner that the material will not be spilled on the exposed surfaces of the concrete. Any excess material on the surface of the concrete pavement shall be removed immediately and the pavement surface cleaned.

b. All cracks occurring in the pavement prior to its acceptance shall be cleaned out and sealed as specified above, except that the cracks and fractures shall be completely filled with joints sealer and any excess filler material cut down level with the pavement surface.

1.

3.0.3. INSTALLATION OF CONCRETE PAVERS

A. Install paver blocks as manufactured by licensee of Paver Systems, Inc., in accordance with the Drawings, manufacturer's recommendations, and Standard Details. Paver block construction shall conform to the requirements of Interlocking Concrete Pavers Institute (ICPI).

B. Where necessary to cut blocks, cutting shall be done so as leave tight joint along all adjacent edges and surfaces. Smoothly split or sawn blocks only will be accepted.

C. After final vibrating/compaction there shall be no more than ¼ inch deviation from proposed grades.

D. Installation of concrete pavers in non-roadway areas shall be in accordance with the following.

D. Replacement of all underground utilities that are in conflict with paver installation.

E. The finished subbase shall be approved before placement of limerock base.

F. The limerock base course shall be compacted to 98% of maximum dry density as per AASHTO T-180.

G. The finished limerock base course shall be approved by the City or designee prior to placement of the sand leveling course.

H. The uncompacted sand leveling base shall be screened over the compacted limerock base to an uncompacted thickness of 1½ inches. The bedding course shall be treated with soil sterilizers to prohibit growth of grass and weeds.

I. The paver blocks shall be laid in the pattern approved by the City of Opa-Locka Public Works Department in accordance with the Standard Details.

J. Construct concrete header curb in accordance with the Standard Details.

E. Installation of concrete pavers in on roadways shall be in accordance with the following.

K. Replacement of all underground utilities that are in conflict with paver installation.

L. The finished subbase shall be approved before placement of the concrete slab.

M. The concrete pavers on the roadway shall be installed over a 6-inch-thick concrete base reinforced with galvanized steel wire mesh 6X6-W1.4xW1.4 with 1½ inches bedding between the concrete base and the concrete pavers.

N. The uncompacted sand leveling base shall be screened over the concrete base to an uncompacted thickness of 1½ inches. The bedding course shall be treated with soil sterilizers to prohibit growth of grass and weeds.

O. Construct concrete header curb in accordance with the Standard Details..

3.0.4. INSTALLATION OF TEXTURED PAVEMENT

A. Applying a patterned and/or textured treatment to asphalt or concrete, in accordance with manufacturer's recommendations. Applications include the following:

Imprinting patterns into existing or new pavement and covering with a surface coating(s) of paint or thermoplastic.

2. Imprinting patterns into existing or new pavement and inlaying the imprint with performed thermoplastic material.

3. Colored, preprinted, preformed texturized thermoplastic material that is applied over existing pavement.

4. Colored thermoplastic material that can be imprinted and texturized during or after application to existing pavement.

B. Patterns are defined as visible surface markings. Imprinted textures are defined as palpable surface markings.

C. Use the location, pattern/texture type (brick, stone, etc.) and coating color as specified in the Plans. Joint openings shall not exceed ½ inch in width.

D. Apply a patterned and/or textured treatment to asphalt or concrete in accordance with manufacturer's recommendations.

E. For application requiring removal and replacement of existing pavement, meet the requirements of Section 350 for cement concrete pavement; the requirements of Section 334 for Superpave asphalt or Section 337 for FC 9.5 and FC 12.5 asphalt.

F. Protect treated surfaces from traffic and environmental effect until the area is completely coated / imprinted and any coating have dried or cured according to the manufacturer's instructions. Complete all utility, traffic loop detector, and other items requiring a cut and installation under the finished surface, prior to pattern installation.

1.

For asphalt roadways, apply patterned/textured pavement a minimum of 14 days after placement of the adjacent pavement. Upon completion of the installation, the Engineer will check the area at random location for geometric accuracy, as specified in the plans. If any of the chosen areas have an imprint width and depth that is less than the manufacturer's specifications, correct the entire textured area, at no additional cost to the City. Supply the specified pattern and color sample for the Engineer's use to visually determine that the material matches the color specified in the plans. For any continuous or abutting areas, i.e. all treated areas of an intersection, color material must be from the same lot/batch. Provide certification that the textured pavement was installed in accordance with the manufacturer's requirements.

G. Textured pavement on crosswalks and travel lanes are to be tested for skid resistance in accordance with ASTM E303.

3.0.5. INSTALLATION OF SIDEWALK

A. Sidewalks at intersections and driveways shall be six (6) inches thick. Driveways shall include a 4-foot section at 2% maximum cross slope as per Standard Details and FDOT Index 522-03.

B. Sidewalks not at intersections or driveways shall be four (4) inches thick.

C. The concrete for sidewalk shall be 3,000 psi, with Miami-Dade County's sidewalk color standard match existing.

D. The concrete shall be reinforced with 6X6-W1.4xW1.4 welded steel wire mesh.

P. Wherever possible, sidewalks shall be designed with a minimum effective width of 6 feet on residential streets and 8 feet on collectors and arterials. Effective sidewalk widths shall be determined in accordance with the Miami Dade County Standard Details, firstly, and FDOT if not specified.

E. All wayfinding signage shall be installed in the back of the sidewalk wherever permitted by sight visibility, otherwise 4 feet minimum clear pedestrian path around sign shall be provided.

F. Repair of Concrete Sidewalk Surface Defects:

Q. Remove and replace all concrete surfaces that contain surface defects, which includes, but not limited to cracking, cracks which penetrate to reinforcement or completely through non-reinforced sections regardless of width, spalling, pop-outs, honeycomb, rock pockets and other objectionable and rough conditions and other objectionable conditions deemed unacceptable to the Engineer immediately after form removal. Test unformed surfaces sloped to drain for trueness of slope, in addition to smoothness.

R. Concrete rejected for any reason is to be removed and replaced, including labor, forms and reinforcing, to meet specifications at no additional cost to the City. Compounds for adhesion or as patching ingredients may be used, if approved by the City or designee. All repair of surface defects to be made require the approval of the City or designee, as to the method and procedure. Approval of the completed work must be obtained from the City or designee.

S. Remove existing sidewalk, or curb and gutter to either the nearest joint beyond or to where no remaining section is less than five (5) feet long.

3.0.6. INSTALLATION OF CURB RAMPS

A. It is the policy of the City of Opa-Locka Public Works Department to install truncated dome detectable warnings on the curb ramps, in compliance with the ADA Standards and PROWAG requirements for detectable warnings on walking surfaces and with FDOT standards. Curb ramps shall be directional and aligned with the crosswalk. Refer to the City of Opa-Locka Street Design Guidelines.

B. The installation of truncated domes on curb ramp shall be in compliance with the FDOT Index 522-002 and FDOT Specifications Section 527 and associated QPL. This Specification excludes stamped concrete detectable warnings due to poor performance.

C. The detectable warnings are required to have a dark-on-light or light-on-dark contrast with the surrounding concrete. Use Miami-Dade County' color standard on the detectable warning portion of the curb ramp. The color of the detectable warnings shall be integral with the device material.

D. Provide certification from an independent testing laboratory that the applied detectable warning device meets the above minimum requirements. Submit this certification for review and approval by the City or designee at least 10 days before the planned installation of any applied detectable warning device.

E. At least ten (10) days before the first installation of any applied detectable warning device, submit manufacture's installation recommendations and instructions for review and approval by the City or designee.

F. Special Considerations: 2 curb ramps per corner should always be used unless technically infeasible. US Access Board Public Rights-of-Way Access Advisory Committee strongly discourages single installations where possible because single ramps can:

    1. Misdirect blind pedestrians who use the slope of curb ramps as a cue.

    2. Increase crossing times for persons who use wheeled mobility aids and can place users into oncoming traffic at small radius corners where it is difficult to provide landing space at the bottom that is wholly within marked crossings.

    3. Drivers may not be as alert to persons crossing at the apex of a corner.

G. If a single diagonal curb ramp is installed because of technical infeasibility, a 48 inches clear space wholly contained within the crosswalk must be provided at the bottom of the curb ramp to allow wheelchair users enough room to maneuver off of the ramp and into the crosswalk

END OF SECTION

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. This section includes minimum construction requirements for precast concrete flared end sections. The sections shall be constructed in accordance with FDOT specifications and Standard Details, and in conformity with the Plans.

1.0.2. PRECAST PRESTRESSED CONCRETE CONSTRUCTION

A. Fabricate, store, transport and erect precast/prestressed concrete members prestressed by the pretensioning method. Pretensioned precast prestressed concrete products are products prestressed by the pretensioning method. In this method, steel or fiber reinforced polymer (FRP) components are stressed and anchored; the concrete for the product is then cast and cured, and finally the stress in the steel or FRP components is released from the anchorages to the concrete through bond, after the concrete has attained its specified release strength.

B. A precast prestressed concrete plant, hereinafter called plant, is an independent operating facility capable of performing all the operations necessary to fabricate precast/prestressed concrete products.

1.0.3. QUALITY ASSURANCE

A. The Engineer will perform periodic inspections, sampling, and testing to ensure of the quality and acceptability of the materials, methods, techniques, procedures and processes being utilized in the fabrication of precast prestressed concrete products.

02641 PIPE CULVERTS

PART 1 – GENERAL

1.0.1 SCOPE OF WORK

A. Materials and installation for pipe culverts with Aluminized Steel Type 2 ULTRA FLO (UF) corrugated steel pipe by Contech Engineered Solutions or approved equal.

1.0.2. RELATED WORK

A. Section 02222 "Excavation – General"

B. Section 02230 "Clearing and Grubbing".

C. Section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems".

PART 2 – PRODUCTS

2.0.1. TYPE OF PIPE TO BE USED

A. When the Plans designate a type (or types) of pipe, use only the type (or choose from the types) designated.

B. When metal pipe is allowed and no future maintenance concerns exist, the Contractor may propose the pipe gage based on the FDOT's Drainage Manual and Culvert Service Life Estimator for approval by the Engineer. When extending existing pipes, construct the pipe extensions of the same size and kind as the existing pipe. Extensions of existing pipes, whose materials are no longer produced, shall be extended with the most similar pipe material available.

C. The Aluminized Steel Type 2 coils shall conform to the applicable requirements of AASHTO M 274 or ASTM A929.

2.0.2. COUPLING BANDS

A. Coupling bands for the UF shall be made of the same base metal and coatings as the UF to a minimum of 18 gauge.

B. Ends of the UF are rerolled with annular corrugations for proper indexing.

C. Connection fasteners will be provided with by the manufacturer.

PART 3 – EXECUTION

3.0.1. LAYING PIPE

A. Lay all pipe, true to the lines and grades given, with bells upgrade and spigot end fully entered into the bell. When pipe with quadrant reinforcement or circular pipe with elliptical reinforcement is used, install the pipe in a position such that the manufacturer's marks designating "top" and "bottom" of the pipe are not more than five degrees from the vertical plane through the longitudinal axis of the pipe. Do not allow departure from and return to plan alignment and grade to exceed 1/16 inch per foot of nominal pipe length, with a total of not more than 1 inch departure from theoretical line and grade. Take up and relay any pipe that is not in true alignment or which shows any settlement after laying at no additional expense to the City.

B. Do not use concrete pipe with lift holes except round pipe which has an inside diameter in excess of 54 inches or any elliptical pipe.

C. Repair lift holes, if present, with hand-placed, stiff, non-shrink, 1-to-1 mortar of cement and fine sand, after first washing out the hole with water. Completely fill the void created by the lift hole with mortar. Cover the repaired area with a 24 inch by 24 inch piece of filter fabric secured to the pipe.

D. Follow the manufacturer's instructions, to secure the filter fabric to the pipe, until the backfill is placed and compacted.

E. Do not cut or drill into or through the corrugations or ribs of plastic pipe except when necessary to meet the dimensional requirements shown in the Plans.

F. When installing pipes in structures, construct inlet and outlet pipes of the same size and kind as the connecting pipe shown in the Plans. Use the same pipe material within each continuous run of pipe. Extend the pipes through the walls for a distance beyond the outside surface sufficient for the intended connections, and construct the concrete around them neatly to prevent leakage along their outer surface as shown on FDOT's Standard Plans, Index 425-001. Keep the inlet and outlet pipes flush with the inside of the wall. Resilient connectors as specified in 942-3 may be used in lieu of a masonry seal.

G. Furnish and install a filter fabric jacket around all pipe joints and the joint between the pipe and the structure in accordance with Standard Plans, Indexes 425-001 and 430- 001. Use fabric meeting the physical requirements of Type D-3 specified in Section 985. Extend the fabric a minimum of 12 inches beyond each side of the joint or both edges of the coupling band, if a coupling band is used. The fabric must have a minimum width of 24 inches, and a length sufficient to provide a minimum overlap of 24 inches. Secure the filter fabric jacket

against the outside of the pipe by metal or plastic strapping or by other methods approved by the Engineer.

H. When rubber gaskets are to be installed in the pipe joint, the gasket must be the sole element relied on to maintain a tight joint. Soil tight joints must be watertight to 2 psi. Water-tight joints must be water-tight to 5 psi unless a higher pressure rating is required in the Plans.

I. When laying pipes that pass through mechanically stabilized earth (MSE) reinforced fill, connect the portion of the pipe within the wall to the external portion of the pipe run only after the full height of the wall supported embankment is in place.

J. When Wall Zone Pipes are shown in the Plans, meet the following requirements:

1. Use resilient connectors on pipes entering and leaving drainage structures.
2. Provide a 2 to 4 inch pipe overhang beyond the drainage structure internal walls.
3. For pipes without welded joints, meet the following additional requirements:
   3.1 Pipe joints must be watertight to 10.8 psi when pulled out 2 inches from the fully homed position in both straight alignment and 5% deflection.
   3.2 Do not allow the gap between sections of pipe to exceed 5/8 inch for all pipe diameters.

3.0.2. TRENCH EXCAVATION

C. Excavate the trench for storm and cross drains, and side drains as specified in sections 02222 "Excavations – General" , Section 02230 "Clearing and Grubbing" and Section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems".

3.0.3. FOUNDATION

A. Provide a suitable foundation, where the foundation material is of inadequate supporting value, as determined by the Engineer. Remove the unsuitable material and replace it with suitable material, as specified in section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems".. Where in the Engineer's opinion, the removal and replacement of unsuitable material is not practicable, he may direct alternates in the design of the pipeline, as required to provide adequate support. Minor changes in the grade or alignment will not be considered as an adequate basis for extra compensation.

B. Do not lay pipe on blocks or timbers, or on other unyielding material, except where the use of such devices is called for in the Plans.

3.0.4. BACKFILLING

A. Backfill around the pipe as specified in section 02314 "Excavation, Backfill and Fill for Structural Facility and Utility Systems" unless specific backfilling procedures are described in the Contract Documents.

3.0.5. PLUGGING PIPE

A. When existing pipe culverts are to be permanently placed out of service, fill them with flowable fill that is non-excavatable, contains a minimum 350 pounds per cubic yard of cementitious material. Install masonry plugs that are a minimum of 8 inches in thickness, in accordance with FDOT's Standard Plans, Index 430-001.

B. When proposed or existing pipe culverts are to be temporarily placed out of service, plug them with prefabricated plugs as shown in the Plans. Install prefabricated plugs in accordance with the manufacturer's recommendations. Do not fill or construct masonry plugs in any pipe culvert intended for current or future service.

3.0.6. GRATES

A. Use metal gratings that meet the requirements of 962-8 of FDOT's Standard Specifications Manual.

3.0.7. END TREATMENT

A. Place an end treatment at each storm and cross drain, and side drain as shown in the Plans. Sod around end treatments in accordance with FDOT'S Standard Plans, Index 570-001.

3.0.8. TYPE CONCRETE ENDWALLS

A. Construct in accordance with the Plans and Standards Plans.

3.0.9. REMOVING EXISTING PIPE

A. If the Plans indicate that existing pipe is to remain the property of the Department, collect and stack along the right-of-way all existing pipe or pipe arch so indicated in the Plans to be removed, or that does not conform to the lines and grades of the proposed work and that is not to be re-laid, as directed by the Engineer. Take care to prevent damage to salvageable pipe during removal and stacking operations.

3.0.10. SPECIFIC REQUIREMENTS FOR CORRUGATED METAL PIPE

A. Make a field joint with locking bands, as specified in Article 9 of AASHTO M36 and AASHTO M196M for aluminum pipe. For aluminum pipe, fabricate bands from the same alloy as the culvert sheeting.

B. When corrugated metal pipe is used as side drain, storm and cross drain, or gutter drain, use a rubber or neoprene gasket of a design shown to provide a joint. Use a gasket of one of the following dimensions:

1. For annular joints with 1/2 inch depth corrugation: either a single gasket a minimum of 7 inches by 3/8 inch or two gaskets a minimum of 3-1/2 inches by 3/8 inch; and for annular joints with 1 inch depth corrugations: either a single gasket a minimum of 7 inches by 7/8 inch or two gaskets a minimum of 3-1/2 inches by 7/8 inch.

2. For helical joints with 1/2 inch depth corrugation: either a single gasket a minimum of 5 inches by 1 inch or two gaskets a minimum of 3-1/2 inches by 1 inch; and for helical joints with 1 inch depth corrugations: either a single gasket a minimum of 5 inches by 1-1/2 inches or two gaskets a minimum of 3-1/2 inches by 1-1/2 inches.

3. Such other gasket designs as may be approved by the Engineer.

C. If, in lieu of a single gasket spanning the joint, two gaskets are used, place these individual gaskets approximately 2 inches from each pipe end at the joint. When two gaskets are used, seal the overlapping area on the coupling band between the gaskets consistent with the joint performance specified. The Contractor may tuck a strip of preformed gasket material over the bottom lip of the band for this purpose. Use coupling bands that provide a minimum circumferential overlap of 3 inches. As the end connections on the coupling band are tightened, ensure that there is no local bending of the band or the connection. Use precurved coupling bands on pipe diameters of 24 inches or less.

D. Use flat gaskets meeting the requirements of ASTM D1056, designation 2C2 or 2B3. In placing flat gaskets on pipe prior to placing the coupling band, do not stretch the gasket more than 15% of its original circumference. Use circular gaskets meeting the requirements of ASTM C361. Do not stretch the circular gasket more than 20% of its original circumference in placing the gasket on pipe.

E. Apply an approved vegetable soap lubricant.

F. In lieu of the above-specified combination of locking bands and flat gaskets, the Contractor may make field joints for these pipe installations by the following combinations:

1. Use the metal bands as specified in Article 9 of AASHTO M36M that are at least 10-1/2 inches wide and consist of a flat central section with a

corrugated section near each end, designed to match the annular corrugation in the pipe with which they are to be used. Connect the bands in a manner approved by the Engineer, with a suitable fastening device such as the use of two galvanized 1/2-inch diameter bolts through a galvanized bar and galvanized strap, suitably welded to the band. Use a strap that is the same gage as the band. Where helically corrugated pipe is to be jointed by this alternate combination, ensure that at least the last two corrugations of each pipe section are annular, and designed such that the band will engage each pipe end with the next-to-outside annular corrugation.

2. For these bands, use a rubber gasket with a circular cross-section of the "O-ring" type conforming to ASTM C361. Use gaskets having the following cross-sectional diameter for the given size of pipe:

Pipe Size	Gasket Diameter
12 inches through 36 inches (with 1/2-inch depth corrugations)	13/16 inch
42 inches through 96 inches (with 1/2-inch depth corrugations)	7/8 inch
36 inches through 120 inches (with 1 inch depth corrugations)	1-3/8 inches

3. Use channel band couplers in helical pipe with ends which have been reformed and flanged specifically to receive these bands. Use channel band couplers that are of a two-piece design, are fabricated from galvanized steel stock conforming to AASHTO M36, have 2 inch by 2 inch by 3/16 inch angles fastened to the band ends to allow for proper tightening, and meet the following:

Band Thickness	Pipe Wall Thickness
0.079 inch	0.109 inch or lighter
0.109 inch	0.138 inch or heavier
3/4 inch wide	0.109 inch or lighter
One inch wide	0.138 inch or heavier

G. Furnish two 1/2-inch diameter connection bolts with each band, that conform to ASTM A307, Grade A and are electroplated in accordance with ASTM B633.

H. Use a gasket with the joint that is a hydrocarbon blend of butyl rubber meeting the chemical composition and physical properties of 942-2.2. Use a 3/8 by 3/4-inch gasket for pipe fabricated from 0.109 inch or lighter material and a 3/8 by 1 inch gasket for pipe fabricated from 0.138 inch and heavier material.

I. The Contractor may use a flange band coupler without the gasket for all applications other than side drain, storm and cross drain, and gutter drain.

J. Do not use the flange band coupler to join dissimilar types of pipes.

K. The Contractor may join reformed flanged helical pipe to existing annular or reformed pipe having annular ends. On non-gasketed installations, use either an annular band or an alternate joint. On gasketed installations, use an annular band, minimum of five corrugations in width, in conjunction with two O-ring gaskets. Use mastic material to seal the area of band overlap.

L. Install pipe using either a trench or open ditch procedure.

M. Check pipe shape regularly during backfilling to verify acceptability of the construction method used. Pipe deflected 5% or more of the certified actual mean diameter of the pipe at final inspection shall be replaced at no cost to the City. Deflection measurements are taken at the point of smallest diameter on the corrugations.

END OF SECTION

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. Work included under this Section covers the furnishing of all labor, equipment and material required for cutting, removing, protecting, constructing, replacing or stabilizing all existing roadways, driveways and pavements of the various types encountered, removed or damaged under this Contract.

B. In addition, all existing utility castings, including valves boxes, junction boxes, handholes, pull boxes, inlets and similar structures in the areas of trench restoration, pavement replacement and pavement overlay shall be adjusted by the Contractor to bring them flush with the surface of the finished work.

1.0.2. QUALITY CONTROL

A. The phrase "FDOT Specifications" shall refer to the Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest edition. The FDOT Specifications, are referred to herein and are hereby made a part of this Contract to the extent of such references, and shall be as binding upon the Contract as through reproduced herein in their entirety.

1.0.3. DAMAGE BY CONTRACTOR

A. The Contractor shall be responsible for the protection from damage from his construction operations, all pavements, including all base courses and surface courses, within the work area.

B. Payment for pavement restoration will be made only where such base courses or surface courses are encountered within the limits defined in the pavement repair details shown on the Plans and/or in the City Standard Details at the rear of the Specifications.

C. Any base course or surface course beyond those limits, damaged as a result of the Contractor's operation, shall be restored in accordance with the applicable requirements of these specifications, to the satisfaction of the City, and to the satisfaction of the governing authority having jurisdiction over the work area.

D. Any damage to adjacent lanes of pavement will require the Contractor to resurface the entire lane width for a length, as approved by the City. When the damage amounts to 25 percent or more in any one block (approximately 600 feet), the Contractor shall resurface the entire width of the lane in which the damage occurred for the entire block.

E. The Contractor is hereby notified that wherever the line for repaving for trenches extends one foot into the edge of the existing paving, he shall repave to this edge only. Full lane paving will not be required. Damage to the pavement beyond this line by the Contractor will require that he repave the full width.

F. In order to protect himself from being held liable for any existing damaged pavement, including detour routes, the Contractor is advised to notify in writing the authority having jurisdiction over the street where such defective pavement exists prior to proceeding with any work in the vicinity. A copy of all such notices shall be forwarded to the City.

G. No payment shall be made for pavement restoration which falls outside the above described limits and is required for thrust blocks and other appurtenant items. The cost for such work shall be included in the price bid for the applicable item.

H. It is brought to the Contractor's attention that wherever the line of the nominal repaving for trenches extend to within two (2) feet of the edge of the existing paving, he shall repave to this edge.

PART 2 – PRODUCTS 2.0.1.

MATERIALS – GENERAL

A. Lime rock Base shall be as specified in Section 02526 "Concrete Pavement, Curb and Walkways".

B. Asphaltic Pavement, Prime Coat and Tack Coat shall be as specified Section 02750 "Asphaltic Concrete Pavement".

C. Sand cover material shall be clean and non-plastic, and shall be composed of hard durable grains, free from loam, silt rock particles and shall not contain any sticks, vegetation, grass, roots or organic matter. Local sand meeting such requirements may be used. Sand shall be subject to approval by the City.

D. 1:10 Mix: Sand-cement mix for backfill within state roads shall be a 1:10 mix of Type I or II Portland Cement and Sand that shall produce a slump of 4 to 6 inches.

2.0.2. BITUMINOUS PAVING MATERIAL

Asphalt cement for asphaltic concrete mixes shall be Viscosity Grade AC-20 or AC-30, homogeneous, free from water and shall meet the requirements of FDOT Specifications, Section 916-1. Unless otherwise specified, all test samples required shall be supplied by

the Contractor. For friction courses, in addition to meeting the above requirements, the bituminous material shall contain 0.5% of a heat-stable, anti-stripping additive from an approved source.

A. Asphaltic Concrete - Type S-I Mix shall meet the requirements of FDOT Specifications for Type S-I Asphaltic Concrete, Sections 330, 331 and 916 of FDOT Specifications.

B. Asphaltic Concrete - Type I Mix shall meet the requirements of Miami-Dade County Public Works Department Specifications for Type I Asphaltic Concrete Surface Course, Section 133 of the Public Works Manual.

C. Asphaltic Concrete - Type III Mix for asphaltic concrete wearing surface overlay, both machine laid and standard (skin patch), shall meet the requirements of FDOT Specifications for Type III Asphaltic Concrete, Section 333-1 through Section 333-6.

D. Type V paving repairs shall consist of a machine-laid asphaltic concrete wearing surface overlay, which shall be a nominal one-inch thick asphaltic concrete, meeting the material requirements of Type I repairs. See subsection 3.07, below.

E. Asphaltic Concrete - Type FC-1, FC-2, FC-3 and FC-4 shall meet the requirements of D.O.T Specifications for Friction Courses, Sections 337-1 through Section 337-7.

F. Emulsified Asphalt for Slurry Seal Coat shall be of the slow-setting, mixing type and shall be homogeneous, meeting the requirements of the Asphalt Institute, Grade SS1 or SS-1h.

G. Liquid Asphalt for Prime and Tack Coat: See Section 02741.

H. Liquid Asphalt for Sand and Asphalt Paving shall be asphalt cement, viscosity Grade AC-5 or emulsified asphalt, Grade RS-2 (anionic) conforming to the requirements of FDOT Specifications, Section 916-1 and 916-4, respectively.

I. Mineral Aggregate for Slurry Seal Coat shall consist of screened sand or limestone screenings or gray granite screenings or a mixture of sand and screenings plus not less than 3%, by weight, of Type I or Type II Portland cement.

PART 3 – EXECUTION

3.0.1. INSTALLATION – GENERAL

A. Permanent pavement repair shall be in accordance with the details shown in the Standard Details herein, with edges straight and parallel and patches rectangular in plan. Replace any paving, beyond the limits shown in the details and as called for in the specifications, as required. Where trenches are located out of the existing

pavement and damage occurs to the pavement, that pavement shall also be replaced by the Contractor.

B. Pavement markings removed or obliterated by the Contractor's operations shall be promptly replaced, in kind, to the satisfaction of the City of Opa-Locka Public Works Department.

C. All equipment necessary for construction shall be on the job site in first class working condition. Spilling or dropping of petroleum products is prohibited and all defective equipment shall be removed or replaced immediately. The Contractor shall be subject to all DERM (Department of Environmental Resources Management) regulations and clean up requirements.

D. The percentages of maximum density for subgrade and lime rock base specified herein are minimum. Greater percentages of maximum density shall be obtained, if so required, by the governing authority having jurisdiction over the work location.

E. Asphaltic concrete mixtures shall be obtained only from plants which comply with the requirements of FDOT Specifications, Section 320 as applicable, using materials specified herein, and producing the specified mixture. General construction requirements for all hot bituminous mixtures specified herein shall conform to FDOT Specifications, Section 330, as applicable.

I. Asphaltic concrete shall be laid only where the surface to be covered is intact, firm, cured and dry, and only when weather conditions are suitable. The temperature of the mixture at the time of spreading shall be within 25°F of the temperature set by the Engineer. No mixture shall be spread when the air temperature is less than 40°F nor when the spreading cannot be finished and compacted during daylight hours.

F. Any mixture caught in transit by a sudden rain may be laid at the Contractor's risk, if the base is in suitable condition. Under no circumstances shall asphaltic material be placed while rain is falling, or when there is water on the area to be paved.

G. Subgrade: Roadway subgrades shall be stabilized to the minimum depth shown on the drawings to a Lime rock Bearing Ratio of not less than 40. Stabilizing shall be Type B as defined in Section 160 of the FDOT Specifications. Stabilization may require the addition and thorough mixing in of crushed lime rock, course lime rock screenings, or any other stabilizing material acceptable to the City. The stabilizing material shall be applied in such quantity that, after mixing and blending, the subgrade will have a LBR of not less than 40. Stabilizing material shall be mixed or blended in the subgrade material by plowing, scarifying, disking, harrowing, blading and mixing with rotary tillers until the mixed materials are of uniform bearing value throughout the width and depth of the layer being processed.

H. At least three density determinations shall be made on each day's final compaction operations on each course, and the density determinations shall be made at more frequent intervals if deemed necessary by the City.

I. Lime rock Base: The lime rock base shall be constructed in accordance with Sections 200 and 911 of the FDOT Specifications, to the thickness and width indicated on the drawings.

J. After spreading of the base material is completed, the entire surface shall be scarified and shaped so as to produce the exact grade and cross section after compaction. For double course base, this scarifying shall extend a depth sufficient to penetrate slightly the surface of the first course. The maximum depth of each lift shall be 8-inches.

K. When the material does not have the proper moisture content to ensure the required density, wetting or drying shall be required. If the material is deficient in moisture, water will be added and uniformly mixed in by disking the base course to its full depth. If the material contains an excess of moisture, it shall be allowed to dry before being compacted. As soon as proper conditions of moisture are attained, the material shall be compacted to an average density not less than 98 percent maximum density as determined in more than one course, the density shall be obtained in each lift of the base.

L. During final compacting operations, if blading of any areas is necessary to obtain the true grade and cross section, the compacting operations for such areas shall be completed prior to making the density determination on the finished base.

M. Unless otherwise directed by the Engineer of Record, the surface shall be "hardplaned" with a blade grader immediately prior to the application of the prime coat to remove the thin glaze or cemented surface and to allow free penetration of the prime material. The materials planed from the base shall be removed from the base area.

N. If cracks or checks appear in the base, either before or after priming, which in the opinion of the City, would impair the structural efficiency of the base course, the Contractor shall remove such cracks or checks by rescarifying, reshaping, adding base material where necessary and recompacting.

O. Mixing Base and Subgrade: If at any time the subgrade material shall become mixed with the base course material, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the subgrade and replace the materials removed with clean base material, which shall be shaped and compacted as specified above.

P. Asphaltic Concrete: The spreading, compacting and jointing the wearing surface shall be in accordance with Sections 330 and 331 of the FDOT Specifications to the thickness indicated on the drawings.

3.0.2. TEMPORARY PAVING

A. Prior to commencing excavation, the asphalt surface shall be saw-cut within the limits of the allowable trench width. Temporary paving will be required along the entire route where the original paved surface is removed. Unless otherwise approved by the City, temporary paving shall be placed the same day the trench is backfilled. The trench shall be backfilled up to a level 1 inch below the existing pavement surface and a temporary, cold mixed sand/asphalt pavement shall be constructed up to the level of the existing pavement surface. The liquid asphalt shall be Grade RC-70, conforming to the requirements of FDOT Specifications, Section 916-2. The sand shall conform to the requirements of FDOT Specifications, Section 902.3 for fine aggregate.

B. The cold mix is to be installed one block at a time, not crossing any intersection, or a maximum of 1,200 feet shall be completed before the Contractor may move forward with his excavation work. Backfill, compaction and temporary paving is to keep pace with the pipe installation. Written permission must be obtained from the City permitting the work to allow greater lengths than 1,200 feet. Permitting agencies may reduce the allowable limits in their permit, or for other unforeseen right-of-way conditions.

C. Prior to completion of the work and within a maximum of 30 calendar days, the Contractor shall remove the 1 inch of cold mix and surplus backfill. The Contractor shall replace it with the specified compacted lime rock base course and asphaltic within the specified working limits. Municipal agencies permitting this work may accelerate the time for removal of the cold mix, at their discretion.

D. The temporary pavement shall be maintained by the Contractor in a condition satisfactory to the City until its removal. Removal shall include any surplus backfill material. Replacement of the temporary pavement with permanent pavement shall be made within 30 days. In replacing the temporary paving with permanent pavement, all work shall be completed in sections compatible with specified traffic maintenance procedures.

E. The Contractor may elect to install a suitable temporary hot mix asphaltic pavement, to be left in-place, in lieu of cold mix, when the hot mix asphalt is left in-place and installed over properly compacted lime rock base course. This temporary pavement shall be incorporated into the specified permanent pavement restoration as part of Type I paving restoration.

F. Sand seal on the lime rock base course will not be permitted in lieu of temporary paving.

G. Unless otherwise approved by the City, temporary paving, shall be placed within twenty-four hours following the completion of backfilling.

3.0.3. TYPE I PAVING REPAIR (LIMEROCK BASE - ASPHALTIC CONCRETE SURFACE)

A. Type I paving repairs shall be made with an 8-inch thick compacted lime rock base and a minimum 1-inch thick asphaltic concrete surface, as detailed in the Standard Details. On Public Works roads asphaltic concrete shall have a compacted thickness of 2-inch, placed in a minimum of two (2) compacted 1-inch lifts.

B. Limerock for pavement base shall be Miami limerock obtained from local sources where the overburden was removed from the pits prior to mining operations. The limerock shall comply with the requirements of FDOT Specifications, Section 911.

C. The backfill previously placed and compacted shall be excavated to the required depth below the existing road surface and the existing paving shall be cut back beyond all excavations, using an abrasive disc saw to trim the edges to straight and true lines, minimum width for the lime rock base shall be equal to the trench width plus 2 feet. Eight inches of lime rock base shall be placed in two layers, each layer compacted to not less than ninety-eight percent (98%) density in accordance with Section 200 of FDOT Specifications. During rolling, the base shall be wetted down, as necessary, to secure the greatest possible compaction. After rolling, the entire surface of the base shall be thoroughly scarified to a depth of not less than 3 inches and shaped to conform to and be parallel with the existing surface, then watered and rolled again. Rolling and watering shall continue until the entire depth of the base is bonded and compacted into an unyielding mass.

D. If at any time the subgrade material becomes mixed with the lime rock base course materials, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the subgrade and replace the materials removed with clean rock which shall be watered and rolled until satisfactorily compacted.

E. After the lime rock base course has been properly prepared and is dry and ready to receive the wearing surface, a tack coat of emulsified asphalt, in accordance with Section 02741, shall be applied at a rate of 0.10 gallon per square yard, immediately followed by the asphaltic concrete. The tack coat shall be applied to the entire lime rock base uniformly, and shall thoroughly coat all surfaced. Care shall be taken to tack coat and bond the edge of surrounding pavement.

F. The asphaltic concrete shall be plant mixed, using the best grade of local aggregates of approved size and gradation and mixed with an approved binder and conforming the either the State of Florida Department of Transportation Specifications, Type S-1 Asphaltic Concrete, Sections 330, 331 and 916 of FDOT Specifications, or Miami Dade County Public Works Type I, as ordered by the Engineer of Record.

G. Where the width of the repair permits, the asphaltic concrete plant mix material shall be placed by means of an approved mechanical spreader and finisher. The mixture shall be compacted to true grade and cross section by means of a tandem roller weighing not less than eight tons. The compacted asphaltic concrete mixture shall not be, in any case, less than one inch in thickness. Rolling shall proceed as closely behind the spreader as possible and all material shall be completely compacted the same day it is placed. The minimum width of the wearing surface shall be the same as the base.

3.0.4. TYPE IV PAVING REPAIRS (CONCRETE SLAB – RIGID PAVEMENT)

A. Type IV repairs will be used when the restoration work falls within the limits of existing rigid pavement.

B. Paving repairs shall be similar to Type III paving repairs except that No. 4 reinforcing steel bars spaced 12 inches on centers both ways shall be substituted for the mesh reinforcement, and the slab shall be 8 inches thick instead of 6 inches, with the top of the concrete matching the elevation and finish of the existing pavement. The asphaltic concrete surface course is not required.

3.0.5. TYPE V PAVING REPAIRS (ASPHALTIC CONCRETE WEARING SURFACE OVERLAY)

A. Type V paving repairs shall be made where noted on the plans and/or as ordered by the Engineer or Record. Type V paving repairs shall consist of a machine-laid asphaltic concrete wearing surface overlay, which shall be a nominal one-inch thick asphaltic concrete, meeting the material requirements of Type I repairs, as specified hereinabove. As used herein, "overlay" shall mean Type V paving repairs. A special wearing surface may be substituted, if required.

B. In general, the overlay shall be applied in a full lane width or widths, after the permanent paving repairs over the trench have been made. Type V is usually in addition to required Type I repairs. Since the quantity of Type V repairs that may be required is usually unknown until pavement restoration work begins, Type V repairs may be established in the Proposal on a contingent basis.

C. All longitudinal and transverse asphalt replacement overlay wearing surfaces shall butt into adjacent existing asphalt wearing surfaces in full lane asphaltic pavement restoration. The finish elevation of the new full lane overlay shall meet existing elevations adjacent to the new work.

D. The existing asphaltic concrete surface shall be saw cut for its full depth or 1-inch minimum, and then stripped back for at least 2 feet into the area to be overlaid to a second cut which shall also be in clean straight lines. The second, or interior, cut edge shall be rolled with a tandem roller weighing not less than 8 tons before the overlay is applied. The stripped area shall be used to provide a smooth transition or "feather"

area between the overlay and the existing pavement. Before placing the overlay, all cut edges and the surface of the stripped area shall be tack coated with emulsified asphalt as specified herein below.

E. If the Contractor requests in writing to "feather" the longitudinal edge, and if written permission is granted to "feather" the asphalt by the City a sanded mix of 70-30 type shall be used. "Feathering" shall begin 18 inches from the tapered edge.

F. Prior to installing a full lane width overlay over existing asphaltic pavement the trench and shoulders over the pipe shall be sawcut and filled with asphaltic concrete to the required depth, terminating flush with the existing adjacent asphalt in accordance with the municipality having jurisdiction over the work for Types I, II or M. Type V overlay will be installed as detailed above.

G. When a minor amount of asphalt surface will remain, generally with large pipe installations, after the pipe has been installed and the required longitudinal saw cutting of the asphaltic pavement completed, the Contractor may request permission to remove all the asphalt in the lane, by saw cutting the asphalt adjacent to the existing lane, then placing the Type V overlay flush with the adjacent asphalt. This would require that the Type I, II or M finish elevation be lowered 1 inch to allow for the Type V overlay.

H. Before the overlay is applied, existing surfaces shall be swept clean of all dirt and debris, using a power driven broom if warranted by the size of the location to be overlaid and/or as ordered by the City. Pavement edges shall be cleared of all encroaching vegetation, loose sand, rock and all other foreign matter. When the existing surface is thoroughly clean, a tack coat of Emulsified Asphalt Grade RS-2 (anionic) shall be applied at the rate of approximately 0.10 gallon per square yard, immediately followed by the asphaltic concrete overlay.

I. Machine-laid overlay shall be placed by means of an approved mechanical spreader and finisher, and the mixture shall be compacted to true grade and cross section by means of a tandem roller weighing not less than 8 tons.

J. The compacted overlay shall be thicker as required to produce a smooth uniform surface free of any irregularities but shall not be less than one inch in thickness. Existing depressed areas in the asphaltic pavement, which could collect water after a rainfall shall be corrected before placing the asphaltic overlay. Rolling shall proceed as close behind the spreading of the asphaltic overlay as possible, and all materials shall be completely compacted the same day it is placed.

3.0.6. SLURRY SEAL COAT

A. Slurry-seal repairs shall be made where ordered by the Engineer of Record or the City.

B. Before any material is laid, the existing surface shall be cleaned with brooms or power blowers. Vegetation which has overgrown the edges shall be removed. All cracks, potholes and depressions shall be brought up to grade with bituminous concrete skin patching.

C. A tack coat, if required, shall consist of emulsified asphalt SS-1h, diluted with 3 parts of water, sprayed and squeegeed or broomed at a rate of 0.1 to 0.2 gallons per square yard.

D. A minimum thickness of 1/8-inch to a maximum of 1/4-inch of slurry mix shall be spread by a drag distributor at a maximum rate of 180 feet per minute. Any ridges or surplus material shall be smoothed by hand squeegee. The pavement shall be kept damp with a fog spray just ahead of the machine.

E. A second coat shall not be applied to, nor traffic permitted to drive upon, the first application until it has thoroughly dried. (A dry condition is such that an automobile tire track does not show after driving on the surface).

3.0.7. ASPHALT COLD MILLING

A. Cold milling of the existing pavement for a 1-inch depth shall be done by using an automated pavement planer capable of maintaining an accurate depth. Cold milling equipment shall meet the approval of the Engineer and the governing agency having jurisdiction at the location of the pavement milling operation. The Engineer's word as to the acceptability of the equipment shall be final

B. After the pavement has been milled and the existing pavement removed, a tack coat shall be applied as specified above.

C. The required width of 1-inch thick asphaltic concrete wearing surface of the specified wearing course shall be applied in accordance with the above specifications.

D. The Contractor shall perform asphalt cold milling where called for on the plans or as required for a complete installation, when approved or requested by the City. Cold milling shall be done using an automated pavement planer capable of maintaining an accurate depth. Cold milling equipment shall meet the approval of the City and governing agency having jurisdiction at the location of the pavement milling operation. All charges for maintenance of traffic, transportation of personnel, equipment and other mobilization charges shall be considered as incidental to the cold milling operation.

E. Cold asphalt milling shall be provided to improve the rideability of the finished pavement, lower the finished grade adjacent to an existing curb prior to resurfacing or to completely remove existing pavement. The overall length of the milling machine (excluding the conveyor) shall be a minimum of 18 feet, and having a minimum cutting

width of six feet. The milling operation shall be operated to effectively minimize the amount of dust being emitted from the machine. Prewetting of the pavement may be required. In areas where milling is to be performed around the City utility structures such as manholes, valve boxes etc., proper caution shall be taken as not to damage any of the structures. Saw-cutting of the concrete surrounding the structure and using a pick or other means so as not to disturb the structure shall be employed to prevent any damage. Prior to opening an area which has been milled to traffic, the pavement shall be thoroughly swept with a power broom or other approved equipment to remove to the greatest extent practicable, the fine material which will dust under traffic. This operation shall be conducted in a manner so as to minimize the potential for creating a traffic hazard and to minimize air pollution.

F. The milling operation shall be continuous so as to complete each site without any delays. All milling operations shall be coordinated by the City Inspector.

G. Traffic maintenance charges shall include the installation and maintenance of all traffic control and safety devices, in accordance with specifications outlined in the Dade County Public Works Manual. In addition, the Contractor shall provide all barricades, flashing warning lights and/or arrow boards necessary to maintain safety and warn motorists of the construction.

3.0.8. REPAIR OF DAMAGED PAVEMENT

A. All damage to pavement by the Contractor as a result of Work under this project shall comply with "DAMAGE BY CONTRACTOR", above, and shall be repaired in a manner satisfactory to the City. The repair shall include the preparation of the subgrade, the placing and compacting of the lime rock base, the priming of the base, the placing and maintaining of the surface treatment, all as specified herein.

B. The width of all repairs within the work area shall extend at least 12 inches beyond the limit of the damage. The edge of the pavement to be left in place shall be cut to a true edge with a saw or other acceptable method so as to provide a clean edge to abut the repair. The line of the repair shall be uniform with no irregularities. Repair of damage by the Contractor beyond the work area shall be approved by the governing agencies having jurisdiction over the work prior to commencing the work.

3.0.9. CONCRETE PAVEMENT REPAIR

A. This type of repair shall be made only on Florida Department of Transportation roadways when the original pavement is concrete.

B. The existing pavement shall be saw cut in straight lines as outlined by the City at the location of the replacement. The pavement shall be removed and the fill shall be mechanically compacted to 98% of the maximum density obtainable as determined by AASHTO Standard T-180. The fill in the trench and shoulders shall be brought to a

depth equal to the thickness of the existing concrete pavement, but not less than 8 inches in any case. The opening thus formed, shall be filled with concrete having a design strength of 5,000 psi and made with High Early Strength Cement. The concrete slab shall be reinforced with ½ inch steel reinforcing rods, 12 inches on center each way, placed 2 inches above the bottom of the slab. The surface of the slab shall be struck off with a screed and finished with a wood float and brush to conform to the grade and finish of the existing pavement. Apply liquid curing compound after initial set. The Contractor shall provide adequate means to protect the slab until it has cured sufficiently to withstand vehicular traffic without spalling or breaking apart. Construction joints and expansion joints in the original pavement shall be reproduced in the repair with matching materials.

END OF SECTION

02765 PAVEMENT MARKINGS AND TRAFFIC SIGNS

PART 1 – GENERAL

1.0.1 SCOPE OF WORK

This section consists of pavement markings and traffic signs on the Drawings, specified herein and as required for a complete installation.

1.0.2. QUALITY ASSURANCE

A. The phrase "DOT Specifications" shall refer to the Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest edition. The DOT Specifications, are referred to herein and are hereby made a part of this Contract to the extent of such references, and shall be as binding upon the Contract as though reproduced herein in their entirety.

B. Pavement markings for this Project shall conform to the Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest edition. Pavement markings removed or obliterated by the Contractor's operations shall be promptly replaced in kind to the satisfaction of the City of Opa-Locka Public Works Department, or other authority having jurisdiction over the work area.

1.0.3. CERTIFICATION

The Contractor shall furnish the manufacturer's certification that all signs furnished conform to these specifications and shall replace or repair at his expense all signs that fail to meet this requirement.

PART 2 - PRODUCTS

2.0.1. PAVEMENT MARKING

Paint for pavement strips shall be as specified in Part 3, Execution.

2.0.2. REFLECTIVE MARKERS

Reflective markers shall be installed in the pavement in accordance with OSHA, DOT and City of Opa-Locka Public Works requirements.

2.0.3. TRAFFIC SIGNS

A. General: Traffic regulating signs shall conform to the colors, dimensions and requirements of the Manual on Uniform Traffic Control Devices (ANSI) and displaying the lettering and symbols indicated on the Drawings.

B. Sign Panels and Support Members: Sign panels and support members shall conform to Aluminum Association Alloy 6061-T6.

C. Bolts: Bolts shall conform to Aluminum Association Alloy 2024-T4 with an anodic coating 0.0002-inches thick minimum and chromate sealed.

D. Nuts: Nuts shall conform to Aluminum Association Alloy 6269-T9.

E. Reflective Sheeting: Reflective sheeting shall conform to DOT Type A requirements.

F. Construction Warning Signs: The CONTRACTOR shall install traffic and warning signs during construction in accordance with OSHA, DOT and Dade County Public Works requirements.

PART 3 - EXECUTION

3.0.1. TRAFFIC PAINT

A. This type of pavement painting shall be used where no thermoplastic paint is required or as temporary paint during the time required for paving "cure" prior to application of thermoplastic paint markings.

B. Traffic paint used for this work shall conform with the requirements of Section 971-12 of the Florida Department of Transportation Standard Specifications for Road and bridge Construction, or, at the Contractor's option, fast dry traffic paint, as specified in D.O.T. Specifications, Section 971-13, may be used.

C. The colors of the paint shall be yellow or white, as existed before the repair.

D. All equipment shall be of a type and design which will readily produce the required uniformity of application of the stripes, both as to thickness of coating and alignment. The paint machine shall be of the spray type, capable of spraying the paint to the required "spread" without thinning of the paint. The paint tank shall be equipped with a mechanical agitator. The nozzle shall have cut-off valves which will apply broken or "skip" lines automatically. Each nozzle shall also be provided with suitable line guides, either metallic shrouds or air blasts.

E. Painting shall be done only during daylight hours and, as far as practicable, shall be terminated in time to permit sufficient drying by sunset. No paint shall be applied when moisture is present on the surface to be painted or when the air temperature is below 40 degrees

F. Painting shall not be done when winds are sufficient to cause spray dust. F. The surface which is to be painted shall be cleaned, by compressed air or other effective means, immediately before the start of painting, and shall be clean and dry when the

paint is applied. Any vegetation or soil shall be removed from the pavement before edge striping is begun.

G. The paint shall be thoroughly mixed before it is poured into the painting machine and no thinning of the paint will be allowed at any time. Before the start of each day's work, the paint container, the connections, and the spray nozzles on the machine shall be thoroughly cleaned with paint thinner or other suitable cleaner.

H. The traffic stripe shall be of the specified width, with clean, true edges and without sharp breaks in the alignment. A uniform coating of paint shall be obtained and the finished stripe shall contain no light spots or paint skips. Any stripes which do not have a uniform, satisfactory appearance, both day and night, shall be corrected.

I. All newly painted stripes, including edge stripes, shall be protected until the paint is sufficiently dry to permit vehicles to cross the stripe without damage from the tires. While the center line stripes are being painted, all traffic shall be routed away from the painting operations and the newly painted stripe. When necessary, a pilot car shall be used to protect the painting operations from traffic interference.

J. Any portions of the stripes damaged by passing traffic or from other causes shall be repainted.

K. Paint for temporary pavement markings shall also be used where thermoplastic markings are to be applied after the asphaltic concrete has "cured." The cure time shall be based on thermoplastic manufacturer's recommendations. However, in accordance with FDOT requirements, asphalt shall have been in place for 30 days before application of thermoplastic stripe.

3.0.2. THERMOPLASTIC TRAFFIC STRIPES AND MARKINGS

A. Thermoplastic pavement markings, including stripes, pavement messages, stop bars, directional arrows, reflective pavement markers and other miscellaneous items, shall be replaced as existed before the repair was made. The thermoplastic compound shall be extruded or sprayed onto the pavement surface in a molten state by mechanical means, with surface application of glass spheres, when required. Upon cooling to ambient pavement temperature, the compound shall produce an adherent pavement marking of specified thickness and width and capable of resisting deformation.

B. The colors of the compound shall be white or yellow, as existed before the repair.

C. Where thermoplastic markings are to be applied to concrete pavement, a sealing primer, as specified in F.D.O.T. Specifications Section 711-2.2, shall be applied in advance of the placing of the stripes.

D. The thermoplastic shall be applied to the pavement utilizing either extrusion or spray application equipment. The application equipment shall be so constructed as to provide continuous mixing and agitation of the material. Conveying parts of the equipment between the main material reservoir and the shaping die or gun shall be so constructed as to prevent accumulation and clogging. The equipment shall be constructed so that all mixing and conveying parts up to and including the shaping die or gun, maintain the material at the plastic temperature with heat transfer oil or electrical element controlled heat. Direct fire heat transfer will not be allowed.

E. The application equipment shall be so constructed as to insure continuous uniformity in the dimensions of the stripe. The applicator shall provide a means for cleanly cutting off square stripe ends and shall provide a method of applying "skip" lines. The use of pans, aprons, or similar appliances which the die overruns will not be permitted.

F. Glass spheres applied to the surface of the completed stripe shall be applied by an automatic bead dispenser attached to the striping machine in such a manner that the beads are dispensed almost instantaneously upon the installed line.

G. Special kettle(s) shall be provided for melting and heating the thermoplastic material. The kettle(s) shall be equipped with automatic thermostatic control devises to provide uniform temperature control and prevent overheating of the material. The applicator and kettle(s) shall be equipped and arranged as to satisfy the requirements of the National Fire Underwriters, the State of Florida, Dade County and any municipal authority applicable to where the work is being done.

H. Applicators shall be mobile and maneuverable to the extent that straight lines can be followed and normal curves can be made in a true arc. The applicator equipment to be used on roadway installations shall consist of either hand equipment or truck mounted units depending on the type of marking required.

I. The hand applicator equipment shall be insulated, have sufficient capacity to hold 150 pounds of molten material, and be sufficiently maneuverable to install crosswalks; lane, edge and center lines; arrows and legends.

J. The truck mounted unit for lane, edge and center lines shall consist of a mobile selfcontained unit carrying its own material capable of operating at a minimum speed of five miles per hour while installing striping.

K. Application time, weather limitations and surface preparation shall be in accordance with FDOT. Specifications Sections 710-4, 710-5 and 710-8. In accordance with FDOT requirements, asphalt shall have been in place for 30 days before application of thermoplastic stripe.

L. The material, when formed into traffic stripes or other markings, shall be readily renewable by placing an overlay of new material directly over an old line of compatible material in such a manner that no splitting or separation takes place.

M. The application temperature shall be within the range specified by the manufacturer of the thermoplastic compound being used.

N. All pavement edge lines, gore, island and diagonal strip markings, bike lane symbols and messages, wherever located, shall have a minimum thickness of 0.060 inch at the edges and a maximum thickness of 0.120 inch at the center. A minimum average film thickness of 0.060 inch shall be maintained. All lane lines, center lines, transverse markings (except shoulder markings) and pavement markings within traffic wearing area (such as dotted turning guide lines) shall have a minimum thickness of 0.090 inch at the edges and a maximum thickness of 0.188 inch at the center. A minimum average film thickness of 0.090 shall be maintained. All thickness measurements shall be an average in any three foot length.

O. The glass sphere top coating shall be applied by a type of glass sphere dispenser or gun which will embed the spheres into the line surface to at least one-half their diameter. The glass sphere top coating shall not incur more than a 10 percent loss during the first 30 days of traffic exposure.

P. Reflective pavement markers shall be installed as they existed before the repair. They shall be replaced with the appropriate color or colors and oriented in the correct direction as specified in Section 706 of the F.D.O.T. Specifications. Paving markings for this Project shall conform to the Florida Department of Transportation Standard Specifications for Road and Bridge Construction, as revised by the governing agency.

3.0.3. FABRICATION

Preparation of sign blanks and fabrication of reflectorized faces shall conform to the applicable requirements of DOT Sections 700-4 and 700-5.

END OF SECTION

02840 CONCRETE BARRIER

PART 1 – GENERAL

1.0.1 SCOPE OF WORK

A. Construct precast or cast in place concrete barriers, traffic railings, opaque visual barriers, and parapets, herein referred to as rigid barrier, in accordance with the Standard Plans and the details shown in the Plans. Use stationary removable forms or sliding forms to construct the rigid barrier. Do not use permanent precast concrete rigid barrier on bridge or box culvert structures.

B. Submit written certification from the manufacturer of the precast rigid barrier that the barrier meets the requirements of this Section. Rigid barrier is produced using certification acceptance; therefore, assume responsibility for performance of quality control testing and inspections required by Sections 346 and 400 of FDOT's Standard Specifications Manual. Perform all Quality Control Testing and inspections using CTQP qualified testing personnel. Perform compressive strength testing in a laboratory inspected by CCRL or CMEC.

C. Ensure that each shipment of products to the job site includes a list of products shipped and the required written certification statement for each product. Submit this list and certifications to the Engineer.

PART 2 - PRODUCTS

2.0.1. MATERIALS

A. Meet the following requirements:

Flowable Fill .....Section 121
Concrete ..... Sections 346 and 347
Reinforcing Steel .....Section 415
Joint Materials..... 932-1.1
Joint Materials*..... 932-1.2 and 932-1.3 Barrier
Delineators *.....Sections 705

*Use products listed on the Department's Approved Product List (APL).

PART 3 - EXECUTION

3.0.1. CONSTRUCTION

A. General: The Contractor may use stationary removable forms or slip form construction methods provided a completed rigid barrier with acceptable alignment and finish is obtained. Do not use forms which are damaged or are not in alignment. At no expense to the Department, remove and replace sections of rigid barrier having unconsolidated concrete, surface blemishes, deviations in alignment or profile which exceed tolerances, or other defects which cannot be repaired to the satisfaction of the Engineer.

B. Stationary Form Construction: Provide precast or cast in place concrete rigid barrier constructed using stationary forms in accordance with Section 400 and provide a general surface finish. Align and erect the stationary form so that all plane surfaces of the finished barrier will have no deviation greater than 3/8 inch measured as an ordinate between the concrete and a 10 foot straightedge. Correct all alignment deviations greater than 3/8 inch. Straightedge by half lapping the straightedge for the full length of all plane surfaces.

C. Slip Form Construction: When electing to use the slip form method in lieu of the stationary forming method, place the concrete with a slip form machine approved by the Engineer. The concrete cover tolerance is plus or minus 3/4 inches from the plan dimensions, except the minimum concrete cover, as constructed, must not be less than 1-3/4 inches.

Provide a finished texture to the slip formed rigid barrier by hand troweling, brushing, or both to eliminate pockmarks, blemishes and any other discontinuities in surface texture. Ensure that the final finish has a fine texture and is free of pinholes, pockmarks, and blemishes.

Remove and recast or repair sections of slip formed rigid barrier having areas of unconsolidated concrete, having surface blemishes, and/or having pockmarks greater than 1/2 inch in diameter after hand troweling and brushing. Repair areas of unsatisfactory surface finish by hand methods using mortar screened from the concrete used to construct the rigid barrier. Use the mortar screened from the rigid barrier concrete only to fill holes and surface blemishes below the slip formed surface of the concrete. Do not use mortar as a surface overlay coating on the rigid barrier concrete.

During the finishing operation, while the concrete remains plastic, straightedge all plane surfaces of the slip formed rigid barrier with a 10 foot straightedge. Straightedge by half lapping the straightedge for the full length of the plane surfaces. Correct any deviation found during straightedging, greater than 3/8 inch, measured as an ordinate between the concrete surface and the straightedge, in an approved manner at no expense to the Department. Do not use surface overlay coatings of mortar screened from the concrete, or surface overlay coatings of concrete to correct alignment deviations.

3.0.2. JOINTS

A. General: Place expansion and contraction joints in concrete rigid barrier either mounted on or adjoining rigid structures in a manner similar to the type and method of jointing used in the supporting or adjoining structure or as shown in the Contract Documents. Place expansion and contraction joints in concrete rigid barrier supported by soil or flexible foundation materials in the manner detailed in the Plans.

B. Contraction Joints in Rigid Barrier Supported by or Adjoining Rigid Structures: The Contractor may form or saw contraction joints. When sawing contraction joints, saw them as soon as the concrete has hardened sufficiently to permit sawing without raveling and before uncontrolled cracking occurs, but in no case later than 12 hours after casting. Match contraction joints to adjacent contraction joints in the structure. Space contraction joints at 15 to 30 foot intervals. For rigid barrier on bridge structures or approach slabs, space contraction joints as shown in the Contract Documents.

C. Expansion Joints in Rigid Barrier Supported by or Adjoining Rigid Structures: Construct expansion joints at right angles to the face, and extend them through the entire crosssection of the rigid barrier. Construct expansion joints at the same location and width as the expansion joints in the structure on which the rigid barrier rests and at other locations shown in the Contract Documents. Form expansion joints with an expansion filler material or removable forming materials and secure to the forms as required to provide proper position.

3.0.3. REPAIRS AND REJECTION

A. For permanent precast concrete rigid barrier that has not been installed, evaluate cracks, spalls and other deficiencies in accordance with 450-12. Repair deficiencies in accordance with 450-13 or the plant's approved repair methods that are included as part of the Quality Control (QC) Plan. Ensure that the original performance and durability of the repaired rigid barrier is maintained. Use materials for concrete repair that will meet or exceed the strength requirement for the class of concrete used. Materials meeting the requirements of Section 930 may be substituted for non-shrink grout when required by 450-13. Concrete rigid barrier is subject to rejection if it fails to conform to any of the Specification requirements after repair. The disposition of concrete cracks in rigid barrier after installation shall be in accordance with 400- 21.

END OF SECTION

02900 LANDSCAPING

PART 1 – GENERAL

1.0.1 SCOPE OF WORK

D. Work included in this Section includes tree removal, tree relocations, furnishing and planting trees, plants and grass of the species, sizes and quality specified, fertilizing, watering, maintaining plants, guarantee and obtaining all permits from municipalities having jurisdiction over this work.

E. The schedule of trees and plants, if applicable, is shown on the drawing, and indicates the common and botanical names, the quantities and sizes of plants to be used.

F. Plants shall be sound, healthy and vigorous, well branched and densely foliated when in leaf with well developed root systems free of disease and insects, pests, eggs or larvae. No plants will be accepted unless healthy and showing satisfactory foliage conditions.

1.0.2. Solid sod and grass submittal to be submitted to the Engineer or Record for approval prior to installation.

PART 2 - PRODUCTS

2.0.1. GRASSING, SOLID SOD AND SEED:

A. General:

1. Solid sod shall be planted in the unpaved areas abutting the structures and extending to the limits shown on the Plans.

2. Grass seeding: All other unpaved areas shall be planted with grass seed and mulched.

3. When solid sod or grass seed is to be placed adjacent to or in close proximity to existing sod or grass, the Contractor is to use similar sod or grass and obtain approval from the Engineer of Record prior to installation. In public areas and rightof-ways the Contractor is also required to comply with Governmental Agency requirements and provide the City with written approval of said agency prior to installation of grass and sod.

B. Materials:

1. Solid Sod:
   a. Solid sod shall be certified bitter blue St. Augustine Floratam. The sod shall be firm touch texture having a compact growth of grass with good root development. It shall contain no weeds or other objectionable vegetation.

b. The soil embedded in the sod shall be good clean earth, free from stones and other debris. The sod shall be free from fungus, vermin and other diseases. The sod and soil shall be approximately 2" thick.

c. Before being cut and lifted, the sod shall have been mowed at least three times with a lawn mower, with the final mowing not more than seven days before the sod is cut. The sod shall be cut into uniform dimensions approximately 12" X 24". Abutting joints shall be free of open spaces with a tamped or rolled surface so that there are no joint openings.

2. Topsoil: Soil utilized for planting grasses shall be a mixture of pulverized 50% rock free siliceous sand and 50% clean mulch from an approved source. All ingredients shall be free of sticks, roots, rocks, lumps or other impurities or debris. All soil shall be delivered in a loose friable condition. Topsoil may be "unsuitable top soil" removed during the course of other work hereunder, if approved by the Engineer of Record. Topsoil shall be free of undesirable plants and seeds. Any such plants sprouting from areas of recent topsoil application shall be presumed to have originated in the topsoil and shall be eradicated from the area by the Contractor at his expense. Means of eradication shall be submitted to the Engineer of Record for approval.

C. Planting of Grassing:

1. Solid Sod: Unless otherwise directed by the Engineer, four inches of topsoil shall be placed. The ground area shall be saturated with water. Sod shall be placed on the graded and watered ground firmly butted on all sides by sod without leaving holes, slots, or depressions. Sod shall be top dressed with soil (herein before specified) where required to bring all fill to voids and provide a uniform grass matt if approved by the Engineer of Record. Soil shall firmly abut all structures to which it surrounds or contacts. Immediately after the grassing process, the entire grassed or mulched area shall be rolled thoroughly with a cultipacker traffic approved roller, or other 1,000 pound roller. At least two trips over the entire area will be required.

2. Grass Seeding: As above, place four inches of topsoil and saturate with water. Thereafter seed and mulch

D. Fertilizing Grassing:

1. Commercial fertilizers shall comply with all Federal, State and County fertilizer laws.

2. The numeral designations for fertilizer indicate the minimum percentage (respectively) of (1) total nitrogen, (2) available phosphoric acid, and (3) water soluble potash, contained in the fertilizer.

3. Designations may be approved specifically for a particular project and if liquid fertilizer other than that of chemical designation 8-8-8 is used, the total nitrogen content shall not exceed 12 percent.

4. At the Contractor's option liquid or dry fertilizer may be used. All grass shall be fertilized and watered in during the planting operation using the application rate and method directed by the manufacturer of the fertilizer used.

E. Guarantee and Maintenance of Grassing:

1. Guarantee:

a. The Contractor shall guarantee all grasses for a period of six months from the date of acceptance of the completed overall project from the Contractor.

b. The Contractor shall guarantee the grasses shall be alive, free of disease and have a healthy appearance at the end of the guarantee period.

c. During the guarantee period, the Contractor shall replace any grass which is diseased, dead or visually unsightly within 3 days when requested in writing.

2. Maintenance:

a. The Contractor shall maintain all grass guaranteed above for the period of the guarantee. Such maintenance shall include filling, leveling, and repairing eroded areas, replanting areas where the establishment of the grass does not develop satisfactorily, and watering as required. In no case shall such maintenance be less than 3 weeks for watering and 6 weeks for remaining maintenance care.

b. The maintenance of the grass shall include, regular mowing, one application of approved dry or liquid fertilizer to the grasses guaranteed above. The fertilizer shall be applied and watered in as directed by the manufacturer. The time of fertilizing shall be approved.

c. The Contractor shall be required under the maintenance of the guaranteed grasses to safeguard and take all possible precautions against damage from the elements and other possible damage. The Contractor shall be required to clean up the effected landscape area during the maintenance period due to any such event. The Contractor shall not be responsible to replace grasses

properly protected under this item of the specifications, damaged by the events beyond his control.

2.0.2. PLANTS AND TREES: (If required by relocation and if shown on the drawings)

A. Grade Standards and Quality:

1. Quality of all plants shall be at least equal to that defined as No. 1 by the State Plant Board of Florida in Grades and Standards for Nursery Plants, Part I, 1963 Revised Edition, and Part II, Palms and Trees.

2. All plants shall be sound, healthy and vigorous, well branched and densely foliated when in leaf. They shall have healthy, well developed root systems and shall be free of disease and insect pests, eggs or larvae.

3. No plants will be accepted unless they are healthy and show satisfactory foliage conditions.

4. All plants shall conform to the measurements specified or indicated on the Drawings except that up to 10 percent of undersized plants in any one variety or grade may be used provided there are sufficient oversized plants to make the average equal to or above specified grade. Plants larger than specified may be used if approved by the Engineer of Record, but use of such plants shall not increase the Contract price. The spread of roots or ball of earth for larger plants shall be increased in proportion to the size of the plant.

B. Plant Designation: With reference to method of cultivation, root system status, etc., plants for landscaping shall be classified under the following designations:

1. Balled and Burlapped:

a. Plants so classified shall be dug with firm natural root balls of earth, of sufficient diameter and depth to include most of the fibrous roots. The root ball of these plants shall be properly wrapped with burlap sack material and remain protected and moist until they are planted. Plants whose burlapped balls have cracked or become sagging, or plants showing scars from rope and cable marks or other improper handling are not acceptable. All balled and burlapped plants which cannot be planted immediately upon delivery shall be set on the ground and shall be well protected with soil, wet moss, or other acceptable material. The plants shall be set with the burlap cover intact and with the burlap showing, until inspection. At final inspection, the burlap may be cut away to ground level and completely covered with soil.

b. It is required that, balled and burlapped materials, 1½ inches or more in caliper, shall be root-pruned at least 45 days before being dug and such fact shall be certified on accompanying invoices. Where, in the opinion of the Engineer of Record following his inspection of the grower's stock, adequate root pruning is being obtained by the grower's general cultivating practices, he may consider such fact as meeting this requirement.

2. Wire Balled and Burlapped:

a. Plants grown in soil of a loose texture which does not readily adhere to the root system shall have sound hog wire placed around the burlapped ball before the plant is removed from the excavation. The wire shall be looped and tensioned until the burlapped ball is substantially packaged so as to prevent loosening of the soil around the roots during handling.

b. Wire balled and burlapped plants shall otherwise comply with the requirements for balled and burlapped plants described in 1 above.

3. Container Grown Plants:

a. Container grown plants shall have been grown in a container large enough and for sufficient time for the root system to have developed well enough to hold its soil together firm and whole. No plants shall be loose in the container. Plants which have become pot bound or for which the top system is too large for the size of the container, will not be acceptable.

b. All containers with vertical sides shall be cut and opened fully, in a manner such as will not damage the root system. Container grown plants shall not be removed from the container until immediately before planting, when all due care shall be taken to prevent damage to the root system.

4. Bare-Root Plants: No bare-root plants shall be used unless specifically required by the Engineer of Record or called for on the drawings.

5. Palms:

a. Palm species shall have the roots adequately wrapped before transplanting except when they are container grown. Burlapping will not be required if the palm is carefully dug from marl or heavy soil that it adheres to the roots and retains its shape without crumbling. During transporting and after arrival, root balls of palm shall be carefully protected from the wind and exposure to the sun. After delivery to the job site, if palm is not planted within 24 hours, the root ball shall be covered with a moist material.

b. All moving of sabal, coconut and royal palms shall be in accordance with Heavy Trunk Palms, as described in "Florida Grades and Standards for Nursery Plants, Part II".

6. Rooted Cuttings: Cuttings shall be kept moist at all times. They shall be rooted in a medium other than wood shavings and have at least 4 root tips of ½-inch or longer.

C. Transportation and Inspection:

1. Plant transportation shall comply with all Federal and State regulations therefor and, upon delivery at the site, all plants shall be inspected for conformity to specifications and for handling damage. Rejected plants shall be removed immediately from the site by the Contractor.

2. Foliage trees when moved in full leaf shall be treated with "Wilt Pruf" or "Plantguard", as they are loaded at their growing site. This material shall be applied to the entire tree with a fine spray at a dilution of 1 part "Wilt Pruf" or "Plantguard" to 15 parts of water.

3. Trees which have to be transported in excess of 10 miles to reach the job site, shall be covered with a 70 percent shade-cloth-tarp, or equal in order to prevent wind burn.

4. Immediately following the delivery and inspection at the job, all plants with exposed roots shall be heeled-in moist soil or peat moss. All plants heeled-in shall be properly maintained by the Contractor until planted.

5. The balls of balled and burlap plants, must, if not immediately planted after delivery and inspection, be adequately protected by covering until removed for planting, in a manner appropriate to prevailing conditions and in accordance with accepted horticultural practices. The Contractor shall, in loading, unloading, or handling of plants, exercise utmost care to prevent injuries to the branches or roots of the plants. The solidity of the ball of balled and burlapped plants shall be carefully preserved. Handling of the plant by parts other than the ball shall be cause for rejection of such plant. Bare root plants which have been heeled-in shall be properly handled during the distribution of planting beds.

D. Planting Materials:

1. Planting Soil: Planting soil shall be a pulverized mixture of 50% rock free siliceous sand and 50% clean mulch from an approved source. All ingredients shall be free of sticks, roots, rocks, lumps, or other impurities or debris. All soil shall be delivered in a loose friable condition.

2. Fertilizer:

   a. Fertilizer shall be as specified in subsection 2.01-D, herein.

   b. Fertilizer shall be selected and used as recommended by the manufacturer for each particular plant.

3. Mulch: Mulch shall be ground bark, bark peelings, peat, hay or straw. Cypress mulch shall not be used because its harvest degrades cypress wetlands.

4. Anti-Desiccant: Anti-desiccant shall be "Wilt Pruf", "Plantguard", or equal, delivered in the manufacturer's containers and used in accordance with the manufacturer's instructions.

5. Water:

   a. Water for the irrigation of the new plantings during the progress of construction shall be provided by the Contractor in accordance with the provisions previously specified.

   b. The Contractor shall furnish adequate watering equipment and shall continue watering to properly establish the new plantings throughout the maintenance period.

6. Wire: Wire for the bracing and guying shall be pliable No. 12 or No. 14 gauge galvanized soft steel wire.

7. Stakes and Ties: Stakes and ties shall be provided in accordance with the requirements of PART 3 EXECUTION, below.

PART 3 - EXECUTION

3.0.1. EXCAVATION OF PLANT HOLES:

A. Plant hole excavations shall be roughly cylindrical in shape, with the sides approximately vertical. Plants shall be centered in the hole, with the trunk location as shown in the Plans.

B. Bottoms of the holes shall be loosened at least 6-inches deeper than the required depth of excavation.

C. Holes for balled and burlapped and wire balled and burlapped plants shall be large enough to allow at least 8-inches of backfill around the earth ball. For root balls over 18-inches in diameter, this dimension shall be increased to 12-inches.

D. Where excess material has been excavated from the plant hole, the excavated material shall be disposed of as and where directed by the Engineer of Record.

E. PREPARATION OF GROUND

1. Four inches minimum thickness of topsoil shall be placed over the areas off the right of way on which the sod is to be placed.

F. APPLICATION OF FERTILIZER

1. Before applying fertilizer, the soil pH shall be brought to a minimum range of 6.0 - 7.0.

2. The fertilizer shall be spread uniformly over the area to be sodded at the rate of 500 pounds per acre, by a spreading device capable of uniformly distributing the material at the specified rate. Immediately after spreading, the fertilizer shall be mixed with the soil to a depth of approximately 4-inches.

3. On steep slopes, where the use of a machine for spreading or mixing is not practicable, the fertilizer shall be spread by hand and raked in and thoroughly mixed with the soil to a depth of approximately 2-inches.

G. PLACING SOD

1. The sod shall be placed on the prepared surface, with edges in close contact and shall be firmly and smoothly embedded by light tamping with appropriate tools. Sod areas abutting concrete, asphalt or other applicable surfaces shall have the soil depressed at edges of the pavements so that the cut grass does not protrude over 2-inches above the adjacent property.

2. Where sodding is used in drainage ditches, the setting of the pieces shall be staggered so as to avoid a continuous seam along the line of flow. Along the edges of such staggered areas, the offsets of individual strips shall not exceed 6-inches. In order to prevent erosion caused by vertical edges at the outer limits, the outer pieces of sod shall be tamped so as to produce a featheredge effect.

3. On steep slopes, the Contractor shall, if so directed by the Engineer of Record, prevent the sod from sliding by means of wooden pegs driven through the sod blocks into firm earth, at suitable intervals.

4. Sod which has been cut for more than 72 hours shall not be used unless specifically authorized by the Engineer of Record after his inspection thereof. Sod which is not planted within 24 hours after cutting shall be stacked in an approved manner and maintained and properly moistened. Any pieces of sod which, after placing, show an appearance of extreme dryness shall be removed and replaced by fresh, uninjured pieces.

5. Sodding shall not be performed when weather and soil conditions are, in the Engineer of Record's opinion, unsuitable for proper results.

H. WATERING

1. The areas on which the sod is to be placed shall contain sufficient moisture, as determined by the Engineer of Record, for optimum results. After being placed, the sod shall be kept in a moist condition to the full depth of the rooting zone for at least 2 weeks. Thereafter, the Contractor shall apply water as needed until the sod roots and starts to grow for a minimum of 60 days (or until final acceptance whichever is latest).

3.0.2. UNDERGROUND OBSTRUCTIONS:

A. In the event that rock, underground construction work, utility lines or obstructions out of the ordinary are encountered in any plant hole excavation, alternative locations will be selected by the Engineer of Record.

B. Where locations cannot be changed and the obstructions may be removed, the obstructions shall be removed to a depth of not less than 3-feet below grade and not less than 6-inches below bottom of balls or roots when plant is properly set at the required grade.

3.0.3. SETTING OF PLANTS:

A. When lowered into the hole, the plant shall rest on a prepared hole bottom such that the roots are level with, or slightly above, the level of their previous growth and so oriented such as to present the best appearance. The Contractor, when setting plants in holes, shall make allowances for any anticipated settling of the plants.

B. The backfill shall be made with planting mixture as specified hereinbefore and shall be firmly rodded and watered-in, so that no air pockets remain. The quantity of water applied immediately upon planting shall be sufficient to thoroughly moisten all the backfilled earth. Plants shall be kept in a moistened condition for the duration of the Contract.

3.0.4. STAKING AND GUYING:

A. When called for on the Drawings or directed by the City, plants shall be staked in accordance with the following provisions:

1. Small Trees: For trees and shrubs of less than 1-inch caliper, the size of stakes and the method of tying shall be such as to rigidly support the staked plant against damage caused by wind action or other effects. Trees larger than 1-inch and smaller than 1½ inch caliper shall be staked with a 2-inch square stake driven at least 24inches in the ground and extending to the crown of the plant. The plant shall be firmly fastened to the stake with two strands of 14 gauge soft wire, enclosed in rubber hose, or other approved covering. The wire shall then be nailed or stapled to the stake to prevent slippage.

2. Medium Trees: All trees, other than palm trees, larger than 1½-inch caliper and smaller than 2½-inch caliper shall be staked with two or more, 2-inch by 2-inch stakes, 8-feet long, set 2-feet in the ground. The tree shall be midway between the stakes and held firmly in place by two strands of 12 gauge wire, applied as specified above for single stakes. Tie wires shall be tightened and kept tight by twisting.

3. Large Trees: All trees, other palm trees, larger than 2½-inch caliper, shall be guyed from at least 3 points with double strands of 12 gauge wire. Guy wires shall be anchored to 2-inch by 4-inch stakes, 24-inches long, driven into the ground at least 2-feet and sufficient that the top of the stake is at least 3 inches below the finished ground level. In firm rock soils, No. 4 steel reinforcing rods or ½-inch pipe may be used instead of 2 by 4's. Tie wires shall be securely fastened to the tree by means of a collar of rubber hose, or other approved material. Guy wires shall be tightened and kept tight by twisting.

4. Palm Trees: Brace palm trees with three or more 2-inch by 4-inch wood braces, toenailed to cleats which are securely banded at two points to the palm, at a point at least 6-feet above the ground. The trunk shall be padded with five layers of burlap under the cleats. Braces shall be approximately equidistantly spaced and secured underground with 2-inch by 4-inch by 24-inch stake pads. In firm rocky soils, No. 4 steel reinforcing rods or ½-inch pipe is acceptable.

3.0.5. PRUNING:

All broken or damaged roots shall be cut off smoothly and the tops of all trees shall be pruned in a manner complying with standard horticultural practice. At the time pruning is completed, all remaining wood shall be alive. All cut surfaces of 1-inch or more in diameter, above the ground, shall be treated with an approved commercial tree paint.

3.0.6. MULCHING:

Within one week after the planting, mulch material, approved by the Engineer of Record, shall be uniformly applied to a minimum thickness of 2-inches, over the entire area of the backfilled hole or bed. The mulch shall be maintained continuously in place until the time of final inspection. Mulch is not required if other ground surface covers, such as rooted cuttings are called in the Plans.

3.0.7. INSPECTION:

On completion of the work, the Engineer of Record will inspect all planting work. The Contractor shall repair or replace all defective work, whichever is unsatisfactory to the Engineer of Record or the City. Preliminary acceptance of all plant materials will be given only after the materials are planted and after meeting all requirements prescribed herein.

3.0.8. MAINTENANCE:

A. Maintenance shall begin immediately after each plant is planted and shall continue until all work under this Contract has been completed and final acceptance is obtained from the City, however, the minimum period of this maintenance shall not be less than 60 days even if it extends beyond final acceptance of contract. Plants shall be watered, mulched, weeded, pruned, sprayed, fertilized, cultivated and otherwise maintained and protected. Settled plants shall be reset to proper grade position, planting saucer restored and dead material removed. Guys shall be tightened and repaired.

B. Defective work shall be corrected as soon as possible after it becomes apparent. Upon completion of planting, the Contractor shall remove from the site excess soil and debris, and repair any damage to structures, etc., resulting from planting operations.

3.0.9. GUARANTEE:

The Contractor shall guarantee all planting work for a period of six months after the date of final acceptance. During the guarantee period, the Contractor shall replace at no cost to the City any plant that dies or is not established within the guarantee period. Any plants missing or defective shall be furnished or replaced in a manner satisfactory to the City.

END OF SECTION

DIVISION 3 – CONCRETE

03300 CAST-IN-PLACE CONCRETE, REINFORCING AND FORMWORK

PART 1 – GENERAL 1.0.4.

SCOPE OF WORK

A. Provide all labor, materials, equipment, fabrication, incidentals, transportation, placing and supervision necessary to complete all cast-in-place concrete work, its finishing, and all related work called for by the Contract Drawings and/or specifications, or reasonably inferable from either or both, as needed for a complete and proper installation.

B. Work affecting this Section includes, but is not limited to:

1. Shop Drawings-Per General Conditions and as specified herein.
2. Materials and storage thereof.
3. Reinforcing-Bar and fabric.
4. Accessories of every nature, including form tie system.
5. Formwork and removal thereof, including shoring and reshoring.
6. Concrete proportions and mixes.
7. Placing of concrete.
8. Admixtures.
9. Joints, metal joint screeds and joint fillers.
10. Finishes of all types.
11. Protection and curing.
12. Patching.
13. Laboratory Testing.

1.0.5. QUALITY ASSURANCE

A. Unless otherwise indicated, all materials, workmanship and practices shall conform to the requirements of ACI 301-96 "Specifications for Structural Concrete for Buildings", except as modified by supplemental requirements hereinafter.

B. All reinforced concrete structures shall conform to ACI 301, ACI 302.1R, ACI 305, ACI 306, ACI 315, ACI 318, and ACI 350.

C. Concrete shall be composed of cement, fine aggregate, coarse aggregate, and water, so proportioned and mixed as to produce a plastic workable mixture in accordance with all requirements under this Section suitable to the specific conditions of placement.

D. Work shall be performed in accordance with Contract Documents, Drawings, and/or City of Opa-Locka Public Works Manual Specifications and Standard Details, in a neat and accurate manner. It is the intent of the City to obtain a complete and working installation according to these Specifications, and any items of labor, equipment, or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the project plans or stated herein.

1.0.6. STANDARDS

A. ACI 301-96 Specifications for Structural Concrete.

B. ACI 318-95 Building Code Requirements for Reinforced Concrete.

C. Florida Building Code, latest edition.

D. ACI 117-90 Standard Specifications for Tolerances for Concrete Construction and Materials

PART 2 – PRODUCTS

2.0.3. GENERAL

B. All reinforced concrete structures shall conform to ACI 301, ACI 302.1R, ACI 305, ACI 306, ACI 315, ACI 318, and ACI 350.

C. Concrete shall be composed of cement, fine aggregate, coarse aggregate, and water, so proportioned and mixed as to produce a plastic workable mixture in accordance

with all requirements under this Section suitable to the specific conditions of placement.

2.0.4. CEMENT

D. The cement shall be a standard brand of Portland cement manufactured within the continental limits of the United States. It shall meet the requirements of ASTM C150 "Portland Cement" and shall be Type II.

E. The total alkalies in the cement (calculated as the percentage of NA2O plus 0.658 times the percentage of K2O) shall not exceed 0.40%.

F. The proposed Portland Cement shall not contain more than 8% tricalcium aluminate and more than 12% tetracalcium aluminoferrite.

G. Different types of cement shall not be mixed nor shall they be used alternately except when authorized in writing by the City or their designee. Different brands of cement or the same brand from different mills may be used alternately. A resubmittal will be required if different cements are proposed during the Project.

H. Cement shall be stored in a suitable weather-tight building so as to prevent deterioration or contamination. Cement which has become caked, partially hydrated, or otherwise damaged will be rejected.

2.0.5. FLY ASH

A. If fly ash is used as supplementary cementitious material, it shall meet the physical and chemical requirements of ASTM C618 Class F, except that the loss of ignition shall not exceed 4%. Sampling and testing of fly ash shall follow the requirements of ASTM C311.

B. For Type A1 concrete as required for use in environmental engineering concrete structures, inclusion of fly ash or slag cement in the concrete mix is mandatory

2.0.6. SLAG CEMENT

D. Slag cement shall meet the requirements of ASTM C989 including tests for effectiveness of slag in preventing excessive expansion due to alkali-aggregate reactivity as described in Appendix X-3 of ASTM C989.

E. For Type A1 concrete as required for use in environmental concrete structures, i.e., process structures or fluid containing structures, inclusion of fly ash or slag cement in the concrete mix, is mandatory.

2.0.7. WATER

B. The water used in mixing the concrete shall be from potable water supplies that are approved by the Florida Department of Health.

2.0.8. AGGREGATES

A. Fine Aggregate (Sand) in the various concrete mixes shall consist of natural or manufactured siliceous sand, clean and free from deleterious substances, and graded within the limits of ASTM C33.

B. Coarse Aggregate: Coarse aggregate shall consist of gravel, broken stone or local limerock. Coarse aggregate shall be size #57 or #67 as graded within the limits given in ASTM C33 unless otherwise specified. It shall be free from adherent coatings.

C. Aggregates shall be tested for gradation by sieve analysis tests in conformance with ASTM C136.

D. When tested for soundness in accordance with ASTM C88, the loss resulting after five cycles shall not exceed 10 percent for fine or coarse aggregate when using either magnesium sulfate or sodium sulfate.

E. When tested in accordance with "Potential Reactivity of Aggregates (Chemical Method)" (ASTM C289), the ratio of silica released to reduction in alkalinity shall not exceed 1.0.

F. When tested in accordance with "Organic Impurities in Sands for Concrete" (ASTM C40), the fine aggregate shall produce a color in the supernatant liquid no darker than the reference standard color solution.

G. When tested in accordance with "Resistance to Abrasion of Small size Coarse Aggregate by Use of the Los Angeles Machine" (ASTM C131), the coarse aggregate shall show a loss not exceeding 42 percent after 500 revolutions, or 10.5 percent after 100 revolutions.

2.0.9. ADMIXTURES

A. Air entraining agent shall be added to all concrete unless noted otherwise. The agent shall provide entrained air in the concrete in accordance with ASTM C260.

B. The following admixtures are required or used for water reduction, slump increase, and/or adjustment of initial set. Admixtures permitted shall confirm to the requirements of ASTM C494. Admixtures shall be non-toxic after 30 days and shall be compatible with and made by the same manufacturer as the air-entraining admixtures.

1. Water reducing admixture shall conform to ASTM C494, Type A and shall contain no more than 0.05% chloride ions. Acceptable products are "Eucon Series" by the Euclid Chemical Company, "Master Pozzolith Series" by BASF, and "Plastocrete Series" by Sika Corporation.

2. High range water reducer shall be sulfonated polymer conforming to ASTM C494, Type F or G. The high range water reducer shall be added to the concrete at either the batch plant or at the job site and may be used in conjunction with a water reducing admixture. The high range water reducer shall be accurately measured and pressure injected into the mixer as a single dose by an experienced technician. A standby system shall be provided and tested prior to each day's operation of the job site system. Concrete shall be mixed at mixing speed for a minimum of 100 mixer revolutions after the addition of the high range water reducer. Acceptable products are "Eucon 37" or Plastol 5000 by the Euclid Chemical Company, "Master Rheobuild 1000 or Master Glenium Series" by BASF, and "Daracem 100 or Advaflow Series" by W.R. Grace. High range water reducer shall be mandatory for class A1 concrete intended for placement in walls.

3. A non-chloride, non-corrosive accelerating admixture may be used where specifically approved by the City or their designee. The admixture shall conform to ASTM C494, Type C or E, and shall not contain more chloride ions than are present in municipal drinking water. The admixture manufacturer must have longterm noncorrosive test data from an independent testing laboratory (of at least a year's duration) using an acceptable accelerated corrosion test method such as that using electrical potential measures. Acceptable products are "Accelguard 80/90 or NCA" by the Euclid Chemical Company and "Daraset" by W.R. Grace.

4. A water reducing retarding admixture may be used where specifically approved by the Engineer. The admixture shall conform to ASTM C494, Type D and shall not contain more than 0.05% chloride ions. Acceptable products are "Eucon NR or Eucon Retarder 100" by the Euclid Chemical Company, "Pozzolith Retarder" by BASF, and "Plastiment" by Sika Corporation.

C. Admixtures containing calcium chloride, thiocyanate or more than 0.05 chloride ions are not permitted

C. Portland cement and reinforcing steel: Comply with ACI 301 and, with all modifications and supplements thereto listed in Part 3 of this specifications.

2.0.10. CONCRETE MIX DESIGN

A. The proportions of cement, aggregates, admixtures, and water used in the concrete mixes shall be based on the results of field experience or preferably laboratory trial

mixes in conformance with Section 5.3. "Proportioning on the Basis of Field Experience and/or Trial Mixtures" of ACI 318 and ACI 350. When trial mixes are used, they shall also conform to Article 3.01 of this Section of the Specifications. If field experience records are used, concrete strength results shall be from concrete mixed with all of the ingredients proposed for use on job used in similar proportions to mix proposed for use on job. Contractor shall submit verification confirming this stipulation has been followed. Field experience records and/or trial mix data used as the basis for the proposed concrete mix design shall be submitted to the City or their designee along with the proposed mix.

B. Structural concrete shall conform to the following requirements. Cementitious materials refer to the total combined weight of all cement, fly ash, and slag cement contained in the mix.

1. Compressive Strength (28 day)

CONCRETE CLASS	COMPRESSIVE STRENGTH
Concrete Class A1	4,500 psi (minimum)
Concrete Class A2	4,000 psi (minimum)
Concrete Class B	3,000 psi (minimum)

2. Water/cementitious materials ratio, by weight

CONCRETE CLASS	MAXIMUM	MINIMUM
Concrete Class A1	0.42	0.39
Concrete Class A2	0.45	0.39
Concrete Class B	0.50	0.39

3. Slump Range

   a. 4" nominal unless high range water reducing admixture is used.

   b. 8" max if high range water reducing admixture is used

4. Air Content

CONCRETE CLASS	COMPRESSIVE STRENGTH
Concrete Class A1, A2	6% ± 1.5%
Concrete Class B	3% Max (non air-entrained)

2.0.11. REINFORCING STEEL

A. Bar reinforcing shall conform to the requirements of ASTM A615 for Grade 60 Billet Steel reinforcing. All reinforcing steel shall be from domestic mills and shall have the manufacturer's mill marking rolled into the bar which shall indicate the producer, size, type, and grade. All reinforcing bars shall be deformed bars. Smooth reinforcing bars shall not be used unless specifically called for on Drawings.

B. Reinforcing supports shall include all necessary chairs, slab bolsters, concrete blocks, tie wires, dips, supports, spacers, and other devices to position reinforcing during concrete placement. Wire bar supports shall be plastic protected (CRSI Class 1).

C. Precast concrete blocks to space and support the reinforcing bars may be used to support and position bottom reinforcing steel. Use concrete blocks with a strength equal to or greater than the concrete in which they are to be placed and have wires cast into them for fastening to the reinforcing bars. Moist-cure the blocks for at least three days.

D. Reinforcing steel shall be accurately positioned as shown on the Drawings and shall be supported and wired together to prevent displacement, using annealed iron wire ties or suitable clips at intersections. All reinforcing steel shall be supported by concrete, plastic or plastic protected (CRSI Class 1) metal supports, spacers or metal hangers which are strong and rigid enough to prevent any displacement of the reinforcing steel. Where concrete is to be placed on the ground, supporting concrete blocks (or dobies) shall be used in sufficient numbers to support the reinforcing bars without settlement. In no case shall concrete block supports be continuous.

E. All reinforcement shall be entirely free of rust, scale, grease, or other coating which might destroy or reduce its bond with the concrete.

F. Reinforcing of curbs and gutters shall be in accordance with City of Opa-Locka Public Works Manual Standard Details.

G. Welded wire fabric reinforcing shall conform to the requirements of ASTM A1064. Welded wire fabric shall be 6X6-W1.4xW1.4 steel to be used in all sidewalks and driveways

2.0.12. REINFORCING STEEL

A. Bar reinforcing shall conform to the requirements of ASTM A615 for Grade 60 Billet Steel reinforcing. All reinforcing steel shall be from domestic mills and shall have the manufacturer's mill marking rolled into the bar which shall indicate the producer, size, type, and grade. All reinforcing bars shall be deformed bars. Smooth reinforcing bars shall not be used unless specifically called for on Drawings.

B. Reinforcing supports shall include all necessary chairs, slab bolsters, concrete blocks, tie wires, dips, supports, spacers, and other devices to position reinforcing during concrete placement. Wire bar supports shall be plastic protected (CRSI Class 1).

C. Precast concrete blocks to space and support the reinforcing bars may be used to support and position bottom reinforcing steel. Use concrete blocks with a strength equal to or greater than the concrete in which they are to be placed and have wires cast into them for fastening to the reinforcing bars. Moist-cure the blocks for at least three days.

D. Reinforcing steel shall be accurately positioned as shown on the Drawings and shall be supported and wired together to prevent displacement, using annealed iron wire ties or suitable clips at intersections. All reinforcing steel shall be supported by concrete, plastic or plastic protected (CRSI Class 1) metal supports, spacers or metal hangers which are strong and rigid enough to prevent any displacement of the reinforcing steel. Where concrete is to be placed on the ground, supporting concrete blocks (or dobies) shall be used in sufficient numbers to support the reinforcing bars without settlement. In no case shall concrete block supports be continuous.

E. All reinforcement shall be entirely free of rust, scale, grease, or other coating which might destroy or reduce its bond with the concrete.

F. Curbs and gutters shall be in accordance with Miami Dade County or FDOT's Standard Details.

G. Welded wire fabric reinforcing shall conform to the requirements of ASTM A1064. Welded wire fabric shall be 6X6-W1.4xW1.4 steel to be used in all sidewalks and driveways.

2.0.13. FORMS

A. Burlap mats: Conform to AASHTO Specification M182. (Burleen non-staining mats.)

B. Epoxy bonding agent: A two (2) component, solvent free, moisture insensitive structural epoxy adhesive conforming to ASTM C881 Type II, Sikadur 32 Hi-Mod, as manufactured by Sika Corp., Concresive 1090 Liquid by Master Builders or approved equal.

C. Anchor bolts, nuts and washers shall be American made 316 stainless steel.

D. Dovetail slots: Galvanized steel, 22 gauge, 1"x 1", with 5/8" throat, fiber filled.

E. Forms:

1. Plywood Forms: PS-1, B-B Concrete Form, Class I, exterior type, mill oiled and edge sealed. Thickness shall be as required to support concrete at the rate placed, but not less than 3/4".

2. Steel Forms: Uncoated steel, 3/16"-inch minimum thickness, fabricated to close tolerances, protected only by the specified release agent, braced so as not to dent, bend or dimple under wet concrete loads, vibrator impact and tool impact. Maintain steel forms in rust free condition by use of steel wool and light grinding, followed by coats of the specified release agent. Forms should be adjustable to be brought into true alignment without steps or ridges.

F. Form release agent:

1. For plywood forms use a natural non-petroleum base, non-staining and nonretarding release agent that will effectively prevent absorption of moisture and prevent bond with concrete and leaves the concrete with a paintable surface.

2. For steel forms, use an approved material that will not stain, color or otherwise affect the finish of the concrete. Form coating shall not be detectable on finished surfaces.
3. Round column forms: Provide seamless fiber forms with the three plies nearest to the interior surface of the form deckled or scarfed and overlapped to minimize spiral gaps or seams on the column surface.

G. Form Ties: Steel rod type with integral waterstops and cones, and with ends or end fasteners that can be removed without spalling the concrete and which leave a hole equal in depth to the required reinforcement clearance, but not less than 2 inches from the formed face of the concrete. Wire tie, banding wire and wood spreaders will not be permitted.

H. Form Inserts:

1. Bevel or chamfer strips: Wood or non-staining plastic, 3/4" wide on each leg at exposed edges of concrete members, unless otherwise noted on plans.

2. Tongue and Groove Joint Forms: Minimum 24 gauge with steel stakes and splice plates. Forms shall be designed for joints not to receive a poured seal.

3. Pipe hangers and other utility supports: AISI Type 316 stainless steel.

2.0.14. MORTAR

A. Standard premixed mortar conforming to ASTM C387, Type S, or proportion 1 part Portland cement to 2 parts clean, well-graded sand which will pass a 1/8-inch screen. Portland Cement shall conform ASTM C150.

B. Sand shall conform to AASHTO M45.

C. Admixtures may be used not exceeding the following percentages of weight of cement:

1. Hydrated lime: 10 percent

2. Diatomaceous earth or other inert materials: 5 percent.

D. Consistency of mortar shall be such that it will readily adhere to concrete

2.0.15. GROUT

A. Non-Shrink Grout: Non-shrink, non-metallic grout conforming to ASTM C 1107 Grade B or Grade C only. Grout must meet ASTM C 1107 at a temperature range of 50 F to 90 F at a flowable consistency. A minimum compressive strength of 5,000 pounds per square inch (psi) shall be obtained at 28 days.

B. Grout for Surface Repair and Bond Coat:

1. For repair, one part Portland cement to two parts fine sand, and a 50%of water and 50% Acryl 60 or equal (Thoroseal or Acryl Set Bonding Agent by Master Builders) to produce a stiff mortar.

2. For bond coat, one part Portland cement to one part sand, and a 50% of water and 50% Acryl 60 or equal (Thoroseal or Acryl Set Bonding Agent) to produce a slurry mix.

C. Moisture Barrier: Kraft paper and glass reinforcing fibers sandwiched between 2 layers of polyethylene film with a permeance rating of maximum 0.1 as per ASTM E-96, Procedure A.

D. Expansion Joint Filler:

1. Preformed expansion joint filler shall be of the non-extruding and resilient bituminous type and conform to the requirements of AASHTO Designation M 213.

2. Expansion joint filler shall be gray neoprene sponge rubber that conforms to AASHTO Designation M 153, Type I.

Q. Joint Sealant Compound: Non-sag, 2 component, solvent free, moisture insensitive, flexible, epoxy resin conforming to the requirements ASTM C920-87 Type M, Grade NS. Additionally, the sealant must be recommended by the manufacturer to perform under continuous immersion in water.

R. Polyurethane Elastomeric Sealant: Sikaflex-2c, NS/SL or approved equal. Provide a 2- component, premium-grade, polyurethane-based, elastomeric sealant. It is principally a chemical cure in a non-sag and self-leveling consistency. Sealant shall meet ASTM C-920 and Federal Specifications TT-S-00227E.

1. Joint Movement: +50%.

S. Waterstops:

1. Polyvinyl chloride (PVC): Conforming to the requirements of U.S. Army Corps of Engineers Specification CRD-C-572 and of the following type:

a. Expansion Joints: 9-inches by 3/8-inch, ribbed center bulb.

b. Construction Joint: 9-inches by 3/8-inch, flat ribbed.

c. Only where specified on plans at construction and expansion joints: 9-inches by 3/8-inch, split ribbed.

2. Thermoplastic butt splices shall be performed using approved prefabricated pretested fittings; do not lap splice waterstops.

3. Waterstops for impermeable joints between prefabricated structures Non-hydro expansive based on bituminous resins to seal horizontal and vertical joints; hydrostatic load resistance 7 m column of water; not soluble in water; flashpoint 315degree Celsius ASTM D92; elongation capacity at 20 degree Celsius 230% compared to its initial dimension. Suitable for tunnels, water treatment plants, sewage, septic tanks, tanks, pipelines, sewer trunk lines and for any prefabricated concrete structure in general.

T. Fiber Reinforcement: Fiber reinforcement shall not be used in the concrete unless ordered buy the Engineer in writing. It shall consist of 100% virgin polypropylene fibrillated fiber dosage of 2 lbs. per cubic foot.

1. Compressive Strength: 1 psi (.006895 M Pa), ASTM C-39.

2. Flexural Strength: 288 psi (2.0 M Pa) after 7 days, 390 psi (2.7 M Pa) after 28 days; ASTM C-78.

3. Splitting Tensile Strength: 194 psi (1.3 M Pa) after 7 days, and 290 psi (2.0 M Pa) after 28 days; ASTM C-496.

4. Source: Fiber mesh Micro-Reinforcement System by Fiber mesh Company, Division of Synthetic Industries, Inc. Or approved equal.

U. Provide other materials, not specifically described but required for a complete and proper installation, as selected by the Contractor subject to the approval of the Engineer.

V. A shrinkage reducing admixture (Teraguard) or equivalent at the rate of 2.2% by weight of cement may be used in the concrete to meet the shrinkage limitations.

W. To protect the concrete slab against the elements, the Engineer may direct the Contractor to spray an evaporation retarder on the finished concrete slab immediately behind the cement finishing process at no additional cost to the City. This is not a curing compound.

PART 3 – EXECUTION 3.0.1.

READY MIX CONCRETE

A. Concrete obtained from a ready-mix plant shall conform to the requirements of these Specifications, and all applicable portions of ASTM C94 "Ready-Mixed Concrete".

3.0.2. MIXING AND DELIVERING CONCRETE

D. Produce a completely uniform mixed concrete in a truck mixer for 70 to 100 revolutions at the mixing speed designated by the truck manufacturer.

E. Prior to starting the discharge of the concrete at the jobsite, when water is added, record the added quantity and mix the concrete 30 additional drum mixing revolutions. Do not make more than two mix adjustments. Seek approval from the Engineer prior to using a central mixer and depositing the batch into a truck mixer.

F. Transit Time Using Agitator Trucks: The maximum allowable transit time between the initial introduction of water into the mix and completely discharging all the concrete from the truck will be 60 minutes. The maximum transit time can be 90 minutes if water reducing and retarding admixture (Type D, Type G, or Type II) is used. Reject concrete exceeding the maximum transit time.

G. All the concrete in a load must be in its final placement position a maximum of 15 minutes after the transit time has expired unless a time extension is approved by the Engineer.

H. Adding Water to Concrete at the Placement Site: Water may be added at the placement site provided the addition of water does not exceed the water to cementitious materials ratio as defined by the mix design. After adding water, perform a slump test to confirm the concrete is within the slump tolerance range stated in Section 2.01. If the slump is outside the tolerance range, reject the load. If an adjustment is made at the concrete production facility, perform a slump test on the next load to ensure the concrete is within the slump tolerance range. Do not place concrete represented by slump test results outside of the tolerance range. Include water missing from the water storage tanks upon arrival at the project site in the jobsite water added

3.0.3. PLACING CONCRETE

B. Weather Restrictions

1. Concreting in Cold Weather: Do not place concrete when the air temperature at placement is below 40°F. The requirements of concreting in cold weather do not apply to precast concrete mixing and placement operations occurring in a temperature-controlled environment.

2. Concreting in Hot Weather: Hot weather concreting is defined as the production, placing, and curing of concrete when the concrete temperature at placing exceeds 85°F but is less than 100°F . Unless the specified hot weather concreting measures are in effect, reject concrete exceeding 85°F at the time of placement. Concrete temperature shall be measured per ASTM C1064. Regardless of special measures taken, reject concrete exceeding 100°F. Predict the concrete temperatures at placement time and implement hot weather measures to avoid production shutdown.

B. Inspections Before Placing Concrete: Do not place concrete until the depth and character of the foundation and the adequacy of the forms and falsework have been approved by the Engineer. Do not deposit any concrete until all reinforcement is in place and has been inspected and approved by the Engineer.

C. Exposure to Water: Do not expose concrete other than seal concrete in cofferdams to the action of water before final setting. Do not expose such concrete to the action of salt or brackish water for a period of seven days after placing the concrete. Protect the concrete during this period by keeping salt or brackish water pumped out of cofferdams.

D. Deposit concrete as nearly as possible in its final position. Do not deposit large quantities at one point and then run or work it along the forms. Take special care to fill each part of the forms, to work coarse aggregate back from the face, and to force concrete under and around reinforcing bars without displacing them.

E. Use a method and manner of placing concrete that avoids the possibility of segregation or separation of aggregates. If the Engineer determines that the quality of concrete as it reaches its final position is unsatisfactory, remove it and discontinue or adjust the method of placing until the Engineer determines that the quality of the concrete as placed is satisfactory.

F. Use metal or metal-lined open troughs, chutes, or other means of concrete conveyance which have no aluminum parts in contact with the concrete. As an exception, chutes made of aluminum for ready mixed concrete trucks, no longer than 20 feet, may be used. This exception does not apply to any other means of concrete conveyance. Where steep slopes are required, use chutes that are equipped with baffles or are in short lengths that reverse the direction of movement. Where placing operations would involve dropping the concrete freely more than 5 feet, deposit it through pipes, troughs, or chutes of sheet metal or other approved material. Use troughs, chutes, or pipes with a combined length of more than 30 feet only with the City"s authorization. Keep all troughs, chutes, and pipes clean and free from coatings of hardened concrete by thoroughly flushing them with water after each run or more often if necessary.

G. Place concrete against supporting material that is moist at the time of concrete placement. If additional water is required, uniformly apply it ahead of the concrete placement as directed by the Engineer. The Contractor may use a moisture barrier in lieu of controlling the foundation grade moisture when approved by the Engineer.

H. Place concrete in continuous horizontal layers, approximately 20 inches thick. To avoid obtaining a plane of separation or a cold joint between layers, vibrate the concrete.

I. Vibrate concrete to avoid honeycomb and voids, especially at construction joints, expansion joints, valleys, and ends of form sheets. Use approved pouring sequences.

J. Do not use calcium chloride or any other admixture containing chloride salts in the concrete.

K. The concrete shall be placed on stabilizing or compacted subgrade to such depth that, when it is consolidated and finished, the slab thickness required by the Drawings will be obtained at all points and surface will at no point be below the grade specified for the finished surface, after application of the allowable tolerance. The concrete shall be deposited on the stabilized subgrade in a manner which will require as little re-handling as possible. Placing of the concrete shall be continuous between transverse joints, without the use of intermediate bulkheads.

L. Concrete shall be thoroughly consolidated against and along the faces of all forms, and along the full length and on both sides of all joint assemblies, by means of hand operated, vibrators. Vibrators shall not be permitted to come in contact with joint assembly, the subgrade, or a side form. Vibration at any one location shall not continue so long as to produce puddling or the accumulation of excessive grout on the surface. In no case shall the vibrator be operated longer than 15 seconds in any one location.

M. Coloring of concrete shall be done by dry-mixing the compound and broadcasting over the fresh-poured concrete after it has been struck off.

N. Placing of concrete shall be so regulated that the pressure caused by the wet concrete shall not exceed that used in the design of the forms.

O. All concrete for walls shall be placed through openings in the form spaced at frequent intervals or through tremies (heavy duct canvas, rubber, etc.), equipped with suitable hopper heads. Tremies shall be of variable lengths so the free fall shall not exceed five (5) feet and a sufficient number shall be placed in the form to ensure the concrete is kept level at all times.

P. When forms are removed, surfaces shall be even and dense, free from aggregate pockets or honeycomb. To achieve this, concrete shall be consolidated using mechanical vibration, supplemented by forking and spading by hand in the corners and angle of forms and along form surfaces while the concrete is plastic under the vibratory action. Consolidation shall conform to ACI 309.

Q. Care shall be taken to prevent cold joints when placing concrete in any portion of the work. The concrete placing rate shall be such as to ensure that each layer is placed while the previous layer is soft or plastic, so that the two layers can be made monolithic by penetration of the vibrators. Maximum thickness of concrete layers shall be 18 inches. The surface of the concrete shall be level whenever a run of concrete is stopped.

R. Placement in Wall Forms: Concrete shall not be dropped through reinforcement steel or into any deep form, whether reinforcement is present or not, causing separation of the coarse aggregate from the mortar on account of repeatedly hitting rods or the sides of the form as it falls, nor shall concrete be placed in any form in such a manner as to leave accumulation of mortar on the form surfaces above the placed concrete. In such cases, some means such as the use of hoppers and, if necessary, vertical ducts of canvas, rubber, or metal shall be used for placing concrete in the forms in a manner that it may reach the place of final deposit without separation. In no case shall the free fall of concrete exceed 4 feet below the ends of ducts, chutes, or buggies. Concrete shall be uniformly distributed during the process of depositing, and in no case after depositing shall any portion be displaced in the forms more than 6 feet in horizontal direction. Concrete in forms shall be deposited in uniform horizontal layers not deeper

than 2 feet; and care shall be taken to avoid inclined layers or inclined construction joints where such are required for sloping members. Each layer shall be placed while the previous layer is still soft. The rate of placing concrete in forms shall not exceed 5 feet of vertical rise per hour.

3.0.4. FORMWORK

A. Forms to confine the concrete and shape it to the required lines shall be used wherever necessary. The Contractor shall assume full responsibility for the adequate design of all forms, and any forms which are unsafe or inadequate in any respect shall promptly be removed and replaced at the Contractor 's expense. All design, construction, maintenance, preparation, and removal of forms shall be in accordance with the FBC, ACI 347 and the requirements specified herein.

B. All forms shall be true in every respect to the required shape and size, shall conform to the established alignment and grade, and shall be of sufficient strength and rigidity to maintain their position and shape under the loads and operations incident to placing and vibrating the concrete.

C. Vertical Surfaces: All vertical surfaces of concrete members shall be formed, except where placement of the concrete against the ground is called for by the Engineer.

D. Construction Joints: Concrete construction joints will not be permitted at locations other than those shown or specified, except as may be acceptable to the Engineer. When a second lift is placed on hardened concrete, special precautions shall be taken in the way of the number, location, and tightening of ties at the top of the old lift and bottom of the new to prevent any unsatisfactory effect whatsoever on the concrete.

E. Form Ties: Wire ties for holding forms will not be permitted. No form-tying device or part thereof, other than metal, shall be left embedded in the concrete. Ties shall not be removed in such manner as to leave a hole extending through the interior of the concrete members. The use of snap-ties which cause spilling of the concrete upon form stripping or tie removal will not be permitted. If steel panel forms are used, rubber grommets shall be provided where the ties pass through the form in order to prevent loss of cement paste. Where metal rods extending through the concrete are used to support or to strengthen forms, the rods shall remain embedded and shall terminate not less than 1 inch back from the formed face or faces of the concrete.

F. Careful procedures for the removal of forms shall be strictly followed, and this work shall be done with care so as to avoid injury to the concrete. No heavy loading on green concrete will be permitted. Members which must support their own weight shall not have their forms removed until they have attained at least 75 percent of the 28day strength of the concrete as specified herein. Forms for all vertical walls and columns shall remain in place at least 2 days after the concrete has been placed. Forms for all

parts of the Work not specifically mentioned herein shall remain in place for periods of time as determined by the City or their designee.

3.0.5. REINFORCING STEEL

A. Reinforcing steel shall be accurately formed to the dimensions and shapes shown on the Drawings, and the fabricating details shall be prepared in accordance with ACI 315 and ACI 318, except as modified by the Drawings.

B. Bending or Straightening: Reinforcement shall not be straightened or rebent in a manner which will injure the material. Bars with kinks or bends not shown shall not be used. All bars shall be bent cold, unless otherwise permitted by the Engineer. No bars partially embedded in concrete shall be field-bent except as shown or specifically permitted by the Engineer.

C. Reinforcing steel shall be accurately positioned as shown on the Drawings and shall be supported and wired together to prevent displacement, using annealed iron wire ties or suitable clips at intersections. All reinforcing steel shall be supported by concrete, plastic or metal supports, spacers or metal hangers which are strong and rigid enough to prevent any displacement of the reinforcing steel. Where concrete is to be placed on the ground, supporting concrete blocks (or dobies) shall be used, in sufficient numbers to support the bars without settlement, but in no case shall such support be continuous. All concrete blocks used to support reinforcing steel shall be tied to the steel with wire ties which are embedded in the blocks. For concrete over formwork, the Contractor shall furnish concrete, metal, plastic, or other acceptable bar chairs and spacers.

D. The portions of all accessories in contact with the formwork shall be made of concrete, plastic, or steel coated with a 1/8-inch minimum thickness of plastic which extends at least 1/2 inch from the concrete surface. Plastic shall be gray in color.

E. Tie wires shall be bent away from the forms in order to provide the specified concrete coverage.

F. Bars additional to those shown which may be found necessary or desirable by the Contractor for the purpose of securing reinforcement in position shall be provided by the Contractor at its own expense.

G. Reinforcement placing tolerances shall be within the limits specified in ACI 318, unless otherwise directed by the Engineer.

H. Welded wire fabric reinforcement placed over horizontal forms shall be supported on slab bolsters having gray, plastic-coated standard type legs as specified herein. Slab bolsters shall be spaced not less than 30 inches on centers, shall extend continuously

across the entire width of the reinforcing mat, and shall support the reinforcing mat in the plane shown.

I. Welded wire fabric placed over the ground shall be supported on wired concrete blocks (dobies) spaced not more than 3 feet on centers in any direction. The construction practice of placing welded wire fabric on the ground and hooking into place in the freshly placed concrete shall not be used.

J. Reinforcement bar splices shall only be used at locations shown. When it is necessary to splice reinforcement at points other than where shown, the character of the splice shall be as acceptable to the City or their designee.

K. Lap length for reinforcement bars shall be in a Class B Splice in accordance with ACI 318, unless otherwise shown. Laps of welded wire fabric shall be in accordance with the ACI 318.

L. Reinforcing steel shall at all times be protected from conditions conducive to corrosion until concrete is placed around it.

M. The surfaces of all reinforcing steel and other metalwork to be in contact with concrete shall be thoroughly cleaned of all dirt, grease, loose scale and rust, grout, mortar, and other foreign substances immediately before the concrete is placed. Where there is a delay in depositing concrete, reinforcing shall be reinspected and, if necessary, recleaned.

3.0.6. PREPARATION OF SURFACES FOR CONCRETING

A. General: No concrete shall be placed until the reinforcement steel and formwork have been erected in a manner acceptable to the City or their designee. The Contractor shall notify the City or their designee not less than two working days prior to concrete placement, allowing for inspection and any corrective measures which are required. Earth surfaces shall be thoroughly wetted by sprinkling, prior to the placing of any concrete, and these surfaces shall be kept moist by frequent sprinkling up to the time of placing concrete thereon. The surface shall be free from standing water, mud, and debris at the time of placing concrete.

B. Joints in Concrete: Concrete surfaces upon or against which concrete is to be placed, where the placement of the old concrete has been stopped or interrupted so that, as determined by the City or their designee, the new concrete cannot be incorporated integrally with that previously placed, are defined as construction joints. The surfaces of horizontal joints shall be given a compacted, roughened surface for good bond. Except where the Drawings call for joint surfaces to be coated, the joint surfaces shall be cleaned of all laitance, loose or defective concrete, and foreign material. Such cleaning shall be accomplished by sandblasting, followed by thorough washing. All

pools of water shall be removed from the surface of construction joints before the new concrete is placed.

C. Existing concrete surfaces upon or against which concrete is to be placed shall be given a roughened surface for good bond. Joint surfaces shall be cleaned of all laitance, loose or defective concrete, and foreign material. Such cleaning shall be accomplished by Thydroblasting. All pools of water shall be removed from the surface of construction joints before the new concrete is placed.

D. Placing Interruptions: When placing of concrete is to be interrupted long enough for the concrete to take a set, the working face shall be given a shape by the use of forms or other means that will secure proper union with subsequent work, provided that construction joints shall be made only where acceptable to the City or their designee.

E. Embedded Items: No concrete shall be placed until all formwork, installation of parts to - be embedded, reinforcement steel, and preparation of surfaces involved in the placing have been completed and accepted by the City or their designee at least 4 hours before placement of concrete. All surfaces of forms and embedded items that have become encrusted with dried grout from concrete previously placed shall be cleaned of all such grout before the surrounding or adjacent concrete is placed.

F. All reinforcement, anchor bolts, sleeves, inserts, and similar items shall be set and secured in the forms where shown on the Drawings or by shop drawings and shall be acceptable to the City or their designee before any concrete is placed. Accuracy of placement is the responsibility of the City or their designee.

G. Casting Against Old Concrete: Where concrete is to be cast against old concrete (any concrete which is greater than 60 days of age), the surface of the old concrete shall be thoroughly cleaned and roughened by hydro-blasting (exposing aggregate) prior to the application of an epoxy bonding agent. Application shall be according to the bonding agent manufacturer's instructions and recommendations.

H. No concrete shall be placed in any structure until all water entering the space to be filled with concrete has been properly cut off or has been diverted by pipes, or other means, and carried out of the forms, clear of the work. No concrete shall be deposited under water nor shall the Contractor allow still water to rise on any concrete until the concrete has attained its initial set. Water shall not be permitted to flow over the surface of any concrete in such manner and at such velocity as will injure the surface finish of the concrete.

I. Openings for pipes, inserts for pipe hangers and brackets, and the setting of anchors shall, where practicable, be provided for during the placing of concrete.

J. Corrosion Protection: Pipe, conduit, dowels, and other ferrous items required to be embedded in concrete construction shall be so positioned and supported prior to

placement of concrete that there will be a minimum of 2 inches clearance between said items, and any part of the concrete reinforcement will not be permitted.

K. Cleaning: The surfaces of all metalwork to be in contact with concrete shall be thoroughly cleaned of all dirt, grease, loose scale and rust, grout, mortar, and other foreign substances immediately before the concrete is placed.

3.0.7. TAMPING AND VIBRATING

A. As concrete is placed in the forms or in excavations, it shall be thoroughly settled and compacted, throughout the entire depth of the layer which is being consolidated, into a dense homogeneous mass, filling all comers and angles, thoroughly embedding the reinforcement, eliminating rock pockets, and bringing only a slight excess of water to the exposed surface of concrete during placement. Vibrators shall be high speed power vibrators (8,000 or 10,000 rpm) of an immersion type in sufficient number and with (at least one) standby units as required.

B. Concrete in walls shall be internally vibrated and at the same time rammed, stirred, or worked with suitable appliances, tamping bars, shovels, or forked tools until it completely fills the forms or excavations and closes snugly against all surfaces. Subsequent layers of concrete shall not be placed until the layers previously placed have been worked thoroughly as specified. Vibrators shall be provided in sufficient numbers, with standby units as required, to accomplish the results herein specified with 15 minutes after concrete of the prescribed consistency is placed in the forms. The vibrating head shall be kept from contact with the surfaces of the forms. Care shall be taken not to vibrate concrete excessively or to work it in any manner that causes segregation of its constituents.

3.0.8. FINISHING CONCRETE SURFACE

A. General: Surfaces shall be free from fins, bulges, ridges, offsets, honeycombing, or roughness of any kind, and shall present a finished, smooth, continuous hard surface. Allowable deviations from plumb or level and from the alignment, profiles, and dimensions shown on the Drawings are defined as tolerances and are specified herein. These tolerances are to be distinguished from irregularities in finish as described herein. Aluminum finishing tools shall not be used.

B. Formed Surfaces: After removal of forms, the finishes described below shall be applied in accordance with Article 3.13, D. Unless the finish schedule specifies otherwise, all surfaces shall receive at least a Type I finish. The Engineer shall be the sole judge of acceptability of all concrete finish work.

1. Type I - Rough: All fins, burrs and other projections left by the forms shall be removed. All holes left by removal of ends of ties, and all other holes, depressions, or voids shall be filled solid with cement grout after first being thoroughly wetted.

Honeycombs shall be chipped back to solid concrete as directed, prior to patching with cement grout. Holes shall be filled with a small tool that will permit packing the hole solidly with cement grout. Cement grout shall consist of one part cement to three parts sand, and the amount of mixing water shall be as little as consistent with the requirements of handling and placing. Color of cement grout shall match the adjacent wall surface. At locations where concrete coatings are specified to be applied, epoxy-based patch material or filler surfaces compatible with the coating shall be used in lieu of cement grout specified herein. Concrete finish shall be in strict conformance to the coating / paint manufacturer's recommendations.

2. Type II - Grout Cleaned: Where this finish is required, it shall be applied after completion of Type I finish. After the concrete has been predampened, slurry consisting of one part cement (including an appropriate quantity of white cement in order to produce a color matching the surrounding concrete) and 1-1/2 parts sand passing the No. 16 sieve, by damp loose volume, shall be spread over the surface with clean burlap pads or sponge rubber floats. Any surplus shall be removed by scraping and then rubbing with clean burlap. The finish shall be kept damp for at least 36 hours after application.

3. Type III - Smooth Rubbed: Where this finish is required, it shall be applied after the completion of the Type I finish. No rubbing shall be done before the concrete is thoroughly hardened and the mortar used for patching is firmly set. A smooth, uniform surface shall be obtained by wetting the surface and rubbing it with a carborundum stone to eliminate irregularities. Unless the nature of the irregularities requires it, the general surface of the concrete shall not be cut into. Corners and edges shall be slightly rounded by the use of the carborundum stone. Brush finishing or painting with grout or neat cement will not be permitted.

C. Unformed Surfaces: The finishes described below shall be applied to unformed surfaces such as floors, slabs, flow channels and top of walls in accordance with Article 3.05 - Concrete Finish Schedule. The Engineer shall be the sole judge of acceptability of all such finish work.

1. Type "A" - Screeded: This finish shall be obtained by placing screeds at frequent intervals and striking off to the surface elevation required. When a Type "F" finish is subsequently to be applied, the surface of the screeded concrete shall be roughened with a concrete rake to ½" minimum deep grooves prior to final set.

2. Type "B" - Wood Floated: This finish shall be obtained after completion of a Type "A" finish by working a previously screeded surface with a wood float until the desired texture is reached. Floating shall begin when the water sheen has disappeared and when the concrete has sufficiently hardened so that a person's foot leaves only a slight imprint. If wet spots occur, water shall be removed with a squeegee. Care shall be taken to prevent the formation of laitance and excess water on the finished surface. The finished surface shall be true, even, and free from blemishes and other irregularities.

3. Type "C" - Cork Floated: This finish shall be similar to Type "B" but slightly smoother than that obtained with a wood float. It shall be obtained by power or band floating with cork floats.

4. Type "D" - Steel Troweled: This finish shall be obtained after completion of a Type "B" finish. When the concrete has hardened sufficiently to prevent excess fine material from working to the surface, the surface shall be compacted and smoothed with not less than two thorough and complete steel troweling operations. In areas, which are to receive a floor covering such as tile, resilient flooring, or carpeting, only one troweling operation is required. The finish shall be brought to a smooth, dense surface, free from defects and blemishes.

5. Type "E" - Broom or Belt: This finish shall provide the surface with a transverse scored texture by drawing a broom or burlap belt across the surface immediately after completion of a Type "B" finish.

6. Type "F" - Swept in Grout Topping: This finish shall be applied after a completion of a Type "A" finish. The concrete surface shall be properly cleaned, washed, and coated with a mixture of water and Portland Cement. Cement grout in accordance with Section 03315 shall then be plowed and swept into neat conformance with the blades or arms of the apparatus by turning or rotating the previously positioned mechanical equipment. Special attention shall be paid to true grades, shapes and tolerances as specified by the manufacturer of the equipment. Before beginning this finish, the Contractor shall notify the Engineer and the equipment manufacturer of the details of the operation and obtain approval and recommendations of the equipment manufacturer.

7. Type "G" - Hardened Finish: Either a liquid hardened finish or an aggregate hardened finish shall be provided at the Contractor's option.

8. Type "H" - Non-Slip Finish: This finish shall be provided by applying a non-slip shake-on aggregate concurrently with the application of a Type "D" finish. Application procedure shall be in accordance with manufacturer's instructions.

9. Type "J" - Raked Finish: This finish shall be provided by raking the surface as soon as the condition of the concrete permits by making depressions of +/-1/4-inch.

3.0.9. CONCRETE FINISH SCHEDULE

ITEM	TYPE OF FINISH

Inner face of walls of tanks, flow channels, wet wells, perimeter walls, and miscellaneous structures to be coated	I
Exterior concrete walls below grade	I
Exterior exposed concrete walls and columns (including top of II wall) to one foot below grade. All other exposed concrete surfaces not specified elsewhere	
All interior exposed concrete vertical surfaces in buildings	III
Interior exposed ceiling, including beams	III
Floors of process equipment tanks or basins, and slabs to receive roofing material or waterproof membranes	B

All interior finish floors of buildings and structures and walking surfaces which will be continuously or intermittently wet	C
All interior finish floors of buildings and structures which are not continuously or intermittently wet	D
Floors to receive tile, resilient flooring, or carpeting	D
Concrete in flow channels not specified to be coated	D
Exterior concrete sidewalks, steps, ramps, decks, slabs on grade and landings exposed to weather	E
Floors of process tanks indicated on Drawings or in the specifications to receive cement grout topping	F
Precast concrete form panels, hollow core planks, double tees	J

3.0.10. CURING AND DAMP PROOFING

A. All concrete shall be cured for not less than 14 days after placing, in accordance with the methods specified herein for the different parts of the work and described in detail in the following paragraphs.

SURFACE TO BE CURED OR DAMPPROOFED	METHOD
Unstripped forms	1
Construction joints between footings and walls, and between floor slab and columns	2
Encasement concrete and thrust blocks	3
All concrete surfaces not specifically provided elsewhere in this paragraph	4

B. Method 1: Wooden forms shall be wetted immediately after concrete has been placed and shall be kept wet with water until removed. If steel forms are used, the exposed concrete surfaces shall be kept continuously wet until the forms are removed. If forms are removed within 14 days of placing the concrete, curing shall be continued in accordance with Method 4.

C. Method 2: The surface shall be covered With burlap mats which shall be kept wet with water for the duration of the curing period, until the concrete in the walls has been placed. No curing compound shall be applied to surfaces cured under Method 2.

D. Method 3: The surface shall be covered with moist earth not less than 4 hours, nor more than 24 hours, after the concrete is placed. Earthwork operations that may damage the concrete shall not begin until at least 7 days after placement of concrete.

E. Method 4: The surface shall be sprayed with a liquid curing compound. It shall be applied in accordance with the manufacturers printed instructions at a maximum coverage rate of 200 square feet per gallon and in such a manner as to cover the surface with a uniform film which will seal thoroughly.

F. Care shall be exercised to avoid damage to the seal during the curing period. Should the seal be damaged or broken before the expiration of the curing period, the break shall be repaired immediately by the application of additional curing compound over the damaged portion.

G. Wherever curing compound may have been applied by mistake to faces against which concrete subsequently is to be placed and to which it is to adhere, said compound shall be entirely removed by hydroblasting just prior to the placing of new concrete.

H. Curing compound shall be applied as soon as the concrete has hardened enough to prevent marring on uniformed surfaces, and within 2 hours after removal of forms from contact with formed surfaces. Repairs required to be made to formed surfaces shall be made within the said 2-hour period; provided, however, that any such repairs which cannot be made within the said 2-hour period shall be delayed until after the curing compound has been applied. When repairs are to be made to an area on which curing compound has been applied, the area involved shall first be wet-sand blasted to remove the curing compound, following which repairs shall be made as provided herein.

3.0.11. TESTING

A. Field Testing of Concrete

1. The Contractor shall coordinate with the Engineer's project representative the onsite scheduling of the materials testing consultant personnel as required for concrete testing.

2. Concrete for testing shall be supplied by the Contractor at no additional cost to the Owner, and the Contractor shall provide assistance to the materials testing consultant in obtaining samples. The Contractor shall dispose of and clean up all excess material.

C. Consistency

1. The consistency of the concrete will be checked by the materials testing consultant by standard slump cone tests. The Contractor shall make any necessary adjustments in the mix as the Engineer and/or the materials testing consultant may direct and shall upon written order suspend all placing operations in the event the consistency does not meet the intent of the specifications. No payment shall be made for any delays, material, or labor costs due to such eventualities.

2. Slump tests shall be made in accordance with ASTM C143. Slump tests will be performed as deemed necessary by the materials testing consultant and each time compressive strength samples are taken.

3. Concrete with a specified nominal slump shall be placed having a slump within 1" (higher or lower) of the specified slump. Concrete with a specified maximum slump shall be placed having a slump less than the specified slump.

D. Unit Weight

1. Samples of freshly mixed concrete shall be tested for unit weight by the materials testing consultant in accordance with ASTM C138.

2. Unit weight tests will be performed as deemed necessary by the Engineer and each time compressive strength samples are taken.

E. Air Content

1. Samples of freshly mixed concrete will be tested for entrained air content by the materials testing consultant in accordance with ASTM C231.

2. Air content tests will be performed as deemed necessary by the materials testing consultant and each time compressive strength samples are taken.

3. In the event test results are outside the limits specified, additional testing shall occur. Admixture quantity adjustments shall be made immediately upon discovery of incorrect air entrainment.

F. Compressive Strength

1. Samples of freshly mixed concrete will be taken by the materials testing consultant and tested for compressive strength in accordance with ASTM C172, C31 and C39, except as modified herein.

2. In general, one sampling shall be taken for each placement, with a minimum of one (1) sampling for each day of concrete placement operations, or for each one

fifty (50) cubic yards of concrete, or for each 5,000 square feet of surface area for slabs or walls, whichever is greater.

3. Each sampling shall consist of at least five (5) 6x12 cylinders or eight (8) 4x8 cylinders. Each cylinder shall be identified by a tag, which shall be hooked or wired to the side of the container. The materials testing consultant will fill out the required information on the tag, and the Contractor shall satisfy himself that such information shown is correct.

4. The Contractor shall be required to furnish labor to the Owner for assisting in preparing test cylinders for testing. The Contractor shall provide approved curing boxes for storage of cylinders on site. The insulated curing box shall be of sufficient size and strength to contain all the specimens made in any four consecutive working days and to protect the specimens from falling over, being jarred or otherwise disturbed during the period of initial curing. The box shall be erected, furnished, and maintained by the Contractor. Such box shall be equipped to provide the moisture and to regulate the temperature necessary to maintain the proper curing conditions required by ASTM C31. Such box shall be located in an area free from vibration such as pile driving and traffic of all kinds and such that all specimens are shielded from direct sunlight and/or radiant heating sources. No concrete requiring inspection shall be delivered to the site until such storage curing box has been provided. Specimens shall remain undisturbed in the curing box until ready for delivery to the testing laboratory but not less than sixteen hours.

5. The Contractor shall be responsible for maintaining the temperatures of the curing box during the initial curing of test specimens with the temperature preserved between 60°F and 80°F as measured by a maximum-minimum thermometer. The Contractor shall maintain a written record of curing box temperatures for each day curing box contains test specimens. Temperature shall be recorded a minimum of three times a day with one recording at the start of the workday and one recording at the end of the workday.

6. When transported, the cylinders shall not be thrown, dropped, allowed to roll, or be damaged in any way.

7. Compression tests shall be performed in accordance with ASTM C39. For 6x12 cylinders, two test cylinders will be tested at seven days and two at 28 days. For 4x8 cylinders, three test cylinders will be tested at seven days, three at 28 days. The remaining cylinders will be held to verify test results, if needed.

G. Evaluation and Acceptance of Concrete

1. Evaluation and acceptance of the compressive strength of concrete shall be according to the requirements of ACI 214, ACI 318, and ACI 350.

2. The strength level of concrete will be considered satisfactory if all of the following conditions are satisfied.

    a. Every arithmetic average of any three consecutive strength tests equals or exceeds the minimum specified 28-day compressive strength for the mix (see Article 2.08). b. No individual compressive strength test results falls below the minimum specified strength by more than 500 psi.

3. In the event any of the conditions listed above are not met, the mix proportions shall be corrected for the next concrete placing operation.

4. In the event that condition 2B is not met, additional tests in accordance with Article 3.10, paragraph H shall be performed.

5. When a ratio between 7-day and 28-day strengths has been established by these tests, the 7-day strengths shall subsequently be taken as a preliminary indication of the 28-day strengths. Should the 7-day test strength from any sampling be more than 10% below the established minimum strength, the Contractor shall:

    a. Immediately provide additional periods of curing in the affected area from which the deficient test cylinders were taken.

    b. Maintain or add temporary structural support as required.

    c. Correct the mix for the next concrete placement operation, if required to remedy the situation.

6. All concrete which fails to meet the ACI requirements and these specifications is subject to removal and replacement at no additional cost to the Owner.

H. When non-compliant concrete is identified, test reports shall be sent immediately to the Engineer for review.

I. Additional Tests

1. When ordered by the Engineer, additional tests on in-place concrete shall be provided and paid for by the Contractor.

2. In the event the 28-day test cylinders fail to meet the minimum strength requirements as outlined in Article 3.10, paragraph F, the Contractor shall have concrete core specimens obtained and tested from the affected area immediately.

    a. Three cores shall be taken for each sample in which the strength requirements were not met.

b. The drilled cores shall be obtained and tested in conformance with ASTM C42. The tests shall be conducted by a materials testing consultant approved by the Engineer.

c. The location from which each core is taken shall be approved by the Engineer. Each core specimen shall be located, when possible, so its axis is perpendicular to the concrete surface and not near formed joints or obvious edges of a unit of deposit.

d. The core specimens shall be taken, if possible, so no reinforcing steel is within the confines of the core.

e. The diameter of core specimens should be at least 3 times the maximum nominal size of the coarse aggregate used in the concrete but must be at least 2-inches in diameter.

f. The length of specimen, when capped, shall be at least twice the diameter of the specimen.

g. The core specimens shall be taken to the laboratory and when transported, shall not be thrown, dropped, allowed to roll, or damaged in any way.

h. Two (2) copies of test results shall be mailed directly to the Engineer. The concrete in question will be considered acceptable if the average compressive strength of a minimum of three test core specimens taken from a given area equal or exceed 85% of the specified 28-day strength and if the lowest core strength is greater than 75% of the specified 28-day strength.

J. In the event that concrete placed by the Contractor is suspected of not having proper air content, the Contractor shall engage a materials testing consultant approved by the Engineer, to obtain and test samples for air content in accordance with ASTM Specification C457. D

END OF SECTION

03360 GROUT

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The work included in this Section consists of grouting the various items listed hereinafter and indicated on the drawings.

1.0.2. RELATED WORK

A. Section 03300 "Cast-in-Place Concrete, Reinforcement and Formwork".

1.0.3. SUBMITTALS

A. Manufacturer's literature shall be submitted for review on the following items.

1. Nonshrink grout data shall include grout properties, mixing, surface preparation and installation instructions.

1.0.4. DELIVERY AND STORAGE

A. Grouting materials shall be delivered and stored in unbroken containers with seals and labels intact as packaged by the manufacturer.

1.0.5. QUALITY ASSURANCE

A. If the project includes patching, through bolt holes, epoxy anchors, and/or block outs, the manufacturer shall, if necessary, train the Contractor's employees in the mixing and curing of the epoxy grouts for each of these applications.

B. Furnish one year warranty. Manufacturer's warranty shall not contain a disclaimer limiting responsibility to the purchase price of products or materials.

PART 2 – PRODUCTS 3.0.1.

MATERIALS

A. Cementitious grout shall be composed of one part of Type II Portland cement to three parts of sand.

B. Non-shrink Nonmetallic Grout shall be Five Star Special Grout 150, Five Star Products, Inc.; Grout F-100, Sauereisen Cement; Masterflow 713, BASF Building Systems; NS Grout, Euclid Chemical Company, pre-mixed type, or approved equal.

C. Non-shrink Metallic Grout: Master Builders Embeco 636 Plus Grout, BASF Building Systems, pre-mixed type, or approved equal.

D. Non-shrink Hydraulic Cement Grout shall be Waterplug, Thoro Products, BASF Building Systems, or approved equal.

E. Non-shrink shall be Five Star HP Epoxy Grout, Five Star Products, Inc., available from Coastal Construction Products, Inc. or Wall-Nu Trowelable, Steelcote Manufacturing Co., available from Florida Wire and Rigging Works, or approved equal.

F. Specifications for cement and sand for mortar and grout shall be the same as those for concrete.

3.0.2. EPOXY ANCHOR GROUT

A. Epoxy anchor grout shall conform to ASTM C 881 - Epoxy-Resin-Base Bonding Systems for Concrete, Type IV, Class A, B and C, Grade 3 with the exception of gel time.

B. Heat deflection temperature per ASTM D 648 -- Test Method for Deflection Temperature of Plastics Under Flexural Load shall be a minimum 120 degrees.

C. Manufacturer shall certify that the epoxy anchor grout will maintain 90 percent of its strength up to a temperature of 125 degrees F.

D. Grout shall come in a 2 chambered cartridge with a metering system that provides the proper ratio of hardener and resin. The grout shall also come with a static mixer nozzle to thoroughly mix the hardener and resin together.

E. Epoxy anchor grout shall be capable of being used in submersed applications once cured.

F. Compressive strength per ASTM D 695 - Test Method for Compressive Properties of Rigid Plastics shall be 10,000 psi minimum.

G. If the average working or operating temperature will be over 100 degrees F or in a high fire risk area, use cement based non-shrink grout and oversized holes.

H. Overhead anchors and anchors in fire-resistive construction shall be cast-in anchors.

I. Embedment of adhesive anchors/rebar shall be deep enough to develop the anchor/rebar. Embedment shall not exceed 67 percent of the member depth.

J. Epoxy anchor grout shall be SET-XP by Simpson Strong-Tie Co., Inc.; Powers PE1000+ by Powers Fasteners, Inc.; RE 500 SD by Hilti, Inc.; or approved equal.

PART 3 – EXECUTION 3.0.1.

PREPARATION

A. All bonding surfaces shall be clean and dust and oil free. Grout shall be mixed and applied in accordance with manufacturer's recommendations.

B. Grout Mix proportions (for grout to fill cores in reinforced masonry walls): 1. One part Portland cement, Type I or II. 2. 2-1/4 parts damp, loose sand. 3. Parts shot gravel (3/8" maximum). 4. Mix to conform to ASTM C476-83 with a minimum compressive strength of 2500 psi at 28 days, have an 8" minimum and 10" maximum slump.

C. Grout shall not be placed until base concrete or masonry has attained its design strength, unless authorized otherwise by the Engineer. Surfaces that will be in contact with grout shall be free of dirt, loose rust, oil, wax, grease, curing compounds, laitance, loose concrete, and other deleterious materials.

D. Mechanical, electrical, and finish WORK shall be completed prior to placement of topping or concrete/grout fill. To ensure bonding to the base slab, the base slab shall be given an exposed aggregate finish. Alternatively where accepted by the Engineer, the base slab shall be given a roughened textured surface by a close-spaced rake while the surface is green. After curing, high pressure washing shall expose the aggregates and produce not less than a 3/16-inch amplitude roughness. Jackhammers or chipping hammers shall not be used.

3.0.2. INSTALLATION

A. Non shrink Grout:

1. Non shrink, nonmetallic grout shall be used for grouting precast concrete wall panel connections, column base plates, anchor bolts, reinforcing bars, pipe sleeves, and machinery supports.

2. Grout shall be mixed as close to the work area as possible and transported quickly to its final position in a manner which will not permit segregation of materials.

3. Non shrink grout shall be cured with water saturated burlap for at least three days or with an application of Super Rez Seal cure and seal compound applied immediately after grout placement.

4. Machinery set on grout pads shall not be operated until the grout has cured for at least 24 hours.

5. Expansive, non-shrink epoxy grout in the category of the DP Five Star Epoxy Grout shall be used for installation of vibrating machinery such as pumps.

B. Epoxy Adhesive Anchors: Grout shall be proportioned and mixed with automatic equipment. Unless otherwise indicated, embedment shall be sufficient to develop the ultimate tensile strength of the anchor or reinforcing bar per the manufacturer's ICCES report but shall not be less than 8 diameters for threaded rod or 12 diameters for reinforcing or smooth bars. Holes shall be dry.

C. Drilled anchors and reinforcing bars shall be installed in strict accordance with the manufacturer's instructions. Holes shall be roughened with a brush on a power drill, and cleaned. Drilled anchors shall not be installed until the concrete has reached the required 28 Day compressive strength. Anchors shall not be loaded until the grout has reached its indicated strength in accordance with the manufacturer's instructions.

END OF SECTION

03400 PRECAST PRESTRESSED CONCRETE

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The work under this section includes the design, casting, delivery, erection and shoring of precast prestressed concrete structures as shown on the Contract Drawings.

1.0.2. RELATED WORK

A. Section 03300 "Cast-in-Place Concrete, Reinforcement and Formwork".

B. Section 01340 "Shop Drawings".

1.0.3. REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Without limiting the generality of other requirements of these specifications all work hereunder shall conform to the applicable requirements of the referenced portions of the following documents, to the extent that the requirements therein are not in conflict with the provisions of this Section:

1. South Florida Building Code, latest edition.

2. ACI 318, Building Code Requirements for Reinforced Concrete.

3. PCI MNL 116, Manual for Quality Control for Plants and Production of Precast Concrete Products.

4. ASTM A416, Specification for Uncoated Seven-Wire Stress-Relieved Steel Strand for Prestressed Concrete.

1.0.4. QUALITY ASSURANCE

A. Fabricator shall be a recognized prestressed concrete manufacturer with minimum five (5) years' experience in the manufacture and erection of similar units and whose design, fabrication and erection operations are supervised by a Florida Registered Professional Engineer.

1.0.5. CONTRACTOR SUBMITTALS

A. Shop Drawings: The Contractor shall submit shop and erection drawings for approval, showing concrete design strength; unit dimensions; unit weights; size, number, location and stress in prestressing strands; size, number and location of reinforcing bars including reinforcing for erection and handling stresses; concrete cover over reinforcing and strands; bearing and anchorage details; concrete finish; curing method; erection marks; hoist points and shoring points.

B. Design Calculations: The Contractor shall submit for approval, neat, legible and complete design calculations prior to fabrication. Calculations shall be by a Florida Registered Professional Engineer whose seal shall appear on calculation sheets and shop drawings.

1. Calculations shall include predicted in-place cambers without superimposed loads, with superimposed dead loads and with superimposed dead loads and live loads.

2. Span length in calculations shall be from center of bearing to center of bearing.

3. Include bearing and anchorage details including those in the precast sections and those in the job cast concrete structure.

C. Certificates: The Contractor shall submit manufacturer's test certificates on prestressing strands and reinforcing.

D. Concrete Cylinder Tests: The Contractor shall submit copies of cylinder break reports by an approved commercial test laboratory, made from each casting for this project to verify that concrete has attained minimum ultimate prestressed transfer strength specified.

1.0.6. DEFINITIONS

A. In these specifications, where the terms "Precast Concrete" and "Precast Concrete Specialties" are used, they shall have equivalent meaning.

PART 2 – PRODUCTS

2.0.1. MATERIALS

A. Concrete: Minimum 7 day ultimate compressive strength 4000 of psi. Higher strength will be permitted to suit manufacturer's design. In other respects, concrete shall comply with requirements of Section 03300 "Cast-in-Place Concrete, Reinforcing and Formwork".

B. Prestressing Strands: High strength 7 wire strand conforming with ASTM A416-94. Elongation test conforming with ASTM A270-90 with minimum elongation at rupture of 3.5% in 24 inches. Tests need not be made if certification of conformance with specifications is provided by manufacturer. Use strand of U.S. manufacture.

C. Reinforcing Steel: ASTM A615, grade 60.

D. Forms: Provide smooth units true to size, shape and detail with flat panes, sharp lines and arises, free from warp, twist, bow or similar distortions, spalling, broken edges, cracks or similar defects. Dimensional tolerances to be as provided in ACI 525 Standards Minimum Requirements for Thin Section Precast Concrete Construction.

2.0.2. FABRICATION

A. General: Fabricate units accordance with approved shop drawings and approved design calculations

B. Unit design and fabrication: Conform with ACI Standard Building Code Requirements for Reinforced Concrete and the Prestressed Concrete Institute Standards. Fabricator shall design joists and beams in accordance with loads indicated on drawings. Camber under dead load or deflection under total load shall not exceed 1/360 of span.

C. Inserts: Install hanger inserts and sleeves in unit forms for mechanical and electrical items as provided under other sections and as shown on drawings.

D. Curing: Top surface to receive water curing only.

E. Marking: Distinctively mark each unit with manufacturer's name and mark indicated on erection drawings.

F. Age: Units shall be minimum 10 days old before shipping or erection.

2.0.3. PREFORMED JOINT SEALANT

A. The joint sealing compound shall be Quik-Seal, a preformed, cold applied, ready to use plastic joint sealing compound as supplied by Quikset Utility Vaults, Santa Ana, California; Ram-Nick by K.T. Snyder Company; or approved equal.

2.0.4. MORTAR

A. Mortar used between the sections of precast concrete vaults shall be as recommended by the manufacturer.

2.0.5. NON-SHRINK GROUT

A. Non-shrink grout shall be as specified in the Section 03360 "Grout".

2.0.6. QUALITY CONTROL

A. Precast concrete units shall be made by an experienced manufacturer and shall be constructed as shown on the drawings and specified herein and shall be free of defects, checks and cracks. Care shall be taken in the mixing of materials, casting, curing and shipping to avoid any of the above.

B. The Contractor shall notify the City a minimum of 5 days before the units are cast and 5 days before shipment is made, in order to provide for plant inspection, if the City so directs.

PART 3 – EXECUTION

3.0.1. ERECTION

A. Erection to be by manufacturer and supervised by manufacturer's Florida Registered Professional Engineer or authorized representative. Handle and install units with precision, in conformance with drawings, details and erection drawings.

3.0.2. INSTALLATION

A. Required pads, plates and reinforcing bars shall be furnished for casting and anchorage in the adjoining work. The precast concrete units shall be installed in a workmanlike manner with the units tight and at right angles to the supporting beams or walls. The units shall be aligned and leveled in accordance with the procedures recommended by the manufacturer. Units shall be grouted by a mixture of not less than one part cement to three parts fine sand, care being taken to see that joints are filled. Damp grout that may have seeped through shall be removed before it hardens.

B. All openings in the precast units shall be made by the Contractor and are the responsibility of the Contractor. Where details for an opening are not shown on the drawings, the opening shall be made in accordance with the recommendation of the manufacturer. When an opening causes a loss in carrying capacity of the unit, the adjacent units shall be designed to carry the additional dead and superimposed load transferred from the unit with the opening. The Contractor shall provide saddle headers as required.

C. Extreme care shall be used to avoid damaging or soiling concrete as no repairing or cutting will be permitted. Damaged units shall be replaced at the expense of the Contractor. Wooden hammers shall be used, with pinch bars being used on unexposed parts only.

3.0.3. CLEANING AND REPAIRS

A. Cleaning: Clean exposed surfaces of units of stains to a uniform appearance. Do not use caustic or acid cleaners.

B. Repairs: Repair nicks or chips in exposed areas.

END OF SECTION

DIVISION 5 – METALS

05550 ALUMINUM RAILING

PART 1 - GENERAL

1.0.1. SCOPE OF WORK

A. The Contractor shall design, furnish, fabricate, and install aluminum railing and appurtenances as indicated on the Drawings, complete, all in accordance with the requirements of this section.

1.0.2. QUALITY ASSURANCE

Standards: Unless otherwise specified, all materials, workmanship and practices shall conform to the following Standards:

A. South Florida Building Code, latest edition.

B. Aluminum Construction Manual, latest edition, by the Aluminum Association.

C. Applicable OSHA requirements

D. Rail and fittings shall be clear anodized, as specified below. Railing shall be plastic wrapped for protection. Wrap shall be removed only after erection.

1.0.3. SUBMITTALS

A. The Contractor shall submit to the Engineer of Record detailed shop drawings, prior to fabrication, for review and approval. The drawings shall be complete, covering all aluminum railing members, fastenings, connections, means of galvanic protection, etc., which for part of a finished structure.

B. Where written certification are called for below, it shall be submitted to the Engineer of Record.

PART 2 – PRODUCTS

2.0.7. ACCEPTABLE MANUFACTURING

G. Wesrail: Moultrie Manufacturing Co.

H. Thompson Railing Systems: Thompson Fabricating Co.

I. Approved equals.

2.0.8. ALUMINUM RAILING SYSTEM

A. General: Where indicated on the Drawings, pipe handrailing shall be provided. Pipe handrailing shall be supplied as required by the South Florida Building Code and OSHA whether indicated on the Drawings or not, including stair railings.

B. Prior to fabrication, verify all dimensions by actual measurement, so that the finished ladder will fit accurately and provide a neat appearance, with no part out of line and grade by more than 1/8 inch.

C. Handrailing system, including rails, stanchions and attachments, shall be designed and constructed to resist a load of not less than 200 pounds applied in any direction and at any point on the rails.

D. The handrailing shall be of welded construction design, with field splices where required between sections. All exposed welds shall be continuous fillets, watertight, and ground smooth. Bends, warps and ramps in the rails shall be made by bending the pipe to true and even curves, without kinks.

E. Vertical pipe supports to be set in concrete shall be set in built-in pipe sleeves, or concrete may be cored, minimum 5-inches in length. Removable posts shall be sleeved. The joint between upright and sleeve shall be cemented with epoxy grout.

F. Wall brackets for handrail shall be as manufactured by Mouitrie Manufacturing Company, J.G. Braun Company, Fulton Metal Products Company, or equal. Wall brackets shall be fabricated of metal compatible with handrail metal. End all wall mounted railings at the line of the first nosing.

G. Provide chain gates across all openings in railings. Chain shall be welded, stainless steel, close link hoisting chain, 1/4-inch by 1-5/16 inch links. One end of each chain gate shall be attached by a stainless steel shackle to a 1/4-inch round stainless steel stock eye bolted to the pipe stanchion and the other end connected to a heavy stainless steel snap hook. A 1/4-inch stainless steel eye shall be provided in the opposite stanchion or concrete wall, installed at the height of the center lines of the top rail.

H. Aluminum Railing: Stanchions and rails shall be nominal 2 inch diameter minimum, Schedule 80 aluminum alloy 6061-T6 with clear anodized finish. Railing posts must be adequately reinforced to meet the specified design loads. Handrailing shall be 42 inches in height. In no case shall the spacing of handrail posts exceed five (5) feet on center. Stainless steel railings may be used in lieu of aluminum railing at the CONTRACTOR's option.

I. Kickplates: Kickplates where not specifically called for in the Drawings shall be furnished and installed typically at the edges of all metal walkways and at other handrail installations. Kickplates shall be l/4-inch thick, must meet OSHA

5-02

requirements, shall project 4-inches above walkway surface, may not infringe on minimum required walkway width and material must be the same as that of handrail construction. Kickplates shall be connected to handrail posts as detailed on the drawings.

2.0.9. FINISHES

A. Finish shall be natural anodized after forming, and before assembly. Each piece of aluminum to be anodized shall be finished (anodized) in accordance with the following Aluminum Association Designations:

1. Sheet: AA-M10C11c21A31, with minimum 0.4 mil coating

2. Structural shapes, plates, bars and pipe: AA-M10C11C21A41, with minimum 0.8 mil coating.

B. All fabricated aluminum items of the railing shall be anodized after fabrication. No touch-up paint will be accepted.

C. A written certification stating compliance with the aluminum finish (anodizing) as specified above shall be furnished for all aluminum material and/or items furnished and installed by the Contractor.

D. Protect all aluminum by a factory applied coating of water-tight clear methacrylate lacquer having a minimum thickness of 0.008"minimum capable of withstanding the action of lime and mortar for a period of at least one week in an atmosphere of 100% relative humidity at 100°F.; the action of 10% by weight muriatic acid for a period of six hours at 70°F.; and the action of the atmospheric weather for a period of 12 months. The coating shall be sprayed on, after anodizing and sealing procedures have been followed. Submit written certification indicating that the coating meets or exceeds the requirements of the Aluminum Association Mortar Test for Clear Lacquers on Anodized Aluminum.

2.0.10. EXPANSION BOLTS

A. Stainless steel type 316 wedge bolts furnished by handrail manufacturer.

PART 3 -- EXECUTION

3.0.1. EXAMINATION

A. Verify that field conditions are acceptable and are ready to receive work.

B. Beginning of installation means erector accepts existing conditions.

3.0.2. PREPARATION

A. Clean and strip primed items to bare metals where site welding is required.

B. Supply items required to be cast into concrete with setting templates, to appropriate sections.

3.0.3. FABRICATION

A. Fabricate railings in shop, made and erected square, plumb, straight and true, designed for adjustment to field variations, accurately fitted with tight joints and intersections.

3.0.4. INSTALLATION

A. Install items plumb and level, accurately fitted, free from distortion or defects.

B. Provide anchors and plates required for connecting railings to structure.

C. Aluminum Railings: Aluminum railing fabrication shall be performed by craftsmen experienced in the fabrication of architectural metal work. Exposed surfaces shall be free from defects or other surface blemishes. Dimensions and conditions shall be verified in the field. All joints, junctions, miters and butting sections shall be precision fitted with no gaps occurring between sections, and with all surfaces flush and aligned. Electrolysis protection of materials shall be provided.

D. After satisfactory installation, all coating shall be removed leaving the clean undamaged surface. In locations where aluminum may come in contact with dissimilar metals or masonry, the surfaces shall be given a heavy brush coat of alkaliresistant bituminous paint or separated with a non-absorptive tape or gasket.

3.0.5. EXPANSION BOLTS

A. Expansion bolts shall be spaced 10d apart and 5d edge distance for no reduction in pull out strength. A safety factor of four shall be provided on expansion bolt pull out values published by the manufacturer.

3.0.6. ALUMINUM SURFACES

A. Aluminum surfaces in contact with concrete, grout (except epoxy grout), dissimilar metals (except stainless steel), or buried in the ground shall be protected with a heavy coat of Bitumastic No. 300, as manufactured by Kop-Coat, Inc., or approved equal.

END OF TECHNICAL SPECIFICATIONS

EVALUATION PROCESS

SELECTION COMMITTEE

A Selection Committee, consisting of City personnel, will convene, review and discuss all proposals submitted.

The Selection Committee will use a point formula during the review process to score proposals and assign points in the evaluation process in accordance with the evaluation criteria. The Proposer shall satisfy and explicitly respond to all the requirements of the RFP, including a detailed explanation of how the services shall be performed.

Each proposal will be reviewed to determine if the Proposal is responsive to the submission requirements outlined in the Solicitation. A responsive Proposal is one which follows the requirements of this Solicitation that includes all documents submitted in the format outlined in this Solicitation, is of timely submission, and has the appropriate signatures as required on each document. Failure to comply with these requirements may result in the Proposal being deemed non- responsive. The Contract (s) will be awarded to the most responsive Proposer whose Proposal best serves the interest of and represents the best value to the City of Opa-locka.

EVALUATION CRITERIA

The Committee may select and choose to invite any and/or or all firms to make presentations and be interviewed by the Committee as part of the evaluation process for this Solicitation. The Committee's decision will be communicated by staff to all Proposers. The Proposer's presentation may clarify but may not modify their submitted Proposal. Any discussion between the presenter (s) and Evaluation Committee during presentations are intended only for purposes of providing clarification in response to questions from the Committee.

Category	Points
1. Experience and Qualifications. The technical expertise and professional competence in areas directly related to this RFP; required number of years of experience in performing similar work 2. demonstrated. The ability to manage and coordinate the services, deliver quality products/services, be a reliable service provider, stay within budget, and meet deadlines; level of experience and training of key personnel assigned, including sub-consultants, if applicable; strength and stability of the firm; breadth and depth of resources.	40
1. References Provide a minimum of three (3) references of recent demonstrated experience in providing consulting services similar in nature and size to the Scope of Work and include any government references. Provide a short description of the work performed, dates of service, names, addresses, telephone numbers, fax numbers, locations, remedies, and contract amount.	20
1. Resources and approach The methodology and systems reflecting the ability to provide the requested services; thorough discussion of objectives; sensitive approach to public and regulatory concerns; management, coordination of services and quality controls; attention to detail and creativity.	30
Price Proposal 1. Cost of proposed services	10
TOTAL	100

ORAL PRESENTATIONS

Proposers may be required to make individual presentations to the City Selection Committee to clarify their proposals. Only those firms with the highest rated scores in accordance with the stated criteria and their weights will be invited to give oral presentations. However, the City has the right to accept the best proposal as submitted, without discussion or negotiation.

If the City determines that such presentations are needed, a time and place will be scheduled for oral presentations. Each Proposer shall be prepared to discuss and substantiate any of the areas of the proposal submitted, and its qualifications to perform the specified services. During the oral presentations, the Proposers should relate their discussion to the evaluation criteria, which will include (but not be limited to) their approach to the project. The proposed Project Manager must be in attendance.

The Evaluation Criteria may be changed for the oral presentation evaluation phase. References and site visits (if completed) shall be included in the final evaluation criteria, along with other criteria and weights as determined by the Selection Committee. Finalists will be informed as to the revised criteria, if any, prior to their oral presentation.

Additionally, prior to award of an Agreement pursuant to this RFP, the City may require Proposers to submit such additional information bearing upon the Proposer's ability to perform the services in the Agreement as the City deems appropriate.

FINAL SELECTION

The City of Opa-locka will select the firm that meets the best interests of the City. The City shall be the sole judge of its own best interests, the proposals, and the resulting negotiated Agreement. The City's decisions will be final. Following the selection of firm, the expectation is that an Agreement will be executed between both parties. City staff will recommend award to the responsible Proposer whose Proposal is determined to provide overall best value to the City, considering the evaluation factors in this RFP.

AWARD AND CONTRACT EXECUTION

After review by the Selection Committee of the proposals and oral presentations a recommendation will be made to the City Manager for submission to the City Commission for final approval. Upon Commission authorization, contract negotiations will be initiated with the first ranked firm. If those negotiations are unsuccessful, the City will formally terminate negotiations with the first ranked firm and will commence contract negotiations with the next ranked firm, etc. Upon successful contract negotiations with the prevailing firm, the remaining firms will be notified that the process has been completed and that they were not selected.

THE CITY OF OPA-LOCKA, FLORIDA

BID PROPOSAL FORM

TO THE COMMISSION OF THE CITY OF OPA- LOCKA,
FLORIDA

Ladies and Gentlemen:

The undersigned bidder proposes to furnish all labor, tools, material and supplies, and to sustain all the expense incurred in doing the work set forth below that may be awarded the undersigned by the City of Opa-Locka, Florida, through its proper officers, and to do the same strictly in accordance with the plans and contract documents on file in the Office of the City Engineer of Opa-Locka, which are referred to below and made a part hereof, at the following combination of lump sum prices:

Item No.	Estimated Quantity	Description	Total
1.	Lump Sum (Divided into 2 or 4 payments See Measurement and Payment for Conditions)	For performing preparatory work and operations in mobilizing for beginning the work of the Project, but excluding materials and permit costs, both of which are paid under other payments items, the lump sum of _____ Dollars and _____ Cents	$_____
2.	130 LF	For selling and delivering to the City 66-inch SRASP pipe and joints by Contech, or approved equal, for the three (3) barrel culvert installation, the price per linear foot of _____ Dollars and Cents	$_____

3.	130 LF	For installing 66-inch SRASP pipe and joints by Contech, or approved equal, for the three (3) barrel culvert, price per linear foot of _____ Dollars and Cents	$_____
Item No.	Estimated Quantity	Description	Total
4.	75 LF	For selling and delivering to the City General Guardrail per FDOT index No. 400 with mechanical appurtenances required, the price per linear foot of _____ Dollars and Cents	$_____
5.	75 LF	For installing City General Guardrail per FDOT index No. 400 with mechanical appurtenances required, the price per linear foot of _____ Dollars and Cents	$_____
6.	Lump Sum	For demolition and removal of existing three (3) 66-inch concrete pipe culvert with headwalls and retaining walls, the lump sump of _____ Dollars and Cents	$_____

7.	670 CY	For the excavating of existing backfill material at existing Culvert location, the price per cubic yard of _____ Dollars and Cents	$_____

8.	Lump Sum	For providing adequate bypass pumping to maintain uninterrupted Canal flow during construction, the price per lump sump of _____ Dollars and Cents	$_____
Item No.	Estimated Quantity	Description	Total
9.	100 LF	For furnishing and installing all necessary Turbidity Barriers for erosion control measures specified on plans, the price per linear foot of _____ Dollars and Cents	$_____
10.	2 Each	For furnishing and installing all necessary Drop Inlet Sediment Protection for erosion control measures specified on plans, the per unit of _____ Dollars and Cents.	$_____

11.	45 CY	For selling and delivering to the City Concrete for the installation of 10-inch thick Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, the price per cubic yard of _____ Dollars and Cents.	$_____
12.	45 CY	For constructing 10-inch thick Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, as indicated in the Plans, the price per cubic yard of _____ Dollars and Cents.	$_____

13.	405 SF	For furnishing and constructing 4-inch thick sidewalk and ramp curbing to match existing per FDOT index No. 310, the price per square foot of _____ Dollars and Cents.	$_____
Item No.	Estimated Quantity	Description	Total
14.	150 SF	For constructing new concrete curb and gutter per FDOT index No. 300, the price per square foot of _____ Dollars and Cents.	$_____

15.	200 CY (Contingent Item)	For furnishing and placing suitable Backfill (A-24 or better) required for Culvert placement, the price per cubic yard of _____ Dollars and Cents.	$_____
16.	280 TON	For furnishing and installing Rubble (Broken Stone), including filter fabric, at Culvert embankment for the rip-rap installation as per FDOT Standard Specification No. 530, the price per ton of _____ Dollars and Cents.	$_____

17.	25 CY	For furnishing and installing sand-cement rip rap bags at culvert pipe ends per Miami-Dade County DTPW BC 3.4 & BC 3.5 for straight end pipes, the price per cubic yard of _____ Dollars and Cents.	$_____
Item No.	Estimated Quantity	Description	Total
18.	45 CY	For furnishing and constructing concrete endwall for three (3) 66" barrel culvert installation as per FDOT index 430-032, the price per cubic yard of _____ Dollars and Cents.	$_____

19.	65 LF	For furnishing and installing concrete shoulder barrier as per FDOT index No. 521-001, the price per linear foot of _____ Dollars and Cents.	$_____
20.	1025 SY	For milling (nominal 1 inch thick), surface course for permanent paving repairs, the price per square yard of _____ Dollars and Cents.	$_____
21.	1025 SY	For constructing for Type "V" permanent paving repairs as per details provided in plans, the price per square yard of _____ Dollars and Cents.	$_____

22.	8 each	For replacing pavement markings damaged, removed, or obliterated by the contractor's operation, the price per unit of _____ Dollars and Cents.	$_____
Item No.	Estimated Quantity	Description	Total

23.	40 SY (Contingent Item)	For restoring sodded area, the price per square yard of _____ Dollars and Cents.	$_____
24.	Lump Sum	For providing full Traffic Control during construction, Maintenance of Traffic, the lump sum price of _____ Dollars and Cents.	$_____
25.	2100 SF (Contingent Item)	For sheeting and shoring ordered left in place by the Engineer, the price per square foot of _____ Dollars and Cents.	$_____
26.	670 CY (Contingent Item)	For removal, transport and legal disposal of unsuitable backfill materials, including tipping fees, the price per cubic yard of _____ Dollars and Cents.	$_____

27.	**Sub-Total – Bid Items 1 through 26**	$_____	

Item No.	Estimated Quantity	Description	Total
28.	Dedicated Allowance	For providing uniformed, off-duty policemen for the purpose of maintenance of traffic, the aggregate sum of _____ Dollars and Cents.	$_____
29.		For all cost of required permit fees, impact fees, if required by the Engineer, the sum of 3% of the Subtotal, Item 27 (0.03) x (Subtotal, Item 27) _____ Dollars and Cents.	$_____
30.		For unforeseen conditions, for minor construction changes and for quantity adjustments, if ordered by the Engineer, the sum of 10% of the Subtotal, Item 27 (.10) x (Subtotal, Item 27) _____ Dollars and Cents.	$_____

31.	**TOTAL BID – (Sum of Bid Item Nos. 27, 28, 29 and 30)**	$_____	

Note: For a detailed description of each Quotation Item, refer to Section 01025 of the Specifications entitled "Measurement and Payment.

THE CITY OF OPA-LOCKA OPA-LOCKA, FLORIDA

BID PROPOSAL FORM

The City of Opa-Locka reserves the right to waive any informality in any bid and to reject any or all bids.

TOTAL BASE BID PRICE FOR PROPOSAL (ITEMS 1 THROUGH 32): $_____
(FIGURES)

_____Dollars and

_____Cents

AMOUNTS SHALL BE SHOWN ON BOTH WORDS AND FIGURES. IN CASE OF DISCREPANCIES, THE AMOUNT SHOWN IN WORDS SHALL GOVERN FOR EACH BID ITEM AND TOTAL BASE BID.

Bidder acknowledges that included in the various items of the bid proposal and in the TOTAL BASE BID PRICE are costs for complying with the Florida Trench Safety Act, F.S. 553.60 et. seq. The Bidder by signing and submitting the Trench Safety Act Compliance Statement is, in writing, assuring that it will perform any trench excavation in accordance with applicable trench safety standards.

Contract award shall be based upon the total base bid price, as identified above, by the lowest responsive, responsible bidder.

RFP NO. 23-1016200

The Proposer, as a result of this proposal, MUST hold a County and/or Municipal Contractor's Occupational License in the area of their fixed business location. The following information MUST be completed and submitted with the proposal to be considered:

1. Legal Name and Address:

   Name: _____

   Address: _____

   City, State, Zip: _____ Phone/Fax: _____

2. Check One: Corporation ( ) Partnership ( ) Individual ( )

3. If Corporation, indicate:
   Date of Incorporation: _____ State in which Incorporated: _____

4. If an out-of-state Corporation, currently authorized to do business in Florida, give date of such authorization: _____

5. **Name and Title of Principal Officers** **Date Elected:**

   _____ _____

   _____ _____

   _____ _____

   _____ _____

6. The length of time in business:_years

7. The length of time (continuous) in business as a service organization in Florida: ___years

8. Provide a list of at least three commercial or government references that the bidder has supplied service/commodities meeting the requirements of the City of Opa-locka RFP during the last twenty-four months.

9. A copy of County and/or Municipal Occupational License(s)

Note: *Information requested herein and submitted by the Proposers will be analyzed by the City of Opa-locka and will be a factor considered in awarding any resulting contract. The purpose is to insure that the Contractors, in the sole opinion of the City of Opa-locka, can sufficiently and efficiently perform all the required services in a timely and satisfactory manner as will be required by the subject contract. If there are any terms and/or conditions that are in conflict, the most stringent requirement shall apply.*

CITY OF OPA-LOCKA

CERTIFICATION REGARDING DEBARMENT, SUSPENSION PROPOSED DEBARMENT AND OTHER MATTERS OF RESPONSIBILITY

1. The Proposer certifies, to the best of its knowledge and belief, that the Proposer and/or any of its Principals:

A. Are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency.

B. Have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, or receiving stolen property; and

C. Are not presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph 1-B of this provision.

2. The Proposer has not, within a three-year period preceding this offer, had one or more contracts terminated for default by any City, State or Federal agency.

A. "Principals," for the purposes of this certification, means officers; directors; owners; partners; and persons having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment, and similar positions). This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

B. The Proposer shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Proposer learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

C. A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Proposer's responsibility. Failure of the Proposer to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Proposer non- responsive.

D. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of a Proposer is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

E. The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Proposer knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

AS THE PERSON AUTHORIZED TO SIGN THE STATEMENT, I CERTIFY THAT THIS FIRM COMPLIES FULLY WITH THE ABOVE REQUIREMENTS.

CITY OF OPA-LOCKA RFP NO. 23-1016200

DRUG-FREE WORKPLACE CERTIFICATION FORM

Whenever two (2) or more bids/proposals, which are equal with respect to price, quality, and service, are received by the CITY OF OPA-LOCKA for the procurement of commodities or contractual services, a bid/proposal received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. In order to have a drug-free workplace program, a business shall:

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of controlled substances is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in number (1).

4. In the statement specified in number (1), notify the employees that as a condition for working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction on or plea of guilty or no contest to any violation of Chapter 893, Florida Statutes or of any controlled substance law of the United States or any singular state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5. Impose a sanction on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community by any employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of Section 287.087, Florida Statutes.

This Certification is submitted by_____the
(Name)
_____ of_____
(Title/Position) (Company)

who does hereby certify that said Company has implemented a drug-free workplace program, which meets the requirements of Section 287.087, Florida Statutes, which are identified in numbers (1) through (6) above.

E-VERIFY

Effective January 1, 2021, public and private employers, contractors and subcontractors will be required to register with, and use of the E-Verify system in order to verify the work authorization status of all newly hired employees. Vendor/Consultant/Contractor acknowledges and agrees to utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

a) All persons employed by Vendor/Consultant/Contractor to perform employment duties within Florida during the term of the contract; and

b) All persons (including sub-vendors/sub-consultants/sub-contractors) assigned by Vendor /Consultant/ Contractor to perform work pursuant to the contract with the Department. The Vendor /Consultant/ Contractor acknowledges and agrees that use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City; and

By entering into a Contract, the Contractor becomes obligated to comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes but is not limited to utilization of the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. If t contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of 1 year after the date of termination. The Contractor acknowledges it is liable to

the City for any additional costs as a result of termination of the contract due to Contractor's failure to comply with the provisions herein.

E-VERIFY FORM

Definitions:

"Contractor" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for salary, wages, or other remuneration.

"Subcontractor" means a person or entity that provides labor, supplies, or services to or for a contractor or another subcontractor in exchange for salary, wages, or other remuneration.

Effective January 1, 2021, public and private employers, contractors and subcontractors will begin required registration with, and use of the E-Verify system in order to verify the work authorization status of all newly hired employees. Vendor/Consultant/Contractor acknowledges and agrees to utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

a) All persons employed by Vendor/Consultant/Contractor to perform employment duties within Florida during the term of the contract; and

b) All persons (including sub-vendors/subconsultants/subcontractors) assigned by Vendor/Consultant/Contractor to perform work pursuant to the contract with the Department. The Vendor/Consultant/Contractor acknowledges and agrees that use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City of Opalocka; and

Should vendor become successful Contractor awarded for the above-named project, by entering into this Contract, the Contractor becomes obligated to comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes but is not limited to utilization of the EVerify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. If this contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of 1 year after the date of termination.

Subject: Bid Proposal Submittal for Sesame Street Culvert Replacement between NW 135th St. & Atlantic Ave (RFP NO: 23-1016200)

Dear City of Opa-Locka,

I am writing to submit my bid proposal for the Sesame Street Culvert Replacement between NW 135th St. & Atlantic Ave as advertised by your esteemed organization. As a highly skilled and experienced Safa Construction, I am confident that my proposal will not only meet but exceed your expectations.

I have carefully reviewed the project requirements outlined in the Request for Proposal (RFP) document and believe that my expertise aligns perfectly with the needs of the project. I have a proven track record of delivering exceptional results in similar projects, and I am eager to bring my skills and knowledge to contribute to the success of your project.

I take great pride in my professionalism, attention to detail, and commitment to delivering projects on time and within budget. Throughout my career, I have built strong relationships with clients by actively listening to their needs, communicating effectively, and providing tailored solutions. I am confident that my dedication to customer satisfaction and my ability to adapt to changing project requirements will make me an ideal partner for this endeavor.

Furthermore, I understand the importance of collaboration and teamwork in achieving project success. I am ready to work closely with your team, actively participating in meetings, sharing progress reports, and addressing any concerns promptly. By fostering open communication and maintaining a strong work ethic, I am confident that we can achieve outstanding results together.

Bonding Program

Dear Sir or Madam:

Please let this letter serve as notice that Safa Construction is bonded by the Foundation Surety & Insurance Solutions, which is listed as a U.S. Treasury Department approved surety.

Based upon our solid relationship, and Safa Construction's top rated performance, we are pleased to state that Safa Construction does have bonding capacity currently available with Foundation Surety & Insurance Solutions for a single bond of $1.5 million with an aggregate of up to $3.5 million. It is understood the issuance of any final or bid bonds is a matter between the Safa Construction and Foundation Surety & Insurance Solutions and no liability to third parties is assumed should bonds not be executed for any reason.

We fully recommend Safa Construction for your construction needs. You will find the company has a proven track record of owner satisfaction and of bringing projects in on time and within budget.

If you have any questions, please feel free to call.

Sincerely,

David S. Salavitch

B3.Debarment, Suspension Certification

CITY OF OPA-LOCKA

CERTIFICATION REGARDING DEBARMENT, SUSPENSION PROPOSED DEBARMENT AND OTHER MATTERS OF RESPONSIBILITY

1. The Proposer certifies, to the best of its knowledge and belief, that the Proposer and/or any of its Principals:

A. Are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency.

B. Have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, or receiving stolen property; and

C. Are not presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph 1-B of this provision.

2. The Proposer has not, within a three-year period preceding this offer, had one or more contracts terminated for default by any City, State or Federal agency.

A. "Principals," for the purposes of this certification, means officers; directors; owners; partners; and, persons having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment, and similar positions). This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

B. The Proposer shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Proposer learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

C. A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Proposer's responsibility. Failure of the Proposer to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Proposer non-responsive.

D. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of a Proposer is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

E. The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Proposer knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

AS THE PERSON AUTHORIZED TO SIGN THE STATEMENT, I CERTIFY THAT THIS FIRM COMPLIES FULLY WITH THE ABOVE REQUIREMENTS.

B7. E-Verify Form

E-VERIFY FORM

Definitions:

"Contractor" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for salary, wages, or other remuneration.

"Subcontractor" means a person or entity that provides labor, supplies, or services to or for a contractor or another subcontractor in exchange for salary, wages, or other remuneration.

Effective January 1, 2021, public and private employers, contractors and subcontractors will begin required registration with, and use of the E-verify system in order to verify the work authorization status of all newly hired employees. Vendor/Consultant/Contractor acknowledges and agrees to utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

a) All persons employed by Vendor/Consultant/Contractor to perform employment duties within Florida during the term of the contract; and

b) All persons (including sub-vendors/subcompanies/subcontractors) assigned by Vendor/Consultant/Contractor to perform work pursuant to the contract with the Department. The Vendor/Consultant/Contractor acknowledges and agrees that use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City of Opa-locka; and

Should vendor become successful Contractor awarded for the above-named project, by entering into this Contract, the Contractor becomes obligated to comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes but is not limited to utilization of the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. If this contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of 1 year after the date of termination.

B8. Certification Regarding Debarment

CITY OF OPA-LOCKA

CERTIFICATION REGARDING DEBARMENT, SUSPENSION PROPOSED DEBARMENT AND OTHER MATTERS OF RESPONSIBILITY

1. The Proposer certifies, to the best of its knowledge and belief, that the Proposer and/or any of its Principals:

A. Are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency.

B. Have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, or receiving stolen property; and

C. Are not presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph 1-B of this provision.

2. The Proposer has not, within a three-year period preceding this offer, had one or more contracts terminated for default by any City, State or Federal agency.

A. "Principals," for the purposes of this certification, means officers; directors; owners; partners; and, persons having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment, and similar positions). This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

B. The Proposer shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Proposer learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

C. A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Proposer's responsibility. Failure of the Proposer to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Proposer non-responsive.

D. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of a Proposer is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

E. The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Proposer knowingly

rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

AS THE PERSON AUTHORIZED TO SIGN THE STATEMENT, I CERTIFY THAT THIS FIRM COMPLIES FULLY WITH THE ABOVE REQUIREMENTS.

SUMMARY OF EXPERIENCE

Over Twenty (20) years of professional experience in Civil Engineering and leading all functions of Heavy Civil Construction and Project Management including Contract Administration, Accounting, Planning, Design, Processing, Specs Review, Field Supervision and Operations, Managing Staff, Mentoring young Professionals, Supervising sub-contractors, Budgeting, Scheduling, Progress Reporting and Timely Completion of Projects. Mr. MD's areas of expertise are:

- Manage contracts and completion of several municipal, commercial and private construction projects from a variety range of scopes and in excess of $15 Billion.
- Monitoring the progress of contracts administration including design-build projects.
- Receive and analyze bids after award for turnover to management team.
- Execution of construction including supervision of subcontractors, and awarding sub's subcontracts and major purchase orders with vendors and suppliers.
- Work with Senior VP, operations manager, field and office core personnel to establish planning for job Execution and Logistics.
- Evaluate and maintain cost control and forecasting from beginning and thru the duration of project.
- Coordinates requirements of governing authorities for permits, inspections and final approval of the project with A/E.
- Maintain submittal control, including scheduling, receiving, reviewing, approving and expediting submittals from suppliers and subcontractors to comply with progress of CPM schedule.
- Manages client relations and participate with the development of new business for the company.
- Control invoicing from subcontractors and vendors, including review and approval of schedules of values, pay requisitions and verify compliance of subs with proper insurance coverage.
- Review and monitors QC/QA and safety.
- Supervise and assists in the development of office personnel through mentoring and on-the-job training.
- Effectively manages project close-out tasks and warranty work.

PROJECT EXPERIENCES

- Midtown Miam, Miami Dade County FL - Installation of 26,400 LF of 36" C-900 PVC Pipe, 21,400 LF of 42" HDPE pipe including a new meter station and site work restoration for asphalt, concrete sidewalks, curbing, driveways, installation of new drainage structures, piping valves and appurtenances - $25M

- Marriott at Miami Airport , Miami, FL - Installation of 38,500 LF of 28" HDPE and 9,100 LF of 14" HDPE piping system including 200 LF of 30" DIP pipe and overhead metal bridge, nine (9) Recovery Well Systems connected to 28" header pipe with approx. depth from 70-95 feet. FL - $17.0 M

Dilnahar H. Shuvo, MS, PE
Vice-President

SAFA CONSTRUCTION, LLC

Ms. Shuvo, with eight years of experience, has prepared calculations and plans for the design of highways and streets, including roadway alignments and profiles, signing and striping, lighting, paving, and grading, preforming quantity calculations, design calculations, and project cost estimating, researched standards and specifications and has worked with City, County, State, and Federal manuals utilizing applied software to perform engineering analysis and prepare reports. She also has lighting, sign design and drainage design experience using AGI32, Guide Sign, AutoTurn Analysis and ICPR. Ms. Shuvo has working experience with OpenRoads Designer, MicroStation, AutoCAD, Microsoft Office, HCM 2000, and CORSIM (Version 6.0).

PROJECT EXPERIENCE

I-95 and Spanish River Boulevard Interchange, Palm Beach County – FDOT District 4
Engineer Intern responsible for assisting in the design for the drainage modifications of Segments 4 and 5. This task was part of the on-going design build project at the I-95 Spanish River Blvd Interchange in Boca Raton, FL. This project included the construction a new two-level interchange, modification of the existing Yamato Road and I-95 interchange, addition of auxiliary lanes from Glades Road to Congress Avenue on I-95 and cross street improvements of Spanish River Blvd. and Yamato Road. This two-level interchange includes coordination with FAA, Boca Airport, City of Boca Raton, and Florida Atlantic University (FAU). This improvement will provide connectivity between FAU, Tri-Rail and I-95 and alleviate daily congestion as well as accommodate traffic generated during events held at the FAU stadium.

Boynton Beach Various Locations, Palm Beach County – FDOT District 4
Project Engineer for this is a federally funded, MPO driven, off-system project to improve mobility along Boynton Beach Blvd. This project has two main corridors with various segments. The first segment runs along Boynton Beach Blvd, the existing travel lanes width will be reduced to provide an 11' and 10' travel lane in each direction with sharrows and an 11' and 15' shared use path. This segment also includes decorative lighting along the corridor. The second segment runs along NE 3rd St, Boynton Beach Blvd, and Ocean Ave providing sharrows. The main items included in the scope are, the accommodation of bicyclists.

City of Oakland Park Lakeside Sidewalks – Various Locations, Broward County – FDOT District 4
Project Engineer for this mobility project consisting of pedestrian improvements for the Lakeside neighborhood. Improvements include filling sidewalk gaps, drainage improvements, and signing and pavement markings.

SR 615/S 25th St from N of Edwards Rd to N of Virginia Ave, St. Lucie County – FDOT District 4
Project Engineer for this RRR project consisting of milling and resurfacing of the existing pavement to extend the service life of the corridor, as well as general highway safety enhancements. The project also includes lighting retrofit at the three signalized intersections and the addition reflectorized backplates.

SR 809/Military Trail from Dyer Blvd to N of Flag Dr, Palm Beach County – FDOT District 4
Project Engineer for this RRR project consisting of milling and

Certificate of Completion

MD Rahman

has met the online course completion requirements for

OSHA 30-Hour Construction Safety

This student has completed the formal instruction for the 30-Hour Construction Outreach Program. Topics covered in this program were Introduction to OSHA, Managing Safety and Health, Struck-by and Caught-In or Between Hazards, Personal Protective Equipment, Hearing Conservation, Respiratory Protection, Lead and Crystalline Silica, Asbestos, GHS Hazard Communication, Electrical Safety, Hand and Power Tools, Fall Protection, Ladder Safety, Excavations, Scaffolds, Crane Safety, Heavy Equipment, Forklift Safety, Materials Handling, Permit-Required Confined Spaces, Fire Safety, Welding and Cutting, Concrete and Masonry, Steel Erection, and Ergonomics.

As an OSHA Outreach Training Program trainer, I affirm that I have conducted this OSHA Outreach Training Program training class in accordance with OSHA Outreach Training Program requirements. I will document this class to my OSHA Authorizing Training Organization. Upon successful review of my documentation, I will provide each student their course completion card within 90 calendar days of the end of the class. — Rick Gleason

Safa installed 18" RCP in six
(6) different locations

Safa restore pond bank for a private owen.
Contract cost : Five thousand

Safa intalled concete in Nine (9) different locations

Note: In this project Safe is not installed by culvert or restore the canal bank. This task will be done by the sub. Safa will installed the concrete pavement on top of the culvert.

C3. RESOURCES AND APPROACHES

Resources :

Safa consists of full of adequate resources for this project. In this project, most of work will be done the skilled subcontractor, who are working on this type of project for their living. The resource subdivisions are many based on different management organizations. It is our understanding in this project four (4) type of resources is significant. 1) Human resources 2) Material resources 3) Equipment resources 4) Financial resources/capacity.

1) Human resources: Safa Construction is full of capable and skilled labor firms. Two Professional Engineers will consciously assist the workers, guide them, and inspect their work. Safa has also a highly skilled project manager/ superintend who will coordinate with workers for their work and safety. See the list of major subcontractors for subcontractor information.
2) Material resources: Safa Construction will purchase all the materials as specified in the plan.
3) Equipment resources: Safa mostly rented the equipment from commercial equipment rental places. Safa has commercial accounts with equipment rental places.
4) Financial resources/capacity:

    1) Currently the SAFA construction has a working capital of 1.5M dollars.
    2) Bonding capacity of 3.5 million dollars.
    3) SAFA construction is a comparatively new company. However, in this short amount of time, we completed eight (8) public projects and six (6) single-family homes (finishing in November 2023). The net project cost for all of the projects is 1.7 million dollars. This is a proven record of financial stability and the flourishing of the company.

Approaches: (See the attached sketch below)

1) PHASE I –MOBILIZATION

STEP –1 INITIATE MOBILIZATION.

STEP –2 VERIFY EXISTING UTILITY AND PROTECT THOSE.

STEP –3 VERIFY PROPOSED AND EXISTING ELEVATION.

STEP –4 SHOP DRAWING SUBMITTAL.

STEP 5– INSTALL A TEMPORARY FENCE.

1) Demolition..... 1 week
2) Installation of the culvert, head wall etc..... 3 week
3) Installation rip-rap.....2 week
4) Installation of Rigid pavement.....1 week
5) Installation of flexible pavement.....1 week

Total **8 week or 2 months**

Note: Schudel compression (Combination of schedule crashing and fast-tracking) technique has been applied to the process faster.

C5. Price Proposal

THE CITY OF OPA-LOCKA, FLORIDA

BID PROPOSAL FORM

TO THE COMMISSION OF THE CITY OF OPA-LOCKA, FLORIDA

Ladies and Gentlemen:

The undersigned bidder proposes to furnish all labor, tools, material and supplies, and to sustain all the expense incurred in doing the work set forth below that may be awarded the undersigned by the City of Opa-Locka, Florida, through its proper officers, and to do the same strictly in accordance with the plans and contract documents on file in the Office of the City Engineer of Opa-Locka, which are referred to below and made a part hereof, at the following combination of lump sum prices:

Item No.	Estimated Quantity	Description	Total
1.	Lump Sum (Divided into 2 or 4 payments See Measurement and Payment for Conditions)	For performing preparatory work and operations in mobilizing for beginning the work of the Project, but excluding materials and permit costs, both of which are paid under other payments items, the lump sum of _____ Dollars and _____ Cents	$ 20,000.00
2.	130 LF	For selling and delivering to the City 66-inch SRASP pipe and joints by Contech, or approved equal, for the three (3) barrel culvert installation, the price per linear foot of 200.00 Dollars and Cents	$ 26,000.00

3.	130 LF	For installing 66-inch SRASP pipe and joints by Contech, or approved equal, for the three (3) barrel culvert, price per linear foot of 800.00 Dollars and Cents	$ 104,000.00

Item No.	Estimated Quantity	Description	Total
4.	75 LF	For selling and delivering to the City General Guardrail per FDOT index No. 400 with mechanical appurtenances required, the price per linear foot of 100.00 Dollars and Cents	$ 7,500.00
5.	75 LF	For installing City General Guardrail per FDOT index No. 400 with mechanical appurtenances required, the price per linear foot of 200.00 Dollars and Cents	$ 15,000.00
6.	Lump Sum	For demolition and removal of existing three (3) 66-inch concrete pipe culvert with headwalls and retaining walls, the lump sump of _____ Dollars and Cents	$ 300,000.00
7.	670 CY	For the excavating of existing backfill material at existing Culvert location, the price per cubic yard of 150.00 Dollars and Cents	$ 100,500.00

8.	Lump Sum	For providing adequate bypass pumping to maintain uninterrupted Canal flow during construction, the price per lump sump of _____ Dollars and Cents	$ 50,000.00

Item No.	Estimated Quantity	Description	Total
9.	100 LF	For furnishing and installing all necessary Turbidity Barriers for erosion control measures specified on plans, the price per linear foot of 20.00 Dollars and Cents	$ 2,000.00
10.	2 Each	For furnishing and installing all necessary Drop Inlet Sediment Protection for erosion control measures specified on plans, the per unit of 5000.00 Dollars and Cents.	$ 10,000.00
11.	45 CY	For selling and delivering to the City Concrete for the installation of 10-inch thick Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, the price per cubic yard of 350.00 Dollars and Cents.	$ 15,750.00

CITY OF OPA-LOCKA
SESAME STREET CULVERT REPLACEMENT WITHIN THE CITY AGREEMENT

THIS IS AN AGREEMENT, dated the_____day of_____, 2024, between:

THE CITY OF OPA-LOCKA, a Florida municipal corporation,
hereinafter "CITY"

and

SAFA CONSTRUCTION, LLC., a Florida Limited
Liability Company, hereinafter "CONTRACTOR."

WITNESSETH:

In consideration of the mutual terms and conditions, promises, covenants, and payments hereinafter set forth, CITY and CONTRACTOR agree as follows:

ARTICLE 1
PREAMBLE

In order to establish the background, context and form of reference for this Agreement and to generally express the objectives, and intentions, of the respective parties herein, the following statements, representations and explanations shall be accepted as predicates for the undertakings and commitments included within the provisions which follow and may be relied upon by the parties as essential elements of the mutual considerations upon which this Agreement is based.

1.1 CITY is in need of a CONTRACTOR to provide the services for the Sesame Street Culvert Replacement, within the City.

1.2 CONTRACTOR has a strong commitment to provide the services with the necessary experience, qualifications, references, resources, approach and price proposal.

1.3 CITY issued RFP NO. 23-1016200 (“RFP”), seeking a professional company with the knowledge and ability to perform the services sought.

1.4 At its meeting of, January 10, 2024, the CITY evaluated CONTRACTOR to perform the services needed to conduct a Sesame Street Culvert Replacement within the City and at the City Commission meeting of January 10, 2024, the City Commission selected CONTRACTOR to perform the needed work.

ARTICLE 2
SCOPE OF WORK

2.1 CONTRACTOR shall furnish all the materials, tools, supplies, and labor necessary to perform all of the work described in the Request for Qualifications RFP 23-1016200, a copy of which is attached hereto and specifically made a part of this Agreement as Exhibit "A", and the Scope of Services attached hereto as Exhibit “B”.

2.2 CONTRACTOR shall abide by all specifications outlined in RFP 23-1016200.

2.3 CONTRACTOR hereby represents to CITY, with full knowledge that CITY is relying upon these representations when entering into this Agreement with CONTRACTOR, and that CONTRACTOR has the professional expertise, experience and manpower to perform the services to be provided by CONTRACTOR as set forth in CONTRACTOR’s response to RFP.

2.4 CONTRACTOR assumes professional and technical responsibility for performance of its services to be provided hereunder in accordance with applicable recognized professional standards and relevant Florida Statutes.

ARTICLE 3
COMMENCEMENT OF SERVICES

3.1 The CONTRACTOR shall commence work as directed by CITY upon the effective date this Agreement is executed by both parties.

ARTICLE 4
COMPENSATION

4.1 CONTRACTOR will perform the services at a total cost to City of One Million, Two Hundred Thousand Dollars ($1,200,000.00) the Sesame Street Culvert Replacement within the City.

4.2 CONTRACTOR shall be solely responsible for and shall provide for the payment of workers compensation insurance coverage (with statutory limits and Employer's Liability coverage with limits not less than One Hundred Thousand Dollars ($100,000) (Including Policy Number and Policy Period) and premium, and all other insurance pursuant to Article 5 below, withholding taxes, FICA, pension and profit-sharing contributions, retirement contributions, if any, all remunerations; all labor contract compliance, and all other charges, fees, permits and expenses associated with the employment of such personnel provided by CONTRACTOR hereunder. CITY shall bear no responsibility for any such charge, fees, permits or expenses associated with the employment of such personnel by CONTRACTOR.

4.3 Payment to CONTRACTOR for all tasks and charges under this Agreement shall be based on the following conditions:

A. Disbursements. There are no reimbursable expenses associated with this Agreement.

B. Payment Schedule. Invoices received from CONTRACTOR pursuant to this Agreement will be reviewed by the appropriate financial staff. If services have been rendered in conformity with the Agreement, the invoice will be sent to the City of Opa-locka's Finance Department for payment and may need to be subsequently approved by the State of Florida.

C. Availability of Funds. CITY's performance and obligation to pay under this Agreement is contingent upon an annual appropriation from the CITY.

4.4 The making and acceptance of the final payment shall constitute a waiver of all claims by the CITY. It shall also constitute a waiver of all claims by the CONTRACTOR, except those previously made and still unsettled.

ARTICLE 5
CONTRACTOR'S LIABILITY INSURANCE

5.1 The CONTRACTOR shall not commence work under this contract until it has obtained all insurance required under this paragraph and such insurance has been approved by the CITY nor shall the CONTRACTOR allow any Subcontractor to commence work on his sub-contract until all similar such insurance required of the subcontractor has been obtained and approved.

5.2 Certificates of insurance, reflecting evidence of the required insurance, shall be filed with the CITY prior to the commencement of the work. These Certificates shall contain a provision that coverage afforded under these policies will not be canceled until at least thirty days (30) prior written notice has been given to the CITY. Policies shall be issued by companies authorized to do business under the laws of the State of Florida.

5.3 Insurance shall be in force until all work required to be performed under the terms of the Contract is satisfactorily completed as evidenced by the formal acceptance by the CITY. In the event the insurance certificate provided indicates that the insurance shall terminate and lapse during the period of this contract, then in that event, the CONTRACTOR shall furnish, at least thirty (30) days prior to the expiration of the date of such insurance, a renewed certificate of insurance as proof that equal and like coverage for the balance of the period of the contract and extension thereunder is in effect. The CONTRACTOR shall not continue to work pursuant to this contract unless all required insurance remains in full force and effect.

5.4 Comprehensive General Liability insurance to cover bodily injury liability and property damage liability with minimum limits of One Million Dollars ($1,000,000.00) per occurrences. Exposures to be covered are:

- Premises and Operation

- Products/Completed Operations
- Broad Form Property Damages
- Broad Form Contractual Coverage applicable to this specific Agreement, including any hold harmless and/or indemnification agreement.
- Personal Injury Coverage with Employee and Contractual Exclusions removed, with minim limits of coverage equal to those required for Bodily Injury Liability and Property Damage Liability.

Business Automobile Liability with minimum limits of One Million dollars ($1,000,000.00) per occurrence, combined single limit for Bodily Injury Liability and Property Damage Liability. Coverage must be afforded on a form no more restrictive than the latest edition of the Business Automobile Liability policy, without restrictive endorsements, and must include:

- Owned vehicles
- Hired and Non-Owned Vehicles
- Employers' Non-Ownership.

5.5 The CONTRACTOR shall hold the CITY, the City of Opa-Locka their agents, and employees, harmless on account of claims for damages to persons, property or premises arising out of the operations to complete this Agreement and name the CITY as an additional insured under their policy.

5.6 The CITY reserves the right to require any other insurance coverage it deems necessary depending upon the exposures.

ARTICLE 6
PROTECTION OF PROPERTY

6.1 At all times during the performance of this Contract, the CONTRACTOR shall protect the CITY's property and properties adjoining the Project site from all damage whatsoever on account of the work being carried on pursuant to this Agreement.

ARTICLE 7
CONTRACTOR'S INDEMNIFICATION

7.1 The CONTRACTOR agrees to release the CITY from and against any and all liability and responsibility in connection with the above-mentioned matters. The CONTRACTOR further agrees not to sue or seek any money or damages from CITY in connection with the above-mentioned matters, except in the event that the CITY fails to pay to CONTRACTOR the fees and costs as provided for in Article 4 herein.

7.2 The CONTRACTOR agrees to indemnify and hold harmless the CITY, its trustees, elected and appointed officers, agents, servants and employees, from and against any and all claims, demands, or causes of action of whatsoever kind or nature, and the resulting losses, costs, expenses, reasonable attorneys' fees, liabilities, damages, orders, judgments, or decrees, sustained by the CITY or any third party arising out of, or by reason of, or resulting from the

CONTRACTOR's negligent acts, errors, or omissions.

7.3 If a court of competent jurisdiction holds the CITY liable for certain tortuous acts of its agents, officers, or employees, such liability shall be limited to the extent and limit provided in 768.28, Florida Statutes. This provision shall not be construed as a waiver of any right or defense that the CITY may possess. The CITY specifically reserves all rights as against all claims that may be brought.

ARTICLE 8
INDEPENDENT CONTRACTOR

8.1 This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the CONTRACTOR is an independent contractor under this Agreement and not the CITY's employee for all purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Workers Compensation Act, and the State unemployment insurance law. The CONTRACTOR shall retain sole and absolute discretion in the judgment of the manner and means of carrying out the CONTRACTOR's activities and responsibilities hereunder provided. This Agreement shall not be construed as creating any joint employment relationship between the CONTRACTOR and the CITY and the CITY will not be liable for any obligation incurred by CONTRACTOR, including but not limited to unpaid minimum wages and/or overtime premiums.

ARTICLE 9
CONTRACT BOND

9.1 The Contractor is required to furnish a Performance Bond and Payment Bond, each, in the amount of 100% of the total BID Price, including alternates if any, with the City of Opa-locka as the obligee, as security for the faithful performance of the contract and for the payment of all persons performing labor or furnishing materials in connection herewith.

The bonds shall be with a surety company authorized to do business in the State of Florida.

ARTICLE 10
CHANGES TO SCOPE OF WORK AND ADDITIONAL WORK

10.1 CITY or CONTRACTOR may request changes that would increase, decrease or otherwise modify the Scope of Services/Basic Services to be provided under this Agreement as described in Article 2 of this Agreement. Such changes or additional services must be in accordance with a written amendment, executed by the parties hereto, with the same formality and with equality and dignity prior to any deviation from the terms of this Agreement, including the initiation of any additional or extra work. Each amendment shall at a minimum include the following information on each project:

PROJECT NAME
PROJECT DESCRIPTION
ESTIMATED PROJECT COST
ESTIMATED COST FOR ADDITION OR CHANGE TO PROJECT CONTRACT
ESTIMATED PROJECT COMPLETION DATE

10.2 In no event will the CONTRACTOR be compensated for any work which has not been described in a separate written agreement executed by the parties hereto.

ARTICLE 11
TERM AND TERMINATION

11.1 This Agreement shall commence upon execution of this Agreement and shall be effective for one year.

11.2 This Agreement may be terminated by either party for cause, or the CITY for convenience, upon thirty (30) days written notice by the CITY to CONTRACTOR in which event the CONTRACTOR shall be paid its compensation for services performed to termination date. In the event that the CONTRACTOR abandons this Agreement or causes it to be terminated, he shall indemnify the CITY against any loss pertaining to this termination up to a maximum of the full contracted fee amount. All finished or unfinished documents, data, studies, plans, surveys, and reports prepared by CONTRACTOR shall become the property of CITY and shall be delivered by CONTRACTOR to CITY.

ARTICLE 12
CONTRACT DOCUMENTS

12.1 CONTRACTOR and CITY hereby agree that the following Specification and Contract Documents, which are attached hereto and made a part thereof, are fully incorporated herein and made a part of this Agreement, as if written herein word for word: this Agreement; RFP 23-1016200, Exhibit "A", and the CONTRACTOR's Response to RFP, attached hereto as Exhibit "B".

ARTICLE 13
MISCELLANEOUS

13.1 Legal Representation. It is acknowledged that each party to this Agreement had the opportunity to be represented by counsel in the preparation of this Agreement and, accordingly, the rule that a contract shall be interpreted strictly against the party preparing same shall not apply due to the joint contribution of both parties.

13.2 Assignments. This Agreement, or any interest herein, shall not be assigned, transferred or otherwise encumbered, under any circumstances, by CONTRACTOR without the prior written consent of CITY. For purposes of this Agreement, any change of ownership of CONTRACTOR shall constitute an assignment which requires CITY approval. However, this Agreement shall run to the CITY and its successors and assigns.

13.3 Records. CONTRACTOR shall keep books and records and require any and all subcontractors to keep books and records as may be necessary in order to record complete and correct entries as to personnel hours charged to this engagement, and any expenses for which CONTRACTOR expects to be reimbursed, if applicable. Such books and records will

be available at all reasonable times for examination and audit by CITY and shall be kept for a period of three (3) years after the completion of all work to be performed pursuant to this Agreement. Incomplete or incorrect entries in such books and records will be grounds for disallowance by CITY of any fees or expenses based upon such entries.

CITY is a public agency subject to Chapter 119, Florida Statutes. To the extent CONTRACTOR is acting on behalf of CITY pursuant to Section 119.0701, Florida Statutes, CONTRACTOR shall:

a. Keep and maintain public records that ordinarily and necessarily would be required to be kept and maintained by CITY were CITY performing the services under this agreement;

b. Provide the public with access to such public records on the same terms and conditions that the County would provide the records and at a cost that does not exceed that provided in Chapter 119, Florida Statutes, or as otherwise provided by law;

c. Ensure that public records that are exempt or that are confidential and exempt from public record requirements are not disclosed except as authorized by law; and

d. Meet all requirements for retaining public records and transfer to CITY, at no cost, all public records in possession of the CONTRACTOR upon termination of this Agreement and destroy any duplicate public records that are exempt or confidential and exempt. All records stored electronically must be provided to the CITY.

e. **IF CONSULTANT HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO CONSULTANT'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT (305) 953-2800, email: jflores@Opalockafl.gov OR BY MAIL: City of Opa-locka – City Clerk's Office, 780 Fisherman Street, Opa-Locka, FL 33054.**

13.4 Ownership of Documents. Reports, surveys, plans, studies and other data provided in connection with this Agreement are and shall remain the property of CITY.

13.5 No Contingent Fees. CONTRACTOR warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for the CONTRACTOR, to solicit or secure this Agreement, and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bona fide employee working solely for CONTRACTOR, any fee, commission, percentage, gift, or other consideration contingent upon or resulting from the award or making of this Agreement. For the breach or violation of this provision, the CITY shall have the right to terminate the Agreement without liability at its discretion, to deduct from the contract price, or otherwise recover the full amount of such fee, commission, percentage, gift or consideration.

13.6 Notice. Whenever any party desires to give notice unto any other party, it

must be given by written notice, sent by registered United States mail or national delivery service with verified confirmation. If by mail, with return receipt requested, addressed to the party for whom it is intended and the remaining party, at the places last specified, and the places for giving of notice shall remain such until they shall have been changed by written notice in compliance with the provisions of this section. For the present, the CONTRACTOR and the CITY designate the following as the respective places for giving of notice:

CITY: Darvin Williams, Interim City Manager
City of Opa-locka Municipal Complex
780 Fisherman Street, Fourth Floor
Opa-locka, FL 33054

Copy To: Burnadette Norris-Weeks, City Attorney
Burnadette Norris-Weeks, P.A.
401 North Avenue of the Arts
Fort Lauderdale, Florida 33311

Contractor:

MD Shahinur Rahman
Safa Construction, LLC.
11186 SW 17TH MNR
DAVIE, FL 33324

13.7 Binding Authority. Each person signing this Agreement on behalf of either party individually warrants that he or she has full legal power to execute this Agreement on behalf of the party for whom he or she is signing, and to bind and obligate such party with respect to all provisions contained in this Agreement.

13.8 Exhibits. Each Exhibit referred to in this Agreement forms an essential part of this Agreement. The exhibits if not physically attached should be treated as part of this Agreement and are incorporated herein by reference.

13.9 Headings. Headings herein are for convenience of reference only and shall not be considered on any interpretation of this Agreement.

13.10 Severability. If any provision of this Agreement or application thereof to any person or situation shall, to any extent, be held invalid or unenforceable, the remainder of this Agreement, and the application of such provisions to persons or situations other than those as to which it shall have been held invalid or unenforceable shall not be affected thereby, and shall continue in full force and effect, and be enforced to the fullest extent permitted by law.

13.11 Governing Law. This Agreement shall be governed by the laws of the State of Florida with venue lying in Miami-Dade County, Florida.

13.12 Disputes. Any claim, objection, or dispute arising out of the terms of this Agreement shall be litigated in the Eleventh Judicial Circuit Court in and for Miami-Dade County.

13.13 Attorney's Fees. To the extent authorized by law, in the event that either party brings suit for enforcement of this Agreement, the prevailing party shall be entitled to attorney's fees and court costs in addition to any other remedy afforded by law.

13.14 Extent of Agreement. This Agreement together with Contract Documents, attached as an Exhibit hereto, as amended herein above represents the entire and integrated agreement between the CITY and the CONTRACTOR and supersedes all prior negotiations, representations or agreements, either written or oral.

13.15 Waiver. Failure of the CITY to insist upon strict performance of any provision or condition of this Agreement, or to execute any right therein contained, shall not be construed as a waiver or relinquishment for the future of any such provision, condition, or right, but the same shall remain in full force and effect.

13.16 E-Verify. In accordance with Florida Statutes §448.095, the Contractor, prior to commencement of services or payment by the City, will provide to the City proof of participation/enrollment in the E-Verify system of the Department of Homeland Security. Evidence of participation/enrollment will be a printout of the Company's "Company Profile" page from the E-verify system. Failure to be continually enrolled and participating in the E-Verify program will be a breach of contract which will be grounds for immediate termination of the contract by the City. The Contractor will not hire any employee who has not been vetted through E-Verify. The Contractor may not subcontract any work for the City to any subcontractor that has not provided an affidavit stating that the subcontractor does not employ, contract with or subcontract with an unauthorized alien.

13.17 Scrutinized Companies. Contractor hereby certifies that it: a) has not been placed on the Scrutinized Companies that Boycott Israel List, nor is engaged in a boycott of Israel; b) has not been placed on the Scrutinized Companies with Activities in Sudan List nor the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List; and c) has not been engaged in business operations in Cuba or Syria. If City determined that Contractor has falsely certified facts under this paragraph or if Contractor is found to have been placed on the Scrutinized Companies Lists or is engaged in a boycott of Israel after the execution of this Agreement, City will have all rights and remedies to terminate this Agreement consistent with Section 287.135, Florida Statutes, as amended. The City reserves all rights to waive the certifications required by this paragraph on a case-by-case exception basis pursuant to Section 287.135, Florida Statutes, as amended. City reserves all rights to waive the certifications required by this paragraph on a case-by-case exception basis pursuant to Section 287.135, Florida Statutes, as amended.

Contractor shall not enter into a contract with an entity which would give access to an individual's personal identifying information if: (1) the entity is owned by the government of a foreign country of concern; (2) the government of a foreign country of concern has a controlling interest in the entity; or (3) the entity is organized under the laws or has its principal place of business in a foreign country of concern Section 287.138(2) (a)-(c), Fla. Stat. (2023), under Chapter 2023-33, Laws of Florida.

IN WITNESS OF THE FOREGOING, the parties have set their hands and seals the day and year first written above.

GENERAL NOTES:

I. APPLICABLE CODES

A. GENERAL

1. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OR THE INCLUSIVENESS OF THIS DATA. THE CONTRACTOR IS REQUIRED TO MARK AND CLEARLY DELINEATE LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO IDENTIFY, LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT DIGGING) INFORMATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL BEAR ALL COSTS FOR THIS WORK.
2. ALL WORK FOR THIS PROJECT SHALL BE COMPLETED WITHIN AND FROM EXISTING RIGHT-OF-WAY.
3. THE FDOT INDICES REFERRED TO IN THE DRAWINGS AND NOTES REFERS TO FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) STANDARD PLANS FOR ROAD AND BRIDGE CONSTRUCTION AND FDOT DESIGN STANDARDS LATEST EDITION.
4. ALL WORK AND MATERIALS SHALL CONFORM TO THE LATEST STANDARDS, CODES, REGULATIONS AND SPECIFICATIONS OF THE CITY, COUNTY, STATE, AND FEDERAL CODES WHERE APPLICABLE.
5. THE CONTRACTOR SHALL BE REQUIRED TO COMPLY WITH FEDERAL, STATE, COUNTY, AND CITY LAWS, CODES, ORDINANCES AND REGULATIONS.
6. IN THE EVENT OF A CONFLICT BETWEEN THE GENERAL NOTES AND CONSTRUCTION SPECIFICATIONS IN THESE PLANS AND THE CONTRACT DOCUMENTS AND SPECIFICATIONS IN THE SPECIFICATIONS BOOKLET THE CONTRACTOR SHALL SUBMIT WRITTEN REQUEST FOR CLARIFICATION TO THE ENGINEER.
7. ALL HANDICAP RAMPS AND ACCESS TO COMPLY WITH THE REQUIREMENTS OF THE AMERICANS WITH DISABILITIES ACT (ADA) REGULATIONS, AND FEDERAL CODES LATEST EDITIONS.
8. THE CONTRACTOR IS REQUIRED TO OBTAIN ALL APPLICABLE CONSTRUCTION PERMITS PRIOR TO START OF CONSTRUCTION. THE CONTRACTOR SHALL APPLY FOR AND PROCURE ALL PERMITS AND LICENSES, PAY ALL APPLICABLE CHARGES, TAXES, POSTALTIES & FEES, AND GIVE ALL NOTICES NECESSARY TO COMPLETE THIS PROJECT.
9. FACH DIMENSIONS AND ELEVATIONS ARE TO BE EDGE OF PAVEMENT AND FINISH GRADE UNLESS NOTED OTHERWISE.
10. IF ABANDONED GAS, WATER, AND SEWER SERVICE LATERALS ARE ENCOUNTERED DURING EXCAVATION, THE SECTION IN THE EXCAVATED ENVELOPE WILL BE REMOVED AND THE STUB ON THE SIDE CONNECTED TO THE MAIN WILL BE CAPPED, PLUGGED OR OTHERWISE SEALED.
11. CONTRACTOR SHALL MAINTAIN ACCESS TO BUSINESSES AND RESIDENTIAL LOCATIONS BY NORMAL MEANS AND METHODS, I.E. TEMPORARY STEEL PLATES, LIMEROCK, ETC. ALL ASSOCIATED COST TO BE INCLUDED IN W.O.T.
12. ITEMS IN CONFLICT WITH DESIGN SUCH AS EXISTING CURBS AND GUTTERS, SIDEWALKS, DRAINAGE STRUCTURES PAVEMENT AND BASE AND EXCESS EXCAVATIONS ARE TO BE REMOVED BY CONTRACTOR AND DISPOSED OF IN A LEGAL AND PROPER MANNER AWAY FROM THE JOB SITE AT THE CONTRACTOR'S EXPENSE UNLESS THE ITEMS ARE TO BE REUSED ON THE PROJECT.
13. EXCESS MATERIAL REMOVED BY THE CONTRACTOR WILL BE DISPOSED OF IN AREAS PROVIDED BY THE CONTRACTOR.
14. THE INFORMATION PROVIDED IN THESE PLANS ARE TO ASSIST THE CONTRACTOR IN ASSESSING THE NATURE AND EXTENT OF THE CONDITIONS WHICH MAY BE ENCOUNTERED DURING THE COURSE OF THE WORK. ALL CONTRACTORS ARE DIRECTED, PRIOR TO BIDDING, TO CONDUCT ANY INVESTIGATIONS THEY DEEM NECESSARY TO ARRIVE AT THEIR OWN CONCLUSIONS REGARDING THE ACTUAL CONDITIONS THAT WILL BE ENCOUNTERED AND UPON WHICH THEIR BIDS WILL BE BASED. IT IS THE CONTRACTOR'S RESPONSIBILITY TO INVESTIGATE SITE CONDITIONS, INCLUDING BOTH THE SURFACE AND SUBSURFACE CONDITIONS AND BASE THEIR PRICING ACCORDINGLY. THE GEOTECHNICAL REPORT IS INCLUDED IN THE CONTRACT DOCUMENTS.
15. CONTRACTOR SHALL PRESERVE ALL STREET SIGNS, MONUMENTS, TRAFFIC CONTROL SIGNS, LANDSCAPING, ETC. WHEN DIRECTED BY THE ENGINEER, THE CONTRACTOR SHALL REINSTALL OR DELIVER SAID PUBLIC PROPERTY TO THE TOWN.
16. THE CONTRACTOR SHALL TAKE SPECIAL NOTE OF ANY SPECIAL EQUIPMENT SHORING, SHEETING OR OTHER PROCEDURES NECESSARY TO PROTECT ADJACENT PROPERTY, EITHER PUBLIC OR PRIVATE, DURING EXCAVATION OF SUBSOIL MATERIAL OR DURING THE FILLING OF ANY AREA, OR FOR ANY AREA, OR FOR ANY OPERATION DURING CONSTRUCTION SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR AND PROVIDED AT NO ADDITIONAL COST TO THE OWNER.
17. APPARENT ERRORS, DISCREPANCIES OR OMISSIONS ON THE DRAWINGS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER OF RECORD IMMEDIATELY.
18. THE AMOUNT OF EACH OF THE MATERIALS PROVIDED IS THE ESTIMATED AMOUNT REQUIRED TO COMPLETE THE JOB. THESE QUANTITIES ARE ESTIMATED ONLY AND IT IS THE CONTRACTOR'S RESPONSIBILITY TO COMPLETE THE JOB IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. SHOULD ADDITIONAL MATERIALS BE REQUIRED THEY WILL BE PAID FOR AT THE CONTRACT UNIT PRICES AS DESCRIBED IN THE BID PROPOSAL.
19. THE CONTRACTOR IS RESPONSIBLE FOR THE PROTECTION OF ALL UTILITIES THAT REMAIN IN PLACE.
20. ALL ROAD CROSSINGS ARE OPEN CUT UNLESS OTHERWISE NOTED ON THE DRAWINGS.
21. THE CONTRACTOR SHALL REPLACE ALL PAVING, STABILIZING EARTH, DRIVEWAYS, SIDEWALKS, ETC. WITH THE SAME TYPE OF MATERIAL THAT WAS REMOVED DURING CONSTRUCTION OR AS DIRECTED BY THE ENGINEER.
22. THE CONTRACTOR SHALL NOT ENCROACH INTO PRIVATE PROPERTY WITH PERSONNEL, MATERIAL OR EQUIPMENT WITHOUT OBTAINING WRITTEN PERMISSION FROM THE OWNER.
23. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE, REMOVAL OR MODIFICATION ACCIDENTALLY OR PURPOSELY, CAUSED TO ANY IRRIGATION SYSTEMS, PRIVATE OR PUBLIC WITHIN THE PROJECT LIMITS. THE COSTS TO REPLACE, REMOVE OR MODIFY IRRIGATION PIPES, SPRINKLER HEADS OR OTHER RELATED APPURTENANCES SHALL BE CONSIDERED INCIDENTAL TO AND SHALL BE INCLUDED IN THE OTHER ITEMS OF RELATED WORK. ALL COSTS DUE TO DAMAGE SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
24. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING THE INTEGRITY OF AND MAKING THE REPAIRS OF EXISTING PAVEMENT TYPES, CONCRETE CURBS, CABLES, WIRES, ETC. LANGUAGE SHALL BE INCLUDED IN THE CONTRACT DOCUMENTS THAT NOTIFY THE CONTRACTOR THAT HE SHALL BE RESPONSIBLE FOR ANY DAMAGE TO EXISTING PAVEMENT, CURBS, ETC. PRIOR TO BEGINNING WORK IN ANY AREA.
25. CONTRACTOR IS RESPONSIBLE FOR REMOVING AND REINSTALLING ALL BRICK OR PAVER DRIVEWAYS IMPACTED BY CONSTRUCTION, REPAIR OR REPLACE ALL ASPHALT, CONCRETE, OR STAMPED CONCRETE DRIVEWAYS IMPACTED BY CONSTRUCTION. ALL COSTS ASSOCIATED WITH THIS WORK SHALL BE INCLUDED AS PART OF THE OVERALL BID.
26. THE CONTRACTOR SHALL RESTORE OR REPLACE, WHEN AND AS DIRECTED BY THE ENGINEER, ANY PUBLIC OR PRIVATE PROPERTY DAMAGED BY HIS/HER WORK, EQUIPMENT, EMPLOYEES OR THOSE OF HIS CONTRACTORS TO A CONDITION AT LEAST EQUAL (DETERMINED BY THE ENGINEER OF RECORD) TO THAT EXISTING IMMEDIATELY PRIOR TO THE BEGINNING OF OPERATIONS.
27. CONTRACTOR SHALL ADJUST ALL UTILITY SURFACE FEATURES SUCH AS EXISTING FRAMES, GRATES, MANHOLE COVERS, UTILITY VALVE BOXES, MONITORING WELLS, ECT. TO MATCH PROPOSED GRADES.
28. ALL INSTALLATIONS WITHIN MIAMI-DADE COUNTY RIGHT-OF-WAY SHALL BE IN CONFORMITY WITH THE MIAMI-DADE COUNTY HIGHWAY CONSTRUCTION & ENGINEERING DIVISION "MINIMUM STANDARDS."
29. THE CITY OF OPA-LOCKA SHALL RECEIVE A COPY OF ALL REQUIRED DENSITY REPORTS, AS-BUILTS, AND SHOP DRAWINGS OF THE PROJECT.

B. CONSTRUCTION SAFETY

1. ALL CONSTRUCTION SHALL BE DONE IN A SAFE MANNER SPECIFICALLY THE RULES AND REGULATIONS OF THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA) AND THE MANUAL OF UNIFORM TRAFFIC CONTROL (MUTCD)
C. TRENCH SAFETY ACT
2. CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLIANCE WITH THE STATE OF FLORIDA TRENCH SAFETY ACT.
3. WHERE EXCAVATIONS TO A DEPTH IN EXCESS OF FIVE FEET (5') ARE REQUIRED, THE CONTRACTOR SHALL INCLUDE THE FOLLOWING INFORMATION IN THE BID:
   3.1. A REFERENCE TO THE TRENCH SAFETY STANDARDS THAT WILL BE IN EFFECT DURING THE PERIOD OF CONSTRUCTION OF THE PROJECT.
   3.2. WRITTEN ASSURANCES BY THE CONTRACTOR PERFORMING THE TRENCH EXCAVATION THAT SUCH CONTRACTOR WILL COMPLY WITH THE APPLICABLE TRENCH SAFETY STANDARDS.
   3.3. A SEPARATE ITEM IDENTIFYING THE COST OF COMPLIANCE WITH THE APPLICABLE TRENCH SAFETY STANDARDS, WHEN A DEPTH IS NOT SUBMITTED, THE CONTRACTOR SHALL SUBMIT THE INFORMATION LISTED IN ITEM 2 TO THE ENGINEER PRIOR TO STARTING WORK.
D. SURVEY DATA
1. ALL ELEVATIONS ON THE PLANS, OR REFERENCED IN THE SPECIFICATIONS, ARE BASED ON NATIONAL GEODETIC VERTICAL DATUM (NGVD) OF 1929.
2. ALL EXISTING CONTROL POINTS AND/OR REFERENCE MARKERS SHALL BE RAISED TO FINAL GRADE. THESE POINTS AND REFERENCE MARKERS SHALL BE LOCATED AND NOTED ON THE AS-BUILTS.
3. THE LOCATION OF EXISTING RIGHT-OF-WAY LINES, CENTERLINES, ROADWAY PAVEMENT, UTILITIES, TREES, AND OTHER PHYSICAL ABOVE-GROUND FEATURES SHOWN ON THE PLANS WERE TAKEN FROM THE SPECIFIC PURPOSE SURVEYS PREPARED BY:
   BELLO & BELLO LAND SURVEYING
   12210 SW 131 AVENUE, SUITE 201
   MIAMI, FLORIDA 33186
   PHONE: 305-251-6031
   CONTACT: DAVID S. BELLO, PSM

II. PRECONSTRUCTION RESPONSIBILITIES

A. GENERAL

1. UPON RECEIPT OF THE "NOTICE TO PROCEED", THE CONTRACTOR SHALL CONTACT THE ENGINEER OF RECORD AND ARRANGE A PRE-CONSTRUCTION CONFERENCE TO INCLUDE REPRESENTATIVES OF UTILITY OWNERS, AND THE ENGINEER OF RECORD, AND HOLD THE MANDATORY PRE-CONSTRUCTION CONFERENCE AFTER ISSUANCE OF THE CONTRACT'S "NOTICE TO PROCEED" BUT BEFORE THE ACTUAL CONSTRUCTION DATE. CONTRACTOR MAY NOT BEGIN WORK BEFORE ACTUAL CONSTRUCTION DATE.
2. THE CONTRACTOR SHALL OBTAIN A SUNSHINE CERTIFICATION NUMBER AT LEAST 48 HOURS PRIOR TO BEGINNING ANY EXCAVATION.
3. PRIOR TO BEGINNING CONSTRUCTION, THE CONTRACTOR SHALL VERIFY THE SIZE, LOCATION, ELEVATION, AND MATERIAL OF ALL EXISTING UTILITIES WITHIN THE AREA OF CONSTRUCTION.
4. EXISTING UTILITY LOCATION SHOWN ON THESE PLANS ARE APPROXIMATE. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF EXISTING UTILITIES SHOWN OR FOR ANY EXISTING UTILITIES NOT SHOWN.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO ANY EXISTING UTILITIES FOR WHICH IT FAILS TO REQUEST LOCATIONS FROM THE UTILITY OWNER. THE CONTRACTOR IS RESPONSIBLE AS WELL FOR DAMAGE TO ANY EXISTING UTILITIES WHICH ARE PROPERLY LOCATED.
6. IF UPON EXCAVATION, AN EXISTING UTILITY IS FOUND TO BE IN CONFLICT WITH THE PROPOSED CONSTRUCTION OR TO BE OF A SIZE OR MATERIAL DIFFERENT FROM THAT SHOWN ON THE PLANS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER.
7. EXISTING UTILITIES SHALL BE MAINTAINED IN SERVICE DURING CONSTRUCTION UNLESS OTHERWISE APPROVED BY THE UTILITY OWNER.
8. THE CONTRACTOR SHALL COORDINATE WITH UTILITIES TO ARRANGE RELOCATION AND TEMPORARY SUPPORT OF UTILITY FEATURE ETC. AS NECESSARY TO COMPLETE THE WORK.
9. THE UTILITY COMPANIES SHALL BE NOTIFIED BY THE CONTRACTOR TWO (2) BUSINESS DAYS IN ADVANCE OF ANY EXCAVATION INVOLVING THEIR UTILITIES SO THAT A COMPANY REPRESENTATIVE CAN BE PRESENT.
10. THE CONTRACTOR IS TO USE CAUTION WHEN WORKING IN OR AROUND AREAS OF OVERHEAD TRANSMISSION LINES OR UNDERGROUND UTILITIES.

III. INSPECTIONS

A. GENERAL

1. THE CONTRACTOR SHALL GIVE THE ENGINEER OF RECORD A MINIMUM OF TWO (2) BUSINESS DAYS ADVANCE NOTICE PRIOR TO BACKFILLING OR COMPLIANCE, THE INSPECTION OF THE FOLLOWING ITEMS SO THE ENGINEER OF RECORD CAN PERFORM FIELD OBSERVATIONS OF THE FOLLOWING ITEMS.
   1.1. STORM DRAINAGE
   1.2. SUBGRADE, SUBMIT AND HAVE APPROVED DENSITIES PRIOR TO PLACEMENT OF ROCK
   1.3. LIMEROCK BASE, SUBMIT AND HAVE APPROVED DENSITIES AND AS-BUILTS PRIOR TO THE PLACEMENT OF ANY ASPHALT.
   1.4. ASPHALTIC CONCRETE
   1.5. FINAL
2. ALL INSPECTIONS WILL BE MADE BY THE COUNTY AND THE CITY OF OPA-LOCKA (PLUMBING AND ELECTRICAL). THE ENGINEER OF RECORD WILL PROVIDE CONSTRUCTION OBSERVATION SERVICES.
3. IF THE CONTRACTOR FAILS TO NOTIFY THE ENGINEER OF RECORD PRIOR TO COMPLETING THE ABOVE, THE ENGINEER RESERVES THE RIGHT NOT TO ISSUE ANY CERTIFICATIONS OR FINAL INSPECTIONS.

IV. SHOP DRAWINGS

A. GENERAL

1. PRIOR TO THEIR CONSTRUCTION OR INSTALLATION, SHOP DRAWINGS SHALL BE SUBMITTED TO AND REVIEWED BY THE ENGINEER OF RECORD FOR DRAINAGE PIPES AND OTHER ACCESSORIES.

V. TEMPORARY FACILITIES

A. TEMPORARY UTILITIES

1. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO ARRANGE OR SUPPLY TEMPORARY WATER SERVICE, SANITARY FACILITIES, AND ELECTRICITY TO ITS EMPLOYEES AND SUBCONTRACTORS FOR THEIR USE DURING CONSTRUCTION.

B. TRAFFIC REGULATION

1. MAINTENANCE OF TRAFFIC IN THE PUBLIC RIGHT-OF-WAY SHALL BE IN ACCORDANCE WITH THE MUTCD. A MAINTENANCE OF TRAFFIC (MOT) PLAN MUST BE APPROVED BY THE CITY/COUNTY ENGINEERING DIVISION HAVING JURISDICTION FOR THE SECTION OF ROADWAY BEFORE STARTING ANY WORK IN THE PUBLIC RIGHT-OF-WAY.
2. ALL OPEN TRENCHES ADJACENT TO OPEN TRAFFIC LANES OR ROADWAYS SHALL BE PROPERLY MARKED AND BARRICADED TO ASSURE THE SAFETY OF BOTH VEHICULAR AND PEDESTRIAN TRAFFIC.
3. TRAFFIC LANES TO VEHICLE AND PEDESTRIANS, OR BOTH SHOULDERS ARE TO BE LEFT OPEN DURING NIGHTTIME HOURS WITHOUT EXPRESSED PERMISSION OF THE CITY.

C. TEMPORARY FACILITIES

1. THE CONTRACTORS ON-SITE EQUIPMENT, STOCKPILED MATERIAL, AND SUPPLIES SHALL BE KEPT IN A SECURE, FENCED AND LOCKED LOCATION WHEN THE CONTRACTOR IS NOT SUPERVISING THE STAGING OR LAY DOWN AREA.
2. STAGING AND MATERIAL STORAGE SHALL NOT BE CONDUCTED ON ABUTTING PRIVATE PROPERTY OR PUBLIC PROPERTY OR PUBLIC RIGHT-OF-WAY WITHOUT PRIOR APPROVAL FROM THE OWNER.
3. CONTRACTOR SHALL CONSTRUCT AND MAINTAIN TEMPORARY STREET LIGHTING AS REQUIRED TO LIGHT THE CONSTRUCTION SITE TO THE SAME LEVEL AS EXISTED AT THE SAME LIGHTING INTENSITY LEVELS AS WAS EXISTING PRIOR TO THE START OF CONSTRUCTION. ALL COSTS ASSOCIATED WITH THE CONSTRUCTION AND MAINTAINING LIGHTING TO BE INCLUDED IN M.O.T. PAY ITEM.
4. THE CONTRACTOR SHALL COORDINATE SELECTION AND REMOVAL OF ANY PROPOSED STAGING AREAS ASSOCIATED WITH THIS PROJECT WITH THE CITY OF OPA-LOCKA

VI. PROJECT CLOSEOUT

A. CLEANING UP

1. DURING CONSTRUCTION, THE PROJECT SITE AND ALL ADJACENT AREAS SHALL BE MAINTAINED IN A NEAT AND CLEAN MANNER AND FREE OF ACCUMULATIONS OF DEBRIS FROM THE WORK SITE CLEAR OF ALL SURPLUS MATERIAL OR TRASH. THE PAVED AREAS SHALL BE SWEPT BROOM CLEAN.
2. THE CONTRACTOR SHALL REPAIR OR REPLACE, WHEN AND AS DIRECTED BY THE ENGINEER OR THOSE OF ITS SUBCONTRACTORS TO A CONDITION AT LEAST EQUAL OR BETTER TO THE EXISTING CONDITION IMMEDIATELY PRIOR TO THE BEGINNING OF OPERATIONS. TO THIS END, THE CONTRACTOR SHALL DO ALL NECESSARY HIGHWAY OR DRIVEWAY, WALK AND LANDSCAPING WORK, SUITABLE MATERIALS AND METHODS SHALL BE USED FOR SUCH RESTORATION.
3. WHERE MATERIAL OR DEBRIS HAS WASHED OR FLOWED INTO OR BEEN PLACED IN WATER COURSES, DITCHES, DRAINS, OR BASINS, OR ON ANY ELSEWHERE AS A RESULT OF THE CONTRACTOR'S OPERATIONS, SUCH MATERIAL OR DEBRIS SHALL BE REMOVED AND SATISFACTORILY DISPOSED OF DURING PROGRESS OF THE WORK, AND THE AREA KEPT IN A CLEAN AND NEAT CONDITION.
4. UPON COMPLETION OF THE PROPOSED CULVERT AREA WORK, THE CONTRACTOR SHALL CLEAN THE NEW SYSTEM, REMOVE ALL DEBRIS AND SILT FROM THE NEW SYSTEM AND CLEAN THE NEARBY AREAS AND DRAINAGE STRUCTURES NO ADDITIONAL COST TO THE OWNER.

B. PROJECT RECORD DOCUMENTS

1. THE CONTRACTOR SHALL MAINTAIN ACCURATE AND COMPLETE RECORDS OF WORK ITEMS COMPLETED.
2. PRIOR TO THE PLACEMENT OF ANY ASPHALT OR CONCRETE PAVEMENT, THE CONTRACTOR SHALL SUBMIT TO THE ENGINEER "AS-BUILT" PLANS (SIGNED AND SEALED BY A FLORIDA CERTIFIED PROFESSIONAL LAND SURVEYOR) SHOWING THE CULVERT AND ITS NEW APPURTENANCE IMPROVEMENTS, PAVING OPERATIONS SHALL NOT COMMENCE UNTIL THE ENGINEER HAS APPROVED THE "AS-BUILTS."
3. ALL REQUIRED DENSITY AND LBR TEST RESULTS FOR SUB-GRADE SHALL BE PROVIDED TO THE ENGINEER PRIOR TO PLACING BASE MATERIAL.
4. ALL REQUIRED DENSITY AND LBR TEST RESULTS FOR LIMEROCK SHALL BE PROVIDED TO THE ENGINEER PRIOR TO PLACING ASPHALT.
5. ALL "AS-BUILT" INFORMATION SUBMITTED TO THE ENGINEER SHALL BE SUFFICIENTLY ACCURATE, CLEAR AND LEGIBLE TO SATISFY THE ENGINEER THAT THE INFORMATION PROVIDED A TRUE REPRESENTATION OF THE IMPROVEMENTS CONSTRUCTED.
6. UPON COMPLETION OF CONSTRUCTION, THE CONTRACTOR SHALL SUBMIT TO THE ENGINEER OF RECORD COMPLETE SETS OF "AS-BUILT" CONSTRUCTION DRAWINGS (SIGNED AND SEALED BY A FLORIDA CERTIFIED PROFESSIONAL LAND SURVEYOR) AS REQUIRED FOR SUBMITTAL AND APPROVAL. THESE DRAWINGS SHALL BE MARKED TO SHOW "AS-BUILT" CONSTRUCTION CHANGES AND DIMENSIONED LOCATIONS AND ELEVATIONS OF ALL IMPROVEMENTS AND SHALL BE SIGNED AND SEALED BY A REGISTERED LAND SURVEYOR.
7. THE COST OF SIGNED AND SEALED AS-BUILTS AND CADD FILES SHALL BE INCLUDED IN THE COST OF THE OVERALL BID.

VII. EARTHWORK

A. GENERAL

1. NONE OF THE EXISTING MATERIAL IS TO BE INCORPORATED IN THE LIMEROCK BASE.
2. ALL SUB-GRADE UNDER PAVED AREAS SHALL BE 12" THICK AND HAVE A MINIMUM LBR VALUE OF 40, AND SHALL BE COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180.
3. ALL FILL MATERIAL IN AREAS NOT TO BE PAVED SHALL BE COMPACTED TO 95% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180.
4. A 2" BLANKET OF TOPSOIL SHALL BE PLACED OVER ALL AREAS TO BE SODDED.
5. PROPERTIES DAMAGED SOD SHALL BE REPLACED WITH SAME SOD TYPE AS EXISTING AND SHALL BE PLACED ON THE GRADED TOPSOIL AND WATERED TO ENSURE SATISFACTORY CONDITION FLUSH THE ACCEPTANCE OF THE PROJECT.
6. WHEN WORKING IN AND AROUND EXISTING DRAINAGE CANALS OR LAKES, APPROPRIATE SILT/TURBIDITY BARRIERS SHALL BE INSTALLED.
7. ALL ORGANIC AND OTHER UNSUITABLE MATERIAL UNDER THOSE AREAS TO BE PAVED SHALL BE REMOVED TO A DEPTH OF THREE(3) FEET BELOW FINISHED GRADE AND FOR THREE(3) FEET BEYOND THE PERIMETER OF THE PAVING.
8. SUITABLE BACKFILL SHALL BE MINIMUM LBR 40 MATERIALS COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180 THREE (3) FEET BEYOND THE PERIMETER OF PAVING.
9. CONTRACTOR SHALL BLEND TO EXISTING GRADE BEYOND THE LIMITS OF THE PROPOSED GRADE PROVIDED TO EXISTING GRADE AT LIMITS OF WORK UNLESS OTHERWISE NOTED ON PLANS. IF NO LIMIT OF WORK IS PROVIDED, BLEND TO THE ADJACENT PROPERTY LINE OR RIGHT-OF-WAY LINE AS APPLICABLE.
10. SITE GRADING ELEVATIONS SHALL BE WITHIN 0.1 OF THE REQUIRED ELEVATION AS SHOWN ON THE PLANS AND ALL AREAS SHALL BE GRADED TO DRAIN WITHOUT PONDING.
11. GROUND ADJACENT TO ROADWAY PAVEMENT WHERE STORMWATER FLOWS FROM PAVEMENT TO GROUND, SHALL BE GRADED TWO (2) INCHES LOWER THAN THE EDGE OF PAVEMENT TO ALLOW FOR THE PLACEMENT OF SOD.
12. ALL AREAS TO BE CONSTRUCTED UPON WITH STRUCTURES, PAVEMENT, DRAINAGE, WATER, SEWER, CURBING, SIDEWALK, FENCING, ETC., SHALL BE CLEARED AND GRUBBED PRIOR TO CONSTRUCTION. THIS SHALL CONSIST OF THE COMPLETE REMOVAL OF AND DISPOSAL OF ALL TREES, BRUSH, STUMPS, ROOTS, GRASS, WEEDS, RUBBISH, AND ALL OTHER OBSTRUCTIONS RESTING ON OR PROTRUDING THROUGH THE SURFACE OF THE EXISTING GROUND TO A DEPTH OF 6 INCHES. ALL WORK SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS.
13. ALL PROPOSED GRADES SHOWN IN PLAN ARE FINISHED GRADES.

VIII. PAVING

A. GENERAL

1. ALL UNDERGROUND UTILITIES SHALL BE COMPLETED PRIOR TO THE CONSTRUCTION OF THE LIMEROCK BASE AND PRIOR TO THE PLACEMENT OF THE PAVEMENT. ALL REPAIRS TO EXISTING PAVEMENT SHALL RECEIVE SAW-CUT EDGES PRIOR TO RELAYING ASPHALT. ALL EXISTING PAVEMENT, LIMEROCK AND SUB-GRADE THAT IS AFFECTED AND NOT PART OF THE CONSTRUCTION PROJECT SHALL BE PROPERLY RESTORED AT THE CONTRACTOR'S EXPENSE.

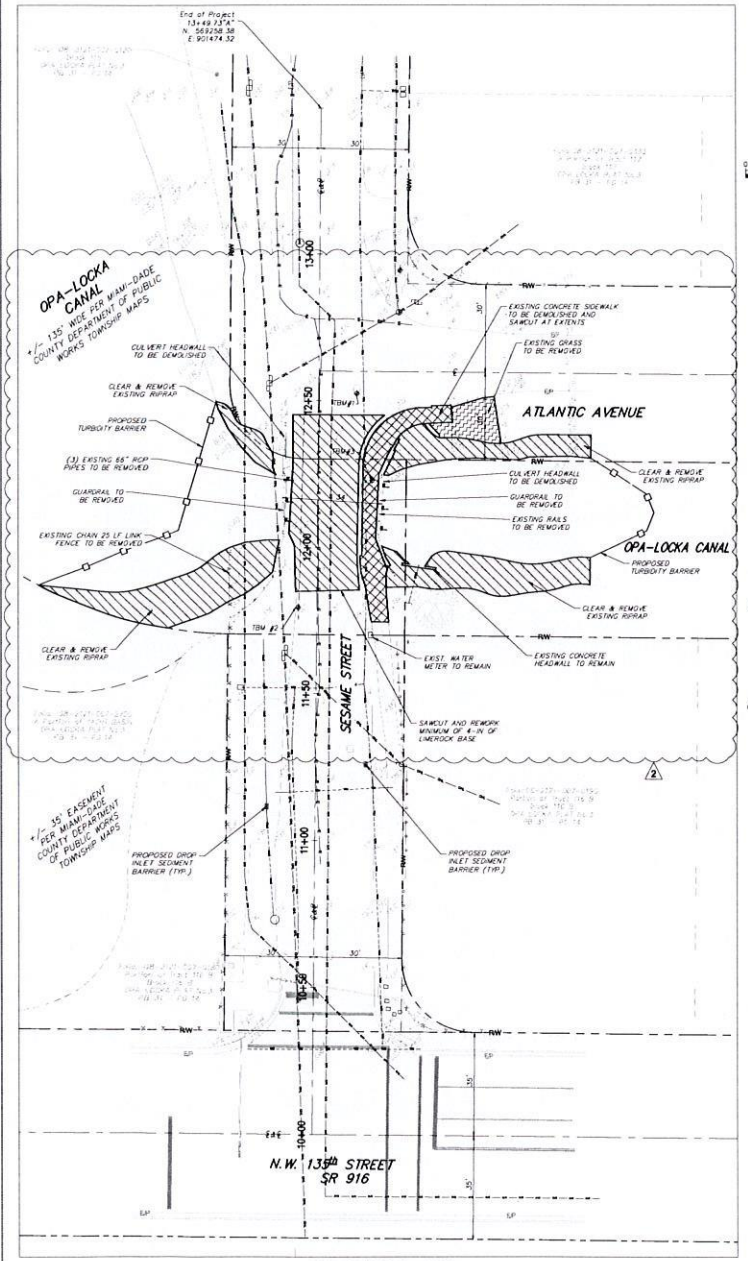
B. MATERIALS

1. LIMEROCK BASE MATERIAL SHALL HAVE A MINIMUM OF 70% CARBONATES (CALCIUM AND MAGNESIUM) WITH A MINIMUM LBR OF 100.
2. PRIME COAT SHALL BE APPLIED AT THE RATE OF 0.25 GAL/YD SQ. AND TACK COAT SHALL MEET FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) STANDARDS.
3. SURFACE COURSE SHALL BE EQUAL TO FDOT TYPE SP 9.5 & SP 12.5 ASPHALTIC CONCRETE

C. INSTALLATION

1. LIMEROCK BASE MATERIAL SHALL BE 12" THICK AND COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180.
2. LIMEROCK BASE MATERIAL SHALL BE PLACED IN MAXIMUM 6" LIFTS (BASES GREATER THAN 6" OF LIMEROCK SHALL BE PLACED IN TWO OR MORE EQUAL LIFTS) LIMEROCK BASE SHALL BE COMPACTED TO 98% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180.
3. ASPHALTIC CONCRETE SHALL BE 1" FDOT TYPE SP-9.5 (BOTTOM) AND 1" SP-12.5 FOR LIFT MATCHING EXISTING GRADES, 1" SLAB SMOOTH.
4. PRIME COAT SHALL BE PLACED ON THE LIMEROCK BASES IN ACCORDANCE WITH FDOT STANDARDS
5. TACK COAT SHALL BE PLACED AS REQUIRED IN ACCORDANCE WITH FDOT STANDARDS.
6. BASE COURSE CONSTRUCTION SHALL NOT BE STARTED UNTIL ALL UNDERGROUND CONSTRUCTION IN THE ROADWAY HAS BEEN TESTED AND ACCEPTED.
7. WEARING COURSE'S SHALL NOT BE PLACED UNTIL:
   7.1. A WALK-THROUGH HAS BEEN CONDUCTED TO DETERMINE IF THERE IS ANY REMAINING WORK THAT MIGHT CAUSE DAMAGE TO THE FINAL LIFT.
   7.2. ALL LANDSCAPING THAT MIGHT CAUSE DAMAGE TO THE FINAL LIFT IS COMPLETE.
   7.3. ALL UNDERGROUND UTILITIES ARE INSTALLED AND ACCEPTED AND A FINISHED ROCK SURVEY HAS BEEN SUBMITTED TO AND ACCEPTED BY THE HIGHWAY CONSTRUCTION & ENGINEERING DIVISION.

D. TESTING



1. ALL SUB-GRADE, LIMEROCK AND ASPHALT TESTS REQUIRED SHALL BE TAKEN AT THE DIRECTION OF THE ENGINEER AND PER CITY/COUNTY/STATE REQUIREMENTS.
2. DENSITY TESTS SHALL BE CONDUCTED EVERY 100 FEET AND TWO FEET AWAY FROM ANY MANHOLE OF DRAINAGE STRUCTURE INSTALLED IN PAVED AREAS.

SIGNING AND MARKING

1. ALL PAVEMENT MARKING AND SIGNING SHALL CONFORM TO THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES (MUTCD), MIAMI-DADE COUNTY TRAFFIC ENGINEERING DIVISION, & FDOT.
2. ALL PAVEMENT MARKINGS SHALL BE THERMOPLASTIC UNLESS OTHERWISE NOTED. CONTRACTOR SHALL PAINT MARKINGS THEN AFTER 14 DAY CURING PERIOD PLACE THERMOPLASTIC PAVEMENT MARKINGS.
3. ONE BI-DIRECTIONAL YELLOW REFLECTIVE PAVEMENT MARKER SHALL BE PROVIDED AT 40' INTERVALS ON EACH SIDE OF DOUBLE YELLOW STRIPES.
4. BI-DIRECTIONAL AMBER/AMBER REFLECTIVE PAVEMENT MARKERS SHALL BE PROVIDED AT 1' INTERVALS AT ALL BULNOSES.
5. BI-DIRECTIONAL WHITE/RED REFLECTIVE PAVEMENT MARKERS SHALL BE PROVIDED AT 20' INTERVALS ALONG SOLID WHITE LINES (NOT ON EDGE OF PAVEMENT OR BIKE LANE LINES).
6. REFLECTIVE PAVEMENT MARKERS SHALL BE CLASS B MARKERS MANUFACTURED IN ACCORDANCE WITH FDOT STANDARD SPECIFICATIONS FOR AND INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDED PROCEDURES.
7. ALL SIGNING SHALL BE FABRICATED USING TYPE IX SHEETING, AS PER MIAMI-DADE COUNTY TRAFFIC ENGINEERING DIVISION STANDARDS (CURRENT EDITION).
8. ALL PAVEMENT MARKINGS AND SIGNING DAMAGED DURING CONSTRUCTION, SHALL BE RESTORED TO MIAMI-DADE COUNTY TRAFFIC ENGINEERING DIVISION.
9. EXISTING MARKINGS SHALL BE REMOVED BY WATER BLASTING ONLY.
10. SEE SIGNING AND MARKING DETAILS FOR ADDITIONAL INFORMATION.
11. ALL EXISTING SIGNALIZATION EQUIPMENT TO REMAIN IS ASSUMED TO BE IN GOOD WORKING ORDER UNLESS CITY IS NOTIFIED IN WRITING PRIOR TO START OF CONSTRUCTION. ANY DAMAGES CAUSED TO THE SIGNAL EQUIPMENT SHALL BE REPAIRED BY THE CONTRACTOR AT THE CONTRACTOR'S EXPENSE.

MAINTENANCE OF TRAFFIC

1. TRAFFIC CONTROLS SHALL BE IN ACCORDANCE WITH THE PROJECT TRAFFIC PLANS, THE CURRENT EDITION OF THE FDOT STANDARD PLANS FOR ROAD AND BRIDGE CONSTRUCTION, THE STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION AND THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD) AS MINIMUM CRITERIA.
2. THE CONTRACTOR SHALL IMMEDIATELY REPAIR ALL POTHOLES THAT DEVELOP WITHIN PROJECT LIMITS AND WILL MAINTAIN A SUPPLY OF COLD MIX ON THE PROJECT SITE TO EXPEDITE THESE REPAIRS. ALL COSTS ASSOCIATED WITH THIS WORK SHALL BE INCLUDED AS PART OF THE OVERALL BID.
3. REQUEST FOR PROPOSED TRAFFIC CONTROL DEVICES OR TEMPORARY DETOURS SHALL BE SUBMITTED FOR REVIEW AND APPROVAL TO ROADWAY'S MAINTAINING AGENCY TO CLOSURE OR DETAIL.
4. AT THE DISCRETION OF THE ENGINEER, IF A LANE CLOSURE CAUSES EXTENDED CONGESTION OR DELAY, THE CONTRACTOR SHALL BE DIRECTED TO REOPEN THE CLOSED LANE(S) UNTIL SUCH TIME THAT TRAFFIC FLOW HAS RETURNED TO AN ACCEPTABLE LEVEL.
5. THE TRAFFIC AND TRAVEL WAYS SHALL NOT BE ALTERED BY THE CONTRACTOR TO CREATE A WORK ZONE UNTIL ALL LABOR AND MATERIAL ARE AVAILABLE FOR THE CONSTRUCTION IN THAT AREA.
6. THE CONTRACTOR SHALL REMOVE ANY EXISTING OR PROPOSED PAVEMENT MARKINGS THAT CONFLICT WITH

- EXISTING SANITARY SEWER PIPE
- EXISTING FORCE MAIN PIPE
- EXISTING WATER MAIN PIPE
- EXISTING STORM DRAIN PIPE
- EXISTING OVERHEAD WIRE
- EXISTING CHAIN LINK FENCE
- EXISTING GUARDRAIL
- EXISTING SIGN
- EXISTING GRADE
- EXISTING POWER POLE
- EXISTING CONCRETE UTILITY POLE
- EXISTING SANITARY SEWER MANHOLE
- EXISTING STORM CATCH BASIN
- EXISTING WATER METER
- EXISTING RIP RAP
- EXISTING CONCRETE TO BE REMOVED
- EXISTING CULVERT & RIPRAP TO BE REMOVED
- EXISTING GRASS TO BE REMOVED
- PROPOSED TURBIDITY BARRIER

NOTES

1. ALL AREAS DAMAGED BY CONTRACTOR, INCLUDING BUT NOT LIMITED TO SIDEWALKS PAVEMENT MARKINGS, ASPHALT, AND DRIVEWAYS SHALL BE RESTORED TO ITS ORIGINAL CONDITION AT THE CONTRACTORS EXPENSE.
2. ALL ASPHALT TO BE REMOVED SHALL BE SAW CUT ADJACENT TO PROPOSED IMPROVEMENTS.
3. THE CONTRACTOR SHALL MAINTAIN FLOW WITHIN THE CANAL DURING CONSTRUCTION. THE EXISTING CULVERT PIPES. THE CONSTRUCTION SEQUENCE SHALL BE PERFORMED ORDERLY AS TO MINIMIZE WATERWAY IMPACTS.
4. THE DEMOLISHION WORK WITHIN THE CANAL SHALL TAKE PLACE ONLY AFTER EROSION CONTROL MEASURES HAVE BEEN INSTALLED AND IN WORKING ORDER.
5. ALL EXISTING SIGNS IMPACTED BY CONSTRUCTION SHALL BE PROVIDED, AS NECESSARY, AT CONTRACTORS EXPENSE.
6. ALL EXISTING TREES SHALL BE MAINTAINED AND PROTECTED SO AS TO MINIMIZE IMPACTS. SHOULD TREE RELOCATION/REMOVAL BE REQUIRED, IT SHALL BE COORDINATED BY THE CONTRACTOR TO OBTAIN NECESSARY PERMITS.
7. IF BYPASS PUMPING IS REQUIRED, THE CONTRACTOR IS RESPONSIBLE FOR ITS DESIGN / SELECTION AND SPECIFICATION. BYPASS PUMPING PLAN SHALL BE SUBMITTED TO THE EOR FOR APPROVAL DURING SHOP DRAWINGS REVIEW.
8. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OR THE INCLUSIVENESS OF THIS DATA. THE CONTRACTOR IS REQUIRED TO MARK AND CLEARLY DELINEATE LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO IDENTIFY, LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT DIGGING) COORDINATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL BEAR ALL COSTS FOR THIS WORK.

THIS ITEM HAS BEEN DIGITALLY SIGNED AND SEALED BY REINALDO RIVERA, PE. ON 9/8/23.

PRINTED COPIES OF THIS DOCUMENT ARE NOT CONSIDERED SIGNED AND SEALED AND THE SIGNATURE MUST BE VERIFIED ON ANY ELECTRONIC COPIES.

OPA-LOCKA-C-01.DWG

9/8/23 AS SHOWN

SHEET C-01

DRAWING NO. 3 OF 15

A. DEMOLITION NOTES

1. THE CONTRACTOR IS ENCOURAGED TO THOROUGHLY INSPECT THE SITE AS WELL AS REVIEW THE PLANS AND SPECIFICATIONS PRIOR TO SUBMITTING PRICING. CONTRACTOR WILL NOT RECEIVE ADDITIONAL COMPENSATION FOR INCIDENTAL ITEMS NOT SHOWN ON THIS DEMOLITION PLAN.
2. THE DEMOLITION PLAN IS BASED ON AVAILABLE UTILITY INFORMATION AND MAY OR MAY NOT BE ALL INCLUSIVE. FOR THIS SITE, ANY UTILITIES ENCOUNTERED DURING DEMOLITION THAT ARE NOT DEPICTED/ADDRESSED ON THIS DRAWING SHOULD BE BROUGHT TO THE ATTENTION OF THE PROJECT ENGINEER IMMEDIATELY.
3. CONTRACTOR IS REQUIRED TO OBTAIN ALL DEMOLITION PERMITS.
4. ALL FEATURES IDENTIFIED ON THIS PLAN WHICH ARE LISTED TO BE DEMOLISHED ARE TO BE REMOVED FROM THE SITE, AFTER DEMOLITION IS COMPLETE THE SITE SHALL BE DELIVERED IN A CONDITION SUITABLE FOR DEVELOPMENT.
5. CONTRACTOR IS RESPONSIBLE FOR CONTROLLING AIRBORNE DUST AND POLLUTANTS BY USING WATER SPRINKLING OR OTHER SUITABLE MEANS OF CONTROL.
6. CONTRACTOR TO USE CARE IN HANDLING DEBRIS FROM THE SITE TO ENSURE THE SAFETY OF THE PUBLIC. HAUL ROUTE SHALL BE CLOSELY MONITORED FOR DEBRIS OR MATERIALS TRACKED ONTO ADJOINING ROADWAYS, SIDEWALKS, ETC. ROADWAYS AND WALKWAYS TO BE CLEARED DAILY OR AS NECESSARY TO MAINTAIN PUBLIC SAFETY.
7. ALL ASPHALT TO BE REMOVED SHALL BE SAW CUT ADJACENT TO REMAINING IMPROVEMENTS.
8. SEE SITE PLAN FOR LIMITS OF RESURFACED ROADWAY.
9. CONTRACTOR TO MAINTAIN DRAINAGE FLOW FOR CANAL DURING AND AFTER CONSTRUCTION. FURTHERMORE, HE/SHE SHALL COORDINATE TO ENSURE BY-PASS PUMPING RATES ARE ADEQUATE FOR FLOW DIVERSION.
10. SEE EROSION CONTROL PLAN FOR INLET PROTECTION AND EROSION AND SEDIMENTATION CONTROL MEASURES.
11. CONTRACTOR TO MAINTAIN PEDESTRIAN TRAFFIC FLOW DURING REMOVAL/REINSTALLATION OF SIDEWALKS.

B. BEST MANAGEMENT PRACTICES (BMPS)

1. THIS PLAN HAS BEEN PREPARED TO ENSURE COMPLIANCE WITH APPROPRIATE CONDITIONS OF THE MIAMI-DADE COUNTY LAND DEVELOPMENT REGULATIONS, THE RULES OF THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION (FDEP), CHAPTER 17-25, F.A.C., THE SOUTH FLORIDA WATER MANAGEMENT DISTRICT (SFWMD), CHAPTER 40D-4, F.A.C. AND THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY (EPA) DOCUMENT NO EPA 833/R-92-005 (SEPTEMBER 1992). THE PLAN ADDRESSES THE FOLLOWING:

   A. PREVENT LOSS OF SOIL DURING CONSTRUCTION BY STORMWATER RUNOFF AND/OR WIND EROSION, INCLUDING PROTECTING TOPSOIL BY STOCKPILING FOR REUSE.
   B. SEDIMENT CONTROL/PROTECTION OF CANAL.
   C. PREVENT POLLUTING THE AIR WITH DUST AND PARTICULATE MATTER. THE VARIOUS TECHNIQUES OR ACTIONS CONTRIBUTING UNDER THIS SECTION INDICATE THE APPROPRIATE SITUATION WHEN THE TECHNIQUES SHOULD BE EMPLOYED AS IDENTIFIED IN A GENERIC - REFERENCE TO A DIAGRAM OR FIGURE REPRESENTING THE TECHNIQUE. IT SHOULD BE NOTED THAT THE MEASURES IDENTIFIED ON THIS PLAN ARE ONLY SUGGESTED (BMPS). THE CONTRACTOR SHALL PROVIDE POLLUTION PREVENTION AND EROSION CONTROL MEASURES AS SPECIFIED IN ACCORDANCE WITH THE CURRENT FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) REQUIREMENTS. CONTRACTOR SHALL PREPARE REQUIRED NPDES DOCUMENTATION AND OBTAIN PERMIT PRIOR TO COMMENCEMENT OF CONSTRUCTION. IT IS THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO PREPARE THE REQUIRED NPDES DOCUMENT AND OBTAIN THE NPDES PERMIT. ALL COST ASSOCIATED WITH SUCH WORK SHALL BE DEEMED INCIDENTAL TO THE PROJECT LUMP SUM COST.

C. GENERAL EROSION CONTROL NOTES

1. THE STORM WATER POLLUTION PREVENTION PLAN (SWPPP) IS COMPRISED OF THESE EROSION CONTROL DRAWINGS, THE STANDARD DETAILS, THE NPDES PERMIT (TO BE OBTAINED BY CONTRACTOR) AND ALL SUBSEQUENT REPORTS AND RELATED DOCUMENTS.
2. ALL CONTRACTORS AND SUBCONTRACTORS INVOLVED WITH STORM WATER POLLUTION PREVENTION SHALL OBTAIN A COPY OF THIS DRAWING AND THE STATE OF FLORIDA NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM GENERAL PERMIT (NPDES PERMIT) AND BECOME FAMILIAR WITH THEIR CONTENTS.
3. CONTRACTOR SHALL OBTAIN ANY NECESSARY DEWATERING PERMITS AS SITE CONDITIONS AND CONSTRUCTION ACTIVITIES REQUIRE.
4. CONTRACTOR SHALL IMPLEMENT BEST MANAGEMENT PRACTICES (BMP) IN ALL CONSTRUCTION ACTIVITIES INCLUDING BUT NOT LIMITED TO THE FOLLOWING:

   A. FUEL SPILLS AND LEAKS PREVENTION
   B. PREVENT/REDUCE VEHICLE AND EQUIPMENT WASHING AND STEAM CLEANING
   C. VEHICLE AND EQUIPMENT MAINTENANCE AND REPAIR
   D. PROPER OUTDOOR LOADING/UNLOADING OF MATERIALS
   E. PREVENT/REDUCE OUTDOOR STORAGE OF RAW MATERIALS, PRODUCTS, AND BY-PRODUCTS
   F. SOLID WASTE MANAGEMENT
   G. HAZARDOUS WASTE MANAGEMENT
   H. CONCRETE WASTE MANAGEMENT
   I. SANDBLASTING WASTE MANAGEMENT
   J. STRUCTURE CONSTRUCTION AND PAINTING
   K. SPILL PREVENTION AND CONTROL
   L. CONTAMINATED SOIL MANAGEMENT
   M. SANITARY/SEPTIC WASTE MANAGEMENT
   N. SOIL EROSION CONTROL
   O. STORM WATER TURBIDITY MANAGEMENT

5. ADDITIONAL BEST MANAGEMENT PRACTICES SHALL BE IMPLEMENTED AS DICTATED BY CONDITIONS AT NO ADDITIONAL COST TO THE OWNER THROUGHOUT ALL PHASES OF CONSTRUCTION.
6. BEST MANAGEMENT PRACTICES (BMPS) AND CONTROLS SHALL CONFORM TO FEDERAL, STATE, OR LOCAL REQUIREMENTS OR MANUAL OF PRACTICE, AS APPLICABLE. CONTRACTOR SHALL IMPLEMENT ADDITIONAL CONTROLS AS DIRECTED BY PERMITTING AGENCY OR OWNER.
7. SITE MAP MUST CLEARLY DELINEATE ALL STATE WATERS, CONSTRUCTION MUST MAINTAIN ALL PERMITS FOR ANY CONSTRUCTION ACTIVITY IMPACTING STATE WATERS OR REGULATED WETLANDS ON SITE AT ALL TIMES.
8. CONTRACTOR SHALL MINIMIZE CLEARING TO THE MAXIMUM EXTENT PRACTICAL AS AS REQUIRED BY THE GENERAL PERMIT.
9. CONTRACTOR SHALL BEGIN CLEARING AND GRUBBING THOSE PORTIONS OF THE SITE NECESSARY TO IMPLEMENT PERIMETER EROSION MEASURES. CLEARING AND GRUBBING FOR THE REMAINING PORTIONS OF THE PROPOSED SITE SHALL COMMENCE ONCE PERIMETER CONTROLS ARE IN PLACE. PERIMETER CONTROLS SHALL BE ACTIVELY MAINTAINED UNTIL SOD AREAS HAVE BEEN STABILIZED AND SHALL BE REMOVED ONCE FINAL STABILIZATION IS COMPLETE.
10. GENERAL EROSION CONTROL BMPS SHALL BE EMPLOYED TO MINIMIZE SOIL EROSION AND POTENTIAL CANAL EMBANKMENT CAVE-INS WHILE THE VARIOUS TECHNIQUES REQUIRED WILL BE SITE AND PLAN SPECIFIC, THEY SHOULD BE EMPLOYED AS SOON AS POSSIBLE DURING CONSTRUCTION.
11. ON-SITE & OFF-SITE SOIL STOCKPILE AND BORROW AREAS SHALL BE PROTECTED FROM EROSION AND SEDIMENTATION THROUGH IMPLEMENTATION OF BEST MANAGEMENT PRACTICES. STOCKPILE AND BORROW AREA LOCATIONS SHALL BE NOTED ON THE SITE MAP AND PERMITTED IN ACCORDANCE WITH GENERAL PERMIT REQUIREMENTS.
12. SURFACE WATER QUALITY SHALL BE MAINTAINED BY EMPLOYING THE FOLLOWING BMP'S IN THE CONSTRUCTION PLANNING AND CONSTRUCTION OF ALL IMPROVEMENTS.
13. IT SHOULD BE NOTED THAT THE MEASURES IDENTIFIED ON THIS PLAN ARE ONLY SUGGESTED (BMPS'S). THE CONTRACTOR SHALL PROVIDE POLLUTION PREVENTION AND EROSION CONTROL MEASURES AS NECESSARY TO CONFORM TO CURRENT CITY, FDEP AND SFWMD CODES AND SPECIFICATIONS.
14. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE CORRECTION OF ANY EROSION OR WATER QUALITY PROBLEMS THAT RESULT FROM THE CONSTRUCTION ACTIVITIES.

D. STORM WATER EROSION CONTROL PRACTICES

1. CONTRACTORS OR SUBCONTRACTORS WILL BE RESPONSIBLE FOR REMOVING SEDIMENT FROM DETENTION PONDS AND ANY SEDIMENT THAT MAY HAVE COLLECTED IN THE STORM SEWER DRAINAGE SYSTEMS IN CONJUNCTION WITH THE STABILIZATION OF THE SITE.
2. SLOPES SHALL BE LEFT IN A ROUGHENED CONDITION DURING THE GRADING PHASE TO REDUCE RUNOFF VELOCITIES AND EROSION.
3. DUE TO THE GRADE CHANGES DURING THE DEVELOPMENT OF THE PROJECT, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ADJUSTING THE EROSION CONTROL MEASURES (COMPOST SOCK DEVICES, ETC.) TO PREVENT EROSION.
4. WHERE PRACTICAL, STORMWATER SHALL BE CONVEYED BY SWALES.
5. EROSION CONTROL MEASURES SHALL BE EMPLOYED TO MINIMIZE TURBIDITY OF SURFACE WATERS LOCATED DOWNSTREAM OF ANY CONSTRUCTION ACTIVITIES. WHILE THE VARIOUS TECHNIQUES REQUIRED WILL BE SITE SPECIFIC, THEY SHALL BE EMPLOYED AS NEEDED IN ACCORDANCE WITH THE FOLLOWING:
   A. IN GENERAL, EROSION SHALL BE CONTROLLED AT THE EARLIEST PRACTICAL STAGE POSSIBLE.
   B. STORMWATER INLETS SHALL BE PROTECTED DURING CONSTRUCTION. PROTECTION MEASURES SHALL BE EMPLOYED AS SOON AS PRACTICAL DURING THE VARIOUS STAGES OF INLET CONSTRUCTION. SILT BARRIERS SHALL REMAIN IN PLACE UNTIL SODDING AROUND INLETS IS COMPLETE.
   C. WHEN NEEDED A TEMPORARY SEDIMENT TRAP SHALL BE CONSTRUCTED TO OBTAIN SEDIMENT-LADEN RUNOFF FROM DISTURBED AREAS.
6. SILT BARRIERS, ANY SILT WHICH ACCUMULATES BEHIND THE BARRIERS, AND ANY FILL USED TO ANCHOR THE BARRIERS SHALL BE REMOVED PROMPTLY AFTER THE END OF THE MAINTENANCE PERIOD SPECIFIED FOR THE BARRIERS.
7. SLOPES OF BANKS OF RETENTION/DETENTION PONDS SHALL BE CONSTRUCTED NOT STEEPER THAN 3H:1V FROM TOP OF BANK TO TEN FEET BELOW NORMAL WATER LEVEL AS APPLICABLE.
8. SOD SHALL BE PLACED FOR A 2-FOOT WIDE STRIP ADJOINING ALL CURBING AND AROUND ALL INLETS. SOD SHALL BE PLACED BEFORE SILT BARRIERS ARE REMOVED.
9. WHERE REQUIRED TO PREVENT EROSION FROM SHEET FLOW ACROSS BARE GROUND FROM ENTERING A LAKE OR SWALE, A TEMPORARY SEDIMENT TEMP SHALL BE CONSTRUCTED.
10. FILTER FABRIC SHALL BE USED FOR STORM DRAIN INLET PROTECTION BEFORE FINAL STABILIZATION.
11. FLOATING TURBIDITY BARRIERS SHALL BE INSTALLED PRIOR TO CONSTRUCTION AND SHALL INCLUDE EXECTION OF DRAINAGE OUTFALL PIPE AND ENDWALL.
12. EXISTING DRAINAGE FLOW PATTERNS AND POSITIVE DRAINAGE TO EXISTING OUTFALLS SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION.
13. ALL NEW INLETS INSTALLED UNDER THIS PROJECT SHALL RECEIVE IN LET PROTECTION.

E. WIND EROSION CONTROL PRACTICES

1. WIND EROSION SHALL BE CONTROLLED BY EMPLOYING THE FOLLOWING METHODS AS NECESSARY AND APPROPRIATE:
   A. BARE EARTH AREAS SHALL BE WATERED DURING CONSTRUCTION AS NECESSARY TO MINIMIZE THE TRANSPORT OF FUGITIVE DUST. IT MAY BE NECESSARY TO LIMIT CONSTRUCTION VEHICLE SPEED IF BARE EARTH HAS NOT BEEN EFFECTIVELY WATERED. IN NO CASE SHALL FUGITIVE DUST BE ALLOWED TO LEAVE THE SITE UNDER CONSTRUCTION.
   B. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY HASPERMANENTLY STOPPED SHALL BE PERMANENTLY SEEDED (SEE PERMANENT STABILIZATION PRACTICES FOR DETAILS). THESE AREAS SHALL BE SEEDED NO LATER THAN 14 DAYS AFTER THE LAST CONSTRUCTION ACTIVITY OCCURRING IN THESE AREAS. REFER TO THE GRADING PLAN AND/OR LANDSCAPE PLAN. CLEARED SITE DEVELOPMENT AREAS SHALL BE CONTINUALLY SCHEDULED FOR CONSTRUCTION ACTIVITIES SHALL BE COVERED WITH HAY OR DAMPSEEDED AND PERIODICALLY WATERED SUFFICIENTLY TO STABILIZE THE TEMPORARY EROSION (SEE ITEM TEMPORARY STABALIZATION PRACTICES FOR DETAILS).
   C. AT ANY TIME BOTH DURING AND AFTER SITE CONSTRUCTION THAT WATERING AND/OR APPLICATION ARE NOT EFFECTIVE IN CONTROLLING WIND EROSION AND/OR TRANSPORT OF FUGITIVE DUST, OTHER METHODS AS ARE NECESSARY FOR SUCH CONTROL SHALL BE EMPLOYED. THESE METHODS SHOULD INCLUDE ERECTION OF DUST CONTROL FENCES A 6-FT GEOTEXTILE FILTER FIBER SHOULD BE HANGING AGAINST THE EXISTING CHAIN LINK FENCE AND GATE.
2. ALL DUST ON THE SITE SHALL BE CONTROLLED. THE USE OF MOTOR OILS AND OTHER PETROLEUM BASED OR TOXIC LIQUIDS FOR DUST SUPPRESSION OPERATIONS IS PROHIBITED.

F. STABILIZATION PRACTICES

1. SHALL BE IN ACCORDANCE WITH DEP DOCUMENT NO 62-621.300(4)(A).
2. DISTURBED PORTIONS OF SITE WHERE CONSTRUCTION ACTIVITY TEMPORARILY CEASE FOR AT LEAST 21 DAYS, SHALL BE STABILIZED WITH TEMPORARY SEED AND MULCH NO LATER THAN 14 DAYS FROM THE LAST CONSTRUCTION ACTIVITY IN THAT AREA.
3. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY PERMANENTLY CEASE SHALL BE STABILIZED WITH SOD NO LATER THAN 14 DAYS AFTER THE LAST CONSTRUCTION ACTIVITY.

G. STRUCTURAL PRACTICES

1. SHALL BE IN ACCORDANCE WITH DEP DOCUMENT NO 62-621.300(4)(A).

H. WASTE DISPOSAL

1. WASTE MATERIALS -- ALL WASTE MATERIALS SHALL BE COLLECTED AND STORED IN A METAL DUMPSTER WITH A SECURE LID IN ACCORDANCE WITH ALL LOCAL AND STATE LAWS. ALL TRASH AND CONSTRUCTION DEBRIS FROM THE SITE SHALL BE DEPOSITED IN THE DUMPSTER. THE SUPERINTENDENT SHALL COORDINATE WITH THE LOCAL UTILITIES TO HAVE THE DUMPSTER EMPTIED AT LEAST TWICE A WEEK AND THE WASTE TAKEN TO AN APPROPRIATE LANDFILL. NO CONSTRUCTION WASTE MATERIALS SHALL BE BURIED ON SITE. THE SUPERINTENDENT SHALL ORGANIZE TRAINING FOR THE EMPLOYEES IN THE PROPER PRACTICES WHEN DEALING WITH WASTE MATERIALS. THE SUPERINTENDENT SHALL BE RESPONSIBLE FOR POSTING AND ENFORCING WASTE MATERIAL PROCEDURES.
2. HAZARDOUS WASTE -- HAZARDOUS WASTE MATERIALS SHALL BE DISPOSED OF IN ACCORDANCE WITH ALL LOCAL AND STATE LAWS OR AS DIRECTED BY THE MANUFACTURER. THE SUPERINTENDENT SHALL ORGANIZE THE PROPER TRAINING FOR EMPLOYEES IN THE PROPER PRACTICES WHEN DEALING WITH HAZARDOUS WASTE MATERIALS. THESE PROCEDURES SHALL BE POSTED ON THE SITE. THE PERSON WHO MANAGES THE SITE SHALL BE RESPONSIBLE FOR ENFORCING THE PROCEDURES.
3. SANITARY WASTE -- SANITARY WASTE SHALL BE COLLECTED AND DISPOSED OF IN ACCORDANCE WITH ALL LOCAL AND STATE LAWS. THE SUPERINTENDENT SHALL COORDINATE WITH THE LOCAL UTILITY FOR COLLECTION OF THE SANITARY WASTE AT LEAST THREE TIMES A WEEK TO PREVENT SPILLAGE ONTO THE SITE.
4. RUBBISH, TRASH, GARBAGE, LITTER, OR OTHER SUCH MATERIALS SHALL BE DEPOSITED INTO SEALED CONTAINERS. MATERIALS SHALL BE PREVENTED FROM LEAVING THE PREMISES THROUGH THE ACTION OF WIND OR STORM WATER DISCHARGE INTO DRAINAGE DITCHES OR WATERS OF THE STATE.

I. OFFSITE TRACKING

1. STABILIZED CONSTRUCTION ENTRANCE SHALL BE PROVIDED TO REDUCE SEDIMENT TRACKING OFFSITE. THE MAJOR ROAD CONNECTED TO THE PROJECT SHALL BE CLEANED ONCE A DAY TO REMOVE ANY EXCESS MUD, DIRT OR ROCK RESULTING FROM CONSTRUCTION TRAFFIC. ALL TRUCKS HAULING MATERIALS OFFSITE SHALL BE COVERED WITH A TARPAULIN.
2. GENERAL CONTRACTOR SHALL DENOTE ON PLAN THE TEMPORARY PARKING AND STORAGE AREA WHICH SHALL ALSO BE USED AS THE EQUIPMENT MAINTENANCE AND CLEANING AREA, EMPLOYEE PARKING AREA, AND AREA FOR LOCATION PORTABLE FACILITIES, OFFICE TRAILERS, AND TOILET FACILITIES. HEAVY CONSTRUCTION EQUIPMENT PARKING AND MAINTENANCE AREAS SHALL BE DESIGNED TO PREVENT OIL, GREASE, AND LUBRICANTS FROM ENTERING SITE DRAINAGE FEATURES INCLUDING STORMWATER COLLECTION AND TREATMENT SYSTEMS. CONTRACTORS SHALL PROVIDE BERMED DIKES, HAY BALES OR SILT SCREENS AROUND, AND SEDIMENT SUMPS WITHIN, SUCH AREAS AS REQUIRED TO CONTAIN SPILLS OF OIL, GREASE OR LUBRICANTS. CONTRACTORS SHALL HAVE AVAILABLE, AND SHALL USE, ABSORBENT FILTER PADS TO CLEAN UP SPILLS AS SOON AS POSSIBLE AFTER OCCURRENCE.
3. ALL WASH WATER FROM CONCRETE TRUCKS, VEHICLE CLEANING, EQUIPMENT CLEANING, ETC. SHALL BE DETAINED ON SITE AND SHALL BE PROPERLY TREATED OR DISPOSED.
4. IF THE ACTION OF VEHICLES TRAVELING OVER THE GRAVEL CONSTRUCTION ENTRANCES IS NOT SUFFICIENT TO REMOVE THE MAJORITY OF DIRT OR MUD, THEN THE TIRES MUST BE WASHED BEFORE THE VEHICLES ENTER A PUBLIC ROAD. IF WASHING IS USED, PROVISIONS MUST BE MADE TO INTERCEPT THE WASH WATER AND TRAP THE SEDIMENT BEFORE IT IS CARRIED OFF THE SITE.
5. ALL MATERIALS SPILLED, DROPPED, WASHED, OR TRACKED FROM VEHICLES ONTO ROADWAYS OR INTO STORM DRAINS MUST BE REMOVED IMMEDIATELY.

J. MAINTENANCE

1. ALL MEASURES STATED ON THIS EROSION AND SEDIMENT CONTROL PLAN, AND IN THE STORM WATER POLLUTION PREVENTION PLAN, SHALL BE MAINTAINED IN FULLY FUNCTIONAL CONDITION UNTIL NO LONGER REQUIRED FOR A COMPLETED PHASE OF WORK OR FINAL STABILIZATION OF THE SITE. ALL EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE CHECKED BY A QUALIFIED PERSON AT LEAST ONCE EVERY SEVEN CALENDAR DAYS, AND WITHIN 24 HOURS OF THE END OF A 0.5" RAINFALL EVENT, AND CLEANED AND REPAIRED IN ACCORDANCE WITH THE FOLLOWING:

   A. INLET PROTECTION DEVICES AND BARRIERS SHALL BE REPAIRED OR REPLACED IF THEY SHOW SIGNS OF UNDERMINING OR DETERIORATION.
   B. ALL SEEDED AREAS SHALL BE CHECKED REGULARLY TO SEE THAT A GOOD STAND IS MAINTAINED. AREAS SHOULD BE FERTILIZED, WATERED, AND RESEEDED AS NEEDED.
   C. THE COMPOST ROCK FILTRATION DEVICE SHALL BE INSPECTED PERIODICALLY FOR HEIGHT OF SEDIMENT AND CONDITION OF DEVICE. COMPOST SOCK SHALL BE REPAIRED TO ITS ORIGINAL CONDITION IF DAMAGED. SEDIMENT SHALL BE REMOVED FROM THE COMPOST SOCK WHEN IT REACHES ONE-THIRD THE HEIGHT OF THE COMPOST SOCK.
   D. THE CONSTRUCTION ENTRANCES SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOW OF MUD ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE CONSTRUCTION ENTRANCES AS CONDITIONS DEMAND.
   E. THE TEMPORARY PARKING AND STORAGE AREA SHALL BE KEPT IN GOOD CONDITION (SUITABLE FOR PARKING AND STORAGE). THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE TEMPORARY PARKING AS CONDITIONS DEMAND.
   F. OUTLET STRUCTURES IN THE SEDIMENTATION BASINS SHALL BE MAINTAINED IN OPERATIONAL CONDITIONS AT ALL TIMES. THE SEDIMENT BASINS/SWALES SHALL BE CHECKED MONTHLY FOR DEPTH OF SEDIMENT. SEDIMENT SHALL BE REMOVED FROM SEDIMENT BASINS OR TRAPS WHEN THE DESIGN CAPACITY HAS BEEN REDUCED BY 10% AND AFTER CONSTRUCTION IS COMPLETE.
   G. ALL MAINTENANCE OPERATIONS SHALL BE DONE IN A TIMELY MANNER BUT IN NO CASE LATER THAN SEVEN CALENDAR DAYS FOLLOWING THE INSPECTION. EROSION DIKES SHALL BE INSPECTED MONTHLY AND BREACHES SHALL BE PROMPTLY REPAIRED.
   H. A MAINTENANCE REPORT SHALL BE COMPLETED DAILY AFTER EACH INSPECTION OF THE SEDIMENT AND EROSION CONTROL METHODS. THE REPORTS SHALL BE FILED IN AN ORGANIZED MANNER AND RETAINED ON-SITE DURING CONSTRUCTION. AFTER CONSTRUCTION IS COMPLETED, THE REPORTS SHALL BE SAVED FOR AT LEAST THREE YEARS. THE REPORTS SHALL BE AVAILABLE FOR ANY AGENCY THAT HAS JURISDICTION OVER EROSION CONTROL.
   I. ALL REPAIRS MUST BE MADE WITHIN 24 HOURS OF REPORT.
   J. THE SUPERINTENDENT SHALL ORGANIZE THE TRAINING FOR INSPECTION PROCEDURES AND PROPER EROSION CONTROL METHODS FOR EMPLOYEES THAT COMPLETE INSPECTIONS AND REPORTS.
   K. SILT FENCES SHALL BE REPAIRED TO THEIR ORIGINAL CONDITIONS IF DAMAGED. SEDIMENT SHALL BE REMOVED FROM THE SILT FENCES WHEN IT REACHES ONE-HALF THE HEIGHT OF THE SILT FENCE.

2. THE EROSION CONTROL FEATURES INSTALLED BY THE CONTRACTOR SHALL BE ACCEPTABLY MAINTAINED BY THE CONTRACTOR DURING THE CONSTRUCTION PERIOD.

G. SPILL PREVENTION AND CONTROL

THE FOLLOWING ARE THE MATERIAL MANAGEMENT PRACTICES THAT WILL BE USED TO REDUCE THE RISK OF SPILLS OR OTHER ACCIDENTAL EXPOSURE OF MATERIALS AND SUBSTANCES TO STORM WATER RUNOFF.

1. GOOD HOUSEKEEPING

   A. SUPERINTENDENT SHALL INSPECT PROJECT AREA DAILY FOR PROPER STORAGE, USE, AND DISPOSAL OF CONSTRUCTION MATERIALS.
   B. STORE ONLY ENOUGH MATERIAL ON SITE FOR PROJECT COMPLETION.
   C. ALL SUBSTANCES SHOULD BE USED BEFORE DISPOSAL OF CONTAINER.
   D. ALL CONSTRUCTION MATERIALS STORED SHALL BE ORGANIZED AND IN THE PROPER CONTAINER AND IF POSSIBLE, STORED UNDER A ROOF OR PROTECTIVE COVER.
   E. PRODUCTS SHALL NOT BE MIXED UNLESS DIRECTED BY THE MANUFACTURER. 1. ALL PRODUCTS SHALL BE USED AND DISPOSED OF ACCORDING TO THE MANUFACTURER'S RECOMMENDATIONS.
   F. PRODUCTS WILL BE KEPT IN THEIR ORIGINAL CONTAINERS WITH THE ORIGINAL MANUFACTURER'S LABEL.

2. HAZARDOUS PRODUCTS

   A. MATERIALS SHOULD BE KEPT IN ORIGINAL CONTAINER WITH LABELS UNLESS THE ORIGINAL CONTAINERS CANNOT BE RESEALED. IF ORIGINAL CONTAINERS CANNOT BE USED, LABELS AND PRODUCT INFORMATION SHALL BE SAVED.
   B. PROPER DISPOSAL PRACTICES SHALL ALWAYS BE FOLLOWED IN ACCORDANCE WITH MANUFACTURER AND LOCAL/STATE REGULATIONS.

3. PRODUCT SPECIFIC PRACTICES

   A. PETROLEUM PRODUCTS MUST BE STORED IN PROPER CONTAINERS AND CLEARLY LABELLED. VEHICLES CONTAINING PETROLEUM PRODUCTS SHALL BE PERIODICALLY INSPECTED FOR LEAKS. PRECAUTIONS SHALL BE TAKEN TO AVOID LEAKAGE OF PETROLEUM PRODUCTS ON SITE.
   B. THE MINIMUM AMOUNT OF FERTILIZER SHALL BE USED AND NEED INTO THE SOIL IN ORDER TO LIMIT EXPOSURE TO STORM WATER. FERTILIZERS SHALL BE STORED IN A COVERED SHED. THE CONTENTS OF ANY PARTIALLY USED BAGS OF FERTILIZER SHALL BE TRANSFERRED TO A SEALABLE PLASTIC BIN TO AVOID SPILLS.
   C. PAINT CONTAINERS SHALL BE SEALED AND STORED WHEN NOT IN USE. EXCESS PAINT MUST BE DISPOSED OF IN AN APPROVED MANNER.
   D. EXCESS PAINT WILL NOT BE DISCHARGED TO THE STORM SEWER SYSTEM BUT WILL BE PROPERLY DISPOSED OF ACCORDING TO MANUFACTURER'S INSTRUCTIONS OR STATE AND LOCAL REGULATIONS.
   E. CONCRETE TRUCKS SHALL NOT BE ALLOWED TO WASH OUT OR DISCHARGE SURPLUS CONCRETE OR DRUM WASH WATER ON THE SITE.

H. SPILL CLEAN UP

1. IN ADDITION TO THE GOOD HOUSEKEEPING AND MATERIAL MANAGEMENT PRACTICES DISCUSSED ABOVE, THE FOLLOWING PRACTICES SHALL BE FOLLOWED FOR SPILL PREVENTION AND CLEANUP:
   A. SPILL CLEANUP INFORMATION SHALL BE POSTED ON SITE TO INFORM EMPLOYEES ABOUT CLEANUP PROCEDURES AND RESOURCES.
   B. THE FOLLOWING CLEAN-UP EQUIPMENT MUST BE KEPT ON-SITE NEAR THE MATERIAL STORAGE AREA: SLICKERS, MOPS, RAGS, BROOMS, DUST PANS, SAND, SAWDUST, LIQUID ABSORBER, GOGGLES, AND TRASH CONTAINERS.
   C. SUFFICIENT OIL AND GREASE ABSORBING MATERIALS AND FLOTATION BOOMS SHALL BE MAINTAINED ON-SITE AND READILY AVAILABLE TO CONTAIN AND CLEAN-UP FUEL OR CHEMICAL SPILLS AND LEAKS.
   D. ALL SPILLS SHALL BE CLEANED UP AS SOON AS POSSIBLE.
   E. WHEN CLEANING A SPILL, THE AREA SHOULD BE well VENTILATED AND THE EMPLOYEE SHALL WEAR PROPER PROTECTIVE COVERING TO PREVENT INJURY.
   F. TOXIC SPILLS MUST BE REPORTED TO THE PROPER AUTHORITY REGARDLESS OF THE SIZE OF THE SPILL.
   G. AFTER A SPILL, THE PREVENTION PLAN SHALL BE REVIEWED AND CHANGED TO PREVENT FURTHER SIMILAR SPILLS FROM OCCURRING. THE CAUSE OF THE SPILL, MEASURES TO PREVENT IT, AND HOW TO CLEAN THE SPILL UP SHALL BE RECORDED.
   H. THE SUPERINTENDENT SHALL BE THE SPILL PREVENTION AND CLEANUP COORDINATOR AND IS RESPONSIBLE FOR THE DAY TO DAY SITE OPERATIONS. THE SUPERINTENDENT ALSO OVERSEES THE SPILL PREVENTION PLAN AND SHALL BE RESPONSIBLE FOR EDUCATING THE EMPLOYEES ABOUT SPILL PREVENTION AND CLEANUP PROCEDURES.

I. SEQUENCE OF CONSTRUCTION

1. UPON IMPLEMENTATION AND INSTALLATION OF THE FOLLOWING AREAS, TRAILER, PARKING, LAY-DOWN, PORTA-POTTY, WHEEL WASH, CONCRETE WASHOUT, FUEL AND MATERIAL STORAGE CONTAINERS, SOLID WASTE CONTAINERS, ETC., IMMEDIATELY DENOTE THEM ON THE SITE MAPS AND NOTE ANY CHANGES IN LOCATION AS THEY OCCUR THROUGHOUT THE CONSTRUCTION PROCESS.

   A. CONSTRUCT STABILIZED CONSTRUCTION ENTRANCE, AND INSTALL INLET PROTECTION, TURBIDITY BARRIERS, AND SILT FENCE.
   B. DEMOLISH EXISTING STRUCTURES, (IF APPLICABLE).
   C. INSTALL AND STABILIZE ANY NECESSARY HYDRAULIC CONTROL STRUCTURES (DIKES, CHECK DAMS, OUTLET TRAPS, ETC.).
   D. PREPARE CLEARING AND GRUBBING OF THE SITE, (IF APPLICABLE).
   E. PERFORM MASS GRADING, ROUGH GRADE TO ESTABLISH PROPOSED DRAINAGE PATTERNS.
   F. TEMPORARILY SEED, THROUGHOUT CONSTRUCTION, DISTURBED AREAS THAT WILL BE INACTIVE FOR 7 DAYS OR MORE AS REQUIRED BY GENERIC PERMIT.

2. IN THE EVENT OF BMP ISSUES, HALT ALL ACTIVITIES AND CONTACT THE CIVIL ENGINEER CONSULTANT TO PERFORM INSPECTION AND CERTIFICATION OF BMPS. GENERAL CONTRACTOR SHALL SCHEDULE AND CONDUCT STORM WATER PRE-CONSTRUCTION MEETING WITH ENGINEER AND ALL GROUND DISTURBING CONTRACTORS BEFORE PROCEEDING WITH CONSTRUCTION.

3. CONTRACTOR TO BE RESPONSIBLE FOR OBTAINING ALL DEWATERING PERMITS NECESSARY FOR CONSTRUCTION.

THIS ITEM HAS BEEN DIGITALLY SIGNED AND SEALED BY RENALDO RIVERA, PE. ON 9/5/23.

PRINTED COPIES OF THIS DOCUMENT ARE NOT CONSIDERED SIGNED AND SEALED AND THE SIGNATURE MUST BE VERIFIED ON ANY ELECTRONIC COPIES.

NOTES

1. CONTRACTOR TO MAINTAIN DRAINAGE FLOW WITHIN THE CANAL DURING AND AFTER CONSTRUCTION.
2. SAW CUTTING OF THE EXISTING SIDEWALK SHALL BE MADE ONLY AT THE NEAREST FLAG JOINTS.
3. ALL SIDEWALKS SHALL BE 4" THICK, EXCEPT AT DRIVEWAY APPROACHES WHERE IT SHALL BE 6" THICK.
4. NO EXISTING TREES SHALL BE REMOVED UNLESS OTHERWISE STATED.
5. ALL PROPOSED SIDEWALK SLOPES SHALL HAVE A 2% CROSS SLOPE AND 5% LONGITUDINAL SLOPE, MAXIMUM.
6. ALL SIDEWALK RAMPS AND DETECTABLE WARNINGS SHALL CONFORM TO FDOT STANDARDS.
7. ALL ASPHALT TO BE REMOVED SHALL BE SAW TO ADJACENT TO PROPOSED IMPROVEMENTS.
8. ALL UTILITIES CROSSINGS THROUGH THE CULVERT ARE ASSUMED TO BE PASSING UNDERNEATH. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO CONFIRM, IDENTIFY, PRESERVE, AND MAINTAIN THEIR INTEGRITY WHILE PERFORMING CONSTRUCTION.
9. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OR THE INCLUSIVENESS OF THIS DATA. THE CONTRACTOR IS REQUIRED TO MARK AND CLEARLY DELINEATE LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO IDENTIFY, LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT DIGGING) COORDINATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL BEAR ALL COSTS FOR THIS WORK.

* ALL GRADES ON PLANS REFER TO THE NATIONAL GEODETIC VERTICAL DATUM (NGVD-1929)

- PAVEMENT RESTORATION

NOTES

1. ALL PAVEMENT MARKING AND SIGNAGE SHALL CONFORM TO THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES (MUTCD), AND MIAMI-DADE TRAFFIC ENGINEERING STANDARDS.
2. ALL PAVEMENT MARKINGS SHALL BE THERMOPLASTIC UNLESS OTHERWISE NOTED. THE CONTRACTOR SHALL PAINT MARKINGS, THEN AFTER 14 DAY CURING PERIOD, PLACE THERMOPLASTIC PAVEMENT MARKINGS.
3. ONE BI-DIRECTIONAL YELLOW REFLECTIVE PAVEMENT MARKER SHALL BE PROVIDED AT 40-FEET INTERVALS ON EACH SIDE OF DOUBLE YELLOW STRIPES AND AT 40-FEET INTERVALS WITHIN SKIP CENTERLINE MARKINGS.
4. EXISTING UNDERGROUND UTILITIES ON THE DRAWINGS HAVE BEEN SHOWN BASED UPON THE BEST AVAILABLE INFORMATION. THE ENGINEER AND THE CITY DO NOT GUARANTEE THE ACCURACY OR THE INCLUSIVENESS OF THIS DATA. THE CONTRACTOR IS REQUIRED TO MARK AND CLEARLY DELINEATE LOCATIONS OF EXISTING UTILITIES WITHIN AREAS OF WORK PRIOR TO EXCAVATION TO AVOID DAMAGE. THE CONTRACTOR SHALL MAKE ALL REASONABLE EFFORTS TO IDENTIFY, LOCATE AND MARK EXISTING UTILITIES BY FIELD VERIFICATION, (E.G. SOFT DIGGING), COORDINATION WITH UTILITY COMPANIES AND ELECTRONIC OR OTHER SUCH DETECTION TECHNOLOGY AND MEANS AND SHALL BEAR ALL COSTS FOR THIS WORK.

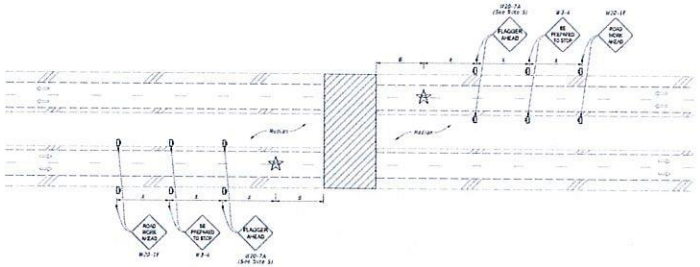
SINGLE LANE CLOSURE



SYMBOLS:

- Work Area
- Channelizing Device (See Index 102-600)
- Work Zone Sign
- Arrow Board
- Lane Identification and Direction of Traffic

GENERAL NOTE:

1. L = Taper Length
   B = Buffer Length
   X = Work Zone Sign Distance
   See Index 102-600 for "L", "B", "X", and channelizing device spacing values.
2. On undivided highways the median signs as shown are to be omitted.
3. On limited access facilities, omit "Right Shoulder Closed" signs (W21-5a) and associated work zone sign spacing distances.
4. If the grass shoulder is less than 4 m width, omit the taper and channelizing devices from the grass shoulder.
5. The "Speeding Fines Doubled When Workers Present" signs (R2S-2A) and "End Road Work" signs (G20-2) and "Right Shoulder Closed" (W21-5a), along with associated work zone sign distances, may be omitted when the work operation will be in place for 24 hours or less. For Single Lane Closures, arrow boards and buffer (B) may also be omitted when the work operation will be in place for 60 minutes or less and the speed limit is 45 mph or less.
6. Use inverted plan of the illustrations for work on left side of roadways.
7. Temporary pavement markings may be omitted when the work operation is in place for 3 days or less.

LAST REVISION 11/01/21	DESCRIPTION	FDOT	FY 2022-23 STANDARD PLANS	MULTILANE ROADWAY, LANE CLOSURES	INDEX 102-613	SHEET 1 of 5

(Multilane Roadway Shown, Two-Lane Roadway Similar)

SYMBOLS:

- Work Area
- Work Zone Sign
- Traffic Control Officer
- Lane Identification and Direction of Traffic

NOTES:

1. This Index applies to two-lane, two-way and multilane roadways, except limited access facilities with temporary daytime roadway closures of 3 hours or less.
2. B = Buffer Length
   X = Work Zone Sign Distance
   See Index 102-600 for "B" and "X" values.
3. For Two-Lane Roadways, a Flagger may substitute the traffic control officer with approval of the Engineer.
4. Traffic volume or complexity of the roadway may dictate additional signs, devices or traffic control officers.
5. Optionally, use "Flagger Ahead" sign with symbol (W20-7) instead of "Flagger Ahead" sign ● (W20-7A).
6. Dual Signs are required for Dotted Roadways only.

CITY OF OPA-LOCKA REQUEST FOR PROPOSALS RFP
NO: 23-1016200
SESAME STREET CULVERT REPLACEMENT

Sealed proposal for SESAME STREET CULVERT REPLACEMENT for the City of Opa-locka will be received by the City's Clerk Office, 780 Fisherman St, 4th Floor, Opa-locka, Florida 33054, **Monday, October 16, 2023, by 2:00pm EST.** Any RFP Package received after the designated closing time will be returned unopened. The OCRA will be accepting proposals by mail, however it is your responsibility to submit your proposal by the due date. In addition, proposal may be submitted via www.demandstar.com (e-bid) by 2:00pm.

The address to submit sealed proposal is listed below:

CITY OF OPA-LOCKA
Office of the City Clerk
780 Fisherman Street, 4th Floor Opa-locka,
Florida 33054

An original and six (6) copies for a total of seven (7) plus 1 copy of the Proposal package on USB Flash Drive in PDF format shall be submitted in sealed envelopes/packages addressed to the City Clerk, City of Opa-locka, Florida, and marked **RFP for SESAME STREET CULVERT REPLACEMENT.**

Proposers desiring information for use in preparing proposals may obtain a set of such documents by visiting the City's website at www.opalockafl.gov or www.demandstar.com.

The City reserves the right to accept or reject any and all proposals and to waive any technicalities or irregularities therein. The City further reserves the right to award the contract to that proposer whose proposal best complies with the **RFP NO: 23-1016200** requirements. Proposers may not withdraw their proposal for a period of ninety (90) days from the date set for the opening thereof.

A pre-bid meeting will be held on **Wednesday, September 27, 2023 at 2:30 p.m.** at 780 Fisherman Street, 4th Floor, Opa-locka, FL 33054 and via Microsoft Teams.

Joanna Flores, CMC City
Clerk

CITY OF OPA-LOCKA
REQUEST FOR PROPOSALS RFP NO: 23-1016200
SESAME STREET CULVERT REPLACEMENT

PROPOSAL GUIDELINES

1-1. Introduction: The City of Opa-locka seeks proposals for SESAME STREET CULVERT REPLACEMENT. The City is soliciting bids on behalf of the City Manager's Office for SESAME STREET CULVERT REPLACEMENT under the laws of the State of Florida. These services must be efficient and economical, adhere to industry standards and best practices, and utilize the latest nonproprietary technology. The Contract will be awarded to the highest ranked Proposer, as described in the Evaluation Procedures Section below.

1-2. Proposal Submission and Withdrawal: The City of Opa-locka will be accepting proposals by mail, however it is Proposer's responsibility to submit Proposer's proposal by the due date. In addition, proposals may be submitted via www.demandstar.com (e-bid). The City must receive all proposals by 2:00 p.m. on tba, 2023. The address to submit sealed proposals is listed below:

CITY OF OPA-LOCKA Office of the City Clerk
780 Fisherman Street, 4th Floor Opa-locka,
Florida 33054

To facilitate processing, please clearly mark the outside of the proposal package as follows: RFP NO. 23-1016200 – SESAME STREET CULVERT REPLACEMENT. This package shall also include the Proposer's return address.

Proposers may withdraw their proposals by notifying the City in writing at any time prior to the deadline for proposal submittal. After the deadline, the proposal will constitute an irrevocable offer, for a period of 90 days. Once opened, proposals become a record of the City and will not be returned to the Proposer.

The City cautions Proposers to assure actual delivery of mailed or hand-delivered proposals directly to the City Clerk's Office at 780 Fisherman Street, 4th Floor, Opa-locka, Florida 33054 prior to the deadline set for receiving proposals. Telephone confirmation of timely receipt of the proposal may be made by calling (305) 688-4611 before proposal closing time. Any proposal received after the established deadline will not be considered and will be returned unopened to the Proposer(s).

1-3. Number of Copies: Proposers shall submit an original and six (6) copies (a total of 7) plus one copy on USB flash drive in PDF format of the proposal in a sealed, opaque package marked as noted above. The Proposer will be responsible for timely delivery, whether by personal delivery, US Mail or any other delivery medium.

1-4. Development Costs: Neither the City nor its representatives shall be liable for any expenses incurred in connection with preparation of a response to this Request for Proposal. Proposers should prepare their proposals

simply and economically, providing a straightforward and concise description of the Proposer's ability to meet the requirements of the RFP.

1-5. Inquiries: The City Clerk will receive written requests for clarification concerning the meaning or interpretations of the RFP, until eight (8) days prior to the submittal date. City personnel are authorized only to direct the attention of prospective Proposers to various portions of the RFP so that they may read and interpret such for themselves. No employee of the City is authorized to interpret any portion of this RFP or give information as to the requirements of the RFP in addition to what is contained in the written RFP document.

1-6. Addendum: The City may record its response to inquiries and any supplemental instructions in the form of written addenda. The City may mail written addenda up to three (3) calendar days before the date fixed for receiving the proposals. Proposers shall contact the City to ascertain whether any addenda have been issued. Failure to do so could result in an unresponsive proposal. Any oral explanation given before the RFP opening will not be binding.

All Proposers are expected to carefully examine the proposal documents. Any ambiguities or inconsistencies should be brought to the attention of the City's Purchasing Agent through written communication prior to the opening of the proposals.

1-7. Contract Awards: The City anticipates entering into an Agreement with the Proposer who submits the proposal judged by the City to be most advantageous. The Proposer understands that this RFP does not constitute an offer or an Agreement with the Proposer. An offer or Agreement shall not be deemed to exist and is not binding until proposals are reviewed, accepted by appointed staff, the best proposal has been identified, approved by the appropriate level of authority within the City and executed by all parties. The City anticipates that the final Agreement will be in substantial conformance with this sample Agreement; nevertheless, Proposers are advised that any Agreement may result from the RFP may deviate from the Sample Agreement. The City reserves the right to reject all proposals, to abandon the project and/or to solicit and re- advertise for other proposals.

1-8. Contractual Agreement: This RFP and Consultant/Contractor proposal shall be included and incorporated in the final award. The order of contractual precedence will be the Contract or Agreement document, original Terms and Conditions, and Proposer response. Any and all legal action necessary to enforce the award will be held in Miami-Dade County and the contractual obligations will be interpreted according to the laws of Florida. Any additional contract or agreement requested for consideration by the Proposer must be attached and enclosed as part of the proposal.

1-9. Selection Process: The proposals will be evaluated and assigned points. The firm with the highest number of points will be ranked first; however, nothing herein will prevent the City from assigning work to any firm deemed responsive and responsible.

The City reserves the right to further negotiate any proposal, including price, with the highest rated Proposer. If an agreement cannot be reached with the highest rated Proposer, the City reserves the right to negotiate and recommend award to the next highest Proposer or subsequent Proposers until an agreement is reached.

1-10. Public Records: Upon award recommendation or ten (10) days after opening, whichever occurs first, proposals become "public records" and shall be subject to public disclosure consistent with Chapter 119 Florida Statutes. Proposers must invoke the exemptions to disclosure provided by law in the response to the RFP, and must identify the data or other materials to be protected, and must state the reasons why such exclusion from public disclosure is necessary. Document files may be examined, during normal working hours.

1-11. News Releases: The Proposer shall obtain the prior approval of the City Manager's Office for all news releases or other publicity pertaining to this RFP or the service, study or project to which it relates.

1-**12**. Insurance: The awarded Proposer(s) shall maintain insurance coverage reflecting at least the minimum amounts and conditions specified herein. In the event the Proposer is a governmental entity or a self-insured organization, different insurance requirements may apply. Misrepresentation of any material fact, whether intentional or not, regarding the Proposers' insurance coverage, policies or capabilities may be grounds for rejection of the proposal and rescission of any ensuing Agreement.

1. Evidence of General Liability coverage with limits not less than $1,000,000 per Occurrence/ $2,000,000 Aggregate (Including Policy Number and Policy Period);

2. Evidence of Auto Liability coverage with limits not less than $1,000,000 per Occurrence/$1,000,000 Aggregate (Including Policy Number and Policy Period);

3. Evidence of Workers' Compensation coverage with statutory limits and Employer's Liability coverage with limits not less than $100,000 (Including Policy Number and Policy Period);

4. The City listed as an additional insured (this may be specifically limited to the specific job(s) the contractor will be performing);

5. Minimum 30-day written notice of cancellation.

1-**13**. Licenses: Proposers, both corporate and individual, must be fully licensed and certified in the State of Florida at the time of RFP submittal. The proposal of any Proposer who is not fully licensed and certified shall be rejected.

1-**14**. Public Entity Crimes: Award will not be made to any person or affiliate identified on the Department of Management Services' "Convicted Vendor List". This list is defined as consisting of persons and affiliates who are disqualified from public contracting and purchasing processes because they have been found guilty of a public entity crime. No public entity shall award any contract to or transact any business in excess of the threshold amount provided in Section 287.017 Florida Statutes for Category Two (currently $25,000) with any person or affiliated on the "Convicted Vendor List" for a period of thirty-six (36) months from the date that person or affiliate was placed on the "Convicted Vendor List" unless that person or affiliate has been removed from the list. By signing and submitting the RFP proposal forms, Proposer attests that they have not been placed on the "Convicted Vendor List".

1-**15**. Code Of Ethics: If any Proposer violates or is a party to a violation of the code of ethics of the City of Opalocka or the State of Florida with respect to this proposal, such Proposer may be disqualified from performing the work described in this proposal or from furnishing the goods or services for which the proposal is submitted and shall be further disqualified from submitting any future proposals for work, goods or services for the City of Opalocka.

1-**16**. Drug-Free Workplace: Preference shall be given to businesses with Drug-Free Workplace (DFW) programs. Whenever two or more proposals which are equal with respect to price, quality, and service are received by the City for the procurement of commodities or contractual services, a proposal received from a business that completes the attached DFW form certifying that it is a DFW shall be given preference in the award process.

1-**17**. Permits and Taxes: The Proposer shall procure all permits, pay all charges, fees, and taxes, and give all notices necessary and incidental to the due and lawful execution of the work.

1-**18**. Protests: Protests of the plans, specifications, and other requirements of the request for proposal and bids must be received in writing by the City Clerk's Office at least ten (10) working days prior to the scheduled bid opening. A detailed explanation of the reason for the protest must be included. Protests of the award or intended

award of the bid or contract must be in writing and received in the City Clerk's Office within seven (7) working days of the notice of award. A detailed explanation of the protest must be included.

1-19. Termination for Convenience: A contract may be terminated in whole or in part by the City at any time and for any reason in accordance with this clause whenever the City shall determine that such termination is in the best interest of the City. Any such termination shall be affected by the delivery to the contractor at least five (5) working days before the effective date of a Notice of Termination specifying the extent to which performance shall be terminated and the date upon which termination becomes effective. An equitable adjustment in the contract price shall be made for the completed service, but no amount shall be allowed for anticipated profit on unperformed services.

PHASE 1: 1st Evaluation Committee Meeting (Open to the Public).	TBA
Award Letter Recommendation	TBA
Post Award	TBA

GENERAL CONDITIONS

1.0 PERFORMANCE OF WORK: The Contractor shall supply all labor, transportation, materials, machinery, tools, apparatus, and equipment necessary for the entire proper and substantial completion of his work, and be accountable for the safe, proper and reasonable construction, maintenance and use of the same during construction, and shall remove all construction equipment upon completion, and shall perform all work in the best and most workmanlike manner. Special care shall be taken by the Contractor in placing and removing stockpiles of material, and in the work in general to avoid unnecessary injury to either public property or other areas adjacent to the work.

2.0 CONCURRENT WORK: Work may be performed concurrently by the utilities in the City or the City's Contractor in the right-of-way and it shall be the responsibility of the Contractor to coordinate his work with the utility companies, the City and the City's Contractors.

3.0 USE OF PUBLIC STREETS: Construction shall be performed in such a manner as to provide a minimum of inconvenience to the residents of the area. Any other excavated material spilled from trucks shall be removed by the Contractor and the streets shall be cleaned twice daily to the satisfaction of the Public Works Director.

4.0 EXISTING UTILITIES AND STRUCTURES: It will be the Contractor's responsibility to exercise all caution in the vicinity of any utility. The Contractor shall be fully responsible for, and make good all damages to buildings, telephone or other cables, sewers, water pipes, pavement, driveways, walls, sprinkler systems, survey markers, or other structures which may be encountered whether or not shown on the plans. The Contractor shall have a utility check performed prior to any construction.

4.1 The locations of existing utilities have been prepared using the best information available however, the information is not guaranteed. The Contractor shall be responsible for determining the location, character and depth of all utilities. The Contractor shall be responsible for and make good all damages to all pavement structures and utilities which may be encountered whether or not shown on the plans. The cost of restoration shall be included in the unit price stated in the proposal for the related work. No extras for restoration will be allowed.

4.2 The Contractor shall protect from damage all utilities, structures, surface and subsurface structures at or near the site of the work and shall repair or restore any damage to such facilities, except utilities, resulting from failure to comply with the requirements of this contract or the failure to exercise reasonable care in the performance of the work. If the Contractor fails or refuses to repair any such damage promptly, the City may have the necessary work performed and charge the cost thereof to The Contractor.

4.3 At points where The Contractor's operations are adjacent to utility facilities, which if damaged, might result in expense, loss, disruption of service or other undue inconvenience to the public or to the Owner, work shall not be commenced until all arrangements necessary for the protection thereof have been made by the Contractor. The Contractor shall be solely and

directly responsible to the Owner and operators of such utilities for any damage, injury, expense, loss, inconvenience, or delay caused by The Contractor's operations.

4.4 The Contractor shall not repair or attempt to repair utility damage but shall immediately contact the utility owner. The Contractor shall obtain the name, address, and telephone number of each utility company to contact. The Contractor shall submit to the Engineer these said names and addresses.

4.5 The Contractor shall comply with the Florida Building Code and City Code regarding precautions to be taken in the protection of existing vegetation, structure, utilities, and improvements.

4.6 The Contractor shall maintain access to fire hydrants and alarm boxes throughout the prosecution of the work. Hydrants and fire alarm boxes shall be kept clear and kept visible at all times unless approved otherwise. If visibility cannot be maintained, The Contractor shall provide clearly visible signs showing the location of the fire hydrant and fire alarm boxes.

4.7 The Contractor shall comply with the requirements of the Clean Air Act and the Federal Water Pollution Control Act as well as other requirements specified in those regulations and guidelines listed thereunder.

5.0 EXISTING LANDSCAPING: The Contractor shall be fully responsible for maintaining in good condition, existing trees, grass and shrubs situated within the designated right-of-way, project site or on private property adjacent to the work.

6.0 EXISTING SIGNS AND UTILITY CASTINGS: All existing signs and utility castings shall be preserved and shall remain the property of the City of Opa-Locka. Those not reused shall be delivered to the Opa-Locka Public Works Yard at 12950 NW 42 Ave in Opa-Locka, FL 33054.

7.0 STOCK PILING MATERIALS: Contractor shall not stockpile materials at the project site unless approved in writing by the Engineer.

8.0 PERMITS: The Contractor shall obtain all required occupational licenses and permits, etc., and pay all required fees. Permits issued by the City will be issued without charge to the Contractor.

9.0 EXTRAS: Bills for extras will be allowed only when work is ordered in writing and approved by the Public Works Director. No money will be allowed for extra work unless approved in writing, beforehand, by the Public Works Director.

10.0 CLEANING UP: The Contractor will be required to leave the work and adjacent areas free of any accumulated rubbish or surplus materials on a daily basis, unless

otherwise directed by the Public Works Director. In the event of failure or undue delay on the part of the Contractor, the City may employ such equipment and labor as may

be necessary, and charge such costs against the Contractor and deduct the amount from the monies due the Contractor for work performed.

11.0 RESTORATION: The Contractor shall complete all restoration as the work is completed but in no event later than five (5) working days.

12.0 TESTING: The Engineer or other person designated by the Public Works Director to supervise the work shall have the right at any time to have tests made on any material used on the job. All expenses for tests shall be borne by the City of Opa-Locka, except the cost of re-testing materials which failed to meet the specifications and waiting time due to Contractor failure to be ready for tests when scheduled. The cost and scheduling of such re-testing shall be the responsibility of the Contractor. All re-testing shall be done by the testing laboratory which test the failed samples. The Contractor will inform the City of his source of materials with sufficient time to secure the necessary samples and perform the necessary tests. The Contractor shall request and receive inspections of specific phases of work as required elsewhere in these specifications. The Contractor shall provide current modified proctor test results for all fill material used on the job.

13.0 PAYMENT: Payment will be made in full compensation for all work performed, materials, labor, tools and equipment furnished, and incidental expenses necessary to complete the work. Payment shall be made on 90% of the monthly estimate and upon the presentation of partial releases of lien. Final payment shall be made upon presentation of a completion statement, receipt of the final releases of lien, receipt of as-built drawings and after final acceptance by the City.

14.0 ACCEPTANCE: Acceptance by the City shall not relieve the Contractor of the responsibility of correcting any defective part of the work resulting from either workmanship or materials or replacing or repairing damaged property resulting from any phase of the Contractor's work.

15.0 GUARANTEE: The Contractor shall guarantee all materials and workmanship for a period of one year from the date of **acceptance** by the City.

16.0 LINE AND GRADE: Where required as determined by the Engineer, the City will establish a base line and reference elevations. All additional lines and grades required for completion of the work shall be furnished at the Contractor's expense.

17.0 TRAFFIC MAINTENANCE: The Contractor shall provide all temporary signing, striping, detouring, barricading, signals, competent flagmen, etc. required in accordance with the minimum requirements of the latest Manual of Uniform Traffic

Control Devices, whenever and wherever needed for pursuance of the project, and/or

as directed by the Engineer. The Contractor shall also coordinate these operations with the City of Opa-Locka Public Works Department. The Contractor shall supply the Engineer with a traffic maintenance plan.

18.0 PROTECTION OF WORK: It shall be the Contractors' responsibility to protect the public and workmen from ongoing construction hazards.

19.0 UNIFORMED POLICE: The Contractor shall be responsible for obtaining the services of the uniformed police officers as needed or as directed by the Engineer. The Contractor shall be reimbursed for the direct, actual expenses for such uniformed police officers.

20.0 INSPECTION: Inspection will be required during all phases of construction, and it shall be the Contractor's responsibility to contact the Engineer or its representative when any work is being performed. The Contractor shall also be responsible for coordinating all inspections of work performed by Subcontractors. Failure to contact the Engineer/Architect or its representatives to obtain the required inspections shall be sufficient cause for rejection.

21.0 LICENSES: The Contractor and all Subcontractors shall submit at the time of bidding, copies of all licenses held by the Company that pertain to the type of work to be performed under this contract. Failure to submit copies of licenses is grounds for rejection of the bid.

22.0 CONTACT PERSON: The Contractor shall provide the Engineer with a local (Miami Dade County) telephone number where the Contractor can be contacted 24 hours a day for the duration of the project.

23.0 UTILITY COORDINATION: The City will not be liable for any delay or added expense the Contractor experiences due to the actions of others, nor shall the City be held responsible for any damages which may be incurred, due to the actions of the Contractor or representative.

24.0 EXAMINATION OF PREMISES: Before submitting proposals for his work, each bidder will be held to have examined the premises and satisfied himself as to the existing conditions under which he will be obligated to work, including all conditions which will in any way affect the work under this contract.

25.0 NON-EXCLUSIVE CONTRACT: Nothing in this contract shall prevent the City from employing other contractors to perform the same or similar work. This can include other contractors working concurrently on the same location.

GC-4

THE CITY OF OPA-LOCKA OPA-LOCKA,

FLORIDA

SPECIAL CONDITIONS

1.0 SCOPE OF WORK:

1.1 SESAME STREET CULVERT REPLACEMENT: The work generally consists of but is not necessarily limited to the following: the selling, delivering and installing of Contractor furnished materials and equipment necessary for the complete replacement of a culvert within along Sesame Street between NW 135th Street and Atlantic Avenue. Replacement includes 66-inch Aluminized Steel piping with new curb and gutters, sidewalk, guardrail, and pavement resurfacing with all appurtenant for miscellaneous items and work for a completed project.

2.0 COMPLETE PROJECT REQUIRED: The specifications describe the various items or classes of work required enumerating or defining the extent of same where necessary to clarify the drawings, but failure to list any items shall not relieve the Contractor from furnishing, installing and performing such work where shown on the drawings, required by any part of the specifications or necessary for the satisfactory completion of the project.

3.0 WORK SCHEDULE: The Contractor shall submit schedules which show the order in which the Contractor proposes to carry out the work with dates for starting various parts of the work and estimated completion dates. The progress schedule s shall be furnished to the Engineer prior to the pre-construction meeting date which will be established by the City.

4.0 PRE-CONSTRUCTION MEETING: After the contract has been awarded and signed, but prior to commencement of work, a pre-construction meeting shall be held. The meeting shall be attended by authorized representatives of the City and Contractor. The purpose of this meeting will be to review the Contractor's submitted progress schedule, clarify jurisdiction and to acquaint all parties present with the authorized representative to be notified. The Contractor will be notified in writing as to the date and place of the meeting.

5.0 AS-BUILT INFORMATION: As work progresses, the Contractor must record all information pertaining to changes and deviations from the contract drawings with special attention to all underground installations. At completion of the job, the Contractor shall submit a complete set of reproducible as-built drawings to the City. Additionally, the Contractor shall maintain a field book with all deviations recorded.

The completed as-built sketches and field books shall become the property of the City. As-built information must be supplied with each pay request. Failure to provide as-built information is cause to reject pay request.

6.0 LIQUIDATED DAMAGES: Should the Contractor, or in the case of default, the surety, fail to fully complete the work within the time stipulated in the proposal, the minimum

sum of five hundred dollars ($500.00) per day shall be deducted from any money due the Contractor not as a penalty but as liquidated damages.

7.0 APPROVAL OF MATERIALS:

7.1 Whenever in these plans and/or specifications a certain brand of materials is specified, it is done for establishing the level of quality, capacity and the characteristics desired. Materials or products specified by the name of manufacturer or the brand or trade name or catalog reference shall be the basis of the bid.

7.2 The Contractor shall make written request for the use of alternate materials within ten (10) days after the Contract is signed, and before ordering any materials requiring approval. If the Contractor makes no request for approval of alternate materials within ten (10) days of the signing of the Contract, it shall be assumed that he intends to furnish the items specified.

7.3 The use of materials other than that specified without the written approval of the Engineer shall be sufficient reason for rejection of the work.

8.0 USE OF PUBLIC STREETS: Construction in the right-of-way or streets shall be performed in such a manner as to provide a minimum of inconvenience to the residents of the area. Access to all residents' homes shall be maintained at all times. A minimum of one traffic lane shall be open at all times.

9.0 STRIPING:

9.1 Temporary striping shall be placed within 48-hours of completion of each course of asphalt unless another course is placed within 48-hours. The cost of temporary striping shall be included in the unit cost of permanent thermoplastic striping.

9.2 Permanent thermoplastic striping shall be placed within 30 days of completing final paving unless otherwise approved by the Engineer.

10.0 RESTORATION OF SURVEY MARKERS: When existing survey markers are removed or destroyed as a result of the construction, it shall be the responsibility of the contractor to replace them using a registered licensed surveyor.

11.0 PROJECT LAYOUT: The Contractor shall layout the proposed work and contact all utilities to verify utility locations. If changes are required, due to conflict or design, the Engineer will make the final determination.

12.0 WORKING HOURS: The normal City working hours are Monday through Friday 8:00 a.m. until 5:00 p.m.

13.0 FINANCIAL STATEMENT: As part of the Contractor's submittal, he/she shall include a certified financial statement detailing the company's financial status over the previous two years.

14.0 NOTICE TO PROCEED: A single notice to proceed will be issued for this project. Upon receipt of the notice to proceed, the contractor shall commence work upon the site(s) within 10 working days and continue such work in an expeditious manner to a conclusion acceptable to the Engineer. No more than 7 consecutive days without construction activity will be allowed unless approved by the Engineer.

15.0 ENVIRONMENTAL PROTECTION:

General Requirements – The Contractor shall provide and maintain environmental protection during the life of the Contract. Environmental protection shall be provided to correct conditions that develop during the conductance of the work, or that are required to control pollution that develops during the development of project. The Contractor's operations shall comply with all Federal, State and local regulations pertaining to water, air, solid waste, and noise pollution.

Protection of Natural Resources – It is intended that the natural resources within the site and outside the limits of permanent work performed under this Contract be preserved in their existing condition or be restored to an equivalent or improved condition upon completion of the work. The Contractor shall confine his work activities to areas defined by the Contract Documents. All work under this contract shall be performed in such a manner that any adverse environmental impacts are reduced to a level that is acceptable to the City. At all times special measures shall be taken to prevent oily or hazardous substances from entering the ground, drainage areas, or local bodies of water.

Control and Disposal of Wastes – The Contractor shall transport and dispose of all waste in a manner that complies with Federal, State, and local requirements. The Contractor shall provide the Engineer with a copy of any state and/or local permits or licenses which reflect such agency's approval and compliance with applicable solid waste disposal regulations. The permits or licenses which reflect such agency's approval and compliance with applicable solid waste disposal regulations. The permits or licenses and the location of the disposal area shall be provided prior to transporting any waste material. Fueling and lubricating of equipment and motor vehicles shall be conducted in a manner that affords the

maximum protection against spills and evaporation. Lubricants and waste oil shall be disposed of in accordance with approved procedures meeting Federal, State and local regulations.

Preservation of Water Courses – The Contractor shall maintain the working area free of excess debris and litter. Furthermore, the Contractor shall take all necessary precautions to protect the Canal waterway in a manner that complies with Federal, State, and local requirements.

The maximum use of low-noise emission products as certified by the Environmental Protection Agency shall be made when available.

16.0 SAFETY: The Contractor shall be responsible for the safety of the Contractor's employees. The Contractor shall abide by all Federal, State, County, and City safety requirements and regulations. The Contractor is responsible to furnish the Contractor's employees with all required safety equipment. The Contractor is required to comply with all applicable OSHA regulations including, Right to Know, Confined Space Entry, Airborne Blood Pathogens.

The Contractor is fully responsible to furnish safety equipment to all of the Contractor's employees on the Owner's job site, including but not limited to safety glasses, gloves, vests, hard hats, braces or any other required safety item. The Contractor is required to make certain that each employee is wearing the proper safety clothing including shoes.

17.0 CONFINED SPACE ENTRY PERMIT: The Contractor must comply with all the provisions contained in OSHA 1910.146 and shall show proof of compliance with the first project invoice. No payment shall be made until such proof is presented and approved by the City.

TECHNICAL SPECIFICATIONS

DIVISION 1 – GENERAL REQUIREMENTS

01010 SUMMARY OF WORK

PART 1 – GENERAL 1.0.1

SCOPE OF WORK

A. This section describes the project in general and provides an overview of the extent of the work to be performed under this Contract. Detailed requirements and extent of work is stated in the applicable Specification sections and shown on the Contract Drawings. The Contractor shall, except as otherwise specifically stated herein or in any applicable parts of the Contract Documents, provide and pay for all labor, materials, equipment, tools, construction equipment, and other facilities and services necessary for proper execution, testing, and completion of the work under this Contract.

1.0.2 DEFINED TERMS

A. As-Built Drawings: As-built drawings reflect field changes and construction modifications to the conformed Bid Documents.

B. Contract Documents: Shall mean all those documents named in the contract.

C. Contractor: Contractor shall mean any person engaged to supply labor, materials or equipment for use in the fulfillment of the project.

D. Construction Drawings: Shall mean the drawings, plans, or reproduction thereof which show scope, character, location, dimensions, and other details of the work to be performed under the Contract Documents.

E. Engineer: Shall mean the City Engineer of the City of Opa-Locka, Public Works Department, or City's designee.

F. Project: Shall mean and include all construction, for which the Contractor is responsible under the contract documents

G. Regulations: Shall mean laws, ordinances, statutes, and lawful order issued by authorities having jurisdiction, and rules, conventions, and agreements within the construction industry that control performance of the work.

H. The City: Shall mean the City of Opa-Locka, Florida.

I. Work: Shall mean all labor, permits, bonds, equipment, materials and incidentals required.

1.0.3 SPECIFICATIONS

A. The specifications included in these Contract Documents establish the minimum performance and quality requirements for materials and equipment together with the minimum standards for quality of workmanship and appearance. Generally, there has been no attempt to separate the Specification sections into groups for the work of separate Subcontractors, or for work to be performed by the various trades. Should there be any question as to the interpretation of any Specification section or part of Specification section, such question should be directed to the Engineer prior to the submittal of a proposal for the work under this Contract.

B. The Sesame Street Culvert Replacement work shown on the drawings is intended to be comprehensive and descriptive, not an exact and complete representation of the actual finished work. Pipeline replacement shall include all accessories and components required to provide a complete and satisfactory system as specified, even though some items may not be specifically shown on the drawings.

C. It is the intent of the City to obtain a complete functional, and satisfactory installation under this Contract, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the plans or stated herein.

D. The Contractor shall also supply all sheeting, shoring, bracing and all other labor, material or equipment required to preclude damage to, or loss of functionality of, any existing facility or system.

1.0.4 REASONABLY IMPLIED PARTS OF THE WORK

A. Any part of the work which is not mentioned in the specifications but is shown on the drawings, or any part not shown on the drawings but described in the specifications, or any part not shown on the drawings nor described in the specifications, but which is necessary or normally required as a part of such work, or is necessary or required to make each installation satisfactorily and legally operable, shall be performed by the Contractor as incidental work, without extra cost to the City, as if fully described in the specifications and shown on the drawings, and the expense thereof shall be included in the applicable unit prices or lump sum bid for the Work.

1.0.5 DESCRIPTION OF WORK

A. The project includes the in-kind replacement of the existing culvert with design amendments to ensure adequate conveyance capacity, pedestrian and vehicular transit safety, and proper scour protection. The project would involve the demolition of the existing culvert structure, excavation for new structures, sloped backfill for culvert installation, new concrete pipe culvert, embankment saddle slope stabilization with riprap, new top slab, asphalt pavement restoration, pavement markings, reconstructed sidewalk, and new guard rails.

B. The project is located along Sesame Street, between the intersections with Atlantic Avenue and NW 135th Street, Opa-Locka, Florida 33054.

C. It is the intent of the City to obtain a complete and working installation under this Project and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

1.0.6 PROJECT BACKGROUND

During a recent milling and resurfacing project, it was discovered by the City's contractor that the culvert was in poor condition and would not withstand the work underway. After an assessment, it was recommended to replace the existing culvert structure with a new culvert that will be designed for current system demands and will provide a permanent installation, that maintains safe pedestrian and vehicular traffic, and a provides a prolonged service life. As a result of the damages discovered, Sesame Street is currently closed to traffic, and will remain closed until its replacement is finalized.

1.0.7 WORK COVERED BY CONTRACT DOCUMENTS

A. Following receipt of Notice to Proceed with the work, the Contractor shall notify the Engineer at least ten (10) days before he/she is ready to start actual construction, to allow the City time to make arrangements for inspection of the work.

B. Work under the Contract shall be scheduled and performed in such a manner as to result in the least possible disruption to the operation of the existing facilities. Any control modifications to the existing facilities shall not be made without first obtaining written permission form the Engineer and the City.

C. Critical events in the sequence of construction are specified herein. The outline sequence of construction does not include all items necessary to complete the work but is intended to identify the sequence of critical events necessary to minimize disruption to the ongoing operation. The sequence of construction is a precedence requirement and does not attempt to schedule the Contractor's work. It is intended

only to indicate which activities must precede other activities in order to minimize interference and disruptions.

D. The existing facilities shall be maintained in an operable condition by the Contractor during construction, as indicated in the sequence of construction. All work by the Contractor that disrupts the normal operations shall be shown on the Construction Schedule and specifically scheduled with the City's staff. The schedule notification shall consist of a written notice defining the work to be accomplished, the function that will be interrupted, the duration of the interruption, and the mitigation effort to be performed by the Contractor to maintain systems capacity continuously. The written notice shall be submitted to the City fourteen (14) days in advance of the proposed work and the City will respond to the Contractor in writing within seven (7) days of receipt of the notice regarding the acceptability of the proposed plan.

1.0.8 SEQUENCE OF CONSTRUCTION

A. The general sequence of construction shall be as follows, but **a detailed sequence of construction shall be submitted by the Contractor and approved by the Engineer before any work is started**. The City reserves the right to make changes to the sequence as necessary to facilitate the work or to minimize conflict with operations and no extra compensation will be allowed.

B. CAPITALIZED ITEMS INDICATE WORK OR FUNCTIONS TO BE PERFORMED BY CITY FORCES. All other items shall be performed by the Contractor with special emphasis on the fact that numerous standard and miscellaneous construction phases are not mentioned specifically but shall be performed by the Contractor as required for a complete Project.

Note: For simplicity, the Sequence of Construction below will not detail the following items. **These shall be the responsibility of the Contractor and no extra compensation will be allowed.**

1. Contractor's field verification of all information provided in the Plans and to determine the type, location, elevation and extent of any utilities which may not have been shown on the Plans.

2. Notify "Sunshine State One-Call of Florida Inc., 811," forty-eight (48) hours prior to any excavation. Locate all utilities along the route of the Project.

3. Contractor's operations involving removal of the existing Culvert shall include:

a. Excavate existing Culvert pipes and provide proper flow diversion between the Canal.

4. Installation of new Culvert system, including: piping, mitered end section, backfilling, rip rap placement, and concrete pavement.

5. Construction of concrete curb and gutter, sidewalk, handicap access ramp, and guardrails.

6. Milling and resurfacing of pavement extents.

7. Contractor's PSM shall reestablish the design baseline, vertical control points and reference points, and establish proposed pipeline location in accordance with Section 02314 “Excavation, Backfill and Fill for Structural Facilities and Utility Systems - Construction Methods."

8. After items 6 and 7 are completed, the Contractor shall meet with the City Inspector at the Project site and perform a pre-construction walk-through along the entire route of the Project to identify possible problems or conflicts with the proposed pipeline location.

9. The general sequence of work shall be as follows:

1) Phase I – Mobilization

Step – 1 Initiate mobilization. The Contractor shall set up storage, staging and parking areas, temporary environmental controls and tree protection devices in the project site. Obtain permits, develop and submit construction schedule and start shop drawing submittal. Contractor shall allow access to the other facilities within the project area, including adjacent businesses and homes at all times during construction.

Step – 2 Call for locates (Sunshine 811) and document all location marks in the field.

Step – 3 Contractor shall include the necessary provisions to safeguard the existing utilities noted within the project area. Furthermore, the Contractor shall be advised that the utilities shown on plans are based on best available information and shall take all necessary precautions to confirm, identify, preserve, and maintain the integrity while performing construction.

Step – 4 Contractor shall **immediately** open a dialog with all existing utilities in the project area. Contractor shall notify Engineer of any utility relocation requirements and costs. Utility relocations shall be reimbursed under a dedicated allowance account. Failure to properly coordinate any required utility relocations may result in delays for which the Contractor may be liable for.

Step – 5 Verify locations, elevations, dimensions, manufacturer of pipes, equipment, etc., before ordering materials to complete the work in accordance with the Contract Documents, Shop Drawings and field conditions.

Step – 6 Upon approval of shop drawings, order long lead items so that materials may be delivered in a timely fashion without delays to construction.

2) Phase II – Demolition of Existing Culvert and Appurtenances NOTE: Refer to Drawings, Sheets C-01 and C-02

Step – 1 Installation of all Erosion Control measures within the Canal.

Step – 2 Removal of existing concrete pavement, concrete headwall, and culvert piping.

Step – 3 Prepare temporary bypass system, if necessary, to divert Canal flows from East to West and vice versa. After successful flow diversion and authorization by the City; the Contractor shall proceed with the installation of the removal of the existing Culvert piping.

3) Phase III – New Culvert Installation

Step – 1 Prepare bedding material to lay stone base for new piping.

NOTE: The Contractor shall provide appropriate shoring to conduct the stone bedding and 66-inch SRASP pipe installation in dry conditions.

Step – 2 Secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations.

Step – 3 The Contractor shall secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations and up to elevation established on plans. Embankment slopes shall be established.

Step – 4 Install concrete headwall at pipe ends.

Step – 5 Install geotextile matting and, sand-cement and Rubble Stone embankment stabilization.

Step – 6 Lay new concrete curb and gutter and sidewalk.

Step – 7 Install new guardrail.

Step – 8 Install new concrete shoulder barrier

4) Phase IV – Final Sitework and Project Closeout

Step – 1 Form and pour the 8” thick concrete pavement surface above Culvert piping.

Step – 2 Lay new concrete curb and gutter and sidewalk.

Step – 3 Mill and resurface top 1” surface course of roadway.

Step – 4 Paint roadway pavement markings and remove temporary construction signage.

Step – 5 Demobilization and related closeout activities shall be in accordance with section 01700 “Project Closeout”.

Step – 6 Complete all remaining miscellaneous and appurtenant work, including restoration of damaged survey control points, landscape restoration and final inspection and cleanup.

C. The Contractor's equipment must be in first class operating condition, including proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment. The Contractor shall provide a temporary electric service for his electric equipment as specified herein below, and shall pay all cost thereof, including all charges for electricity used during the entire course of the project until its acceptance by the City. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

END OF SECTION

01011 SITE CONDITIONS

PART 1 – GENERAL

1.0.1. SITE INVESTIGATION

A. The Contractor acknowledges that he has satisfied them as to the nature and location of the work, the general and local conditions, particularly those bearing upon availability of transportation: disposal, handling and storage of materials; availability of labor, water, electric power, roads; disposal of water from construction; uncertainties of weather; the conformation and conditions of the ground; the type of equipment and facilities needed preliminary to and during the prosecution of work and all other matters which can in any way affect the work or the cost thereof under this contract.

B. The Contractor further acknowledges that he has satisfied himself as to the character, quality, and quantity of surface materials to be encountered from inspecting the site and from evaluating information derived from exploratory work that may have been done by the City included with these contract documents. Any failure by the Contractor to acquaint the City or them with all the available information will not relieve them from the responsibility for properly estimating the difficult or cost thereof under this Contract.

C. The Contractor acknowledges that by personal field observation or other means satisfactory to himself, performed prior to the bid, he has included in the prices bid all costs for dealing with all construction problems create by observable above or on grade features on or adjacent to the site of the site of the work whether or not these features are shown on the plans or described in the specifications. In instances where the observable features indicate subsurface conditions which may affect the project work, as for example, a pavement patch or catch basin gratings indicating respectively a utility or storm sewer not shown on the plans, the Contractor acknowledges that he has made timely, diligent, inquiry of the Engineer or by other means fully satisfied themselves prior to the bid as to the nature of, and costs created by, the subsurface condition and included all costs therefore in the prices bid.

1.0.2. SITE CONDITIONS

A. All information obtained by the City regarding the site conditions, topography, subsurface information, groundwater contamination, groundwater elevations, existing construction of site facilities as applicate, and similar data will be made available for inspection at the office of the Engineer upon request. Such information is offered as advisory information only. Neither the Engineer nor the City assumes any responsibility for the completeness of, or for the Contractor’s interpretation of, such advisory information. Prior to bidding and after written approval from the City, bidder

shall make his own investigations to satisfy themselves with site conditions at their own cost.

B. Surface investigations, including test borings, have been made to indicate subsurface conditions at locations in the project.

C. Prospective bidders are advised, at their own expense, to make such subsurface investigation, by boring or test hole excavation, as may be desirable. However, such work shall be scheduled by appointment with the Engineer if for a City site or by notification to the City and property permitted if in the public right of way.

1.0.3. DIFFERING SUBSURFACE CONDITIONS

A. In the event Subsurface or latent physical conditions are found materially different from those indicated in these documents and differing materially from those ordinarily encountered and generally recognized as inherent in the character of work covered in these project documents, promptly, and before such conditions are disturbed, notify the Engineer in writing of such changed conditions.

B. The Engineer will investigate such conditions promptly and following this investigation, the Contractor shall proceed with the work, unless otherwise instructed by the Engineer. If the Engineer finds that such conditions do so materially differ as to cause an increase or decrease in cost and time considered reasonable by the Engineer, the City will make the final decision regarding any adjustment in cost or time for completion.

C. In the event that site conditions differ from those expected by the Contractor, the Contractor shall proceed to complete the work as contemplated by the plan and specifications on his own cost and expense. If in the discretion of the Engineer, the difference in site conditions renders completion of the work as described by the plans and specifications impossible, the Engineer may alter the work, whereupon the Contractor shall be compensated for any extra work pursuant to “Extra Work and Payment therefore” of the special conditions; the Engineer shall no alter the work where the site conditions render the work more difficult or costly to perform, if such work is otherwise still possible as described in the contract documents.

1.0.4. EXISTING UTILITIES AND LOCATION SERVICES

A. Known utilities and structures adjacent to or encountered in the work are shown on the drawings. The locations shown are taken from existing records and the best information available from the existing plans; However, it is expected that there may be some discrepancies and omissions in the locations and quantities of utilities and structures shown. Those shown are for the convenience of the Contractor only, and no responsibility is assumed by either the Engineer or the City for their accuracy or completeness.

B. **No request for additional compensation or Contract time (except for a noncompensable time extension at the sole discretion of the Engineer, whose decision shall be final) resulting from encountering utilities or structures not shown, or differing in location or elevation from that shown, will be considered. The Contractor shall explore sufficiently ahead of the work to allow time for any necessary adjustments without delay to the progress of the installation. Costs due to delays occasioned by encountering underground utilities or structures which could have or should have been discovered by timely exploration ahead of the work shall rest solely with the Contractor.**

C. Prior to proceeding with excavation, the Contractor shall contact all utility companies and all other users of the right of way in the area to aid in locating their underground services. It shall be the Contractor's responsibility to contact utility companies at least three (3) normal working days before starting construction. The Contractor shall proceed with caution in the excavation and preparation so that the exact location of underground utilities may be determined.

D. It is the responsibility of the Contractor to ensure that all utility or other existing facilities, the stability of which may be endangered by the close proximity of excavation, are temporarily held in position while work proceeds in the vicinity of the facilities and that the utility or other companies concerned be given reasonable advance notice of any such excavation by the Contractor.

E. The Contractor shall take all reasonable precautions against damage to existing utilities. However, in the event of a break in an existing water main, gas main, sewer or underground cable, the Contractor shall immediately notify the responsible official of the organization operating the interrupted utility. The Contractor shall lend all possible assistance in restoring services and shall assume all cost, charges, or claims connected with the interruption and repair of such services, as determined by the City.

1.0.5. CONTRACTOR'S RESPONSIBILITY FOR UTILITY PROPERTIES AND SERVICE

A. Where the Contractor's operation could cause damage or inconvenience to railway, telephone, fiber optic, television, electrical power, oil, gas, water, sewer, irrigation system, or any other utility, public or private, the Contractor shall make all arrangements necessary for the protection of these utilities and services.

B. Notify all utility companies that are affected by the construction operation at least fortyeight (48) hours in advance. Under no circumstance expose any utility without first obtaining permission from the appropriate agency. Once permission has been granted, locate, expose, and provide temporary support for all existing underground utilities and utility poles where necessary. **Absolutely no extra compensation will be allowed for construction problems created by utility poles of whatever size, overhead electric, telephone or other lines whether shown on the plans or not. The Contractor is solely responsible for discovering such items in the field prior to bidding and including all costs for such work in the prices bid.**

C. The Contractor and his Subcontractor shall be solely and directly responsible to the Owners and operators of such properties for any damage, injury, expense, loss, inconvenience, delay, suits, actions, or claims of any character brought because of any injuries or damage which may result from the construction operations under this contract.

D. Neither the City nor its officers or agents shall be responsible to the Contractor for damages as a result of the Contractors failure to protect utilities encountered in the work.

E. In the event of interruption to domestic water, sewer, storm drain, or other utility services as a result of accidental breakage due to construction operations, promptly notify the proper authority. Cooperate with said authority in restoration of service as promptly as possible and bear all costs of repair. In no event shall interruption of any utility service be allowed unless granted by the Owner of the utility.

F. In the event water service lines that interfere with construction are encountered, the Contractor may, by obtaining prior approval of the water utility, cut the service, dig through, and restore the service with similar and equal materials at the Contractor's expense and as approved by the Engineer.

G. Replace, with material approved by the Engineer, at Contractor's expense, any and all other laterals, existing utilities or structures removed or damaged during construction, unless otherwise provided for in these Contract Documents and as approved by the Engineer.

1.0.6. INTERFERING STRUCTURES

A. Take necessary precautions to prevent damage to existing structures whether on the surface, above ground, or underground. An attempt has been made to show major structures on the plans. While the information has been compiled from the best available sources, its completeness and accuracy cannot be guaranteed, and is presented as a guide. The Contractor is solely responsible for field verification of all information provided and to determine the type, location, elevation and extent of any utilities which may not have been shown on the plans.

1.0.7. FIELD RELOCATION

A. During the process of construction, it is expected that minor relocations of the work may be necessary. Such relocations shall be made only by the direction of the Engineer at the Contractor's expense. If existing structures are encountered that will prevent construction as shown, notify the Engineer before continuing with the work in order that the Engineer may make such field revisions as necessary to avoid conflict with the existing structures. If the Contractor fails to notify the Engineer when an existing structure is encountered, and proceeds with the work despite this interference the Contractor does so at his own risk.

B. Representatives of utility companies, the railroad companies, the traffic and transportation authorities, etc., shall be notified in accordance with the provisions set forth in the relevant sections of the specifications and the permitting documents.

01015 INDEX OF DRAWINGS

PART 1 – GENERAL 1.0.1.

PLANS BY THE CITY

A. Plans dated November 2022 and any subsequent revision, thereto, introduced by Addenda prior to bid, showing this work, are hereby made a part of the Contract Documents, and are **listed** as follows:

OPA-LOCKA CULVERT REPLACEMENT

Sheet No.	Drawing No.	Title
GENERAL		
G-01		TITLE SHEET, LOCATION AND LIST OF DRAWINGS
G-02		ABBREVIATION, SYMBOLS, GENERAL NOTES AND LEGENDS CIVIL
C-01		DEMOLITION AND EROSION CONTROL PLAN
C-02		DEMOLITION AND EROSION CONTROL NOTES AND DETAILS
C-03		PROPOSED SITE PLAN & GRADING PLAN
C-04		PAVEMENT RESTORATION PLAN
C-05		PAVEMENT MARKING AND SIGNAGE
C-06		MOT PLAN
C-07		MOT DETAILS
C-08		STANDARD DETAILS
C-09		STANDARD DETAILS
C-10		STANDARD DETAILS
C-11		STANDARD DETAILS
S-1		PIPE CULVERT STRUCTURAL DETAILS
S-2		PIPE CULVERT STRUCTURAL DETAILS

B. **Due to the possibility of typing errors or omissions, the above list shall not be considered as necessarily complete, nor shall the County/FDOT Standard Details which may be included elsewhere herein be considered as forming a complete listing of all County/FDOT Standard Details which may apply to this Project. Perform all work shown on all sheets of the Plans, as specified herein or necessary for a complete functional installation and no extra compensation will be made due to the omission or incorrect listing of a Drawing in this Section. All County/FDOT Standard Details are incorporated in these Contract Documents by reference and all work shall be performed in accordance with all applicable County/FDOT Standard Details.**

01016 SAFETY REQUIREMENTS, HURRICANES PREPAREDNESS AND PROTECTION OF PROPERTY

PART 1 – GENERAL

1.0.1. CONTRACTOR'S RESPONSIBILTY FOR SAFETY

A. Conduct whatever work is necessary for safety and be solely and completely responsible for conditions of the job site, including safety of all persons (including employees) and property during the contract period. This requirement shall apply continuously and not be limited to normal working hours.

B. The Contractor shall be in compliance with all applicable provisions of the Occupational Safety and health Act of 1970. The Contractor's Manual of Safety Practices, dealing with the firm's policies on field safety procedures for employees shall be submitted to the Engineer for his review before "Notice to proceeded" will be issued.

C. Neither the professional activities of the design professional, nor the presence of the design Professional nor his or her employees and subconsultants at a construction site, shall relieve the Contractor and any other entity of their obligations, duties and responsibilities including but not limited to, construction means, methods, sequence techniques or procedures necessary for performing, superintending, or coordinating all portions of the work of construction in accordance with the project documents and any health and safety precautions required by any regulatory agencies.

1.0.2. FEDERAL STATE AND LOCAL SAFETY REQUIEREMENTS

A. Safety provisions shall conform to the federal and state Departments of labor Occupational Safety and Health Act (OSHA), and all other applicable federal, State, County, and local laws, ordinances, codes, the requirements set forth herein, and any regulations that may be specified in other parts of these project Documents. Where any of these are in conflict, the more stringent requirements shall be followed. Contractor's failure to thoroughly familiarize with the safety provisions shall not relieve him/her from compliance with the obligations and penalties set forth therein.

B. All excavations made in the earth shall be performed in compliance with the State of Florida Trench Safety Act, OSHA 29 CFR 1926 Subpart P (Chapter 90-96, Laws of Florida). The Contractor shall appoint a ***competent person***, in accordance with subpart P, who shall be present at the jobsite. A "competent person" shall mean one who is capable of identifying existing and predictable hazards in the surroundings, or working conditions which are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt corrective measures to eliminate them.

C. The Contractor shall be familiar with the "Underground facility Damage" Prevention and safety Act" Florida Statute 556. The Contractor shall contact the Sunshine State One Call of Florida, at 01-800-432-4770 or by submitting an internet ticket entry via www.sunshine811.com) at least 48 hours prior the excavation. Failure to familiarize himself with the safety provisions shall not relieve him/her from compliance with the obligations and penalties set forth therein.

D. Conduct operations in such a manner utilizing warning devices, such as traffic cones, barricades and warning lights that traffic, pedestrian and City personnel are given adequate warning of hazards of the worksite as may be deemed necessary by the City, Engineer of Record, and governing agency having jurisdiction over the work or political subdivision.

E. The Contractor shall be in compliance with all applicable provisions of the OSHA Code of Federal Regulations (CFR), including, but not limited to, the following:

1. 29 CFR Part 1910 Subpart D - Walking-Working Surfaces
2. 29 CFR Part 1910 Subpart G - Occupational Health and Environmental Control
3. 29 CFR Part 1910 Subpart H - Hazardous Materials
4. 29 CFR Part 1910 Subpart I - Personal Protective Equipment
5. 29 CFR Part 1910 Subpart J - General Environmental Controls
6. 29 CFR Part 1910 Subpart N - Materials Handling and Storage
7. 29 CFR Part 1910 Subpart P - Hand and Portable Powered Tools and Other Hand-Held Equipment
8. 29 CFR Part 1910 Subpart Q - Welding, Cutting and Brazing
9. 29 CFR Part 1910 Subpart S – Electrical
10. 29 CFR Part 1910 Subpart T - Commercial Diving Operations
11. 29 CFR Part 1910 Subpart Z - Toxic and Hazardous Substances
12. 29 CFR Part 1926 Subpart E - Personal Protective and Life Saving Equipment
13. 29 CFR Part 1926 Subpart H - Materials Handling, Storage, Use, and Disposal
14. 29 CFR Part 1926 Subpart I - Tools - Hand and Power
15. 29 CFR Part 1926 Subpart J - Welding and Cutting

16. 29 CFR Part 1926 Subpart K – Electrical

17. 29 CFR Part 1926 Subpart L – Scaffolds

18. 29 CFR Part 1926 Subpart M - Fall Protection

19. 29 CFR Part 1926 Subpart P – Excavations

20. 29 CFR Part 1926 Subpart Q - Concrete and Masonry Construction

21. 29 CFR Part 1926 Subpart S - Underground Construction, Caissons, Cofferdams, and Compressed Air

22. 29 CFR Part 1926 Subpart Z - Toxic and Hazardous Substances

23. 29 CFR Part 1926 Subpart AA - Confined Spaces in Construction

24. 29 CFR Part 1926 Subpart CC - Cranes and Derricks in Construction

F. In addition, the Contractor shall adhere to any other applicable Federal, State and Local Safety and Health Regulations involving General industry and/or Construction Standards not mentioned in the Specifications.

G. For trench excavations in excess of five (5) feet in depth, the Contractor shall comply with the provisions of Florida Statutes Chapter 553, Part III, "Trench Safety Act," the "Trench Safety Act" section of the Quotation, and Section 6.01 "Excavation."

H. The Contractor shall comply with the provisions of Florida Statutes Chapter 556, "Underground Facility Damage Prevention and Safety Act." The Contractor shall contact Sunshine 811 by calling 811 or 1-800-432-4770, or by submitting an internet ticket entry via www.sunshine811.com, at least forty-eight (48) hours prior to any excavation. Failure to familiarize himself with the aforementioned safety provisions shall not relieve him from compliance with the obligations and the penalties set forth herein.

I. All open excavations made in the earth shall be performed in compliance with OSHA 29 CFR Part 1926 Subpart P - Excavations, and Florida Statutes Chapter 553, Part III, "Trench Safety Act." The Contractor shall appoint a "competent person," in accordance with Subpart P, who shall be present at the job site. A "competent person" shall mean one who is capable of identifying existing and predictable hazards in the surroundings, or working conditions which are unsanitary, hazardous, or dangerous to

employees, and who has authorization to take prompt corrective measures to eliminate them.

1.0.3. SAFE ACCESS BY FEDERAL, STATE, AND LOCAL GOVERNMENT OFFICIALS

A. The Contractor shall at all time provide proper facilities for safe access to the work by authorized government officials.

1.0.4. CONSTRUCTION SAFETY PROGRAM

A. Develop and maintain for the duration of the project, a safety program that will effectively incorporate and implement all required safety provisions. The Contractor's Manual of Safety practices outlining the firms policies on field safety procedures for employees shall be submitted to the Engineer for review before "Notice to Proceeded" will be issued. The Contractor shall appoint an employee who is qualified and authorized to supervise and enforce compliance with the safety program.

B. Certain products specified in these specifications contain warnings by the manufacturers that under certain conditions, if instructions for use are not followed, a hazardous condition may exist. It is the Contractor's responsibility to instruct his workmen in the safe use of the product, or any product substitution.

C. The duty of the Engineer to conduct construction review of the Contractor's performance is not intended to include a review or approval of the adequacy of the Contractor's Safety Supervisor, the safety program, or any safety measures taken in, on, or near the construction site.

1.0.5. SAFETY EQUIPMENT

A. As part of the safety program, maintain at an office or other well-known place at the jobsite, safety equipment applicable to the work as prescribed by the governing safety authorities, all articles necessary for giving first-aid to the injured, and stablish the procedure for the immediate relocation to a hospital or a doctor's care of any person who may be injured on the jobsite.

B. Perform all necessary work to protect all personnel and the general public from hazard, including, but not limited to, surface irregularities or unramped grade changes, and trenches or excavations. Furnish barricades, lanterns, and proper signs to safeguard all persons and work.

C. There shall be no oil dripping from equipment or oil spills.

D. The material shall be stored and handled in a proper and safe manner and upon its use, immediately dispose of the containers, cans, rags, and remnants of the material in a manner approved by the City of Environmental Resources Management at the Contractor's sole cost. The Contractor is not allowed to store empty containers at the site. In case of any violation, the Engineer will report such violation to DERM, and the Contractor shall be subject to all penalties and fines as required by State and County regulations.

E. The performance of all work and all completed construction, particularly with respect to ladders, platforms, structure openings, scaffolding, shoring, logging, machinery guards and the like, shall be in accordance with the applicable governing safety authorities.

F. During construction, construct and at all times maintain satisfactory and substantial temporary chain link fencing, solid fencing, railings, barricades or steel plates, as applicable, at all openings, obstructions, or other hazards. All such barriers shall have adequate warning lights as necessary, or required, for safety.

1.0.6. STORAGE OF HAZARDOUS MATERIALS

A. The material shall be stored and handled in a proper and safe manner and upon its use, immediately dispose of the containers, cans, rags and remnants of the material in a manner approved by the Department of Environmental Resources Management (DERM) at the Contractor's sole cost. The Contractor is not allowed to store empty containers at the site. In case of any violation, the Engineer will report such violation to DERM and the Contractor shall be subject to all penalties and fines as required by State and County regulations.

B. The Contractor is hereby cautioned that he cannot store any environmentally hazardous materials such as solvents, greases, lubricants or any other type of chemical substances at the Pump Station site. The Contractor shall be allowed to keep only such materials at the site for immediate use.

1.0.7. ACCIDENT REPORTS

A. If death, serious injuries, or series damage are caused, report the accident immediately by telephone or messenger to the Engineer. In addition, the Contractor must promptly report in writing to the Engineer and the City all accidents whatsoever arising out of, or in connection with, the performance of the work whether on, or adjacent to, the site, giving full details and statements of witnesses.

B. If a claim is made by anyone against the Contractor or any Subcontractor on account of any accident, promptly report the facts in writing to the Engineer and the City, giving full details of the claim.

1.0.8. FIRE PREVENTION AND PROTECTION

A. Perform all work in fire-safe manner. Furnish and maintain on the site adequate firefighting equipment capable of extinguishing incipient fires. Comply with applicable federal, local, and state fire-prevention regulations. Where these regulations do not apply, applicable parts of the National Fire Prevention Standard for Safeguarding Building Construction Operations (NFPA No. 241) shall be followed.

1.0.9. HURRICANE PREPAREDNESS

A. During such periods of time as are designated by the United States Weather Bureau as being a hurricane alert, the Contractor shall perform all precautions as necessary to safeguard the work and property, including the removal of all small equipment and materials from the site, lashing all other equipment and materials to each other and to rigid construction, and any other safety measures as may be directed by the Engineer.

B. During the hurricane season, which runs from June 1st to November 30th, it may become necessary to suspend work due to an impending storm until the proper working conditions prevail. In the event of a tropical storm or hurricane, it is the Contractor's responsibility to secure the jobsite in anticipation of the storm.

C. Fifteen (15) days prior to beginning of construction, the Contractor shall submit to the City or designee a Hurricane Preparedness Plan. The plan shall outline the necessary measures that the Contractor proposes to perform in the event of a tropical storm or hurricane in order to protect all work, materials, and equipment from exposure and properly safeguard all components of the project.

D. Prior to the Start of Work: The Contractor shall submit for approval, a plan of action for the specific actions to be taken on this specific project during a hurricane warning. The Contractor shall ensure operation of the by-pass system, if applicable, during the storm event. Backup power shall be included in case of power failure from FPL, as needed.

E. Upon notification of Hurricane Watch:

1. Formal notification to all Contractors to prepare and submit for approval a Plan of Action for the specific actions to be taken on their particular projects.

F. Upon notification of a Hurricane Warning:

1. Formal notification to the Contractors to implement their approved plan of action to protect the project and the public.

2. For pipeline construction projects within the public right-of-ways, the Contractor will be notified by the Construction Manager Office to suspend his construction operations. The Contractor will backfill all open trenches, remove all construction equipment and materials from the right-of-way, remove unnecessary traffic barricades and signs, secure remaining barricades by "half burial" or "double sandbags".

G. Post Disaster Work: In the event of a disaster declaration by the local or state governing authorities, the City may choose to obtain the services of the Contractor to perform work made an imminent priority for the disaster event. The compensation for the additional work caused by the disaster shall be negotiated between the Engineer and the Contractor with written approval provided by both parties prior to mobilization at the designed location or locations. The value of the work performed shall be up to the original contract with contingencies and dedicated allowances.

1.0.10. JOINT SURVEY TO ESTABLISH AUTHENCITY OF POSSIBLE DAMAGE CLAIMS

A. The Contractor shall maintain vertical and horizontal survey control points on all structures and improvements, located in the vicinity of the work prior to beginning work, and shall periodically check the points for movements with copies provided to the Engineer, of the survey notes for each survey and a copy of the layout of the survey control points.

B. After the contract is awarded and before commencement of work, the Contractor shall perform a thorough examination of existing buildings, structures and other improvements in the vicinity of the work, as applicable, which might be damaged by his operations.

1. Examinations of existing structures, buildings, and other improvements in the vicinity of the work shall be done by the Contractor. The scope of the examination shall include cracks in the structures, settlement, leakage, and similar conditions. The City assumes no responsibility for pre-existing conditions of the structure.

2. Records in triplicate of all observations shall be prepared by the Contractor, photographs shall be taken by the Contractor signed and dated, with descriptive information and in the manner specified above. One signed copy of every

document and photograph will kept on file in the office of the Engineer. Video recording also required.

3. The above records are intended to be used as indisputable evidence in ascertaining the extent of any damage which may occur as a result of the Contractor's operations and are for the protection of the Contractor and the City, and will be a means of determining whether and to what extent damage, resulting from the Contractor's operations, occurred during the Contract work.

C. In order to protect himself from being held liable for any existing damaged pavement, including detour routes, the Contractor is advised to notify in writing the authority having jurisdiction over the street where such detective pavement exist prior to proceeding with any work in the vicinity. Preconstruction videos and digital pictures shall be taken with date stamps of the entire area of work. A copy of all such notices shall be forwarded to the City.

1.0.11. TRAFFIC – GENERAL

A. Traffic safety and traffic control devices shall be employed on all private and public construction work withing the public right-of-way. Such measures shall be established and provided in conformance with the following regulations and in conformance with the Miami-Dade County Public Works Manual.

B. For construction within the City's public right-of-way, the Contractor shall submit two sets of construction plans for review to the City of Opa-Locka Public Works Department.

C. All traffic control and warning devices so specified shall, unless otherwise specified by the City be furnished, installed according to the Miami-Dade County Public Works Manual, Part I, Standard Details traffic control and safety by an Uniformed Police Officer, when specified, shall by furnished by the Contractor.

D. The Contractor shall take necessary precautions to ensure complete protection to public health, welfare, and safety. Adequate protection and warning devices shall be placed at locations surrounding work areas to prevent injuries to public properties. Particular emphasis must be placed on safety devices for vehicular traffic. Any work areas that may create a hazard at night shall be well lighted form sunset to sunrise with lamps or lanterns visible from all approaches. All maintenance of traffic signals must be approved by the City.

1.0.12. TRAFFIC SAFETY AND ACCESS TO PROPERTY

A. Comply with all rules and regulations of the City, state, and County authorities regarding closing or restricting the use of public streets or highways. No public or

private roads shall be closed, except by express permission of the City and the controlling authority. Conduct the work to assure the least possible obstruction to traffic and normal commercial pursuits. Protect all obstructions within traveled roadways by installing approved barricades, signs, and lights where necessary for the safety of the public. The convenience of the general public and residents and the protection of persons and property are of prime importance and shall be provided for in an adequate and satisfactory manner.

B. Where traffic will pass over backfilled trenches before they are paved, the top of the trench shall be maintained with temporary asphalt that will allow normal vehicular traffic to pass over. Temporary access driveways must be provided where required. Access to businesses, schools, and homes along the route of the work shall always be provided by the Contractor.

C. Supply flagmen and guards or Police when they are required by regulation, when deemed necessary for safety, or required by the Engineer. Flagmen and Guards shall be furnished with approved orange wearing apparel and other regulation traffic control devices.

D. The Contractor shall be responsible for the maintenance of public streets, detour of traffic (including furnishing and maintaining regulatory and informative signs along the detour route) traffic control and other provisions, throughout the project as required by the City.

E. Traffic shall be maintained according to corresponding typical traffic control details. No streets shall be completely blocked nor blocked more than one-half at any time, keeping the other half open for traffic without specific approval.

1.0.13. TRAFFIC CONTROL AND USE OF PUBLIC STREETS

A. The Contractor shall be responsible for traffic control as specified hereinafter. Any reference to the City, its departments, or its published regulations, permits and data, shall be synonymous and interchangeable with other recognized governing bodies over particular areas of streets or their departments, published regulations, permits, or data. Abide by all applicable laws, regulations and codes thereof, pertaining to maintenance of public streets, detour of traffic, traffic control and other provisions as may be required for this project.

B. The Contractor shall be fully responsible for the maintenance of public streets, detour of traffic (including furnishing and maintaining regulatory and informative signs along the detour route), traffic control and other provisions, throughout the project as required by the City of Opa-Locka Public Works Department. Traffic shall be maintained according to corresponding typical traffic control details as outlined in the

Miami Dade County Public Works Manual. No street shall be completely blocked nor blocked more than one-half at any time, keeping the other half open for traffic without specific approval.

C. If required by the Traffic Division, employ the required number of uniformed off-duty policemen to maintain and regulate the flow of traffic through the construction area. The number of men required and the number of hours on duty necessary for the maintenance and regulation of the traffic flow shall be subject to their approval. If required for traffic control permits or agencies, the Contractor shall work odd or night hours, as required for traffic control reasons, and the cost of such work shall be considered as incidental to construction.

D. The Contractor shall provide all barricades and/or flashing warning lights necessary to warn motorist of the construction throughout the project.

E. Excavated or other material stored adjacent to or partially upon a roadway pavement shall be adequately marked for traffic safety at all times. Provide necessary access to all adjacent property during construction.

F. The contractor shall be responsible for the provision, installation and maintenance of all traffic control and safety devices, in accordance with specifications outlined in the Miami Dade County Public Works Manual. In addition, provide for the resetting of all traffic control and information signing removed during the construction period.

G. Where excavations are to be made in the vicinity of signalized intersections, attention is directed to the fact that vehicle loop detectors may have been embedded in the pavement. Verify these locations by inspecting the site of the work and by contacting the Sunshine 811, at 1-800-432-4770, (or by submitting an internet ticket entry via www.sunshine811.com). Any loop detector which is damaged, whether shown on the plans or not, shall be repaired or replaced to the satisfaction of the Traffic Division.

H. Notify the Traffic Division 24 hours in advance of the construction date, and 48 hours in advance of construction within any signalized intersection.

I. Temporary pavement will be required over all cuts in pavement areas, and also where traffic is to be routed over swale or median areas. When the temporary pavement for routing traffic is no longer necessary, it shall be removed, and the swale or median area restored to their previous condition.

1.0.14. WORKING IN CONFINED SPACES

A. Where a Contractor needs to work in a confined space, the Contractor must comply with the General Industry, OSHA Confined Space Standard, 29 CFR 1910.146 or the equivalent Confined Space Standard in CFR 1926, Safety and Health Regulations for Construction Standards.

PART 2 PRODUCTS NOT

END OF SECTION

01018 ENVIRONMENTAL CONTAMINATION

PART 1 – GENERAL

1.0.1. ENVIRONMENTAL CONSIDERATINOS

A. For any work conducted in a contaminated area within the project boundaries where hazardous materials or hydrocarbons have been encountered, were previously known to exist, or is suspected by the Contractor or the City Inspector, the Contractor must comply with all applicable requirements of OSHA, EPA, FDEP and Miami-Dade County Regulatory and Environmental Resources Department.

1.0.2. SPECIALIZED CONSTRUCTION AREA

A. Specialized construction areas are defined as areas where contaminants are discovered and require construction by personnel qualified by training and equipped with personal protective equipment for such work.

B. Work in specialized construction areas shall be carried out by personnel qualified by training and equipped for such activities. These personnel shall be either subcontractors with licensing and certification as specialists in this type of construction

or the Contractor's own personnel who have taken and been certified as having passed the required training course(s). Licensing and certifications shall be submitted to the City for verification and shall in all cases be satisfactory to both the City and other authorities with jurisdiction. The Field Health and Safety Technician furnished by the Certified Industrial Hygienist or Environmental Engineer shall be present on the site during all construction in specialized construction areas unless the nature of the work is non-hazardous such that either the Site Specific Health and Safety Plan or the Certified Industrial Hygienist or Environmental Engineer authorizes his absence.

C. Disposal of any contaminated soils and/or groundwater must comply with all applicable federal, state and local requirements.

PART 2 – PRODUCTS

2.0.1. The Engineer of Record shall consult with the City regarding its requirement for material type (including pipe, fitting, gasket, valve interior coating, and the like) to be installed in contaminated areas. **PART 3 – EXECUTION** 3.0.1. INSTALLATION REQUIREMENTS

A. The requirements of this Section shall be closely adhered to in all cases where proposed mains are to be installed in an area of hydrocarbon contamination. These requirements and those imposed by Miami-Dade County Regulatory and Environmental Resources Department or any other agency having jurisdiction an addition to, and take precedence over the City's standard specifications and standard details for ductile iron mains.

B. Contaminated backfill cannot be placed back into an existing trench. Contaminated fill shall be replaced with clean fill, hauled offsite and legally disposed of at a location which can handle the material.

C. The City may require gasketed joints be protected by encasing the entire joint with a hydrocarbon impermeable material. In this case, all joint gaskets shall be protected including those on pipe, fittings, valves, fire hydrants and specialty items.

END OF SECTION

01025 MEASUREMENT AND PAYMENT

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Payment for the various items in the Schedule of Payment items, as further specified herein, shall include all compensation to be received by the Contractor for furnishing all tools, equipment, supplies, and manufactured articles, and for all labor, operations, taxes, materials, commissions, transportation and handling, bonds, permit fees, insurance, overhead and profit, and incidentals appurtenant to the items of work being described, as necessary to complete the various items of the work, all in accordance with the requirements of the Contract Documents, including all appurtenances thereto, and including all costs of compliance with the regulations of public agencies having jurisdiction, including Safety and Health Requirements of the Occupational Safety and Health Administration of the U.S. Department of Labor (OSHA). Such compensation shall also include payment for any loss or damages arising directly or indirectly from the work.

B. The Contractor's attention is called to the fact that the quotations for the various items of work are intended to establish a total price for completing the work in its entirety. Should the Contractor feel that the cost for any item of work has not been established by the Schedule of Payment items or this Section, it shall include the cost for that

work in some other applicable bid item, so that its proposal for the project does reflect its total price for completing the work in its entirety.

1.0.2. SUBMITTALS

A. Informational:

1. Schedule of Values: Submit schedule on City's form.

2. Application for Payment.

3. Final Application for Payment.

B. Submittals shall be in accordance with Section 01300 “Submittals” and the City’s standards.

1.0.3. SCHEDULE OF VALUES

A. Prepare a schedule of values for the work.

B. Unit Price Work: Reflect unit price quantity and price breakdown from conformed Bid Form.

C. Lump Sum Work:

1. Reflect schedule of values format included in conformed Bid Form.

2. List Bonds and insurance premiums, mobilization, demobilization, facility startup, and contract closeout separately.

D. An unbalanced or front-end loaded schedule will not be acceptable.

E. Summation of the complete schedule of values representing all the work shall equal the Contract Price.

F. The Contractor shall submit a Schedule of Values for review with the return of the executed Agreement to the Owner. The schedule shall contain the installed value of the component parts of work for the purpose of making progress payments during the construction period.

G. The schedule shall be given in sufficient detail for proper identification of work accomplished. The Schedule of Values shall directly correlate to each activity outlined in the construction progress schedule and the construction network analysis (specified in the section entitled “Submittals”) to accurately relate construction progress to the requested payment. Each item shall include its proportional share of all costs including the Contractor's overhead, contingencies and profit. The sum of all scheduled items shall equal the total value of the Contract.

H. If the Contractor anticipates the need for payment for materials stored on the project site or off-site in bonded warehouse, it shall also submit a separate list covering the cost of materials, delivered and unloaded with taxes paid. This list shall also include the installed value of the item with coded reference to the work items in the Schedule of Values. Payment for stored materials shall comply with requirements of General Conditions.

1.0.4. APPLICATION FOR PAYMENT

A. Transmittal Summary Form: Attach one Summary Form with each detailed Application for Payment and include Request for Payment of Materials and Equipment on Hand as applicable. Execute certification by authorized officer of Contractor.

B. Use detailed Application for Payment Form provided by the City.

C. Include accepted schedule of values for each portion of work and the unit price breakdown for the work to be paid on unit price basis, and a listing of Owner-selected equipment, if applicable, and allowances, as appropriate.

D. Preparation:
   1. Round values to nearest dollar.

   2. List each Change Order and Written Amendment executed prior to date of submission as separate line item. Totals to equal those shown on the Transmittal Summary Form.

   3. Submit Application for Payment, including a Transmittal Summary Form and detailed Application for Payment Form, a listing of materials on hand as applicable, and such supporting data as may be requested by Owner.

1.0.5. MEASUREMENT—GENERAL

A. Weighing, measuring, and metering devices used to measure quantity of materials for work shall be suitable for purpose intended and conform to tolerances and specifications as specified in National Institute of Standards and Technology, Handbook 44.

B. Whenever pay quantities of material are determined by weight, material shall be weighed on scales furnished by Contractor and certified accurate by state agency responsible. Weight or load slip shall be obtained from weigher and delivered to the City or City's representative at point of delivery of material.

C. If material is shipped by rail, car weights will be accepted provided that actual weight of material only will be paid for and not minimum car weight used for assessing freight tariff, and provided further that car weights will not be acceptable for material to be passed through mixing plants.

D. Vehicles used to haul material being paid for by weight shall be weighed empty daily and at such additional times as required by the City. Each vehicle shall bear a plainly legible identification mark.

E. Materials that are specified for measurement by the cubic yard measured in the vehicle shall be hauled in vehicles of such type and size that actual contents may be readily and accurately determined. Unless all vehicles are of uniform capacity, each vehicle must bear a plainly legible identification mark indicating its water level capacity. Vehicles shall be loaded to at least their water level capacity. Loads hauled in vehicles not meeting above requirements or loads of a quantity less than the capacity of the vehicle, measured after being leveled off as above provided, will be subject to rejection, and no compensation will be allowed for such material.

F. Where measurement of quantities depends on elevation of existing ground, elevations obtained during construction will be compared with those shown on drawings. Variations of 1 foot or less will be ignored, and profiles shown on drawings will be used for determining quantities.

G. Units of measure shown on Bid Form shall be as follows, unless specified otherwise. All methods of measurement shall be approved by the City.

Item	**Method of Measurement**
AC	Acre – Field Measure
CY	Cubic Yard – Field Measure within limits specified or shown, or measured in vehicle by volume, as specified
EA	Each – Field Count
GAL	Gallon – Field Measure
HR	Hour

LB	Pound(s) – Weight Measure by Scale
LF	Linear Foot – Field Measure
LS	Lump Sum – Unit is one; no measurement will be made
SF	Square Foot
SY	Square Yard
TON	Ton – Weight Measure by Scale (2,000)

1.0.6. MEASUREMENT AND PAYMENT

A. General:

1. Payment for all the work completed under this Project shall be made in accordance with the provisions of the "Special Conditions" on the basis of the specific provisions of this section of the Specifications.

2. The Contractor will be paid each month the value of the work completed during the preceding month (less retainage) and the invoiced cost including applicable sales taxes and shipping value (less retainage) of materials not already used, but which have been furnished by the Contractor under the Specifications, provided that such materials have been delivered, properly stored and inspected by the Engineer and that payment therefore has been satisfactorily certified by the Contractor to the Engineer. Remaining cost for materials (less retainage) will be paid at the same time as installation. Any payment for materials which are not used will be withheld from the final payment.

3. The Contractor shall receive and accept the compensation as provided in the Quotation, the ITB and "Invoices and Payments" of the "Special Conditions" as full payment for furnishing all labor, materials, tools and equipment, for performing all operations necessary to complete the work under this Contract, and also in full payment for all loss or damages arising from the nature of the Work, or from the action of the elements or from unforeseen difficulties which may be encountered during the prosecution of the work until the final acceptance by the City.

4. The cost breakdown (or Schedule of Values) referred to herein is defined in "Schedule of Values" of the "Special Conditions." The cost breakdown (Schedule of Values) approved by the Engineer will be used as the basis for making progress payments and for determining the cost of extra work which is the same or similar (as determined by the Engineer) to that defined in the "Schedule of Values."

5. The prices stated in the Quotation includes full compensation for overhead and profit, all costs and expenses for taxes, labor, equipment, furnishing and repairing small tools and ordinary equipment, mobilization, home office expenses and

general supervision, materials, commissions, transportation charges and expenses, patent fees and royalties, bond, insurance, labor for handling materials during inspection, together with any and all other costs and expenses for performing and completing the work as shown on the Plans and specified herein. In addition, the Contractor shall include the actual cost of social security taxes, unemployment insurance, worker's compensation, fringe benefits, inclusive of life and health insurance, union dues, pension, pension plans, vacations, and insurance and contractor's public liability and property damage insurance involved in the work based on the actual wages paid to such labor and all other general costs and profits, prorated to each item.

6. Unless otherwise specifically stated elsewhere herein, the Contractor shall include in the prices bid all materials, electrical supply, fuel, lubricants, temporary equipment, temporary wiring, temporary piping and fittings, pumps, gages, and all other items of whatever nature required to completely test, balance, disinfect if required, and put into fully operational condition all equipment and/or systems supplied by either the City or the Contractor and installed as a part of this Project. Further, any test materials supplied by the Contractor shall be completely satisfactory to the City. Any decision as to whether a particular material is suitable for test purposes shall be at the sole discretion of the Engineer whose decision shall be final. Any material considered not suitable shall be immediately replaced by the Contractor with suitable material and no extra compensation will be allowed."

7. It is the intent of the City to obtain a complete and working installation under this Contract, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

8. For purposes of determining the monthly payments to be made to the Contractor for work accomplished, the value of the work completed shall be determined in the following manner:

    a. Demolition, installation of pipe culvert shall constitute seventy-five percent **(75%)** of the price bid for these Quotation Items.

    b. Submittal of the PSM's daily progress reports and/or field book notes and monthly as-builts of the work that has been performed to date (all documents subject to approval and acceptance by the City) shall constitute ten percent **(10%)** of the price bid for these Quotation Items.

    c. Completion of all sitework restoration, shall constitute five percent **(5%)** of the price bid for these Quotation Items.

d. Submittal of the final as-builts to the satisfaction of the Engineer, completion of all surface repairs, restoration of public or private facilities, appurtenances, and all other work not provided for under other Quotation Items shall constitute the remaining ten percent **(10%)** of the price bid for these Quotation Items.

B. Price Bid:

1. The price bid for each item shall be stated in both words and figures in the appropriate places in the Quotation form. All blank spaces for bid prices must be filled in with ink, or with a typewriter. The Bidder is further directed that any and all alterations, changes, corrections and modifications, made to the Quotation forms prior to submission of bids, must be initialed by the Bidder. Non-compliance by the Bidder of this directive may be grounds for rejection of his bid.

2. In the event that there is a discrepancy between the price written in words and the price written in numbers, the price written in words shall govern except where the number of units multiplied by the unit price shown in numbers equals the total price for that bid item. In such case the unit price shown in numbers shall govern over the unit price shown in words.

3. Where an error is made in the calculation of the total bid price of an item, the unit price shall govern.

4. If the bidder makes an error in his addition of the total bid prices of the applicable items in the Quotation, the correct sum of its applicable bid item totals shall be the Total Bid.

5. It has been determined that the City is not exempt from the payment of Florida State Sales Tax under this Contract. All items of materials, equipment and supplies furnished by the Contractor and remaining a part of the completed Project are subject to this Tax. The Bidder shall include a sufficient amount of money to pay for this Tax in his bid price. Sufficient money to pay the Tax for all miscellaneous materials and minor items shown on the Plans, specified herein, or necessary for the work, and which will remain a part of the completed Project, shall also be included in the price or prices bid, and no other compensation will be provided.

C. Quotation Items:

It is intended that all work required to complete this Project will be included in the various bid items as follows:

Item No. 1

For performing preparatory work and operations in mobilizing for beginning the work of the Project, including preparation and acceptance of Maintenance of Traffic Plan (MOT), but excluding materials and permit costs, both of which are paid under other payment items, shall include, but not be limited to; preparation, submission and acceptance of the MOT, first by the City and if acceptable to the City, submission to and acceptance by all other governing authorities; supply, submission and correction of all "Pre-Approved Product Lists" and/or shop drawings; ordering the said equipment and materials in a timely fashion; those operations necessary for the movement of personnel, equipment, supplies and incidentals to the Project site and for the establishment of temporary offices, buildings, safety equipment and first aid supplies, sanitary and other facilities; the cost of reestablishing the design baseline, vertical control points and reference points, and establishing proposed pipeline location; the cost of MOT and permit preparation/submission/acceptance; the costs of bonds, required insurance and other preconstruction expense but excluding the actual cost of permits, which are paid under a separate dedicated allowance account and excluding the cost of materials which are paid under another bid item(s).

Not inclusive of the costs incurred in the provision of traffic control and the costs incurred in the provision of off-duty police officers that are to be paid for under separate Bid Items.

The mobilization item will be paid in the following manner:

Contracts with a contract duration of up to and including one hundred twenty (120) calendar days will be paid in two (2) separate payments, each equal to fifty (50) percent of the amount bid for this item.

Contracts with a contract duration of over one hundred twenty (120) calendar days will be paid in four (4) separate payments, each equal to twenty-five (25) percent of the amount bid for this item.

The two or four payments will be made with the first two or four payment draws and is conditioned upon progress satisfactory to the Engineer being made pursuant to the accepted Project.

The total amount of the partial payments may not exceed ten (10) percent of the original Subtotal of the bid items. Any remaining amount will be paid upon completion of all work on the Contract. Retainage, as specified in the "General Covenants and Conditions" and any Special Provisions will apply to these payments.

Since this item is bid as an aggregate sum, payment will be in accordance with the cost breakdown as approved by the Engineer and measured as required by and satisfactory to the Engineer.

Item No. 2

For furnishing and delivering to the City Ultraflo SRASP Barrell Pipe for culverts, or approved equal, of the nominal sizes specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer, which payment shall be full compensation for furnishing Ultraflo SRASP Barrell Pipe, and joint materials; corporation stops pipe bedding; backfill materials; temporary pavement materials; transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Item No. 3

For installing Ultraflo SRASP Barrell Pipe for culverts, or approved equal, of the nominal sizes specified in these bid items will be paid for at the unit price bid times the number of linear feet installed and accepted by the Engineer. The price per foot for installing the pipe shall be full compensation for the completed pipeline, ready for service, and shall include, but not be limited to; exploratory excavation; excavation; sheeting and shoring if necessary; complying with the Florida Statutes "Trench Safety Act"; transporting and unloading the pipe and all other materials not specified in other bid items from delivery trucks at the job site (excavation side) and placing them into position in the trench; installing Ultraflo SRASP Barrell Pipe, installing joint materials; installing joint; removal and disposal of excess or unsuitable fill material, where required; maintaining access to residences and businesses along the route of the main; protecting existing utilities along the route of the culvert; making temporary paving repairs; complying with work hour restrictions; satisfying all requirements of the Project permits; preparation and submittal of PSM's daily progress reports and/or field notes and monthly as-builts of the work that has been performed to date; moving and replacing utilities, fences, trees, landscaping, shrubs, mail boxes, sprinkler systems, shoulders, asphalt paths, curb & gutter, asphalt and plain concrete driveways, traffic separators and all other similar items, to original locations and to equal or better than original conditions; and all other appurtenant and miscellaneous items and work (not included in another bid item) including final cleanup for a complete, satisfactory and functional installation.

Items No. 4

For furnishing and delivering General Guardrail per FDOT index No. 536 with mechanical appurtenances required as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer, which payment shall be full compensation for furnishing General Guardrail per FDOT index No. 536; transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Items No. 5

For installing General Guardrail per FDOT index No. 536 with mechanical appurtenances required as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer, which payment shall be full compensation for furnishing General Guardrail per FDOT index No. 400; transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Items No. 6

For demolishing and removal of the existing Culvert with headwalls as indicated in the plans, will be paid for from the aggregate sum amount established by the Contractor for this purpose. Such amount represents the amount the Contractor feels is necessary to completely demolish the existing concrete stair and chain-link fence and dispose of the debris generated. Asphalt restoration is included in a separate item.

Since this item is bid as an aggregate sum, no other special provisions for measurement will be necessary.

Item No. 7

For excavating of existing backfill material at existing Culvert location, will be paid for at the unit price bid times the number of cubic yards removed to the satisfaction of the Engineer, and includes removal of unsuitable material, loading, hauling, legal disposal off-site and tipping fees.

Item No. 8

For providing bypass pumping, as needed, to ensure Canal flow is uninterrupted throughout construction, will be paid for from the aggregate sum amount established by the Contractor for this purpose. Such amount represents the

amount the Contractor feels is necessary to completely ensure Canal flow is uninterrupted throughout construction.

Since this item is bid as an aggregate sum, no other special provisions for measurement will be necessary.

Item No. 9

For furnishing and delivering all necessary Turbidity Barriers for erosion control measures specified on plans, as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer for this purpose, which payment shall be full compensation for furnishing and installing all necessary Turbidity Barriers for erosion control measures specified on plans, transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Item No. 10

For furnishing and delivering all necessary Drop Inlet Sediment Protections for erosion control measures specified on plans, as specified in these bid items will be paid at the unit price bid times the number of linear feet accepted by the Engineer for this purpose, which payment shall be full compensation for furnishing and installing all necessary Drop Inlet Sediment Protections for erosion control measures specified on plans, transportation and handling costs delivered ditchside; all shop drawing preparation and correction cost for material furnished under this item; all material and equipment required to clean the item; and all other appurtenant and miscellaneous items (not included in another bid item) required for a complete and satisfactory installation.

Item No. 11

For selling and delivering concrete for the installation of 8-inch thick Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, will be paid for at the unit price bid times the number of cubic yards of concrete placed. The price shall be full compensation for furnishing concrete for the installation of 8-inch thick Concrete Pavement (min. 3,000 psi at 28-day), transportation and handling costs delivered ditchside. This bid item shall be used only at locations approved by the Engineer or indicated in the Plans where the minimum cover over the main cannot be obtained.

Item No. 12

For constructing 8-inch Concrete Pavement (min. 3,000 psi at 28-day) per FDOT index No. 350, will be paid for at the unit price bid times the number of cubic yards

of concrete placed. The price shall be full compensation for all work including furnishing all labor, equipment, and materials required for constructing the 8-inch Concrete Pavement. This bid item shall be used only at locations approved by the Engineer or indicated in the Plans where the minimum cover over the main cannot be obtained.

Item No. 13

For constructing concrete 4-inch-thick sidewalk and ramp curbing to match existing per FDOT index No. 310, will be paid for at the unit price bid times the number of square feet of such sidewalk required, installed and accepted by the Engineer, and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete installation.

Item No. 14

For constructing concrete curb and gutter restoration to match existing as per FDOT index No. 300, will be paid for at the unit price bid times the number of square feet of such curb and gutter required and placed as measured along the curb, installed where directed by the Engineer, and the price bid shall be full compensation for furnishing all labor and equipment for a complete installation.

Item No. 15 - Contingent Item

For furnishing and installing additional suitable backfill material, will be paid for at the unit price bid times the number of cubic yards of additional trench backfill furnished and installed as directed by the Engineer in the field and includes removal of unsuitable material, loading, hauling, legal disposal off-site and tipping fees. The additional trench backfill shall be measured along the main within the limits of the trench as defined by the County's Standard Details appended hereto. The use of additional trench backfill shall be paid for only when and where approved by the Engineer prior to installation.

Item No. 16

For furnishing and installing rubble (Broken Stone), including necessary geotextile filter fabric, at Culvert embankment for the rip-rap installation as per FDOT Standard Specifications Manual Section No. 530, will be paid for at the unit price bid times the number of tons of such rip-rap required as directed by the Engineer in the field and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete installation.

Item No. 17

For furnishing and installing sand-cement bags at Culvert embankment for the riprap installation as per FDOT index No. 530, will be paid for at the unit price bid times the number of Cubic Yards of such rip-rap required as directed by the

Engineer in the field and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete installation.

Item No. 18

For furnishing and constructing concrete endwalls at Culvert pipe barrels per FDOT index No. 430-032, will be paid for at the unit price bid times the number of cubic yards of concrete placed. The price shall be full compensation for all work including furnishing all labor, equipment, and materials required for constructing the concrete enwall at Culvert pipe.

Item No. 19

For furnishing and constructing concrete shoulder barrier as per FDOT index No. 521-001, will be paid for at the unit price bid times the number of linear feet of shoulder barrier installed, as indicated in plans. The price shall be full compensation for all work including furnishing all labor, equipment, and materials required for constructing the concrete shoulder barrier.

Item No. 20

For cold milling roadway surface course for permanent pavement repairs (nominal 1 inch thick), will be paid for at the unit price bid times the number of square yards of such surface course milled and required as measured along the curb within the limits defined by details on the Plans and/or the City's Public Works Manual appended hereto and as approved by the Engineer. Greater widths are at the Contractor's option and expense. The price bid shall be full compensation for furnishing all materials, labor and equipment required for milling of surfaces indicated. Asphalt cold milling shall be performed using an automated pavement planer capable of maintaining an accurate depth. Cold milling equipment shall meet the approval of the Engineer and the governing agency having jurisdiction at the location of the pavement milling operation. The Engineer's word as to the acceptability of the equipment shall be final.

Item No. 21

For constructing **Type "V"** permanent pavement repairs for roadway (nominal 1 inch thick machine-laid asphaltic concrete friction surface overlay) will be paid for at the unit price bid times the number of square yards of overlay, installed where directed by and to the satisfaction of the Engineer, which price shall be full compensation for furnishing all labor, material, and equipment for a complete installation; and shall include asphalt pavement driveways in roadways, as required and directed by the Engineer. After the pavement has been milled and the existing pavement removed, a tack coat shall be applied as specified above. The latest applicable standard for the friction course from the governing authority shall be used. Temporary pavement markings for roadways shall be included in this bid item.

Item No. 22

For replacing pavement markings damaged, removed or obliterated by Contractor's operation, will be paid for from the unit price bid times the number of pavement markings for this purpose. Such amounts represent the amount the contractor feels is necessary to comply with the governing agency's requirements. Any portion of this fund, remaining after the work has been paid for will remain with the Contractor. Conversely, no requests for additional reimbursement will be approved. Reflective Pavement Markers shall also be furnished and installed under this item and there will be no additional compensation paid for this work.

Since this item is bid as an aggregate sum, no other special provisions for measurement will be necessary.

Item No. 23 - Contingent Item

For restoring sodded areas, will be paid at the unit price bid times the number of square yards of sod placed, and the price bid shall be full compensation for furnishing all labor, materials and equipment for a complete restoration.

Item No. 24

For furnishing traffic control, will be paid for from the aggregate sum amount established by the Contractor for this purpose. Such amount represents the amount the Contractor feels is necessary to provide sufficient flagmen, signs, barricades, and similar items and work for directing traffic and maintaining safety during all times of work and other times as directed by the Engineer, FDOT, the municipalities' Public Works Department and any other governing authority. Any portion of this fund remaining after all authorized payments have been made will remain with the Contractor. Conversely, no requests for additional payments will be approved.

Payment to the Contractor under this item will be by monthly percentage corresponding to the percentage of the Project's work items completed and paid for each month, as approved by the Engineer.

Item No. 25 - Contingent Item

For sheeting and shoring ordered left in place by the Engineer, will be paid for at the unit price bid per square foot, measured from tip to cut-off times the horizontal length, regardless of thickness, times the number of linear feet of sheeting and shoring left in place as accepted by the Engineer. Payment shall be full compensation for cutting off and for all salvage and potential reuse value of the material. Sheeting and shoring left in place without the Engineer's approval will be at the Contractor's expense.

Item No. 26- Contingent Item

For removal, transport, and legal disposal of unsuitable backfill materials, including tipping fees, will be paid for at the unit price bid times the number of cubic yards removed and legally disposed of, as measured by the truckload to the satisfaction of the Engineer.

Item No. 27 – SUBTOTAL

Sum of Item Nos. 1 through 27.

Item No. 28 - Dedicated Allowance

This item establishes a fund for reimbursement of the cost of providing off-duty police officers as required for this project. Payment shall only reimburse the Contractor for the cost of the off-duty police officers for hours on duty at the work site; no overhead, travel time or other additional costs will be allowed. Any portion of this fund remaining after all authorized payments have been made will be withheld from contract payment and will remain with the City.

Item No. 29 - Dedicated Allowance

This item establishes a fund for reimbursement of the cost of all required construction permits and fees, if authorized by the Engineer. Payment shall reimburse the Contractor for only the cost of the construction permit and fee. Any question or whether a construction permit or fee is required shall be decided by the Engineer whose word shall be final. Any portion of this fund remaining after all authorized payments have been made will be withheld from Project payments and will remain with the City.

Item No. 30 - Contingency Allowance

For unforeseen conditions, minor construction changes and Quantity Adjustments, additional work not covered by other items, if ordered by the Engineer.

This account is for all labor, materials, equipment and services necessary for modification or extra work required to complete the Project due to unforeseen conditions, unforeseen conflicts between existing elements of work and the proposed work; for minor changes required to resolve any unforeseen conditions, Revised Regulations, Technological and Products Development, Operational Changes, Schedule Requirements, Program Interface, Emergencies and other Miscellaneous Costs; and for adjustments to estimated quantities shown on the unit prices of the Quotation to conform to actual quantities installed; and associated time related to this work only if ordered by the Engineer.

Payment to the Contractor under the Contingency Allowance will only be made for work ordered in writing by the Engineer, in accordance with Section 13 "Extra Work and Payment Therefore" of the "General Covenants and Conditions." Any portion

of these accounts remaining after all authorized payments have been made will be withheld from Contract payments and will remain with the City.

A non-compensable time extension shall be included in the Contingency Allowance work when approved by the Engineer.

Item No. 31 - TOTAL BID

Sum of Item Nos. 27, 28, 29 and 30.

Note:

Since Item Nos. 15, 23, 25 and 26 are Contingent Items, and because of the nature of the Dedicated Allowance, Item Nos. 28 and 29, and the Contingency Allowance, Item No. 30, they may or may not be used at the option of the City. Any overrun or under run provisions contained within the Project Documents shall not be applicable to these items.

1.0.7. NONPAYMENT FOR REJECTED OR UNUSED PRODUCTS

A. Payment will not be made for following:

1. Loading, hauling, and disposing of rejected material.

2. Quantities of material wasted or disposed of in manner not called for under Contract Documents.

3. Rejected loads of material, including material rejected after it has been placed by reason of failure of Contractor to conform to provisions of Contract Documents.

4. Material not unloaded from transporting vehicle.

5. Defective work not accepted by Owner. Material remaining on hand after completion of work.

1.0.8. PARTIAL PAYMENT FOR STORED MATERIALS AND EQUIPMENT

A. Partial Payment: No partial payments will be made for materials and equipment delivered or stored unless shop drawings or preliminary operation and maintenance manuals are acceptable to the Engineer.

B. Final Payment: Will be made only for products incorporated in work; remaining products, for which partial payments have been made, shall revert to Contractor

unless otherwise agreed, and partial payments made for those items will be deducted from final payment.

1.0.9. ALLOWANCES

A. The allowances shall be used only at the discretion of and as ordered by the Owner for such items as unforeseen conditions, unforeseeable conflicts between existing elements of work and the proposed work, unit price items exceed estimated quantities, and any associated work requested by the Owner including all labor, materials, and services for modifications or extra work to complete the project that was anticipated, but not specifically included in this Contract.

B. Any portion of these allowances that remain after all authorized payments have been made will be withheld from contract payments and will remain with the Owner.

01031 GRADES, LINES AND LEVELS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The work of this Section comprises the establishing of grades, lines and levels.

1.0.2. RELATED WORK

A. Section 01720 “Project Record Documents”

PART 2 – PRODUCTS

2.0.1. MATERIALS

A. Furnish all stakes, templates and other materials necessary for establishing and maintaining of the lines and grades necessary for control and construction of the work and all incidental labor necessary for the prosecution of the work. **PART 3 – EXECUTION**

3.0.1. LAYOUT OF THE WORK

A. GENERAL

1. The Engineer of Record, through retaining the services of a Professional Land Surveyor and Mapper, who is licensed in the State of Florida, shall furnish the Contractor with horizontal and vertical controls which shall be utilized as specified elsewhere herein to layout the work. The Professional Land Surveyor and Mapper, who is licensed in the State of Florida hired by the Contractor, shall verify all controls provided by the Engineer of Record and it shall be the responsibility of the Contractor to preserve same.

2. The Contractor shall retain the services of a Professional Land Surveyor and Mapper, who is licensed in the State of Florida who, shall furnish and set stakes, establishing line and grade and shall solely be responsible for the layout of the work as well as the recording of all as-built dimensions and elevations. The Contractor shall furnish all additional stakes, templates, and other materials for marking and maintaining survey points and lines given, and shall be responsible for their preservation. Should any of the horizontal and vertical control points set by the Engineer of Record be destroyed or disturbed, they shall be reset by the Contractor's Florida Registered Land Surveyor and Mapper, at the Contractor's expense. All control points previously set by the Engineer of Record shall be verified by the Contractor's surveyor.

B. LAYOUT

As provided in Subsection 3.01-A, above, the Contractor through the services of his Florida Registered Land Surveyor and Mapper, shall establish the line and bench mark and other reference points for the pipeline or structure, as follows:

1. Structures: Will consist of baselines, stakes at building corners, centers and centerlines, auxiliary lines and two bench marks from which to establish the

elevations. The Engineer of Record shall set a minimum of three horizontal and vertical control points which shall thereafter be maintained by the Contractor, without further help from the Engineer of Record, for use in establishing and checking the lines and grades as shown on the contract drawings.

2. Pipelines: Will consist of baselines, construction lines, centerlines, auxiliary lines and bench marks from which to establish the elevations. The Engineer of Record shall set horizontal and vertical control points at the beginning and end of the work and at a minimum distance of 1,400 ft. in between. When the total distance is less than 1,400 ft. control points shall be set at the beginning and end of the work.

3. The Contractor shall use this information to construct the structures and pipelines to the lines and grades shown on the project drawings and shall supply all equipment and personnel necessary to accomplish this end.

4. For pipelines, this will consist of establishing all points of bend (but not necessarily bevel pipe unless in close proximity to other facilities), valves, tees, crosses and other stations not more than 100 feet apart along the proposed centerline of the pipe, or along a stationed offset line as shown on the plans, marked by a nail in a metal cap if in pavement, with the station painted nearby or by a nail in the top of a wooden stake driven flush with the ground with the station marked on the flag stake nearby, if not in pavement.

5. The Contractor shall supply the City Inspector with a copy of the Florida Registered Land Surveyor and Mapper's layout of the work immediately upon its availability to his own forces.

6. The Contractor shall make his equipment and men available to the Inspector for spot checking the accuracy of the pipe laying. The Inspector shall require the Contractor to correct pipe alignment when necessary.

C. RECORD DRAWINGS:

1. During the entire construction operation, the Contractor shall retain the services of a State of Florida Registered Land Surveyor and Mapper who shall maintain records of the installation, including all deviations from the plans and specifications by obtaining "as-built" dimensions and elevations.

2. The Surveyor shall prepare Record As-Built Drawings showing correctly and accurately all changes and deviations made during construction, including approved construction variances, to reflect the work as it was actually constructed.

3. Refer to Sections 01720 and 01725 for City's criteria for developing project record documents and record As-Built drawings.

D. HORIZONTAL AND VERTICAL CONTROL FOR DESIGN

The following shall apply when establishing horizontal and vertical controls for design. They shall also be used for the development of construction drawings.

1. Survey stationing shall proceed from south to north and/or from west to east.

2. Baseline or centerline shall be tied to section corners, or to monument lines or to right of-way lines.

3. Points along the survey line shall be referenced to perpetuate the alignment. Whenever possible, the reference points shall be established at right angles to the survey line and at intervals no longer than 1,400 feet. Reference points shall be shown on construction plans.

4. Centerline of side streets shall be established and set by nail and disc. Station and angle turned shall be given and shown on the plans.

5. All curve data (horizontal) shall be shown on plans. Point of curvature and point of tangency shall be set in the field, reference P.C. and P.T. or P.I.

6. Easement lines shall be tied to baseline or centerline. Give station and angle turned.

7. Set centerline or baseline stations every 100 feet on the ground using iron rods in unpaved areas or P.K. nails on asphalt.

8. All vertical control and elevations shall be referenced to North American Vertical Datum of 1988 (NAVD 1988).

9. Temporary bench marks (T.B.M.) and bench marks shall be established throughout the project at approximately 1,000 feet intervals. Show information on plans.

10. Centerline shall be tied to baseline if different from each other.

11. Tie proposed pipe to centerline or baseline, not to right-of-way line. Right-of-way line shall be tied to centerline or baseline.

12. All survey information shall be shown on the plans.

13. All point of intersections and deflection angles shall also be shown. Angle can be submitted by bearings.

END OF SECTION

01070 ABBREVIATIONS

PART 1 - GENERAL

1.0.1. SCOPE OF WORK

A. Comply wherever in these specifications' references are made to the standards, specifications, or other published data of the various national, regional, or local organizations, such organizations may be referred to by their acronym or abbreviation only. As a guide to the user of these specifications, the following acronyms or abbreviations which may appear in these specifications shall have the meanings indicated herein.

B. It is the intent of the City to obtain a complete functional, and satisfactory installation under this Contract, and any items of labor, equipment or materials which may reasonably be assumed as necessary to accomplish this end shall be supplied whether or not they are specifically shown on the Plans or stated herein.

1.0.2. ABBREVIATIONS AND ACRONYMS

A. The Contractor is also alerted that various "Standards" are used herein for reference and criteria, and that he should obtain copies for his general use and protection. Abbreviated titles are used throughout these Specifications and although most of them are widely known, their complete titles are given below in order to avoid any misunderstanding.

AASHTO	American Association of State Highway and Transportation Officials
ACI	American Concrete Institute
AISI	American Iron and Steel Institute
ANSI	American National Standards Institute, Inc.
ASME	American Society of Mechanical Engineers
ASTM	American Society for Testing and Materials
AWWA	American Water Works Association

FAC	Florida Administrative Code
FBC	Florida Building Code
FDOH	Florida Department of Health in Miami-Dade County
FDOT	State of Florida Department of Transportation
MDDTPW	Miami-Dade Department of Transportation and Public Works
NSF	NSF International
OSHA	Occupational Safety and Health Administration

B. The above list shall not be considered complete, as there are other "Standards" used; however, in most cases complete titles have been given.

C. Wherever "Standards" are indicated herein for reference, the referenced portion shall have the same force and effect as if it were included, herein, in its entirety, latest revision if the date of publication is not shown.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

END OF SECTION

01090 REFERENCE STANDARDS

PART 1 – GENERAL

1.0.1. REFERENCE STANDARDS

A. Comply with the requirements of standard with date as specified herein. Standards without dates shall be understood as the Standard current at the time of bid. In case of conflict between the referenced standards, the one having the more stringent requirements shall govern.

B. In case of conflict between the referenced standards and the Project Documents, the Project Documents shall govern.

C. When no reference is made to a code, standard, or specification, the standard specifications of the ASTM, the ANSI, the ASME, the IEEE, or the NEMA shall govern.

1.0.2. QUALITY ASSURANCE

A. Application: When a standard is specified by reference, comply with requirements and recommendations stated in that standard, except when requirements are modified by the Contract Documents or applicable codes establish stricter standards.

1.0.3 ABREVIATIONS

A. Abbreviated titles for other governing standards are used throughout these specifications and although most of them are widely known, their complete titles are given below to avoid misunderstanding.

1. AA: Aluminum Association.

2. AAMA: Architectural Aluminum Manufacturer's Association.

3. AASHTO: American Association of the State Highway and Transportation Officials.

4. ACI: American Concrete Institute.

5. ACPA: American Concrete Pipe Association
6. AI: Asphalt Institute
7. AIA: American Institute of Architects AISC American Institute of Steel Construction
8. AISI: American Iron and Steel Institute
9. AITC: American Institute of Timber Construction
10. ANSI: American National Standards Institute, Inc.
11. API: American Petroleum Institute
12. ASCE: American Society of Civil Engineers
13. ASME: American Society of Mechanical Engineers
14. ASMM: Architectural Sheet Metal Manual
15. ASSE: American Society of Sanitary Engineers
16. ASTM: American Society for Testing and Materials
17. AWS: American Welding Society
18. AWWA: American Water Works Association
19. BHMA: Builders Hardware Manufacturer's Association
20. CIPRA: Cast Iron Pipe Research Association
21. CLFMI: Chain Link Fence Manufacturers Institute
22. CMA: Concrete Masonry Association
23. DIPRA: Ductile Iron Pipe Research Association
24. ETL: Environmental Test Laboratories

25. FDEP: Florida Department of Environmental Protection

26. FDOT: Florida Department of Transportation

27. IEEE: Institute of Electrical and Electronics Engineers

28. NBS: National Bureau of Standards

29. NEC: National Electrical Code

30. NEMA: National Electrical Manufacturer's Association

31. NFPA: National Fire Protection Association

32. OSHA: Occupational Safety and Health Administration

33. SSPC: Steel Structures Painting Council

34. SSPWC: Standard Specifications for Public Works Construction

35. SFWMD: South Florida Water Management District

36. UL Underwriters Laboratories, Inc.

END OF SECTION

01100 SPECIAL PROJECT REQUIREMENTS

PART 1 – GENERAL

1.0.1. RESPONSIBILITY OF THE CONTRACTOR

A. The Contractor shall have at all times as his agent on the site of the work a competent superintendent capable of reading and thoroughly understanding the plans and specifications.

B. The Contractor shall be responsible for the good condition of the work or materials until formal release from his obligations under the guidelines of this project. The Contractor shall store materials and shall be responsible for and shall maintain partly or wholly finished work during the continuance of the Contract. The Contractor shall place sufficient lights and danger signals on or near the work from sunset to sunrise; shall erect suitable railings or other protective devices about unfinished work, open trenches, embankments, or other obstructions; shall provide all necessary watchmen on the work by day or by night for the safety of the public and shall take all necessary precautions for preventing accidents or injuries to persons or property in or about the work.

C. The Contractor shall be responsible for the coordination, location, and relocation of utilities, including but not limited to utility light poles, cables, fiber optic lines, water

mains and services, sewer mains and services, electrical, telephone and television cables, signals and signal poles, fences, guard rails, piping, culverts, conduits and drains that interfere with the positioning of the work as set out on the drawings. The cost of all such coordination and relocations shall be included in the bid for the project and shall not result in any additional cost to the City.

D. Prior to proceeding with trench excavation, the Contractor shall contact all utility companies and all other users of the right-of-way in the area to aid in locating their underground services. It shall be the Contractor's responsibility to contact utility companies at least three NORMAL WORKING DAYs before starting construction. The Contractor shall proceed with caution in the excavation and preparation of the trench so that the exact location of underground utilities may be determined.

E. Wherever piping systems or utilities such as water, wastewater, air, chemical, electrical or other service lines must be crossed, deflection of the pipe within recommended limits and cover shall be used to satisfactorily clear the obstruction unless otherwise indicated on the drawings. Approximate locations of known installations in the vicinity of new work must be verified in the field by the Contractor, who shall uncover them carefully, prior to commencement of the work.

F. The Contractor shall be familiar with all codes and regulations of the Federal Government, the State of Florida, Miami Dade County, the City of Opa-Locka and any municipal corporations applicable to every aspect of the project. The Contractor shall provide all materials and shall perform all work necessary to fully comply with all provisions and requirements of applicable codes and regulations whether specifically indicated in the plans and specifications or not. It is the intent of the City to obtain a finished project in full compliance with all requirements of any agencies having jurisdiction over any portion of the work involved in the project. The Inspector will not recommend acceptance of the work until all requirements and provisions of pertinent codes and regulations have been satisfactorily fulfilled.

G. Changing the grade of the proposed main by rising deflections, or the alignment by horizontal deflections, will not be considered as extra work, or extra cost, to the Contractor, and in some cases a credit to the City may be warranted.

H. Any Conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the Engineer.

1.0.2. LAND FOR CONSTRUCTION PURPOSES

A. The Contractor shall limit operations, temporary facilities and storage of equipment and materials to on-site areas to be designed by the Engineer.

B. Should the Contractor require additional space he/she shall make his own arrangements for storage of materials and equipment in locations off the construction site. For the allocated space, submit to the Engineer for approval, proposed plan and layout for all temporary facilities, offices, storage facilities, temporary water service and distribution, and temporary power service and distribution. Prior to commencing any new construction remove, relocate and protect where necessary all existing underground and above ground facilities, pipelines, utility systems, plantings and all other existing installations. All of these existing features shall be restored to their initial or better than initial conditions.

1.0.3. PRE – CONSTRUCTION CONFERENCE

A. After the Award of Contract and prior to the issuance of the "Notice to Proceed," a preconstruction conference will be held with the Contractor, the City, various utility companies and others who are interested in the Project for the purpose of coordinating the work. The time and place of meeting will be set by the Engineer.

B. In some cases the preconstruction conference may be held after the start work date stated in the written "Notice to Proceed." This may be due to difficulty with coordination of all parties concerned, or other similar reasons.

C. Such delays in holding the preconstruction meeting will not relieve the Contractor of any responsibilities hereunder, and will not be an acceptable reason for him to request additional work completion time beyond that provided since he can be obtaining permits, mobilizing his equipment and forces, ordering materials, performing minor work, or other work if approved by the Engineer, during the interim period.

D. Prior to the preconstruction conference, the Contractor shall prepare the construction schedule as described in Section 01120 - Sequence of Construction and General Information and Section 01200 - Project Meetings, "Project Scheduling" and provide copies of the same to others in attendance.

E. The construction schedule shall include the place of beginning, the proposed order of progression, together with the estimated times for beginning and completing the various items of work. In addition, the Contractor shall prepare on electronic media, a critical path method (CPM) with emphasis made to "construction time and completion."

F. The Engineer will discuss requirements of such matters as project supervision and inspections, progress schedules and reports, Contract Change Orders, insurance, safety, and other items pertinent to the Project.

G. All parties to this conference should be prepared to discuss any problems anticipated with the execution of the work under this Contract.

1.0.4 SAFETY REQUIREMENTS

A. The Contractor shall comply with the Department of Labor Safety & Health Regulations for construction promulgated under the Occupational Safety & Health Act of 1970, (PL 91-596).

B. Comply with all applicable provisions of the Occupational Safety and Health Act (OSHA). The Contractor's Manual of Safety Practices, dealing with the firm's policies on field safety procedures for employees shall be submitted to the Engineer for review before Notice to proceed will be issued.

C. Conduct operations in such a manner, utilizing warning devices, such as traffic cones, barricades and warning lights, that traffic and pedestrians are given adequate warning of hazard of the work site as may be deemed necessary by the City and/or the Engineer.

D. Certain products specified in these specifications contain warnings by the manufacturer that under certain conditions, if instructions for use of the product are no followed, a hazardous condition may develop. It is the Contractor's responsibility to instruct its workmen in the safe use of the product, or any product substitution.

E. For trench excavations in excess of five feet in depth, the Contractor shall comply with the provisions of the State of Florida "Trench Safety Act".

F. The contactor shall be familiar with the "Underground Facility Damage Prevention and safety Act", Florida Statute 556. The Contractor shall contact the Sunshine State One Call Center of Florida.

G. Do not store any environmentally hazardous materials such as solvent, greases, lubricants or any other type of chemical substances at the work sit. The Contractor is permitted to keep such materials at the site as are for immediate use only. Do not store any empty container at the site.

1.0.5 PIPE AND EXISTING UTILITIES

A. The underground utilities, structures and other facilities shown on the plans are located according to the best information available but may vary by several feet from both the position and elevation shown. The Contractor shall explore far enough in advance of his main trench to determine the exact location and condition of such utilities, structures or facilities so that, before the pipe is installed, the Engineer may change the line or grade of the pipe, should that become necessary to avoid a conflict.

B. In all cases where the main is deflected either horizontally or vertically, and the Engineer requires additional work and items such as paving and similar items for which a pay item was established in the quotation, then such additional work and items will be paid for at the prices bid. Wider trench widths may be paid with the approval of the Engineer.

C. The Contractor shall determine the locations of recent additions to the systems not shown on the plans. Extreme caution shall be exercised to eliminate any possibility of any damage to utilities resulting from his activities. The location of all overhead utilities shall be verified, and the Engineer notified of any conflict which might occur. The Contractor shall be responsible for determining which poles will need shoring during excavation and shall provide such shoring and support as is required.

1.0.6 MATERIALS AND EQUIPMENT FURNISHED BY THE CITY

A. No material or equipment will be furnished by the City under this Contract. All material, labor and equipment necessary for completion of the work shall be furnished and installed by the Contractor, whether or not shown on the Plans or specifically mentioned in the Specifications.

1.0.7 WATER USED IN CONSTRUCTION

A. The City will furnish water at a charge for all construction activities unless otherwise specifically made an exception in the project specifications or specifically made an exception by the Engineer in writing.

B. Consumption for the following activities shall be determined by City personnel who shall be provided with a minimum of seventy-two (72) hour advance notification. Failure of the Contractor to provide advance notification and/or have City personnel on site to witness and verify consumption for the following activities could result in his being fined and/or a citation being issued against him in accordance with the Rules and Regulations of the City's Tampering Section.

1. Pigging:

2. Flushing, only if and when approved by the Engineer:

3. Chlorination, if applicable:

4. To fill mains being pressure tested, excluding make-up water during test: and

5. When and where directed or approved by the Engineer.

Water for construction activities listed above will be furnished from adjacent Cityowned water mains or the most convenient water source. In instances where no City-owned source of water is available, the Contractor shall make his own arrangements with the municipality or other controlling authority and include the cost of all water required during construction in his overall construction cost. No reimbursement will be made.

C. Water used in construction for purposes other than those listed above, including makeup water pumped into the pipe during hydrostatic testing, will be furnished by the City at a charge. This water will be supplied from the most convenient source through the existing piping. However, all water used must be metered through a City meter. The Contractor will be billed by the City based on water usage recorded by the floating meter.

D. When the project is occurring in the City of Opa-Locka, the Contractor shall present to the City, the Fire Department Permit during application with the New Business Office.

E. All piping, fittings, valves and equipment, including pumps and power, required for handling the water shall be furnished by the Contractor. Care shall be exercised in the use of the water and provision shall be made to protect the water supply for contamination and indiscriminate use by unauthorized persons. The Contractor shall use only potable water unless otherwise specifically called out elsewhere herein and then only in the case of sewage force mains, reclaimed water mains or raw water mains.

F. Under no circumstance shall the Contractor utilize a water source, including existing piping, until such source or piping has been approved for use by the City.

1.0.8 MATERIALS AND EQUIPMENT FURNISHED BY THE CONTRACTOR

The general requirements specified herein shall apply to all items of materials and equipment in addition to the Specifications for individual items appearing in the following sections:

A. All materials and equipment furnished by the Contractor for use in the work shall be new and of recent domestic manufacture, and shall be the products of reliable manufacturers who, unless otherwise specified, have been regularly engaged in the manufacture of such material and equipment for at least five (5) years. All components shall, wherever possible, be standard stock articles of well-known domestic manufacturers. Where the plans and specifications designate the product of a particular manufacturer, the product specified has been found suitable for the intended use, but, unless otherwise provided, articles or products of similar characteristics may be offered for the approval of the Engineer. A minimum of six copies (more if so

required herein) of complete descriptive data shall be furnished regarding all articles furnished by the Contractor. The descriptive data shall consist of dimension drawings, catalog references and other information necessary to clearly identify each article. When substitutions are permitted, the Contractor shall make all necessary changes in adjacent or connected structures and equipment at his expense and shall be solely responsible for all cost and time required by any difference in construction methods, fabrication or assembly required and no additional time will be allowed. Any repermitting together with all costs and work associated therewith shall be performed by the Contractor and no additional compensation will be allowed.

B. Where contemplated changes, substitutions or appurtenant work require engineering design, in the opinion of the Engineer, the Contractor shall have such design services performed at his expense. Said engineering design services shall be of an extent satisfactory to the Engineer whose word shall be final and shall be performed by a Registered Professional Engineer licensed to practice in the State of Florida.
C. All water system components shall be in full compliance with NSF/ANSI 61, "Drinking Water System Components - Health Effects," latest revision.

D. The Contractor shall also supply certification that all materials supplied that will come into contact with drinking water conform or will conform with NSF/ANSI 61.

E. The Contractor shall care for and protect against loss or damage all material and equipment to be incorporated in the construction, whether furnished by him/her or by the City, for the duration of the Contract, and shall repair or replace any lost or damaged items. The Contractor shall be relieved of such responsibility only upon final acceptance of all of the work by the Engineer.

F. No material shall be stored so that it is in direct contact with the ground. All metal shall be thoroughly cleaned before being placed in the work. Storage and protection measures shall be subject to approval of the Engineer whose decision shall be final. The Contractor shall immediately protect materials by different methods, materials or to a greater extent if so, directed by the Engineer in the field.

G. Unless otherwise specified or noted on the plans, all steel bolts, nuts, washers, eye bolts, tie rods and all other miscellaneous ferrous metal items shall be American made stainless steel.

H. The Contractor shall have available sufficient tools and equipment to properly perform his work in all areas of the system, including easements or other areas with limited or restricted access or clearances. The Contractor is specifically advised that work in easement may require specialized equipment to satisfactorily perform the work and the capability to accomplish these installations is a requirement of these specifications.

I. Any salvageable pipe, fitting, or other miscellaneous material or equipment, removed during construction and not reused in the work shall be cleaned, hauled to and stored by the Contractor at his expense, where directed by the Engineer, and shall remain the property of the City. All other material and equipment shall be disposed of by the Contractor at his own expense.

J. To ensure satisfactory and successful final painting of materials and equipment to be furnished, it is essential that the paints applied in the shop and in the field be mutually compatible. To this end, the Contractor shall require that the shop paints be applied to materials and equipment be compatible with the paints he proposes to use in the field or shall determine what shop paints have been used and select field paints compatible therewith, all as approved by the Engineer.

K. The Contractor shall furnish the City, with one set of any special tools required for servicing for each type of equipment actually furnished. These tools shall be delivered to the office of the City's Construction Manager, City of Opa-Locka Public Works. A letter of transmittal shall be provided, containing a list of all items being provided.

L. All other material required to complete this project shall be furnished and installed by the Contractor, whether or not shown on the plans or specifically mentioned in the specifications.

M. The Contractor shall procure extended manufacturer's warranties on equipment furnished by him. These warranties shall be kept in force and extended such that the City will be provided a manufacturer's warranty with at least one year to run beyond the date of final acceptance of the project. A copy of the warranty with these provisions clearly stated or with an attached letter of certification from the manufacturer to this effect shall be delivered with the equipment and no payment or partial payment for said equipment will be made until such warranty/certification is delivered to the Engineer.

1. The warranty shall specifically cover the case where the equipment warranted has been replaced by a newer model. In such instance the warranty shall either provide spare parts and service to repair or replace in its entirety the original model, or in lieu of this; provide a complete new model unit to replace the warranted and failing equipment. Should the failing equipment be replaced by a new model, the Contractor shall be responsible for making all necessary changes to adjacent and/or connected equipment at no extra cost to the City and to the satisfaction of the Engineer whose decision shall be final.

2. As a part of final inspection, the Contractor shall deliver to the City in a form satisfactory to the Engineer, either warranties or certifications of warranty

extensions showing the warranties to be in effect at least one year beyond the planned date of final acceptance.

3. All costs for procuring, maintaining and extending these warranties shall remain with the Contractor, even in cases where the contract construction time for completion has been extended. These costs shall be included in the Contractor's bid price and no further compensation will be allowed.

4. In instances, where the City puts an item of equipment into full productive service prior to final acceptance, the warranty shall still be extended to at least one year past final acceptance. However, the City will reimburse the Contractor for the prorated cost of the extended warranty from the time when the equipment was placed in full productive service to the date of final acceptance based upon the manufacturer's invoice to the Contractor for this cost. Only the warranty cost will be reimbursed, no overhead or other costs will be allowed.

N. Extended Warranties:

1. The Contractor shall procure extended manufacturer's warrantees on equipment furnished by him. These warrantees shall be kept in force and extended such that the City will be provided a manufacturer's warrantee with at least one (1) year to run beyond the date of final acceptance of the Project. A copy of the warrantee with these provisions clearly stated or with an attached letter of certification from the manufacturer to this effect shall be delivered with the equipment and no payment or partial payment for said equipment will be made until such warrantee/certification is delivered to the Engineer.

2. The warrantee shall specifically cover the case where the equipment warranted has been replaced by a newer model. In such instance the warrantee shall either provide spare parts and service to repair or replace in its entirety the original model, or in lieu of this; provide a complete new model unit to replace the warranted and failing equipment. Should the failing equipment be replaced by a new model, the Contractor shall be responsible for making all necessary changes to adjacent and/or connected equipment at no extra cost to the City and to the satisfaction of the Engineer whose decision shall be final.

3. As a part of final inspection, the Contractor shall deliver to the City in a form satisfactory to the Engineer, either warrantees or certifications of warrantee extensions showing the warrantees to be in effect at least one (1) year beyond the planned date of final acceptance.

4. All costs for procuring, maintaining and extending these warrantees shall remain with the Contractor, even in cases where the Contract construction time for completion has been extended. These costs shall be included in the Contractor's bid price and no further compensation will be allowed.

5. In instances where the City puts an item of equipment into full productive service prior to final acceptance, the warrantee shall still be extended to at least one (1) year past final acceptance. However, the City will reimburse the Contractor for the prorated cost of the extended warrantee from the time when the equipment was placed in full productive service to the date of final acceptance based upon the manufacturer's invoice to the Contractor for this cost. Only the warrantee cost will be reimbursed, no overhead or other costs will be allowed.

END OF SECTION

01120 SEQUENCE OF CONSTRUCTION

PART 1 – GENERAL 1.0.1

SCOPE OF WORK

A. The sequence of construction has been divided into phases and steps representing major work areas, all of this in order to facilitate to the Contractor the execution of the project and minimize conflicts with operations. The general sequence of construction shall be as described in this Section, but also the City reserves the right to make changes on it.

B. Coordinate sequence of construction with progress schedule to ensure timely performance of the work and project completion within the specified construction time.

C. Special Instructions: It is the intent of the City to construct this project with as little disturbance and annoyance to the pump station's neighbors as possible.

D. The Contractor's equipment must be in first class operating condition, including proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment. The Contractor shall provide a temporary electric service for his electric equipment as specified herein below, and shall pay all cost thereof, including all charges for electricity used during the entire course of the project until its acceptance by the City.

E. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City.

F. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

1.0.2 GENERAL

A. Following receipt of "Notice to Proceed" with the work, the Contractor shall notify the Engineer at least five (5) days before he is ready to start actual construction, to allow the City time to make arrangements for inspection of the work.

B. Contractor's PSM shall reestablish the design baseline, vertical control points and reference points, and establish proposed culvert location in accordance with Section 02314 “Excavation, Backfill and Fill for Structural Facility and Utility Systems”, Construction Methods.

C. The Contractor's equipment must be in first class operating condition, including safety features, proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment.

D. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City.

E. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

F. All items shall be performed by the Contractor with special emphasis on the fact that numerous standard and miscellaneous construction phases are not mentioned specifically but shall be performed by the Contractor as required for a completed Project.

G. Water in the trench shall be kept below the level of the pipe to prevent the entry of debris and contaminants into the pipe.

   1. In instances where Section 02220 – Excavation, General, "Alternate Method of Construction" is approved by the Engineer and used for the Project: During construction, the Contractor shall install a temporary plug, or other means approved by the Engineer, on the open end of the pipe in order to prevent debris and trench water backwash from entering the pipe during trench excavation ahead of the installed pipe. The plug shall remain in place until the following length of pipe is ready to be installed. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

H. No separate payment shall be made for the cost of labor and materials required for the removal of nightcaps, plugs, bulkheads or external blocking and bracing of adjacent mains, for the supplying of water for cleaning and testing, nor for the

interconnecting work to adjacent mains unless listed separately in the Quotation, and the cost of this work shall be included in other applicable items of work.

I. The Contractor is advised that, if the work of this project includes work in the public right of way, that work may be shut down by the roadway governing authority during the period from the beginning of the Thanksgiving holiday through the end of the New Year holiday or some portion(s) of that period. Unless otherwise specifically called out herein, or granted by the Engineer in writing, no extension of Project time will be allowed due to such a shutdown. If any extension of time is allowed, it will be of a noncompensable nature. All costs of such a shutdown including any demobilization/remobilization costs shall be the sole responsibility of the Contractor and no extra compensation will be allowed. Upon ending of any such shutdown, the Contractor shall immediately resume construction operations unless otherwise ordered by the Engineer in writing.

J. The Contractor shall fully comply with any special working hours, and with all other requirements of the Permits, at no additional cost to the City. Working hours noted in permits or the specifications are subject to change. In the event that changed working hours effects the work of the Contractor, the Contractor's sole remedy shall be a noncompensable time extension. Said extension to be full compensation for all direct and indirect costs, including but not limited to loss of efficiency, loss of opportunity, increased bond or insurance premiums, or home office or extended overhead, incurred by the Contractor as a result of such change, and no additional compensation shall be considered. Night work may be required as a part of the construction.

K. New or altered potable water mains, including services, that will be under City control and have an inside diameter of three inches or larger shall be disinfected and bacteriologically evaluated in accordance with FAC Rule 62-555.340. Note that the above requirements are minimum, and the City may require more stringent procedures and routinely requires all services of whatever size be tested and disinfected along with the main. These more stringent or extensive requirements shall be performed by the Contractor and no extra compensation will be allowed.

L. All pipe and fittings installed under this project shall be color coded or marked as required by FAC Rule 62-555.320(21)(b)3, using blue as a predominant color to differentiate drinking water from reclaimed or other water and green as the predominant color for sanitary sewage facilities. Underground metal or concrete pipe shall have colored stripes applied to the pipe wall. Pipe striped during manufacturing of the pipe shall have continuous stripes that run parallel to the axis of the pipe, that are located at no greater than 90-degree intervals around the pipe, and that will remain intact during and after installation of the pipe. If tape or paint is used to stripe pipe during installation of the pipe, the tape or paint shall be applied in a continuous line that runs parallel to the axis of the pipe and that is located along the top of the pipe;

for pipes with an internal diameter of 24 inches or greater, tape or paint shall be applied in continuous lines along each side of the pipe as well as along the top of the pipe. Striping shall be continuous and run the full length of the pipe. Aboveground pipe shall be painted shall be color coded or marked like underground pipe.

M. The Contractor shall take steps to provide accessibility for local traffic. The construction in this area shall proceed as quickly as possible and paving shall follow immediately to reduce inconvenience to residents in this area of the project.

N. The Contractor shall take pictures of the work site, in accordance with Section 01380 "Construction Photographs," prior to the start of any construction.

O. The Contractor is advised that, during the construction of the Project, the Construction Manager may require the Contractor to adjust the location of the proposed valves. This relocation(s) shall be performed at no additional cost to the City.

P. Locations of solid sleeves are for general information only. Exact location of solid sleeves shall be determined in the field by the Engineer. Prior to installation of solid sleeves, the pipe and fittings shall be hosed and kept clean, then swabbed with disinfectant as necessary for water main installation. Water in trench shall be kept below the pipe invert.

1.0.3 EXISTING WATER MAINS AND FORCE MAINS

A. The existing mains in the project area shall remain in service until the new mains are placed in service. Connections and disconnections together with cut, plug and abandonment work shall be coordinated through the City's Construction Manager. In all instances, the City's Construction Manager shall, beginning with the Preconstruction Meeting, coordinate with the Operations Division to pre-determine the notification lead times required for various operations.

1.0.4 SEQUENCE OF WORK

A. The general sequence of construction shall be as follows, but **a detailed sequence of construction shall be submitted by the Contractor and approved by the Engineer before any work is started**. The City reserves the right to make changes to the sequence as necessary to facilitate the work or to minimize conflict with operations and no extra compensation will be allowed.

B. CAPITALIZED ITEMS INDICATE WORK OR FUNCTIONS TO BE PERFORMED BY CITY FORCES. All other items shall be performed by the Contractor with special emphasis on the fact that numerous standard and miscellaneous construction phases

are not mentioned specifically but shall be performed by the Contractor as required for a complete Project.

Note: For simplicity, the Sequence of Construction below will not detail the following items. **These shall be the responsibility of the Contractor and no extra compensation will be allowed.**

1. Contractor's field verification of all information provided in the Plans and to determine the type, location, elevation, and extent of any utilities which may not have been shown on the Plans.

2. Notify "Sunshine State One-Call of Florida Inc., 811," forty-eight (48) hours prior to any excavation. Locate all utilities along the route of the Project.

3. Contractor's operations involving removal of the existing Culvert shall include:

   a. Excavate existing Culvert pipes and provide proper flow diversion between the Canal.

4. Installation of new Culvert system, including piping, mitered end section, backfilling, rip rap placement, and concrete pavement.

5. Construction of concrete curb and gutter, sidewalk, handicap access ramp, and guardrails.

6. Milling and resurfacing of pavement extents.

7. Contractor's PSM shall reestablish the design baseline, vertical control points and reference points, and establish proposed pipeline location in accordance with Section 02314 "Excavation, Backfill and Fill for Structural Facilities and Utility Systems - Construction Methods."

8. After items 6 and 7 are completed, the Contractor shall meet with the City Inspector at the Project site and perform a pre-construction walk-through along the entire route of the Project to identify possible problems or conflicts with the proposed pipeline location.

9. The general sequence of work shall be as follows:

1) Phase I – Mobilization

Step – 1 Initiate mobilization. The Contractor shall set up storage, staging and parking areas, temporary environmental controls and tree protection devices in the project site. Obtain permits, develop and submit construction schedule and start shop drawing submittal. Contractor shall allow access to the other facilities within the project area, including adjacent businesses and homes at all times during construction.

Step – 2 Call for locates (Sunshine 811) and document all location marks in the field.

Step – 3 Contractor shall include the necessary provisions to safeguard the existing utilities noted within the project area. Furthermore, the Contractor shall be advised that the utilities shown on plans are based on best available information and shall take all necessary precautions to confirm, identify, preserve, and maintain the integrity while performing construction.

Step – 4 Contractor shall **immediately** open a dialog with all existing utilities in the project area. Contractor shall notify Engineer of any utility relocation requirements and costs. Utility relocations shall be reimbursed under a dedicated allowance account. Failure to properly coordinate any required utility relocations may result in delays for which the Contractor may be liable for.

Step – 5 Verify locations, elevations, dimensions, manufacturer of pipes, equipment, etc., before ordering materials to complete the work in accordance with the Contract Documents, Shop Drawings and field conditions.

Step – 6 Upon approval of shop drawings, order long lead items so that materials may be delivered in a timely fashion without delays to construction.

2) Phase II – Demolition of Existing Culvert and Appurtenances NOTE: Refer to Drawings, Sheets C-01 and C-02

Step – 1 Installation of all Erosion Control measures within the Canal.

Step – 2 Removal of existing concrete pavement, concrete headwall, and culvert piping.

Step – 3 Prepare temporary bypass system, if necessary, to divert Canal flows from East to West and vice versa. After successful flow diversion and authorization by the City; the Contractor shall proceed with the installation of the removal of the existing Culvert piping.

3) Phase III – New Culvert Installation

Step – 1 Prepare bedding material to lay stone base for new piping.

NOTE: The Contractor shall provide appropriate shoring to conduct the stone bedding and 66-inch SRASP pipe installation in dry conditions.

Step – 2 Secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations.

Step – 3 The Contractor shall secure the three (3) pipes in place to conduct backfilling in lifts/compaction in accordance with the manufacturer's recommendations and up to elevation established on plans. Embankment slopes shall be established.

Step – 4 Install concrete headwall at pipe ends.

Step – 5 Install geotextile matting and, sand-cement and Rubble Stone embankment stabilization.

Step – 6 Lay new concrete curb and gutter and sidewalk.

Step – 7 Install new guardrail.

Step – 8 Install new concrete shoulder barrier

4) Phase IV – Final Sitework and Project Closeout

Step – 1 Form and pour the 8" thick concrete pavement surface above Culvert piping.

Step – 2 Lay new concrete curb and gutter and sidewalk.

Step – 3 Mill and resurface top 1" surface course of roadway.

Step – 4 Paint roadway pavement markings and remove temporary construction signage.

Step – 5 Demobilization and related closeout activities shall be in accordance with section 01700 "Project Closeout".

Step – 6 Complete all remaining miscellaneous and appurtenant work, including restoration of damaged survey control points, landscape restoration and final inspection and cleanup.

C. The Contractor's equipment must be in first class operating condition, including proper mufflers and other silencing accessories. All equipment must be properly lubricated on a special maintenance type schedule to reduce noise, including tracks, rollers, idlers, sheaves and other noise producing components. Care must be taken to prevent oil spillage of any kind or oil dripping from equipment. The Contractor shall provide a temporary electric service for his electric equipment as specified herein below, and shall pay all cost thereof, including all charges for electricity used during the entire course of the project until its acceptance by the City. If the equipment used proves less than satisfactory and is unduly or needlessly disturbing the neighbors, in the opinion of the Engineer, he will have the right to order the Contractor to immediately modify the equipment to make it satisfactory, or to change to other equipment that is satisfactory at no additional cost to the City. During construction the Contractor shall, by sprinkling with water or by other means approved by the Engineer, eliminate dust annoyance to adjacent property owners. No additional compensation will be paid to the Contractor for any costs incurred in complying with the provisions herein.

END OF SECTION

01200 PROJECT MEETINGS

PART 1 – GENERAL 1.0.1.

PROJECT SCHEDULES

A. General: Develop and submit for approval by the City a construction progress schedule and phasing plan demonstrating complete fulfillment of all Contract requirements including all activities of Subcontractors, equipment vendors and suppliers. Unless otherwise directed by the Engineer, the construction progress schedule shall be computer developed and maintained using Microsoft Project software as manufactured by Microsoft Corporation, Primavera, or equal. The Contractor shall prepare a network plan utilizing CPM (Critical Path Method). The City reserves the right to request progress schedule on magnetic media.

B. Submittal: The progress schedule shall be plotted on 11-inch by 17-inch paper and shall be reviewed and updated monthly, depicting progress through the last day of the current month and scheduled progress through completion. Six up to date copies of the schedule shall be submitted along with the application for monthly progress payments for the same period.

1. Immediately after award of contract, submit for review the progress schedule describing the activities to be accomplished and their dependency relationships, showing starting and completion dates for each activity in terms of the number of days after receipt of Notice to Proceed. All completion dates shown shall be within the period specified for contract completion.

2. After receipt and initial review, the Engineer will meet with the Contractor for joint review, correction or adjustment of the proposed plan and schedule. Within five (5) calendar days after the joint review, the Contractor shall revise the schedule in accordance with agreements reached during the joint review and shall submit two copies of the revised schedule. After the Contractor has received both the Notice to Proceed and the approved copy of the schedule, he shall immediately add calendar dates in lieu of the number of days from the date of Notice to Proceed and shall furnish two copies of the revised schedule to the Engineer.

C. Schedule Requirements:

1. Show the sequence and interdependence of activities required for complete performance. In preparing the schedule, break up the work into activities of a duration of no longer than fifteen working days each, except as to non-construction activities (such as procurement of materials, delivery of equipment and concrete curing) and any other activities for which the Engineer may approve the showing of longer duration. The schedule shall show the activities for actual construction work for each trade category of the project. The Contractor is to include a schedule of submittals of shop drawings, equipment schedules, coordination drawings, templates, fabrication, delivery and the like, and review and approval of shop drawings. Activities related to a specific physical area of the project shall be grouped on the schedule for ease of understanding and simplification. Activity

duration (i.e. the single best estimate, considering the scope of the activity, and the resources planned for the activity) shall be shown on each activity on the diagram. To the extent that the schedule or any revised schedule shows anything not jointly agreed upon or fails to show anything jointly agreed upon, it shall not be deemed to have been approved by the Engineer. Failure to include any element of work required for the performance of this Contract shall not excuse the Contractor from completing all work required within any applicable completion date, notwithstanding the City's approval of the schedule.

2. Include a cost estimate for each activity which cumulatively equals the total Contract cost. Estimated overhead and profit shall be prorated throughout all activities. The partial payments as defined under the General Conditions will be based on these approved activity costs.

3. With each request for a partial payment, submit a copy of the approved schedule marked to show the activities completed and partially completed, for which payment is requested.

4. The Contractor is advised that, if the work of this project includes work in the public right of way, that work may be shut down by the roadway governing authority during the period from the beginning of the Thanksgiving holiday through the end of the New Year holiday or some portion(s) of that period. Unless otherwise specifically called out herein, or granted by the Engineer In writing, no extension of Project will be allowed due to such a shutdown. If any extension of time is allowed, it will be a non-compensable nature. All costs of such a shutdown including any demobilization/re-mobilization costs shall be the sole responsibility of the Contractor and no extra compensation will be allowed. Upon ending of any such shutdown, the Contractor shall immediately resume construction operations unless otherwise ordered by the Engineer in writing.

5. The Contractor shall fully comply with any special working hours, and with all other requirements of the Permits, at no additional cost to the City. Working hours noted in permits or the specifications are subject to change. In the event that changed working hours affects the work of the Contractor, the Contractor’s sole remedy shall be a non-compensable time extension. Said extension to be full compensation for all direct and indirect costs, including but not limited to loss of efficiency, loss of opportunity, increased bond or insurance premiums, or home office or extended overhead, incurred by the Contractor as a result of such change, and no additional compensation shall be considered. Night work may be required as a part of the construction.

1.0.2. PROGRESS MEETINGS

A. General progress meetings will be held once each week at which every entity then involved in the planning, coordination and performance of work shall be discussed. The progress of each element of current work shall be discussed as to whether it is ahead of schedule, on time or behind time in relation to the updated progress schedule. For each meeting, the Contractor shall prepare a detailed three (3) week "look ahead" schedule in addition to, showing the progress schedule of the previous week. Methods to expedite behind-time work shall be determined, and commitments secured for bringing back to the scheduled date for the entities involved. Everything of significance which could affect the progress of the work, including schedule revisions, shall be discussed to ensure that current and subsequent work will be completed within the Contract time. Within three days after each meeting, copies of the minutes of the meeting, including a brief summary of progress of the work since the previous meeting, shall be distributed to each present or who should have been present. Whenever revisions to the progress schedule have been made or recognized at the progress meeting, a copy of the revised schedule shall accompany the minutes distributed.

B. Each computer-generated construction progress schedule and report shall include the following minimum items:

1. Activity Numbers.
2. Duration Estimate.
3. Activity Description.
4. Early Start Date (Calendar Dated).
5. Early Finish Date (Calendar Dated).
6. Latest Allowable Start Date (Calendar Dated).
7. Latest Allowable Finish Date (Calendar Dated).
8. Status (whether critical).
9. Estimated Cost of The Activity.
10. Total Float and Free Float.

C. In addition, each construction progress schedule, network analysis and report shall be prefaced with the following summary data:

1. Contract Name and Number.

2. Contractor's Name.

3. Contract Duration.

4. Contract Schedule.

5. The Effective or Starting Date of The Schedule (the date indicated in the Noticeto-Proceed).

D. The workday to calendar date correlation shall be based on an 8-hour day and 40hour week with adequate allowance for holidays, adverse weather and all other special requirements of the work. Normal work hours are Monday thru Friday, 7:30 am to 4:30 pm.

E. If the Contractor desires to make changes in the method of operating which affects the construction progress schedule and related items, he/she shall notify the Engineer in writing stating what changes are proposed and the reason for the change. If the Engineer accepts these changes, in writing, the Contractor shall revise and submit, without additional cost to the City, all of the affected portions of the construction progress schedule, and associated reports. The construction progress schedule and related items shall be adjusted by the Contractor only after prior acceptance, in writing by the Engineer. Adjustments may consist of changing portions of the activity sequence, activity durations, division of activities, or other adjustments as may be required. The addition of extraneous, non-work activities and activities which add restraints to the construction progress schedule shall not be accepted.

F. Except where earlier completions are specified, schedule dates which show completion of all work prior to the contract completion date shall, in no event, be the basis for claim for delay against the City by the Contractor.

G. Construction progress schedules and related items which contain activities showing negative float or which extend beyond the contract completion date will not be accepted by the Engineer. Whenever it becomes apparent from the current construction progress schedule and associated reports that delays to the critical path have resulted and the contract completion date will not be met, or when so directed by the Engineer, the Contractor shall take some or all of the following actions at no additional cost to the City. They shall submit to the Engineer for approval, a written statement of the steps they intend to take to remove or arrest the delay to the critical path in the current construction progress schedule.

1. Increase construction manpower in such quantities and crafts as will substantially eliminate the backlog of work.

2. Increase the number of working hours per shift, shifts per day, working days per week, the amount of construction equipment, or any combination of the foregoing, sufficiently to substantially eliminate the backlog of work.

3. Reschedule activities to achieve maximum practical concurrence of accomplishment of activities and comply with the revised schedule.

H. If when so requested by the Engineer, the Contractor should fail to submit a written statement of the steps they intend to take or should fail to take such steps as reviewed and accepted in writing by the Engineer, the Engineer may direct the Contractor to increase the level of effort in manpower (trades), equipment and work schedule (overtime, weekend and holiday work, etc.) to be employed by the Contractor in order to remove or arrest the delay to the critical path in the current construction progress schedule, and the Contractor shall promptly provide such level of effort at no additional cost to the City.

I. If the completion of any activity, whether or not critical, falls more than 100 percent behind its previously scheduled and accepted duration, the Contractor shall submit for approval a schedule adjustment showing each such activity divided into two activities reflecting completed versus uncompleted work.

J. Shop drawings which are not approved on the first submittal or within the time scheduled, and equipment which does not pass the specified tests and certifications shall be immediately rescheduled.

K. The contract time will be adjusted only in accordance with the General Requirement and other portions of the Contract Documents as may be applicable. If the Engineer finds that the Contractor is entitled to any extension of the contract completion date, the Engineer's determination as to the total number of days extension shall be based upon the current construction progress schedule and on all data relevant to the extension. Such data shall be included in the next updating of the schedule and related items. Actual delays in activities which, according to the construction progress schedule, do not affect any contract completion date will not be the basis for a change therein.

L. From time to time it may be necessary for the contract schedule of completion time to be adjusted by the City in accordance with the General Requirements and other portions of the Contract Documents as may be applicable. Under such conditions, the Engineer will direct the Contractor to reschedule the work or contract completion time

to reflect the changed conditions, and the Contractor shall revise the construction progress schedule and related items accordingly, at no additional cost to the City.

M. Available float time may be used by the City through the City's Engineer.

N. The City controls the float time and, therefore, without obligation to extend either the overall completion date or any intermediate completion dates the City may initiate changes that absorb float time only. City initiated changes that affect the critical path on the network diagram shall be the sole grounds for extending the completion dates. Contractor-initiated changes that encroach on the float time may be accomplished only with the City's concurrence. Such changes, however, shall give way to City-initiated changes competing for the same float time.

O. To the extent that the construction project schedule, or associated report or any revision thereof shows anything not jointly agreed upon or fails to shown anything jointly agreed upon, it shall not be deemed to have been accepted by the Engineer. Failure to include on a schedule any element of work required for the performance of this Contract shall not excuse the Contractor from completing all work required within any applicable completion date, notwithstanding the review of the schedule by the Engineer

P. Review and acceptance of the construction progress schedule, and related reports, by the Engineer is advisory only and shall not relieve the Contractor of the responsibility for accomplishing the work within the contract completion date. Omissions and errors in the construction progress schedule, and related reports shall not excuse performance less than that required by the Contract and in no way make the Engineer an insurer of the Contractor's success or liable for time or cost overruns flowing from any shortcomings in the construction progress schedule, and related reports.

Q. The Contractor shall present and discuss the proposed schedule at the preconstruction conference.

R. The construction progress schedule shall be based upon the precedence diagramming method of scheduling and shall be prepared in the form of a horizontal bar chart showing in detail the proposed sequence of the work and identifying all construction activities included but not limited to yard piping, all structures and treatment units and all related work specified herein to be performed under the Contract. The schedule shall be time scaled, identifying the first day of each week, with the estimated date of starting and completion of each stage of the work in order to complete the project within the contract time. The project critical path shall be clearly identified.

1.0.3. DAILY REPORTS

A. Prepare and submit to the Engineer at regular intervals not exceeding weekly intervals, a daily report recording information concerning events at the site. The daily reports shall contain the following and any other significant information:

1. General weather conditions, rain, high/low temperatures.
2. List of Subcontractors on site.
3. List of separate Contractors at the site, if any.
4. Meetings and significant decisions.
5. Stoppages, delays, shortages, losses.
6. Emergency procedures, field orders.
7. Orders/requests by governing authorities.
8. Other events or activities.
9. Partial completions.

PART 2 – PRODUCTS

END OF SECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Submittals covered by these requirements include manufacturers' information, shop drawings, test procedures, test results, samples, requests for substitutions, and miscellaneous work-related submittals. Submittals shall also include, but not be limited to, all mechanical, materials, reinforcing steel, fabricated items, and piping and conduit details. The Contractor shall furnish all drawings, specifications, descriptive data, certificates, samples, tests, methods, schedules, and manufacturer's installation and other instructions as specifically required in the contract documents to demonstrate fully that the materials and equipment to be furnished and the methods of work comply with the provisions and intent of the contract documents.

B. The Contractor shall submit copies of all permit applications, permit submittals, permit comments and permit approvals.

C. Within 10 calendar days after Notice to Proceed, Contractor shall submit a complete list of all anticipated submittals including shop drawings, submittals, and product data with an anticipated delivery date to the Engineer and review and approval times. This shall be reviewed during the Project Kickoff Meeting and shall be continuously updated and reviewed during Project Progress Meetings.

1.0.2. CONTRACTOR'S RESPONSIBILITY

A. The Contractor shall be responsible for the accuracy and completeness of the information contained in each submittal and shall assure that the material, equipment or method of work shall be as described in the submittal. The Contractor shall verify that all features of all products conform to the specified requirements. Submittal documents shall be clearly edited to indicate only those items, models, or series of equipment, which are being submitted for review. All extraneous materials shall be crossed out or otherwise obliterated. The Contractor shall ensure that there is no conflict with other submittals and notify the Engineer in each case where his submittal may affect the work of another Contractor or the Owner. The Contractor shall coordinate submittals among its Subcontractors and suppliers including those submittals complying with unit responsibility requirements.

B. Record Drawings: Refer to Section 01720 "Project Record Drawings".

C. As-Built Record Drawings: Refer to Section 01725 "As-Built Record Drawings".

01340 SHOP DRAWINGS, PRODUCT DATA, AND SAMPLES

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Before proceeding with the erection of the construction plan, including the setting or placing thereof, and the erection of other temporary structures, the Contractor shall furnish the Engineer with such information and plans as the City may require.

B. Shop Drawings (including Pre-Approved Product List submittals) shall be submitted prior to any project construction activity. In a timely fashion, well before the contemplated ordering for fabrication of special order or long-lead items or construction use of any standard element of the work, the Contractor shall furnish Shop Drawings for the review and approval of the City.

C. It is the Contractor's sole responsibility, upon the first occasion of submittal of a particular element of the work, to submit Shop Drawings of an element which match and fulfill the requirements and intent of the plans and specifications. Any delays or costs caused, either directly or indirectly, by non-timely submissions; submission of items differing significantly from the intent of the plans and/or specifications; repeated submission of, or argument over, rejected elements or changes required for acceptance; arguments with the criteria or requirements of the plans or specifications; or any other such similar activities shall be at the expense of the Contractor.

D. It is the intent of the Contract Documents that the Contractor shall, in the first instance, submit Shop Drawings of elements which meet or exceed the requirements of the Contract Documents and fit with the other elements of the work and the existing conditions. Delays or the inability to obtain shop drawing approval may subject the Contractor to costs for liquidated or actual damages as specified in the Contract.

1.0.2. DESCRIPTION OF WORK

A. It is the intent of the Contract Documents that the Contractor shall, in the first instance, submit Shop Drawings of elements which meet or exceed the requirements of the Contract Documents and fit with the other elements of the work and the existing conditions. Delays or the inability to obtain shop drawing approval may subject the Contractor to costs for liquidated or actual damages as specified in the Contract.

B. After award of the project, the Contractor may begin providing submittals for approval. Submit to the Engineer a complete list of preliminary data on items for which Shop

Drawings are to be submitted. Included in this list shall be the names of all proposed manufacturers furnishing specified items. Review of this list by the Engineer shall in no way expressed or implied relieve the Contractor from submitting complete Shop Drawings and providing materials, equipment, etc., fully in accordance with the specifications. This procedure is required in order to expedite final review of Shop Drawings.

C. Maintain an accurate updated Shop Drawing submittal log which shall include the following items:

1. Submittal Description and Number Assigned.
2. Specification Section.
3. Plans Sheet Number.
4. Date to Engineer.
5. Date Returned to Contractor (from Engineer).
6. Status of Submittal (Approved, Approved as Noted, Rejected/Resubmit).
7. Date of Resubmittal and Return (as Applicable).
8. Date Material Release (for Fabrication).
9. Projected Date of Fabrication.
10. Projected Date of Delivery to site.
11. Status of O & M Manuals Submittal.

1.0.3. CONTRACTOR'S RESPONSIBILITY

A. Furnish the Engineer with a schedule of Shop Drawings submittals, fixing the respective dates for the submission of Shop Drawings, the beginning of manufacture, testing and installation of materials, supplies and equipment. This schedule shall indicate those that are critical to the progress schedule.

B. Submit to the Engineer all plans and schedules sufficiently in advance of construction requirements to provide maximum time for checking and appropriate action from the time the Engineer receive them.

C. It is the duty of the Contractor to check and approve all plans, data and samples prepared by or for him/her before submitting them to the Engineer for review. Each and every copy of the plans and data shall bear Contractor's stamp showing that they have been checked and approved. Shop Drawings submitted to the Engineer without the Contractor's stamp and approval shall be returned to the Contractor for conformance with this requirement before Engineer's review. ***Shop Drawings shall indicate any deviations in the submittal from requirements of the Project Documents and the Contractor shall state the reason why a deviation is required.***

D. All submittals shall be accompanied by a submittal registry and transmittal letter containing the following information:

1. Date.

2. Project Title and Number.

3. Contractor's name and address.

4. The number of each Shop Drawing, Data, and Sample submitted.

5. Notification of Deviations from Project Documents.

6. Submittal Log Number conforming to and referring to Specification Section Number.

7. Contractor signature or of its authorized representative.

E. Submit seven copies of Shop Drawings and of descriptive or product data submittals necessary to complement Shop Drawing. The Engineer will retain five sets.

F. After receiving approval by the Engineer, the Contractor shall be responsible for submitting the Shop Drawings to the City. Shop Drawings of all premanufactured items and all other Shop Drawings are required to obtain approval prior to manufacturing or installing the submitted items. The Contractor shall also be responsible for contesting any interpretations by the City that considers non-acceptable. The Contractor shall include in the bid prices, all costs for permits, fees and expenses associated with the submittals, including resubmittals (if any) of Shop Drawings to the City.

G. Do not begin any of the work covered by a drawing, data, or a sample returned as “Rejected/Resubmit” until a revision or correction thereof has been reviewed and returned to the Contractor, by the Engineer, with approval or approval “As Noted”. Be responsible for and bear all costs of damages which may result from the ordering of any material or from proceeding with any part of work prior to receiving Engineer's approval or approval “As Noted” of the necessary Shop Drawings.

H. Be fully responsible for observing the need for and for making any changes in the arrangement of piping, connections, wiring, manner of installation, etc., which may be required by the materials/equipment the Contractor proposes to supply, both as they pertain to the Contractor’s own work, work of others, or of other Divisions herein or Trades and clearly show such changes on the Shop Drawings.

I. When substitutions in materials or equipment are allowed, the Contractor shall make all necessary changes in adjacent or connected structures and equipment at his expense. Where contemplated changes, substitutions or appurtenant work require engineering design, in the opinion of the Engineer, the Contractor shall have such design services performed at his expense.

J. When substitutions in materials or equipment are allowed, the Contractor shall be solely responsible for all costs and time required by any differences in construction methods, fabrication or assembly required and no additional time will be allowed.

K. Determine and verify:

1. Field measurements.

2. Field construction criteria.

3. Catalog numbers and similar data.

4. Conformance with specifications.

5. That installation and maintenance clearances are sufficient particularly when equipment or arrangement changes have been made.

1.0.4. ENGINEER’S REVIEW OF SHOP DRAWINGS

A. Engineer’s review of plans, data and samples, submitted by the Contractor will cover only general conformity to the drawing and specifications. The Engineer's review will not constitute an approval of dimensions, quantities, and details of the material,

equipment, device, or item shown. The review of plans and schedules will be general, and shall not be construed:

1. As permitting any departure from the Contract requirements.

2. As relieving the Contractor of responsibility for any errors, including detail, dimensions, and materials.

3. As approving departures from details furnished by the Engineer, except as otherwise provided herein.

B. Variations:

1. If the plans or schedules, as submitted, describe variations per paragraph 1.03 C, and show a departure from the Contract requirements which Engineer finds to be in the interest of the City and to be so minor as not to involve a change in Contract price or time for performance, the Engineer may return the reviewed plans without noting an exception.

2. If the plans or schedules, as submitted, describe variations and show a departure from the Contract requirements which the Engineer finds to be minor enough to be corrected by redlining the submittal, the Engineer will mark and return the submittal marked "Approved as Noted." The redlined corrections shall be as binding on the Contractor as would be a resubmission embodying the same corrections.

C. When reviewed by the Engineer, each of the Shop Drawings shall be stamped and dated to indicate it had been reviewed. Shop Drawings stamped "Revise and Resubmit" and with required corrections shown will be returned to the Contractor for correction and resubmittal.

D. If the Contractor considers any correction indicated on the Shop Drawings to constitute a change to the project plans or specifications, the Contractor shall give written notice thereof to the Engineer who will render a decision which shall be final. After the decision has been made, the Contractor shall without delay, provide the corrections to the plans.

E. When the Shop Drawings have been approved by the Engineer, the Contractor shall carry out the construction in accordance therewith and shall make no further changes therein except upon written instructions from the Engineer.

F. No partial submittals will be reviewed. Submittals not complete will be returned to the Contractor for resubmittal.

1.0.5. SHOP DRAWINGS

A. Shop drawings shall be of such character that they may be used as fabrication drawings. Prior to submission, the Contractor shall thoroughly check such drawings, satisfying himself that they meet the requirements of the Plans and Specifications and that they are coordinated with the arrangements set forth on other shop drawings, and shall place on them the Project Number, the date and his signature and stamp of approval. Where items for which shop drawings are submitted are to meet special conditions listed in the detailed Specifications, the conditions shall be so noted on the drawing. Where there is a deviation from the Specifications, the Contractor shall note it and state the reason why a deviation is required. Two copies will be returned to the Contractor with the Engineer's mark of approval thereon, or will be marked to indicate changes necessary to effect compliance with the Specifications and the remaining copies will be retained by the City. When shop drawings are approved by the Engineer, they shall be as binding as any of the Contract Documents. Any errors or omissions on the shop drawings shall not relieve the Contractor of his responsibility.
   He shall correct such errors, or omissions, including any necessary additions or alterations to construction, at his expense upon notification by the Engineer.

B. Shop drawings submitted without the required approval as specified above shall be returned without review and no extension of time will be granted for any delays caused by such improper submission.

C. The approval of shop drawings and data will be general, and shall mean that upon examination of the shop drawings, no variations from the Contract requirements have been discovered, and approval will not relieve the Contractor of his responsibilities as defined under the Contract.

D. When used in the Project Documents, the term "Shop Drawings" shall be considered to mean Contractor's plans for materials and equipment which become an integral part of the project. These Shop Drawings shall be complete and detailed. Shop Drawings shall consist of fabrication, erection and setting drawings and schedule drawings, manufacturer's scale drawings, and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature, and performance/test data shall be considered only as supportive to required Shop Drawings as defined above.

E. Manufacturer's catalog sheets, brochures, diagrams, illustrations and other standard descriptive data shall be clearly marked to identify pertinent materials, product or models. Information which is not applicable to the work shall be deleted by striking or cross hatching.

F. If plans show variations from Contract requirements because of standard shop practice or for other reasons, describe such variations in the letter of transmittal. If no explanation of these variations is provided, the Contractor shall not be relieved of the responsibility for executing the work in accordance with the Contract, even though such plans have been reviewed and approved.

G. For all mechanical and electrical equipment furnished, provide a list including the equipment name, address of and telephone number of the manufacturer's representative and service company so that service and/or spare parts can be readily obtained.

H. All manufacturers or equipment suppliers who propose to furnish equipment or products shall submit an installation list to the Engineer along with the required Shop Drawings. The installation list shall include at least five installations where identical equipment has been installed and has been in operation for a period of at least five years, unless otherwise specified. Manufacturers and/or equipment which fails to meet the specified experience period will be considered if the manufacturer or supplier provides a bond or cash deposit which will guarantee replacement of the equipment or process in the event of failure or unsatisfactory service.

I. Only the Engineer will utilize the color "red" in marking Shop Drawing submittals.

1.0.6. REQUIRED INFORMATION

A. Submit, as applicable, the following for all prefabricated or manufactured structural, mechanical, electrical, plumbing, process system, and equipment work:

1. Shop Drawings or equipment drawings, including dimensions, size and location of connections to other work, and weight of equipment.

2. Catalog information and cuts.

3. Installation or placing plans for equipment, drives, and bases.

4. Supporting calculations, signed and sealed by a Florida Registered Engineer when required, for equipment and associated supports, or hangers required or specified to be designed by equipment manufacturers.

5. Signed and sealed calculations and plans by in-house Florida Registered Professional Engineer for structural systems, indicating compliance to the structural design criteria specified in the plans.

6. Complete manufacturer's specifications, including materials description and paint system.

7. Performance data and pump curves.

8. Suggested spare parts with current price information.

9. List of special tools required for testing, checking, parts replacement, and maintenance. (Special tools are those which have been specially designed or adapted for use on parts of the equipment, and are not customarily and routinely carried by maintenance mechanics)

10. List of special tools furnished with the equipment

11. List of materials and supplies required for the equipment prior to, and during startup

12. List of materials or supplies furnished with the equipment

13. Special handling instructions

14. Requirements for storage and protection prior to installation

15. Requirements for routine maintenance required prior to equipment startup

16. List of all requested exceptions to the Project Documents

1.0.7. SUBMITTAL REQUIRED FOR FOREIGN MANUFACTURED ITEMS

A. In addition to the submittal requirements stated above, suppliers of foreign manufactured items shall submit the names and addresses of companies within the United States that maintain technical service representatives and a complete inventory of spare parts and accessories for each foreign-made item proposed for incorporation into the work. Failure to prove these capabilities shall be cause for rejection of the foreign manufactured items.

B. Foreign manufactured equipment and materials shall in all cases be clearly and permanently marked with the manufacturer’s name and country of origin of the item. The name of the U.S. importing/supplying firm is not acceptable. Shop Drawing submittals of foreign-made items shall be accompanied by written information to include name and location (i.e. country, City, and street address) of the manufacturer. This requirement shall also apply to the foreign made elements of items assembled in this country from parts wholly or partially manufactured overseas.

1. The words, “Permanently Marked” as used in this paragraph shall mean; die stamped, cast-in, welded, or otherwise marked such that the removal of the marking by any mechanical or chemical means will result in obvious permanent damage to the surface marked. These markings shall be on surfaces which are not hidden by assembly.

C. Where specified elsewhere herein or at the sole discretion of the Engineer, whose word shall be final, supply verification of quality, suitability or other aspects, as directed by the Engineer, from a Professional Engineer licensed to practice in the State of Florida or the state where the supplying U.S. firm is located. The verification shall be signed, sealed, and dated. All costs for this verification shall be at the sole expense of the Contractor and no extra compensation will be allowed. Verification by foreignbased engineers, firms, manufacturers, etc. will not be acceptable.

1.0.8. SAMPLES

A. Furnish for the approval of the Engineer, samples required by the Project Documents or required by the Engineer. Samples shall be delivered to the Engineer as specified or directed. The Contractor shall prepay all shipping charges on samples. Materials or equipment for which samples are required shall not be used in work until approved by the Engineer.

B. Samples shall be of sufficient size and quantity to clearly illustrate:

1. Functional characteristics of the product, with integrally related parts and attachment devices.

2. Full range of color, texture and pattern.

3. A minimum of two samples of each Item shall be submitted.

C. Each sample shall have a label indicating:

1. Name of Project.

2. Material or Equipment Represented.

3. Name of Producer and Brand (if any) Location in Project.

D. Prepare a transmittal letter in triplicate for each shipment of samples containing the information specified herein in Paragraph 1.05 A. Enclose a copy of this letter with the

shipment and send a copy of this letter to the Engineer. Approval of a sample shall be only for the characteristics or use specified and shall not be construed to change or modify any Contract requirements.

E. Approved samples of the hardware in good condition will be marked for identification and may be used in the work. Materials and equipment incorporated in work shall match the approved samples.

1.0.9. SUSTITUTION

A. Changes in products, materials, equipment, and methods of construction required by the Contract Documents, which are proposed by the Contractor after award of the Contract, are considered to be requests for substitutions. Where the plans and/or specifications designate the products of a particular manufacturer, the product specified has been found suitable for the intended use. Articles or products of similar characteristics may be offered for the approval of the Engineer, whose decision shall be final. Copies of complete descriptive data shall be furnished regarding all materials furnished by the Contractor, consisting of Dimension drawings, catalog references, product data, cost, and other information necessary to clearly identify and evaluate each article.

B. When substitutions are permitted, the Contractor shall make all necessary changes in adjacent, connected, or other structures and equipment at his expense. the Contractor shall make all necessary changes in adjacent or connected structures and equipment at his expense. Where contemplated changes, substitutions or appurtenant work require engineering design, in the opinion of the Engineer, the Contractor shall have such design services performed at his expense. Said engineering design services shall be of an extent satisfactory to the Engineer whose word shall be final and shall be performed by a Registered Professional Engineer licensed to practice in the State of Florida.

C. Where there is a deviation from the Specifications, the Contractor shall note it and state the reasons why a deviation is required.

D. Where engineer-recommended changes, substitutions or appurtenant work require engineering design, the Contractor shall have such design services performed. Those engineering design services shall be of an extent satisfactory to the Engineer, whose decision shall be final.

E. The approval of Pre-Approved product sheets, shop drawings and data will be general and shall mean that upon examination of the drawings, no variations from the approved project drawings and project requirements have been discovered, and approval will not relieve the Contractor of his responsibilities as defined above. The

City's review will not constitute an approval of dimensions, quantities and details of the material, equipment or item shown.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01380 CONSTRUCTION PHOTOGRAPHS AND VIDEO PHOTOGRAPHY

PART 1 – GENERAL 1.0.1

DESCRIPTION OF WORK

A. This section specifies the taking and submission of construction photographs and audio-video photography.

B. Prior to the delivery of any equipment, materials or supplies to the site of any work, or to the beginning of any of the construction work, the Contractor shall provide preconstruction photography as specified herein for the purpose of establishing the surface conditions existing in all of the areas to be affected by the construction of the Project.

C. Pre-Construction Photographs: The Contractor shall video/photograph the entire project site during normal working hours including all concrete and asphalt pavements, curb and gutter, fencing, landscaping to remain, structures to be demolished, and existing structures that are to be modified. All videos and photographs shall be date and time stamped and a digital copy submitted on a flash drive/memory stick or media acceptable to the City prior to beginning construction activities. The video/photographs shall clearly identify existing site and structural conditions.

D. Ground photography shall consist of photographs and color video taping of surface features taken along the entire length of the Project and including all work, intersecting roadways and properties that will be impacted by the water service conversions.

E. The purpose of the color audio-video taping of the project is to provide the necessary information for restoration of surface features after completion of the Project. The Contractor shall be responsible for repairing any damage or defect not documented as existing prior to construction.

1.0.2 QUALITY ASSURANCE

A. Photographs shall be clean, sharp and clearly show details. Out-of-focus photographs will not be acceptable.

B. Digital photographs which are poorly lit or lack definition will not be acceptable

1.0.3 SUBMITTALS

A. Submit one (1) final digital file of each construction photograph and one (1) flash drive/memory stick or acceptable media with the video as follows:

1. Within fourteen (14) days of receiving Notice to Proceed

2. Number photographs in sequence beginning with the numeral one

PART 2 – PRODUCTS 2.0.1

SIZE AND QUALITY

A. Digital pictures and videos shall be compatible with City's software, color, 3½-inches by 5-inches.

B. Digital pictures and videos shall be compatible with City's software.

2.0.2 IDENTIFICATION

A. Each photograph shall be stamped with the following information stamped or typed on the back of the print:

CITY OF OPA-LOCKA WORKS DEPARTMENT
Contract No. _____
1-91

CONTRACTOR: _____

Photograph No. _____ Date: _____ Time: _____

Description: _____

_____

_____

2.0.3 QUANTITY

A. A minimum of twelve (12) photographs shall be taken prior to construction and twelve more each month until completion of the Work.

B. In the instance of a pipeline installation, take a minimum of one photograph each 200 feet or fraction thereof along the entire route of the main initially. During construction a minimum of one photograph every two hundred feet or fraction thereof of that portion of the main constructed during the month until completion.

C. The number of photographs required shall be at the sole discretion of the Engineer whose decision shall be final.

D. An increase in the number of photographs above the minimums shall not be cause for an increase in cost and no extra compensation will be allowed.

2.0.4 VIDEO PHOTOGRAPHY

A. Color audio-video shall be submitted on a flash drive/memory stick or acceptable media.

PART 3 – EXECUTION

3.0.1 INITIAL AND CONSTRUCTION PHOTOGRAPHY

A. Take pre-construction photographs of the entire site or route of the main after receiving the Notice to Proceed and prior to disturbing the site in any manner. Coordinate with the Engineer as to the vantage points and number of photographs required in Paragraph 2.0.3.

B. Photography During Construction: Coordinate with the Engineer as to the actual number and location of views to be photographed and the day and time of photographing.

C. Photographic equipment utilized shall be of sufficient quality to produce pictures capable of being enlarged without loss of definition or sharpness.

3.0.2 PHOTOGRAPHY DURING CONSTRUCTION

a. Coordinate with the Engineer as to the actual number and location of views to be photographed and the day and time of photographing.

3.0.3 VIDEO PHOTOGRAPHY

A. Coverage of Taping: Such coverage shall include, but not be limited to, all existing driveways, sidewalks, curbs, streets, signs, landscaping, trees, catch basins, fences, visible utilities and all buildings located within the work zone of the Project. Of particular concern are any existing faults, fractures, defects or other features. Audio description shall be made simultaneously with and support the video coverage.

B. Streets: shall be recorded by audio-video tape for the full width of the right-of-way, except where specifically noted otherwise by the Engineer.

C. Front, Side and Rear Yard Areas: shall be recorded by audio-video tape of properties impacted by the water service conversions.

3.0.4 LOCATION INFORMATION

A. All flash drives/memory sticks or other acceptable media shall be properly identified by number, location and project name in a manner acceptable to the Engineer.

B. A record of the contents of each flash drive/memory stick or acceptable media shall be supplied on a run sheet identifying each segment in the tape by location, i.e., street viewing side, traveling direction, engineering stationing, and all referenced by tape counter numbers.

C. All video recordings shall begin with the date and time of recording, the project name, the sheet numbers of engineering stationing as shown on the plans, the name of the street, area or building being taped, the direction of travel and the viewing side. Houses and buildings shall be identified visually by house or building address, when possible, in such manner that the progress of the taping and the proposed system may be located by reference to the houses and buildings.

3.0.5 SITE RECORDING CONDITIONS

A. All audio-video taping shall be done during times of good visibility. No outside taping shall be done during periods of visible precipitation or when the ground area is covered with leaves or debris, unless otherwise authorized by the Engineer.

B. In order to produce the proper detail and perspective, adequate auxiliary lighting will be required to fill in shadow areas caused by trees, utility poles, road signs and other such objects, as well as other conditions requiring artificial illumination.

C. The average rate of speed in the general direction of travel of the conveyance used during taping shall not exceed 60 feet per minute. Planning rates and zoom-out rates shall be controlled sufficiently so that playback will produce adequate clarity of the object being viewed.

END OF SECTION

01400 QUALITY CONTROL

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The intent of this section is to emphasize the City interest in quality products being designed and installed within the time and cost considerations of the project. The Contractor shall have primary responsibility for providing Quality Control (QC) for project during both design and construction phases. Quality Control includes, but is not limited to, such functions as:

1. Assuring only latest revisions of design and other documents used for construction (e.g., Shop Drawings, catalog cuts, schedules) are being used by project staff.

2. Inspection of materials and equipment delivered to the site.

3. Inspection and maintenance of materials and equipment in storage.

4. In progress and Final Inspection of the constructed product.

5. Manufacturer's Certification of Installation for service intended.

6. Reporting on work in progress daily.

B. The Contractor shall have a QC System and sufficient QC staff, in place in the design team office and on the jobsite always that work is underway.

C. The Contractor is responsible for controlling the quality of the work, including that portion of the work performed by Engineer of Record, the Cogeneration system manufacturer and on-site Subcontractors. The Contractor is also responsible for assuring that suppliers and manufacturers providing materials and products to be incorporated into the work satisfy the specified quality, provide required documentation, and provide those services as specified within the technical portions of the specifications.

D. The Contractor shall develop and submit a Quality Control Plan which identifies the reporting structure of the QC organization, defines the procedures to be implemented by the Contractor to assure the specified quality is achieved, and details the daily reporting protocol. Within 20 calendar days of the Notice to Proceed (NTP), the Contractor shall submit their proposed Quality Control Plan. The Engineer will schedule a review meeting of the outline within one week of receipt of the plan outline. Final submission of the quality control plan shall be made no later than 10 calendar days following the review meeting.

E. The Contractor and Engineer will coordinate materials testing for cast-in-place concrete, earthwork, and paving.

1.0.2. MATERIALS AND EQUIPMENT

A. The Contractor shall maintain control over procurement sources to ensure that materials and equipment conform to specified requirements.

B. The Contractor shall comply with manufacturer's instructions regarding all facets of materials and/or equipment movement, storage, installation, testing, startup, and operation.

C. The Contractor shall prepare, complete, and maintain all equipment, pipe, and testing logs that document the dates and disposition of each specific test conducted. The logs will be comprised of a summary sheet that is corroborated by individual test report

forms that document the specific tests. The individual test report form will be provided by the Engineer.

1.0.3. MANUFACTURER'S TECHNICAL REPRESENTATIVE

A. When specified in the technical specification sections, the Contractor shall arrange for and provide technical representation directly from the manufacturers of respective equipment items or components.

B. If, in the opinion of the Engineer, the Manufacturer's Representative fails to satisfy the terms of this Specification section, the Engineer may direct the Contractor to replace the Representative with a different representative, and those hours expended by the disapproved representative will not be counted against the service hours specified for the system/unit/component.

PART 2 – PRODUCTS 2.0.1.

QUALITY CONTROL PLAN

A. The Quality Control Plan shall be a formal document prepared under the direction of the Contractor. The Plan will be the basis by which the Engineer will monitor the QC effort associated with executing the work.

B. The Plan shall address the Quality Control Organization and the roles each member of the organization plays in satisfying the quality requirements of the work.

C. Included within the plan will be basic guidelines associated with the checking and monitoring of work as it progresses and how the guidelines will be used by Contractor's supervisors and representatives to provide the required quality.

D. The process for notification of quality concerns shall be included in the Plan.

2.0.2. REPORTS

A. Monthly Quality Control Summary that addresses the following:

1. Certification by Contractor that all work not specifically cited by a NonConformance Report satisfies the requirements of the Contract Documents.

2. Summary table identifying all non-conformance notices and their respective current status.

B. Certificate of Proper Installation shall address installation of equipment items.

PART 3 – EXECUTION 3.0.1.

QUALITY CONTROL

A. Quality control is the responsibility of the Contractor, and the Contractor shall maintain control over construction and installation processes to assure compliance with specified requirements.

B. Means and methods of construction and installation processes are the responsibility of the Contractor, and at no time is it the intent of the Engineer to supersede or void that responsibility. In the event there is a degree of uncertainty that the process observed or planned will accomplish the required quality, the Engineer will refer to the Quality Control Plan and initiate discussion with the person primarily responsible for the process or installation in question.

C. Prepare and submit weekly Quality Control activity reports to the Engineer.

D. Monthly Quality Control Summaries are to be prepared and submitted to the Engineer with the Contractor's Partial Payment request for the respective period.

END OF SECTION

01510 TEMPORARY UTILITIES

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Provide temporary facilities required, which may include, but not limited to, the following:

1. Contractor's field office, telephone and storage sheds.

2. Temporary water service.

3. Temporary sanitary service.

4. Temporary electrical service.

B. For additional requirements on Temporary Facilities refer to Section 01100 “Special Project Requirements”.

C. Requirements of Regulatory Agencies:

1. Obtain and pay for permits as required by governing authorities.

2. Comply with federal, state and local codes and regulations.

1.0.2. TEMPORARY ELECTRICITY

A. The City will not furnish electric power for this project. All electrical driven equipment, including electrical welders, shall be served by the temporary electrical service to be provided by the Contractor.

B. The Contractor shall supply extension cords, ground fault circuit interrupters, and safety equipment necessary to protect his workmen and plant personnel.

C. The Contractor shall obtain a power source for temporary electricity from electrical generators or other approved means. Furnish, install and maintain temporary electric power service for construction needs throughout construction site as necessary.

1. Power centers for miscellaneous tools and equipment used in construction work.

2. Power for construction equipment.

3. Power for testing and checking equipment.

4. Power for welding units and for other equipment having special power requirements.

D. Capacity:

1. Adequate electrical service distribution for construction use by all trades and Field Offices during construction period.

2. Notify FPL if unusually heavy loads, such as welding, pumps, high service temporary pump, and other special power requirements, will be connected.

E. Maintain strict supervision of use of temporary services.

1. Enforce conformance with applicable standards.

2. Enforce safe practices.

3. Prevent abuse of services.

1.0.3. TEMPORARY SANITARY FACILITIES

A. Furnish, install and maintain temporary sanitary facilities for use throughout construction period.

1. Enclosed toilet facilities for construction personnel.

2. General employee washing facilities.

B. Toilet Facilities: Fixed or portable chemical toilets shall be provided wherever needed for the use of Contractor's employees. Toilets at construction sites shall conform to the requirements of Subpart D, Section 1926.51 of the OSHA Standards for Construction.

C. Minimum number of fixtures:

1. Toilets and Urinals:

For less than 20 employees: 1 toilet.
For 20 or more employees: 1 toilet and 1 urinal per 40 workers.

2. Washing Facilities: Adequate for number of employees, for type of work requiring washing facilities.

D. Maintain strict supervision of use of facilities:

1. Enforce conformance with applicable standards.

2. Maintain service and clean facilities.

3. Enforce proper use of sanitary facilities.

E. Cost of Installation and Operation:

1. Pay costs of temporary sanitary facilities, including costs of installation, maintenance and removal.

2. Costs of Water: As specified in Temporary Water.

3. Pay service charges for use of portable units.

F. Facility Locations:

1. Within the project site.

2. At Field Offices

3. Toilet and washing facilities:

Secluded from public observation.
Convenient for use of personnel in relation to work stations.

4. Obtain acceptance of the Engineer for all locations.

G. Enclosure for Toilet Facilities:

1. Weatherproof, sight proof, sturdy temporary enclosures.

2. Insect proof screening, adequate natural ventilation.

H. Sewer Connection: The Contractor shall coordinate with the City's Public Works Department for obtaining sewer connection and shall pay permit and sewer usage charges.

PART 2 – PRODUCTS 2.0.1.

MATERIALS

A. General: Materials may be new or used, but must be adequate for purpose required, must be sanitary and must not violate requirements of applicable codes. Materials in contact with potable water must be AWWA/NSF 61 listed.

2.0.2. ELECTRICITY

A. Provide required facilities, including transformers, conductors, poles, conduits, raceways, breakers, fuses and switches.

B. Provide appropriate enclosures for environment in which used, in compliance with NEMA standards.

2.0.3. DRINKING WATER FACILITIES

A. Portable Containers

1. Tightly closed and equipped with dispensing tap.

2. Clearly label contents.

3. Do not use for other purposes.

4. Provide single service disposable cups, with sanitary container for unused cups, and receptacles for used cups.

2.0.4. SANITARY FACILITIES

A. Toilet Facilities:

1. Portable toilets; either:

a. Chemical toilets.

b. Reticulating toilets.

c. Combustion toilets.

2. Toilet Tissue: Provide at each toilet, on suitable dispenser.

PART 3 – EXECUTION 3.0.1.

GENERAL

A. Obtain Engineer's approval of planned installations.

B. Install work in a neat and orderly manner.

C. Make structurally sound throughout.

D. Maintain to provide continuous service.

E. Modify and extend service as work progress requires.

3.0.2. TEMPORARY WATER

A. Locate piping and outlets.

1. Provide service convenient to work stations.

B. Avoid interference with:

1. Traffic and work areas.

2. Materials handling equipment.

3. Storage areas.

C. Do not run piping on floor or on ground.

D. When necessary to maintain pressure, provide temporary pumps, tanks and compressors.

3.0.3. TEMPORARY ELECTRICITY

A. Service and distribution may be overhead or underground.

B. Locate to avoid interference with:

1. Traffic and work areas.

2. Cranes.

3. Material handling equipment.

4. Storage areas.

C. Do not run branch circuits on floor or on ground.

D. Wire all safety devices required for operation of equipment.

E. Check operation of safety devices.

3.0.4. TEMPORARY SANITARY FACILITIES

A. Portable Toilets:

1. Erect securely and anchor to prevent dislocation.

2. Service as often as necessary to prevent accumulation of wastes and creation of unsanitary conditions.

B. Washing Facilities: Provide faucet

3.0.5. REMOVAL

A. Completely remove temporary materials and equipment upon completion of construction.

B. Clean and repair damage caused by installation and restore to specified or original condition.

END OF SECTION

01530 PROTECTION OF EXISTING FACILITIES

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The Contractor shall exercise extreme care and protect all existing structures and utilities, when working in proximity so as not to disturb the structures. Repair or replacement of any property and/or structures damaged during the construction of this project shall be the sole responsibility of the Contractor. Costs involved in the replacement or repair will not be reimbursed by the City. The Contractor shall be responsible for coordinating his work with the work to be done by FPL or their Contractor.

B. Protection of Property Remaining in Place:

1. Property obstructions which are to remain in place, such as buildings, poles, walls, posts, bridges, etc., are to be carefully protected from damage and are not to be displaced. Any damage to such obstructions noted to remain in place shall be repaired by the Contractor at no additional cost to the City or Owner.

2. Should structures be encountered which interfere with the work, the City or designee shall be consulted immediately in order for a decision to be made on the relocation of the work so it will clear the obstruction, if the obstruction cannot be relocated.

C. The underground utilities, structures and other facilities shown on the plans are located according to the best information available but may vary by several feet from both the position and elevation shown. The Contractor shall explore far enough in advance of his main trench to determine the exact location and condition of such utilities, structures or facilities so that, before the pipe is installed, the Engineer may change the line or grade of the pipe, should that become necessary to avoid a conflict.

1.0.2. GENERAL CONSIDERATIONS

A. All cost for changing the grade of the proposed main downward two feet-six inches or less in order to clear obstructions located differently than shown on the plans, or to

clear obstructions not shown on the plans but the location of which could have become known or should have become known by proper observation of field conditions or the proper exploratory procedure, shall be included in the prices bid under the various items of the Proposal and no additional compensation will be allowed.

B. Additional cost, if any, for changing the grade of the proposed main downward more than two feet-six inches, for the same reasons, will be paid for as "Extra Work" in accordance with "Extra Work and Payment Therefore" of the Special Conditions.

C. Changing the grade of the proposed main by rising deflections, or the alignment by horizontal deflections, will not be considered as extra work, or extra cost, to the Contractor, and in some cases a credit to the City may be warranted.

D. Where the Quotation contains Items for installing main in specific depth ranges, the main shall be paid for at the actual depth range installed. However, the provisions of paragraphs one and two of this Section shall apply and any depth increase caused by a lack of timely and sufficient exploration by the Contractor shall be at his expense. In such instance, the main shall be paid for as if installed at the invert elevations originally shown on the Plans.

E. In all cases where the main is deflected either horizontally or vertically, and the Engineer requires additional work and items such as paving, air release valve assemblies, and similar items for which a pay item was established in the Proposal, then such additional work and items will be paid for at the prices bid.

F. The Contractor shall determine the locations of recent additions to the systems not shown on the plans. Extreme caution shall be exercised to eliminate any possibility of any damage to utilities resulting from his activities. The location of all overhead utilities shall be verified, and the Engineer notified of any conflict which might occur. The Contractor shall be responsible for determining which poles will need shoring during excavation and shall provide such shoring and support as is required.

G. Where it is necessary to temporarily interrupt house or building services, the Contractor shall notify the house or building owner or occupant, both before the interruption and again immediately before service is resumed. Before disconnecting any pipes or cables, the Contractor shall obtain permission from the Owner, or shall make suitable arrangements for their disconnection by the Owner. The Contractor shall be responsible for any damage to any such pipes, conduits or cables, and shall restore them to service promptly as soon as the work has progressed past the point involved.

H. Various drainage culverts and drainage ditches may be encountered along the route of the work. Any culverts which are disturbed, damaged or removed shall be repaired,

restored or reinstalled. The Contractor shall document any existing damage to the drainage systems, or if it needs cleaning, prior to doing any work in the vicinity, so he will not be held responsible. Drainage ditches shall be restored to the original cross sections existing prior to construction of this work. Ditches shall be left clean and free of all excavated materials or other materials deposited in them as a result of this construction. All existing headwalls, removed or damaged as a result of this construction, shall be restored as directed by the Engineer, and the work shall be considered an incidental item and the cost included in the other items of the quotation.

I. All existing drainage structures and piping shall be considered clean at the start of construction. The Contractor shall check to verify that this is so. The Contractor should notify the governing agency of any damaged or dirty structures or piping to avoid repair or cleaning at his expense. Copies of such notices shall be sent to the Engineer.

1.0.3. RELOCATION OF EXISTING UTILITIES

A. The relocation of existing utilities, as noted on the plans, or for the convenience of the Contractor shall be the responsibility of the Contractor. This work shall be completed by either the forces of the existing utility or the Contractor's forces at the discretion of the responsible utility. If the work is to be performed by the Contractor, all work shall be done in accordance with the utility company's requirements. Under no circumstances shall the Contractor be authorized extra payment for this work, and all cost for the relocation shall be the responsibility of the Contractor.

B. The Contractor shall also be responsible for the coordination of all existing utility relocations with the appropriate utilities. Where temporary supports or protective encasements are required during the construction, the Contractor shall be responsible for this work at no additional cost.

C. Any conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the Engineer. There shall be no additional payment for adjustments in grades or location resulting from locations of existing utilities.

D. Various storm sewer lines and inlets and slab-covered drainage ditches that conflict with the proposed construction may require adjustment, relocation or removal and reinstallation. This work shall be performed as directed by the Engineer, and the work shall be considered an incidental item and the cost included in the items listed in the quotation.

E. Representatives of utility companies, the railroad companies, the traffic and transportation authorities, etc., shall be notified in accordance with the provisions set forth in the relevant sections of the Specifications and the permitting documents.

F. Notify all utility companies that are affected by the construction operation at least fortyeight (48) hours in advance. Under no circumstance expose any utility without first obtaining permission from the appropriate agency. Once permission has been granted, locate, expose and provide temporary support for all existing underground utilities and utility poles where necessary.

G. Absolutely no extra compensation will be allowed for construction problems created by utility poles of whatever size, overhead electric, telephone or other lines, whether shown on the Plans or not. The Contractor is solely responsible for discovering such items in the field prior to bidding and including all costs for such work in the prices bid.

1.0.4. PROTECTION OF UTILITIES TO REMAIN IN PLACE

A. The work area may have existing utilities, such as, but not limited to irrigation, phone, electrical, water, sewer, storm sewer, and gas lines. It shall be the responsibility of the Contractor to verify the location of all such utilities, structures, etc. by hand excavation or other appropriate measures before performing any work that could result in damage or injury to persons, utilities, structures, or property. The Contractor shall make a thorough search of the site for utilities before work is commenced in any particular location. The Contractor shall take special consideration to protect the existing water main, force main and power line along the project location to avoid service disruptions.

B. During construction, the Contractor shall protect the existing and proposed water main and force main using steel plates, as indicated in the drawings, until site work is completed and final grade is achieved. The Contractor shall be responsible for the repair of any damages caused to these pipes during construction at no additional costs to the City.

C. The Contractor shall take immediate steps to repair, replace, or restore all services to any utilities or other facilities which are disrupted at the fault of the Contractor. Further, the Contractor shall engage any additional outside repairs on a continuous “around the clock” basis until services are restored. The Contractor shall also provide and operate any supplemental temporary services to maintain uninterrupted use of the facilities. All costs involved in the repairs and restoring of disrupted service resulting from negligence on the part of the Contractor shall be borne by the Contractor and shall be fully responsible for any and all claims resulting from the damage.

D. Should utilities be encountered which interfere with the work, the City or designee shall be consulted immediately in order for a decision to be made on the relocation of the work so it will clear the obstruction, if the obstruction cannot be relocated.

E. Prior to the start of construction, the contractor shall comply with F.S. 553.851 for the protection of underground gas lines.

F. When power poles are adjacent to any proposed utility, the Contractor shall provide proper shoring or other suitable support during construction. The shoring and support methods shall be approved by the utility company engineering department. The cost of shoring will be included in the overall project cost.

G. The Contractor shall not purposefully disrupt or disconnect any type of utility whatsoever without first obtaining the written permission of the City. Requests for disconnection must be in writing and received by the City at least 72 hours prior to the time of the requested interruption.

1.0.5. PROTECTION OF TREES REMAINING IN PLACE

A. Construction can potentially damage the existing trees confined within the construction zone. Besides their aesthetic value, some trees are valuable and may be environmentally protected. Mangroves and mangrove associated species (as defined by Miami-Dade County Code of Ordinances) are the jurisdiction of MiamiDade County and would fall under the Miami-Dade County Code of Ordinances, Chapter 24, Division II.

B. Trees can be an important part of the ecological environment of the surrounding area. Measures should be in place to protect trees whenever necessary, including conservation of the canopy.

C. Where directed by the City, desirable trees within the roadway area shall be trimmed, protected, and left standing. Branches of trees extending over the area occupied by the roadway shall be trimmed as directed, to give clear height of 14 feet over vehicular areas and 8 feet over pedestrian areas.

D. When pruning cuts or root pruning to existing trees is shown in the Plans, work is to be supervised on site by an International Society of Arboriculture (ISA) or American Society of Consulting Arborists (ASCA) Certified Arborist and performed in accordance with American National Standards Institute (ANSI).

E. All trees found within a FDOT designated road shall comply with the appropriate FDOT index for tree protection barriers. All other tree protection shall be in accordance with the

F. For all areas both inside and outside the earthwork area, the Contractor shall not deface, injury, or destroy trees, nor remove or cut them without prior approval via a tree removal permit from the City of Opa-Locka Any accidental damage to a tree shall immediately be reported to the City of Opa-Locka for evaluation for public safety and possible new and additional permit requirements/work. An after-the-fact tree removal permit may be required.

G. The Contractor shall understand all ANSI tree care standards prior to the start of earthwork. All necessary permitted above and below ground tree work shall follow the appropriate ANSI standards for tree care.

H. Tree relocation, when required, shall be in accordance with CITY CODE

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. The Contractor shall furnish all material, labor, tools, equipment, plant, appliances and services necessary to complete all demolition, modification and relocation work required in the drawings and specified herein. Examine the various drawings, visit the site and determine the extent of work affected therein and all conditions under which he is required to perform the various operations.

B. The Work specifically covered under this Section consists of the removal and disposal of existing structure, appurtenances, concrete pavement, concrete sidewalk, slope pavement, ditch pavement, curb and curb and gutter. The items to be removed shall be: (1) those items shown in the Plans to be removed; (2) those found within the limits of the area to be cleared and grubbed and directed by the City or designee to be removed; (3) those items which it is necessary to remove in order to construct new structures, utilities, and other appurtenances or obstructions which may be designated in the plans.

C. Demolition shall be constructed in such a way as to leave no obstructions to any proposed new structures or to any waterways. Pilings shall be pulled or shall be cut off or broken off at least 2 feet below the finish grade line. (In the event that the Plans indicate channel excavation to be done by others, the finish ground line shall be considered as the limits of such excavation.) For material which are to remain the property of the City or are to be salvaged for utilization in temporary structures, the removal shall be in such way as to avoid damage to such materials, and all bolts, nails, etc., shall be entirely removed from timbers to be so salvaged; also such salvaged structural steel members shall be marked for identification, as directed. Retaining walls and drainage structures are specifically not included in the Work covered under this Section.

1.0.2. GENERAL CONSIDERATIONS

A. Demolition, modification, removal and relocation work shall be coordinated with the City, shall be performed in an agreed upon sequence to minimize down time at the site.

B. Promptly remove all demolished materials and debris from the site. No demolished materials shall be kept at the plant site for more than 24 hours.

C. Demolition shall result in the complete removal and disposal of existing structures and appurtenances from the site as indicated on drawings and the cleanup after completion of the demolition work.

D. The cutting and removal of existing work necessary for modifications and installation of new work shall be made with a minimum of damage to the work that is to remain. Any damage done to existing facilities which are to remain shall be repaired at the Contractor's expense to the satisfaction of the City.

E. Surfaces of seals visible in the completed work shall be made to match as nearly as possible the adjacent surfaces.

F. Non-shrink grout shall be used for setting wall casting, sleeves, leveling pump bases, doweling anchors into existing concrete and elsewhere as required.

G. Follow other specific instructions for the modification work given in other sections of these specifications and/or as shown on the drawings.

H. Verify exact location, material, alignment, joint, etc. of existing piping and structure prior to making the modifications and connections called out in the drawings. The verifications shall be performed with adequate time to correct any potential alignment or other problems prior to the actual time of connection.

I. Dismantle and remove all existing equipment, piping and other appurtenances required for the completion of the work. Where called for or required, cut existing pipeline for the purpose of making connections thereto. Anchor bolts for equipment and structural steel removal shall be cut off one inch below the concrete surface. Surface shall be properly repaired and finished.

J. Where necessary or required for the purpose of making connections, cut existing pipelines in a manner to provide an approved joint. Where required, weld beads, flanges or provide the specified couplings, all as required.

K. Site shall be left in a clean condition satisfactory to the Engineer, free from demolished materials, rubbish or debris. Site shall be graded to meet adjacent contours and provide flow for surface drainage.

L. Restore items intended to remain that have been damaged by demolition work.

M. Items intended to remain that have been damaged by demolition work shall be restored to original or better condition.

N. All interrupted utility services shall be returned to service, and temporary services disconnected, unless otherwise specified. **PART 2 – PRODUCTS**

2.0.1. STRUCTURES TO BE REMOVED

A. The work specifically covered under this Section consists of the removal and disposal of the material from existing structures.

B. The structures to be removed shall be:

1. Those structures, or portions of structures, shown in the plans to be removed.

2. Those found within the limits of the area to be cleared and grubbed, and directed by the Engineer to be removed.

3. Those structures, or portions of structures, which it is necessary to remove in order to construct new structures, utilities and other appurtenances or obstructions which may be designated in the plans. **PART 3 – EXECUTION**

3.0.1. METHOD OF REMOVAL

A. The structures shall be removed in such a way as to leave no obstructions to any proposed new structures or to any waterways.

B. For material which are to remain the property of the City or are to be salvaged for utilization in temporary structures, the removal shall be in such way as to avoid damage to such materials, and all bolts, nails, etc., shall be entirely removed from timbers to be so salvaged; also such salvaged structural steel members shall be marked for identification, as directed.

3.0.2. REMOVAL OF EXISTING PAVEMENT

A. The work specified in this Section consists of removing and disposing of existing concrete pavement, concrete sidewalk, slope pavement, ditch pavement, curb and curb and gutter, where shown in the plans or directed by the Engineer to be removed or where required to be removed because of the construction operations.

B. Retaining walls and drainage structures are specifically not included in the work covered under this Division.

END OF SECTION

01550 SITE ACCESS AND STORAGE

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The culvert replacement work is to be performed along Sesame Street, between the intersections with Atlantic Avenue and NW 135th Street, Opa-Locka, Florida 33054. The project's owner is the City of Opa-Locka.

1.0.2. EXISTING UTILITIES

A. Protection of, and relocation of existing utilities, structures and other facilities shall be in accordance with Specification *"01530 - Protection of Existing Facilities".*

B. The relocation of existing utilities, as noted on the plans, or for the convenience of the Contractor, shall be the responsibility of the Contractor. This work shall be completed by either the forces of the existing utility or the Contractor's forces at the discretion of the responsible utility. If the work is to be performed by the Contractor, all work shall be done in accordance with the utility company's requirements. The Contractor shall also be responsible for the coordination of all existing utility relocations with the appropriate utilities. Where temporary supports or protective encasements are required during the construction, the Contractor shall be responsible for this work at no additional cost. Under no circumstances shall the Contractor be authorized extra payment for this work, and all cost for the relocation shall be the responsibility of the Contractor.

C. Any conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the Engineer.

1.0.3. SITE ACCESS AND STORAGE

A. The City reserves the right to enter upon, and to use, any and all portions of the work performed hereunder (or under its other Contracts), whether completed or not, as may be required.

B. Highway Limitations: The Contractor shall make its own investigation of the condition of available public and private roads and of clearances, restrictions, bridge load limits,

and other limitations affecting transportation and ingress and egress to the site of the work. It shall be the Contractor's responsibility to construct and maintain any haul roads required for its construction operations.

C. Temporary Crossings: Continuous, unobstructed, safe, and adequate pedestrian and vehicular access shall be provided to fire hydrants, parking lots, Vehicular access to all production facilities shall be maintained except when necessary construction precludes such access for reasonable periods of time.

D. Street Use: Nothing herein shall be construed to entitle the Contractor to the exclusive use of any public street, alleyway, or parking area during the performance of the work hereunder and it shall conduct its operations to not interfere unnecessarily with the City or any other authorized work of utility companies or other agencies in such streets, alleyways, or parking areas. No street shall be closed plant operations without first obtaining permission of the Engineer and the City. Where excavation is being performed in any streets, one lane shall always be kept open to traffic, unless otherwise indicated. Toe boards shall be provided to retain excavated material if required by the Engineer or the City. Fire hydrants on or adjacent to the work shall be kept accessible to fire-fighting equipment. Temporary provisions shall be made by the Contractor to assure the use of sidewalks and the proper functioning of gutters, storm drain inlets, and other drainage facilities.

E. Additional Facilities: Access to other facilities within the project site shall be allowed by the Contractor for City’s staff conduct their operation and maintenance activities. Continuous, unobstructed, safe and adequate pedestrian and vehicular for the City’s staff to access facilities within the project site such as the electrical building, emergency generator, water tanks and Pump Station 23 is required.

1.0.4. CONTRACTOR WORK AND STORAGE AREA

A. The Contractor may utilize private warehouse and/or office space as a storage area and/or construction field offices.

B. The Contractor shall submit to the Engineer for approval, a proposed plan and layout for all field offices, temporary facilities, and parking both for on the project site and on any additional lands obtained by the Contractor for its use during construction of the project. Prior to commencing any preparation remove, relocate and protect where necessary all existing underground and above ground facilities, pipelines, sprinkler systems, sod and all other existing installations. All these installations shall be restored to their initial conditions.

C. The Contractor shall construct and use a separate storage area for hazardous materials used in constructing the work.

1. For the purpose of this paragraph, hazardous materials to be stored in the separate area are products labeled with any of the following terms: Warning, Caution, Poisonous, Toxic, Flammable, Corrosive, Reactive, or Explosive. In addition, whether or not so labeled, the following materials shall be stored in the separate area: diesel fuel, gasoline, new and used motor oil, hydraulic fluid, cement, paints and paint thinners, 2 part epoxy coatings, sealants, asphaltic products, glues, solvents, wood preservatives, sand blast materials, and spill absorbent.

2. Hazardous materials shall be stored in groupings according to the Material Safety Data Sheets.

3. Contractor shall develop and submit to the Engineer a plan for storing and disposing of the materials above.

4. Contractor shall obtain and submit to the Engineer a single EPA number for wastes generated at the site.

5. The separate storage area shall meet the requirements of authorities having jurisdiction over the storage of hazardous materials.

6. Hazardous materials that are delivered in containers shall be stored in the original containers until use. Hazardous materials delivered in bulk shall be stored in containers which meet the requirements of authorities having jurisdiction.

1.0.5. PARKING

A. The Contractor shall be responsible for making its own arrangements for parking of its direct employees, Subcontractors, vendors, etc. as may be necessary either on site or offsite.

B. Traffic and parking areas shall be maintained in good conditions, free of excavated material, construction equipment, mud, and construction materials. The Contractor shall repair breaks, potholes, low areas which collect standing water, and other deficiencies.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01560 TEMPORARY ENVIRONMENTAL CONTROLS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. For any work conducted in a contaminated area within the project boundaries where hazardous materials or hydrocarbons have been encountered, were previously known to exist, or is suspected by the Contractor or the City Inspector, the Contractor must comply with all applicable requirements of OSHA, EPA, FDEP, Miami-Dade County Regulatory and the City.

B. All work defined by this Division, including work less than one (1) acre in size, that has the potential to impact the City's Municipal Separate Storm Water System (MS4), and/or adjacent properties, is required to employ sediment and erosion control measures that are in accordance with Florida Storm Water Erosion and Sedimentation Control Inspector's Manual, latest revision, and in accordance with Miami-Dade County Department of Environmental Resources Management.

C. All construction activity that results in the disturbance of equal to or greater than one (1) acre is required to obtain coverage under the Florida Department of Environmental Protection's Generic Permit for Storm Water Discharge from Large and Small Construction Activities (CGP).

1.0.2. SPECIALIZED CONSTRUCTION AREA

A. Specialized construction areas are defined as areas where contaminants are discovered and require construction by personnel qualified by training and equipped with personal protective equipment for such work.

B. Work in specialized construction areas shall be carried out by personnel qualified by training and equipped for such activities. These personnel shall be either Subcontractors with licensing and certification as specialists in this type of construction or the Contractor's own personnel who have taken and been certified as having

passed the required training course(s). Licensing and certifications shall be submitted to the City for verification and shall in all cases be satisfactory to both, the City and other authorities with jurisdiction.

1.0.3. DUST ABATEMENT

A. All permittees, contractors, owners, operators, or other persons involved in construction activities shall refer to applicable sections of Local, State, and Federal regulations on dust control for additional guidance, including but not limited to the Miami-Dade County Code of Ordinances.

B. All persons involved in construction activities shall take measures to control dust from operations and prevent spillage of excavated materials on public roads.

C. All persons involved in construction activities shall remove spillage of excavated materials, debris, and dust from public roads by methods approved by the City or designee.

D. All persons involved in construction activities shall provide temporary dust-proof partitions where required to protect unaltered portions of existing structures and facilities and as directed by the City or designee. Temporary partitions shall be provided where demolition work is required to protect equipment and material and shall consist of plastic sheeting (6 mil).

E. All persons involved in construction activities shall apply water at locations, quantities, and frequencies required by the City or designee to control dust for nuisance prevention to the City and properties in the vicinity of the site. The frequency of watering will be determined by weather conditions and the erodibility of the soil. If additives in the water are used to increase its dust suppression properties, the chemical should have no adverse environmental impact on adjacent water bodies.

F. The Contractor shall prevent its operation from producing dust in amounts damaging to property or causing a nuisance to persons occupying buildings in the vicinity of the project Site. The Contractor shall employ measures to prevent fugitive dust. The Contractor shall be responsible for any damage resulting from dust originating from its operations.

G. Storage Piles: Enclose, cover, water (as needed), or apply non-toxic soil binders according to manufacturer's specifications on material piles (i.e. gravel, sand, dirt) with a silt content of 5 percent or greater.

H. Active Areas of Site: Water active construction areas and unpaved roads as needed and as requested by Engineer to prevent the propagation of dust.

I. Inactive Areas of Site: Apply non-toxic soil stabilizers according to manufacturer's specifications to inactive construction areas, or water as needed to maintain adequate dust control.

J. Vehicle Loads: Cover or maintain at least 2-feet of freeboard vertical distance between the top of the load and the top of the trailer sides on trucks hauling dirt, sand, soil, or other loose materials off of the site.

K. Roads: When there is visible track-out onto a paved public road, install wheel washers where the vehicles exit and enter onto the paved roads and wash the undercarriage of trucks and any equipment leaving the site on each trip. Sweep the paved street at the end of each shift with a water spray pick-up broom-type street sweeper as necessary or as directed.

L. Vehicle Speeds: Maintain vehicle speeds to 10 mph or less.

M. Additional dust control BMPs include but are not limited to the following.

1. Prevention of dust generation is preferable to applying dust suppression measures. Ensure in the project schedule that the area of cleared land is minimized during the drier months of the year, when dust generation is at its greatest.

2. The soil shall be maintained in a sufficiently damp condition to prevent loose grains of soil from becoming dislodged. The soil shall be completely crusted over by application of water or completely covered with clean gravel or treated with an approved dust suppressant.

3. Ensure that smooth surfaces are deep ripped and left rough and cloddy to reduce the wind velocity at the soil surface.

4. Construct wind fences if appropriate for the site. As a contingency measure, in areas that do not have access to a water supply, water stored on-site should never be less than fifty percent of disturbed land surface. Wherever watering is used to suppress dust, ensure it does not create contaminated runoff that will contaminate surface waters.

5. Use barriers where required to prevent the migration of sawdust or particulates from sanding or surface preparation activities during construction.

1.0.4. SEDIMENTATION ABATEMENT

A. The Contractor shall be responsible for collecting, storing, hauling, and disposing of spoil, silt, and waste materials in compliance with applicable federal, state, and local rules and regulations and the Contract Documents.

B. Install and maintain erosion and sediment control measures, such as swales, grade stabilization structures, berms, dikes, waterways, filter fabric fences, and sediment basins.

C. Filter fabric barrier systems, if used, shall be installed in such a manner that surface runoff will percolate through the system in sheet flow fashion and allow sediment to be retained and accumulated.

D. Remove and dispose of sediment deposits at the designated spoil area. If a spoil area is not indicated, dispose of sediment off-site at a location not in or adjacent to a stream or floodplain. Sediment to be placed at the spoil area should be spread evenly, compacted, and stabilized. Sediment shall not be allowed to flush into a stream or drainage way.

E. Maintain erosion and sediment control measures until final acceptance or until requested by the Engineer to remove it.

1.0.5. RUBBISH CONTROL

A. During the progress of the work, the Contractor shall keep the site and other areas for which it is responsible in a neat and clean condition and free from any accumulation of rubbish. The Contractor shall dispose of rubbish and waste materials of any nature and shall establish regular intervals of collection and disposal of such materials and waste. The Contractor shall also keep its haul roads free from dirt, rubbish, and unnecessary obstructions resulting from its operations. Disposal of rubbish and surplus materials shall be off the site in accordance with local codes and ordinances governing locations and methods of disposal and in conformance with applicable safety laws and the requirements of Part 1926 of the OSHA Safety and Health Standards for Construction.

B. It is important to maintain the construction site in a neat and satisfactory condition during the during construction and after construction has been completed. B. During construction, the Contractor shall regularly clean up all rubbish, surplus materials, and the adjacent areas affected. Unneeded construction equipment should be removed and all damages repaired so that the public and property owners will be inconvenienced as little as possible.

C. Any material or debris that has washed or flowed into or been placed in existing watercourses, ditches, gutters, drains, pipes structures, or elsewhere during the course of the Contractor's operations must be entirely removed and satisfactorily disposed of during the progress of the work, and the ditches, channels, drains, pipes, structures, and work, etc., should, upon completion of the Work, be left in a clean and neat condition.

D. The Contractor shall perform the cleanup work on a regular basis and as frequently as ordered by the City or designee. Basic site restoration in a particular area shall be accomplished immediately following the installation or completion of the required facilities in that area. Furthermore, such work shall also be accomplished, when ordered by the City or designee, if partially completed facilities must remain incomplete for some time period due to unforeseen circumstances.

E. Upon failure of the Contractor to perform periodic clean up and basic restoration of the site to the City or designee's satisfaction, the City or designee may, upon five (5) days prior written notice to the Contractor, employ such labor and equipment as it deems necessary for the purpose, and all costs resulting there from shall be charged to the Contractor and deducted from amounts of money that it may be due.

F. On or before the completion of the Work, the Contractor shall tear down and remove all temporary buildings and structures; remove all temporary works, tools, and machinery or other construction equipment; remove, acceptably disinfect, and cover all organic matter and material containing organic matter in, under, and around houses and other buildings; remove all rubbish from any grounds which has been occupied; and leave roads and all parts of the premises and adjacent property affected by work operations in a neat and satisfactory condition.

G. Upon completion of the Work, the Contractor shall remove from the sites of the subsurface explorations all plant, machinery, tools, equipment, temporary work, and surplus materials; remove all rubbish from any grounds which has been occupied; and leave the roads and all parts of the premises and adjacent property affected by work operations in a neat and satisfactory condition.

H. The Contractor shall thoroughly clean all materials and equipment installed, and, upon completion of the Work, deliver it undamaged and in fresh and new-appearing condition. All mechanical equipment should be left fully charged with lubricant and ready for operation.

I. The Contractor shall restore or replace, when and as directed by the City or designee, any public or private property damaged by work, equipment, or employees, to a condition at least equal to that existing immediately prior to the beginning of

operations. To this end, perform as required all necessary highway or driveway, walkway, and landscaping work. Suitable materials, equipment, and methods should be used for such restoration. The restoration of existing property or structures should be done as promptly as practicable as work progresses and should not be left until the end of the contract period.

1.0.6. SANITATION

A. Toilet Facilities: Fixed or portable chemical toilets shall be provided wherever needed for the use of employees. Toilets shall conform to the requirements of Part 1926 of the OSHA Standards for Construction.

B. Sanitary and Other Organic Wastes: The Contractor shall establish a regular daily collection of sanitary and organic wastes. Wastes and refuse from sanitary facilities provided by the Contractor or organic material wastes from any other source related to the Contractor's operations shall be disposed of away from the site in a manner satisfactory to the Engineer and in accordance with Laws and Regulations pertaining thereto.

1.0.7. CHEMICALS

A. Chemicals used on the work or furnished for facility operation, whether defoliant, soil sterilant, herbicide, pesticide, disinfectant, polymer, reactant, or of other classification, shall show approval of either the U.S. Environmental Protection Agency or the U.S. Department of Agriculture. Use of such chemicals and disposal of residues shall be in strict accordance with the printed instructions of the manufacturer.

1.0.8. ADDITIONAL ENVIRONMENTAL CONSIDERATIONS – AFFECTED SOIL

A. Excavation of affected soil shall be accomplished as described in Section 02220 “Excavation – General".

B. Affected soil must be placed on an impermeable barrier when temporarily stockpiled. All stockpile leachate or runoff must be collected for disposal in accordance with applicable federal, state, and local regulations. Soils designated for removal and disposal shall be prepared for shipment, transported, and disposed of in accordance with the requirements of this Section.

C. Affected soils shall be processed at a state licensed facility. These soils shall be transported and disposed of in accordance with federal, state, and local regulations. The Owner shall be responsible for all soil analyses required for transportation and disposal.

D. The Owner shall be responsible for testing soil which has been incinerated to certify the treated soil meets applicable federal, state, and local regulations for final disposal.

E. Free Petroleum Product

1. Some free petroleum products which may be partly or entirely diesel fuel or gasoline may be encountered during excavation or removal of affected soil. The Contractor shall remove free petroleum product, if necessary, when a separate floating phase greater than 0.10-inch thick is present as required by health and safety considerations. The free petroleum product shall be removed by skimming, pumping to an oil/water separator, or other approved methods. The Contractor shall take reasonable precautions to ensure that solids are not entrained in the pumping process.

2. Free petroleum products shall be transported and disposed by the Owner in accordance with federal, state, and local regulations. The Owner is responsible for any laboratory analyses required for disposal of the free petroleum products.

F. Transport and Disposal

1. Transport Regulations: The Owner shall be responsible for the loading, labeling, placarding, marking, weighing, and transport of all waste materials in accordance with the Florida Department of Transportation Regulations, and U.S. Department of Transportation Regulations. The Owner shall use only transporters that are licensed and competent to haul these wastes.

END OF SECTION

01581 PROJECT SIGNS

PART 1 – GENERAL 1.0.1

SCOPE OF WORK

A. Project Signs

1. City's Responsibility: To supply, erect and remove signs.

2. Contractor Responsibility: To maintain signs and restore site.

PART 2 – PRODUCTS 2.0.1

PROJECT SIGNS

A. The City will supply signs for this Project. These signs will be produced, installed, and at the end of construction, removed by City's forces. During the construction period, the Contractor shall maintain the signs in good condition, satisfactory to the Engineer. Should the signs be defaced, damaged or destroyed, the Contractor shall be responsible for their repair or replacement to the satisfaction of the Engineer and no extra compensation will be allowed.

PART 3 – EXECUTION 3.0.1

MAINTENANCE

A. Maintain signs and supports and repair all damages to the satisfaction of the Engineer.

B. Restore site to original condition upon completion of Project.

END OF SECTION

01600 MATERIALS AND EQUIPMENT SHIPPING, HANDLING, STORAGE AND PROTECTION

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. This shall include both the City and Contractor supplied material and equipment.

B. The Contractor is to inform all Subcontractors, suppliers, and manufactures of the requirements herein specified and shall include expenses for the following services in his costs for compliance with the requirements hereinafter specified.

1.0.2. PREPARATION FOR SHIPMENT

A. When practical, equipment shall be factory-assembled. The equipment parts and assemblies that are shipped unassembled shall be furnished with assembly plan and instructions. The separate parts and assemblies shall be factory matchmarked or tagged in a manner to facilitate assembly. All assemblies are to be made by the Contractor at no additional cost to the City.

B. Machined and unpainted parts subject to damage by the elements shall be protected with an application of a strippable protective coating, or other approved protective method.

C. Equipment shall be packaged or crated in a manner that will provide protection from damage during shipping, handling, and storage.

D. The outside of the package or crate shall be adequately marked or tagged to indicate its contents by name and equipment number, if applicable; approximate weight; state any special precautions for handling; and indicate the recommended requirements for storage prior to installation.

1.0.3. PACKING AND DELIVERY OF SPARE PARTS AND SPECIAL TOOLS

A. Properly mark to identify the associated equipment by name, equipment, and part number. Parts shall be packaged in a manner for protection against damage from the elements during shipping, handling, and storage. Ship in boxes that are marked to indicate the contents. Delivery of spare parts and special tools shall be made prior to the time associated equipment is scheduled for the initial test run.

1.0.4. SHIPMENT

A. All equipment and material shall be shipped with freight and shipping paid FOB jobsite.

B. The Contractor shall request a 7-day advance Notice of Shipment from manufacturers, and, upon receipt of such notice, provide the Engineer with a copy of the current

delivery information concerning equipment items and material items of critical importance to the project schedule.

C. Schedule delivery to reduce long term on-site storage prior to installation and/or operation. Under no circumstances shall equipment be delivered to the site more than one month prior to installation without written authorization from the Engineer.

D. Coordinate delivery with installation to ensure minimum holding time for items that are hazardous, flammable, easily damaged or sensitive to deterioration.

1.0.5. RECEIVING

A. The Contractor shall unload and record the receipt of all equipment and materials at the jobsite.

B. All costs for receiving, inspection, handling, storage, insurance, inventory control, and equipment maintenance for both for both the Contractor-supplied and the Citysupplied materials and equipment shall be included in the prices bid and no extra compensation will be allowed.

1.0.6. INSPECTION

A. Immediately upon receipt of equipment and materials at the jobsite, the Contractor shall inspect for completeness and any evidence of damage during shipment. Should there appear to be any shortage or damage, the Engineer shall be immediately notified; and the Contractor shall be fully responsible for informing the manufacturers and the transportation company of the extent of the shortage or damage. If the item or items require replacing or supplying missing parts, the Contractor shall take the necessary measures to expedite the replacement or supply of the missing parts.

1.0.7. HANDLING

A. Equipment and materials received for installation on this project shall be handled in accordance with the manufacturer's recommendations, and in a manner that will prevent damage.

B. Pipes shall always be handled with great care to avoid damage. In loading and unloading, they shall be lifted with cranes or hoists or slid or rolled on skidways in such

a manner as to avoid shock. Under no circumstances shall this material be dropped or allowed to roll or slide against obstructions. No cables, lifting arms, hooks or other devices shall be inserted into the pipe or fitting. All lifting, pulling or pushing mechanisms shall be applied to the exterior of the pipe. Pipe and other material shall be distributed along the right-of-way in advance of installation only to the extent approved by the Engineer. Pipe shall be stored on blocking or timber. It shall not be stored on rocks, boulders, or other supports which in the opinion of the Engineer are unsuitable. Such materials shall be so placed as to keep obstruction to traffic to a minimum.

1.0.8. STORAGE AND PROTECTION

A. Equipment and materials shall be stored prior to installation as recommended by the manufacturer. Generally, materials such as pipe shall be stored off the ground in approved storage yards or along the line of the proposed pipeline as approved by the Engineer. Items subject to the damage by the elements, vandalism, or theft shall be stored in secure buildings.

B. Store and protect products in accordance with the manufacturer's instructions, with seals and labels intact and legible. Storage instructions shall be studied by the Contractor and he shall review them with the Engineer. Instructions shall be carefully followed and a written record of this kept by the Contractor. Arrange storage to permit access for inspection.

C. Store loose granular materials on solid flat surfaces in a well-drained area. Prevent mixing with foreign matter.

D. Cement and lime shall be stored under a roof and off the ground and shall be kept completely dry at all times. All structural, miscellaneous and reinforcing steel shall be stored off the ground or otherwise to prevent accumulations of dirt or grease, and in a position to prevent accumulations of standing water and to minimize rusting. Beams shall be stored, the webs vertical. Precast concrete shall be handled and stored in a manner to prevent accumulations of dirt, standing water, staining, chipping or cracking. brick, block and similar masonry products shall be handled and stored in a manner to reduce breakage, cracking and spalling to a minimum.

E. All bolts, nuts, gaskets and other joint materials for use in pipelines shall be stored under cover.

F. Gaskets shall be stored in their original packing bags or containers, and care shall be exercised to keep them away from heat, light, oil gasoline or other petroleum products. Gaskets shall be kept clean at all times and not handled with greasy or dirty hands.

G. Plastic pipe and other elastomeric products shall be stored under cover to preclude damage by ultraviolet radiation even if the product has UV inhibitors in its compound.

1.0.9. INSURANCE

A. The Contractor's insurance shall adequately cover the value of materials delivered but not yet incorporated into the work. The Contractor and the City shall be named as coinsured insofar as their respective interests may appear. Proof of this coverage must be submitted to the Engineer at the time request for progress or partial payments.

1.0.10. INVENTORY CONTROL

A. Equipment and materials shall be stored in a manner to provide easy access for inspection and inventory control. The Contractor shall keep a running account of all materials in storage to facilitate inspection and to estimate progress payments for materials delivered but not installed in the work.

1.0.11. EQUIPMENT MAINTENANCE PRIOR TO THE CITYACCEPTANCE

A. Provide the required or manufacturer's recommended maintenance during storage, during the installation, and until such time as the City accepts the equipment for fulltime operation.

1.0.12. SALVABLE EQUIPMENT

A. Any salvable pipe, or other miscellaneous material or equipment removed during construction and not reused in the work shall be cleaned, hauled, and stored by the Contractor at his own expense, where directed by the Engineer, and shall remain the property of the City. All other material shall be disposed of by the Contractor at his own expense.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01700 PROJECT CLOSEOUT

PART 1 – GENERAL 1.0.1.

SCOPE OF WORK

A. Work Included: This section outlines the procedure to be followed in closing all contracts.

1.0.2. RELATED SECTION

A. Section 01340 “Shop Drawings, Product Data, and Samples”.

B. Section 01720 “Project Record Documents”.

C. City of Opa-Locka General Covenants and Conditions.

1.0.3. FINAL INSPECTIONS

A. The City will not issue preliminary punch lists. After final cleaning and upon written notice from the Contractor that he has inspected the work and it is a 100% completed, the Engineer will make a preliminary inspection with the City and the Contractor present. Upon completion of this preliminary inspection, the Engineer will submit to the Contractor a written final punch list of any which this inspection reveals as defective or incomplete work.

B. Upon receiving written notice from the Engineer, the Contractor shall immediately undertake the work required to remedy the defects and complete the work to the satisfaction of the City.

C. Each item in the punch list shall have a time duration agreed upon by both parties which shall not exceed 10 calendar days. Punchlist items may be eliminated individually from the list when approved by the Engineer.

D. Should the Engineer find all work satisfactory at the time of the inspection, the Contractor will be allowed to make application for final payment in accordance with the provisions of the General Covenants and Conditions.

1. If the Contractor fails to complete any item of work within a time period equal to 100% of the agreed upon duration of time for all individual items, the Engineer will notify the Contractor in writing specifying the conditions pertaining thereto and

directing the Contractor to comply with his directive. If the Contractor has not corrected such condition within 5 days of such notice, it shall be sufficient grounds for the Engineer to order the subject items discontinued and have them completely remedied in a timely manner at the expense of the Contractor.

2. No final estimate shall be issued by the Engineer until the Engineer has assured himself that the punch list has been 100% finished and all other related documents are submitted.

1.0.4. FINAL SUBMITTALS

A. The Contractor shall submit all closeout documents required by the Contract Documents, including but not limited to the following.

1. Warranties and guarantees

2. Test reports, including but not limited to:

a. Concrete test results certified by a licensed testing laboratory

3. Inspection and acceptance records

4. Operating and maintenance manuals

5. Project record documents

6. Permit closeout documentation

1.0.5. FINAL PAYMENT APPLICATION

A. Final payment application must include:

1. Final releases of liens from all subcontractors and suppliers

2. Final release from Contractor

3. Final consent of surety bond

4. The Contractor must obtain final Greenspace Management approval for installed landscaping

5. Upon receipt of Final Payment, the Contractor shall execute the Form of Final Receipt, if applicable

1.0.1. GUARANTEES, BONDS, AND AFFIDAVITS

A. No Contract will be finalized until all guarantees, bonds, certificates, licenses, roofing warranty, C.O. and affidavits required for work or equipment as specified are satisfactorily filed with the Engineer.
B. The Contractor shall comply with the Public Records Laws of the State of Florida.

1.0.2. ACCESSORY ITEMS

A. All Contractors furnishing and/or installing equipment and spare parts on this project shall provide to the City, upon acceptance of the equipment, all special accessories required to place each item of equipment in full operation.

PART 2 – PRODUCTS

END OF SECTION

01710 CLEANING

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. This Section specifies the maintenance of the work site in a clean, orderly, hazard free condition.

1.0.2. QUALITY ASSURANCE

A. Conduct cleaning and disposal operations in accordance with local ordinances and anti-pollution laws. Rubbish, volatile wastes, and other construction wastes shall be neither burned nor buried on the work site, and shall not be disposed of into storm drains, sanitary drains, streams or other waterways.

B. Final cleaning shall be accomplished either by workmen experienced in cleaning operations or by professional cleaners.

PART 2 – PRODUCTS

1.0.1. ON SITE WASTE CONTAINERS

A. Provide on-site waste containers for collection of waste materials, debris and rubbish. See Section 01100 “Special Project Requirements”, Subsection 1.0.4. regarding Safety Requirements for environmentally hazardous materials.

1.0.2. CLEANING MATERIALS

A. Cleaning materials shall be as recommended by the manufacturer of the surface to be cleaned.

PART 3 – EXECUTION 1.0.3.

SAFETY REQUIREMENT

A. Maintain work site in accordance with local ordinances and anti-pollution laws applicable to work site cleanliness and in a neat, orderly and hazard-free condition until final acceptance of the work. Catwalks, accessible underground structures, work site sidewalks and walkways adjacent to the work site shall be kept free from hazards caused by construction activities.

B. Store volatile wastes including rags in covered metal containers and remove from work site daily.

C. Prevent accumulations of wastes which create hazardous conditions.
D. Artificially ventilate spaces which are not naturally ventilated when volatile or noxious substances are present in those spaces.

1.0.4. CLEANING DURING CONSTRUCTION

A. The Contractor shall at all times during the execution of this Contract keep the work site free and clear of all rubbish and debris. As soon as the work is completed, the accumulated rubbish or surplus materials shall be promptly removed. The Contractor shall also restore in an acceptable manner all property, both public and private, which has been displaced or damaged during the prosecution of the work and shall leave the site and vicinity unobstructed and in a neat and presentable condition.

B. In the event of delay exceeding two (2) days after written notice is given to the Contractor by the Engineer to remove such rubbish or materials or to restore displaced or damaged property, the Engineer may employ such labor and equipment as he may deem necessary for the purpose, and the cost of such work, together with the cost of supervision, shall be charged to the Contractor and shall be deducted from any monies due him. The Project shall not be considered as having been completed until all rubbish and surplus materials have been removed and disposed of properly.

C. Perform cleaning every workday for duration of the work. Structures, grounds, and areas of the work site, access roads and adjacent public and private properties shall be maintained free from accumulations of waste materials and rubbish caused by construction operations on the work site. Place waste materials and rubbish in on site containers or as otherwise approved. Unneeded construction equipment shall be removed and all damaged repaired so that the public and property owners will be inconvenienced as little as possible.

D. Remove or secure loose material on open decks and on other exposed surfaces at end of each day's work or more often to maintain work site in hazard-free condition.

E. Prevent dislodgement of materials due to wind and other forces. Wet down dry materials and rubbish to lay dust and prevent blowing dust. Cover or wet excavated material leaving and arriving at the site to prevent blowing dust. Clean the public access roads to the site of any material falling from the haul trucks.

F. Empty on-site waste containers whenever necessary so that trash overflow does not occur. Legally dispose of contents at either public or private dumping areas.

G. Control the handling of materials, debris and rubbish; do not drop or throw from heights.

H. Immediately remove spillages of construction-related materials from hauling routes.

1.0.5. FINAL CLEANING

A. In addition to the cleaning performed above, in preparation for final inspection, remove grease, dust, dirt, rust stain from surfaces. Remove labels, fingerprints and other foreign materials from exposed exterior finished surfaces. Flush down all valve boxes, and areas leaving such surfaces clean of all sand, etc.

B. In preparation for final acceptance or occupancy, conduct final inspection and cleaning of exposed exterior surfaces, and of concealed spaces.

C. Maintain cleaning operations until project has been finally accepted.

END OF SECTION

01711 FINAL ACCEPTANCE

PART 1 – GENERAL

1.0.1. FINAL CLEANUP

A. At the completion of work and immediately prior to final inspection, cleaning of the entire project shall be accomplished according to the following provisions:

1. All temporary utility drops, fencing, and water supply outlets shall be removed.

2. All plant gate identification signs, barricades, tools, rubbish collection receptacles and other such items shall be removed by the Contractor.

3. All remaining earthen stockpiles of excess excavated material shall be graded to provide gentle slopes to prevent erosion as directed by the Engineer.

1.0.2. FINAL INSPECTION

A. Following final cleanup, the Contractor shall request an inspection by the Engineer, and Engineer of Record. If the Engineer accepts the work as being complete, then Final Acceptance shall be given to the Contractor in accordance with Contract.

1.0.3. FINAL ACCEPTANCE

A. Following successful final inspection, the Engineer shall approve the work as being complete and provide final acceptance of the work in accordance with the Contract.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

01720 PROJECT RECORD DOCUMENTS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. The Contractor is responsible for maintaining one record copy of:

1. Record Drawings. Record Drawings as used herein shall mean a drawing that reflects construction or design changes.

2. Record Specifications.

3. Addenda.

4. Change Orders and other modifications of the Contract.

5. Engineer's written orders or instructions.

6. Approved Shop Drawings (including product data and samples).

7. Field test records.

8. Construction photographs.

9. As-built dimensions and elevations as recorded on a daily basis by the Contractor's Professional Surveyor and Mapper (PSM) licensed to practice in the State of Florida.

10. Field Book. Survey Field notes taken by the PSM's survey crew (copy provided to the Engineer on a monthly basis)

11. The records listed above are always to be made available for the Engineer's review for all projects.

B. Vertical Datum: Nationwide, surveys and as-builts are in the process of conversion to NAVD 88 from the NGVD 1929. The City will accept NAVD 88 datum with a conversion factor on each page. The Florida Department of Transportation is using the NAVD 88 datum. Projects within FDOT roadway limits shall either use NAVD 88 datum or provide a conversion factor on each page if the NGVD 1929 datum is used. For projects using City of Miami datum provide a conversion factor on each page to the NAVD 88 datum.

1.0.2. MAINTENANCE OF DOCUMENTS AND SAMPLES

A. Maintain documents in a clean dry, legible, condition and in good order. Do not use record documents for construction purposes.

1.0.3. REQUIRED MEASUREMENTS

A. Set-up and Verification: The Contractor's PSM is required to recover the design baseline and verify the elevations and coordinates on a regular basis as needed.

B. The Contractor is required to have a level instrument setup next to the construction site in order to control the vertical alignment of the pipe installation prior to trench backfilling. The level shall be setup daily for use by the surveyor, Contractor's foreman and City Engineer/Inspector. Any underground construction work that does not have a level properly setup will be stopped by the City Engineer/Inspector.

C. The Contractor is required to have the PSM's survey crew record the field information on a daily basis when there is underground pipe installation. The survey crew shall be on-site as needed to record and verify the information before it is covered. Any underground construction work that does not have the information recorded by a survey crew will be stopped by the City Engineer/Inspector. The Engineer/Inspector has the authority to order re-excavation of work that was covered without accurate survey measurements.

D. Field Book Information: The PSM is required to have his crews make daily visits to the Project site during underground pipe installation work to perform field measurements of the Contractor’s daily installations. This information shall be recorded in field books. Copies of the field notes are required to be provided to the Construction Manager on a monthly basis. The PSM's field notes shall be submitted to the City along with partial as-built plans (signed and sealed) on a monthly basis as a condition of payment.

1.0.4. RECORDS

A. During the life of the Contract the Contractor shall retain the services of a PSM who shall maintain daily records of the installation, including all deviations from Plans and Specifications and for the purposes of preparing and submitting to the City an asbuilt/record survey in compliance with:

1. Florida Statutes Chapter 472.027.

2. Florida Administrative Code Chapter 5J-17.050, 5J-17.051 and 5J-17.052.

3. As further required by these Contract Documents.

B. Measure and Record all information for all projects concurrently with constructions progress.

1. The services of the PSM for the Project shall be retained by the Contractor prior to the issuance of the "Notice to Proceed." A letter from the PSM shall be provided at the Preconstruction Meeting indicating that the Contractor has secured his services to perform all survey work for the duration of the project and prepare final as-builts plans.

C. Redline Drawings:

1. The Contractor shall maintain full size (22-inches by 34-inches) redline drawings to reflect the "record" items of work as the work progresses.

2. At a minimum, the redline drawings shall be reviewed on the 20th working day of every third month, or more often, as deemed necessary by Consultant, after the month in which the final Notice-to Proceed is given as well as on completion of Work. Failure to maintain the redline drawings up-to-date shall be grounds for withholding monthly progress payments until such time as the redline drawings are brought up-to-date.

3. Redline drawings shall be accessible to the City or designee at all times during construction period.

4. The cost of maintaining record changes, and preparation of the as-built record drawings shall be included in the unit prices bid for the affected items.

D. Label each document “PROJECT RECORD” in neat large printed letters.

1. Do not conceal any work until as-built information is recorded by the Contractor’s surveyor and, if so required, by the City surveyor.

2. All locations for future connections or tie-ins shall be left unburied and uncovered until the Contractor’s PSM measures and records the as-built information.

a. All as-built and inspector information is to be made available to the Engineer daily for inclusion in the City records.

3. Restrained pipe, end line valves, thrust blocks shall be left uncovered for the last complete length. In line valves and tees shall be left exposed for one length on both sides plus the face end. Measure and record the elevation, horizontal and vertical alignment, and inclination for these items.

4. For all projects, the Contractor’s PSM shall maintain exact and extensive records of any deviations from the plans or specifications. These records shall be satisfactory to the Engineer, who’s decision shall be final, and enough to allow the production of accurate as-built plans which correctly and completely portray the work as constructed.

5. For all projects, the Contractor's PSM shall record data as follows during the entirety of construction:

    a. For facility (e.g. a water or sewage plant, pumping station, or similar site if so, designated by City) projects, record as-built dimensions and elevations every twenty-five feet or portion thereof along the pipeline and at every abrupt change in direction of the new line.

    b. For pipeline projects, constructed in the public right-of-way dimensions and elevations every one-hundred feet or portion thereof along the pipeline and at every horizontal and vertical change in direction.

    c. In all cases record locations and elevations for each valve, fitting, service line, fire hydrant, water sampling point, utility poles adjacent to the proposed line, overhead wires crossing the ditch line (approximate height above grade) and other appurtenances along the pipeline.

    d. The identity, dimensions, location and elevation of any existing utility crossing the proposed line and so immediately adjacent to the new line as to be exposed by the excavation shall also be recorded. Locate, excavate expose and record the same data for any utility shown in the plans whose proximity to the proposed pipeline could affect the certification requirements of the new installation. Note that in instances of a very wide ditch due to ground conditions the recording of data for adjacent, paralleling, utilities shall only be required for lines which come within three (3) feet of the outside of the pipe being installed unless otherwise ordered by the Engineer who's decision shall be final.

    e. Without exception, for all thrust blocks, the top elevation, outer dimensions, thickness of the block, length and location of any sheet piling, if used, shall be recorded by the Contractor's PSM.

    f. Specific locations and elevation of equipment, the buildings and miscellaneous items installed inside them shall be recorded as applicable and as required by the Engineer.

    g. Without exception, where the substitution of another piece of equipment for that shown on the plans has been allowed, the footprint, clearance and elevation dimensions shall be recorded by the Contractor's PSM and these changes shall be accurately and thoroughly portrayed on the as-built plans.

    h. The Contractor's Licensed PSM shall prepare from the field data, as-built record drawings showing correctly, completely and accurately the installation, embracing all changes and deviations made during construction, including all construction variances, to reflect the work as it was constructed.

    i. Record Drawings shall be prepared as specified hereinafter.

1) Record Drawings shall be prepared as specified herein.

2) Record Drawings and five (5) copies shall be signed and sealed by the PSM and shall be submitted to the City for the Engineer's review within ten (10) calendar days following the completion date of successful pressure testing of all mains and appurtenances under this Contract.

j. If the Engineer determines that the drawings are not acceptable, they will be returned to the Contractor with a cover letter noting the deficiencies and/or reasons for the disapproval. Contractor shall have ten (10) calendar days to correct all exceptions taken by the Engineer and resubmit as-built record drawings to the Engineer for final acceptance.

1.0.5. DRAWINGS

A. During the life of the Contract, maintain records of all deviations from the plans and specifications and prepare therefrom As-Built Record Drawings showing correctly and accurately all changes and deviations made during construction to reflect the work as it was actually constructed. It is the responsibility of the Contractor to check the AsBuilt Record Drawings for errors and omissions prior to submittal to the City and certify in writing that the As-Built Record Drawings are correct and accurate, including the actual location of all piping including building exposed and internal piping, electrical/signal conduits in or below the concrete floor, Indicate the size, depth and voltage in each conduit.

B. Legibly Mark to Record Actual Construction: All data as previously specified for all installations by the Contractor's . For on-site structures and facilities work the Contractor's Florida Registered Land Surveyor shall record:

1. Depths of various elements of foundation in relation to datum plane.

2. All exposed and underground piping and ductwork with elevations and dimensions and locations of valves, pull boxes, etc. Changes in location, Horizontal and vertical locations of underground utilities and appurtenances, measured from permanent reference points, plant survey grids, property lines and similar.

3. Location of internal utilities and appurtenance concealed in the construction shall be referenced to visible and accessible features of the structure. Air conditioning ducts with locations of dampers, access doors, fans and other items needing periodic maintenance.

4. Field changes in dimensions, locations and details.

5. Changes made by Engineer's written instructions or by Change Order.

6. Details not on original plans.

7. Equipment and piping relocations.

8. Major architectural and structural changes in structures, including tanks.

9. Architectural schedule changes according to Contractor's record and shop drawings.

10. Record drawings shall be prepared as specified hereinafter.

C. Specifications and Addenda: Legibly mark each section to record the following:

1. Manufacturer, trade name, catalog number and supplier of each product and item of equipment installed.

2. Changes made by Engineer's written instructions or by Change Order.

D. Approved Shop Drawings: Provide record copies for system diagrams and drawings together with each element of process equipment, piping, electrical system and instrumentation system.

1.0.6. SUBMITTALS

A. Accompany submittal with transmittal letter in duplicate, containing:

1. Date

2. Project title and number

3. Contractor's name, address and phone number

4. Title and number of each Record Document

5. Contractor signature or of its authorized representative.

B. Record Drawings with five blue line copies which have been signed and sealed by the surveyor shall be submitted to the City for the Engineer's review. Drawings shall conform to recognized standards of drafting and the minimum technical standards as set forth by the Board of Professional Surveyors and Mappers, shall be neat, legible and on 24-inch by 36-inch Mylar. These materials shall be submitted to the City for the Engineer's review as a prerequisite for payment during the course of construction as previously specified and final, complete sets of documents within ten calendar days following the completion date of successful testing of all mains, equipment and

appurtenances under this Contract. Final payment will not be made until the set of asbuilt record drawings and five sets of blue-line prints have been approved and accepted by the Engineer.

C. In cases where a portion of a pipeline system or parts of a process system are put into service, the above conditions shall apply for the in-service portion and monthly payments shall be withheld until the as-built drawings are accepted by the Engineer.

D. As-Built Record Drawings, as prepared by the Contractor's Florida Registered Land Surveyor and submitted by the Contractor, shall comply with following criteria and standards, and as specified in Section 01725 “As-built Drawings”:

1. Title block must show the Contract or Project Title (as applicable); Contract number; City project number (if applicable); Contractor's name; Engineer of Record's name; Surveyor's name and address; date; location; and where appropriate to the work, size and type (i.e. water main, sanitary gravity main, sanitary force main) of main.

   a. Baselines or centerlines must be tied to section corners, monument line and right-of-way lines.

   b. Pipeline must be tied to baseline or centerline with stations and offsets.

   c. Baselines or centerlines must show bearings or deflection angles, or delta, radius, chord and arc length for curves.

   d. Show all horizontal curve data, including point of curvature (PC) and point of tangency (PT) stations or radial bearing.

   e. Stationing must be the same as shown on construction drawings and must be tied to Section corners, centerline intersections and all other pertinent control points within the project. All such pertinent points shall have their stationing shown and where there is dual stationing for a point, both stations shall be called out.

   f. Identify all streets by name or number and show stationing at all intersecting streets.

   g. Refer to vertical datum plane and identify the location, elevation and source supplying the benchmark used.

   h. Tie easement lines to survey baseline or platted centerline and rights-of-way.

   i. Show horizontal and vertical locations of all pipes, deflections, or any significant change of direction.

j. Elevations of natural ground or pavement over the pipeline must be shown at each position where the pipe elevation is shown and at intervening high and low points.

k. Show all invert and bottom elevations of culvert piping. Show all invert and bottom elevations together with pipe size, and where it can be determined, pipe material, for existing structures having pipes which cross the culvert being constructed.

l. Locations and elevations together with diameter and material of all pipes.

m. Coordinate values used inside plants shall be the local, City established coordinate systems referenced to the property boundary.

E. Update of Construction Documents:

1. All "proposed" information shall be removed from as-builts, leaving only "as-built" information reflected in drawing.

2. Upon completion of the Work, the Contractor shall furnish the Consultant the asbuilt record drawings. Pay request quantities must match as-builts record drawings. The completed as-built record drawings shall be delivered to the Consultant at least 48 hours prior to final inspection of the work. The final inspection will not be conducted unless the as-built record drawings are in the possession of the Consultant.

3. The City reserves the right to have a Registered PSM perform spot checks of asbuilt information provided by the Contractor. The City shall pay the costs of such survey work when the work is performed by a City of Opa-Locka Contractor. Should any spot checks indicate that any portion of the installation does not comply with the Contract Documents, a recheck shall be performed by another (or third) Registered PSM or agreed to by both the City and Contractor at the Contractor's expense. If the recheck confirms the first check, that portion of the work shall be removed and replaced or modified at no additional cost to the City until satisfactory compliance is attained.

F. Certification: The Contractor shall certify on as-built record drawings all other actual constructed details and information as may be required by the City including but not limited to:

1. Pipeline must be identified by type of pipe material and manufacturer.

2. Types and sizes of sheeting and piling together with measured and complete; location, dimensional and elevation data on any pile caps, tie backs, anchors, whalers or other appurtenant structures left in place.

26.0 Digital Records: The City reserves the right to require submittal of as-built drawings in AutoCAD format and in PDF format. The AutoCAD file shall be compatible with the City's system and capable of being uploaded without external reference files. Graphical information contained on electronic media shall be the same as provided on plan sheets. Digital Records shall be delivered to the office of the City Engineer, Engineering Division, Opa-Locka Public Works Department at 12950 NW 42 Ave in OpaLocka, FL 33054.

G. . A letter of transmittal shall be provided, containing a list of all files and data being provided.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION 01725 AS-BUILT DRAWINGS

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. This section shall serve to set out guidelines for as-built drawings submitted to City of Opa-Locka.

B. To ensure that as-built drawings may serve their intended purposes now and in the future, they should be prepared with consideration for quality. The City of Opa-Locka Public Works Department will consider the following elements during as-built during review to ensure the quality of the as-built drawings.

C. The Contractor is required to have a survey crew record the field information on as necessary when there is underground pipe installation. The Florida Licensed Professional Surveyor and Mapper shall be responsible for providing measurements accurate to the standard of practice established in Chapter 5J-17.050 to 5J-17.052 of the Florida Administrative Code, pursuant to Section 427.027, Florida Statutes. The approved final record as-built shall be used as part of the City of Opa-Locka's GIS and Record System.

D. The Contractor's PSM shall maintain exact and extensive records of any deviations from the design plan set.

E. As-built drawings shall be prepared in a professional manner consistent with common engineering standards for layout, lettering, and line-work.

F. As-built information shall be portrayed in a manner that is readily understandable by someone not familiar with the specific job.

G. Preparer shall endeavor to present as-built information clearly without "cluttering" the drawing.

H. As-built drawings shall include all disciplines in the Bid Set drawings.

1.0.2. CRITERIA FOR AS-BUILTS

A. Horizontal: All horizontal control and locations shall be tied to the Florida State Plane Coordinate System, East Zone (NAD 83/2011).

B. Vertical Datum: All vertical control and elevations shall be referenced to North American Vertical Datum of 1988 (NAVD 1988).

1.0.3. AS-BUILT REVIEW PROCESS

A. SUBMITTAL PACKAGE

The following shall be submitted as one package in order to be accepted for initial review by the Inspections Unit.

1. Initial submittal (prior to performing field testing) shall include the following: 1 set of signed and sealed as-built (DWFX file), signed and sealed field book information, DWFX file of the as-built and the City Minimum Requirements As-built Plan Submittal.

2. Final submittal shall consist of corrected As-Built Documents in digital format (AutoCAD and DWFX files) and the following sets of signed and sealed as-builts sets:

Five (5) sets.
Signed and Sealed Copy of Field Book Information.
As-builts signed and sealed by the Florida Licensed Professional Surveyor and Mapper and/or Engineer of Record must comply with format requirements.

B. CITY PROCESSING.

1. The City will require Ten (10) business days to perform the as-built review.

2. As-builts will be initially checked by the responsible Field Inspector to verify that they are an accurate representation of the work as installed and that the job as shown is complete and in accordance with the permitted plans.

3. Following the Field Inspector's review, as-builts will be reviewed in depth by the AsBuilt Reviewer to ensure compliance with these standards. The Reviewer will also check the complete package which includes the Bill of Materials.

C. PUNCH LIST

1. Punch List items may be generated from the City initial review. Successive reviews are solely for the purpose of ensuring that original punch list items are completely and correctly done to obtain a final As-built acceptable to the City.

2. Successive punch list items may only be added to correct a problem resulting from submitter's efforts to comply with the original punch list. No new original punch list item(s) may be added. Submitter shall be required to make these successive changes.

3. In the case of an oversight on the part of the As-built Reviewer, punch list items may be added to the list or requested of the submitter after the valid time for such items. The City requires that all corrections be made as a condition of accepting the final as-builts.

4. Marking of the drawings shall be kept current and shall be done at the time the material and equipment are installed. Annotations to the Contract Documents shall be made with an erasable colored pencil conforming to the following color code:

Additions - Red
Deletions - Green
Comments - Blue Dimensions
- Graphite*

*Legibly mark to record actual depths, horizontal and vertical location of all above and below grade structures, underground pipes, valves, raceways, cables, and appurtenances referenced to permanent surface improvements.

1.0.4. AS-BUILTS SUBMITTAL REQUIREMENTS

A. GENERAL REQUIREMENTS

1. Prior to final acceptance, two (2) copies of as-built drawings certified by a Florida Registered Land Surveyor shall be provided to the City for approval, acceptance and certification by the “Engineer of Record”, together with a copy of digital media producing such As-Builts.

2. At minimum, the As-Built must show Station numbers and horizontal offsets from the Base Line and Right-of-Way lines on a Plan scaled 1”=20 ft. for all fittings, valves and changes in horizontal alignment, and a profile with a vertical scale of not less than 1” = 2 ft. with elevations at all horizontal and vertical changes in alignments and grade profile elevations at approximately 50 ft.

3. As-Built plans and profiles must also show all abandoned pipes and plugs that were modified within the project limits and actual elevation/description of all other utilities crossing or encountered in the vicinity of the new water mains. The paper size of the drawings shall be 22”X 34”.

4. Any deviations from the design plans must be approved by the City.

B. QUALITY OF AS-BUILTS

To ensure that as-builts may serve their intended purposes now and in the future, they should be prepared with consideration for quality. The As-built Reviewer will consider the following elements to ensure the quality of as-builts.

1. Accuracy: The Contractor is required to have a survey crew record the field information on as necessary when there is underground pipe installation. The Florida Licensed Professional Surveyor and Mapper shall be responsible for providing measurements accurate to the standard of practice of the Florida Administrative Code. The approved final record as-built shall be used as part of the City GIS and Record System.

2. Field Changes: The Contractor’s PSM shall maintain exact and extensive records of any deviations from the design plan set.

3. Appearance: As-builts shall be prepared in a professional manner consistent with common engineering standards for layout, lettering and line-work.

4. "Understandability": As-built information shall be portrayed in a manner that is readily understandable by someone not familiar with the specific job.

5. Clarity: Preparer shall endeavor to present as-built information clearly without "cluttering" the drawing.

1.0.5. AS-BUILT CONTENT REQUIREMENTS – ALL DRAWINGS

A. All drawings submitted to the City of Opa-Locka Public Works Department shall include at a minimum the following, where applicable.

1. Centerlines, right-of-way lines, right-of-way dimensions, street widths and names, with matching plat, if applicable, subdivision name, phaseline, and number. (Phasing to be nearest valve and manhole in limits of phase area).

2. Baselines, monuments, monument lines, lot lines, parcel lines.

3. All involved lots and blocks shown and correctly designated (to match plat).

4. All control lines identified (i.e., centerline, section line, etc.). Identify all streets by name or number and show stationing at all intersecting streets.

5. Baseline shall be tied to centerlines, boundary lines, section corners, or to monument lines or to right-of-way lines. Baselines must show bearings or deflection angles, or delta, radius, chord, and arc length for curves.

6. Pipeline installation shall be tied to a baseline that easily identified on the existing or proposed right-of-way. Baseline shall not be on top of the main except for gravity sewers installed on centerlines.

7. Show all existing water, sewer and/or stormwater mains as a broken line (i.e., dashed). Show proposed utility as dark solid line. Also, identify respective utility pipe, size, and material type. Existing or proposed mains 20-inches in diameter and greater, shall be shown as two lines (i.e., double line) of the line type as stated.

8. Show all horizontal and vertical curve data, including point of curvature (PC) and point of tangency (PT) stations or radial bearing.

9. Easements:

    a. Easements type and size shall be clearly shown with size and tied to centerline. The easements shall be separate for water, sewer, force main, and pump stations.

    b. Existing Official Record Book (ORB) or other record information must be shown.

    c. Easement lines shall be tied to the centerline of the main.

10. Separate profile for each segment and utility type (water, sanitary sewer, stormwater, etc.).

11. Every utility (water, sewer, sewer laterals, water services, gas, electric, stormwater, telecommunication, duct banks, etc.) encountered and/or crossing drainage, water, or sanitary sewer facilities (whether it is a conflict or has sufficient clearances) shall be located, both horizontally and vertically. The clearance between the facilities

horizontal and vertical, shall be noted. For instance, if a 2inch gas main crosses over the top of a 6-inch potable water main, the bottom elevation of the gas main shall be noted and the top of the water main shall be noted. The difference between the two facilities will be the clearance between the two facilities. Parallel mains shall note the clearance between the outside of the mains. It shall be the Contractor's responsibility to note these crossings on a daily basis and ensure that this information is reflected on the As-Built Drawing plan set. Crossings will not require state plane coordinates.

12. All utilities shall be stationed and all facilities labeled. Drawings shall show stations for all services. Lengths and distances for service runs shall also be given.

13. Clearly show and label what is new and what is existing at the tie-in points.

14. Show all outlets, stub-outs, sewer lateral, water service and any other relevant information. Identify the size, material, length, direction, and elevation (top of pipe for water, sewer, and stormwater and force mains, invert gravity sewer and stormwater mains).

15. Elevations of natural ground or pavement over pipelines shall be shown at each position where the pipe elevation is shown at least every 100 feet.

16. Manhole rim and valve box manhole rim elevations shall be shown.

17. Show all invert and bottom elevations in manholes and valve vaults or boxes. Show all invert and bottom elevations together with pipe size, and where it can be determined, pipe material, for existing structures having pipes which cross the pipeline being constructed.

18. Locations, elevations, and size of all casings shall be shown.

19. Locations and top and bottom elevation of all sheeting, including sheeting left in place, shall be shown.

20. Provide State Plane Coordinate values for all visible features such as valves, manholes, maintenance access structures, fire hydrants, water meters, cleanouts, and backflow preventers. Also provide State Plane Coordinate values for existing valves and manholes at points of connection or closest to the point of connection and the point of connection itself.

21. Lines that are abandoned in place shall be located during construction and clearly identified (dashed and bold line type) on the drawings to include cut and plug locations and pipe material.

1.0.6. AS-BUILT CONTENT REQUIREMENTS – PAVING, GRADING, AND DRAINAGE DRAWINGS

A. Paving, grading, and drainage drawings shall include at a minimum the following, where applicable.

1. All existing and proposed utilities in the public right-of-way shall be shown on the paving, grading, and drainage plans. All utilities shall be identified and located by dimension, horizontally and by elevation, and their materials of construction shall be noted to the extent determinable without excavation.

2. Cross-section(s) and/or typical section(s) of proposed road and drainage construction, shall show dimensions, materials, and purposes of all existing (to remain) facilities as well as all proposed facilities within the right-of-way.

3. Pavement marking and signing drawings shall include sign locations.

B. All rock elevations for parking lot, roadways, and swale areas shall include at a minimum the following.

1. Rock elevations at all high and low points, and at enough intermediate points to confirm slope consistency and every 50 feet for roadways.

2. Rock elevations shall be taken at all locations where there is a finish grade elevation shown on the design plans.

3. All catch basin and manhole rim elevations shall be shown.

4. Elevations around medians will also be required.

5. Elevations shall be taken on all paved and unpaved swales prior to placement of asphalt and/or topsoil/sod, at enough intermediate points to confirm slope consistency and conformance to the plan details.

C. Retention area elevations shall be taken at the bottom of the retention area and at the top of bank. If there are contours indicated on the design plans, then they shall be asbuilt as well.

1.0.7. AS-BUILT SURVEY

A. An as-built survey will be required upon completion of all construction projects that lay within City-owned properties, including, but not limited to, City rights-of-way, easements, parcels, and submerged lands, etc. All improvements, including but not limited to, landscaping will be required.

B. As-built surveys shall be prepared in accordance with FAC Chapter 5J-17.051 and all applicable Standards of Practice.

C. When performing as-built surveys, the surveyor and mapper shall obtain field measurements of vertical or horizontal dimensions of constructed improvements so that the constructed facility can be delineated in such a way that the location of the construction may be compared with the construction plans.

D. As-built survey maps shall clearly show by symbols, notations, or delineations, those constructed improvements located by the survey.

E. The vertical and horizontal accuracy of the measurements made shall be such that it may be determined whether the improvements were constructed consistent with planned locations.

F. The Surveyor shall be responsible for the location, establishing or replacement of Vertical and Horizontal Survey Control Points.

G. Complete topographic and boundary survey for the project shall be signed and sealed by the Florida Licensed Professional Surveyor and Mapper as part of the as-built plans. All information required of a boundary survey shall be contained on the as-built plans to include the legal description of the site, easements and rights-of-way abutting the site and location of all surface facilities recorded by a PSM. All utilities within the property shall be properly shown, along with their associated elevation and clearance.

1.0.8. CERTIFICATION

A. All as-built drawings are to be certified to the City of Opa-Locka Public Works Department and all sheets are to be signed and sealed as previously outlined.

B. As-builts shall include a signed, sealed, and dated certification statement by the responsible Florida Licensed Professional Surveyor and Mapper that all measurements were recorded under his direction and are accurate.

C. Any civil drawings that are not surveyed shall also be included in the set and shall be signed and sealed by the Engineer of Record.

D. As-builts that contain electrical, mechanical, or structural work shall also be signed and sealed by the Engineer of Record to indicate that the work was constructed as designed.

E. It is the responsibility of the Contractor to check the as-builts for errors and omissions prior to submittal to the City and certify in writing that the as-builts are correct and accurate, including the actual location of all piping including building exposed and internal piping, electrical/signal conduits in or below the concrete floor, indicate the size, depth, and voltage in each conduit.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

NOT USED

END OF SECTION

PART 1 – GENERAL

1.0.1. SCOPE OF WORK

A. Prepare Operating and Maintenance (O & M) Manual covering all equipment and systems provided under this project.

B. Instruct the City's personnel in the operation of equipment and maintenance provided under this project.

C. This Section covers the services of the manufacturer's representatives and special coordinating services required of the Contractor that shall apply during construction, facilities startup, and training of the City's personnel for facilities operation.

D. The Contractor shall inform all Subcontractors and manufacturers of the requirements herein and include the following services in his costs for the work. Where a minimum amount of time is stated in the Technical Specifications for manufacturer's services, any additional time required to perform the specified services shall be at no additional cost to the City.

1.0.2. SUBMITTALS

A. Not later than 30 days after the start of Construction, submit for review and approval by the Engineer two copies of a preliminary draft of the O&M manual, showing the proposed format and an outline of the contents.

B. Throughout construction, prepare O&M sections for equipment and systems when such equipment and systems, and shop drawings and technical data therefor, are approved. Within 30 days following receipt of the Engineer’s approval of the final shop drawing submittal, submit, in duplicate, draft of complete O&M Manual for review and approval of Engineer.

C. Within 30 days after receipt of Engineer’s review comments, make required revisions and submit in final form two copies of the O & M Manual for final approval.

D. The Contractor shall inform all Subcontractors and manufacturers of the requirements herein and include the following services in his costs for the work. Where a minimum amount of time is stated in the Technical Specifications for manufacturer's services, any additional time required to perform the specified services shall be at no additional cost to the City.

1.0.3. FORM, FORMAT AND SUBMITTALS CONTENTS

A. Operating and maintenance manuals will be used for use by the City personnel in the operation and maintenance of the various systems.

B. The City shall be furnished with one set of any special tools required for servicing for each type of equipment actually furnished. These tools shall be provided to the Pump Station Maintenance Division.

C. Prepare data in the form of an instructional manual for use by the City personnel.

D. Format:

1. Size: 8½ in. x 11 in.

2. Paper: 20-pound minimum, white, for typed pages.

3. Text: Manufacturer's printed data or neatly typewritten.

4. Drawings:

a. Provide reinforced punched binder tab, bind in with text.

b. Fold larger drawings to the size of the text paper.

5. Provide fly-leaf for each separate product, or each piece of operating equipment.

a. Provide typed description of product, and major component parts of equipment.

b. Provide indexed tabs.

6. Cover: Identify each volume with typed or printed title "OPERATING AND MAINTENANCE INSTRUCTIONS". List:

a. Title of Project.

b. Identify of separate structure as applicable.

c. Identity of general subject matter covered in the manual.

E. Binders

1. Commercial quality three-ring binders with durable and cleanable plastic covers.

2. Maximum ring size: As required (Minimum 1½-inches).

F. Content of Manual

1. Neatly typewritten table of contents, arranged in a systematic order.

    a. Contractor, name of responsible principal, address and telephone number.

    b. A list of each product required to be included, indexed to the content of the volume.

    c. List, with each product, the name, address and telephone number of:

        1) Subcontractor or installer.

        2) Maintenance Contractor, as appropriate.

        3) Identify the area of responsibility of each.

        4) Local source of supply for parts and replacement.

        5) Identify each product by product name and other identifying symbols as set forth in Contract Documents.

G. Product Data:

1. Include only those sheets which are pertinent to the specific product.

2. Annotate each sheet to:

    a. Clearly identify the specific product or part Installed.

    b. Clearly identify the data applicable in the installation.

    c. Delete references to inapplicable information.

H. Drawings:
